THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, AUGUST 4, 1911 NO. 1

PASS WOOL BILL

OFFERING BY LAFOLLETTE, MODIFICATION OF HIS FORMER MEASURE, PASSES.

VOTE STOOD 48 TO 32

Democrats and Insurgent Republicans Unite to Win Vote.—Reduces Raw Duty to Thirty-five Per Cent.

Washington, D. C. — A compromise wool bill offered by Senator LaFollette of Wisconsin, a modification of both his own and the house bill, was passed by the senate 48 to 32 through the union of Democrats and Republican insurgents. Upon this middle ground the Democrats, having secured a record vote on the original Underwood bill joined with the Republican insurgent forces.

The measure adopted reduced the raw wool duty to 35 per cent ad valorem and correspondingly reduces the duties on woolen articles.

There is some doubt as to what course the house Democrats will pursue with regard to the compromise bill. House Leader Underwood several days ago served notice that the house would not accept the original LaFollette bill.

Although President Taft has made no definite utterance to that effect it has been strongly intimated at the White House from time to time that he might feel called upon to veto a wool bill, passed in advance of a report on that schedule for the tariff board.

La Follette Defends Amendments.

In offering amendments proposing reductions in the duties on woolen goods Senator La Follette of Wisconsin, in a speech before the senate, took the position that these reductions, if adopted, would compensate the [illegible] the speaker continued, in some measure relieve all of the people of the United States who have been made to pay tribute to the woolen trust, long the pampered favorite of the tariff law. Two years ago, at the time we were considering the present tariff act, which left Schedule K practically unchanged, I proposed certain amendments. These amendments I have modified and offer as an amendment to the pending bill. I believe that the duties proposed by me on manufactured cloth are greater than are necessary to protect American manufacturers from European competition. However, bearing in mind that this is but a temporary measure to be followed, as I hope, by a more thorough-going revision and with the purpose of meeting the views of a majority of the senate to the end and that some reduction may be promptly secured, I shall offer for present consideration changes in the woolens schedule.

"The effect of the amendments to Schedule K, which I now propose, are as follows:

"Duty on clothing wools, 40 per cent; carpet wools 10 per cent; tops, 45 per cent; yarn, 50 per cent; carpets, 40 per cent; on cloths and all other manufactures composed entirely of wool or having wool as the component material of chief value, 60 per cent."

HUNDRED LOST IN TYPHOON.

Tokio and Yokohoma are Swept—Forty Bodies Recovered.

Tokio, Japan. — More than one hundred persons are believed to have lost their lives in the typhoon which swept over Tokio and Yokohoma. Forty bodies were recovered in the Suzaki district, including twenty-three in a house which was washed away before the tenants could escape. Many fishing vessels and small coastwise craft are missing.

Labor Would Punish Sleuths.

Washington, D. C. — Organized labor proposes to prosecute the Burns detective agency for its part in arresting the men charged with destroying with dynamite the newspaper plant of the Los Angeles Times. In an appeal for funds with which to defend the alleged dynamiters at their forthcoming trial, issued by the American Federation of Labor, it is declared that every man who was connected with the kidnaping of the McNamaras will be prosecuted to the full limit of the law.

Bailey Quits Committee on Privileges.

Washington, July 28. — Because he does not believe in the senate's method of taking testimony in investigations, Senator Bailey resigned from the committee on privileges and elections. He made no explanation to the senate, and the resignation was accepted without comment.

OVER NIAGARA IN BARREL

ONTARIO MAN TRAVERSED CATARACT IN SAFETY.

Sustains Only Superficial Injuries—Receives Worst Pounding in Rapids.

Niagara Falls, New York. — Bobby Leach, 49 years old, of Niagara Falls, Ont., went over the Horseshoe falls in a barrel and still lives. Though he was severely battered and bruised in the drop of 158 feet over the brink of the cataract, he sustained only superficial injuries and is able to be about his house. This is the second time in the history of the river that the cataract has ever been successfully navigated. Mrs. Anna Edson Taylor, of this city, made the trip in a barrel on Oct. 24, 1901, and came out alive.

Harassed by the police on both sides of the river, Leach was forced to make his start from La Salle, two miles and a half above the cataract, on the United States side. Two rivermen took him in a launch to Navy island, where everything was made shipshape and Leach was placed in the barrel, a steel affair, 11 feet long, with ends of wood. Leach was hung in a canvas hammock.

The barrel, with its passenger, was cast adrift just off the mouth of Chippewa creek, hardly a mile above the brink of the Horseshoe, at 2:52 o'clock and was quickly caught by the rush of the upper rapids. When 500 yards from the brink the barrel was caught in the tremendous current and raced to the chasm.

Within 200 yards of the brink it struck hard against a rock and a large section of the wooden end was broken off. As the barrel reached the crest it swung straight and went plunging down into the abyss on its long axis.

Hardly 30 seconds elapsed until it was seen, a red speck, careening in the spume below the cataract. With terrific outrush of the Horseshoe, caused by high water, the barrel went [illegible] down, tossing and tumbling in [illegible] caught the barrel by one of its handles. From that point the barrel was towed ashore.

Leach was bleeding and appeared in a bad way, but once out of the barrel he raised himself and waved to the crowds that lined the bank. He was badly exhausted and it was necessary to apply oxygen to revive him. He thought that his leg was broken, but examination showed that it was merely sprained.

TRAIN WRECK FATAL TO FIVE.

Between Fifty and Seventy-Five Hurt in North Carolina Smash.

Hamlet, N. C., July 28.—An excursion train from Durham, N. C., on the Seaboard Air Line railroad, bound for Charlotte, rushed head on into a freight train in the yards at this place today instantly killing five people and wounding between fifty and seventy-five.

Many of the injured will die.

Railroad Officials to Meet.

Chicago, Ill. — Executives of the transcontinental railroads, with offices in Chicago, will hold a conference soon to discuss the effect of the decision of the interstate commerce commission in the intermountain cases which materially reduce freight rates from Chicago to interior western points. Traffic officials of the Harriman roads meet August 3, in Chicago, to take up the matter.

16 Bodies Found on Maine Wreck.

Havana, Cuba. — Sixteen bodies have been recovered from the wreck of the battleship Maine so far, it was announced officially. All are now enclosed in seven metallic caskets, which lie on the main deck adjacent to the captain's cabin. None of them can be identified.

Railway Head Resigns.

Montreal, Can. — It is announced here that the directors of the Central Vermont railway have accepted the resignation of President Charles M. Hays. E. H. Fitzhugh, first vice president of the Grand Trunk railway, has been elected to lead the Central Vermont, while Mr. Hays remains as chairman of the board.

Banker Walsh Loses Again.

Washington, D. C. — The federal board of parole has decided not to consider the case of John R. Walsh, the convicted banker, to whom President Taft recently refused executive clemency unless the remaining indictments against him are in some way disposed of.

Diplomat Stricken at Card Game.

Paris, France.—Naoum Pacha, Turkish ambassador to France, fell dead at the Union Diplomats' Club. Naoum had taken a place at a card table and was in the act of taking up a hand when he fell backward.

WANTS A HEARING

J. A. TAWNEY WIRES DILLINGHAM FOR RIGHT TO TESTIFY BEFORE COMMITTEE.

HIT IN DARK, HE SAYS

Denies James Keeley's Statements—Asks Fair Play and Asserts His Right to Clear Matters.

St. Paul, Minn.—Entering an absolute denial relative to the testimony given by James Keeley, managing editor of the Chicago Tribune before the Lorimer investigating committee at Washington, former Congressman James A. Tawney sent a telegram to Senator Dillingham of the committee demanding the right to be heard before the committee.

Mr. Tawney's Telegram.

The telegram which Mr. Tawney sent Senator Dillingham is:

"St. Paul, Minn., July 26, 1911.

"Senator Dillingham, Chairman Lorimer Investigating Committee, Washington, D. C.

"Have just read testimony of Mr. Keeley of Chicago Tribune yesterday. I want to have entered of record with your committee my most solemn and emphatic denial of ever having had any connection, either direct or indirect, with the "Fireproof Magazine" of Chicago or any other publication seeking mail or any other privilege either from the postoffice department or from congress. That I have never been connected, either directly or indirectly, with any firm of lobbyists or other representatives of said magazine or other publication, or of any other interest seeking such mail or any other privilege from the government.

"And that I have never been requested by the "Fireproof Magazine" or by anyone claiming to represent to do anything either in congress or in the department in its behalf. That I have ever been offered [illegible] magazine or other publication, either directly or indirectly. That until I read Mr. Keeley's testimony I did not know that there was in existence a publication named The Fireproof Magazine of Chicago."

"The records of the third assistant postmaster general, which are at your command, will corroborate this statement. I would like to be summoned before your committee to make this denial under oath and to submit myself to any examination the committee may want to make. Answer: Winona, Minn.

"J. A. TAWNEY."

Washington, D. C. — Former Representative James A. Tawney, of Minnesota, was cleared from any criticism growing out of testimony of James Keeley, general manager of the Chicago Tribune, before the Lorimer investigating committee, that George Glavis had told him Mr. Tawney was "mixed up" in an alleged magazine lobbying matter. Chairman Dillingham read an emphatic denial telegraphed by Mr. Tawney and said as the committee considered there was no testimony before it in any way implicating Mr. Tawney it would not ask him to appear before it as a witness.

LAD ADMITS SLAYING BROKER,

Former Bellboy of New York Hotel Said to Have Confessed.

New York, N. Y. — Paul Geidel, a 17-year-old boy of Hartford, Conn., who was employed as a bellboy at the Hotel Iroquois Friday last, was arrested in connection with the murder of William Henry Jackson, the Wall street broker, who was found strangled to death in his room at the hotel.

Geidel was taken to police headquarters, where it was declared he confessed to Deputy Commissioner Dougherty and District Attorney Whitman that he chloroformed and robbed Jackson.

It is said that a stenographic report of Geidel's confession was signed by him and he was locked up at police headquarters on the charge of murder.

OLD CONVICT REFUSES PAROLE.

Missouri Prisoner in For 99 Years, Says He'll Serve His Time.

Jefferson City, Missouri. — Simon Begley, oldest prisoner in point of service in Missouri state penitentiary, refused to accept a parole by Governor Hadley. He was sentenced in the courts of Cedar county in 1892 for 99 years on conviction for murder. He declared he will serve out his sentence. He is 60 years of age.

Black Rust in Canadian Wheat.

Regina, Sask. — Deputy Minister of Agriculture Mantle said that reports coming to him indicate black rust in many portions of the Saskatchewan wheat fields, but that so far it had not become an alarming feature.

EDW. M. SHEPPARD DEAD

PNEUMONIA CAUSE OF PASSING OF NEW YORK POLITICIAN.

Power in Democratic Party and Mentioned for Many High Places.

Lake George, New York. — Edward Morse Shepard, the well known New York lawyer and Democratic political leader, who had been ill since the contraction of a cold in New York on June 16, died at his summer home here of pneumonia. The members of the family were at the bedside.

Mr. Shepard during his illness had rallied frequently and only Thursday was reported to show marked improvement. A bad turn came, however, and the patient sank gradually.

Edward Morse Shepard was one of New York's best known Democrats. A lawyer by profession, Mr. Shepard identified himself with the reform element in politics and has been mentioned for many public offices in the city and state.

Mr. Shepard was born in New York city [illegible] 1850. He loomed large in political life when as a Platt general [illegible] the prosecution of the noted [illegible] John Y. McKane and 20 others [illegible] for ballot stuffing at Coney Island in 1893.

McKane was an absolute boss within his [illegible] but Shepard broke his power and sent him to prison.

Though he had ofttimes warred against Tammany Hall, he was made the Democratic candidate for mayor in 1901, but was defeated.

Last year he was strongly considered as candidate for governor of [illegible] and later was urged for [illegible] to succeed [illegible]

[illegible] identified as a director [illegible] mining en[illegible] numerous articles [illegible] economic [illegible] mem[illegible]

[illegible] ties in Five Feet of Water.

Quincy Illinois. — The sidewheel steamboat St. Paul, carrying 220 passengers, from St. Louis, Quincy and intermediate points for St. Paul, struck a snag a mile above the Quincy bridge sinking in five feet of water.

Her whistle attracted a steamer to her side to render assistance.

As the boat is resting squarely on her bottom there is no danger either to passengers or cargo. The passengers were not taken off.

The Dubuque left a powerful pump on the St. Paul, and with the aid of ship carpenters from this city it is hoped to float the boat and proceed to Keokuk for repairs in the drydock.

POPE PIUS SERIOUSLY ILL.

Specialist Declares That Audiences Will be Postponed Indefinitely.

Rome, Italy. — Pope Pius X is seriously ill. This was virtually admitted in Vatican circles, and much concern is felt for him. Those about him say that the pontiff is haggard, very weak and depressed. He breathes with much difficulty as a result of the attack of laryngitis. Professor Marchiafara, the specialist, called into consultation, confirmed the statement that audiences would have to be postponed indefinitely. The pope's weak condition is still further emphasized by the fact that he can partake of very little food and has been place on a diet of milk and eggs.

PEACE PLANNED; RIOT OCCURS.

Chicago Peddler Shot as Strike Leaders Seek Settlement.

Chicago, Ill. — While leaders of the striking peddlers were holding a peace conference with Mayor Harrison which may result in the settlement of the strike, the most serious riot that has yet occurred since the beginning of the trouble resulted in the probable fatal shooting of a striker who led an attack on a grocery store. The police arrested several of the strikers.

In addressing a peace meeting of 4,000 peddlers leaders of the strikers announced their willingness to call off the strike if it was agreed to permit members of the peddlers' organization to return to work.

PORTUGUESE FAIL TO UPRISE.

Constant Warnings Keep Provisional Government Worrying.

Lisbon, Portu.—The monarchist invasion of Portugal from the north to be followed by a peasant rising which has been expected daily, has not yet materialized. The monarchist agents permit the information that first one day and then another has been fixed for the outbreak to fall into the hands of the government. The provisional administration is thus obliged to maintain expensive measures for defense and commercial and financial interests are kept worried.

MAY RAISE RATES

PROPOSES INCREASE IN COMMUTATION PASSENGER FARES IN EASTERN ROADS.

INCREASE IS REASONABLE

Pennsylvania Road Said To Have Excessive Rates — Proposed Raises on Other Roads Declared Reasonable.

Washington, Aug. 1.—Proposed increases in commutation passenger fares by the leading railways operating in and out of New York City today were held by the interstate commerce commission to be reasonable, generally, except in the case of the Pennsylvania, whose commutation rates are declared excessive and are ordered reduced.

Against the Pennsylvania railroad a special order is made by the commission requiring it to desist from exacting its present commutation fares to and from New York City by Sept. 1, and for not less than two years thereafter. For a monthly sixty ride ticket between New York City and New Brunswick, N. J., the commutation fare is cut from $11 to $10, and the road is ordered to readjust its commutation fares to and from other points in conformity with that fare.

In one particular instance on the Erie, Lackawanna and West Shore lines, the commission finds that the commutation fares are excessive, in that they exceed materially the charges of other roads for substantially the same service. While no order is made in respect to these isolated cases, the commission suggests the advisability of readjusting the rates so as to place them on a parity with their general commutation fare schedule.

Changes in Diplomatic Corps.

Washington, Aug. 1.—It was reported, on the best authority that President Taft has about decided to appoint John G. A. Leishman, at present American ambassador to Italy, as ambassador to Germany, succeeding David Jayne Hill, who resigned last spring. According to the same authority, Thomas J. O'Brien, now ambassador to Japan, will be sent to Rome to succeed Lieshman.

No decision, it is understood, has been made as to O'Brien's successor at Tokio. President Taft probably will have a last conference on the subject of diplomatic appointments with Secretary of State Knox this afternoon.

Deadlock Continues.

Berlin, Aug. 1.—The return of Emperor William to the capital has not affected the Moroccan negotiations contrary to intimations in the Paris papers that his majesty would change Foreign Minister Von Kiderlen Waechter's policy. The emperor, according to an official statement today, received a report on negotiations, but no details concerning exchanges have been given out.

Anglo-French reports regarding Togoland and Kameruns where it has been said concessions might be made by Germany in exchange for a strip of French Congo are unconfirmed.

Murderer Electrocuted.

Dannemora, N. Y., Aug. 1.—Charles L. Green, an Albany county farmer, was electrocuted at Clinton prison for the murder of his daughter, a girl of 14, on a farm near New Scotland a year ago.

The electrocution had twice been stayed by Governor Dix against the wishes of the condemned man, who expressed satisfaction with the verdict of the jury and said he wanted to die. A confession of Green's wife that her unfaithfulness had led to the shooting failed to save him.

Aged Woman Murdered.

New York, Aug. 1.—Her head nearly severed from her body, Mrs. Rose Spinol, 80 years old, was found murdered in her bed room in the third floor apartment on Second avenue. Beside the body was a large jack knife with which the crime had apparently been committed. A number of bloody finger prints on the knife handle furnished the only clue to the slayer, who gained entrance by means of the fire escape.

Propose to Pension Aged.

Washington, D. C., Aug. 1.—A pension of $4 a week for every man and woman more than 60 years old is provided for in a bill instituted in the house today by Rep. Victor L. Berger, socialist member from Wisconsin.

The representative included in his bill a clause that none of the courts of the country, not even the supreme court of the United States, should pass upon its validity.

Awakes from 105 Days' Nap.

Vandalia, Ill., Aug. 1.—After sleeping continuously for 105 days, Miss Hazel Schmidt, the 18 year old girl whose strange case has puzzled physicians for weeks, was awake for five hours and ate three meals. She said she felt no illness from her slumber. Attending physicians say the girl's trance is broken and she soon will be herself again.

WRECK, 8 DEAD

REGULAR PASSENGER AND EXCURSION TRAINS COLLIDE HEAD-ON IN MAINE.

FOURTEEN BADLY HURT

Frail Smoking Car Where Most Persons Met Their Death—Accident Due to Misunderstanding of Orders.

Grindstone, Maine. — Eight persons are dead and 14 seriously injured as the result of a head-on collision which occurred at the Bangor and Aroostook railroad station. The trains were a special of three light coaches containing about 150 excursionists and a regular passenger express.

Five of the dead were passengers of the excursion train. The three included the two firemen and the engineer of the special. The five passengers killed and all of the injured were in the smoking car, directly behind the engine of the excursion train.

Both trains were moving slowly at the time, one of them just pulling out of the station and the other slowing up for a siding where the trains were to have passed.

The accident appears to have been due to a misunderstanding of orders. None of the cars left the rails and the passengers on the regular train escaped with a slight shaking up.

The dead: Frank Sealy, son of the cashier of the Presque Isle National bank; Cloud Loomer, Washburn, Maine; Zerne Harris, Presque Isle; Fireman Gallagher of the excursion train; Fireman Wentworth, Brewer, Maine, of the regular train; F. W. Garcelon, engineer of the excursion train; Dr. Eugene Pipps, Presque Isle, Maine, and Harry Clark, Presque Isle.

Grindstone is a small settlement of not more than 50 persons, with no facilities for the care of the injured. They were cared for temporarily by physicians on board [illegible] train to be taken to [illegible]

WILL REBUILD WINONA MILL.

Directors of Bay State Milling Co. Plan Largest Plant in U. S.

Winona.—H. C. Garvin, manager of the Bay State Milling Company, the plant of which was destroyed by fire Friday night, causing a loss of $600,000, arrived in Winona Sunday. He had been spending his vacation in the East and was summoned home, word reaching him at Mt. Clements, Mich. B. J. Rothwell, of Boston, president of the corporation and representative of the Boston capitalists intreested, is also here.

A conference is scheduled when the matter of rebuilding the plant will be discussed. Already plans are under consideration for building on the site of the wrecked mill a modern fireproof structure which will be the largest flour mill in the United States.

It is said the plans, still in the rough, call for an expenditure of close to a million dollars.

DUBUQUE HAS $190,000 FIRE.

Lumber, Canning and Manufacturing Plants Are Destroyed.

Dubuque, Iowa. — Fire of incendiary origin destroyed property valued at $190,000, as follows:

Spahn & Rose Lumber Company, $50,000; Wienecke-Horr Canning Company, $40,000; Kretchmer Manufacturing company, $100,000. For a time the million dollar sash and door factories of the Farley & Loetscher Company, and the Car Rider & Adams Company were in danger.

Chicago Bohemians Honor Martyr.

Chicago, Illinois.—Twenty thousand Bohemians witnessed the unveiling of a statue of Karel Havlicek, Bohemia's martyr. Governor Deneen, Mayor Harrison, of Chicago, and a number of Bohemian speakers spoke.

DAILY MARKET REPORT.

Twin City Markets.

Minneapolis, July 31.—Wheat, September, [illegible]; Dec., $1.00⅝; No. 1 northern, [illegible]c; No. 2 northern, [illegible]; durum, 92c No. 3 corn, [illegible] white oats, 39¾c; barley, [illegible]; No. 2 rye, 79c; No. 1 flax, [illegible]

[illegible], July 31.—Wheat, September, [illegible] northern, $1.02⅝; No. 1 [illegible]

South St. Paul, July 31. — Cattle—Steers, $5.25@5.50; cows, $3.00@3.75; calves, $4.00@6.50; hogs, $6.25@6.75; lambs, $2.75@6.50.

Chicago Live Stock.

Chicago, July 31. — Cattle—Receipts estimated at 200; market steady; beeves, $5.10@7.25; Texas steers, $4.40@6.10; western steers, $4.00@6.70; stockers and feeders, $3.00@5.35; cows and heifers, $2.10@5.35; calves, $5.50@8.00.

Hogs—Receipts estimated at 9,000 market steady to 5c higher than yesterday's average; light, $6.80@7.35; mixed, $6.70@7.35; heavy, $6.45@7.30; rough, $6.45@6.70; good to choice heavy, $6.70 @7.30; pigs, $5.40@7.00; bulk of sales, $6.90@7.20.

Sheep—Receipts estimated at 8,000; market weak; natie, $2.50 [illegible]; western, $2.60@4.25; yearlings, [illegible]@5.15; lambs, native, $3.75@7.10; western, $4.50

The OUTDOOR WOMAN

By Ruth Alexander Pepple

COPYRIGHT BY OUTDOOR LIFE

ARCHERY A FAVORITE SPORT FOR WOMEN

A LESSON IN HORSEMANSHIP HANDLING THE REINS.

WITHIN the past few years representatives of outdoor sports among the women of this country have multiplied and increased to a greater extent than in any previous era. Although in the years past there have been a few devotees of the more strenuous sports and recreations, the modern woman has just begun to realize all that outdoor life means to her, and the benefits she may derive thereby.

A great number of the women who are today living a life of health and pleasure in the outdoor world have developed from timid, feeble beings of no physique whatever, whose only so-called pleasures were found over cards and other social functions the nature of which not only sap the physical, but impair the mental vitality as well. These women date their convalescent period from the time these enervating pastimes were abandoned for a life free from petty worries and cares—the life of the great outdoors.

What a blessing it would be to womankind if more husbands and brothers, being sportsmen themselves, would say oftener: "Come, go with me into the woodland's cool retreat, to the clear lake where lurk the wily bass, and the air is filled with the fragrance of growing things," or perhaps, "Come where Bob White is hiding in the lonely willow swale."

As a rule, man is, or has been, a selfish creature where sport is concerned, and until recent years has considered his work well done when after a fortunate day of sport he came home, glowing with exercise and vigor bringing the fish or game for the "meek and humble" wife to prepare. But mankind also is beginning to "see the error of his ways," and each season there are more and more recruits to the army of happy men who have fitted their wives out with all necessary equipment for the life outdoors, whether to meet the requirements of the gentle art of angling or the more exerting though not less congenial recreation with the gun.

In the United States, those women who have asserted themselves, either for their inherent love for nature, or the acquired attachment that invariably springs up—the result of close communion with nature—have proven the equal, and not infrequently the superior of man contestants, in games that try the utmost skill and endurance in his or her special sport. To the woman who has, as she will probably express it, "lost her health," and whose strength and courage with which to combat every-day tribulations is fast deserting her, the one physician who can answer every time as positive to a permanent cure is old Doctor Outdoors, and his prescriptions are many and varied. This physician will never advise a timid, nervous woman to go for the first time, armed with shotgun, nor would he tell a woman who never had held before a more formidable weapon than a "straight flush" to start out after big game without some preliminary instructions in this line. The first advice would be: Learn to love the outer world, cultivate a taste for natural beauty, learn to look, learn to listen, learn to walk correctly, to tread the woodland paths lightly, and learn to breathe, fully and freely expanding, exhaling, till the blood coursing merrily through every vein brings a warm glow to cheeks that have long been pinched and faded.

In using the terms, looking and listening, I refer to the cultivation of the senses, without which life in the open air loses much of its enchantment. Cultivate the sense of hearing; when out alone in the woods, pause occasionally and note how many different sounds you can hear distinctly and remember. Perhaps it is the music of a stream as it ripples softly over a bed of gravel; maybe it is the voice of the waterfull as it tumbles over great bowlders or through a narrow gorge, and simultaneously you may hear the twitter of feathered songsters in the neighboring trees, and the cry of some great bird of prey on its pilgrimage through the air, while away off in the opposite direction comes the faint tinkle of a cowbell. While grapsing these separate, distinct sounds and storing them in your mind your eyes have kept busy. Perhaps you may notice a bent or broken twig or a bush near by, so your eye involuntarily follows the course of the path and seeks the next shrub to find more bent in the same manner. Your conclusions are rapid. Some animal has passed that way. As the twigs alone, and not the branches being mutilated, you know the animal has not rushed by in fright, and the nipped leaves higher up will indicate the leisurely passage of some herbivorous animal, and if you feel inclined to follow this trail you will be rewarded in the end by finding a stray horse, as at first surmised. Not big game, far from it, but you have learned one lesson in the book of woodcraft, which is only a page of the many volumes yet in store for the earnest student. It may have been smaller tracks that have claimed your attention, tracks that are visible in the soft earth. Learn to distinguish those of a rabbit from those the squirrel has made. This is easy if you will be member that in running the rabbit places both fore feet close together and spreads the hind feet apart, while the squirrel places all feet at nearly equal distance apart. In using the olfactory sense you can stand perfectly still and tell what trees or bush is in blossom.

Truly, one season spent out of doors in cultivation and close observation will be of more real benefit than years over books

These things, then, are the first rudiments toward that higher education, the education of the outdoor woman. Perhaps the most important thing to be considered during the preparatory stage is the clothing to be worn, for without comfortable attire, advanced lessons will be of little real benefit. Although the outing costume varies with the individual taste, and also with the expense to be considered, still the most popular and the one universally adapted to most needs is a suit consisting of a plain short skirt worn over knickerbockers, a coat of the same material, which may be made plain for camping purposes alone, or supplied with the proper pockets for hunting and fishing. A soft flannel shirt will be found more convenient than a waist, and stout shoes worn with leggings are lighter and less fatiguing than the high top boots, although they may be worn to advantage in colder weather or where there is a rough tramp to be taken. A soft felt hat, or cap with generous visor to protect the eyes completes the costume.

After simplicity, durability is an item to be considered. Strong, serviceable duck, canvas and khaki cloth are durable and easily cleaned, but of recent years whole suits of waterproof material can be had at such reasonable cost that it is folly and a greater expense to make one's outing garments at home.

Cultivate a love for nature, which you can do with neither rod nor gun, the use of which implements of pleasure should come after the first rudiments are mastered. With new strength and nerve gained through a life out of doors will also come new courage and confidence.

In some respects the prevailing variety of sport is characteristic of that portion of country wherein it is most indulged. In the southern and some of the eastern states, fox hunting is one of the most popular of recreations, as the physical features and topography of the country make it the natural home of the fox, red and gray; and in the sunny south for generations fox hounds have been bred with the exhilaration of the chase in view; horses have been judiciously bred in order to keep up with the hounds; and who may say but that the beauty of the famous women, especially of Kentucky, has not been established through generations of riding to hounds in the open air, for it is a sport that is indulged in to a great extent by women, and it is worthy of note that they have proved to be the most fearless as well as most graceful of riders.

In the wilder portions of the west where the turbulent broncho and the fiery mustang hold supreme sway, riding is one of the prevalent modes of enjoyment, although in a very different manner from that of riding to hounds, for the western horsewoman differs as much from the cultivated horsewoman of the south and east as the broncho differs from the thoroughbred; and yet the daughters of the west are fearless riders, many of whom are expert ropers and spend their spare moments in the healthful, albeit rude, atmosphere of the camp.

Archery claims many devotees who are very enthusiastic over their favorite pastime, but as yet the game of William Tell has not gained national pre-eminence. It seems to be growing in popularity, however.

More than a century before our beloved Izaac Walton had published his immortal work, "The Complete Angler," another book was written on the subject so dear to the heart of the angler—this by a venerable dame, Julianna Berners. It was called "Treatyse of Fysshynge wyth an Angle," and even in that remote time (1496) there must have been the same existing charm of outdoor life and proof that a woman might profit by this recreation either beside still waters or running stream, as demonstrated in the old dame's words: "It nede be the dysporte of fyshynge wyth an angle that causeth a long life, and a mery." And truly, what life can be more full of the sweet, seductive charm than an outing beside a running brook?

Take a warm day in early spring when all nature is awakening from her long winter sleep. Go away off "far from the maddening crowd" to some sequestered nook where the trees are beginning to wear their green dress of the season, and where the lark sings. Take with you the light rod and little coaxer, and try your luck with the finny tribe. It is not all luck, however, and it is interesting as well as instructive to note under what conditions the greatest amount of success in angling can be attained.

From a practical viewpoint, angling has much to recommend it as an enjoyable means of recreation, as the sport need not be made an expensive one, although with angling as with all other sports, it may be made as expensive as one would wish, according to the richness of the outfit to be employed and enjoyed. Many an old fisherman, and any little boy will tell you that he can catch more fish using a pole cut from a neighboring tree, with home-made tackle, than with the most elaborate set of bamboo rods and flys ever manufactured.

Trap shooting is a great sport and claims a number of women devotees in this country as well as abroad; it is said that Queen Margharita of Italy is an adept with both shotgun and rifle, trap shooting being her favorite diversion.

Gradually but persistently the outdoor woman and lover of this means of recreation is asserting herself, and at present time plans are under way to perfect an organization composed of the women trap shooters of the United States. At the head of this movement is one of the most enthusiastic and able representatives of trap shooting among the fair sex. More than ever women are beginning to realize how much outdoor life means to them, and they will soon find that no one but the doctor has a kick coming if they spend their vacation in the wilderness or on the plains.

My advice is "Throw your powder rags and medicine bags to the first stray goat you meet and come with me into the open," thereby placing your name upon the great roster as an outdoor woman.

NOTES from MEADOWBROOK FARM

By William Pitt

Mange has many causes.

For market grow the field beans.

Milk quietly, quickly, cleanly and thoroughly.

Take no chances with an old boar; always keep behind him.

A hen has the ability to reproduce herself over many times in a year.

Of all chick troubles bowel complaints are the hardest to cope with.

Cattle, horses, hogs and sheep grow nights and Sundays, every day in the year.

Don't feed the little chicks more than they will eat up clean in five minutes.

Stable manure contains much vegetable matter and this adds humus to the soil.

Tramsworths are good rustlers, very prolific, and the meat is of the highest quality.

Brush the udder and surrounding parts just before milking, and wipe them with a clean damp cloth.

Most varieties of pears should be picked when mature, but not ripe, and ripened in a cool, dark place.

There is no other part of the farm from which so much is expected or which is more neglected than the pasture.

Duck eggs do not hatch as well if they need to be washed. Therefore keep the duck pen bedded with clean litter.

Too heavy feeding clogs the appetite and too slight feeding makes the pig investigate the weak points in the fence.

The poultry raiser is now finding out that the early hatched chicks are more vigorous and profitable than the late hatches.

We cannot market our corn stalks and hay in different cities, but we can supply the world with meat and stock products.

Harsh treatment of a broody hen may cure her of a desire to sit, but it may also kill the hen. Gentle measures are better.

No goat should be called a milch goat that does not give an average of at least one quart of milk per day for four months after kidding.

The poultry raiser who is too lazy to keep his poultry house absolutely free from vermin does not deserve success nor will he have it.

Farmers are beginning to find out that chickens pay better on an average than farming, as the chicks will grow whether it rains or shines.

It is not always possible to regulate the price for which milk or butter-fat will sell, but it is possible to control the cost to a certain extent.

Medium-sized hogs are now most in favor. It is best to feed hogs for only eight or ten months. After they are a year old the feeding is not profitable.

When the horses rub their tails it is sometimes a sign of worms. To effect a remedy feed equal parts of salt and wood ashes every day for a week.

Promptly remove any animal not in good health, and reject her milk. Never add an animal to your herd that is not perfectly vigorous and healthy.

When butter is gathered in the cream in granular form it is never overworked. Working out buttermilk and working in salt is where the overworking is done.

Kaffir corn is becoming very popular as a poultry feed. In feeding value it is similar to corn. Consequently it should not be used as a single feed except for fattening.

During the molting period in the fall the old birds should be fed some animal food, a little hemp seed or sunflower or other green food in addition to their grain ration. Keep the birds from wet and chilling conditions.

Too many chicks in one yard, coop or brooder is disastrous. Older chicks will trample on and crowd out younger ones, and the ones last hatched stand small show for feed growth, or even life. It is best to separate broods widely all over the orchard.

Drown the rats and mice.

Silage is convenient for feeding.

The silo helps dispose of the hired man problem.

Keep the stables clean, well ventilatd, lighted and drained.

A warm, dry nest is the best place you can provide for the brood sow.

Milk fever is invariably confined to the improved and high producing cows.

The silage that is left in the silo will come handy before the summer is over.

Do not permit your chicks to go into the cold, wet grass in the early mornings.

By judicious planting a fine supply of onions may be secured throughout the season.

Included in the long list of feeds available for the farm stock, grass has no equal.

Rub off the water spouts of a tree as soon as they appear. You can do it with your fingers.

A $10 rooster is generally cheaper than a $2 one. The good blood will tell the second year.

Pigs that are apt to have "differences of opinion" should be separated. Fighting takes off flesh.

Oyster shell is absolutely the best shell-making food for the hens. Keep it before them constantly.

Don't plant any flowers in straight rows except hollyhocks or sunflowers, or plants for borders.

For family eating plant the white pole cherry beans among the sweet corn, at first or second hoeing.

If you think of setting out an orchard and have had no experience better hire a man to show you how.

Roosts or perches should not be more than two feet above the ground and one should not be higher than another.

Newly broken colts should not be worked too hard. They are apt to overstrain themselves and be injured for life.

A balky horse is made so by a cranky or cruel driver, and can rarely be cured. So be very careful in breaking the colts.

Many farmers who keep cows lose a large share of the profit because the milk is not produced and handled in the best way.

Live stock husbandry gives us year around employment, converting idle time during the winter season into profitable labor.

Watch for cabbage bugs and cabbage worms. These insects usually cause trouble when the weather gets dry and food is scarce.

Whether the season is wet or dry, or the land rich or poor, thorough cultivation is the chief "secret" in having a successful garden.

The brood sow that is kept upon pasture with a little supplementary protein food stands the best chance of making the biggest profit.

The onion is akin to the turnip and cabbage; you must see that the roots are well in the ground, but need not be so particular about the bulb.

The good dairy cow has a capacity for a tremendous amount of feed and this feed must be furnished her if she is going to yield the best returns.

The really successful farmer is the man who solves the problem of labor. It is well nigh impossible to get help at once competent and intelligent.

Chicks that are sheltered from the weather and given plenty of good water will find much of their feed, and prove the most profitable crop on the farm.

In selecting a ram always pick out one that stands square on his legs, shows courage and masculinity. A slow, poky animal will prove a disappointment.

Remove the milk at once from the stable to a clean, dry place, where the air is pure and sweet. Do not allow cans to remain in stables while they are being filled.

A New Zealand dairy report says that an acre of pasture on the island of New Zealand returns all the way from $15 to $45 per acre when sold in the form of butter fat.

The experienced poultryman only smiles when he hears some one boast that his hens have laid right along during the moult. He knows full well that the poultryman must pay heavy toll for this unnatural drain on the hen's vitality.

The fattening chicks may be crowded in cramped quarters, but crowding is fatal to the growth of the best breeding birds, hence the sooner we cull the flock and give the breeding birds more room, the better are our chances of growing fine birds.

The Mystery of the Persian Heiress

By ROBERT NAUGHTON.

(Copyright, 1911, by F. L. Nelson.)

IT was Die Walkure night of the Niebelungen Ring series at the Metropolitan Opera House, four years ago, as I remember distinctly, that this unusual entanglement came to light. Rand and I were in the company of General and Mrs. Edward Blashfield, and were chatting in the box after the second act, when [illegible] usher came up behind Rand and [illegible]:

[illegible] r. Lawrence Rand? There is a [illegible] in the next box who wishes to see you for a moment."

With an apology Rand left us, and almost immediately I heard the sharp click of a rubber band against the palm of his hand, a little innocent-appearing signal which we often used, and supposing that he wanted me, I too left the box and entered the next one.

With his chair hitched up close to the one in which sat Rand was a man of remarkable appearance. Of medium height and slender, with a dark olive skin, flashing black eyes and a wealth of straight, black hair, splendid teeth and extremely fine features, he was easily recognized as an Oriental of high caste. His forehead and certain facial lines indicated a fine mind and a delicate, romantic, sensitive nature. His age was about thirty-eight.

Rand was endeavoring to repress an excited out-pouring of some narrative, evidently until I could hear it also.

"Mr. Duncan, this is the honorable Khan Nadjian, whom you will recall as the importer and expert in Persian rugs. His place is just around from the club. He has a difficult problem for us, and as he speaks Italian better than English I need you badly. Otherwise, I should not have called you away from our friends."

Reducing the statement of the noble Persian to important facts in their proper proportion, the story was as follows:

For ten years he had occupied the second and third flooors of a house in East Sixty-third street, sub-letting it from the owner, a Mrs. Terrance Malvern. At present, Mrs. Malvern had been gone from the house for a period of four months on a visit to a married daughter, leaving the establishment in charge of her brother, a middle-aged person named John Coughlan, a helpless, dependent sort of individual, likely to do the most childish and foolish things.

The first floor of the house was occupied by a bachelor surgeon, Dr. Justin Huntley, a specialist in gun-shot wounds. There was an old colored maid-of-all-work who came above the first floor each morning to care for the apartments of the two bachelors. She never left the basement after ten o'clock each day, unless summoned, and Nadjian never left the house until after eleven.

For three months his apartments had been entered in his absence by some unknown visitor as regularly as he left the house, the unknown nearly always disturbing, very slightly, some of the small objects in his library, as if looking for papers among his private documents. Several times he had returned in fifteen minutes with the purpose of catching the intruder, only to find that the unknown had come and gone. There were but two means of entrance to the house, the basement door opening on the areaway at the street, and the door to the doctor's floor, approached by the steps from the street. There was a vacant lot on the east side of the house, and an air shaft ten feet wide on the west side, between the house and a towering apartment structure which shut off access to the roof.

For a week a trusted clerk from the rug store had seen no one coming or going from either of the front doors. Yet signs of visitation were apparent when Nadjian returned each day. It was proof conclusive, therefore, that either Dr. Huntley or John Coughlan was clandestinely endeavoring to get possession of something valuable which they knew, or imagined, Nadjian to have among his effects. There were many rare tapestries, pieces of Damascened plate, paintings on ivory, antique jewels and other articles, both large and small, of high virtu, yet nothing had ever been taken away.

"And now, you see, gentlemen," Nadjian concluded, "I have told you everything. I have absolutely nothing that either my dear friend, the doctor, or the miserable Coughlan could want that they have not had every opportunity for taking, but one or the other persists in coming to my rooms secretly. If Coughlan—poof, he is a slow fool, and I do not care. If Dr. Huntley, I am grieved; I am hurt, I am mortified to the depths. I should not want to live, for he is more to me than my brother. Such a friend as the heart of man could hope to find once out of million of these human wretches—so I'll not give up my comrade—Mon Dieu, but I must know, or I shall go mad. I must know at once!"

Rand and I exchanged glances. Nadjian's sincerity and feeling were evident.

"If we returned home with you tonight, Khan Nadjian, we should reach your house after twelve. Where would John Coughlan be in the natural course of events?"

"In bed in the basement."

"And Dr. Huntley?"

"He always retires at eleven, unless we play at cards."

"Very well, with your permission we will go home with you. Yes? Duncan, will you telephone to Tom Rahway to pack a suit case with our clothes for tonight and tomorrow, and take his post opposite Khan Nadjian's house, watching who comes and goes, and waiting our arrival."

Rand then begged Mrs. Blashfield's permission to have the Khan join our party, and after the opera we three drove to Sixty-third street. We found the house quite as Nadjian had told us, distinctly detached, with the two entrances.

In the Khan's apartments privacy had been sacrificed to art and there was no means of shutting them off from the hall. The doors had been removed and the doorways hung with jade and steel bead portieres. His first floor, the second floor of the house, consisted of four rooms, all furnished in an Oriental taste that was most luxurious. The Khan's own bed chamber, in an alcove of which he had his bath, was decorated as the interior of a Cingalese house. The front chamber on this floor was fitted to represent a bazaar in Turkestan. The dining room was paneled with carved black woods in imitation of the cabin of an ancient Chinese war junk. The library, which was the first room entered off the hall and which then led, by three doors, into the dining room and the front and rear bed rooms, was the most fantastically decorated of the four. It was designed to represent the forest camp of some northern sheik, the trunks of trees being book-cases, while the vistas in the walls were sliding panels with books behind them. The desk in the center of the room was a huge sandstone rock, hollowed out to accommodate drawers which opened up at the touch of a knob. Grass mats carried out the effect on the floor and in one corner of the room, as if supported on a rock and a fallen tree was a bed roll of rich stuffs, making a surprisingly solid and comfortable couch.

"What cigarettes do you smoke?" asked Rand suddenly.

"Always Teofani. So does the doctor."

"Does Coughlan smoke a Greek Theopopulous? Here is tho butt of one, still warm."

The Khan's eyes seemed about to start from his head. He could scarcely answer that he did not know what Coughlan smoked, but stood with his eyes fastened on tho bit of cigarette, following Rand's gaze at the smoke still floating about the ceiling.

"Have you a spool of black silk thread?" inquired Rand.

The Khan said he had not.

Rand walked slowly through the rooms of the floor until his eyes lighted on a red silk cord supporting an ancient Tartar dagger.

"May I take that cord?" said he.

The Persian loosened the cord and gave it to him.

Rand led the way back to the library, and cutting a section three feet long from the cord, unrolled the twist and gave us each a strand.

"Let us sit down here under this strong light and carefully separate each thread of the smallest possible division. I want fifty threads of silk as nearly like a spider's film as I can get them."

For an hour we worked at the difficult, tedious task in silence. The threads then lay stretched on a sheet of blotting paper, clinging lightly to its fuzz.

"I hope you will understand me, Khan Nadjian, when I say that for perhaps some days I must have absolute control of these two floors, your movements inside the house, and, in fact, every detail of your establishment, if you wish me to solve this problem for you. Are you willing to undergo some probably severe inconveniences?"

The Persian vowed he was willing to endure torture if need be.

"Very well, then," answered Rand. "Sit down at your desk and go over your papers and correspondence just as you usually do; in fact, as if you felt yourself perfectly safe from intrusion, while Mr. Duncan and I make a detailed survey of the other rooms. First, however, conduct Mr. Duncan to the skylight, which I noticed was reached by a closet stairway, and allow him to look at it carefully."

I knew Rand had some little plan which he was not willing that Nadjian—perhaps I also—should know.

We returned in about ten minutes and he was still sitting smoking, apparently just as we had left him. I observed, however, that almost all of the little quasi invisible threads of silk were gone from the blotting paper. There were ten, perhaps, left.

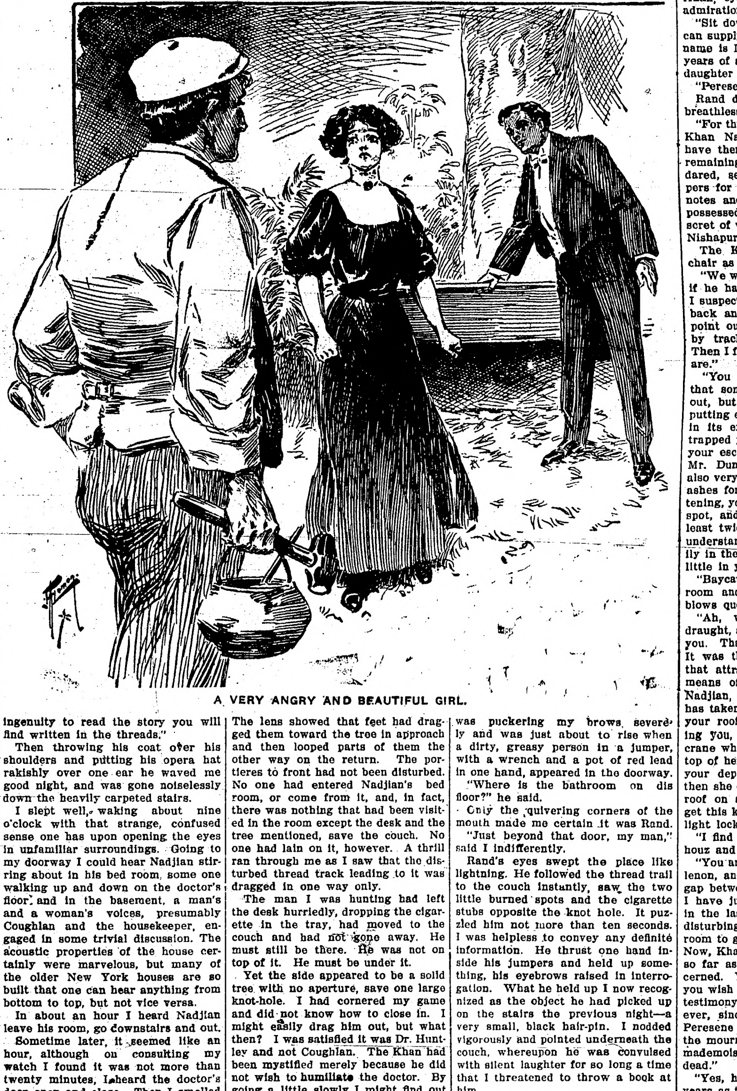
"Remember, work for the next half hour over your private papers exactly as you would if you felt yourself in the most complete security. At the end of half an hour go to your room and retire. In the morning go out by the hall door. Do not enter this room on any mission. Remain at your store until you hear from me or from Mr. Duncan. Leave your papers carelessly on the desk. If you wish, Mr. Duncan will occupy the bed room on the floor above, for I shall shortly leave the house. So, I shall bid you good-night. Now, we will go upstairs, Duncan. Good-night, Khan Nadjian."

The Persian bade us a gracious good-night, and we went upstairs.

"Now," said Rand, "If he follows my instructions we are safe from intrusion. We will go down and see what evidence he has supplied us. Please do not enter the library but stand in the door way until I have finished."

We went down to the library and I stood in the door as Rand had requested while he took out his lens, turned on all the lights and went over the room like a beagle on a fresh scent; examining the floor, the strange furniture, the trunks of the imitation trees and finally the papers on the table. For fully five minutes he stood gazing at these papers. Then he got down on his hands and knees on the floor and began carefully stroking his hand back and forth, moving backwards until he came to one of the tree bookcases in the wall. There he drew himself up with that relaxed look of satisfaction on his face that I had so often seen there when the day's work was ended and to his satisfaction. He then came to the doorway in which I was standing.

"Come on, Duncan," he said. "We're all right now. Wait till I stretch these remaining threads across these bead curtains. Now no one can enter the library without leaving a record. In the morning I will appear at the basement door and keep the old servant below stairs. You remain in your room until you hear Nadjian go out and then stand your ground until you hear sounds in the library. I am going to leave to you the honor of capturing this intruder but I shall not be far away. It depends upon your own ingenuity to read the story you will find written in the threads."



A VERY ANGRY AND BEAUTIFUL GIRL.

Then throwing his coat over his shoulders and putting his opera hat rakishly over one ear he waved me good night, and was gone noiselessly down the heavily carpeted stairs.

I slept well, waking about nine o'clock with that strange, confused sense one has upon opening the eyes in unfamiliar surroundings. Going to my doorway I could hear Nadjian stirring about in his bed room, some one walking up and down on the doctor's floor, and in the basement, a man's and a woman's voices, presumably Coughlan and the housekeeper, engaged in some trivial discussion. The acoustic properties of the house certainly were marvelous, but many of the older New York houses are so built that one can hear anything from bottom to top, but not vice versa.

In about an hour I heard Nadjian leave his room, go downstairs and out.

Sometime later, it seemed like an hour, although on consulting my watch I found it was not more than twenty minutes, I heard the doctor's door open and close. Then I smelled the strong odor of an Oriental cigarette wafted in from the hall. I heard no ascending footsteps but, it may have been my imagination, I thought I heard a light step on the stair from my floor to the Khan's first floor.

I waited a few minutes and then noiselessly tip-toed down the stair to have a look at the silk thread.

It was carried away. The intruder was trapped. But where was Rand? My two hours were not up. Should I enter the Khan's appartments and confront the visitor? The smoke of the Oriental cigarette rolled out of the doorway. I heard nothing of Dr. Huntley on his floor. I was sure now that he was the trespasser. My anger at this evident treachery of the Khan's trusted friend rose at the thought and, regardless of what effect it might have on Rand's plans, I brushed aside the portieres and stepped into the Persian's library, my hand on my revolver, and fully expecting a disagreeable encounter.

The library was absolutely empty. I could see from the doorway into each of the other three rooms and I was equally sure no one was there. Yet the room was full of blue smoke that hung in wreaths and rings in the sunlight. The papers on the table were untouched, as far as I could see, but in the tray lay a fresh Theopopulous, but, I touched my finger up to it. It was still warm.

I stood perfectly motionless for fully ten minutes, trying to think what my next move should be, when, suddenly, I saw one of the threads lying at my feet where the light struck it strongly. Looking more closely I saw they were laid systematically about the floor.

A great feeling of relief rushed over me. Rand, thinking I had followed his bent the night before, had merely said "read the story in the threads." I had thought only of those on the portieres and in the halls, and, I had very nearly bungled the entire scheme.

I began my survey, moving around the room to the left. Where the threads were straight they had been undisturbed, and where disturbed or carried away, the mysterious visitor had passed. Rand had thus tracked Nadjian's movements in the room during our absence the night before, and the stroking he had done had been merely to once more straighten the threads.

I found nothing disturbed until I came to a certain tree. It had evidently been opened to examine the books within. From it a pathway of disturbed strands extended directly to the Arab campstool before the desk. The lens showed that feet had dragged them toward the tree in approach and then looped parts of them the other way on the return. The portieres to front had not been disturbed. No one had entered Nadjian's bed room, or come from it, and, in fact, there was nothing that had been visited in the room except the desk and the tree mentioned, save the couch. No one had lain on it, however. A thrill ran through me as I saw that the disturbed thread track leading to it was dragged in one way only.

The man I was hunting had left the desk hurriedly, dropping the cigarette in the tray, had moved to the couch and had not gone away. He must still be there. He was not on top of it. He must be under it.

Yet the side appeared to be a solid tree with no aperture, save one large knot-hole. I had cornered my game and did not know how to close in. I might easily drag him out, but what then? I was satisfied it was Dr. Huntley and not Coughlan. The Khan had been mystified merely because he did not wish to humiliate the doctor. By going a little slowly I might find out which it was without letting my man know that he had even been suspected, let alone neatly caught, by Rand's cunning devices.

Making a careless noise with a newspaper taken from the file hung on a tree, I strode over to the couch, re-examining the silk threads, confirming my first observations, and stretched myself at full length on the bed roll. I took the tray with me to more minutely examine the cigarette stub. I lit a cigarette, and by fixing my attention on it I grew very still and distinctly heard a slight stir below and the rapid breathing of some one undergoing suppressed excitement. I was right. My man was there.

Suddenly I had to make myself rigid to keep from starting to my feet. I had, while thinking deeply, dropped my lighted cigarette on the grass mat beside the couch. It had begun to smoulder, and out of the corner of my eye I caught a glimpse of a hand thrust out to hastily extinguish the incipient conflagration. Another cigarette; another fire; another appearance of the hand in self-preservation, and I would get a look at the hand. That would be enough.

Acting my part carelessly, I rattled my paper, tossed about, and missed fire on two matches as I lighted my cigarette. I enjoyed it for about five minutes, and then dropped it with a red coal on the end, fairly in front of the knot-hole. As soon as the grass nap began to smoke a hand shot out and smothered the fire—a little hand bearing many jewels—the white, slender hand of a woman!

I had no trouble in lying still for some minutes, paralyzed by sheer amazement. Then my brain began to work. The whole hypothesis had been wrong—our whole hypothesis, no, Khan Nadjian's and mine, for though I had not the remotest idea what Rand's had been, I had every reason to be sure now, from the process he had pursued that it did not coincide with that of the Persian. But, whatever the explanation of this affair, I was in a deeper quandary than I had been before I hit on the expedient of the burning cigarettes. I had as game for the chase an unknown woman to whose identity there had not been indicated the slightest clue in anything we had seen or that Nadjian had said. Doubtless Nadjian would not know who she was if I hauled her out and held her until he could be summoned. Again, he might be either guiltily or innocently involved in some plot or scandal which any precipitate action on my part might bring to a crisis that would be bad for him. I was puckering my brows severely and was just about to rise when a dirty, greasy person in a jumper, with a wrench and a pot of red lead in one hand, appeared in the doorway.

"Where is the bathroom on dis floor?" he said.

Only the quivering corners of the mouth made me certain it was Rand.

"Just beyond that door, my man," said I indifferently.

Rand's eyes swept the place like lightning. He followed the thread trail to the couch instantly, saw the two little burned spots and the cigarette stubs opposite the knot hole. It puzzled him not more than ten seconds. I was helpless to convey any definite information. He thrust one hand inside his jumpers and held up something, his eyebrows raised in interrogation. What he held up I now recognized as the object he had picked up on the stairs the previous night—a very small, black hair-pin. I nodded vigorously and pointed underneath the couch, whereupon he was convulsed with silent laughter for so long a time that I threatened to throw a book at him.

At last he signed to me to lie quiet, went into the bathroom and tinkered about for a little while, came out and measured around the room with a pocket rule. I knew he really was reading the signs of the threads. Finally he went out in the hall and upstairs, where I could hear him for a time, then all sounds died away and for a full half-hour I lay there, hot and cold with suspense.

At length I heard him coming down. He went directly to one of the imitation trees, slid back a panel in a lofty branch and took out some small pieces of well-worn paper, brought them to the desk, sat down, read them over with great care, using his most powerful lens for a final examination, then, turning about, said with great kindness and gentleness:

"Mr. Duncan, will you be so good as to rise from that divan, lift the side and assist Mademoiselle Melenon from beneath it? My dear child, please come out. It is no further use to attempt to conceal anything."

A soft sobbing broke out under the couch. After fumbling a moment with what I had supposed was the solid tree side, I found it was hinged at the top and swung out easily. The instant I opened it there rolled out and sprang to her feet a very angry and beautiful girl of a marked Greek type. There was no mistaking here nose and brow. She would have darted out the doorway, but Rand, with a long spring, intercepted her and gently forced her to a seat. Her tears dried instantly and her eyes blazed defiance. She began some hot speech in broken English, but he interrupted her:

"Wait, wait, just a moment, mademoiselle, you are not to talk. I will tell you the story of this matter."

With tightened lips, clenched hands, and her splendid eyes changing in expression from fear to entreaty and then to proud anger, the girl sat silent and waiting while Rand turned over the papers on the desk. A step sounded on the stair. He covered the scraps with a folded newspaper just as Khan Nadjian, wonder written on his face, stepped into the room.

"You sent for me?" he asked of me, not recognizing Rand in the plumber at his desk.

"I telephoned half an hour ago for you to come at once. I was talking from this young lady's apartment," said Rand.

From her apartment, half an hour ago! How was that possible when he had been in the house, as I knew positively, ever since he came in when I lay on the couch?

"Who is this young lady?" asked the Khan, eyeing her with very evident admiration.

"Sit down and I will tell you. You can supply the final explanation. Her name is Ione Melenon. She is twenty years of age; was born in Beirut, the daughter of P. Melenon."

"Peresene Melenon's child?"

Rand disregarded Khan Nadjian's breathless exclamation.

"For three months you have watched Khan Nadjian leave his house and have then entered his rooms, always remaining as long as you wished or dared, searching his books and papers for the few old scraps of rough notes and maps which you knew he possessed and which contain the secret of wealthy turquoise mines near Nishapur, Persia."

The Khan leaned forward in his chair as if about to leap on Rand.

"We would have worked more easily if he had confided these facts to us. I suspected he was holding something back and last night allowed him to point out the way to his own secret by tracking his steps on the floor. Then I found the papers and here they are."

"You were hoping, Miss Melenon, that some day he would leave them out, but you were not careful about putting everything you disturbed back in its exact place. When you were trapped you hid until you could make your escape, under that couch where Mr. Duncan caught you. You were also very careless about cigarettes and ashes for, when on the next floor listening, you dropped many ashes in one spot, and you left cigarette stubs at least twice too often. I cannot quite understand why you smoked so steadily in these rooms. You smoked very little in your own."

"Baycause when smooke is in they room and frawn door opan, smooke blows queeck."

"Ah, very clever. The upward draught, as well as your ears, warned you. That is good, isn't it, Duncan? It was the movement of the smoke that attracted my attention to your means of entrance. You see, Khan Nadjian, she has been on your track, has taken apartments on a level with your roof, in the flathouse neighboring you, has a light steel extension crane which she thrusts out from the top of her window after she has seen your departure from the house, and then she daringly swings over to your roof on a short rope. How did you get this key which you left in the skylight lock?"

"I find out they locksmeeth of they houz and pay heem."

"You are a clever woman, Miss Melenon, and a brave one to cross that gap between this house and the next. I have just used your method twice in the last hour. Please forgive my disturbing your little things in your room to get the information I needed. Now, Khan Nadjian, the case is ended so far as Mr. Duncan and I are concerned. You may call in the police if you wish and we will give the needed testimony. I would like to hear, however, since you seem to know, who Peresene Melenon is, or was, for by the mourning frame on his picture in mademoiselle's rooms I take it he is dead."

"Yes, he is dead, almost as many years as this poor girl has been alive. She may have been born since he died before the mouths of the guns in Teheran. He was my best friend, though many years my senior. We were prisoners together after he had found those turquoise fields—prisoners on false charges, and I escaped. I did not know he had a child, though I found his wife's grave in Damascus ten years ago. I am an exile, but I will go back to the turquoise fields some day. No, Mr. Rand, there is no need for the police; this poor girl and I will settle this matter between ourselves."

And they did, for about a month later they were married, and not long since I saw a paragraph in the Engineering News saying that an English syndicate had paid a huge sum and would exploit the fields.

The Northern Light

CHAS. W. LATTA

Editor and Publisher.

Published every Friday at Holt, Marshall County, Minnesota.

Subsdription Price: $1.00 per year, strictly in advance.

The Northern Light! This is the first issue of this long-felt-want-filler. Look it over carefully and let us know what you think of it. In coming to Holt and starting this newspaper we do not claim to have done anything great or out of the ordinary. We came because we had first looked over the field carefully and were satisfied that here was an excellent opening for a live little newspaper; so we are here, and have sprung a new Northern Light. We hope to make and keep it as ever new and interesting as the northern lights we have named it for.. When we see those wonderful lights, no matter how familiar we may be with their appearance, we stop and look, and admire their beauty and variety. They were created for a good purpose, and they go on serving that purpose throughout the ages. This new, if lesser, Northern Light has for its main purpose the advancement of Holt and its territory—a territory the equal of any on earth in its great natural resources. We shall also endeavor to bring and keep the people of our home community in closer touch with each other and their joys and sorrows as they happen, and also keep before the public the knowledge of the good things that here exist. As an incident of our undertaking we hope to earn a good living for the editor and his family, and to the end that we may carry out these things properly we ask the hearty co-operation of the people of Holt and its splendid territory. If we receive this support we hope to keep the Northern Light bright and interesting during the years to come, earnestly striving to do good to all.

The Board of Control has taken an adjournment until August 8th in the Whittier hearing. A great many witnesses have been examined and it is now freely predicted that Whittier will be cleared. It is announced by some of the city papers that ex-senator Stephens has promised to bring some pressure to bear on the governor and play hob with certain members of the board in case Whittier is not removed. Poor little governor; he has altogether too many strings attached to him.

We are sending copies of this issue to a number of other newspapers throughout northern Minnesota and we will appreciate the courtesy if all of these will give the Northern Light a permanent place on their exchange list. We expect to make this paper worth having on the exchange table as well as in the home.

Cut the weeds before the seeds mature. This advice applies to town and country. Weeds growing in the streets of a town tend to injure its reputation and appearance, and along country roads and in the fields they are an eyesore to landseekers and do a lot to keep out settlers.

Watch For Our Announcement In the next Issue

C. H. GUNHEIM

Victor Berger, the socialist congressman from Milwaukee, created a sensation at Washington on Monday by introducing a resolution providing for the pensioning of needy people over 60 years of age, who had lived up to certain requirements as American citizens. The pension would be on a weekly basis, ranging from $1 to $4, according to the needs of the individual. There is room for a diversity of opinion on this proposition, but there is food for thought in it just the same.

The free list bill seems almost certain to pass congress as readily as did the Canadian reciprocity bill. What will Taft do when it is presented for his signature? If he signs he will open the democratic tariff revision program, and, if he vetos the measure, he will merely postpone the inevitable and strengthen the antagonistic feeling against the administration in the districts that are sore over reciprocity.

The Standard Oil Company will re-organise as thirty-three different concerns. This means that the dear public will have to pay fat salaries to that many sets of officers in addition to what they have been paying. Oil will soon get another boost in price.

Spreading It On Thick.

Last week the Thief River Falls Times handed us the following:

"Holt, the thriving little village north of this city on the Great Northern, is going to hav a newspaper, the first issue of which will be published next week if the plans of its editor mature. Charles W. Latta will be 'the man behind' in this case and the village can rest assured that it will have a live publication. Mr. Latta is a pioneer newsppper man in this section. Years ago he was identified with the St. Hilaire Spectator, later with the Plummer Pioneer, and still more recently with the Crookston Press. Charlie is a good writer, and more to the point, an energetic booster, and the brotherhood is glad of a chance to welcome him back into the fold."

And here is another one from the Crookston Press:

"Chas. W. Latta, with his family and household goods, left for Holt, Minn., Wednesday morning of this week. Mr. Latta will engage in newspaper work at Holt and has also filed on a claim near there. Mr. Latta is an able writer and efficient newspaper man and the people of Holt are to be congratulated upon securing him for their town."

BIG ENOUGH TO WORK.

Artists do not all look alike, any more than grocers or typesetters do. Nevertheless, many persons are surprised at an artist who is not small, anemic, delicate of feature and decorated with a flowing necktie. Such a person, says a writer in the Boston Traveler, lately visited the studio of a certain artist in that city.

The man in question wears a big red beard, and stands six feet and some inches high. His shoulders are broad and his muscles hard from continued exercise. A woman entered his studio and asked for the artist.

"That's him, standing over there," the attendant said.

The woman looked over to where the artist stood, towering like an ancient viking, and gasped. "Why," she whispered, in surprise, "he's big enough to work, isn't he?"

AMERICA HAS OWN LANGUAGE

Of Course It Is Descended From the English, and Like It Has Many Dialects.

A reader wonders whether our language—English, of course, in the beginning, and perhaps so it should be unto the end—could be called American, as we speak of the German language, the Italian, the French, the Spanish, the Russian and so on.

Surely. Ask any Britisher, as he hears us do it, whether we speak his tongue or "American."

Italian is descended from the Latin. French is descended from the Gaelic, the Latin, the Scandinavian, the German and half a dozen other ancestors of widely different nationalities. American is descended, or is descending, from the English.

Truly there is the American language, with a provincial dialect for nearly every state in the Union. But few of the European countries can make faces at us on that score. A Maine man can converse fluently with a South Carolinian, but a Londoner who wishes to swap talk with a Yorkshire farmer has to have an interpreter to do it. And you can walk from London to York in almost an afternoon.

MUSIC OF EERIE MADNESS

Hearer Was Enthusiastic But Violinist Was Only Putting on a New E String.

Walter Damrosch, at a dinner in Chicago, praised the music of Debussy.

"I see with gratification," he said, "that Debussy has had a great success in his score for the Martyrdom of Saint Sebastian, the mystery play that he and Gabriele d'Annunzio have just produced together in Paris.

"I am glad that Debussy's music is succeeding. It is such beautiful, simple music—music a child can understand. It isn't like most of our modern music, which puzzles people to death."

Mr. Damrosch smiled.

"A lady at a musical at Long Branch," he said, "approached a celebrated violinist and exclaimed enthusiastically:

"'I so admired that last piece you played! It had a kind of wild, sad beauty—an eerie madness that thrilled me to the heart. Was it, may I ask, your own composition?'

"'Madam,' the other answered coldly, 'I was putting a new E string on my violin.'"—Washington Star.

WHERE THACKERAY STUDIED

The lover of Thackeray who makes a pilgrimage to the temple must not confine his attention to Brick court, for that was only one of the novelist's temple homes. In 1831, when Thackeray became a member of the temple, he commenced his studies at 1 Hare court by reading with William Taprell, and in 1848, when he was finally called to the bar, he took chambers in Crown Office row, sharing them, it is said, with Tom Taylor of Punch. His Crown Office row chambers have disappeared, but Hare court, in which a disastrous fire was once extinguished with beer because the Thames water was frozen, still stands.—London Chronicle.

LAW A POOR PROFESSION.

"Johnson said: 'You must not indulge too sanguine hopes, should you be called to our bar. I was told, by a very sensible lawyer, that there are a great many chances against any man's success in the profession of the law; the candidates are so numerous those who get large practice so few . . . that the great risk was, that a man might pass half a lifetime in the courts and never have an opportunity of showing his abilities.'"—From Boswell's Life of Johnson.

RELIGIOUS DENOMINATIONS.

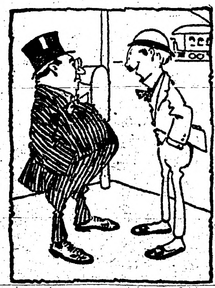
Of the English-speaking religious communities of the world there are 29,200,000 Episcopalians, 18,650,000 Methodists of all descriptions, 15,500,000 Roman Catholics, 12,250,000 Presbyterians of all descriptions, 9,230,000 Baptists of all descriptions, 6,150,000 Congregationalists of all descriptions, 3,250,000 Free Thinkers, 2,860,000 Lutherans, 2,600,000 Unitarians, 5,500,000 belonging to minor sects and 17,000,000 or no particular religion.

APPETITE TO SUIT.

"Your visitor, I noticed, merely pecked at his dinner."

"Oh, but you must know he is a birdman."

THE REASON



De Quiz—Are you in favor of a safe and sane Fourth of July?

De Whiz—No; let the boys have all the giant firecrackers they want.

De Quiz—But such things are dangerous.

De Whiz—I know it. I haven't any boys.

SO BUSY

"I don't see how he can put in all his time at golf."

"Well, I believe he's not busy at the office these days."

"Not busy at the office? Why, how's that?"

"He's too busy at golf."

TERRIBLE LIAR

Little Rube—Say, ma, Willie Green he come back from New York a awful story-teller.

Mamma—What did he say?

Little Rube—Why he says ther Singer buildin' is higher than our new court-house.

BELIEVES IN INDUSTRY

Postmaster—Why, Bill, you know you ain't got no letter for 14 years. What d' you keep askin' fer?

Bill—So's th' make ye arn yer salary. I hates to see a postmaster with a reg'lar sinecure.

HE KNEW BETTER

Hix—I'm in hard luck—down to my last dollar.

Dix—Don't kick until you are down to the last dollar of your last friend.

Farm Lands and Farm Loans

HOUSEWIVES

Do you want to know about a wonderful new time, health and money-saving kitchen convenience?

Then you should see the complete line of "1892" Pure Spun Aluminum Cooking Utensils now on exhibition at your dealers.

This ware is guaranteed by the makers for 25 years. It is absolutely pure, wholesome and thoroughly hygienic, will not crack, scale, peel, break, rust, tarnish, scorch or burn.

PURE ILLINOIS 1892 ALUMINUM THE ORIGINAL

TRADE MARK

It is light weight, easy to handle and easy to clean; makes kitchen work a delight instead of drudgery; saves your money, time, fuel; protects your health against metal poisoning and serious troubles resulting from chipping of small particles into the food, which is one of the dangers from the use of the old style enameled wares.

You buy patent carpet sweepers, egg-beaters, dish washers, clothes-wringers and many other time and labor saving conveniences, but there is nothing that will prove a greater practical household blessing than the "1892" Pure Spun Aluminum Ware.

Lose no time in seeing for yourself what it will do. Your money back if this ware fails to do what is claimed for it.

Flax	$1.91
Wheat	.93
Barley	.50
Oats	.45

Bring us the news.

When in town call at this office and let's get acquainted.

—HAY STUMPAGE—I have several more good tracts of hay land to rent. Call or write. J. O. Quisberg.

S. S. Kolden transacted business at Thief River Falls last Thursday night returning next morning.

—WANTED—Some one to put up hay on the SE 1-4 Sec. 36, East Valley township. Apply at this office.

Ludvig Monson and Oscar Knudson left on Wednesday for Langdon, N. D., where they intend to spend the harvest season.

Miss Christine Reierson went to Thief River Falls to make a visit with friends and take in the sights at the County fair.

D. B. Bakke was up from Thief River Falls on Friday looking over the business of the Holt State Bank of which he is president.

Olaf Mikkelson was in from his claim in Adgar township on Monday to do some shopping and reports that he is getting nicely settled and expects to like farming better than running a station on the G. N.

Wm Pape, of Parkers Prairie was here Tuesday looking over farm lands with a view to investing. He was greatly pleased with the country and surprised to find it so good and so little known to the outside world.

Ole J. Vaule, one of the prominent lawyers of Crookston, returned to that city on Monday after spening about ten days visiting with his family who are sojourning with Mrs. Vaule's sister on her homested east [illegible]

[illegible] next meeting will be held on the 20th inst at the Carl Larson home.

S. S. Kolden, Ed. Ellingson and Erick Knudson left on Wednesday for Fargo to bring up a threshing outfit which the last two named gentlemen have just purchased, and which will be here ready for work at the opening of the threshing season.

Rev. Ordahl conducted services on Sunday in the local church, morning and afternoon. He was married just a short time ago and on Sunday was most pleasantly surprised by receiving a purse containing over $30, which the congregation presented with congratulations and best wishes.

Martin Matson was in Tuesday evening from his home southeast of town to look after some business matters. Mr Matson has a good sized field of flax that is an unusally fine crop, and the prospects are that it will yield enough to put its owner in the automobile class when harvested.

It is worthy of comment that three passenger coaches are now being run every day on the train over this line. It goes to show that the Great Northen officials recognize the fact that passenger traffic in this part of the country is about 50 percent greater than it was a year ago.

Why News are Scarce

Funny isn't it, how things happen in bunches? Owing to the negligence of some employe of the Great Northern railroad a lot of our office equipment was missent in shippng which caused a delay of a week in getting this Light to begin shining. Owing to the negligence of somebody else all of our printing material is not yet here and we are short on some very necessary portions to get out a newspaper. Then, again, we are so little acquainted here as yet and so have found difficulty in locating local news items. We might add that the other people in town are so rushed with business that they have not had time to call at the printery and post us on the happenings. In view of all this we dont feel that this issue of the paper is quite all that it ought to be; but most of these obstacles will shortly be overcome and then a newsier paper will be the result. Isn't that something to look forward to?

Dakota Grain Crop Light

A lengthy report of crop conditions in the Red River Valley and North Dakota appeared in Tuesday's Grand Forks Herald. This report indicates that in the Valley wheat and other small grains are a good crop, though not remarkably heavy. In many parts of North Dakota, outside the Red River Valley section wheat is reported variously as practically a failure, a 5 to 8 bushel crop, and a half crop. Oats and barley in general are said to be very thin on the ground and poorly headed up, and the yield will be away below an average crop. This looks as though putting up hay the Mud Lake distsict would bring better returns than going to help in the Dakota harvest and threshing.

Holt 17, Humboldt 6.

A picked up ball team from Holt drove too Humbolt on Sunday and played a game of ball that ended in a score of 17 to 6 in favor of the Holt boys. During the first three innings the home team had all the best of it and then the visitors began [illegible] some bases. They stole [illegible] over, [illegible] diamond [illegible] one at home.

Buy Minnesota State prison binder twine. You can get it at C.H. Gunheim's

The Holt Mercantile Co. will receive a line of 10 cent bargains on sale Monday, August 7th. Dont wait until the last minute to take your choice.

Preparations are being made for a big dance to be held at the M. W. A. hall in Holt on Saturday evening the 12th inst,. The best music obtainable will be had and supper will be served at midnight. A big crowd is expected to attend and a good time is assured.

Nels Engebretson had the honor of being the first resident of Holt to hand in a dollar for a year's subscription to this paper. We think it worthy of public acknowledgement, and at the same time would suggest that we have room for a whole lot more. Have you subscribed yet?

HAY PRICES ARE HIGH

Splendid Crop In Mud Lake District Should Bring Lot of Money

There is a very strong demand for hay this year and a lot of the settlers in the Mud Lake district, who have no other crop, will probably make good money by cutting and baling their hay for shipment. S. Svenkeson and Ed Horian commenced cutting hay on section 11, of East Valley township, on Monday, July 24th, and on Monday evening last they had finished seven large stacks estimated to contain about 100 tons of fine hay. This will give some idea of what the hay crop there is like.

Reports from other points on this branch of the Great Northern are to the effect that baled hay is now selling for $13 per ton on the track, and it is not unreasonable to expect that the price this winter will be eqally as good. All of South Dakota is suffering from hay shortage; so is southern North Dakota, western Iowa and southwestern Minnesota. The people there must have hay and they are willing to pay a good price for it.

In spite of all this, however, there will be thousands of tons of fine hay in this territory that will go to waste for lack of labor and equipment to harvest it.

Bad Fire Near Thorwick.

Word was received in this city Thursday to the effect that the home of Soave Brokke, near Thorwick, was completely destroyed by fire Wednesday forenoon. The building was a total loss, and only a few of the personal effects were saved. The fire originated in the upstairs of the house, supposedly from matches with which the children were playing. Hard and energetic work prevented the fire from spreading to the other buildings on the place and to several tons of hay which was stacked near there

A Splendid Opportunity.

Is there a bright boy or girl in this vicinity who really wants a good business education? We will give such a boy or girl a three months' course of tuition in the Crookston Business College in exchange for a little work for this paper. Please call at this office and learn full particulars.

Auction Sale

An Auction Sale of live stock and farm machinery will be held in Holt

MONDAY, AUGUST 14,

beginning at 11 o'clock, A. M.

The following property will be sold:

- 1 gray horse, weight about 1,400,

B. L. BACKE, Clerk.
O. C. BRENNA, Auctioneer.

HE SHOULDN'T HAVE DONE IT

Carrie—You seem to think a lot of Clarence.

Cholly—Yes, he once saved me life, the deah fellah.

Carrie—Indeed! How?

Cholly—Gave me a cigarette when I was ten miles from town.

HE WAS ON HIS WAY BACK

Story of the Man Just Out of the Penitentiary and the Loquacious Barber.

This story is blamed on Scamp Montgomery at the Friar's club. Mr. Montgomery alleges that the story, as he relates it, actually happened. Mr. Montgomery's statement is offered without prejudice.

"A man had just been released from the penitentiary," said Mr. Montgomery, "and the first place he headed for was a barber shop. He wanted to get the traces of his prison-made haircut rubbed down smooth. The barber spotted him in a minute.

"'Just out, hey?' said the barber.

"'Yes,' said the customer. 'And I'm in a hurry. Give me a haircut and a shave, and do it quick.'

"'How long have you been in?'

"'Four years,' said the ex-prisoner. 'Hurry.'

"'How did you like it?'

"'Pretty good. Hurry.'

"'Have to work hard?'

"'Never mind. Hurry.'

"'Four years,' said the barber, pausing to look romantically out of the window. 'And me at liberty every blame minute, goin' hither an' yon, as you might say, and stayin' up all night if I wanted to, and runnin' down town to take in a show. Gee! Four years. That's sure tough luck. What was you in for?'

"'For killing a jackass of a barber,' howled the customer. 'And I'm on my way back.'"—Cincinnati Times-Star.

WHY, OF COURSE

Hoax—I can't see any similarity between becoming a congressman and baking good bread.

Joax—Isn't success largely a matter of dough in both instances?

"TIGER" WAS HARMLESS.

The rumor that a huge tiger was stalking the Chiltern district of Victoria, Aus., caused considerable panic there recently. Mothers were afraid to let their children out of their sight, and for a few days the schools were unattended. The other day matters reached a climax when a forest-worker returned to the Chiltern village badly scared, and declaring that he had sighted the tiger. A hunting party was organized, who followed the animal's tracks. Suddenly to the horror of the party, just when they had entered the grounds of a private estate, the "wanted" beast suddenly bounded toward them. But fortunately before shots were fired, it was discovered that the supposed "tiger" was only an innocent large mastiff, whose coat bore stripes very like those of the real jungle animal.

PLAYED WITH THE WOLF.

There was an astonishing sequel the other night to the escape of a big gray wolf from a private menagerie at Sheepshead Bay, N. Y. Two keepers, assisted by the police, searched for an hour until they found the animal playing with a group of little children in a yard. The children, believing the wolf to be a new kind of dog, had made friends with him at once when he approached. The wolf did not discourage the advances of the children and kept his temper even when youngsters clouted him with sticks and pulled his ears and forced him to eat crackers and candy.

AS TO CLOCKS.

"What an elegant timepiece that is!" said the old-time friend.

"Yes," replied Mr. Cumrox; "that's about as elegant a clock as money will buy."

"You were once content with a much simpler affair."

"Of course. Nobody wants to waste more than a dollar on a clock that wakes him up and tells him when to go to work. But when it wakes him up and reminds him that he doesn't have to go to work he feels more friendly and liberal."

SERIAL STORY

The Girl of My Dreams

A Novelization of the Play by Wilbur D. Nesbit and Otto Hauerbach

Novelized By **WILBUR D. NESBIT**

Copyright by W. D. Nesbit

CHAPTER I.

Harry Swifton hummed a song to himself and threw a little more speed into his roadster.

He had every reason to be happy. Long regarded as a settled bachelor, though young enough to be the sort of chap all the girls were setting their caps for, he felt that this was to be the really great day of his life. Lucy Medders and her father were coming to visit him; his sister Carolyn was coming home from boarding school especially to play the hostess, the home had been made spick and span for the occasion, the sun was shining, the little birds were singing in the trees of the park, his roadster was running smoothly and—well, he hadn't a care in the world.

As he took corners in the driveways without slackening speed he murmured:

"Good little buzz wagon! You're the cupid that started all this."

In memory, he could see again that day of the summer before when in the same machine he was whizzing along a country road. Something happened, the machine skidded, with the usual result.

When Harry came to his senses he was lying on an old-fashioned hair sofa, in an old-fashioned Quaker home—but he thought he was in heaven.

Above him bent a Quaker damsel, demurely beautiful and distractingly calm. She was bathing his brow with a cloth wrung out of cold water to which some camphor had been added.

"Do thee feel better?" she asked, in the softest of tones.

"It depends," he managed to say. "If you're going to stop this because I'm better, I'm going to have a relapse."

Then into the room came a stalwart old Quaker.

"Has the young man recovered, Lucy?" he asked.

"Yes, father," she said. Harry sat up, with an effort.

"I don't know how to thank you, sir," he said. "It was lucky that I went into the ditch right in front of your house."

With the word "lucky" he looked meaningly at Lucy, but that self-possessed maiden did not seem to catch his double meaning.

The result of the accident is not hard to guess. Harry found himself so bumped and bruised that it took a fortnight for him to be well enough to return to his home. And in that fortnight he and Lucy became so well acquainted that it then became necessary for him to run up to see her—a mere matter of a hundred miles—once every week. And now he had induced her father to bring her to visit him and his sister.

He reviewed in his mind the events of the days since the accident. Pleasant thoughts, those, for a young man. They take his mind off the immediate surroundings, however.

Automatically he whirled around another corner—then began doing things with the brake, but too late. Twenty yards before him approached another auto. In it sat a couple oblivious to their danger. There was a smash and a crash, a shriek and a yell. And then the three people picked themselves up.

The man in the other auto leaped to his feet first and shook his fists at Harry. The lady gathered her hair into a coil again and exclaimed:

"My hat! My beautiful hat!"

Harry followed the direction of her glance, and saw the object of her dismay. A handsome hat of yellow straw, adorned with large red flowers, was hopelessly entangled in the steering gear of his machine.

He extricated it—or what he could of it—and offered it to her. But with a tearful exclamation of despair she refused it.

"Scoundrel!" shouted her friend. "Vy do you go running around killing peoples, und ruining deir hats?"

"My dear count!" cried the lady. "Not so loud!"

But the count was not to be calmed. In spite of Harry's efforts to explain matters, he continued his staccato expressions of wrath and vengeance, until, giving up the idea of straightening matters out, Harry popped into his own machine, skilfully ran past the other auto, and resumed his homeward ride. In a moment the count and the lady were in their seat again, the count wheeled his machine about, and the pursuit began. By some deft turnings and twistings Harry managed to evade them and at last reached home.

He dashed into the house, eager to change his clothes and be ready to go to the station to meet Mr. Medders and Lucy. "Pigeon" Williams met him. Pigeon, as he was affectionately called, was a young man who tried his best to be a chum of Harry—for the reason that he was unusually attracted by Harry's sister Carolyn. It was natural that Pigeon should be at Swifton's that morning. He wanted to help Harry have things ready to entertain Lucy and her father, and besides he thought it would cheer Carolyn up to see one of her old friends on her own arrival.

"Is Carolyn here?" Harry asked, as he came in.

"Sure," replied Pigeon. "She got here half an hour ago—mad as the dickens because you didn't meet her at the train. Why didn't you? If I'd known you weren't going to, of course I could have gone."

"I meant to," Harry replied. "But I had a bit of a smash-up in the park."

"Smash-up? Again?"

"Nothing that amounted to much. Head-on bump into one of these runabout things—run about a day and then blow up. German dignitary in it, with a dashing brunette. No wonder he couldn't see me coming. He had to look at her."

"Didn't hurt them?"

"No. Just knocked the breath out of all of us. And her hat fell off, and my machine chewed it up. Look."

Harry dug into his pocket and produced the brim of the lady's hat, with a trailing string of red poppies. Pigeon laughed.

"Keep it for a souvenir?" he asked.

"Don't know. The German fellow got mad, and I came away in such a hurry I forgot what I was doing. Stuck the thing in my pocket absentmindedly, I guess."

"He got mad! No wonder."

"I think he's real peeved. When I made my get-away he got his old cook stove into action and tried to follow me. But I escaped."

Harry went into his room and Pigeon sat down.

"How's Carolyn looking?" Harry called to him.

"Fine and dandy. Say, Harry," Pigeon went on, maliciously, "the fellows have it in for you."

"In for me! Why?" asked Harry, in muffled tones, tugging at a collar button.

"They say you're a quitter. You used to be strong for stag parties, and all that, and now you don't care for anything but the country—and a country girl."

"That so?" Harry said, coming out. "Well, let 'em say what they please. I'm for the country—that's where you go for pure air, green fields, natural flowers, and natural girls. Pigeon, I'm through with all this bachelor stuff. No more of the stag suppers and poker parties for yours truly. I'm ready to quit and be good—if my plans work."

"I think you're dead right, Harry," Pigeon replied, solemnly. "Judging from my own experience. There's nothing in this bachelor life."

"Your experience? Here, Methuselah! Take a cigar. Why, you're not even old enough to use a safety razor, boy!"

Pigeon blushed boyishly and felt of his tender mustache with an embarrassedly guilty expression.

"You're always rubbing it in on a fellow," he complained.

CHAPTER II.

Harry laughed sarcastically, and in the midst of his laugh Carolyn dashed into the room. A jolly, romping girl, just at the age when a girl doesn't know whether to keep on being a girl or to consider herself a woman, she paused for a moment at sight of Pigeon, then lost her formality and ran to Harry to greet him.

"Isn't she some girl, though?" Harry cried to Pigeon, with his arms around his sister. "Have to keep my eyes on you, from now on, young lady! You're getting to be too big and pretty."

Harry Swifton.

"I'm not too big!" pouted Carolyn.

"Not a bit—and you couldn't be too pretty," Pigeon earnestly declared.

"I'll have to keep my eye on you, Harry," Carolyn giggled. "Wait until Lucy comes. Do you call her 'thee?'"

"I haven't turned into a whole Quaker yet," Harry answered. "Now you run along and see that this house looks like something."

"You'd better get some one to expurgate this den of yours," Carolyn flashed at him as she left the room. "Lucy and her father may be shocked at some of the things here."

"I'd like to know what there is in here to shock anyone," Harry said to Pigeon.

"Oh, nothing much," Pigeon chuckled. "But maybe that picture of the ballet girl and that figure of the Venus de Milo, and some of the other highly decorative effects are not quite what Lucy has at home."

"Why, those are works of art."

"Here's General Blazes to see you, Harry," called Carolyn from the hallway.

"Come right in, general!" Harry said. General Blazes, pompous, irascible and dignified, was Harry's attorney in several matters having to do with the estate left him by his father. He entered the room as gravely and as impressively as though he were approaching the bench of the United States Supreme court, and said:

"Good morning, boy. Here"—taking a packet from his inside pocket—"here are the deeds, all duly signed and sealed. I believe you will need no further advice from me."

"Thank you, general," Harry said, taking the documents. "That's mighty good of you. I appreciate your kindness in bringing them in yourself."

"No trouble at all, I assure you. I was passing on my way to my offices."

"Won't you have a little nip of something to strengthen you for the walk?"

"No, thank you. I am rather in haste. I am slightly worried about Mrs. Blazes."

"Worried? Why, I trust she is not ill."

"Not at all. She left early today, to shop for a sick friend."

"Shopping for a sick friend," chuckled Harry. "Are they having special sales of sick friends?"

The general ignored the jest, as, indeed, he ignored all jests.

"After that," he continued, "she was going to attend a luncheon where the ladies were to meet this Count von Fitz, who is such a social lion now."

Socrates Primmer Was a School Teacher Who Considered Himself a Poet.

"I've heard of him."

"Well," the general remarked, "I am dallying here when I should be hastening on. My wife should have been at home by this time. By the way, I don't believe you have met Mrs. Blazes."

"I met two of your wives at different times," Harry smiled; for the matrimonial experiments of the general were subjects of much comment.

"She's not one of the two," the general replied. "They left me by way of Reno long ago. I'm not a bam dit sorry."

Harry laughed again, for when the general became excited it was his habit to get his words twisted, sometimes with ludicrous effect.

The general regarded Harry's amusement with calm disapproval.

"My boy," he said, dropping his hand on Harry's shoulder, "let me give you one bit of good advice—not legal. When you marry for the third time—"

"But I haven't married my first yet," Harry protested.

"You will, however. And when you marry for the third time, don't marry a young, beautiful woman."

"Don't?"

"No. Don't. Half the time she's have you making a fam dool of yourself."

Having delivered himself of this sage observation, the general stalked to the door, turned and bade Harry farewell, and started out, to bump against a woe-begone person, who was coming in at the same moment.

"I—I beg your pardon, humbly!" exclaimed the newcomer, in a thin, high, weepy voice.

"Br-r-r!" grumbled the general, brushing by him.

The newcomer glided in. His long, dank hair hung down to his collar, his white, thin hands plucked with melancholy grace at the roycroft tie he was wearing, and his eyes, which were set deep in his head, gleamed weirdly.

"Alas!" he said, "it is you!"

"You're a good guesser, Primmer," Harry said, grasping his hand. "I'm glad you could come to see us."

Socrates Primmer, a distant cousin of Lucy, and a school teacher who considered himself a poet, had accepted Harry's off-hand invitation to come and visit him at the same time as Lucy and her father were to come. Harry had not dreamed that Primmer would come, for he knew Primmer had long considered himself a suitor for the hand of the demure Quakeress. Nevertheless, here he was, and in the hand that was not adjusting his necktie was held a large hatbox, labeled, "Mlle. Daphne."

(TO BE CONTINUED.)

Liniment.

One cup vinegar, one cup turpentine, one raw egg, put in bottle and shake well. A most excellent liniment for man or beast.

GATHERED SMILES

No Answer to This.

Thomas A. Edison was explaining to a reporter the part played by M. Branly, the new French academician, in the discovery of wireless telegraphy.

The poor reporter, a little bewildered by all the talk about Hertzian waves, transmitters, volts, ohms and so forth, ventured on a question that made Mr. Edison smile.

"That question," he said, "reminds me of the city father who rose and said:

"'Mr. Chairman, I'd like to know, for my constituents' benefit, whether this here proposed hydraulic pump is to be run by steam or electricity.'"

In Time of Need.

"Now, would any one present like the prayers of the congregation?"

"I would be glad to have them."

"Are you about to start on a hazardous journey?"

"Not exactly, but I have just remembered that I forgot to mail a letter my wife gave me, and I know she has found it in my other clothes before now."

Suspicious.

Bank President—What's the matter?

Bank Vice-President—I was just thinking. I sat next to our cashier in church yesterday and I don't quite like the way he sings "Will they miss me when I'm gone?"—Puck.

Deduction.

"It is no wonder the police fail to get knowledge of fights."

"Why so?"

"Well, a mill is a cent, isn't it?"

"Yes, but what of that?"

"Doesn't it take ten mills to make one scent?"

Johnny Did It.

Indignant Master—What on earth have you been doing to my rug?

Housemaid—I didn't do it. It was Johnny. He's been running the lawn mower all over it.—London Sketch.

Doing Uncle Sam.

Husband—My dear, do your duty to your country.

Wife—If I can, dear, but those customs inspectors are so sharp.

CURTAIN LECTURES.

Mrs. Binks—My husband says you were with him last night. What did your wife say when you came home so late?

Mr. Winks—I really don't know. I can just remember that I woke up three times, and she was still talking.

A Strenuous Trip.

Vacation time he hies away.
His heart beats gladly in his breast;
But when he's had his holiday
He totters home in search of rest.

Appropriate Contribution.

"And after that eloquent appeal of the missionary to arrest the heathen on the downward path, all you put in the box was a cent."

"Well, I thought if they wanted to arrest the heathen, the best thing to send in that direction was a 'copper.'"

Notable Exception to the Rule.

Knicker—It is said that you can keep a donkey from braying by attaching a weight to its tail.

Bocker—Nonsense! The Democratic donkey has had Bryan tied to it for 12 years and brays as loud as ever.—Judge's Library.

What Did She Mean?

"I'm quite a near neighbor of yours now," said Mr. Bore; "I'm living just across the bay."

"Indeed," replied Miss Smart, "I hope you'll drop in some day."—The Housekeeper.

Snobs and Others.

"It is something to rub elbows with the nobility in London during coronation week."

"Of course it is something, but whether something worth while or not, depends altogether on your point of view."

Not Boycotted.

Labellor—Have you seen the walking delegate's bride?

Carder—Yes.

Labellor—Is she pretty?

Carder—No! Even he'd have to admit she's in the unfair list.—Puck.

A Neighborly Scheme.

"Tommy, you ought to play funny tricks like the Katzenjammer kids."

"I can't think of nuthin' funny, Mr. Nexdore."

"You might break up your father's graphophone with an axe."

Willing to Tell It.

The check which the comely young German woman handed in at the window of a Walnut street savings fund bank the other day was made payable to Gretchen H. Schmidt, and she had indorsed it simply Gretchen Schmidt. The man at the receiving teller's window called her back just as she was turning away to rectify the mistake.

"You don't deposit this quite this way," he explained. "See, you have forgotten the H."

The young woman looked at her check and blushed a rosy red.

"Ach, so I haf," she murmured, and wrote hurriedly:

"Age 23."

NOT A REASON.

"But why do you want to marry her?"

"Because I'm in love with her."

"My dear fellow, that's an excuse, not a reason."

Can't Get Away.

When days are hot
And nights are, too,
The poor man's lot
Is one of rue.

Smoke.

"I notice that you have given up the fight for a cleaner city. You used to be one of the leaders in the opposition to the smoke nuisance."

"Yes. I've come to the conclusion that smoke cannot be abolished. It's useless to keep harping on the question."

"By the way, what business are you in now?"

"Oh, I've quit working for a salary. An uncle of mine left me a valuable interest in one of our biggest machine shops."

A Student of Nature.

The teacher had been reading to the class about the great forests of America.

"And now, boys," she announced, "which one of you can tell me the pine that has the longest and sharpest needles?"

Up went a hand in the front row.

"Well, Tommy?"

"The porcupine."—Tit-Bits.

Unworthy of Sympathy.

"I see that somebody has paid $50,000 for a Bible."

"Yes. Some people don't seem to have any appreciation of money. If the fellow had paid $50,000 for a race horse or lost it buying things on margins, there might be some reason for sympathizing with him."

Quest of Tranquility.

"Sometimes," said Plodding Pete, "I'm tempted to map out a route that'll take me to them there ar'tic regions."

"The climate's no good," ventured Meandering Mike.

"No; but your nerves get a rest. None o' them Eskimos is lookin' fur farm hands."

Natural Consequence.

"I hear the department store made a good profit on the brooms they advertised as bargains."

"Yes, they made quite a sweeping reduction, so the women came down with the dust."

NO ODDS.

"How are you?"

"Oh, I'm about even with the world."

"How's that?"

"I figure that I owe as many people as I don't owe."

His Appreciation.

The work horse who blue ribbon got
Almost forgot his dinner;
And all who near him came, soon knew
He was a "whinny" winner.

He Agreed.

She—I consider, John, that sheep are the stupidest creatures living.

He (absent-mindedly)—Yes, my lamb!—Sketch.

BLACKMAILING MUST BE ART

Amateur Makes Mistake When He Seeks to Make Money in Such an Avocation.

Police Commissioner Waldo of New York was talking about blackmailers.

"They are, as a rule, stupid," he said. "Their threatening letters are as ludicrous in their stupidity as a letter a friend of mine received the other day."

And Commissioner Waldo, with a laugh, produced the letter. Written in a large, boyish hand, it said:

"Deer sir—Your winder was broken by a bad boi wat throo it throo four thee pirpus. The ball beelonged two mee, but an eneme of mine sneaked it and did the deed to put the blaame on mee. I am sorry he did it, and that it have give you grate pain, and I have persecuted the perpeetrater wot done it. But you would not have thee innocent suffer for the bilty, so, if you drop thee ball over the garden wall. If you don't beware!—(Signed) Innocent."

DISTEMPER

In all its forms among all ages of horses, as well as dogs, cured and others in same stable prevented from having the disease with SPOHN'S DISTEMPER CURE. Every bottle guaranteed. Over 600,000 bottles sold last year $.50 and $1.00. Any good druggist, or send to manufacturers. Agents wanted. Spohn Medical Co., Spec. Contagious Diseases, Goshen, Ind.

Natural Atmosphere.

"I was told that a noted aviator takes his pet dogs with him on his flights. Should you think a dog would feel very much at home in the clouds?"

"I don't see why not if he is a skye terrier."

SASKATOON requires mixed farmers, market gardeners, poultrymen, dairymen, hog and stock raisers. Nowhere is there more room or greater opportunities for such. Agricultural laborers in great demand. Wages high. Work abundant. Why not get into this bigger life and participate in its wonderful prosperity? Write Commissioner, Board of Trade, Saskatoon, Saskatchewan, Western Canada.

A Crime.

"What do you think of the plot?" asked the theater manager.

"That isn't a plot," replied the man who had paid two dollars to see the show. "That's a conspiracy."

Her Reason.

Stella—Has she become an aviator?

Bella—Yes. She believes that matches are made in heaven.

Cole's Carbolisalve quickly relieves and cures burning, itching and torturing skin diseases. It instantly stops the pain of burns. Cures without scars. 25c and 50c by druggists. For free sample write to J. W. Cole & Co., Black River Falls, Wis.

Shortly after a romantic girl faces the parson with the man of her choice her romance evaporates.

SAVED FROM AN OPERATION

By Lydia E. Pinkham's Vegetable Compound

Peoria, Ill.—"I wish to let every one know what Lydia E. Pinkham's remedies have done for me. For two years I suffered. The doctors said I had tumors, and the only remedy was the surgeon's knife. My mother bought me Lydia E. Pinkham's Vegetable Compound, and today I am a healthy woman. For months I suffered from inflammation, and your Sanative Wash relieved me. Your Liver Pills have no equal as a cathartic. Any one wishing proof of what your medicines have done for me can get it from any druggist or by writing to me. You can use my testimonial in any way you wish, and I will be glad to answer letters."—Mrs. CHRISTINA REED, 105 Mound St., Peoria, Ill.

Another Operation Avoided.

New Orleans, La.—"For years I suffered from severe female troubles. Finally I was confined to my bed and the doctor said an operation was necessary. I gave Lydia E. Pinkham's Vegetable Compound a trial first, and was saved from an operation."—Mrs. LILY PEYROUX, 1111 Kerlerec St., New Orleans, La.

The great volume of unsolicited testimony constantly pouring in proves conclusively that Lydia E. Pinkham's Vegetable Compound is a remarkable remedy for those distressing feminine ills from which so many women suffer.

DAISY FLY KILLER placed anywhere, attracts and kills all flies. Neat, clean, ornamental, convenient, cheap. Lasts all season. Can't spill or tip over, will not soil or injure anything. Guaranteed effective. Of all dealers or sent prepaid for 20c. HAROLD SOMERS 150 De Kalb Ave. Brooklyn, N. Y.

ALLEN'S ULCERINE SALVE
For the treatment of Chronic Ulcers, Bone Ulcers, Scrofulous Ulcers, Varicose Ulcers, Indolent Ulcers, Mercurial Ulcers, White Swelling, Milk Leg, Fever Sores, all old sores. Very successful. By mail 50c. J. P. ALLEN, Dept. A4, St. Paul, Minn.

PARKER'S HAIR BALSAM
Cleanses and beautifies the hair. Promotes a luxuriant growth. Never Fails to Restore Gray Hair to its Youthful Color. Cures scalp diseases & hair falling. 50c, and $1.00 at Druggists

If afflicted with sore eyes, use **Thompson's Eye Water**

FREEDOM FROM COLDS & HEADACHES INDIGESTION & SOUR STOMACH BILIOUSNESS & CONSTIPATION

and other ills, due to an inactive condition of the Liver, Stomach and Bowels, may be obtained most pleasantly and most promptly by using Syrup of Figs and Elixir of Senna. It is not a new and untried remedy, but is used by millions of well-informed families throughout the world to cleanse and sweeten and strengthen the system whenever a laxative remedy is needed.

When buying note the full name of the Company—California Fig Syrup Co.—printed on every package of the genuine.

Regular price 50¢ per bot. one size only. For sale by all leading druggists.

THE ORIGINAL and GENUINE SYRUP of FIGS and ELIXIR of SENNA IS MANUFACTURED BY CALIFORNIA FIG SYRUP CO.

ONE ON THE OLD GENTLEMAN

Absolute Fact Destroyed Force of Well-Meant Argument for Temperance.

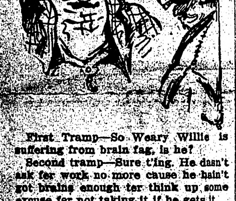
On a pleasant Sunday afternoon an old German and his youngest son were seated in the village inn. The father had partaken liberally of the home-brewed beer, and was warning his son against the evils of intemperance. "Never drink too much, my son. A gentleman stops when he has enough. To be drunk is a disgrace."

"Yes, father, but how can I tell when I have enough or am drunk?"

The old man pointed with his finger. "Do you see those two men sitting in the corner? If you should see four men there, you would be drunk."

The boy looked long and earnestly. "Yes, father, but—but—there is only one man in that corner."—Lippincott's.

IN HARD LUCK.



First Tramp—So Weary Willie is suffering from brain fag, is he?

Second tramp—Sure t'ing. He dasn't ask fer work no more cause he hain't got brains enough ter think up some excuse fer not taking it if he gets it.

A Hard-Worked Man.

Perhaps we do not realize it, but the president of the United States is one of the hardest worked men in the republic. The head of a big corporation, E. H. Gary, for instance, can slip away to Europe and the organization will run itself until he returns, but the president, surrounded as he is by a corps of capable assistants and advisers, must be on the job practically every day in the year.

Today William H. Taft is the busiest official who holds a high elective position. A governor can get away from official cares—although his pay may be docked if he stays away too long—but the president must get his vacation in driblets. His vacations consist of fifteen-minute intervals in which nobody actually is waiting to see him.

LUCKY MISTAKE.

Grocer Sent Pkg. of Postum and Opened the Eyes of the Family.

A lady writes from Brookline, Mass.: "A package of Postum was sent me one day by mistake.

"I notified the grocer, but, finding that there was no coffee for breakfast next morning I prepared some of the Postum, following the directions very carefully.

"It was an immediate success in my family, and from that day we have used it constantly, parents and children, too—for my three rosy youngsters are allowed to drink it freely at breakfast and luncheon. They think it delicious, and I would have a mutiny on my hands should I omit the beloved beverage.

"My husband used to have a very delicate stomach while we were using coffee, but to our surprise his stomach has grown strong and entirely well since we quit coffee and have been on Postum.

"Noting the good effects in my family I wrote to my sister, who was a coffee toper, and after much persuasion got her to try Postum.

"She was prejudiced against it at first, but when she presently found that all the ailments that coffee gave her left and she got well quickly she became and remains a thorough and enthusiastic Postum convert.

"Her nerves, which had become shattered by the use of coffee have grown healthy again, and today she is a new woman, thanks to Postum."

Name given by Postum Co., Battle Creek, Mich., and the "cause why" will be found in the great little book, "The Road to Wellville," which comes in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

PROGRESSIVE METHODS OF STORING WATER IN THE SOIL

Careful Experiments Have Shown That One to Two Barrels of Water Are Needed to Produce One Pound of Dry Matter—If That Is Not Available Crop Suffers and There Is a Lessened Yield.

(By G. W. SMITH.)

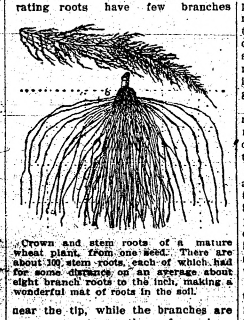
The plant gets the food supply through the water in the plant, which it drinks in or absorbs from the soil through the membranous surfaces of the roots with their root hairs, which later greatly increase the surface connections of the plant with the water of the soil.

Large quantities of water thus taken in by the plants are "breathed out" into the air through the leaves. The quantity of water thus taken in and given out by the plant is enormous—field crops consuming 200 to 500 pounds of water to each pound of dry matter they add to their own weight in growing.

The roots of our field crops are much longer, much more numerous, spread father and penetrate into the soil to greater depths than most people realize. On the fairly open, easily penetrated soils, where the upper portion of the earth is often too dry for the plant to feed, crops send their deepest roots downward four to six feet and in some cases much deeper. The greater number of roots, however, are in the upper 18 inches of earth.

The richest portion of the soil, and the part in which the plant likes best to feed, if sufficient water is present, is the lower half or two thirds of the furrow slice. With greater depth the plant obtains food with more difficulty.

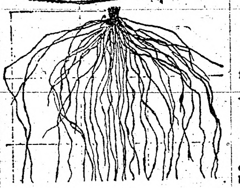
While the deepest roots doubtless secreu some food, their chief function is to bring water from deep in the earth when the supply near the surface is short. These long, deep penetrating roots have few branches near the tip, while the branches are very numerous near the surface, where the roots spread out so as to reach the more concentrated plant food from every nook and corner of the furrow slice and the uppermost layer of subsoil. Only the outer recently developed ends of the root branches are active in absorbing water and receiving soluble plant food, the older surfaces being covered with a tough layer of bark-like sells.



Crown and stem roots of a mature wheat plant, from one seed. There are about 100 stem roots, each of which had for some distance on an average about eight branch roots to the inch, making a wonderful mat of roots in the soil.

The roots of other cereal grains are quite similar, and the roots of tame grasses penetrate to like depths. The clovers go a little deeper while some perennial field crops, like alfalfa, extend much deeper. But in all cases the plants get most of their food in the upper layers of soil.

Since the furrow slice and the part of the subsoil just below it are the portions of the soil which supply the most congenial and the richest pasturage to the roots of crops, the aim of the farmer should be to keep them supplied with the proper amount of moisture and to provide that mechanical condition which best promotes the growth and yield of the crops.



At 6 are shown the stem roots of a corn plant nearly ready to tassel out. These roots all have their origin in the base of the stem, and each one has many branches. The dotted lines mark off square feet. The largest roots penetrate nearly four feet downward while the spread horizontally including the branches, not shown in 6, was over six feet. This drawing was made from a plant nearly every stem root of which was dug out by means of a small wooden trowel, the length, depth and direction of the root being accurately recorded on the drawing.

That a crop draws up through its roots, and allows to evaporate, an immense amount of water has been clearly shown in all parts of the country.

Careful experiments in America and in Europe have shown that one to two barrels of water (200 pounds to 500 pounds) are needed to produce a pound of dry matter of many of our common fields. If this amount is not available in the soil the crop suffers, and if the supply is irregular there is a lessened yield.

During wheat growing months when the foliage presents the greatest expanse of surface and the roots are reaching several feet into the soil for water there is a very great draft of water.

A conservative estimate would place the average moisture percentage in the soil bearing a wheat crop 15 per cent. below that in the soil bearing no crop.

CEMENT TANK IS DURABLE

Can be Constructed at Comparatively Little Expense and Is Practically Everlasting—Directions are Simple.

You can make an everlasting water-tank of cement at a comparatively low cost. Frost will not injure it if it is made right. A tank 6 by 16 and three feet deep is large enough to hold water for sixty cows.

Three men cen make this kind of a tank in one day, after the sand and cement have been hauled. Excavate about four inches deep for the foundation. Put one or two inches of crushed rock in the bottom. The frame for the side may be made from old lumber. The better this fits together the more it will improve the appearance of the tank when finished. It must be braced firmly inside and outside. Then put in the mixture of sand and cement in the proportions of three sand to one cement. Use Portland cement.

The sand need not be screened if it is not too coarse. For a tank of this size, it takes about twenty sacks of cement and four loads of sand. Wire netting makes very good reinforcements but gas-pipes or iron rods would be better. The sides may be tamped a little to make them fill out the frame well. The sides of the tank should be about six inches thick at the bottom and four at the top. Make the outside perpendicular and the inside sloping. It should be five feet wide at the bottom and five feet four inches at the top. This will keep the cement from cracking when the water freezes.

After the sides have been made, fix the bottom. This should be made two inches thick without the crushed rock. Coat the tank with pure cement, making it more impervious to water.

The tank should be made in one day so that it will join together well. Make it a little lower at one end and put a two-inch pipe through the wall at the bottom. This will be a help in cleaning. The overflow should also be placed a this end.

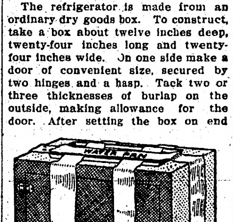
Storage tanks are good also as a source from which to irrigate gardens. A tank 16 by 16 by 4 will hold enough water to irrigate a good-sized garden. This would require about thirty sacks of cement. It could be made in one day by four men.

KEEPING BUTTER AND MILK COOL

May Be Done by Means of Iceless Refrigerator Which Is Illustrated and Described Herewith.

The problem of keeping butter and milk cool on the farm is a difficult one, writes L. W. Forman in the Prairie Farmer. An iceless refrigerator made according to the following description costs little and will do the work very satisfactorily.

The refrigerator is made from an ordinary dry goods box. To construct, take a box about twelve inches deep, twenty-four inches long and twenty-four inches wide. On one side make a door of convenient size, secured by two hinges and a hasp. Tack two or three thicknesses of burlap on the outside, making allowance for the door. After setting the box on end set on the top a deep vessel filled with water and in this basin put strips of burlap or wooden goods about three inches in width, and of sufficient length to reach well down the sides of box. Secure the strips to the bottom of the basin by a weight and the refrigerator is ready for business.



Refrigerator Ready for Use.

Shelves may be placed in the box to suit varying needs. When complete set outside the house, preferably where prevailing winds can pass over the box, and the cooling resulting from the rapid evaporation of water reduces the temperature within the box. The hotter it is outside and the harder the winds blows, the cooler it will be inside the box, as long as the pan is kept filled with water.

WOULDN'T ANY WOMAN?

Mollie—She's great on adopting new fads.

Jack—But she objects to new wrinkles.

BABY'S HAIR ALL CAME OUT

"When my first baby was six months old he broke out on his head with little bumps. They would dry up and leave a scale. Then it would break out again and it spread all over his head. All the hair came out and his head was scaly all over. Then his face broke out all over in red bumps and it kept spreading until it was on his hands and arms. I bought several boxes of ointment, gave him blood medicine, and had two doctors to treat him, but he got worse all the time. He had it about six months when a friend told me about Cuticura. I sent and got a bottle of Cuticura Resolvent, a cake of Cuticura Soap and a box of Cuticura Ointment. In three days after using them he began to improve. He began to take long naps and to stop scratching his head. After taking two bottles of Resolvent, two boxes of Ointment and three cakes of Soap he was sound and well, and never had any breaking out of any kind. His hair came out in little curls all over his head. I don't think anything else would have cured him except Cuticura.

"I have bought Cuticura Ointment and Cuticura Soap several times since to use for cuts and sores and have never known them to fail to cure what I put them on. Cuticura Soap is the best that I have ever used for toilet purposes." (Signed) Mrs. F. E. Harmon, R. F. D. 2, Atoka, Tenn., Sept. 10, 1910. Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 16 L, Boston.

A Distinction.

Mrs. Gaddy—There are some distinctions in life which are very puzzling to me.

Professor Pundit—Like what, for instance?

Mrs. Gaddy—When you write everything bad and mean in a man's life in a book for everybody to read, it is biography; but when you just tell the same things to a few people on a front porch, it's gossip.

You can't bet on the sincerity of a man's enthusiasm unless he is financially interested.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

More people would succeed if more would try.

THEY CHEATED AT CARDS

Experienced Shopper, Who Was Wise, Put Hubby Onto Facts of the Case.

Speaking of family poker parties this really happened:

A young married couple attended such a session at the home of a neighbor the other night. And when this young couple got home, the female end of the sketch said:

"Jim, I hate to say anything about the Halls—they seem to be nice people. But I'm afraid they cheat at cards."

"Nonsense!"

"I knew you'd say that, and it's dear of you to be so unsuspecting. But—well, what was the price of the chips tonight? Five cents each? That's what I thought. Jim, I examined those chips carefully, and they're the very same thing that I could have bought at Jones's store for a dollar a hundred in all three colors, too!"

SUFFERED AGONY.

Backache, Headache and Dizziness Caused Untold Misery.

Henry J. White, 416 No. 3rd St., Ft. Smith, Ark., says: "I suffered everything but death from terrible kidney trouble. I did not have a moment's peace. The urine resembled blood and left a red stain when it touched the linen. When passed, fire could not have burned more. I had awful headaches and dizzy spells and my back ached constantly. I began using Doan's Kidney Pills after various remedies had failed to help me and was completely cured. I have had no sign of kidney trouble since."

Remember the name—Doan's.

For sale by druggists and general storekeepers everywhere. Price 50c. Foster-Milburn Co., Buffalo, N. Y.

FOREST FIRE FUND

GOVERNMENT WILL SPEND SUM IN MINNESOTA THIS YEAR FOR EMPLOYMENT OF PATROLS.

NATIONAL AID TO STATES

Money to be Dispensed in System of Co-operation—State Forester Cox Says Men Are Already at Head Waters of Streams.

The United States government will spend $10,000 in Minnesota this year for the protection of the forests at the headwaters of navigable streams. Under the Weeks' law passed by the last congress this is to be dispensed through the department of agriculture under a system of co-operation with the states. The money is spent solely in employing patrols.

"We already have the men on the ground," said State Forester Cox, in discussing the aid which the United States government is giving to the state of Minnesota. "This marks the beginning of the federal government protection of timber on the head waters of the navigable streams. It has never before given such protection. Scientists have proved that the standing forests at the head waters of a stream affect the flow of water. Congress has just recognized that fact and has made it possible to give federal aid to the states that are making an effort to protect the timber.

"Minnesota is perhaps more entitled to such than any other state. There are more head waters in this state than in any other. We have more forests on such head waters and there are greater fire risks. We shall use every bit of the sum allotted to us by the federal government."

The co-operative agreement under which the federal government gives aid to the state of Minnesota is made possible by the terms of the Weeks law, which was passed by congress last winter.

Provisions of Law.

This law, besides providing for the purchase by the national government of lands on the head waters of navigable rivers for the purpose of creating national forests to protect these rivers, caried also an appropriation of $200,000 which the secretary of agriculture might expend in order to protect from fire, in co-operation with the states, similar lands in state or private ownership. It was provided in the law that expenditures by the federal government in any state should not exceed the amount spent by the state itself in the co-operative work. Other states which have signed similar co-operative agreements with the government are Maine, New Hampshire, Vermont, New Jersey, and Wisconsin.

The secretary of agriculture concluded that the most effective way to use the money available would be by requiring, as a preliminary to entering into an agreement with any state for co-operative fire protection, that the state authorities should submit a definite plan showing in detail exactly what it was proposed to do. With these plans were required maps showing areas to which protection would be given. All plans submitted are carefully examined by the department of agriculture, to see both that the area to be protected is actually forested, land on the headwaters of navigable streams and that the plan of protection proposed is well conceived and thoroughly practical, with an organized and effective system of administration by capable state officers. It was decided for the present year that the amount spent in any one state by the national government should be limited to $10,000.

Funds Go to Patrolmen.

The funds of the federal government will be used solely for paying patrolmen. The state officials select these patrolmen, subject to the approval of the department of agriculture. The maps submitted to the federal government show where each of these patrolmen will be located, the approximate routes of patrol, and all matters necessary to a clear understanding of the the location of lookout points, telephone communications, railroad patrols, location of state forest fire wardens and other officials, and the like.

In short, the basic idea is that efficient fire protection can be given only by the development of a carefully worked out, well manned, and capably officered scheme, which studies the situation beforehand and makes provision for the most effective disposal and use of the available forces, with a view both to preventing fires from getting started and concentrating upon them quickly if they do get started. In the national forests of the West, where the fires must often be fought at a long distance from a base of supplies, a further consideration often of great importance, is how to provision the forces which are on the fire line, perhaps for days at a time. To provide for this every forest officer is expected to know beforehand from what stores, construction or lumber camps and ranches he can obtain food, tools, pack horses, and men, and in what quantities. In fact, the training of the forest officers includes a sort of fire game which consists in suddenly locating an imaginary fire on the map of a national forest and calling on a ranger to tell offhand how and from where he would gather help, how he would organize and conduct his defence, and whence he would obtain supplies and means of transportation. Although conditions in the East seldom present such serious difficulties, they are regarded as calling equally for intelligent planning and the development of a trained force.

Responsibility on State.

Under the terms of the co-operative agreements, the secretary of agriculture may terminate the co-operation at any time that he finds it not to be conducted in a satisfactory manner. In this way the responsibility for organizing and maintaining the work is placed upon the state, which, however, must keep its system up to a good standard of efficiency in order to have the co-operation with the federal government continued. Forestry officials of the department of agriculture will act as inspectors to keep the department informed as to how the states are handling the work. It is believed that under this system a great advance will be made in the development of good state systems of fire protection.

In addition to the states with which agreements have been signed by Secretary Wilson, Massachusetts, Connecticut and Maryland have requested co-operation this year. A number of other states have made inquiry concerning the possibility of their entering into co-operative agreements with the government, but have found that they could not do so under the terms of the law because their legislatures have made no provision for expenditures on behalf of the state.

PREUS GIVES ADVICE.

Counsels Committee of Scandinavian Relief to Keep on its Feet.

Insurance Commissioner Preus, following a conference held in his office by the committee appointed Tuesday to take up the matter of the rate increase in the Minnesota Scandinavian Relief Association of Red Wing, told the committee it could either disband the organization or go along on the increased rates. He advised the latter course.

The commitee was composed of Rev. G. Rast of Minneapolis, Andrew P. Croonquist of St. Paul and Rev. C. J. Nelson of Milwaukee, the latter representing the Milwaukee members of the association.

If it was found members are not ready to continue under higher rates, under the rules of the organization the committee can go to ten of the board of directors, sixty in number, and have them notify the secretary to call a meeting of the directors and disband the organization and distribute the balance of funds in the treasury.

"For the sake of thelittle money that each member would get out of it," said the commissioner, "I hardly think this last suggestion will be acted upon. I do not know what will be done."

Policyholders have been threatening to bring injunction proceedings against the board of directors for raising the rates, but it is believed that following the conference yesterday the members will be advised to abide by the decision and keep the society going.

DOUBT KENSINGTON RUNESTONE.

Christiania Professor Said to Have Pronounced It Spurious.

The Kensington runestone that has proved so effective a subject for controversy among the erudite of Minnesoat and Wisconsin is reported to have been discredited in Norway, to which it was taken by H. R. Holand, its sponsor and champion.

The stone is reported to have been on exhibition at the University of Christiania, where Prof. Hiegstad pronounced it spurious for the reason, it is said, the runes cut in the stone were not used in that form 400 years ago or even up to a much later date. The Norwegian doctor thought the stone might date back as far as 1865.

The Minnesota Historical society, through its archeological committee, is preparing a report on the authenticity of the stone.

MAY BE DR. JACKOLA.

Friends Are Looking for a Man Seen Near Lakeside.

Duluth.—In the vicinity of Lakeside, it is thought, may be the missing Dr. John Jackola, who last spring was arrested in New York for alleged persistent attentions to Mrs. O. H. P. Belmont. John Saari and Gust Lahti, friends of the physician, who went in search of the man, were unable to locate him. The doctor disappeared June 19 and his friends had about come to the conclusion that he was no longer alive.

BEMIDJI CHURCH FINISHED.

Methodists Have One of Handsomest Edifices in City.

Bemidji.—The brick work on the elegant new M. E. church building will be completed in another week. After the brick work is done, the contractor will at once begin the building of the basement walls and floor. When completed, the church will be one of the most handsome and imposing brick structures in the city.

AIRMAN BREAKS STATE RECORD.

Ward, Flying in Curtiss Biplane at Austin, Goes Up 2,500 Feet.

Austin. — Aviator Jimmie Ward, flying in a Curtiss biplane, broke all state records for altitude when he attained the heighth of over 2,500 feet in his last flight at the big aviation meet here.

Ward made three wonderful flights, remained in the air over half an hour and traveled about 10 miles.

NORTHEN FOLKS AROUSED

THREE MYSTERIOUS DEATHS WITHIN YEAR STIR PEOPLE.

Corpses Discovered Under Strange Circumstances—Buried by County.

Sawyer, Minnesota. — Both Indians and settlers in this territory are wrought up over the deaths of Otto Holt, John Sarri and John Orni under peculiar circumstances on their homestead, and there is much speculation as to whether the men were murdered or died accidentally.

All the deaths were under the strangest surroundings. Holt was found dead near the Iverson postoffice, Sarri's dead body was discovered west of Sawyer depot and Orni was found dead west of Sawyer one and a half miles.

Citizens say that great mystery surrounded the finding of the bodies and that all three were buried at the expense of Carlton county and that the coroner's verdict of found dead or accidental death was based on very little investigation and without a real public hearing.

March 14, 1910, Henry Sarri, a lonely homesteader, was found dead on the Northern Pacific railway track, one mile west of Sawyer depot. The coroner said it was a very clear case of accidental death, being struck with a passing train. Sarri's body was taken to Cloquet and buried at the expense of Carlton county.

The night before the find on the track, citizens aver that Sarri and another man had been drinking heavily and the death at least was suspicious, and Sarri was a man not likely to end his own life. Most of the territory is also Indian and under prohibition laws.

John Orni, his brother, a Finlander, came and occupied the deceased man's homestead, and April 7, just a year afterward, he was found dead by a fisherman in his cabin. The corpse was found on the floor, the floor of the rude cabin covered with blood. The night previous a man had been with Orni, staying there all night, and next morning Orni prepared the breakfast, which the two ate. Then the visitor went two miles west of Sawyer for his clothing, which he had left at another homestead. When the visitor returned he found Orni dead on the cabin floor and a gun alongside the body.

Citizens say a few formal questions were asked by the coroner and Orni's body was taken to Cloquet and buried.

Otto Holt's death was even more suspicious, and occurred about four weeks ago. He lived in a cabin three miles west of the Iverson postoffice. Holt was a bachelor and was known to carry about $400 about with him in bills secreted about his clothing. His cabin was found on fire by [illegible] and when the fire was out, the charred body of Holt was discovered, but what had become of the money he generally carried on his person, was never discovered. He also was buried by the county authorities.

In consequence of these three mysterious deaths the settlers in these sparsely populated places are full of dread, and they aver that a full and careful investigation would reveal that these three men did not die accidentally, but by the hand of some villian or villians.

STATE SUES LUMBER COMPANY.

Civil Case Involving $25,000 Alleged Mistake on Trial at Brainerd.

Brainerd.—On trial in chambers before Judge W. S. McClenahan of the district court is a timber case brought by the state against the Brooks-Scanlon Lumber company, involving about $25,000. It is alleged that the state sold the timber of section 16-53-12, in St. Louis county, to the lumber company, estimating it at the time at about 5,200,000 feet.

The state later had reason to believe that there was more timber on the tract and a rescale was ordered, disclosing 7,900,000 feet, it is alleged. The state now sues for the difference in value, estimated to be about $25,000. Representing the state is Assistant State's Attorney General Janes of St. Paul.

DITCH CONTRACTOR BEGS OFF.

R. A. Elzy Says Muskeg Fills Drains and He Loses Money.

R. A. Elzy, drainage contractor, appeared before the drainage board to ask that he be not required again to county. These ditches, numbers 59 and 60, have not been entirely paid for because the work has not been declared completed by the drainage commission.

Mr. Elzy says he has cleaned the ditches out twice, but that because of a peculiar formation of muskeg, they have filled up in places. He said he has already lost money on the ditches and that to make him clean them out again will make him lose still more.

The drainage board will go to Koochiching county next month to inspect these two ditches.

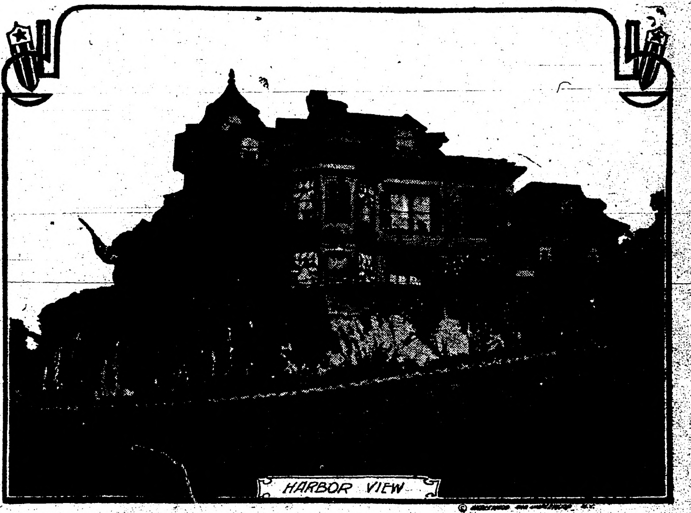
PHYSICIAN FOR GIRL'S HOME.

Sauk Center.—Dr. J. A. Du Bois of this city, has been appointed physician to the Industrial Home for Girls, the State Board of Control authorizing the appointment.

The Board of Control also decided to grade the lands adjacent to the recently built cottages and put in gravel roads and walks.

Plans for two new buildings were considered by the board, one for the superintendent and another for a modern hospital.

SCENE OF FESTIVITY AT NEWPORT



NEWPORT, R. I.—Mrs. Elsie French Vanderbilt gave the largest and most brilliant dance of the season recently at her home, "Harbor View." The function was in the nature of a house warming to mark the opening of the new ballroom of the mansion. The decorations and the furniture of the room are in pure white throughout. The guests were many and socially prominent, and the function in general was notable in the annals of Newport festivities.

LOTS OF WILD GAME

Southwest Coast of Mindoro Is Paradise for Hunters.

Tamarao, Fierce Animal Resembling American Buffalo, Found Only Here—Plenty of Carabao, Boar and Deer.

Manila, P. I.—"A paradise for hunters," is the way Judge Liddell describes the country in the vicinity of his home and plantation on the southeast coast of Mindoro. One game Mindoro excels in is, the tamarao rarest of animals, and one which is found only in Mindoro. This fierce animal, much like an American buffalo, is held in universal dread by every native on the island, who looks on him as a far more formidable creature than the maddest of wild carabaos.

The tamarao is seldom seen in clearings because he sticks to his native wilds. When he does come near a clearing the natives in that vicinity make for the nearest shelter. For the tamarao does not wait to attack. He takes the initiative himself, charging every one and everything in sight.

Mrs. Liddell, wife of Judge Liddell, is, perhaps, the only white woman who has ever seen a tamarao. A few weeks ago one came within fifteen feet of the window of the Liddell kitchen, where she was instructing the cook, and peered in. The natives in the neighborhood took to their heels and then the tamarao quietly walked off.

But if the tamarao is the piece de resistance among the game of Mindoro it is not the only game to be found on the island. There are myriads of deer, wild chickens and game birds of all sorts. There are also plenty of wild boars on the island, some of them of extraordinary size and none of them noted for their docility. Judge Liddell has one tusk fully eighteen inches long. This came from a monster boar, which charged the hunters repeatedly before he was shot down.

Wild carabao hunting is another pastime of the Mindoro planters and one that is not destined to soothe the nerves of weak-hearted men. These big animals are at all times dangerous, and when once wounded or angered will charge their hunters with all the ferocity of an African buffalo.

James Liddell, a son of the judge, had an experience with one of them recently that will not be forgotten in a hurry. He was hunting and shot the big fellow, knocking him off his feet. As the carabao lay still he approached him and when not a foot away the carabao leaped to his feet and charged.

There was no time for a shot, so young Liddell did the only thing open to him—grappled with the infuriated beast. Three times the animal gored him and finally the boy made his escape. What the Filipinos in his party regarded as them fraculous feature of the accident was the fact that the carabao had permitted him to escape.

Porpoise Scares Bathers.

New York.—There was a wild scramble at the Fourth avenue grounds at Asbury Park, N. J., when a porpoise appeared among the 2,000 bathers. The crowd, thinking it was a shark, made a rush for shore, the men leading the women. The porpoise, undisturbed by the clamor, swam leisurely around and then made his way northward, but it was some time before the bathers again got into the water.

DYE HAIR TO MATCH MOTORS

Lawsuit Reveals Peculiar Ways of Society Women of East—Photographer Wins His Case.

New York.—That society women in New York are dyeing their hair, not only to match the interior fittings of their motor cars but even to match the changes of the seasons, was the statement made by William P. S. Earle.

Mr. Earle was delighted over winning a suit for $60 brought by him against Mrs. Louise Balfour in payment for coloring a photograph made for the defendant. Mrs. Balfour is said to be a relative of the British premier.

The photographic artist had colored the picture to show brown hair. Mrs. Balfour wanted her hair Titian in the picture.

"I told her," said Earle, "that her hair was brown, but she insisted on Titian.

"Then I charged her for the work and she would not pay.

"The hair among the women of the 'four hundred' changes with the seasons. When I tinted the picture of Mrs. Balfour her hair was brown. When she sued her hair was Titian. Formerly the women of society were willing to let it go at matching their hair to suit their gowns, but now they must match their hair to suit the fittings of their limousines."

Hobble Skirt Is Hindrance

Mars Game of Smuggling Across Line From Detroit to Windsor—Women More Clever Than Men.

Detroit, Mich.—Hobble skirts and small crowned hats, now very much in vogue, are having a depressing effect on the Windsor export trade. The walking skirt is made to fit the form rather closely and a number of Detroit women have found that when the tubular symmetry of the hobble is disturbed by a few bulky bargains, the sharp-eyed customs officers are very quick to criticize. It would be rash and desperate venture for a hobble-skirited traveler to attempt to smuggle over a woolen blanket, for instance. Only the other day the customs officers at the foot of Woodward avenue stopped a woman and later it was discovered that she concealed a half dozen napkins under her skirt.

"The unfortunate lady doubled one of the napkins twice and I couldn't help but notice it," said the officer who spied her.

Catching female smugglers is difficult work. The women seem to be cleverer than the men at smuggling and they will take longer chances. When they are caught they weep and go into hysterics.

"Oh, the women are certainly the clever smugglers," said Miss Daisy Zuckriegel, who is stationed at the Woodward avenue dock to watch the women who go back and forth on the ferries. Eight years' experience has made Miss Zuckriegel an expert at spotting smugglers.

"How do I spot smugglers?"

"Well, there are several ways. For instance, I watch the people going over the river and I generally remember them when they return. If they attempt to smuggle anything over it is an easy matter to catch them. Then we are familiar with the favorite methods employed by smugglers and we know just where to look. When two women get off the boat eating candy with much gusto, I ask them to step into the office without any preliminaries. The chances are 100 to 1 that stuff will be found concealed about their persons."

"What do they smuggle?"

"Why, the smuggle anything that is movable. Blankets, linen goods, hardware, laces, butter, eggs and fowl are brought over by women under their skirts."

Banish Hard-Tack.

New York.—Word comes to military circles here from Washington that hard-tack has been banished in favor of a new ration to be known as "field bread." Hard-tack will be used in the future only when an organization is cut off from a supply train or is on a forced march. The new field bread is composed of flour, water, salt and yeast.

Stole Collection Plates.

Hartford, Conn.—The Society of the Park Congregational church of this city is looking for the person who stole all but two of the collection plates. The loss was discovered when a collection was about to be taken.

Mice in Cancer Research

Foreign Animals Resist Attacks of Disease Until They Are Acclimated—360 From Japan.

London.—Three hundred and sixty waltzing mice have just arrived on the Japanese steamer Tango Maru, en route for the National Cancer Research fund. The mice were sent to Prof. E. F. Bashford, the director of the fund, by Professor Higuchi of Tokio, who recently completed a course of research work in the fund's laboratories on the Embankment.

The mice will be used in research work to determine the effects that acclimatization and dieting have in increasing or decreasing the susceptibility of mouse tissues to mouse cancer.

"We have already proved," it was explained at the fund's laboratories the other day, "that if we implant living cancer tissues from English mice on to the newly imported foreign mice there is a certain amount of resistance to the growth. Only a small percentage of the inoculated mice will develop tumors. After a time, however, this degree of protection wears off and finally the foreign mice become as readily susceptible to implanted tumors as our home mice.

"The mice sent to us from Japan are an example of the international free trade existing among research workers on cancer. At times of mouse famine in other countries we have sent English mice to our fellow workers in those countries. Because of this international exchange in European mice it is not easy at the present time to get from Germany or other near countries mice which one can be certain are pure-bred foreign stock. These Japanese mice will be of great value to us, because we know that we have in them an entirely new field for research. Our object, broadly, will be to see whether these mice will become more susceptible to English cancer as they become acclimatized to English conditions and accustomed to English food."

Work Month for Dime.

Plainfield, N. J.—After a month of work, first by an expert in the Farmers' State bank of Tulsa, Okla., and later by other experts in the big safe factory here, a strong box supposed to contain $25,000 was opened in this city. A lone dime was all the steel chest contained.

The safe was used by L. R. Tubner, cashier of the Tulsa bank. Tubner killed himself recently in Florida.

MINNESOTA HISTORICAL SOCIETY.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, AUGUST 11, 1911 NO. 2.

TOGO AT CAPITAL

RIDES IN CAB OF AN ELECTRIC ENGINE PART OF WAY TO NATIONAL CAPITAL.

IS WELCOMED BY TAFT

Deeply Interested in "World Pre-eminence of American Railroading." —Hero of Japanese Navy Is Greeted by a Crowd.

Washington, D. C. — Admiral Togo and his party are now at the national capital. Owing to an incessant drizzle of rain, the crowd which greeted the Japanese naval hero was small, but he was enthusiastically cheered as he passed through the union station to a waiting automobile.

President Taft had sent one of the White House automobiles and Admiral Togo went immediately to a hotel and retired for the night. The admiral called on President Taft. He will be entertained here almost continuously until his departure on Wednesday next.

Major Archibald Butt and Lieutenant Commander Palmer, military and naval aides to the president, met the distinguished Japanese at the station, Lieutenant Commander Palmer formally welcoming the visitor and his party on behalf of the president.

Admiral Togo spoke his acknowledgement briefly through an interpreter and left the train, escorted by Major Butt and Lieutenant Commander Palmer, whose full dress uniforms contrasted with the black frock coat and sombre rainy day attire of the Japanese naval hero. Following him were Chandler Hale, third assistant secretary of state, and Captain Potts, U. S. N., who walked with Baron Uchida, the Japanese ambassador. The entire embassy staff was present.

Acknowledges Cheers.

Admiral Togo, as he walked through the station, raised his hat repeatedly in response to the cheers of the crowd. His [illegible] the party from the time the admiral left his train, deep in the station yard, until he reached the street. The Japanese in the party maintained a reverent silence.

Admiral Togo's departure from New York had a feature quite as unusual as his midnight arrival and welcome in New York bay Thursday night, for he left the city in the cab of a big electric engine drawing a heavy Pennsylvania train for Washington.

Although the luxurious private car Olivette, which the government has provided for him, was attached to the train, the naval hero elected to sit by the engineer's side and watch him operate the 4,000 horsepower motor.

"I am intensely interested in your world pre-eminence in electric engineering and railroading, the admiral said through his interpreter, "and I wish to avail myself of this opportunity closely to observe both. Therefore, I will ride with the engineer."

The admiral rode in the cab to the limit of the electric zone at Harrison, N. J., and there entered his car. He asked many questions of the engineer and displayed more interest in this incident of his visit than anything else.

It had been agreed by Commander Tanaguchi and Chandler Hale, third assistant secretary of state, that the newspaper reporters would be permitted to interview the admiral briefly, but not on politics. But, as soon as they had reached the Anglo-French-American arbitration treaties, some of the reporters asked questions concerning Japan's attitude toward Russia and the Moroccan affair. Admiral Togo replied briefly that he would not discuss politics, but the reporters persisted and Mr. Hale and Mr. Tanaguchi emphatically terminated the interview.

LAD CONFESSES PATRICIDE.

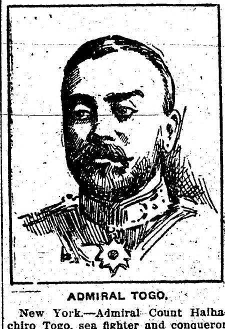
Youth Says He Shot Father Because He Refused Him Money.

Chicago, Ill. — John Vacek, a 17-year-old boy, last night confessed to the killing of his father in their home. The father had upbraided the boy for not working after the boy had asked for money.

In his confession young Vacek declared when he went to his father for money the older man tried to induce him to murder his mother, offering to pay him well for it. He went to his father about 8 o'clock in the morning, he said, while Mrs. Vacek was away. Horrified at the alleged proposition of the father, the boy said he drew his revolver and attempted to shoot over his father's head. He missed the aim and the bullet struck his father and killed him.

The police scout the story of the father's offer, as they were unable to learn of any domestic infelicity.

ADMIRAL TOGO IN GOTHAM.



ADMIRAL TOGO.

New York.—Admiral Count Haihachiro Togo, sea fighter and conqueror of the Russian fleet in the Russo-Japanese war, made ready for the amenities of his twelve days' visit to the United States. Admiral Togo reached here from England on the Lusitania and was welcomed down the bay by representatives of the government at Washington and the Japanese government here and brought to this city on the derelict destroyer, Seneca.

PASS COTTON TARIFF BILL

CUTS DUTY ON MANUFACTURED GOODS 21 PER CENT.

Not an Amendment Offered, and Act Is Put Through 202 to 91.

Washington, D. C. — Supported by all the Democrats and by 30 insurgent Republicans, the Democratic cotton tariff bill, the third of the big tariff revision measures brought forward by the Democratic house of Representatives, passed that body by 202 to 91. The bill cuts the average tariff on cotton manufactured goods from 48 to 27 per cent ad valorem, a 21 per cent reduction in duty that the Democratic leaders estimate to reduce [illegible] about $8,000,000.

Not an amendment was offered to the bill, although the Republicans attacked it vigorously on account of alleged increases in certain items over the rates of the Payne-Aldrich tariff law.

Scarcely had the cheers that greeted the passage of the cotton revision bill subsided when Democratic Leader Underwood, calling up the free list bill as it passed the senate a few days ago, accomplished a strategic move which surprised the Republicans.

He asked for a conference on all the amendments to the free list bill except that of Senator Gronna, of North Dakota putting cement on the free list. He urged that the house accept that amendment, adding to it lemons. Pacific coast Republicans made ineffectual attempts to stop this sudden and unexpected putting of lemons on the free list, but the amendment carried. The change gave the house Democrats what they claimed to be an added advantage in dealing with the senate in the conference committee.

FINDS LABOR SLUGGERS GUILTY.

Chicago Jury's Verdict Charges Assault With Intent to Kill.

Chicago, Ill. — Peter Gentleman, Edward Storgaard, William Connors and Arthur O'Connor, four so-called labor sluggers, were found guilty of assault with intent to kill Morgan H. Bell, a union steamfitter, whom they had driven from work at the point of a revolver. A motion for a new trial was entered and will be argued before the next term of court.

The conviction is the first in the labor slugging war that has created terror in Chicago for months. The labor rows developed from a factional fight between different organizations of plumbers and steamfitters. In the reign of lawlessness thert have been at least three murders in downtown saloons.

The charge on which the men were convicted is punishable by imprisonment of from one to fourteen years.

Oldest City Official in U. S. Dies.

Bloomington, Illinois. — James F. Hyde, of Lincoln, Ill., died in Pierre, S. D., where he had gone to visit his son. He was 98 years old, the oldest resident of Logan county, the oldest Mason in Illinois, and was the oldest city official in the United States, when his term as city treasurer of Lincoln expired last spring.

Bishop Mallalieu Is Called.

Auburndale, Mass. — Reverend Dr. William D. Francis Mallalieu, bishop of the Methodist Episcopal church, and probably oldest minister in point of years of service in the denomination, died after a month's illness of old age and exhaustion. He was 83 years of age.

MINER IS RESCUED

JOPLIN, MO., WORKERS REACH IMPRISONED LAD WITH A DRILL SHAFT.

WAS BURIED THREE DAYS

Calls Up a Cheery "Hello!" and Is Lowered Food and Drink.—Water Creeping Into His Underground Cell.

Joplin, Missouri. — Joseph Clary has been reached by rescuers. He was alive and well. When the last spadefuls of earth were removed by workmen in the shaft and they dropped through into the drift, Clary threw himself into their arms and wept while the shouts of thousands cheering at the mouth of the mine echoed down the shaft.

Three workmen were digging in the narrow shaft when the bottom gave way, and they dropped into the drift. Clary saw the light of day and looked upon fellow beings after a period in darkness which, though reckoned by him to be something over four days, was really exactly three days and 45 minutes.

Joplin, Missouri. — Entombed for feet below the surface of the earth, facing possible death from the rapidly rising water in the mine drift, Joseph Clary, the young miner caught by a cave-in at the White Oak mine here Sunday, feasted on fried chicken and joked with friends who are waiting for his rescue.

"Hello," his brother-in-law, Maurice Grafton, called down the hole when the drill bits had been removed.

"Hello, boys, I'm hungry," came the clear, but faint reply.

Then Thomas Clary, father of the entombed miner, hastened to his home, where the young man's mother was prostrated from grief, and told her the young man was still alive. The news, the doctors say, has saved her life.

From his home, the father, [illegible] milk and stimulants, which were lowered on a piece of rope to his son. After drinking these Clary seemed much stronger and remained near the drill hole talking with those at the top.

"I have not worried any, though it has been a long while," he said, "for I knew that you were after me. The water has been rising fast in here and it is about waist deep in some places now. I don't believe it will get much higher, for this is dry ground."

The ground where the mine is located is known as "dry ground," and it has never been necessary to use a pump to keep the water out of the drifts while work was going on. This fact lends encouragement to those who are working to sink a rescue shaft to the drift. If, however, the shaft is not down to the drift within two or three days it may be too late to bring the young man out alive.

After the entombed man had eaten his supper an electric flashlight was let down to him and also a small rope which he tied around his waist, so that in case he stepped into a deep hole while exploring his prison he could be saved.

In talking to Clary, it was learned for the first time that one of the former drill holes penetrated the drift in which he is confined. He thinks it was the one that was sunk Monday, but whether this is correct is problematical. The drill hole penetrated the roof of the drift near one of the walls and Clary says that though he called up it until he was exhausted he failed to get a reply and thought that the rescuers had given up hope that they would find him alive. Then he became despondent, he says.

The work of sinking the rescue shaft is progressing rapidly. The shaft is now down about 50 feet, with every indication that it will reach the entombed man. As the work progresses, however, it is necessary to crib the sides with logs to keep the walls of the shaft from caving.

Body in Maine Wreck Identified.

Havana, Cuba. — The bones found Tuesday in the wardroom of the battleship Maine, which were believed to be the remains of Assistant Engineer Merritt, were fully identified. The identification was based on the configuration of the skull. The bones have been placed in a casket to await instructions from Merritt's family. Two more beyond identification, were found, making the total number recovered 21.

Wife Dislikes Jap Husband.

Seattle, Wash.—Lena Porter Uyeno, a former Minnesota school teacher, 20 years old, who was married to a Japanese May 11, 1910 asked the superior court for a decree of divorce on the ground of cruelty and incompatibility. They lived together only eleven days.

ORDERS OLD GLORY DOWN

LONDON, ONT., CITIZENS PROTEST DECORATIONS.

Charge Discourtesy to Union Jack in Detroit, Stoutly Denied There.

London, Ontario. — As a result of many protests from citizens, Alderman Mitchell, chairman of the decorations committee of the London Old Boys' Association, ordered down all American flags which had been included in street decorations. Poles along the main streets had been draped with bunting and on top of each were four Canadian and four American flags, the latter being included because many of those returning to their home town for the "olds boys'" celebration are now residents and citizens of the United States.

So much feeling developed that, owing to fear that an unpleasant flag incident might occur, it was decided to remove the American flags.

Action Is Commended.

Alderman Mitchell's action was sustained by the East London Progressive Association, which voted, after a warm discussion, to write to the city council a letter commending the alderman's decision. During the discussion members declared that they had been compelled, while visiting in Detroit, to remove Canadian flags which they were wearing on their coats. One member declared that he had seen the American flag cheered and the Union Jack hissed while in a theater there.

This is the second time the American flag has been hauled down here. Three years ago, during an Orange celebration, the standard was torn down from the balcony of a hotel and tramped on. American citizens here are indignant and there is talk of withdrawing the float which they were going to put in the parade next week.

Detroit Denies Discourtesy.

Detroit, Aug. 5.—If Canadians visiting Detroit were ever compelled to re[illegible] the flags of their country from [illegible] the fact was not brought [illegible] of the authorities [illegible]

Emphatic denial of the statements contained in the London dispatch was made at police headquarters and at the newspaper offices, where it was said that so far as known no act of discourtesy had ever greeted the Union Jack, either in the theaters or on the streets of this city.

On the contrary, the British emblem invariably occupies a conspicuous place in the decorations displayed at all functions here of an international character.

MANKER SUICIDE IN JAIL.

Former Banker, Who Embezzled $50,000, Kills Self in San Francisco.

San Francisco, Calif. — Carey A. Manker, formerly a banker of Pearl, Ill., but for three years a fugitive under indictment for embezzlement of $50,000, died in central emergency hospital here a suicide. Sitting on his prison cot Manker stabbed himself in the neck, using a small pocket knife. He was found unconscious on the floor of his cell in the city prison, and was taken to an emergency hospital. It was found that the knife blade had severed the jugular vein. The knife evidently had been smuggled in to Manker and the chief of police has ordered an examination.

50 MEN BURIED IN CAVE-IN.

Two Taken Out Dead, Four Fatally Hurt—May Be More.

East Liverpool, Ohio. — In a sewer cave-in at the plant of the Pittsburg Crucible Steel company at Midland, Pa., seven miles from here, 50 men were buried.

Two were taken out dead and four others were probably fatally hurt. Rescuers are still at work and the death list may grow larger.

The sewer is being built from the plant to the river, 200 feet distant. It is said there were no supports built at the sides of the excavation to hold back the earth. The men at work constructing the sewer are foreigners.

Take No Action Regarding Rate Ruling

Chicago, Illinois.—Traffic officials of the Harriman roads, after an all-day conference here, announced they had failed to decide on a plan of action regarding the recent interstate commerce commission ruling on intermountain commodity rates. They will meet again Aug. 7 with representatives of all transcontinental lines.

Murdered Man Not Wealthy.

New York, N. Y. — The will of William H. Jackson, the aged broker's clerk whom Paul Giedel murdered in the belief that he was wealthy, has just been filed for probate. It disposes of an estate valued at less than $2,500, all of which goes to a brother.

DES MOINES RIOT

BREAK EVERY WINDOW IN THE BUILDING, DESPITE POLICE INTERFERENCE.

COURT STOPS THE STRIKE

Imported Men Are Forced to Leave City, Other Non-Unionists Take Refuge in Jail From Mob Fury.

Des Moines, Iowa. — Sympathizers with striking employes of the Des Moines City Railway company, several thousand strong, bombarded the office building of the company at Sixth and Mulberg streets, in which is located the office of General Manager J. R. Harrigan, and shattered every window in Harrigan's office. Then the crowd began to beat out every window in the building. Despite all efforts of the police, the fusillade did not cease until the windows were broken and the building badly damaged.

Leaders of the rioters, unmindful of a court mandamus ordering the strike to be ended, made inflammatory speeches before the attack on the building began. An attempt to enter the offices was blocked by the police until the arrival of the reserve squads. The leaders said they wanted to "get" Harrigan if he was in the office, if not, they would take his desk and furniture and smash it up. Twelve arrests were made.

After a day, marked with many riots, wild hunts for strikebrtakers, assaults and broken heads, striking employes won a partial victory when Judge Lawrence De Graff issued a mandatory writ of injunction is district court ordering the city railway and its employes to resume the service as before the strike within a reasonable time.

Reinstatement Ordered.

It was also ordered by the writ that Conductor Hiatt over whose discharge for the alleged theft of two 5-cent fares the entire trouble originated, be reinstated pending arbitration. Papers to carry out the provisions of the writ were sent out immediately to serve them on President Leonard of the strtet car men's union, and Vice President and General Manager J. R. Harrigan of the city railway.

At midnight, however, International Organizer, Fred Fay of the carmen's union announced that the strike of the Des Moines City railway employes was ended, so far as the union was concerned. He said the union would obey the mandate issued by Judge De Graff, and that the men would be notified to return to work as fast as they could be reached.

Strike-Breakers Beaten.

The striking street car men required just one day in which to rid Des Moines of the 500 odd strikebreakers who had been brought into the city to man the cars from Chicago, Omaha and Cleveland. The Iowa hotel, in which the imported men were housed, was surrounded by a great mob of union sympathizers, which demanded that the strikebreakers be turned over to it, and for three hours kept the police busy. The officers tried time and again to get through the crowds, but as often were forced to retreat and take refuge in the hostelry.

The climax of the rioting came when a mob of thousands of infuriated men and women stormed a Great Western train upon which 40 thoroughly cowed strikebreakers had been placed by the police, headed for home. Brickbats, stones and missiles of every kind were thrown through the windows at the frightened strikebreakers, who climbed under the seats to escape the fusillade. Every window in the car was broken.

The full service on all lines was restored Sunday evening and all is quiet again in the city.

Two Clinton, Ia., Youths Drown.

Clinton, Iowa. — Albert Terry and James Golden, each twenty years old, were accidentally drowned near Clinton.

DAILY MARKET REPORT.

Twin City Markets.

Minneapolis, Aug. 7.—Wheat, September, $1.03¼; Dec., $1.04¾; No. 1 northern, $1.06¾; No. 2 northern, $1.05¼; No. 1 durum, 96c; No. 3 corn, 64c; No. 3 white oats, 41¼c; barley, malting, $1.04; No. 2 rye, 80c; No. 1 flax, $2.10.

Duluth, Aug. 7.—Wheat, September, $1.04⅛; No. 1 northern, $1.04¾; No. 1 durum, 97c.

South St. Paul, Aug. 7—Cattle—Steers, $3.25@3.50; cows, $3.00@3.75; calves, $4.00@5.50; hogs, $6.75@6.95; lambs, $2.75@6.50.

Chicago Livestock.

Chicago, Aug. 7.—Cattle — Receipts, 200; market steady; beeves, $5.00@7.35; Texas steers, $4.40@6.10; western steers, $4.00@6.19; stockers and feeders, $3.00@5.35; cows and heifers, $2.10@5.85; calves, $5.50@7.75.

Hogs—Receipts, 10,000; market 5c higher than yesterday's average; light, $7.00@7.60; mixed, $6.90@7.60; heavy, $6.65@7.50; rough, $6.65@6.90; good to choice heavy, $6.90@7.52½; pigs, $5.86@7.45; bulk of sales, $7.15@7.45.

Sheep — Receipts, 5,000; market steady; native, $2.25@4.00; western, $2.50@4.10; yearlings, $3.75@4.80; lambs, native, $3.75@6.90; western, $4.25@7.00.

ECONOMY IN LAUNDRY

LITTLE WAYS BY WHICH TO REDUCE EXPENDITURES.

Buying Soap by the Box Is a Good Method—Stationary Wringer Attached to the Tub Is a Necessity.

Soft water, for use in laundry work, saves soap, clothing, time, energy and money.

Buying soap by the box is more economical than buying it by the quarter's worth.

Removing the soap from the box, and piling it in such a way that it will dry, causes it to wash away less rapidly, and therefore it last longer, than if not dried.

Having a firm, substantial washbench, of a height suited to the worker, so constructed as to hold the tubs securely in position, saves time and energy.

A good stationary wringer, or one which is so made as to be clamped securely to the tub, is a necessity. When through using the wringer, loosen the screws to relieve the pressure on the rubber rollers; wash clean, wipe dry and put it away where it will keep clean until needed. Occasionally cleaning the wringer with kerosene, and then washing with soapsuds, rinsing and drying, tends to keep it in good condition.

The ironing-table should be of a height suited to the ironer; not low enough to cause the worker to stand in a stooped position, nor so high as to necessitate the lifting of the shoulders while ironing.

The ironing-pad and sheet should be perfectly smooth, and securely fastened to the table, if rapid, efficient work is to be done.

Irons should be of medium weight, smooth and clean. When through using the irons, remove them from the stove and set them on end in a dry place to cool. When they are cool, see that they are clean before putting them away. Irons that are left on the stove day after day are liable to be rough, dirty and unfit for use.

A slip for the ironing holder, made of some coarse white material, is convenient and desirable, because it can be so easily laundered.

Rub the iron, each time it is taken from the stove, on a piece of clean paper or cloth, before using, to prevent the possibility of soiling or scorching the article to be ironed.

A clothes-pin bag, which can be tied about the waist when hanging out or taking in the wash, saves many steps and keeps the clothespins clean.

A rope clothes-line should be taken down when not in use, and kept in the clothes-pin bag, where it will be protected from dust and be handy when wanted.—Mary L. Bull, Extension Division Minnesota Agricultural College.

Stuffed Cold Roast Beef.

This is delicious for supper. Butter a long French bread tin, put in a layer of thin sliced roast beef. Over this spread a thick layer of stuffing, then add another layer of sliced beef, and turn over this layer about a teacup of roast beef made gravy, add a very little hot water, just sufficient to keep from burning. Cover with another tin of same size and bake three-quarters of an hour in a quick oven. I make stuffing of crackers broken up and moistened with hot water, a small piece of butter, salt, pepper and poultry seasoning, and a beaten egg, when eggs are cheap, but egg can be omitted.—Exchange.

Drawers for Pantry.

When we built our house we had, in the pantry, two good-sized drawers lined with zinc. These had covers hinged about half-way from front to back. They are the most satisfactory receptacles for bread and cake I have ever had. The cake drawer has a lock as a safeguard against predatory boys.

Sugared Cherries.

Sugared cherries are delicious. Use large, firm cherries for this dish. Have in front of you a soup plate containing the whites of three eggs mixed with five tablespoonfuls of cold water, another plate filled with sifted powdered sugar at your right, the bowl of cherries at your left. Dip each cherry in the water and white of egg, turn it over and over in the sugar and lay on a chilled platter to dry. When all are done sift more powdered sugar over the fruit and arrange carefully on a glass dish.

Banana Fluff.

Slice six large bananas, sprinkle with lemon juice and grated cocoanut, and place directly on ice to chill and ripen for at least an hour. Mash them smooth with a wooden spoon, adding a scant cup of powdered sugar and the stiffly beaten whites of two eggs, which should be lightly folded in; then pour into freezer and turn crank for four minutes, or until there is a slight resistance, when half a pint of cream may be added. Then freeze.

FOREST FIRE FUND

GOVERNMENT WILL SPEND SUM IN MINNESOTA THIS YEAR FOR EMPLOYMENT OF PATROLS.

NATIONAL AID TO STATES

Money to be Dispensed in System of Co-operation—State Forester Cox Says Men Are Already at Head Waters of Streams.

The United States government will spend $10,000 in Minnesota this year for the protection of the forests at the headwaters of navigable streams. Under the Weeks' law passed by the last congress this is to be dispensed through the department of agriculture under a system of co-operation with the states. The money is spent solely in employing patrols.

"We already have the men on the ground," said State Forester Cox, in discussing the aid which the United States government is giving to the state of Minnesota. "This marks the beginning of the federal government protection of timber on the head waters of the navigable streams. It has never before given such protection. Scientists have proved that the standing forests at the head waters of a stream affect the flow of water. Congress has just recognized that fact and has made it possible to give federal aid to the states that are making an effort to protect the timber.

"Minnesota is perhaps more entitled to such than any other state. There are more head waters in this state than in any other. We have more forests on such head waters and there are greater fire risks. We shall use every bit of the sum allotted to us by the federal government."

The co-operative agreement under which the federal government gives aid to the state of Minnesota is made possible by the terms of the Weeks law, which was passed by congress last winter.

Provisions of Law.

This law, besides providing for the purchase by the national government of lands on the head waters of navigable rivers for the purpose of creating national forests to protect these rivers, caried also an appropriation of $200,000 which the secretary of agriculture might expend in order to protect from fire, in co-operation with the states, similar lands in state or private ownership. It was provided in the law that expenditures by the federal government in any state should not exceed the amount spent by the state itself in the co-operative work. Other states which have signed similar co-operative agreements with the government are Maine, New Hampshire, Vermont, New Jersey, and Wisconsin.

The secretary of agriculture concluded that the most effective way to use the money available would be by requiring, as a preliminary to entering into an agreement with any state for co-operative fire protection, that the state authorities should submit a definite plan showing in detail exactly what it was proposed to do. With these plans were required maps showing areas to which protection would be given. All plans submitted are carefully examined by the department of agriculture, to see both that the area to be protected is actually forested land on the headwaters of navigable streams and that the plan of protection proposed is well conceived and thoroughly practical, with an organized and effective system of administration by capable state officers. It was decided for the present year that the amount spent in any one state by the national government should be limited to $10,000.

Funds Go to Patrolmen.

The funds of the federal government will be used solely for paying patrolmen. The state officials select these patrolmen, subject to the approval of the department of agriculture. The maps submitted to the federal government show where each of these patrolmen will be located, the approximate routes of patrol, and all matters necessary to a clear understanding of the the location of lookout points, telephone communications, railroad patrols, location of state forest fire wardens and other officials, and the like.

In short, the basic idea is that efficient fire protection can be given only by the development of a carefully worked out, well manned, and capably officered scheme, which studies the situation beforehand and makes provision for the most effective disposal and use of the available forces, with a view both to preventing fires from getting started and concentrating upon them quickly if they do get started. In the national forests of the West, where the fires must often be fought at a long distance from a base of supplies, a further consideration often of great importance, is how to provision the forces which are on the fire line, perhaps for days at a time. To provide for this every forest officer is expected to know beforehand from what stores, construction or lumber camps and ranches he can obtain food, tools, pack horses, and men, and in what quantities. In fact, the training of the forest officers includes a sort of fire game which consists in suddenly locating an imaginary fire on the map of a national forest and calling on a ranger to tell offhand how and from where he would gather help, how he would organize and conduct his defence, and whence he would obtain supplies and means of transportation. Although conditions in the East seldom present such serious difficulties, they are regarded as calling equally for intelligent planning and the development of a trained force.

Responsibility on State.

Under the terms of the co-operative agreements, the secretary of agriculture may terminate the co-operation at any time that he finds it not to be conducted in a satisfactory manner. In this way the responsibility for organizing and maintaining the work is placed upon the state, which, however, must keep its system up to a good standard of efficiency in order to have the co-operation with the federal government continued. Forestry officials of the department of agriculture will act as inspectors to keep the department informed as to how the states are handling the work. It is believed that under this system a great advance will be made in the development of good state systems of fire protection.

In addition to the states with which agreements have been signed by Secretary Wilson, Massachusetts, Connecticut and Maryland have requested co-operation this year. A number of other states have made inquiry concerning the possibility of their entering into co-operative agreements with the government, but have found that they could not do so under the terms of the law because their legislatures have made no provision for expenditures on behalf of the state.

PREUS GIVES ADVICE.

Counsels Committee of Scandinavian Relief to Keep on its Feet.

Insurance Commissioner Preus, following a conference held in his office by the committee appointed Tuesday to take up the matter of the rate increase in the Minnesota Scandinavian Relief Association of Red Wing, told the committee it could either disband the organization or go along on the increased rates. He advised the latter course.

The commitee was composed of Rev. G. Rast of Minneapolis, Andrew P. Croonquist of St. Paul and Rev. C. J. Nelson of Milwaukee, the latter representing the Milwaukee members of the association.

If it was found members are not ready to continue under higher rates, under the rules of the organization the committee can go to ten of the board of directors, sixty in number, and have them notify the secretary to call a meeting of the directors and disband the organization and distribute the balance of funds in the treasury.

"For the sake of thelittle money that each member would get out of it," said the commissioner, "I hardly think this last suggestion will be acted upon. I do not know what will be done."

Policyholders have been threatening to bring injunction proceedings against the board of directors for raising the rates, but it is believed that following the conference yesterday the members will be advised to abide by the decision and keep the society going.

DOUBT KENSINGTON RUNESTONE.

Christiania Professor Said to Have Pronounced it Spurious.

The Kensington runestone that has proved so effective a subject for controversy among the erudite of Minnesoat and Wisconsin is reported to have been discredited in Norway, to which it was taken by H. R. Holand, its sponsor and champion.

The stone is reported to have been on exhibition at the University of Christiania, where Prof. Hiegstad pronounced it spurious for the reason, it is said, the runes cut in the stone were not used in that form 400 years ago or even up to a much later date. The Norwegian doctor thought the stone might date back as far as 1865.

The Minnesota Historical society, through its archeological committee, is preparing a report on the authenticity of the stone.

MAY BE DR. JACKOLA.

Friends Are Looking for a Man Seen Near Lakeside.

Duluth.—In the vicinity of Lakeside, it is thought, may be the missing Dr. John Jackola, who last spring was arrested in New York for alleged persistent attentions to Mrs. O. H. P. Belmont. John Saari and Gust Lahti, friends of the physician, who went in search of the man, were unable to locate him. The doctor disappeared June 19 and his friends had about come to the conclusion that he was no longer alive.

BEMIDJI CHURCH FINISHED.

Methodists Have One of Handsomest Edifices in City.

Bemidji.—The brick work on the elegant new M. E. church building will be completed in another week. After the brick work is done, the contractor will at once begin the building of the basement walls and floor. When completed, the church will be one of the most handsome and imposing brick structures in the city.

AIRMAN BREAKS STATE RECORD.

Ward, Flying in Curtiss Biplane at Austin, Goes Up 2,500 Feet.

Austin. — Aviator Jimmie Ward, flying in a Curtiss biplane, broke all state records for altitude when he attained the heighth of over 2,500 feet in his last flight at the big aviation meet here.

Ward made three wonderful flights, remained in the air over half an hour and traveled about 10 miles.

NORTHEN FOLKS AROUSED

THREE MYSTERIOUS DEATHS WITHIN YEAR STIR PEOPLE.

Corpses Discovered Under Strange Circumstances—Buried by County.

Sawyer, Minnesota. — Both Indians and settlers in this territory are wrought up over the deaths of Otto Holt, John Sarri and John Orni under peculiar circumstances on their homestead, and there is much speculation as to whether the men were murdered or died accidentally.

All the deaths were under the strangest surroundings. Holt was found dead near the Iverson postoffice, Sarri's dead body was discovered west of Sawyer depot and Orni was found dead west of Sawyer one and a half miles.

Citizens say that great mystery surrounded the finding of the bodies and that all three were buried at the expense of Carlton county and that the coroner's verdict of found dead or accidental death was based on very little investigation and without a real public hearing.

March 14, 1910, Henry Sarri, a lonely homesteader, was found dead on the Northern Pacific railway track, one mile west of Sawyer depot. The coroner said it was a very clear case of accidental death, being struck with a passing train. Sarri's body was taken to Cloquet and buried at the expense of Carlton county.

The night before the find on the track, citizens aver that Sarri and another man had been drinking heavily and the death at least was suspicious, and Sarri was a man not likely to end his own life. Most of the territory is also Indian and under prohibition laws.

John Orni, his brother, a Finlander, came and occupied the deceased man's homestead, and April 7, just a year afterward, he was found dead by a fisherman in his cabin. The corpse was found on the floor, the floor of the rude cabin covered with blood. The night previous a man had been with Orni, staying there all night, and next morning Orni prepared the breakfast, which the two ate. Then the visitor went two miles west of Sawyer for his clothing, which he had left at another homestead. When the visitor returned he found Orni deao on the cabin floor and a gun alongside the body.

Citizens say a few formal questions were asked by the coroner and Orni's body was taken to Cloquet and buried.

Otto Holt's death was even more suspicious, and occurred about four weeks ago. He lived in a cabin three miles west of the Iverson postoffice. Holt was a bachelor and was known to carry about $400 about with him in bills secreted about his clothing. His cabin was found on fire by a stranger and when the fire was out, the charred body of Holt was discovered, but what had become of the money he generally carried on his person, was never discovered. He also was buried by the county authorities.

In consequence of these three mysterious deaths the settlers in these sparsely populated places are full of dread, and they aver that a full and careful investigation would reveal that these three men did not die accidentally, but by the hand of some villian or villians.

STATE SUES LUMBER COMPANY.

Civil Case Involving $25,000 Alleged Mistake on Trial at Brainerd.

Brainerd.—On trial in chambers before Judge W. S. McClenahan of the district court is a timber case brought by the state against the Brooks-Scanlon Lumber company, involving about $25,000. It is alleged that the state sold the timber of section 16-53-12, in St. Louis county, to the lumber company, estimating it at the time at about 5,200,000 feet.

The state later had reason to believe that there was more timber on the tract and a rescale was ordered, disclosing 7,900,000 feet, it is alleged. The state now sues for the difference in value, estimated to be about $25,000. Representing the state is Assistant State's Attorney General Janes of St. Paul.

DITCH CONTRACTOR BEGS OFF.

R. A. Elzy Says Muskeg Fills Drains and He Loses Money.

R. A. Elzy, drainage contractor, appeared before the drainage board to ask that he be not required again to county. These ditches, numbers 59 and 60, have not been entirely paid for because the work has not been declared completed by the drainage commission.

Mr. Elzy says he has cleaned the ditches out twice, but that because of a peculiar formation of muskeg, they have filled up in places. He said he has already lost money on the ditches and that to make him clean them out again will make him lose still more.

The drainage board will go to Koochiching county next month to inspect these two ditches.

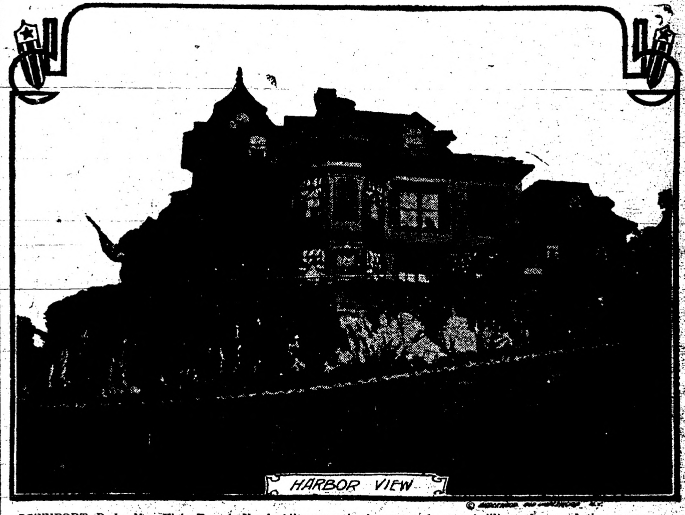
PHYSICIAN FOR GIRL'S HOME.

Sauk Center.—Dr. J. A. Du Bois of this city, has been appointed physician to the Industrial Home for Girls, the State Board of Control authorizing the appointment.

The Board of Control also decided to grade the lands adjacent to the recently built cottages and put in gravel roads and walks.

Plans for two new buildings were considered by the board, one for the superintendent and another for a modern hospital.

SCENE OF FESTIVITY AT NEWPORT



NEWPORT, R. I.—Mrs. Elsie French Vanderbilt gave the largest and most brilliant dance of the season recently at her home, "Harbor View." The function was in the nature of a house warming to mark the opening of the new ballroom of the mansion. The decorations and the furniture of the room are in pure white throughout. The guests were many and socially prominent, and the function in general was notable in the annals of Newport festivities.

LOTS OF WILD GAME

Southwest Coast of Mindoro Is Paradise for Hunters.

Tamarao, Fierce Animal Resembling American Buffalo, Found Only Here—Plenty of Carabao, Boar and Deer.

Manila, P. I.—"A paradise for hunters," is the way Judge Liddell describes the country in the vicinity of his home and plantation on the southeast coast of Mindoro. One game Mindoro excels in is, the tamarao rarest of animals, and one which is found only in Mindoro. This fierce animal, much like an American buffalo, is held in universal dread by every native on the island, who looks on him as a far more formidable creature than the maddest of wild carabaos.

The tamarao is seldom seen in clearings because he sticks to his native wilds. When he does come near a clearing the natives in that vicinity make for the nearest shelter. For the tamarao does not wait to attack. He takes the initiative himself, charging every one and everything in sight.

Mrs. Liddell, wife of Judge Liddell, is, perhaps, the only white woman who has ever seen a tamarao. A few weeks ago one came within fifteen feet of the window of the Liddell kitchen, where she was instructing the cook, and peered in. The natives in the neighborhood took to their heels and then the tamarao quietly walked off.

But if the tamarao is the piece de resistance among the game of Mindoro it is not the only game to be found on the island. There are myriads of deer, wild chickens and game birds of all sorts. There are also plenty of wild boars on the island, some of them of extraordinary size and none of them noted for their docility. Judge Liddell has one tusk fully eighteen inches long. This came from a monster boar, which charged the hunters repeatedly before he was shot down.

Wild carabao hunting is another pastime of the Mindoro planters and one that is not destined to soothe the nerves of weak-hearted men. These big animals are at all times dangerous, and when once wounded or angered will charge their hunters with all the ferocity of an African buffalo.

James Liddell, a son of the judge, had an experience with one of them recently that will not be forgotten in a hurry. He was hunting and shot the big fellow, knocking him off his feet. As the carabao lay still he approached him and when not a foot away the carabao leaped to his feet and charged.

There was no time for a shot, so young Liddell did the only thing open to him—grappled with the infuriated beast. Three times the animal gored him and finally the boy made his escape. What the Filipinos in his party regarded as them fraculous feature of the accident was the fact that the carabao had permitted him to escape.

Porpoise Scares Bathers.

New York.—There was a wild scramble at the Fourth avenue grounds at Asbury Park, N. J., when a porpoise appeared among the 2,000 bathers. The crowd, thinking it was a shark, made a rush for shore, the men leading the women. The porpoise, undisturbed by the clamor, swam leisurely around and then made his way northward, but it was some time before the bathers again got into the water.

DYE HAIR TO MATCH MOTORS

Lawsuit Reveals Peculiar Ways of Society Women of East—Photographer Wins His Case.

New York.—That society women in New York are dyeing their hair, not only to match the interior fittings of their motor cars but even to match the changes of the seasons, was the statement made by William P. S. Earle.

Mr. Earle was delighted over winning a suit for $60 brought by him against Mrs. Louise Balfour in payment for coloring a photograph made for the defendant. Mrs. Balfour is said to be a relative of the British premier.

The photographic artist had colored the picture to show brown hair. Mrs. Balfour wanted her hair Titian in the picture.

"I told her," said Earle, "that her hair was brown, but she insisted on Titian.

"Then I charged her for the work and she would not pay.

"The hair among the women of the 'four hundred' changes with the seasons. When I tinted the picture of Mrs. Balfour her hair was brown. When she sued her hair was Titian. Formerly the women of society were willing to let it go at matching their hair to suit their gowns, but now they must match their hair to suit the fittings of their limousines."

Hobble Skirt Is Hindrance

Mars Game of Smuggling Across Line From Detroit to Windsor—Women More Clever Than Men.

Detroit, Mich.—Hobble skirts and small crowned hats, now very much in vogue, are having a depressing effect on the Windsor export trade. The walking skirt is made to fit the form rather closely and a number of Detroit women have found that when the tubular symmetry of the hobble is disturbed by a few bulky bargains, the sharp-eyed customs officers are very quick to criticize. It would be rash and desperate venture for a hobble-skirited traveler to attempt to smuggle over a woolen blanket, for instance. Only the other day the customs officers at the foot of Woodward avenue stopped a woman and later it was discovered that she concealed a half dozen napkins under her skirt.

"The unfortunate lady doubled one of the napkins twice and I couldn't help but notice it," said the officer who spied her.

Catching female smugglers is difficult work. The women seem to be cleverer than the men at smuggling and they will take longer chances. When they are caught they weep and go into hysterics.

"Oh, the women are certainly the clever smugglers," said Miss Daisy Zuckriegel, who is stationed at the Woodward avenue dock to watch the women who go back and forth on the ferries. Eight years' experience has made Miss Zuckriegel an expert at spotting smugglers.

"How do I spot smugglers?"

"Well, there are several ways. For instance, I watch the people going over the river and I generally remember them when they return. If they attempt to smuggle anything over it is an easy matter to catch them. Then we are familiar with the favorite methods employed by smugglers and we know just where to look. When two women get off the boat, eating candy with much gusto, I ask them to step into the office without any preliminaries. The chances are 100 to 1 that stuff will be found concealed about their persons."

"What do they smuggle?"

"Why, the smuggle anything that is movable. Blankets, linen goods, hardware, laces, butter, eggs and fowl are brought over by women under their skirts."

Mice in Cancer Research

Foreign Animals Resist Attacks of Disease Until They Are Acclimated—360 From Japan.

London.—Three hundred and sixty waltzing mice have just arrived on the Japanese steamer Tango Maru, en route for the National Cancer Research fund. The mice were sent to Prof. E. F. Bashford, the director of the fund, by Professor Higuchi of Tokio, who recently completed a course of research work in the fund's laboratories on the Embankment.

The mice will be used in research work to determine the effects that acclimatization and dieting have in increasing or decreasing the susceptibility of mouse tissues to mouse cancer.

"We have already proved," it was explained at the fund's laboratories the other day, "that if we implant living cancer tissues from English mice on to the newly imported foreign mice there is a certain amount of resistance to the growth. Only a small percentage of the inoculated mice will develop tumors. After a time, however, this degree of protection wears off and finally the foreign mice become as readily susceptible to implanted tumors as our home mice.

"The mice sent to us from Japan are an example of the international free trade existing among research workers on cancer. At times of mouse famine in other countries we have sent English mice to our fellow workers in those countries. Because of this international exchange in European mice it is not easy at the present time to get from Germany or other near countries mice which one can be certain are pure-bred foreign stock. These Japanese mice will be of great value to us, because we know that we have in them an entirely new field for research. Our object, broadly, will be to see whether these mice will become more susceptible to English cancer as they become acclimatized to English conditions and accustomed to English food."

Work Month for Dime.

Plainfield, N. J.—After a month of work, first by an expert in the Farmers' State bank of Tulsa, Okla., and later by other experts in the big safe factory here, a strong box supposed to contain $25,000 was opened in this city. A lone dime was all the steel chest contained.

The safe was used by L. R. Tubner, cashier of the Tulsa bank. Tubner killed himself recently in Florida.

Banish Hard-Tack.

New York.—Word comes to military circles here from Washington that hard-tack has been banished in favor of a new ration to be known as "field bread." Hard-tack will be used in the future only when an organization is cut off from a supply train or is on a forced march. The new field bread is composed of flour, water, salt and yeast.

Stole Collection Plates.

Hartford, Conn.—The Society of the Park Congregational church of this city is looking for the person who stole all but two of the collection plates. The loss was discovered when a collection was about to be taken.

MINNESOTA HISTORICAL SOCIETY.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, AUGUST 11, 1911 NO. 2.

TOGO AT CAPITAL

RIDES IN CAB OF AN ELECTRIC ENGINE PART OF WAY TO NATIONAL CAPITAL.

IS WELCOMED BY TAFT

Deeply Interested in "World Pre-eminence of American Railroading." —Hero of Japanese Navy Is Greeted by a Crowd.

Washington, D. C. — Admiral Togo and his party are now at the national capital. Owing to an incessant drizzle of rain, the crowd which greeted the Japanese naval hero was small, but he was enthusiastically cheered as he passed through the union station to a waiting automobile.

President Taft had sent one of the White House automobiles and Admiral Togo went immediately to a hotel and retired for the night. The admiral called on President Taft. He will be entertained here almost continuously until his departure on Wednesday next.

Major Archibald Butt and Lieutenant Commander Palmer, military and naval aides to the president, met the distinguished Japanese at the station, Lieutenant Commander Palmer formally welcoming the visitor and his party on behalf of the president.

Admiral Togo spoke his acknowledgement briefly through an interpreter and left the train, escorted by Major Butt and Lieutenant Commander Palmer, whose full dress uniforms contrasted with the black frock coat and sombre rainy day attire of the Japanese naval hero. Following him were Chandler Hale, third assistant secretary of state, and Captain Potts, U. S. N., who walked with Baron Uchida, the Japanese ambassador. The entire embassy staff was present.

Acknowledges Cheers.

Admiral Togo, as he walked through the station, raised his hat repeatedly in response to the cheers of the crowd. His entry, however, [illegible] unlike [illegible] visitor in [illegible] scarcely a word was spoken by any [illegible] the party from the time the admiral left his train, deep in the station yard, until he reached the street. The Japanese in the party maintained a reverent silence.

Admiral Togo's departure from New York had a feature quite as unusual as his midnight arrival and welcome in New York bay Thursday night, for he left the city in the cab of a big electric engine drawing a heavy Pennsylvania train for Washington.

Although the luxurious private car Olivette, which the government has provided for him, was attached to the train, the naval hero elected to sit by the engineer's side and watch him operate the 4,000 horsepower motor.

"I am intensely interested in your world pre-eminence in electric engineering and railroading, the admiral said through his interpreter, "and I wish to avail myself of this opportunity closely to observe both. Therefore, I will ride with the engineer."

The admiral rode in the cab to the limit of the electric zone at Harrison, N. J., and there entered his car. He asked many questions of the engineer and displayed more interest in this incident of his visit than anything else.

It had been agreed by Commander Tanaguchi and Chandler Hale, third assistant secretary of state, that the newspaper reporters would be permitted to interview the admiral briefly, but not on politics. But, as soon as they had reached the Anglo-French-American arbitration treaties, some of the reporters asked questions concerning Japan's attitude toward Russia and the Moroccan affair. Admiral Togo replied briefly that he would not discuss politics, but the reporters persisted and Mr. Hale and Mr. Tanaguchi emphatically terminated the interview.

LAD CONFESSES PATRICIDE.

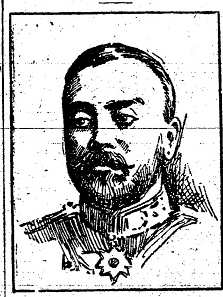
Youth Says He Shot Father Because He Refused Him Money.

Chicago, Ill. — John Vacek, a 17-year-old boy, last night confessed to the killing of his father in their home The father had upbraided the boy for not working after the boy had asked for money.

In his confession young Vacek declared when he went to his father for money the older man tried to induce him to murder his mother, offering to pay him well for it. He went to his father about 8 o'clock in the morning, he said, while Mrs. Vacek was away. Horrified at the alleged proposition of the father, the boy said he drew his revolver and attempted to shoot over his father's head. He missed the aim and the bullet struck his father and killed him.

The police scout the story of the father's offer, as they were unable to learn of any domestic infelicity.

ADMIRAL TOGO IN GOTHAM.



ADMIRAL TOGO.

New York.—Admiral Count Haihachiro Togo, sea fighter and conqueror of the Russian fleet in the Russo-Japanese war, made ready for the amenities of his twelve days' visit to the United States. Admiral Togo reached here from England on the Lusitania and was welcomed down the bay by representatives of the government at Washington and the Japanese government here and brought to this city on the derelict destroyer, Seneca.

PASS COTTON TARIFF BILL

CUTS DUTY ON MANUFACTURED GOODS 21 PER CENT.

Not an Amendment Offered, and Act Is Put Through 202 to 91.

Washington, D. C. — Supported by all the Democrats and by 30 insurgent Republicans, the Democratic cotton tariff bill, the third of the big tariff revision measures brought forward by the Democratic house of Representatives, passed that body by 202 to 91. The bill cuts the average tariff on cotton manufactured goods from 48 to 27 per cent ad valorem, a 21 per cent reduction in [illegible] that the Democratic [illegible] to reduce [illegible] about $8,000,000.

Not an amendment was offered to the bill, although the Republicans attacked it vigorously on account of alleged increases in certain items over the rates of the Payne-Aldrich tariff law.

Scarcely had the cheers that greeted the passage of the cotton revision bill subsided when Democratic Leader Underwood, calling up the free list bill as it passed the senate a few days ago, accomplished a strategic move which surprised the Republicans.

He asked for a conference on all the amendments to the free list bill except that of Senator Gronna, of North Dakota putting cement on the free list. He urged that the house accept that amendment, adding to it lemons. Pacific coast Republicans made ineffectual attempts to stop this sudden and unexpected putting of lemons on the free list, but the amendment carried. The change gave the house Democrats what they claimed to be an added advantage in dealing with the senate in the conference committee.

FINDS LABOR SLUGGERS GUILTY.

Chicago Jury's Verdict Charges Assault With Intent to Kill.

Chicago, Ill. — Peter Gentleman, Edward Storgaard, William Connors and Arthur O'Connor, four so-called labor sluggers, were found guilty of assault with intent to kill Morgan H. Bell, a union steamfitter, whom they had driven from work at the point of a revolver. A motion for a new trial was entered and will be argued before the next term of court.

The conviction is the first in the labor slugging war that has created terror in Chicago for months. The labor rows developed from a factional fight between different organizations of plumbers and steamfitters. In the reign of lawlessness thert have been at least three murders in downtown saloons.

The charge on which the men were convicted is punishable by imprisonment of from one to fourteen years.

Oldest City Official in U. S. Dies.

Bloomington, Illinois. — James F. Hyde, of Lincoln, Ill., died in Pierre, S. D., where he had gone to visit his son. He was 98 years old, the oldest resident of Logan county, the oldest Mason in Illinois, and was the oldest city official in the United States, when his term as city treasurer of Lincoln expired last spring.

Bishop Mallalieu Is Called.

Auburndale, Mass. — Reverend Dr. William D. Francis Mallalieu, bishop of the Methodist Episcopal church, and probably oldest minister in point of years of service in the denomination, died after a month's illness of old age and exhaustion. He was 83 years of age.

MINER IS RESCUED

JOPLIN, MO., WORKERS REACH IMPRISONED LAD WITH A DRILL SHAFT.

WAS BURIED THREE DAYS

Calls Up a Cheery "Hello!" and Is Lowered Food and Drink.—Water Creeping Into His Underground Cell.

Joplin, Missouri. — Joseph Clary has been reached by rescuers. He was alive and well. When the last spadefuls of earth were removed by workmen in the shaft and they dropped through into the drift, Clary threw himself into their arms and wept while the shouts of thousands cheering at the mouth of the mine echoed down the shaft.

Three workmen were digging in the narrow shaft when the bottom gave way, and they dropped into the drift. Clary saw the light of day and looked upon fellow beings after a period in darkness which, though reckoned by him to be something over four days, was really exactly three days and 45 minutes.

Joplin, Missouri. — Entombed for feet below the surface of the earth, facing possible death from the rapidly rising water in the mine drift, Joseph Clary, the young miner caught by a cave-in at the White Oak mine here Sunday, feasted on fried chicken and joked with friends who are waiting for his rescue.

"Hello," his brother-in-law, Maurice Grafton, called down the hole when the drill bits had been removed.

"Hello, boys, I'm hungry," came the clear, but faint reply.

Then Thomas Clary, father of the entombed miner, hastened to his home, where the young man's mother was prostrated from grief, and told her the young man was still alive. The news, the doctors say, has saved her life.

From his home, the father, one of [illegible] milk and stimulants, which were lowered on a piece of rope to his son. After drinking these Clary seemed much stronger and remained near the drill hole talking with those at the top.

"I have not worried any, though it has been a long while," he said, "for I knew that you were after me. The water has been rising fast in here and it is about waist deep in some places now. I don't believe it will get much higher, for this is dry ground."

The ground where the mine is located is known as "dry ground," and it has never been necessary to use a pump to keep the water out of the drifts while work was going on. This fact lends encouragement to those who are working to sink a rescue shaft to the drift. If, however, the shaft is not down to the drift within two or three days it may be too late to bring the young man out alive.

After the entombed man had eaten his supper an electric flashlight was let down to him and also a small rope which he tied around his waist, so that in case he stepped into a deep hole while exploring his prison he could be saved.

In talking to Clary, it was learned for the first time that one of the former drill holes penetrated the drift in which he is confined. He thinks it was the one that was sunk Monday, but whether this is correct is problematical. The drill hole penetrated the roof of the drift near one of the walls and Clary says that though he called up it until he was exhausted he failed to get a reply and thought that the rescuers had given up hope that they would find him alive. Then he became despondent, he says.

The work of sinking the rescue shaft is progressing rapidly. The shaft is now down about 50 feet, with every indication that it will reach the entombed man. As the work progresses, however, it is necessary to crib the sides with logs to keep the walls of the shaft from caving.

Body in Maine Wreck Identified.

Havana, Cuba. — The bones found Tuesday in the wardroom of the battleship Maine, which were believed to be the remains of Assistant Engineer Merritt, were fully identified. The identification was based on the configuration of the skull. The bones have been placed in a casket to await instructions from Merritt's family. Two more beyond identification, were found, making the total number recovered 21.

Wife Dislikes Jap Husband.

Seattle, Wash.—Lena Porter Uyeno, a former Minnesota school teacher, 20 years old, who was married to a Japanese May 11, 1910 asked the superior court for a decree of divorce on the ground of cruelty and incompatibility. They lived together only eleven days.

ORDERS OLD GLORY DOWN

LONDON, ONT., CITIZENS PROTEST DECORATIONS.

Charge Discourtesy to Union Jack in Detroit, Stoutly Denied There.

London, Ontario. — As a result of many protests from citizens, Alderman Mitchell, chairman of the decorations committee of the London Old Boys' Association, ordered down all American flags which had been included in street decorations. Poles along the main streets had been draped with bunting and on top of each were four Canadian and four American flags, the latter being included because many of those returning to their home town for the "olds boys'" celebration are now residents and citizens of the United States.

So much feeling developed that, owing to fear that an unpleasant flag incident might occur, it was decided to remove the American flags.

Action Is Commended.

Alderman Mitchell's action was sustained by the East London Progressive Association, which voted, after a warm discussion, to write to the city council a letter commending the alderman's decision. During the discussion members declared that they had been compelled, while visiting in Detroit, to remove Canadian flags which they were wearing on their coats. One member declared that he had seen the American flag cheered and the Union Jack hissed while in a theater there.

This is the second time the American flag has been hauled down here. Three years ago, during an Orange celebration, the standard was torn down from the balcony of a hotel and tramped on. American citizens here are indignant and there is talk of withdrawing the float which they were going to put in the parade next week.

Detroit Denies Discourtesy.

Detroit, Aug. 5.—If Canadians visiting Detroit were ever compelled to re[illegible] the flags of their country from [illegible] the fact was not brought [illegible] of the authorities.

Emphatic denial of the statements contained in the London dispatch was made at police headquarters and at the newspaper offices, where it was said that so far as known no act of discourtesy had ever greeted the Union Jack, either in the theaters or on the streets of this city.

On the contrary, the British emblem invariably occupies a conspicuous place in the decorations displayed at all functions here of an international character.

MANKER SUICIDE IN JAIL.

Former Banker, Who Embezzled $50,000, Kills Self in San Francisco.

San Francisco, Calif. — Carey A. Manker, formerly a banker of Pearl, Ill., but for three years a fugitive under indictment for embezzlement of $50,000, died in central emergency hospital here a suicide. Sitting on his prison cot Manker stabbed himself in the neck, using a small pocket knife. He was found unconscious on the floor of his cell in the city prison, and was taken to an emergency hospital. It was found that the knife blade had severed the jugular vein. The knife evidently had been smuggled in to Manker and the chief of police has ordered an examination.

50 MEN BURIED IN CAVE-IN.

Two Taken Out Dead, Four Fatally Hurt—May Be More.

East Liverpool, Ohio. — In a sewer cave-in at the plant of the Pittsburg Crucible Steel company at Midland, Pa., seven miles from here, 50 men were buried.

Two were taken out dead and four others were probably fatally hurt. Rescuers are still at work and the death list may grow larger.

The sewer is being built from the plant to the river, 200 feet distant. It is said there were no supports built at the sides of the excavation to hold back the earth. The men at work constructing the sewer are foreigners.

Take No Action Regarding Rate Ruling

Chicago, Illinois.—Traffic officials of the Harriman roads, after an all-day conference here, announced they had failed to decide on a plan of action regarding the recent interstate commerce commission ruling on intermountain commodity rates. They will meet again Aug. 7 with representatives of all transcontinental lines.

Murdered Man Not Wealthy.

New York, N. Y. — The will of William H. Jackson, the aged broker's clerk whom Paul Giedel murdered in the belief that he was wealthy, has just been filed for probate. It disposes of an estate valued at less than $2,500, all of which goes to a brother.

DES MOINES RIOT

BREAK EVERY WINDOW IN THE BUILDING, DESPITE POLICE INTERFERENCE.

COURT STOPS THE STRIKE

Imported Men Are Forced to Leave City, Other Non-Unionists Take Refuge in Jail From Mob Fury.

Des Moines, Iowa. — Sympathizers with striking employes of the Des Moines City Railway company, several thousand strong, bombarded the office building of the company at Sixth and Mulberg streets, in which is located the office of General Manager J. R. Harrigan, and shattered every window in Harrigan's office. Then the crowd began to beat out every window in the building. Despite all efforts of the police, the fusillade did not cease until the windows were broken and the building badly damaged.

Leaders of the rioters, unmindful of a court mandamus ordering the strike to be ended, made inflammatory speeches before the attack on the building began. An attempt to enter the offices was blocked by the police until the arrival of the reserve squads. The leaders said they wanted to "get" Harrigan if he was in the office, if not, they would take his desk and furniture and smash it up. Twelve arrests were made.

After a day, marked with many riots, wild hunts for strikebreakers, assaults and broken heads, striking employes won a partial victory when Judge Lawrence De Graff issued a mandatory writ of injunction is district court ordering the city railway and its employes to resume the service as before the strike within a reasonable time.

Reinstatement Ordered.

It was also ordered by the writ that Conductor Hiatt over whose discharge for the alleged theft of two 5-cent fares the entire trouble originated, be reinstated pending arbitration. Papers to carry out the provisions of the writ were sent out immediately to serve them on President Leonard of the strtet car men's union, and Vice President and General Manager J. R. Harrigan of the city railway.

At midnight, however, International Organizer, Fred Fay of the carmen's union announced that the strike of the Des Moines City railway employes was ended, so far as the union was concerned. He said the union would obey the mandate issued by Judge De Graff, and that the men would be notified to return to work as fast as they could be reached.

Strike-Breakers Beaten.

The striking street car men required just one day in which to rid Des Moines of the 500 odd strikebreakers who had been brought into the city to man the cars from Chicago, Omaha and Cleveland. The Iowa hotel, in which the imported men were housed, was surrounded by a great mob of union sympathizers, which demanded that the strikebreakers be turned over to it, and for three hours kept the police busy. The officers tried time and again to get through the crowds, but as often were forced to retreat and take refuge in the hostelry.

The climax of the rioting came when a mob of thousands of infuriated men and women stormed a Great Western train upon which 40 thoroughly cowed strikebreakers had been placed by the police, headed for home. Brickbats, stones and missiles of every kind were thrown through the windows at the frightened strikebreakers, who climbed under the seats to escape the fusillade. Every window in the car was broken.

The full service on all lines was restored Sunday evening and all is quiet again in the city.

Two Clinton, Ia., Youths Drown.

Clinton, Iowa. — Albert Terry and James Golden, each twenty years old, were accidentally drowned near Clinton.

DAILY MARKET REPORT.

Twin City Markets.

Minneapolis, Aug. 7.—Wheat, September, $1.03¼; Dec., $1.04¼; No. 1 northern, $1.06¾; No. 2 northern, $1.05½; No. 1 durum, 96c; No. 3 corn, 64c; No. 3 white oats, 41¼c; barley, malting, $1.04; No. 2 rye, 80c; No. 1 flax, $2.10.

Duluth, Aug. 7.—Wheat, September, $1.04⅛; No. 1 northern, $1.04¾; No. 1 durum, 97c.

South St. Paul, Aug. 7—Cattle—Steers, $3.25@3.50; cows, $3.00@3.75; calves, $4.00@6.50; hogs, $6.75@6.95; lambs, $2.75@6.50.

Chicago Livestock.

Chicago, Aug. 7. — Cattle — Receipts, 200; market steady; beeves, $5.00@7.35; Texas steers, $4.40@6.10; western steers, $4.00@6.10; stockers and feeders, $3.00@5.35; cows and heifers, $2.10@5.85; calves, $5.50@7.75.

Hogs—Receipts, 10,000; market 5c higher than yesterday's average; light, $7.00@7.60; mixed, $6.90@7.60; heavy, $6.65@7.50; rough, $6.65@6.90; good to choice heavy, $6.90@7.52½; pigs, $5.85@7.45; bulk of sales, $7.15@7.45.

Sheep — Receipts, 5,000; market steady; native, $2.25@4.00; western, $2.50@4.10; yearlings, $3.75@4.80; lambs, native, $3.75@6.90; western, $4.25@7.00.

ECONOMY IN LAUNDRY

LITTLE WAYS BY WHICH TO REDUCE EXPENDITURES.

Buying Soap by the Box Is a Good Method—Stationary Wringer Attached to the Tub Is a Necessity.

Soft water, for use in laundry work, saves soap, clothing, time, energy and money.

Buying soap by the box is more economical than buying it by the quarter's worth.

Removing the soap from the box, and piling it in such a way that it will dry, causes it to wash away less rapidly, and therefore it last longer, than if not dried.

Having a firm, substantial washbench, of a height suited to the worker, so constructed as to hold the tubs securely in position, saves time and energy.

A good stationary wringer, or one which is so made as to be clamped securely to the tub, is a necessity. When through using the wringer, loosen the screws to relieve the pressure on the rubber rollers; wash clean, wipe dry and put it away where it will keep clean until needed. Occasionally cleaning the wringer with kerosene, and then washing with soapsuds, rinsing and drying, tends to keep it in good condition.

The ironing-table should be of a height suited to the ironer; not low enough to cause the worker to stand in a stooped position, nor so high as to necessitate the lifting of the shoulders while ironing.

The ironing-pad and sheet should be perfectly smooth, and securely fastened to the table, if rapid, efficient work is to be done.

Irons should be of medium weight, smooth and clean. When through using the irons, remove them from the stove and set them on end in a dry place to cool. When they are cool, see that they are clean before putting them away. Irons that are left on the stove day after day are liable to be rough, dirty and unfit for use.

A slip for the ironing holder, made of some coarse white material, is convenient and desirable, because it can be as easily laundered.

Rub the iron, each time it is taken from the stove, on a piece of clean paper or cloth, before using, to prevent the possibility of soiling or scorching the article to be ironed.

A clothes-pin bag, which can be tied about the waist when hanging out or taking in the wash, saves many steps and keeps the clothespins clean.

A rope clothes-line should be taken down when not in use, and kept in the clothes-pin bag, where it will be protected from dust and be handy when wanted.—Mary L. Bull, Extension Division Minnesota Agricultural College.

Stuffed Cold Roast Beef.

This is delicious for supper. Butter a long French bread tin, put in a layer of thin sliced roast beef. Over this spread a thick layer of stuffing, then add another layer of sliced beef, and turn over this layer about a teacup of roast beef made gravy, add a very little hot water, just sufficient to keep from burning. Cover with another tin of same size and bake three-quarters of an hour in a quick oven. I make stuffing of crackers broken up and moistened with hot water, a small piece of butter, salt, pepper and poultry seasoning, and a beaten egg, when eggs are cheap, but egg can be omitted.—Exchange.

Drawers for Pantry.

When we built our house we had, in the pantry, two good-sized drawers lined with zinc. These had covers hinged about half-way from front to back. They are the most satisfactory receptacles for bread and cake I have ever had. The cake drawer has a lock as a safeguard against predatory boys.

Sugared Cherries.

Sugared cherries are delicious. Use large, firm cherries for this dish. Have in front of you a soup plate containing the whites of three eggs mixed with five tablespoonfuls of cold water, another plate filled with sifted powdered sugar at your right, the bowl of cherries at your left. Dip each cherry in the water and white of egg, turn it over and over in thq sugar and lay on a chilled platter to dry. When all are done sift more powdered sugar over the fruit and arrange carefully on a glass dish.

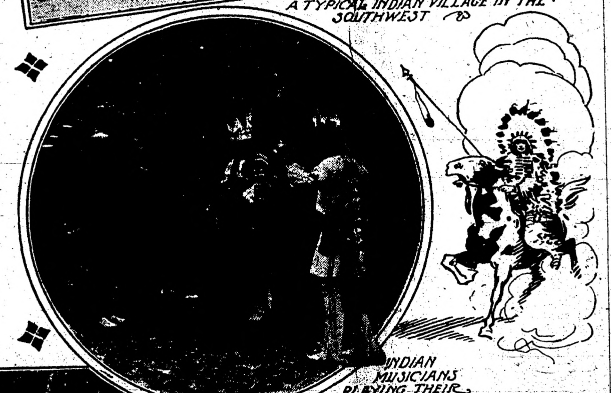
Banana Fluff.

Slice six large bananas, sprinkle with lemon juice and grated cocoanut, and place directly on ice to chill and ripen for at least an hour. Mash them smooth with a wooden spoon, adding a scant cup of powdered sugar and the stiffly beaten whites of two eggs, which should be lightly folded in; then pour into freezer and turn crank for four minutes, or until there is a slight resistance, when half a pint of cream may be added. Then freeze.

Intentional Duplicate Exposure

UNCLE SAM TO RECORD INDIAN MUSIC

A TYPICAL INDIAN VILLAGE IN THE SOUTHWEST

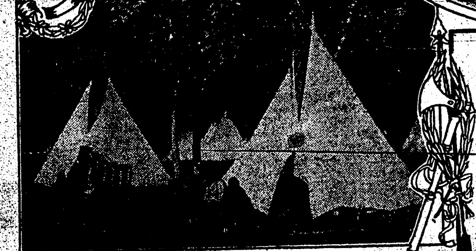


INDIAN MUSICIANS PLAYING THEIR NATIVE MUSICAL INSTRUMENTS

THE United States government has recently undertaken to do something that a great many people have been declaring for years past ought to be done. This is to record and perpetuate the tribal music of the American Indians. All over the world people of every nationality have of late years been striving to perpetuate the folk songs of the different races that inhabit the globe, because it has come to be recognized that these primitive songs which have seldom been written but have simply been handed down from one generation to another constitute an invaluable link with the past.

In the case of our Indians, however, in greater degree perhaps than with any other primitive people, is there need for quick work if the old songs and ancient music is to be chronicled for the benefit of future generations who will know the Indian only from books and pictures. The Indian music alike to the folk songs of European nations, which have been brought to the fore in recent years, affords most interesting sidelights on the peoples in whose lives it has so long played a part and what is yet more important many of the old Indian songs have a historical significance or at least expression to traditions so interesting and poetic and beautiful that it would be nothing short of a calamity were they to be lost.

Aside, however, from the fact that the Indians of North America is a vanishing race and that their music is passing with them there is yet another incentive to urge energetic work now that this musical research has been undertaken in earnest. This extra spur lies in the fact that there is a tremendous wealth of Indian music to be studied and chronicled in permanent form,—each individual tribe having had from time immemorial its distinctive songs and chants. A man who is attempting to compile a complete pictorial record of the Indians has already spent twenty years in the work and it is likely that as much time will be required if there is to be mirrored for the benefit of future generations the distinctive music of all the various tribes.



A TYPICAL INDIAN VILLAGE

INDIAN MUSICIANS

Private individuals, musicians or scientists, have from time to time in the past made effort in a small way to perpetuate American Indian music and while they deserve credit for what they have accomplished it is an undertaking which through its sheer magnitude, if for no other reason, needs the resources of the national government. That it is pre-eminently a government function is likewise attested by the fact that it has promise of success only when prosecuted through the organized channels of intercourse with the Indians,—channels which enable federal officials to get into the confidence of the more intellectual men of all the various tribes in a degree that would scarcely be possible except in the case of an individual who lived for many years among the Indians whose secrets he sought.

The governmental study and perpetuation of Indian music is being conducted under the auspices of the Smithsonian Institution and National Museum at Washington. The bureau of Ethnology is the particular branch of this great seat of research which has the Indian music investigation in charge. Probably the most interesting phase of the whole undertaking is that which has to do with the activities of Miss Frances Densmore. Miss Densmore, who is an accomplished student of music, has spent much time among the Chippewas and other tribes whose music is at once notable and representative and has recorded as many as two hundred songs belonging to a single tribe.

Oddly enough the phonograph has been the chief means of capturing the songs of the forest. There is no system of written music among most of the tribes and the phonograph was hit upon as the only possible means of providing the means of studying the music carefully and leisurely. As may be surmised it was anything but an easy task to induce some of the more superstitious of the red men to sing into the strange machine or to induce them to even permit the recording apparatus to be set up within earshot of their camp fires when there was in progress those ceremonial rites and dances which call up the musical lore of the savages.

Finally, after much perseverance, however, at Indian agencies and elsewhere, the music hunters have succeeded in making a creditable beginning in securing the priceless phonograph records of Indian music. In the case of one or two tribes the song collection of "canned music" is practically complete. After records of Indian songs or music are secured they are transcribed in piano score and studied scientifically. Meanwhile the collection of records will be kept on file for the benefit of the musical students of future generations who will find it a priceless boon to hear the Indian music as originally rendered.

The researches which have been made show that Indian music is as complex as is the tribal life of the original Americans. An accompaniment of song is provided for every public ceremony as well as for every important act in the career of an individual. The music of each ceremony has its peculiar rhythm, as have also the classes of songs which pertain to individual acts such as fasting and prayer, hunting, courtship, the playing of games and the facing or defying of death. An Indian or a person thoroughly versed in Indian musical lore can determine the class of a song by means of the rhythm of the music.

From a technical musical standpoint, the Indian music is very similar to the form of our own music. The compass of the songs varies from one to three octaves and some of the songs have no words, although this does not seem to impair their definite meaning. There is much chorus singing among the Indians and in some tribes there are choirs of picked singers who are paid for their services when they appear at any formal ceremonies. It may surprise many readers to learn that some of the Indian communities are so keen for music that they even hold musical contests. A favorite form of competition seeks to determine which singer or group of singers can make the best showing in reproducing a song with accuracy after having heard it but once.

The Indian songs are the property of clans, societies and individuals and the rights of ownership are rigidly enforced. In many instances the privilege of singing any individually-owned song must be purchased from the composer and in the case of the songs of clans not only is the right to sing the melodies restricted to members of the clan but each clan has special officers to insure the exact transmission and rendition of their songs, a fine being imposed upon any member who makes a mistake in singing. Indian women have composed many of the best of the Indian songs, including lullabies, spinning and grinding songs and the songs of inspiration and encouragement intended to be sung to the warriors setting out for battle.

It is usually difficult for a listener of another race to catch an Indian song owing to the conflicting noise due, in a great part, to the beating of the drums. There is usually a difference in time, the drum beats being designed to govern bodily movements and mark the steps of the ceremonial dancers, whereas the song voices the emotion of the appeal. The drums may be beaten in 2-4 time and the song be in 3-4 time or the beat be in 5-8 time against a melody in 3-4 time, or the entire song may be sung to a rapid tremolo beating of the drum. The officials who have been making a study of Indian music are enthusiastic over its possibilities. They declare that not only does the field afford rich opportunities for the study of the growth of musical form, but the Indian songs themselves offer to the present-day composer a wealth of melodic and rhythmic movements constituting a source of inspiration equal to that which has been supplied by the folk songs of Europe and vastly more serviceable in the development of a distinctive American "school" of music.

Scales That Would Weigh a Thought

Sir William Ramsay, the distinguished English scientist, has invented a pair of scales delicate enough, literally, to weigh a thought. Their record so far is one seven-millionth of an ounce, which is considerably lighter than most thoughts usually are. The scales are kept under Sir William's own laboratory in a small subterranean chamber.

The room is kept in semi-darkness. So delicate are these wonderful scales that their balance is disturbed by the alteration of temperature caused by the turning on of an electric light at the other end of the room. The operator has to leave them for an hour in darkness—after he has tiptoed from the room, so that his footfall should not set up any vibration—and then read them swiftly, before any change in the temperature has had time to affect them.

Hanging by one end of the beam of the scales by a strand of silica fibre so slender that it is scarcely possible to see it is a tray. Upon this is placed a minute glass tube. Imprisoned in the tube is a whiff of xenon, a gas discovered by Sir William Ramsay. The movement of the scales when the tube is dropped upon them is so slight that it cannot be detected at all by the eye. But the movement is made to swing from side to side a tiny mirror, upon which a beam of light is focussed. The result is that a shifting point of light is thrown upon a graduated black scale six feet away. The weight of the tube, with the gas in it, is then recorded by the movement of this pin-point of light on the scale.

Then comes the interesting test. The gas is released from the tube, which is weighed again. It is now found to weigh a two hundred and fifty-thousandth of a milligramme, or a seven thousand millionth of an ounce, less than it did when the gas was in it. Therefore, the weight of this whiff of gas was a seven thousand millionth of an ounce.

The smallest object that can be picked up with the most delicate forceps is a piece of aluminum wire far thinner than a human hair, a twenty-fifth of an inch in length, which weighs a fourteen hundred thousandth of an ounce. It can scarcely be seen, and it is difficult to detect whether it is resting on the scales or not. A section of aluminum wire weighing an eighty-four hundred thousandth of an ounce can be prepared. But it is only visible in a microscope. For this reason weights of less than a fourteen hundred thousandth of an ounce have to be registered in gases.

SMILES

Plying His Trade.

A man who had been caught in a raid on a gambling house was arraigned, not long ago, before a magistrate.

"What is your trade?" the magistrate asked.

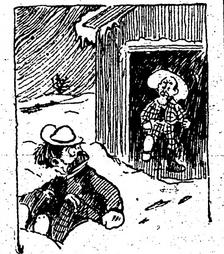
"I am a locksmith, sir."

"And what were you doing in the gambling den?" pursued the magistrate. "What were you doing when the police entered?"

The locksmith looked into the magistrate's face with an expression of sublime innocence.

"Why, your honor," he answered, "I was making a bolt for the door."

OUT IN THE COLD.



Weary Willie—This kicking me out of your barn into the snow is what I should call a rather summary proceeding.

Hiram Haymow—Waal, if you sit in that wet snow fer a little while you'll think it's more wintry than summary!

A Food Crank.

His fad was eating toasted corn—
On nothing else would dine;
His funreal will be this morn,
The hour, half-past nine.

His System.

"I suppose, senator," said the beautiful girl, "you have succeeded in your political career by always being at the right place at the right time."

"Well, no," the statesman replied. "I am rather inclined to attribute my success to the fact that I have generally been able to find out just a little before they started which way my constituents were going."

Sacrificial.

Sweet Girl (affectionately)—Papa, you wouldn't like me to leave you, would you?

Papa (fondly)—Indeed, I would not, my darling.

Sweet Girl—Well, then I'll marry Mr. Poorchap. He is willing to live here.

Not to Be Tied Down.

"Now that you have a baby in your house, Mrs. Gadsby, I suppose you will have to give up traveling so much."

"Oh, no. We have a nurse who has promised to send me a night letter about the little darling at least three times a week."—Judge.

Welcoming a New Deal.

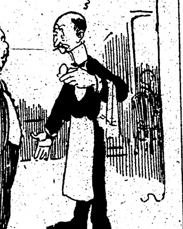
"I see that your trust is compelled to disband."

"Yes," replied Mr. Dustin Stax.

"You seem very cheerful about it."

"Of course. Our enterprise has never yet been readjusted without enabling some of us to take down a very comfortable profit."

DIDN'T WANT HIS GUEST SHOCKED.



Waiter—Gent ordered three boiled eggs, and we've nothing in the house but this one, and it's not very fresh either.

Landlord—Well, break it to him gently, John.

Let the Onion Alone!

An odorless onion is in sight,
This should cheer up the hearts of men;
But there are men who have a hunch
Their wives will turn to garlic then.

No Longer Starring.

"Of course you are a firm believer in the innate goodness of human nature?"

"Oh, yes. Still, if rain had spoiled the coronation in London I don't believe Queen Alexandra would have shed tears of vexation.

At Sea.

"My husband is particularly liable to seasickness," remarked the lady passenger. "Could you tell him what to do in case of an attack."

"'Tain't necessary, mum," replied the captain, "he'll do it."—Mariner's Advocate.

When Pride Took a Fall.

He had asked her father for her hand and been duly accepted.

Naturally he was inclined to be jubilant, the girl being pretty and the father reputed rich.

"Oh, well," said the latter presently, as he carefully inspected the clear Havana the youth handed him, "you needn't be so unduly puffed up over it. You're the sixteenth youngster I have accepted for a son-in-law this year and I expect two more tomorrow."

"Wh-hy, what does this mean?" stammered the youth.

"It means," replied the shocking old poppy, "amusement for the girl and cigars for me."

Worthy of a Trial.

"Have you ever supported Booth?" asked the manager.

"No," replied the applicant, "I never saw Booth act."

"How about McCullough?"

"McCullough died before I went upon the stage."

"Of course you were with Mansfield?"

"No, sir, I am sorry to say that Mansfield never had a place for me in any of his companies."

"Hm. Have you ever been Mrs. Fiske's leading man?"

"Not yet."

"I guess I'll give you a chance. You may be able to learn something."

Tricks of the Memory.

"Confound it all!" cried a broker, "I've forgotten my new telephone number. I didn't write it down because that's an indication of mental weakness."

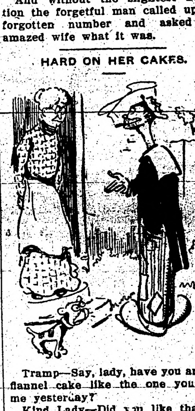
"What about forgetting the number?" said the other man. "Isn't that mental weakness, too? Is it the number of your home phone?"

"Yes."

"Then why not call up your wife and ask her what it is?"

And without the slightest hesitation the forgetful man called up the forgotten number and asked his amazed wife what it was.

HARD ON HER CAKES.



Tramp—Say, lady, have you another flannel cake like the one you gave me yesterday?

Kind Lady—Did you like that one so much?

Tramp—No'm, but I want to half sole my other shoe.

One Kind.

Initials carved within a heart
The decoration,
And on the tree we thus behold
Love's conservation.
—Judge.

The Unexpected Sneeze.

A teacher was giving her small charges a lesson in politeness.

"Now, when," said she, "should you say 'excuse me, please?'"

There was a moment's silence. Then a very small boy put up his hand.

"Well, Johnnie?"

"Please, ma'am, you should say excuse me, please,' when you sneeze at th' table an' don't turn away your head so quick enough."

Visionary Delicacies.

"Well, I've got to look after my tomatoes and string beans and things."

"You don't expect to feed all your summer boarders out of that little garden, do you?"

"Nope. I've got in my order for canned goods, as usual. That vegetable garden is just a decoy."

Troublesome Times.

"What is your father going to do for amusement, now that he has retired with a fortune?"

"That is what worries us. We'd like to get him interested in something, and would buy him a seat in the senate if we could be sure nobody would try to stir up an annoying scandal."

Will Not Require Much Time.

"After I am gone," he complained, "people will begin to notice what I have done."

"Well," his wife sadly replied, "if they do it won't take them long."

Under the Head of New Business.

"Maria, what was done at the meeting of your literary club last night?"

"We fined Mrs. Chillicon-Kearney $5 for accusing Mrs. Highmus of cheating at bridge."

Preparing for a Career.

First Statesman—What makes you think our friend from Mexico has political ambitions?

Second Statesman—He spends two hours a day in a shooting gallery.

THE LEAK AT THE NAVY YARD

By ROBERT NAUGHTON.

(Copyright, 1911, by F. L. Nelson.)

LAWRENCE RAND and I have a multitude of enemies, and for years we have walked daily in the shadow of danger. As a result of which, aroused by someone rapping on my door, I swung out of bed and caught up my revolver before I flung wide the door and saw in the hall Anton Werencki, one of the oldest and cleverest operatives in the service.

"Mr. Rand is in Maryland, I know, but the chief wants to see you," he announced briefly.

I dressed, sent a telegram to Rand, and accompanied Werencki to Chief Stirling's room in the Hotel Bavaria.

"The matter is just this," explained that official, motioning us to chairs. "The navy department is making some experiments in steel which promise to be the greatest thing ever brought to light for use in building big guns. For weeks it has appeared as if the American navy was about to gain gun supremacy over the world. The work is proceeding in the navy-yard here, where a close guard can be kept. Now, Duncan, our puzzle is this: Though the twelve men who are engaged in the work are shut up as if they were in prison and communicate with the outside world only through the commanding officer, nevertheless a bulky letter that had burst its envelope and lost its address fell by mere chance into the hands of the postoffice department and proved to be an anonymous communication to Berkelen Freres, the big Belgian shipbuilding firm, containing a complete report of everything the experimenting party had done up to last Sunday, four days ago.

"Of course Berkelen Freres are merely the receivers for one or more foreign governments. We have failed so far to determine which one it is that is trying to steal such important information, nor have we the slightest indication of where the avenue of communication lies.

"Lieutenant Richard Dunton is in command of the experimenting party, with Lieutenant John Ormsby as second. The chemists are Eldridge, Spelgel, John R. Hart and Alfred Cinametti, the latter Italian-born. The others are enlisted machinists.

"The party does all its work in a low brick building fifty yards from the gun shop and, with nothing near it except the blank wall of the yard. It is in plain view from the offices, as is also the section of new barracks in which the party eats and sleeps. When finished with their work in this temporary foundry and laboratory the men retire to the barracks. All are volunteers and are under watch day and night.

"Now, despite all this, one of our men in Paris, cabled three days ago that the coterie of international spies there knew that the agent of some government had cabled home the news of his success in getting the results of the new experiments up to date. There is a clean leak in the navy yard. If we do not stop that leak, there is going to be trouble."

On my suggestion we went immediately to the navy yard. It was nearly four o'clock and everything was dark and deserted yet waking Lieutenant Dunton we made a quiet inspection of both the living quarters and the laboratory. I first satisfied myself that when the laboratory was locked at night no one could obtain entry except by such burglarious methods as to leave abundant trace, and that when the sleeping quarters were locked the men were as if in prison. Dunton had possession of all keys. I went carefully over both buildings to be sure there were no telegraph, telephone or electric wire connections. There was but one possible solution. Some member of the party has a means of sending notes or signals to the outside world in daylight hours. I said as much to Lieutenant Dunton, and he replied:

"That is the result of any process of elimination based on these facts, but eight men stationed in and about this yard day and night, and Ormsby and myself inside the laboratory have watched every man for one suspicious move and every outside person for any indicative act, and I tell you positively there are no written or signaled messages going or coming out of this place. Everything passes through me."

A sudden suspicion flashed over me. I whirled on him and looked at him searchingly. He understood instantly and said with deep feeling: "Yes, I know it is up to me. That I am the one avenue of outlet would be any man's logical conclusion. That is why I am so deeply concerned. I, alone of all of you, know there is another and most dangerous one, for I have told nothing."

I liked the note of honesty in his voice and was pondering over the matter as we walked back toward the barracks. Suddenly Dunton stopped and picked up a long pole, round, well-polished and fully fifteen feet in length.

"What is that?" asked Stirling.

"Some material," said Dunton, "that is entirely foreign to this yard. I have served here four years and this is the first time I have ever seen anything like it within the walls."

I bent a closer attention on it. It was quite dry except where it had lain on the moist ground. Everything else was damp with the night mist from the river. I mentioned this fact. The pole had been put there within the last ten or fifteen minutes.

It was still quite gloomy, as day was just breaking, when we reached the door of the barracks and I took a careful look around before we entered. Not a soul was in sight, but it seemed to me that the shadow in a little niche of a building forty paces away was a little blacker than it should have been and I walked toward it. When within twenty-five feet of it a little figure dashed out, ran at right angles to my track, and shot around the corner.

I was in hot pursuit instantly and Dunton and Stirling were coming along behind me. Around the building we went, I gaining rapidly on the runner. He dashed across the open space, going toward the spot where the pole still lay and caught it up as he ran. Planting it deftly and securely in the pavement, he rose and cleared the high wall.

"Don't shoot, don't shoot," I heard Dunton gasp to the chief. "It's a woman."

Outlined for an instant against the lighter east was a figure in man's clothes, but long hair loosened by her efforts flowed from her head. It was a woman.

Pursuit was useless. She would be lost before we could get to the gate.

"There is but one thing that I can suggest," I said as we walked toward the gate, "that either Mr. Rand or I, perhaps both of us, be allowed to take up work with you in the laboratory in the guise either of workmen or chemists."

This suggestion pleased the chief. It shifted the burden of responsibility from his shoulders.

I arrived, properly accredited and equipped, at eight o'clock that morning, as a specially detailed chemical expert who had come on from Washington. Before I came to the yard, however, I found time to write a detailed report for Rand.

I soon found that it was almost impossible to see from the laboratory windows to any point of vantage where a receiver might stand concealed to take signals, and certainly none was sent. Apparently not a man in the place paid the slightest heed to the outer world. Luncheon time came and we repaired to the barracks. On the way I watched the men to note if any of them seemed to be looking for anybody or anything, but the only incident of any sort was when one of them, a stocky little follow named McCready, stooped and picked up a short piece of fine copper wire which he saw on the yard pavement. He put it carefully in his pocket.

Nothing happened during luncheon, and in the half-hour of rest thereafter the men all smoked or chatted except Sloane, a machinest, who sat down to write a letter to his wife. He took his place at one of the windows and used a large portfolio with a high roll, ink-well, and so on, at the end of it. He seemed very intent but wrote very little for the length of time he took, but there was absolutely nothing about him to indicate that he was signalling in any way; also the only persons who could have seen him were the civilian clerks in the headquarters building about two hundred feet across the yard, and none of them looked in his direction at any time. At one window were two laughing men, at another a girl stenographer and a young clerk obviously engaged in small talk, while at a third window another woman clerk, with hat and veil on, was apparently waiting lunch time.

It was late in the afternoon when Lieutenant Dunton stopped work.

As we were crossing the yard I saw two familiar figures approaching—Rand and the Secret Service Chief.

"Hello, Dunk! This is a pretty job," was Rand's greeting. "Vastly interesting, isn't it? What has turned up today?"

I detailed the day's events for him.

"And you are sure no messages have been sent out?"

"Everybody has been closely watched"

"Look at this." He tendered me a fresh report from a Secret Service operative in the employ of the New York office of the Belgian cables, giving the cipher transcript of an anonymous message which had been filed for Berkelen Freres at three that very afternoon giving the full details of our morning work!

The thing was a physical impossibility, and yet before me was proof of its occurrence.

"Perfect! An absolutely perfect report," Dunton repeated.

"There you have given us the key to the premises," exclaimed Rand, studying the development of Dunton's head. "This transmission can be prepared and executed only by a man of high order of intelligence. Brains always show in the head and face of their possessor. Now, granted you and Lieutenant Ormsby are in that class, let us see who else could qualify. Return to the barracks. The chief and I will visit your party in half an hour."

They did so and I noticed Rand surveying each of the men with close attention. When he went out he merely said to me: "Work straight ahead on the lines you have laid out for yourself until tomorrow evening, and if you have detected nothing then, leave the yard and join me at the club."

All night I lay awake, struggling with the mystery and listening for any movement among the men or any exterior sound that was suspicious, but there was nothing. From lack of sleep, much worry and the effect of the fumes, I was scarcely able to drag myself about at the hour for beginning work in the laboratory.

"We are likely to hit the big truth in the experiments today. Dunton had said early in the morning. "I dare not retard the work and I dare not puzzle the men on details. One man cannot know what all the others do not, and so I hope to high heaven we tap this underground line very soon."

But when we quit work neither goal was reached. A few minutes' conversation with Rand made me ashamed of my weariness.

"I have just received notice that another message containing the last twenty-four hours' work has been filed for Berkelen Freres," was his opening remark.

"I'll stake my life that it did not come from the experimenting party," I answered with some heat.

"Go slow, Dunk, go slow," said Rand with that easy, provoking smile I knew so well. "They alone know the details of the work. I have more news for you. Permit me to felicitate you on the skill with which you took hold of this case and on the progress you have made from the outset. By the way, you remember the lady who vaulted the wall. I measured the wall and found it to be a good eight feet high. So I went to O'Rourke of the Athletic Association Committee and asked him where I could find a woman who could do that in passable street attire. 'There are only two,' he declared, 'that I know of on either side of the Atlantic. The one is Miss Sadie Nutter, of Chicago, and the other is Anita Yvonne Desarte, a professional, who was in this country with Barnum & Bailey this summer.'

"Miss Nutter has been in Chicago for months. Paul Desarte, brother of Anita Yvonne Desarte, says she goes down to Coney Island daily but always returns in the evening. Miss Desarte is a remarkable person: She speaks a number of languages, has written a technical work on electricity, has traveled two seasons with a circus, and has a way of leaving home and disappearing for months.

"After securing this information I then sent for the pole found in the yard, and the marine who brought it over happened to get on the car with a conductor who said that he had seen a young man two nights before taking such a pole with him along the street. The conductor's description of that young man fits in exactly with that of the woman at the navy yard. Further, Miss Desarte, in height, weight and complexion is a duplicate of the woman at the yard."

At this juncture a page brought in two notes. One was from a well-known sporting goods house.

"Ah, by the way," said Rand, "I saw this firm's brand on the pole and sent the pole around by Tom Rahway. Here is a note from the manager to say that it is one which he presented to Miss Desarte, and gives her a character such as described. By Jove! here is a note from the young lady herself!"

He read it with evident amusement and then passed it over to me. It read:

My Dear Mr. Rand:

Hearing that you have been making inquiries about me, and wishing to be of all the assistance to you that I can be, will you please meet me this evening at the New Amsterdam theater? I have the lower stage box on the left, and shall be alone.

ANITA YVONNE DESARTE.

"I must ask you to go, Dunk," said Rand. "It will do you good, and I must finish looking up the records of the men of the experimenting party. I might remark that both offices, all the chemists, and two of the workmen are men of probably sufficient brains to compile and transmit these reports, and one workman is certainly a fellow of such ability that he is out of his place in life. He is the man McCready, whom you noted the first day."

An hour later as I stood at the head of the center aisle and looked at the little woman seated in the stage box watching the performance already begun, it flashed over me that I had seen her in broad daylight some time recently. I could not say when or where; but every line of her figure and something about her hat with its filmy drapery about the brim, was familiar.

"Good evening, Mr. Duncan," she said with a gracious smile as I entered the box. It was necessary for me to put forth an effort to repress surprise that she knew my name. "You are Mr. Duncan, are you not? Of course you wonder how I guessed it. I know Mr. Rand by sight and, as he did not come, who is so likely to take his place as yourself?"

"I am extremely glad to meet you, Miss Desarte," I began boldly, leading a trump. "I must confess profound admiration for the manner in which you cleared that wall the other evening. One of the officers with me wanted to try a wing shot at you but I am very glad he was restrained."

"Really, was some one about to shoot at me?" she responded gleefully and without the slightest constraint. I had not stirred her in the least by my tactics. "That was most exciting. You know I do a very great deal of work for the foreign governments, especially the French, and I had made up my mind that there were a number of things in the shops which are going into the new battleships, that the Bureau Maritime would be glad to hear of, so I went over with my pole. I was very sorry to be compelled to leave it behind."

I could scarcely keep from smiling. She thought she had hoodwinked me completely, by her apparent candor; at least she had established a friendly though false basis between us which would be agreeable to both and would allow us to play each his or her own game in the background.

She was very pretty and most interesting, especially in her stories of experiences as a spy; in fact, we enjoyed the evening greatly, and if there was any constraint between us, neither showed it. I was amazed at her information about the great secret international cases of late years and realized for the first time that we were arrayed against a coterie well worth the struggle. Perhaps she meant for me to see this. Perhaps she was so audacious as to be willing to let me think that, in her, I had my hand on the medium of the transmission of the information and to defy me to find out who the sender was and who the ultimate receiver.

As we were about to alight from a taxicab at her door, she said:

"Mr. Duncan, it is a fad with me, this going to the beaches, but will you meet me at Heller's on the walk at Far Rockaway at eleven tomorrow morning. I may have some very interesting things to tell you."

The latter hint was bait, pure and simple. Of course I agreed to go and it was not until I got to the club that I made up my mind that she had no intention whatsoever of going, but was bent only on removing me from the scene of action.

The chauffeur called me back as he turned away from the club doorway.

"You have left something, sir," he said.

Another taxi was passing at a slow speed and a tall dark man lolled indolently in it, watching me by the bright light as I stepped forward and picked from the bottom of my taxi, a thin black leather wallet closely filled with papers. Just then there was a rush from behind me. The wallet was snatched from my hand, and I turned in time to see the tall, dark man spring back into his cab with the agility of a tiger. Before my chauffeur could get under way the other taxicab was lost in the throng.

Of course I must tell Rand at once all that had happened, and I knew I would have a struggle to keep from choking him when he laughed at me. And well he might be amused. Doubtless I had had the whole secret in my hands, at least I could have made sure of whether or not the fair Anita was our prey.

Absently I stood in the library pondering the matter when one of the attendants came to me with a note on a tray. Under it lay the thin wallet empty.

The note read:

Dear Dunk: Go to Yorkville Court in the morning at nine and appear against the Baron von Oldenhaus, charged with larceny of your wallet on the street. Get a postponement. He is in the custody of Sergeant Creagan in the Hotel St. Auburn, and if remanded to Creagan's custody may be kept out of the game tomorrow. Join me at the navy-yard at noon. We are near the finish. RAND.

I was too tired to puzzle over the last strange turn of events, and in half an hour was at home and asleep.

At Yorkville Court I found that the "Baron von Oldenhaus" of Rand's note was my tall, dark friend of the night previous. I got him remanded in Creagan's custody as suggested. It was nearing eleven when I left the court and I hurried to the navy-yard, reading on my way a note which Creagan had passed me in answer to my whispered request as to what statement the Baron had made to him.

Creagan said that the Baron's version was that he had been instructed by his government to come to the United States, get in touch with Anita Desarte, and while maintaining a friendly relationship between them, make sure that she was properly serving the bureau of military intelligence at Berlin in securing some information on battleship construction. He had followed her to the New Amsterdam theater, had seen her encounter me and had trailed us to her home. Just after I left she had come running out in great excitement to look for her lost wallet. Hearing her story the tall, dark man had followed me, stepping from his taxi, and had snatched the wallet out of my hands himself the moment I had picked it up. Just as the tall man thought himself safely away, a gentleman who spoke German had drawn up beside his taxi in an electric hansom, and calling a police officer, had the tall man arrested, and the police had taken the wallet from him.

So Rand in person had been following Anita Desarte and me. Well, that was one of his ways, and he took a certain pleasure in his cleverness. That pleasure was plainly written in his smile as he said "good morning" to me in the commandant's office at the navy-yard.

"Creagan has already telephoned me the result in court," he began. "Now, let us see if we can do as well on this side of the river. We want the person taking the information and the sender in the party, and his method. That is where we balk. Never in all my experience have I been without a vestige of a theory as to how messages can be transmitted from one confederate to another under such a guard and such conditions. Why, we are even sure that as the reports cover the afternoon of one day and the morning of the next are filed in the afternoon before three o'clock that the information goes out shortly after noon. But how, how, how?"

He walked up and down a moment thinking, then he turned to the commandant and said:

"Is it possible for you to have a detail of eight men to carry Mr. Duncan and myself under sheets in stretchers across the yard back and forth once or twice during the noon hour. Have the men go slowly, and by the time we are through with that I will have found some other device for loitering before that barrack section from which the information must proceed, without appearing to be on the watch."

In ten minutes a stretcher detail took me as a sick man across the yard; in fifteen minutes another took Rand. I saw nothing though my eyes traveled over everything in view. As soon as he was around the corner of the building, where we awaited him, he leaped out of the stretcher and calling to me to follow, ran to the back door of the barracks. He whistled in at Lieutenant Dunton's window and got us admitted, and in another minute we stepped into the room where the men were resting.

All was quite as it had been the two days I was there. The men did not hear us enter. They were smoking and chatting, and by the window Sloane was laboriously writing to his wife a brief message that must pass under Lieutenant Dunton's eye. A silence fell over the other men in the place. They saw that something was about to happen.

Rand stepped quietly up behind Sloane and watched him closely for a minute. By Jove! I now saw that at intervals Sloane was touching with his pen two tiny spots of bright copper on the end of the big roll of his portfolio, and it was plain from the manner of his touch he was sending telegraphically. His movement was so slight that only eyes as keen as Rand's would have discerned it.

Rand stepped back from the window out of sight in the depths of the room.

"Sloane, come here to me," he said sternly.

The man sprang to his feet, pale and tottering. He hurriedly laid down his portfolio and pen.

"Bring that thing with you."

Sloane did as bid, then, and Rand tore the portfolio apart and disclosed the mechanism of a miniature wireless sender.

"Place all these men under arrest and guard Sloane and McCready carefully, Lieutenant Dunton. Now to find the receiver. Come, Dunk, I think I know where to look."

We shot out the back way, popped into the stretchers, and in a few minutes had entered the headquarters building.

Leaving the two details we hurried straight through to the front, Rand leading the way. Then he stopped, puzzled.

"By George! that fellow was sending straight at these windows."

About the windows were some clerks and stenographers lounging most innocently just as I had seen them the first day. All were talking, save at one window where a woman stenographer with her hat and veil on, ready for the street, stood staring intently toward the gate of the yard, just as I saw her the first day. Rand looked at her keenly, then strode up behind her, peered searchingly at the back of her head, and said:

"Very sorry to interrupt you, Miss Desarte, but the man who was sending to you is under arrest and so are you now. Too bad you spend so much time at the beaches."

She shrugged her shoulders and laughed as, at his suggestion, she took off her hat and its net drapery.

"Will you look at these, Duncan?" said Rand, examining them curiously. "This veil is traversed with a fine film of tiny receiving wires and on this broad hat it must act beautifully. In the crown is the remainder of the mechanism, and here in Miss Desarte's hand is a military telegrapher's receiving roll on which she pricks the dots and dashes of the notes she makes of the messages. Permit me to say, Miss Desarte, this is the most ingenious contrivance I have ever seen. Who is the inventor, may I ask?"

"I am," she said proudly.

"Is it all clear now?" said Rand as we left the place after turning the three prisoners over to the commandant.

"All but Miss Desarte's night visit," said I.

"Oh, she brought that piece of wire to lay it where McCready had told her. He wanted it to repair his sender. I found it in the crown of his hat."

We were ready to prove our cases in their entirety against the fair Anita, the expert Sloane, and the very able and intellectual McCready, with the Baron thrown in for good measure, but having preserved its secret, the value of which will be apparent in the next war, the government impressed upon Rand that nothing be said of the matter or nothing made public until after the new guns were finished, and the fleet started for the Pacific.

IT WAS A WOMAN.

NO POSTCARD NONSENSE

Never Again Will Fair Tourist by This Means Seek to Find Favor With Friends.

"I have decided," says the girl who loves to travel, and who is sailing soon for the other side, "not to send back a single postcard."

"Why?" demanded her nearest and dearest. "You must send some to me."

"Oh, yes, to you, of course," and she bestowed a hearty kiss. "But not to Tom, Dick and Harry, nor to Lot, Kit and Harriet. Yes, I've had my feelings hurt. You know when I went that long trip (the dearest friend nodded), well, Aunt fixed me out with a list of all the people she thought it would be nice to send cards to from the less frequented places. I thought Cadiz a nice city to begin at, and you can't imagine all the good time I spent choosing and writing those postcards—and when I wanted to be doing anything else! I mailed 50 5-cent cards, 25 at a dime each and 100 at one cent each, and the postage was supposed to be about 2 cents each, but the porter is not inclined to be held down exactly. At any rate, it cost me over $10 to get those cards off. And what do you think Cousin —— said in Janet's hearing? You can't imagine. Of course not. She said I was fond of showing off and had bored everybody to death with my foreign cards. Henceforth I save time and money."

Training a Wife.

In the first published reminiscences of Queen Elizabeth of Roumania is an old story of her grandfather, the Duke of Nassau—a prince in whom was firmly established the medieval German theories respecting women. He had just married his second wife, and, says the queen, "that there might be no mistake at all as to the position he intended to assume, the wedding ceremony was no sooner over and the newly-married couple alone in their traveling carriage than he proceeded to light his pipe, and closing the windows, smoked hard in her face for a few hours, just to see if she would venture to remonstrate or complain!"

Under Suspicion.

"I'm so sorry to hear that your daughter eloped. Does your husband take it very hard?"

"Not half as hard as he would be taking it if he had been asked for money to buy a wedding outfit. Sometimes I'm half inclined to believe that he helped the young man put the extension ladder up to Laura's window."—Judge.

Force of Habit.

"I suppose those fishermen will have a reasonable celebration of the national holiday."

"What makes you believe that?"

"Don't fishermen naturally go in for seine proceedings?"

The Northern Light
CHAS. W. LATTA
Editor and Publisher.

Published every Friday at Holt, Marshall County, Minnesota.

Subscription Price: $1.00 per year, strictly in advance.

Are you doing your share to build up the community? Do you speak a good word for it whenever you can, and do you try to make it as prosperous and attractive as you would like it to be? If there is some good industry established in your home town do you patronize it and try to make it bigger and more important? Do you realize that small beginnings lead to great results? Be a booster. Help better the conditions around the home community and in a little while you will wonder at the improvement. When you talk to a stranger tell him all the good things you can think of about the place you live in; when you write to distant friends do the same. If you are a farmer and your town doesn't suit you, try to improve it. If you are a business man try to develop the surrounding country and you will make the town prosper wonderfully. Do not be unreasonable but do your best, always bearing in mind that the community will be just as good as the people in it make it.

With the high-up ones in the republican ranks playing low-down tricks on each other the outlook for harmony in this state next year isn't any too bright for the G. O. P.

The Roseau Times pays Ole Saggeng, of Otter Tail county some neat compliments in mentioning him as democratic candidate for United States Senator. Ole merits the nice things Bro. Bell says about him, but will the ladies of Minnesota permit his leaving the state senate?

On Tuesday night the senate passed the bill admitting Arizona and New Mexico to statehood. There is some things about the bill that the president doesn't like and he may refuse to sign it. However, it will become a law, anyway, and two new stars will be added on the flag. It is well.

W. E. Verity, formerly prominent in newspaper work and politics in Minnesota, has returned after a six years' sojourn in Oklahoma and will run the Wadena Pioneer-Journal. It goes without saying that he will get into the political game again. He has been a pretty staunch republican but he has not yet announced if he will be for or against the present state machine.

The Thief River Falls fair is a thing of the past now, and as usual, it was highly satisfactory. The premium list was an excellent one and the awards very liberal, and with all bills paid there will still be a surplus in the treasury. Good business management has accomplished these results and other fair associations in the NorthWest would do well to follow the system adopted at Thief River Falls.

Pennington County boasts of a Progressive Republican League formed a few days ago. The resolutions adopted by the organization shows that it is at least anti-Taft and anti-democratic. Speaking of the recently enacted Canadian Reciprocity measure they codemn it and censure the administration for having forced it through congress, "by the use of patronage, the aid of the Democratic Party, and the other unjust and unlawful means."

Congress passed a reapportionment bill increasing the membership of the house of representatives from 391 to 433, and on Tuesday the president attached his official signature. This bill gives Minnesota another member of congress and the state will have to be re-districted to provide for him. In making a tenth district it is very probable that the boundaries of this ninth district may be changed. That will not hurt so very much if we can retain our present congressman.

Excel Echoes.

Charles Schwartz is mourning the loss of [illegible] fine turkeys which were killed by wolves last week. The wolves are said to be quite numerous and bold this year.

It sounded very much like somebody was out hunting chickens in this township last Sunday. Didn't hear who was doing the shooting or if they got any game.

The Steiner brothers are making the most of every minute of fair weather, and did quite a stroke of stacking last Sunday.

Albert Westphal was over from [illegible] on Sunday and enjoyed a [illegible] visit at the Steiner home.

Frank Coppe and family, Andrew Guprud and family and Miss [illegible] Hofman visited at the Schwartz home Sunday and all enjoyed a very pleasant time.

Auction Sale

An Auction Sale of live stock and farm machinery will be held in Holt

MONDAY, AUGUST 14,

beginning at 11 o'clock, A. M.

The following property will be sold:

TERMS—All sums of $10 and under, cash. On sums over $10, bankable paper due Dec. 1, 1911.

B. L. BACKE, Clerk. O. C. BRENNA, Auctioneer.

BRITISH EMIGRATION.

A board of trade return just issued shows a great increase in emigration from the Brisish isles, especially to the Dominions. The number of emigrants in April was 41,200, an increase of over 4,000 compared with a year ago. Of these 26,000 went to the Dominions—10,000 to Canada. Some 15,000 went to the United States, a reduction of almost 1,000 compared with a year ago.

A Complete Line

Of 5, 10 and 25 cent goods will always be on display at this store. We are Headquarters for 5, 10 and 25 cent goods as well as anything else in the line of General Merchandise, and

IT ALWAYS PAYS TO BUY AT HEADQUARTERS.

C. H. GUNHEIM

OLD WAYS OF WHITSUNTIDE

Some Quaint Customs in the Observance of the Day Prevail in England.

In various parts of the country curious old customs associated with Whitsuntide still have their proper observance, says Answers, London. At Birdip, near Cheltenham, for instance, a good sized cheese is set rolling down an extremely steep hill, while an excited crowd of would-be captors follow. Usually a fair number of pursuers have adopted the same method of progression as the cheese before the prize has been secured.

Every twentieth Whitmonday the villagers of Corby, Northamptonshire, stop up all the roads and footpaths in the parish, and strangers are forced to pay toll. The practice dates back to the days of Queen Bess, and commemorates a charter absolving the people of Corby from certain jury services.

In certain parts of the country it is still believed that any child born on Whitsunday is doomed to be killed or kill, and to ward off this evil the unfortunate babe has to go through a make-believe form of burial.

Many districts of rural England, however, hold Whitsuntide as the great match-making festival of the year, and fairs are held with the main object of bringing young men and maidens together.

SPOONER STILL A BACHELOR

Extravagant Praise of Miss Dora Proved the Undoing of the Ardent Wooer.

"Do you really mean it, Mr. Spooner, when you say I am the best girl in the world?" asked a young lady of an ardent admirer.

"Indeed I do, Dora," responded the young man. "I say it again—you are the best girl in the world."

"And the loveliest, I think you said?"

"The loveliest without doubt."

"And I think you said something about my accomplishments, too?"

"I did. I said they excelled those of any other girl."

"I believe you called me [illegible]"

"A sweeter woman [illegible]"

"You said [illegible] did you not?"

"I did. I look upon you as the pink of my heart, the peerless one among the beauteous creatures among your sex, a maiden adorable and worthy of the best man on earth. Say the word that will make me the happiest man on earth."

"Before I give you an answer, Mr. Spooner, I should like to ask you one question."

"A dozen if you like, Miss Dora."

"One will be enough. Don't you think you have a great deal of assurance to expect a woman with all those excellent qualities to marry such an ordinary man as you?"

Mr. Spooner is still a bachelor.

HAVE NEW INDUSTRY.

The quaintest industry to which the new science of aviation has given birth is carried on at Brooklands aerodrome. It can be summed up in one word—risks. Two aviators, both young, both unmarried, both free from any responsibilities whatever have joined in a sporting offer to the world of aeroplane inventors. They will take any form of aerial invention, even the wildest nightmare of mechanics, and they will make it fly—that is, if any human agency can. If not, they take the falls. When they have sorted themselves out from the remains of the would-be aeroplane, they explain to the inventor why his machine just missed being a success, and thus forewarned the inventor starts to build another.—London Mail.

ROUGH TRAVEL IN PAPUA.

Rapids 120 miles long were discovered in the interior of Papua by the recent expedition of Mr. Staniford Smith, the administrator who returned to civilization after his reported massacre by natives. The party built rafts to descend the rapids. Their rafts were overturned, and the party strewn along the river for miles. It took five days to reunite, and when all were gathered together again they found that provisions, tents and baggage were lost, and they had 300 miles over unknown country before them. Although the rain was heavy, the expedition was 30 hours without water, as the coral valleys absorbed it as it fell.

WHY POETS SING.

She—I wonder why poets always sing about the delights of spring?

He—Few poets have money enough to have a house, therefore they don't know the trials and tribulations of housecleaning.

EITHER WAY WOULD DO

EXHIBITION OF PAINT & FRAME

The Artist—You've got that impressionistic painting hung upside down.

The Art Exhibitor—Don't make much difference. Nobody can make head nor tail out of it.

WHAT HE WANTED.

Her Father—And so you want to take my daughter from me in my old age?

Her Suitor—Well, I—er—er—don't think I'd want to take her in her old age.

A WOMAN'S IDEA.

The Naturalist—It's a crying shame to keep such a pretty bird in a cage.

The Summer Girl—Ain't it? Wouldn't it look dead swell on a hat?

SURE THING

UNDERTAKER

Hix—That undertaker is very progressive.

Dix—How so?

Hix—He's sent out circulars to all the doctors in town.

Farm Lands and Farm Loans

Livery and Feed Barn in connection.

HOUSEWIVES

Do you want to know about a wonderful new time, health and money-saving kitchen convenience?

Then you should see the complete line of "1892" Pure Spun Aluminum Cooking Utensils now on exhibition at your dealers.

This ware is guaranteed by the makers for 25 years. It is absolutely pure, wholesome and thoroughly hygienic, will not crack, scale, peel, break, rust, tarnish, scorch or burn.

PURE 1892 ALUMINUM THE ORIGINAL
TRADE MARK

It is light weight, easy to handle and easy to clean; makes kitchen work a delight instead of drudgery; saves your money, time, fuel; protects your health against metal poisoning and serious troubles resulting from chipping of small particles into the food, which is one of the dangers from the use of the old style enameled wares.

You buy patent carpet sweepers, egg-beaters, dish-washers, clothes-wringers and many other time and labor saving conveniences, but there is nothing that will prove a greater practical household blessing than the "1892" Pure Spun Aluminum Ware.

Lose no time in seeing for yourself what it will do. Your money back if this ware fails to do what is claimed for it.

ARVID CARLSON A. L. CARLSON

Support the Home Creamery

For several years the editor of this paper has been quite an interested observer of some northern Minnesota creameries and what they accomplish for a community. After these years we would sum up our opinion in the advice given above—support the home creamery.

A co-operative creamery pays its patrons every cent their cream is worth, figuring the expense of operating the creamery. If the number of patrons be few the expense of operating falls more heavily on each than it would if they were more numerous. Therefore, the larger the number of patrons, the higher will be the net price paid for the cream.

If there is a co-operative creamery established in a community it is unfair for some of the producers to ship their cream while their neighbors support the home creamery, thereby maintaining the only thing that can make the centralizer pay the shipper a fair price. Close the local creamery and the shipper must take what is offered or return to the old system of making butter at home and trading it in for groceries. Where the local creameries have been forced to close up, the cream shipper has had cause for grief; prices drop, and the good citizen who tried to protect the home creamery, must also suffer for the acts of his neighbor who helped to destroy.

Disastrous Hailstorm

Early on Tuesday morning a violent hailstorm destroyed more than a hundred square miles of grain crops in Bottineau County, N. D. The storm covered a distance of 30 miles in the vicinity of Westhope and Gardena. A lot of the best crop in that country was destroyed by the hail and high wind.

Have You Seen It?

The Thief River Falls Times last week contained the following item: "Lost—Between sections 8 and 23, Twp 154, 45, one second hand black telescope [illegible] lost last Tuesday morning will answer to the name of Conrad."

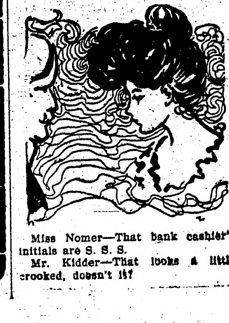
Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

Rev. Ordahl was in from his home in East Valley on Tuesday and made this office a pleasant call. He reports having held services and communion at the Norbeck home in Mud Lake township on Sunday. He says that part of the country is developing rapidly and that a new school district has been organised there, in which a term of school will begin about September 1st.

CORK VARNISH FOR SHIPS.

In order to protect the interior of ships from the humidity caused by condensation upon the metallic walls during sudden changes of temperature, the Italian marine has experimented with a kind of hygroscopic varnish or coating the essential compound of which is ground cork, which is consolidated by pressure with copal and litharge and applied to the walls. It has been found that the cork varnish absorbs the watery vapor of the atmosphere to the extent of eight or nine grammes for every square meter of surface exposed.—Scientific American.

CROOKED LETTERS, AT LEAST



Miss Nomer—That bank cashier's initials are S. S. S.

Mr. Kidder—That looks a little crooked, doesn't it?

Unknown Man Killed At Crookston Depot

On Monday evening an unknown man was instantly killed at the Great Northern depot at Crookston. He had jumped on the vestibule between the baggage cars when the air was released and the vestibules came together with a crash, crushing the back of his head to a pulp. Death was instantaneous. Deceased was a man about 27 years of age, 5 feet 8 inches tall, weight about 160. He had dark hair rather long, a thin, short brown mustache and about three days' growth of beard on his chin. He had lost one tooth from his lower left jaw, and the inside of his right knee carried a small old scar. He was a man of good physique, and looked healthy. He wore a suit of blue underclothes, cheap brown socks, dark overalls a dark coat and light mottled brown shirt, with pocket in one side, and an old derby hat. He also had a scar on the right temple and a smaller scar over the right eye.

DEEP MYSTERY OF THE PRESS

Correspondents Always Declared They Knew Nothing, But the Papers Were Full of News.

Until recently there was an aged elevator man who operated one of the lifts in the house wing of the capitol. Most of his passengers were either representatives or newspaper correspondents. The old man got to know all of the correspondents very well and always had a cheerful greeting for them. It was often noticed, too, that he seemed to be greatly interested in their conversation.

One afternoon, as three of them stepped out of the elevator, Sereno Payne of New York stepped in. As the car went down the old elevator man turned and said:

"Mr. Payne, I can't understand about those newspaper men. They puzzle me."

"What's the trouble with them?" asked Mr. Payne.

"Well, Mr. Payne, every day they ride in this car one feller will turn to another and say, 'What do you know today?' And the other fellow will answer, 'Not a —— thing. What do you know?' Then the first feller will answer, 'Nothing.' And yet, Mr. Payne, the papers are just full of news every day. It beats me where they get it."

"It beats me, too," said Mr. Payne.—Brooklyn Eagle.

AT THE DOCTORS' CLUB

"I was surprised to hear that old Jones left a million dollars."

"So was I. I might as well have charged him more for the operation which killed him."

SWEPT BY CLOUDBURST.

An appalling storm swept over the Tauber valley, in North Germany, a few days ago, making terrible havoc throughout the countryside. The region was surprised by what is described as a cloudburst, and three villages lying along a small hill stream, were overwhelmed by the sudden swelling of the torrent, which became a roaring river 600 feet wide. A shoemaker's house was first carried away, the whole family numbering eight, being drowned, almost without warning. The stream swept into the next village of Palmar where in a few minutes of forty houses only three remained standing.

MORE THAN ONE.

Her Dad—No, sir; I won't have my daughter tied for life to a stupid fool.

Her Suitor—Then don't you think you'd better let me take her off your hands?

ITS STYLE.

"I see in some colleges they want to introduce a course in courtship."

"Yes; a system of co-education, as it were."

SERIAL STORY

The Girl of My Dreams

A Novelization of the Play by Wilbur D. Nesbit and Otto Hauerbach

Novelized By WILBUR D. NESBIT

Copyright by W. D. Nesbit

SYNOPSIS.

Harry Swifton is expecting a visit from his fiancee, Lucy Medders, a Quakeress whom he met in the country. His auto crashes into another machine containing a beautiful woman and a German count. The woman's hat is ruined and Harry escapes. His sister, Caroline, arrives at his home to play hostess. Socrates Primmer, cousin of Lucy's, arrives with a hat intended as a present for Lucy.

CHAPTER II.—(Continued.)

"Make yourself at home, old chap," Harry said. "What's that? Your baggage?"

"This?" Primmer sighed, indicating the hatbox. "This is a present I bought for Lucy. I happened to see it in the window of a store near here, and I purchased it and had it sent to this address. It just came, so I want to put it away and later give it to her with my own hands. Alas, my poor, poor Lucy!"

"Why—what's happened? What's so sad about Lucy?"

"She—she—oh, my poor, poor Lucy!" Primmer wailed, going slowly from the room.

"Well, wouldn't that bumb you!" Harry soliloquized. "Cousin Socrates is evidently allowing his blighted affections to act on his lachrymal glands. Now, looking about the room, I expect I'd better send Venus and the ballet girls to the attic for a much-needed rest."

He was just about to take the ballet girl picture from the wall, when he was startled by an angry argument in the hallway. One voice was that of a woman, another that of the butler, and the third the broken accents of the German into whose auto Harry had smashed.

"Great guns!" he exclaimed. "They've trailed me down."

Into the room rushed the pair.

"You!" both cried.

CHAPTER III.

For a moment the couple looked at Harry and Harry looked at them. It would be difficult to say whether they or he felt the greater surprise.

"I want that hat!" spoke the lady, in determined tones.

"Yess, Ve vant dot hat!" said the gentleman.

"I haven't a hat," Harry explained.

The German was about to explode in a few belligerent remarks, but the lady put her hand on his arm to restrain him, and said in milder tones:

"You can help me out of a most distressing situation, sir."

"How so, madam?" Harry asked.

"We have just come from the new milliner's around the corner. I recognize you as the gentleman who figured in that unfortunate accident this morning, and strangely enough the milliner says that she sent to this house within an hour the perfect duplicate of my hat, which your auto ruined."

"Yellow it vas," interrupted the German. "Yellow, mit red puppies on it."

"Poppies, not puppies, count," said the lady. "Now, sir," to Harry, "I must have the hat which was sent here. Mine was an imported model and the milliner had but this one duplicate."

"There has been no hat delivered here," Harry replied.

"But it was," the lady argued. "And I must have it."

"I vill go now, iff you please," said the German, who had been growing more and more nervous, evidently being anxious to be well out of the scrape as soon as possible.

"No," Harry said, sternly. "Wait a minute. If the hat was sent here, I should know it. There may be a mistake. Ring up this milliner person and find out just what there is to it. Use the phone there, madam."

The lady smiled with relief, went to the phone and called for a number.

"Hello," she said. "Is Ma'mselle Daphne Daffington there? Is this you, Ma'mselle?"

"Daphne Daffington!" Harry muttered. "Can't be little Daphne I used to flirt with!"

"This is Mrs. Blazes," the lady said into the phone.

Harry started at that. "Mrs. Blazes!" he said in a hoarse whisper to the German. "Not Mrs. General Blazes?"

"Exactly!" the German assured him.

"Where did you deliver that duplicate of my hat?" Mrs. Blazes asked.

After the reply, still holding the receiver to her ear, she turned and asked Harry:

"What's the number of this house?"

"Three hundred and ten."

"They say it didn't reach here," Mrs. Blazes said into the phone. "What? You are sure it did? You will come over yourself? Thank you."

She hung up the receiver and turned to Harry with:

"She is positive that the hat was delivered here, and to make sure she says she will come herself. Now, that hat is here, evidently. And I must have it."

"Yess," the German belligerently added. "Ve must haff it."

But Harry had by this time divined who the German was—he could be no one else than the dapper Count von Fitz, whose flirtatious escapades were discussed on all sides. And, this being Mrs. Blazes, and the General being worried because his wife had not yet come home, Harry could put two and two together and reason that the Count and the dashing Mrs. Blazes had gone for a jolly little ride through the park, which ride had been spoiled by the untoward accident which destroyed her hat.

"Why don't you go and get a hat—any kind of a hat?" he asked. "I'll be glad to pay for it, as I was partially at fault when your hat was ruined."

"Oh, sir," Mrs. Blazes answered, "I wouldn't dare to go home without that particular hat, or its exact duplicate. My husband is very jealous. He would be sure to want to know where the original hat had gone—in fact, it is his favorite hat. Please, please give me the hat."

"But I tell you I haven't it. I'd give it to you in a minute if I had it."

"Vat a nonsense!" the Count cried.

Mrs. Blazes was about to say something, when a strange voice was heard outside.

"Right up here? Thank 'thee.'" It was the voice of Amos Medders.

"Great heavens!" Harry hissed. "They've come. My future father-in-law, and my future fiancee!"

"Aha!" the Count said, malevolently. "Unless you gif us der hat ve vill make some trouble."

"Please go!" Harry begged. "Please! I haven't the hat. I'll get you a whole hat store, if you'll only go!"

But they were adamant. Mrs. Blazes, nerved to desperation because she knew she simply could not go home without her hat, planked herself into a chair and announced that she would stay right there until he gave her her own hat.

An inspiration came to Harry. Taking Mrs. Blazes by the arm he said:

"I'll send out and get you the hat. I'll get that milliner to rush another duplicate for you. Here, hide in here for a while. You understand there'd be no end of talk if you were found here."

He rushed Mrs. Blazes to the door of his own room and pushed her in and slammed the door, then turned to the count.

"Now you may go," he said.

The Count was only too willing, but Lucy and her father could be heard coming nearer. Bewildered, Harry grabbed the Count by the arm and shoved him into the library on the other side from his own room.

"I can't meet them while I am in this condition," he said, looking about the room. "I'm so nervous they'd think I was guilty of something terrible or that I didn't want them here. If I were guilty I could carry it off easily. Thus does innocence get the hooks!"

And as Lucy and her father came into the room he slipped out the door leading to the back hallway.

Wonderingly Lucy Medders and her father parted the hangings and entered Harry's den. They gazed about them, at the steins, the boxing gloves, the pipe racks, the pictures and all the other fittings of a bachelor's den. On the table lay a deck of cards, a half-smoked cigar, an opened box of cigarettes, and some scattered red white and blue chips.

"Oh-h-!" Lucy gasped. "Isn't it lovely, father?"

"And this"—Mr. Medders said—"this is Harry's home?"

"It seemeth different from our own home, doth it not?" Lucy asked, shyly.

"Verily, daughter," Medders remarked, coming to a stop before the highly colored picture of the ballet girls, "there be nothing like this at home."

Count Von Fitz, Whose Flirtatious Escapades Were Discussed on All Sides.

"Why," Lucy said, looking at the picture, "see the ladies in the rainy day skirts!"

"I see the ladies," Medders said, drily, "but where are the skirts? Verily, daughter, they must have feared a flood."

"Perhaps," Lucy offered, seeing that her father viewed the picture with disapproval, "perhaps it is a biblical scene."

"Nay, daughter. If it were, more people would be buying Bibles."

Medders turned from the picture, and his attention was caught by the statuette of the Venus de Milo. He looked at it intently.

"This is a sad sight, daughter," he remarked.

"Because her arms are broken, father?" Lucy asked, innocently, not understanding that her father was expressing a dislike to such works of art. "Peradventure she broke them off trying to hook her dress in the back," she continued, merrily.

"She hath no dress to hook," Medders said, solemnly. "But, aside from these, the place hath a seemly look."

CHAPTER IV.

From the hallway came gliding in the sorrowful figure of Socrates Primmer. He caught his breath sharply at sight of Lucy, and then advanced, with his hands outstretched.

"Ah, my poor, poor cousin Lucy!" he wailed.

"Oh, cousin Socrates!" Lucy cried. "How nice of thee to come."

Medders looked on with kindly amusement. He had long known of Primmer's unrequitted attachment for Lucy, and to him it seemed that the best course to pursue was to allow Primmer to weep it out. Primmer looked mournfully at Lucy and said:

"As Riley might have written:

"Now my heart is full of sorrow and my soul would fain repine
For another fellow's courting that old sweetheart of mine."

"But," Lucy smiled, "I am not old, and I am not thy sweetheart, cousin Socrates."

"Verily, Socrates," Medders said, "thou wouldst make a poor sort of husband, weeping continually about the house. Thou mightst dampen the clothes on ironing day, though."

"Don't mind father, cousin Socrates," Lucy said. "He doth but jest."

"Harry said for me to ask thee to allow me to show thee to thy room, Uncle Medders," Socrates observed, lugubriously. "And his sister will come this moment to greet poor, poor Cousin Lucy."

Lucy, in Her Plain Gray Dress, Was a Marked Contrast to the Dashing Beauties He Knew.

Primmer led Medders out. Lucy looked about her, wonderingly, for a moment, but whatever her thoughts may have been, they were ended suddenly when Harry hurried in.

"I'm so sorry not to have met you when you arrived," he said, seizing both her hands, while she drew herself away in shyness.

"I am truly glad to see thee, Harry," she told him. "Thy house is most seemly."

Harry looked quickly at her. There seemed to be an undercurrent of hidden meaning in her words. But a glance at her lovely face, framed in the sunny hair escaping from beneath the simple Quaker bonnet, was enough to convince him that there had been no guile in her remark.

Lucy, in her plain, almost severe, gray dress, with just the touch of white at neck and throat, and the soft gray ribbons tying her bonnet beneath her chin, was a marked contrast to the dashing beauties he knew. But with all her simplicity of manner she had that indefinable quality called "charm," which may not be acquired through the donning of gaudy raiment and the heightening of the color of the cheeks, nor by any of the extraneous aids to beauty which need not be particularized here. And such charm, also, may not be lost at any moment by the one possessing it. Charm in a woman is like magnetism in a man. It manifests itself unconsciously and naturally, so that others measure the possessor by it and not by his or her appearance.

Harry drew her toward him, still holding her hands. There was no mistaking his wish. Lucy, unsophisticated though she was, understood him.

"Nay, Harry," Lucy said. "Thee know I do not think a girl should be kissed before she is wedded."

(TO BE CONTINUED.)

Open to Engagements.

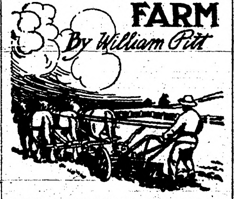
"Miss Gwendolen, they say you have won high honors in golf. Do you represent any ladies' athletic club or association?"

"No, Mr. Ketchley; I am entirely—er—unattached."

Then there was a timid, faltering question, a soft voiced answer, and the status was changed.

NOTES *from* MEADOWBROOK FARM

By William Pitt



Prune the tomato plants.

The making of good hay is an art.

Sheep are good stock to have on the farm.

The cow test association is a great thing for any dairy locality.

Brood sows as well as cows should be selected for their milking qualities.

The manure that washes away and is wasted represents an actual money loss.

Milk is an excellent food for the young fowls, but requires skill in feeding.

It takes two years or more for the white grub to reach maturity from the egg.

The comb is as sure an indicator of the health of the bird as the tongue is of the person.

Young pigs need perfectly dry quarters, especially during the first weeks of their existence.

If in milking a part of the milk is bloody, stringy or unnatural in appearance the whole should be rejected.

The March pullets are the ones that will begin to lay in November if they have been given proper care.

A hay cap will shed a reasonably heavy rain and keep the larger part of the cock of hay from getting wet.

It is a great thing to know just when a plant needs water. It is a matter that requires close observation.

The very best kind of a pen for ducklings is one that can be easily moved from one part of the yard to another.

The condition of your neighbor's field makes little difference to you. Your attention should be centered in your own.

Old orchards can be renewed in such a way as to produce good fruit for the family while the new orchard is coming on.

The silo enables the dairyman to keep more live stock on the same number of acres and at less cost in feed and labor.

Shropshires are very hardy sheep, their wool brings a good price and they seem to be healthier than some of the other breeds.

Naturally the cow that gives the greatest profit is the one that gives the most milk during the winter for milk is then highest priced.

Never give drugs to a horse any more than you would to a baby unless he is downright sick. Shutting off his feed will cure all minor ills.

The size of the tile to be placed in a drain will depend upon the length of the drain, the depth of the distance apart the drains are placed.

The high grade draft horse, the product of a pure bred sire and a good mare, has made one of the most profitable industries upon the American farm.

Veal calves in hot weather will grow better if kept during the day in a dark, cool stable, but the stable must be cleaned out and well ventilated.

A hen may cease laying if not properly fed before she uses up all her stored energy, and it occasionally happens that a hen dies by overegg production.

If English farmers can afford to use pure-bred draft horses that are worth $500 for ordinary farming operations, why cannot our farmers afford them as well?

A really good horse is never of a bad color, but some colors, such as perfectly dappled grays, pure blacks and blue roans, command better prices than others.

It takes some grit to say "No" when the butcher gets his eye on the nicest lamb you have—the one you wanted to save for yourself—but that very lamb will by and by bring you a great deal more than the meat man will give you for it now if you keep it.

A sick cow is the hardest of all farm animals to treat, owing to her complex digestive appartus. At the first signs of a derangement the remedies should be administered in order to reach the seat of trouble by the time it will probably become serious.

Sheep are easily handled.

Handle cows carefully in summer.

Cows are annoyed by unnecessary delay and noise.

Labor saving equipment on the farm earns more than it costs.

With the silo, an acre of roughage will feed a greater number of animals.

It is well to keep grit and lime within reach of the chickens all the time.

It is well to remember that chickens cannot thrive if infested with vermin.

Don't leave your valuable farm machinery standing unprotected in the field.

Peat soil which produces poor corn generally does so on account of lack of potassium.

It is false economy to shut your poultry up to keep them from damaging your gardens.

Watch most carefully during the heated term that the chicks have well ventilated brood coops.

Plant early and late so that the supply of crisp vegetables can be maintained for months.

The bedding of a sow at farrowing time should be sufficient only for cleanliness and dryness.

The work is evenly distributed throughout the entire year on the best organized dairy farms.

Almost any one can succeed with sheep in winter time, or in early spring or in the fall months.

It is much better to use a medium season, heavy straw variety of oats when they are grown with peas.

If the man who has no silo would watch his neighbor feed and watch the results he would soon have one.

Success does not depend so much upon the number of cows a man keeps as upon the number of good cows he keeps.

Strawberries should be cultivated, the weeds eradicated and the moisture conserved for late summer drought.

The egg is manufactured by the hen from the food that is consumed, hence her feeding should be carefully considered.

Painting an old buggy or wagon or farm implement is not a very difficult task, but it adds a great deal to the appearance.

It is a mistake to pasture young clover for the cattle are apt to kill the plants as much by tramping on them as by feeding.

Keep up the warfare on weeds in the cornfields these hot days, when soil moisture needs to be conserved to its utmost limit.

Pigs at birth have two sharp pointed teeth, one each side of their jaws. If not removed they are apt to make the teats of the mother sore.

Plow and harrow the ground before sowing fall turnips. Turn under the weeds and make the seed bed as fine, clean and smooth as possible.

As the new corn gets dry and hard it is safe to feed more than when it was soft and green. It is more easily digested and gives better results.

The cows should have some protection from severe storms; that is, there should be some place where they can go if they want to during a cold rain.

The best way to obtain good cows is to raise the heifer calves from your best dairy cows, thus in a short time you are the possessor of good young cows.

Lettuce may be had for table use till late in winter by starting the plants now and protecting them with a cold frame when cold weather comes.

Hay troughs should be so fixed that particles will not fall through and become entangled in the fleece. Foreign matter of any sort in the fleece reduces its value.

Pie plant is a good commercial vegetable. The demand for it on the city markets is good. It is little trouble and can be shipped well, standing almost any distance.

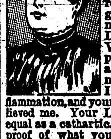
Bookkeeping is well adapted to gardening and fruit growing. The bees will appreciate your skill as gardener and show their appreciation by paying tribute in honey.

It has been found by observation that in every instance noted the hen that molts last has the biggest record behind her. The later she molts the higher the production. You can select your breeders with safety at time of molting.

Every dairy farmer who keeps a dairy herd should know, with reasonable accuracy, how much milk and butter fat each cow in his herd is producing; this can be ascertained by regularly weighing the milk from each cow and testing for butter fat.

SAVED FROM AN OPERATION

By Lydia E. Pinkham's Vegetable Compound



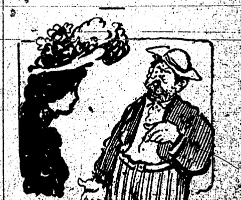
Peoria, Ill.—"I wish to let every one know what Lydia E. Pinkham's remedies have done for me. For two years I suffered. The doctors said I had tumors, and the only remedy was the surgeon's knife. My mother bought me Lydia E. Pinkham's Vegetable Compound, and today I am a healthy woman. For months I suffered from inflammation, and your Sanative Wash relieved me. Your Liver Pills have no equal as a cathartic. Any one wishing proof of what your medicines have done for me can get it from any druggist or by writing to me. You can use my testimonial in any way you wish, and I will be glad to answer letters."—Mrs. CHRISTINA REED, 105 Mound St., Peoria, Ill.

Another Operation Avoided.

New Orleans, La.—"For years I suffered from severe female troubles. Finally I was confined to my bed and the doctor said an operation was necessary. I gave Lydia E. Pinkham's Vegetable Compound a trial first, and was saved from an operation."—Mrs. LILY PEYROUX, 1111 Kerlerec St., New Orleans, La.

The great volume of unsolicited testimony constantly pouring in proves conclusively that Lydia E. Pinkham's Vegetable Compound is a remarkable remedy for those distressing feminine ills from which so many women suffer.

HOW IT HAPPENED.



"Poor man! How did you become a tramp?"

"I wuz a war correspondent in Manchuria, mum. I got so used ter doing nuthin' dat I hain't been no good since."

In the Church Militant.

Henry N. Cary, the secretary of the Chicago Publishers' association, has a negro cook he took with him to Chicago from St. Louis. The cook is very religious and immediately joined a church in Chicago.

Cary saw the cook going out of the house one evening with a large carving knife in her hand.

"Where are you going, Mary?" he asked.

"I'se gwine t' church."

"Well, what are you doing with that knife?"

"They's a religious dispute goin' on down there," said Mary, "an' I wanter see my side gits de best of it."—Saturday Evening Post.

Truthfully Said.

"My friend, you should join the church. As the prophet says, 'Come thou with us and we will do thee good.'"

"You have already, parson. I was at your church fair last night."—Smart Set Magazine.

PREROGATIVE OF HER SEX

Bride Had but Exercised Recognized Privilege That Is Universally Granted.

A young couple had been courting for several years and the young man seemed to be in no hurry to marry. Finally, one day, he said:

"Sal, I canna marry thee."

"How's that?" asked she.

"I've changed my mind," he said.

"Well, I'll tell thee what we'll do," said she. "If folks know that it's thee as has given be up I shanna be able to get another chap; but if they think I've given thee up I can get all I want. So we'll have banns published and when the wedding day comes the parson will say to thee: 'Wilt thou have this man to be thy wedded husband?' I shall say: 'I winna.'"

The day came, and when the minister asked the important question the man answered: "I will."

Then the parson said to the woman: "Wilt thou have this man to be thy wedded husband?" and she said:

"I will."

"Why," said the young man furiously, "you said you would say 'I winna.'"

"I know that," said the young woman, "but I've changed my mind since."—Mack's National Monthly.

PIMPLES COVERED HIS BACK

"My troubles began along in the summer in the hottest weather and took the form of small eruptions and itching and a kind of smarting pain. It took me mostly all over my back and kept getting worse until finally my back was covered with a mass of pimples which would burn and itch at night so that I could hardly stand it. This condition kept getting worse and worse until my back was a solid mass of big sores which would break open and run. My underclothing would be a clot of blood.

"I tried various remedies and salves for nearly three years and I was not getting any benefit. It seemed I was in eternal misery and could not sleep on my back or lean on a chair. I was finally given a set of the Cuticura Remedies and inside of two weeks I could see and feel a great relief. I kept on using Cuticura Soap, Ointment and also the Resolvent, and in about three or four months' time my back was nearly cured and I felt like a new being. Now I am in good health and no sign of any skin diseases and I am fully satisfied that Cuticura Remedies are the best ever made for skin diseases. I would not be without them." (Signed) W. A. Armstrong, Corbin, Kan., May 26, 1911. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 27 K, Boston.

Went Up Twenty Points.

During the recent hot spell a broker was complaining to a friend of the dull trading. "Business," he said. "What can one do in the way of business with the mercury standing at 100?"

"Do!" replied his friend. "Great Scott, man; it's the chance of a lifetime to sell mercury."—Boston Evening Transcript.

Tit for Tat.

A young man, who had not been married long, remarked at the dinner table the other day:

"My dear, I wish you could make bread such as mother used to make."

The bride smiled and answered in a voice that did not tremble:

"Well, dear, I wish you could make the dough that father used to make."

Important to Mothers

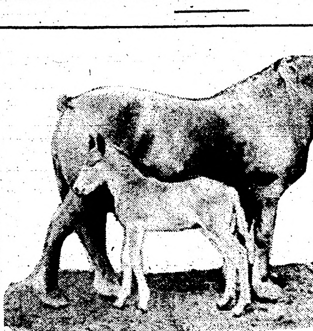
PROPER TREATMENT OF COLTS DURING THE SUMMER'S HEAT

Many Good Animals Have Been Aged and Made Dull by Foolish Habit of Letting Them Run Unbroken Into Spring When They Are Three or Four Years Old and Then Putting Them to Work.



Prize Winnink Draft Mare and Foal.

(By J. M. BELL, Virginia.)

Try to be patient with your colt Mr. Farmer. Remember he is green—yes, as green as the grass he eats so peacefully when you turn him out to graze and the harness no longer chafes his soft young body.

All farmers know that a four-year-old colt will stand more than a three-year-old. Bone and muscle are better matured and generally better size, therefore, he is better able to stand a day's work. But, when it comes to that, no green, unbroken colt should be expected to do a full day's work in the team of well seasoned farm or road horses.

So many good colts have been aged and made dull by this foolish habit of letting them run absolutely unbroken into the spring when they are three or four-year-olds and then catching them and putting them at hard, steady work just as the busy season comes on, when the crops need work, when the flies are rampant and when neither the master's nor the colt's tempers are at their best.

Imagine a farmer starting out to mow hay with a green or half broken colt hitched alongside of a mule or a steady farm horse to a mowing machine, double row cultivator, corn planter, plow or harrow.

All implements need a steady, well-broken team and at the same time a good driver, who, in order to do his best work has little time for else than quietly handling his team and implement at one and the same time.

This man will not get much satisfaction out of a day's work if he has to worry with a green, restive colt, who, chafing at the unexpected misery of heavy work in hot weather, starts up a little too soon or not soon enough, protests at having to walk in a straight line at a slow gait, etc.

It is not impossible that he will balk, kick or rear upon what might be considered a very slight provocation, or no provocation at all to a broken, middle-aged farm horse.

In that section of Virginia known as The "Valley" famous for its splendid line of stock, the farmers are very successful breeders of horses, notably heavy draft horses and their rule is to break these big colts at two years old, never working them over half a day at time and beginning the breaking-in process in the late winter and early spring.

The first link is to a wagon in a steady team and with a quiet teamster, generally a white man who is used to the daily handling of horses.

The writer visited that section two years ago this month and while the guest of a well-known horse breeder, saw four full-blooded Percherons working to a manure spreader, a nine-year-old-mare undcr the saddle, a three-year-old-stallion in the off-lead and a young mare under the line.

The average weight of these splendid horses was about 1,800 pounds each, but the remarkable part of the business was that these two young, vigorous stallions were working quietly with mares. Their teamster had them under perfect control, but they had been worked the same as two-year-olds and had become used to farm labor by degrees.

Of course, advice is cheap and the farmers get lots of it and in this matter of working colts and green horses in the summer time they have heard it all—fitting on the harness, scraping the collars at night, washing off the shoulders and sparing the lash.

I have only to say this, and I speak from experience: If the farmer don't go easy with the three and four-year-olds at this season they will be old and sluggish long before their time.

GIVE MILK COW GOOD TREATMENT

Animal Should Have Access to Rock Salt at All Times—Should Not be Hurried by Dog or Horse.

A small quantity of barrel salt should be given the cow once or twice a week; and she should have constant access to rock salt, either in the yard or pasture.

In going to and from the pastures, the cows should have the use of a good wide lane, so that they may not be hooked and jammed about. Do not hurry them with a dog or horse. If the floors of the barn are of cement, a small quantity of sand should be sprinkled on the floor before the cows are turned out or allowed to come in. This will prevent them from slipping.

Care should be exercised, when they are running together, that heavy cows do not ride the young heifers when the latter are in season. Heifers are frequently injured for life by this treatment; broken-down rumps being rather common in some herds.

CHAMPION STEER SHAMROCK II.

Silage is going to be more used than in the past, and cattle feeders are coming to the conclusion at last that it should not be ignored, says the National Stockman. Cheaper grains have been made by using silage as roughage, while gains have been made more rapid, especially where the cattle were fed only 90 days. The plan adopted in handling silage is to let the ear of the corn reach as advanced a stage of maturity as possible without firing the fodder. Many stock feeders in the upper edge of the corn belt, where dent corn often fails to come to maturity because of early frosts, are using this silage method with the best of success, and for wintering cattle its use is equal to pasturing them. Meanwhile the demand for breeding cattle is showing a steady increase, and Illinois, Indiana, Michigan and Ohio farmers are buying thousands of good breeding cows, paying as high as $50 per head, or more than killers will offer. Farthermore, west of the Missouri river, in the former range country, new farmers have fenced in the lands and are in the market looking for pure-bred bulls in some instances, although most of the demand now is for cheap bulls. The illustration shows Shamrock II., grand champion steer, at the recent International Live Stock show.

Timothy Hay.

Timothy hay, when fed alone, is a very poor ration for any animal, but it is much worse for a growing one. It will fill, but he who feeds it will not get best results.

EVIDENTLY SHE WAS ANNOYED

Good Wife's Punishment, Intended for Husband, Poor Compensation to Revivalist.

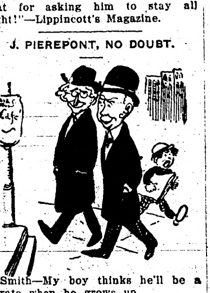
A popular revivalist had been holding services at a town in Mississippi when a heavy rain came on, and he accepted an invitation to pass the night at the house of one of the townsmen. Observing the preacher's drenched clothing, the host brought out a suit of his own and sent his guest upstairs to don it.

The good man had made the change and was on his way back to the sitting room, when the woman of the house came out of another room, holding in her hands the big family Bible, out of which the minister was to be invited to hear a chapter before the family went to bed.

She was not, however, in a very amiable frame of mind, for careful housewives are likely to be put out of sorts by the advent of unexpected company. Seeing the revivalist in his borrowed garments, she mistook him for her husband, and as he passed in front of her she lifted the book and brought it down sharply on his head.

"There!" she exclaimed. "Take that for asking him to stay all night!"—Lippincott's Magazine.

J. PIERPONT, NO DOUBT.



Smith—My boy thinks he'll be a pirate when he grows up.

Jones—Thinks there is more money in piracy than anything else, eh?

Smith—Yes; but I think he's got Morgan, the buccaneer, mixed up with Morgan, the financier.

To Laugh at Tuberculosis.

Much ignorance prevails among the unfortunate victims of tuberculosis and families of these unfortunates, according to the Los Angeles Herald. For such as these the words spoken by Adolphus Knopf should be chiseled in imperishable granite. Or, better still, they should be published in every public print, viz.: "There is no such thing as hereditary tuberculosis. The remedy is simple and all should know it. It is one of the most easily curable of all the chronic infectious diseases. You can cure consumption by the unlimited use of God's good fresh air, twenty-four hours in twenty-four, plenty of good food and plenty of good water, inside and out. You all know that cleanliness is next to godliness. Children should get all the fresh air possible. They should sleep and play in the open air. They should attend open-air schools."

Sufficient Evidence.

Having vouched for the honesty of the woman who wished a situation as scrub-woman the good-natured man was subjected to a severe examination by the superintendent of the building.

"There are degrees of honesty," said the superintendent. "How honest is she?"

The good-natured man reflected.

"Well," said he, "I'll tell you. She is so honest that if you throw anything that looks to be worth a copper into the waste basket you have to tag it 'Destroy this,' or she will fish it out and put it back on your desk night after night, no matter how badly you want to get rid of it. I don't know that I can say anything more."

"No more is necessary," said the superintendent, and he proceeded to hire the woman.

STRONGER THAN MEAT

A Judge's Opinion of Grape-Nuts.

A gentleman who has acquired a judicial turn of mind from experience on the bench out in the Sunflower State writes a carefully considered opinion as to the value of Grape-Nuts as food. He says:

"For the past 5 years Grape-Nuts has been a prominent feature in our bill of fare.

"The crisp food with the delicious, nutty flavor has become an indispensable necessity in my family's everyday life.

"It has proved to be most healthful and beneficial, and has enabled us to practically abolish pastry and pies from our table, for the children prefer Grape-Nuts, and do not crave rich and unwholesome food.

"Grape-Nuts keeps us all in perfect physical condition—as a preventive of disease it is beyond value. I have been particularly impressed by the beneficial effects of Grape-Nuts when used by ladies who are troubled with face blemishes, skin eruptions, etc. It clears up the complexion wonderfully.

"As to its nutritive qualities, my experience is that one small dish of Grape-Nuts is superior to a pound of meat for breakfast, which is an important consideration for anyone. It satisfies the appetite and strengthens the power of resisting fatigue, while its use involves none of the disagreeable consequences that sometimes follow a meat breakfast." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

STATE CREAMERY

FORMALLY DEDICATED BY GOVERNOR EBERHART AT ALBERT LEA.

LAUDS NEW MOVEMENT

Plant Under Supervision of the Dairy and Food Commission—Bottle of Buttermilk Broken to Christen Institution.

Albert Lea.—Governor Eberhart took all hearts before him here in his address at the dedication and christening of the creamery recently purchased by the state and now under the control of the dairy and food commissioner. His address kept the 5,000 people present at the best attention and he was frequently interrupted by applause. Speaker Dunn presided and after a brief prayer of praise and thanksgiving by Rev. G. H. Gueller, F. S. Ruble, president of the retiring creamery board, handed a huge floral key to the governor, thus turning over the creamery to the state, and Miss Mabel Dunn, daughter of Speaker Dunn, broke a ribbon bedecked bottle of buttermilk on one corner of the creamery building and dedicated it to the dairy interests of the community and formally christened it The Albert Lea State Creamery.

Governor Eberhart was then introduced and he was given a cordial reception. He spoke of the great work the meeting honored and gave his approval of the work to be undertaken. He spoke of the importance of the dairy industry of the state, and declared Freeborn county as the most fitting place for an institution solely devoted to furthering that interest.

He said Freeborn county last year produced over $1,300,000 worth of butter, and better results might yet be attained when the best possible work was done. The governor stated he did not expect this start would prove the end of the work to be undertaken here, and the future would see a widened and extended work along the lines of developing proportions calculated to make more practical the work on the farm, reducing labor where possible, and increasing incomes as well.

Promoters Praised.

He paid a tribute to Speaker Dunn, Representative Henion and Senator Anderson, of this county, for their excellent work in behalf of the measure.

Dairy and Food Commissioner Winkler was then introduced and gave in brief an outline of the work he proposed to carry on.

Immigration Commissioner Walsh was the next speaker, and he gave a stirring speech on immigration.

How Creamery Will be Run.

The state will operate its new creamery in just the same manner that it was operated when it was the property of a co-operative association of farmers. It will, however, maintain experimental work in connection with the regular work of the creamery.

James Sorenson, for many years an inspector in the Dairy and Food department, is to be manager of the creamery.

The milk and cream will be purchased from the farmers, manufactured into butter and will be sold to the ordinary butter buyers through regular channels. From the receipts of the butter sales will first be subtracted the necessary expenses including supplies, labor, coal, ice, etc. After the expenses have been paid then a certain per cent of the profit will go into a sinking or replacement fund. With this fund the machinery will be replaced when it is worn out and necessary improvements will be made from time to time. If there is any profit left after this replacement fund has been taken care of, it will be distributed among the farmers who bring in the milk and cream as was done under the old co-operative agreement.

At present all of the creameries in the state make regular reports on their business to the dairy and food department. These reports will hereafter be forwarded to Manager Sorenson at the creamery, who will make the necessary criticisms and give the advice needed. Mr. Sorenson will have a stenographer in his employ so that these reports can be handled as soon as they are received. He will be in a position to answer all questions regarding the butter making and the proper management of the creamery.

The state will carry on all of its butter making experiments at the Albert Lea creamery. A chemist will soon be added to the force and he will take charge of the experimental work at the creamery.

The creamery which is now the property of the state was purchased and equipped at an expense to the state of $12,500. The last legislature appropriated $25,000 for the purchase of the creamery and for its maintenance up through July, 1913.

STATE LOANS OVER $100,000.

School Districts of Minnesota Draw Large Sum.

St. Paul.—Announcement that the State Board of Investment had loaned $114,550 to various school districts of the state was made by State Treasurer Smith.

Applications of these districts for the loans were approved by the board some time ago, but payment was delayed until the new fiscal year. All were made out of the permanent school fund.

QUAKER ELEVATOR IS BURNED.

Flames Practically Destroy East Side Plant.

Minneapolis. — The Quaker Elevator was practically destroyed by fire, entailing an estimated loss of $10,000. The fire started on the first floor of the four-story frame structure and had gained such headway by the time the firemen arrived that there was no chance of saving the building.

Lines of hose had to be strung from the nearest hydrant, more than 1,500 feet away. The railroad tracks also hampered the firemen, who found it nearly impossible to reach the scene of the fire with their apparatus.

There was practically no grain in the warehouse at the time. It has been used for some time by various elevator companies as a "mixing house." A steel tank near the elevator proper, was partially destroyed, but the damage was not heavy, as it was nearly empty.

The loss is covered by insurance.

MEDICAL ASSOCIATIONS MERGE.

Southern Minnesota and Valley Organizations Are United.

Rochester.—As a result of the meeting of the Southern Minnesota and the Minnesota Valley Medical Association, a new medical organization has been formed which will embrace the greater part of Southern Minnesota and be one of the largest and strongest societies of its kind in the state. There was no opposition to the union.

About 150 doctors attended the annual gathering of the Southern Minnesota Medical Association, here. One of the features of the gathering was the memoir of Dr. W. W. Mayo, who passed away recently in this city, given by Dr. Chas. Hill, of Pine Island, a former partner with Dr. Mayo in St. Paul in the 70's. Topics germane to the medical profession were discussed. Dr. A. F. Kilbourne, superintendent of the state hospital, entertained the members at 6 o'clock dinner.

BLACK RUST RAVAGES FIELDS.

Losses Are Reported by Many Farmers Near Fergus Falls.

Fergus Falls.—As the harvest progresses it becomes more and more evident that black rust has done damage throughout this section of the state.

Samples are being brought in daily from fields which promised yields of fifteen to twenty bushels per acre, but which will not be worth cutting on account of the rust. The stems have died and look as though hot water had been poured over them, and they are liberally sprinkled with black specks which seem to have sapped their vitality. Some fields have withstood the rust better than others.

Winter rye was harvested and is a big crop. Corn promises a heavy yield and it is thought that there will be a fair crop of potatoes, now that there has been a soaking rain.

TO HELP LAND SHOW.

St. Louis County Enthusiastic After Visit of St. Paul Men.

Duluth.—St. Louis county and neighboring counties will be well represented at the St. Paul land show next December.

J. H. Beck, C. L. Klukhohn and C. P. Bull and George Welch, members of the committee appointed by Governor Eberhart to arrange for the state exhibit, came up from St. Paul and spent the day here with prominent Duluth men interested in the land show.

Tentative arrangements have been made for the mineral display from this section and it will be impressive. There is widespread enthusiasm in St. Louis county in matters agricultural and the land show will be well represented.

TWO ARE HELD FOR SWINDLING.

Police Put Quietus on an Alleged Graft With the Cards.

St. Paul.—Charged with swindling, George Vobich and Joe Arpch, Austrians, were arrested by Patrolmen Cumrow and Cummings, and lodged in central police station. It is alleged that Vobich and Arpch have been traveling around the country working a card swindle among their countrymen. Yesterday they met Matt Stanak of Hopkins on the street and interested him in their game. They were successful in getting $10 from their victim, it is said, before the policemen interrupted their operations.

DEAN WOODS TO DULUTH.

Will Look Over Two New Sites for Experiment Farm.

Hamline.—Dean A. F. Woods of the college of agriculture, University of Minnesota, has gone to Duluth, where he will inspect two new sites proposed for the new agricultural school and demonstration farm to be established near Duluth. He will also look over the sites formerly considered. At its last session the Legislature appropriated $65,000 for the school.

WATCHMAN FOUND KILLED.

Mystery Surrounds Death of Shop Employe at Mankato.

Mankato.—Mystery surrounds the death of Herman Koch, a night watchman at Mayer Bros.' machine shops. The first workmen to arrive found Koch lying dead beside a lathe, with the base of his skull fractured, a bloodstained hammer near his hand, and a lantern, bent, and the globe knocked [illegible]. A pool of blood was under his head.

PLAN TO OUTWIT BANK ROBBERS.

Meeting of Bankers' Association Officials Talk on Protection.

Minneapolis, Minn. — According to Charles R. Frost, secretary of the Minnesota Bankers' Association, yeggmen and other desperadoes who contemplate bank robberies in Minnesota better give the state a wide berth. The slim crop and the reduced demand for harvest hands make the danger from bank robbers greater.

Bankers from Minnesota and the Dakotas met in Minneapolis in the office of Mr. Frost. The purpose of meeting at this time is to lay plans for the protection of banks in the smaller towns, where police protection is poor and vault provisions not as good as in the larger places. The association maintains a staff of detectives that keeps a sharp lookout at all times for the appearance in this part of the country of any men known to have bad records.

At this time of year there is usually a movement of thugs from the Southwest to the Northwest states and the association reports show that the movement this year is early and large. In speaking of the general situation, Mr. Frost said the banks in Minnesota and North Dakota are in excellent condition and will probably be much better off than they were last year. In South Dakota the crop failure will naturally be reflected to some extent in the curtailment of loans and a lessening of other activities of the banks.

OTHER CITIES AFTER MILL.

Eastern Stockholders to Decide New Bay State Plant's Site.

Winona.—No decision has yet been made by the Bay State Milling company as to rebuilding in Winona its flour mill destroyed by fire. Prominent cities favorably located are urging the company to change its location, and while the resident management is desirous of retaining this industry here, the final decision rests with Eastern stockholders. If the mill is rebuilt here it will be a modern, fireproof structure, with a capacity of 4,680 barrels of flour daily. Negotiations are already under way for the leasing of a large Minnesota flouring mill, having machinery equipment similar to that of the former mill here, and the milling staff will be temporarily transferred to that plant.

RACES TRAIN ACROSS BRIDGE.

Owatonna Man Is Caught and Dies of His Injuries.

Owatonna.—Patrick Derrington, 65 years old, was struck by an eastbound North-Western train and so severely injured that he died within a half hour.

Derrington was walking from his home on the West side to the North-Western railway bridge, which spans Straight river just within the yard limits.

It is believed he heard the approaching train just before it struck him, but was so excited that instead of stepping to one side of the track as he might have done and so escaped death, he started to run to the other side of the bridge but was overtaken by the train. Derrington is survived by a widow and several children.

NO EPIDEMICS IN MINNESOTA.

Decrease in Typhoid and Infantile Paralysis From Last Year

Minnesota is singularly free from epidemics of any kind this summer, while the prevalence of two diseases especially, typhoid and infantile paralysis, is much less this year than last, according to Dr. H. M. Bracken, secretary of the State Board of Health.

"I don't know how to account for it, unless it is due to the fact that this year is not so exceedingly dry as last," he said. "Dry weather is especially conducive to direct infection of typhoid, as well as the fly infection, and the same is true with regard to infantile paralysis."

Naval Militia On Cruise.

Duluth.—Because of the objections of Canada that the treaty between the two countries is violated by naval militia maneuvers on the Great Lakes no maneuver will be held this year. The Gopher, the ship of the Minnesota naval militia, left for her annual cruise, going to Chicago to attend the opening of the new naval training station on Lake Michigan. The Gopher will take about 130 men on the cruise, which will last about two weeks.

Range Man Slain.

Duluth.— J. A. Crowe of Virginia, Crowe of Virginia, deputy coroner, held a coroner's inquest on the remains of John Bocovich, whose body was found in the lake near that city Wednesday. The jury found that the man came to his death at the hands of parties unknown. The neck was broken and there was no water in the lungs, indicating that Bocovich was dead before being put in the lake.

Prisoner Fails to Escape.

Winona.—Joseph Baker's attempt to escape from the authorities who were bringing him to Winona from Altura in an automobile nearly cost him his life. With the machine traveling thirty-five miles an hour he leaped over the side, but at the same instant two men in the seat with him seized the tail of his coat, with the result that the prisoner was dragged over the road, and was once run over by the car. Baker, it is alleged, was caught in the act of looting the money drawer in the [illegible] hotel.

WOMAN WALKING AROUND THE WORLD

READY FOR THE START

MRS. Harry Humphries has set out to prove that woman is the equal of man in endurance by accompanying her husband on a pedestrian tour of the world. They started from the New York city hall and propose to cover 48,000 miles, visiting nearly every country on the globe. Both are of English birth, but are naturalized American citizens. Mrs. Humphries used to be on the stage as Elsie Kelsey. Mr. Humphries served in the British army.

KISSING AS A PERIL

Mustn't Do It, Even If About to Marry.

Officially in Chicago Osculation is Forbidden at Marriage Office—Leads to Divorce Court and Must Be Stopped.

Chicago.—Kissing in public parks, at bathing beaches and in darkened theaters leads to the divorce court and makes a mockery of love.

The kiss is the symbol of sacred love, a token of the tie that binds man to woman for life.

When a woman grants a man a kiss it means that she has given her heart of hearts into his keeping for all time.

Talk all you please about spirit kisses, friendship kisses and soul kisses—that is just something to call a crime.

If a man wants to kiss the woman he is going to marry, let him kiss her at her home and not in front of the marriage license window.

Many suppose the reason people do so much kissing before they are married is that they know there will not be a great deal of it afterward.

The kiss in the marriage bureau is doomed.

Lewis C. Legner has drawn the line on kissing in front of his window. A big sign bearing the words "No Kissing Here" appeared above the window the other day. Two Chicago sweethearts, however, declared they did not believe in signs and defied the order of Legner.

"Kissing and cooing is going to be stopped in front of this window," said Mr. Legner. "The great majority of prospective brides and bridegrooms are dignified and sedate. They seem to prefer to cherish their love in silence, and although I frequently notice an exchange of loving glances as they are handed their clearance papers to matrimony; there is no other manifestation.

"Some couples, however, seem to forget everything when their eyes fall on a license. I cannot explain it, unless it is the power of suggestion. It is not uncommon for a man to kiss a girl as both look at their license.

"I do believe promiscuous kissing ought to be stopped. Chicago seems to have gone kissing mad.

"I was walking through Lincoln park the other evening about sunset. Scattered through the park on almost every bench was a pair of cooing sweethearts. I caught several of them kissing, but they seemed to care little about it. Many of them, I know, will appear later at the marriage license window.

"Kissing has its place, but the public park, the bathing beach and the marriage license window are not the places for it.

"The kiss is sacred and should be considered the symbol of love, the token that binds man and woman together for life.

"Silly girls and men who like to flirt cause more trouble in the world than all other forces combined.

"Promiscuous kissing leads to the divorce court. I do not believe in sending people to prison for kissing, but I do believe in sounding a warning. That is why I decided to begin here and draw the line even on the betrothed."

Aeroplanes for Germany.

Berlin.—Admiral Von Tirpitz, German minister of marine, has decided upon the purchase of a number of aeroplanes for use in the navy. The trial will take place off Kiel.

JESTS BY EPICURE

German Makes Many Jokes About American Cooking.

Criticises Our Sweet Tooth and Declares Our Roasts Are Tasteless—Tells of Chickens as Big as Storks.

New York—Ernst von Wolgozen, who came to New York last winter to study social conditions, is a man of letters and in his own country ranks higher in a literary sense than many of his countrymen who visit the United States. It was to be expected, therefore, that he would carry home valuable impressions of life here, but he seems to have been impressed chiefly by the crudities of the cuisine.

To him American cooking is so grotesque and naive a gastronomic system that his ridicule of it lies in the least serious fields of burlesque. As a conclusion to all he observed here, he thinks Americans want everything so sweet that a frequent visit to the dentist is inevitable. From the coffee in the morning until the late supper he finds that Americans must have their sweet tooth satisfied or they are unhappy.

It is not easy to say in what kinds of homes Herr von Wolgozen studied life here, since he finds that the domestic service in the best houses is so poor that it is difficult to get the dishes washed and the result of this is the necessity of getting along with one knife. This condition he says makes it difficult to eat roast beef, as the silver knives will not cut it and there are no houses in which both kinds of knives are found.

He remarks that of all the roasts served on New York tables, beef is alone possible to eat, since lamb chops and veal cutlets are tasteless. Perhaps the most astonishing statement he makes in reference to the roasts is that at a certain house he received for dinner honey as a compote. Surely this is unique not only in his experience, but in that of most New Yorkers. Compote or stewed fruits are seldom served in American families, but are to be found on the tables of Germans, so Herr von Wolgozen must have had this experience in the house of some of his compatriots.

"Game," he says in one place, "is much more eaten in the United States than it is with us. Poultry grows to the most improbable dimensions here. I have seen chickens as tall as storks and as fat as a poodle dog.

"The flesh of these abnormally large beasts is, however, not tender, and the limbs in particular acquire an entirely different character from the flesh on the breasts. It turns brown and succulent in the roasting, while the white flesh remains dry and flavorless."

It is evident that what Herr von Wolgozen describes as a chicken must have been a turkey. Some of his other experiences at table were more remarkable, but they probably happened in a boarding house—if they happened anywhere. He says that young chicken is even served with sweet flour sauce, which he finds very disagreeable, since even in the finer houses the servants will not wash the dishes and it is necessary to eat everything on the plate with the chicken and the sweet sauce.

He says that in his boarding house after soup a piece of fish was served to him. About this plate from which he was supposed to eat the fish were lair many small dishes containing vegetables, chicken and various combinations of vegetables and meat. He was compelled to eat these on the fish plate and liked only potatoes, which, baked in their skins, he found delicious. He observes with the air of an authority that all the fish from the Atlantic ocean are so poor that only the river and fresh-water fish are regarded as worth eating.

"I do not think," he said, "that there is in the three kingdoms of nature anything that is not to be found in an American salad. The groundwork of this is composed of two or three large green leaves. On these is poured oil mixed with vinegar, and there arises a more or less striking structure of all impossible sours and sweets, salts and bitters, toughs and tenders, liquid, edible and inedible objects."

White Stockings Rile Cat

Big Black Pussy Mistakes Young Girl's Footwear for Feline Enemy—She Tells Story.

New York.—The color white has been as a red flag to the big black cat of Frank Bitz, ever since a large white cat came to live next door to the Bitz butcher shop at No. 922 Columbus avenue. But not all of the customers of the butcher shop knew this. Among them was eleven-year-old Catherine Owens of No. 106 West Ninety-ninth street.

"I didn't know anything about the cats," said the girl, "and I went to the butcher store for mamma wearing a pair of white stockings.

"I noticed that a big, white cat went into the shop with me. After a little time I came out. I was standing on the sidewalk when the white cat ran out. Then the black cat ran out, too, and the moment he saw my white stockings he jumped at me.

"He tried to put both his feet on one of my stockings. One of his feet—I mean paws—sort of slipped and into my leg. The claws went in and left marks. I was so frightened I fell down and began to scream. A lot of ladies in carriages—you know, those high-up ladies—began to shout: 'Kill the cat, kill the cat.'

"They didn't kill the cat, and I went to our doctor's. While waiting there a policeman came and took me to the General Memorial hospital in One Hundred and Sixth street. The lady there said I ought to go to the Pasteur institute, but she's have a doctor look at me. He washed the cuts and then the policeman took me home. The policeman told me that those ladies in the carriage had been around to the station house and complained because he didn't kill the cat."

Catherine's father took her to the Pasteur institute for treatment. The cat was still in the butcher shop. Its owner maintained that it was perfectly normal, but the board of health has been notified of the occurrence by the police.

CORN 69.6 PER CENT OF NORMAL —YIELD 22.6 BUSHELS TO THE ACRE.

HEAVY DECLINE SHOWN

Yield of Winter Wheat, 455,149,000 Bushels.—Spring Wheat, 59.8 Per Cent; Oats, 65.7; Barley, 66.2.

Washington, Aug. 11.—The total production of the principal crops of the United States for 1911 as indicated by their condition on Aug. 1 reported by the United States department of agriculture is as follows:

Crop.	1911.	1910.
Corn	2,620,221,400	3,125,968,000
W't'r wh't x	455,149,000	461,044,000
Sp'g wheat	209,645,700	231,399,000
All wheat	664,794,700	695,443,000
Oats	817,800,000	1,126,765,000
Barley	139,352,400	162,227,000
Rye (x)	30,677,000	33,039,000
Potatoes	249,893,000	338,811,000
Buckwheat	14,498,000	17,239,000
Tobacco*	600,588,000	98[illegible],439,000
Flax (seed)	22,899,000	14,116,000
Rice*	23,076,000	24,510,000
Hay**	49,129,000	60,978,000

Figures denote bushels excepting *, which denotes pounds, and ** which denotes tons.

x—Preliminary estimate of crop reporting board.

A tremendous decline in the condition of crops, general throughout the country and traceable to drought and intense heat, occurred during the last month, as indicated by official figures and estimates in the monthly report. The report is the worst, as to general crop conditions that the department has issued for any single month since 1901.

Conditions in the Pacific northwestern states are regarded as excellent, although during July that territory suffered from a brief, but excessively hot period.

The figures contained in the report indicated a slump in the prospects of all crops. Corn, which at this season is the most important, declined during the month from a condition of about 5 per cent below the average, as indicated by the July report to nearly 15 per cent below the average. In some states it fell off in condition nearly 20 per cent. This does not indicate, however, that the crop will not be a great one, because the acreage of corn this year is exceptionally large.

Total Production Great.

The condition of the crop at this time indicates a yield, per acre, smaller than in any year since 1901, although the indicated total production has been exceeded in only five years in the history of the country. It is pointed out that the deterioration in the corn crop was checked somewhat by the rains during the latter part of July. Experts incline to the opinion that the crop may be further improved by the generous rains of the past week.

The weather during July caused a fall in the condition of corn which indicates a loss of 336,000,000 bushels from the estimated total productions of the previous month.

While the crops in many instances probably will be short in the yield per acre and in the total production, they will not be small, as shown by the following estimates of the yields of the standard crops:

Corn, 2,620,221,000; winter wheat, 455,149,000 bushels; spring wheat, 209,646,000 bushels; oats, 817,800,000 bushels; barley, 139,352,000 bushels; potatoes, 249,893,000 bushels; tobacco, 600,588,000 pounds, and hay, 49,129,000 tons.

Report in Detail.

The report shows the condition on Aug. 1, and the yield per acre, as indicated by the condition on that date, of the principal farm crops, with the preliminary estimate of the total yield of winter wheat and rye as follows:

Corn—Condition, 69.6 per cent of a normal, compared with 80.1 per cent on July 1; 79.3 per cent on Aug. 1, 1910, and 81.2 per cent, the average for the past ten years on that date; indicated yield per acre, 22.6 bushels, compared with 27.4 bushels, the 1910 final yield, and 27.1 bushels, the average for the last five years.

Winter wheat—Preliminary returns indicate a total winter wheat yield of about 455,149,000 bushels, as compared with 464,044,000 bushels finally estimated last year, and 450,130,000 bushels, the average annual production in the past five years. The yield per acre is about 14.5 bushels, compared with 15.8 bushels in 1910 and 15.5 bushels, the average for the past five years. The quality is 92 per cent, against 92.6 per cent last year.

Spring Wheat—Condition, 59.8 per cent of a normal, compared with 73.8 per cent on July 1, 610 per cent in 1910 and 82.3 per cent, the 10-year average. Indicated yield per acre, 10.1 bushels, compared with 11.7 bushels in 1910 and 13.5 bushels, the average for the last five years.

Condition of Oats.

Oats—Condition, 65.7 per cent of a normal, compared with 68.8 per cent on July 1, 81.5 per cent in 1910 and 82.2 per cent, the 10-year average. Indicated yield per acre, 23.2 bushels compared with 31.9 bushels in 1910 and 28.4 bushels, the five-year average.

The amount of oats remaining on farms Aug. 1 is estimated at 64,342,000 bushels, compared with 69,249,000 bushels, Aug. 1, 1910, and 52,663,000 bushels, the average amount on farms Aug. 1, for the past five years.

Barley—Condition, 66.2 per cent of a normal, compared with 72.1 per cent on July 1, 70.0 per cent in 1910 and 85.1 per cent, the 10-year average. Indicated yield per acre, 19.8 bushels, compared with 22.4 bushels in 1910 and 24.8 bushels, the five-year average.

Rye—The preliminary estimate of the production of rye is 30,677,000 bushels, as compared with 33,039,000 bushels last year, and 32,414,000 bushels, the average annual production for the past five years. Preliminary yield per acre, 15.6 bushels, compared with 16.3 bushels in 1910, and 16.4 bushels, the five-year average. Quality, 91.5.

Potato Crop Prospects.

Potatoes—Condition, 62.3 per cent of a normal, compared with 76.0 per cent on July 1, 75.8 per cent in 1910, and 84.8 per cent, the 10-year average. Indicated yield per acre, 71.5 bushels, compared with 94.4 bushels in 1910 and 96.9 bushels, the five-year average.

Flax—Condition, 7.10 per cent of a normal, compared with 80.9 per cent on July 1, 51.7 per cent in 1910, and 83.8 per cent, the 10-year average. Indicated yield per acre, 7.6 bushels, compared with 4.8 bushels in 1910, and 9.9 bushels, the average for 1905-09.

Hay—Condition, 68.6 per cent of a normal, compared with 64.9 per cent on July 1, and 87.1 per cent, the 10-year average. Indicated yield per acre, 1.14 tons, compared with 1.33 tons in 1910 and 1.41 tons, the five-year average. Area planted, 43,017,000 acres, compared with 45,691,000 acres in 1910.

AMERICAN ACTOR BURNED.

Jameson Lee Finney Victim of Fire in London.

London, Eng. — Jameson Lee Finney, the American actor, perished in a fire which destroyed a portion of the Carlton hotel, where he was a guest. He has not been seen since the fire and a roll call of the hotel staff shows that none of its members is missing.

The body was found in the bathroom adjoining Mr. Finney's room on the fifth floor of the annex. The face was so badly charred that the features were unrecognizable. Apparently Mr. Finney had gone into the bathroom to bathe before dressing and was asphyxiated. The body was taken to the morgue later in the evening. A large number of American guests escaped from the hotel, but lost their baggage.

Keane to the Archbishopric.

Scranton, Penn. — Archbishop Falconio, the papal delegate who is here attending the Catholic total abstinence union convention, announced that he had received a cablegram from Cardinal Merry del Val informing him that Pope Pius had nominated Bishop James J. Keane, of Cheyenne, to the archbishopric of Dubuque, Iowa, and the Rt. Rev. Joseph Schrembs, auxiliary bishop of Grand Rapids, Mich., to be bishop of the new diocese at Toledo, Ohio.

INDICTED AGAIN

GRAND JURY RETURNS ANOTHER BILL AGAINST FORMER STATE UNIVERSITY TREASURER.

FOR LARCENY AS BAILEE

Mishandling of Farm School Check Alleged As Result of a New Investigation of His Books.

Minneapolis, Aug. 9. — Joseph D. Bren was indicted again by the grand jury, this time for larceny as bailee.

The indictment came as a result of the examination made of University of Minnesota accounts by John Barry, an accountant employed by County Attorney Robertson to make an examination independent of that conducted by the state public examiner's office.

The crime alleged is charged to have been committed in the early months of last year. In January, 1910, according to testimony given the grand jury by Dean Woods of the farm school, the farm school sent two checks to Bren, then in charge of all university funds. One was for $5,227 and the other for a little more than $7,000. These checks were to be turned into the university fund and credited to the farm school.

Course of Checks.

The authorities say that the larger check followed its proper course, but that the books of Bren show that the smaller one did not. It was deposited, according to the testimony, in the St. Anthony Falls bank and Bren immediately drew more than $2,000 in cash against it. Dean Woods testified to sending the checks and J. E. Ware of the bank testified to proceedings there.

Later on, the books show, according to those who have examined them, that Bren drew a check on the athletic fund for $5,227 and sent it to the state auditor. This money was due, not from the athletic fund, but from [illegible] state auditor, according to the claims of the prosecutor, was arranged by Bren so that it covered the deficit in the university fund caused by non-deposit of the original check.

It is on these figures and claims that the indictment of today is based, the authorities holding that the books show that the athletic fund always was a ready bank for Bren to use when in need of money to cover up on other funds. Later on, though the authorities say the books are indefinite on this point, the $5,227 was made up to the athletic fund.

When the final break came and Mr. Bren told his story of robbery on the campus, the athletic fund was found entirely intact and the authorities believe that this was made intact at the time so as to save someone else besides Bren from embarrassment.

MANY INQUIRIES ABOUT LANDS.

People All Over the Country Interested in Cass Lake.

Many inquiries are being received from all parts of the nation by George Welsh, state immigration agent, in regard to the 32,220 acres of land to be opened to entry in the Cass Lake district at 9 A. M., August 22. Some 40,000 acres of this are ceded Chippewa Indian lands upon which the timber has been cut and removed.

As this tract was opened to settlement early in May of this year the greater portion has been appropriated by "squatters," who have, the first legal right to enter. There are, however, many acres of valuable land in this tract still open.

The 40,000 acres in township 157, range 28, and township 159, range 29, Koochiching county, never have been open to entry before, and all who have settled on it prior to 9 o'clock, August 22, will be treated as trespassers and have no legal right. The first legal applicant after that time will obtain the tract desired.

RING FIGHT STIRS GOVERNOR.

Prepares to Clean-Up St. Louis County as Result of Hibbing Battle.

Duluth.—As an aftermath of a battle at Hibbing in which "Pal" Brown, the range 128-pound champion bested "Chicago Heights" Gary, the governor of Minnesota is preparing to make a clean-up in St. Louis county.

"I have not heard anything about the fight as yet," said Gov. A. O. Eberhart yesterday. "I did not know that it was going to take place. If the officers knew about it and did not enforce the law there will be something doing."

Sheriff J. R. Meining claims he is not a sport, and says: "If I had known about the Brown-Gary fight at Hibbing I certainly would have stopped it. I saw the articles in relation to the fight in the papers but they did not state the place where it was to be held."

WORK ON INTERURBAN LINE.

Construction Company of Hastings Busy Near Inver Grove.

Hastings.—That Hastings will have two interurban electric lines is a possibility, but one is now a certainty, the construction work having already been started. The Interurban Construction company of Hastings will push the project for a road to be built from the end of the Twin City Rapid Transit company's line at Inver Grove, by way of Hastings, to Cannon Falls and Rochester, and eventually, it is said, to Chicago. The surveys are completed and most of the right of way has been secured.

The St. Paul Promotion company some time ago had surveys made and secured right of way to build an electric road from St. Paul by way of Hastings, crossing the river at Ninninger, and Red Wing, to Lake City. It also was granted a franchise to operate its lines here. The Interurban Construction company of Hastings will also seek a local franchise. The Interurban company has at present a large force of men and teams at work on the roadbed of the new trolley line, about four miles this side of Inver Grove.

The officers of the company are: President, Senator A. T. Stebbins of Rochester; vice president, Edward Feldhauser of St. Paul; directors, Otto Ackerman, John Heinen and Senator Albert Schaller of Hastings, F. B. Sonner of Cannon Falls; W. L. Sonntag of St. Paul, general manager.

HURLED FROM AUTO.

Woman Meets Death Near Red Wing When Automobile Runs Off Road.

Red Wing. — Mrs. Ole Jensen, 56 years old, was instantly killed in an auto accident in Roscoe township. The car was being driven by Oscar Christopherson and his sister, Mrs. Ed. Nord, occupied the front seat with him. Knute Haugen and Mrs. Jensen were in the rear seat.

The driver was going at a twenty-mile-an-hour rate of speed, it is said, and after going down along grade crossed a bridge, when Mrs. Jensen was thrown off her seat. She was [illegible] fell across the rear door. Christopherson looked around and lost control of the machine, which ran down a steep embankment, striking two telephone poles which were set side by side. The impact of the car broke one pole off near the ground and splintered the other.

Mrs. Jensen was thrown out and her neck was broken, death being almost instantaneous. Mrs. Nord was thrown against the wind shield, and her hands and one limb were cut and bruised. The driver and Mr. Haugen were unhurt.

Coroner Gleb and County Attorney Ericson made a trip to the scene of the accident, but deemed no inquest necessary.

TO GET MONEY BACK.

Governor Promises Legislative Relief to Kissin.

Wolf Kissin of Duluth, who bought a quarter section of Long lake, St. Louis county, when he thought he was buying land at a sale of state swamp land conducted by State Auditor Iverson May 17, will get his money back, and the sale will be set aside by the next Legislature. Mr. Kissin saw Governor Eberhart, and the Governor told Mr. Kissin that he would take the matter up with the Legislature and secure this action.

Mr. Kissin was refused redress by Auditor Iverson last week, when he explained that he had found his land to be water, and came to St. Paul to see the auditor. Mr. Iverson was not in the city, and his deputies told Mr. Kissin they could do nothing, but took him to the Governor. Governor Eberhart, after hearing the case, said the state did not wish to defraud any one by the sale of lake for land, and promised to have the sale set aside. Mr. Kissin had paid only $73 on the land, but he said he was fighting for a principle rather than the money.

STEER TRAMPLES ON FARMER.

Jacob Meyer's Life Saved by Dog Which Fought Infuriated Animal.

Red Wing.—Jacob Meyer, a farmer living two miles southwest of Goodhue, was perhaps fatally injured by being trampled on and gored by a young steer. Mr. Meyer was attacked while in the barnyard looking after some stock. A small dog which accompanied him barked at and fought the steer and prevented more serious injuries.

Mr. Meyer's collar bone was broken, his spine sprained, and he suffered several minor bruises.

He was unconscious from 10 o'clock in the morning until 5 o'clock in the afternoon, when his family returned and found him lying in the barnyard. Physicians were called, and some hope is entertained for his recovery.

BIG SITES FOR NORMALS

ADDITIONAL GROUNDS AT MOORHEAD, ST. CLOUD AND MANKATO.

Members, Together With Presidents of Institutions, Well Entertained at Mankato.

Mankato. — Mankato today entertained members of the State Normal board and the presidents of the five normal schools of the state, the former being here to hold the regular quarterly meeting of the board, while the presidents held their meeting in St. Paul, and, as is the usual custom, were here to meet with the board.

Plans presented by Resident Director Somsen, of the Winona normal for improvement of the grounds around the school and dormitory buildings, as well as for the laying of new walks were adopted and the work ordered started.

The contract for the purchase of additional property for the Moorhead normal also was adopted, $12,500 having been appropriated by the Legislature for that purpose. The board recommended to the attorney general that condemnation proceedings be instituted for the purchase of four lots as additional property for the school.

For St. Cloud normal the contract for the purchase of additional property was approved. The contract for repairs on the heating plant was awarded and approved.

Site for Mankato Dormitory.

A special committee, consisting of President Torrance and Directors J. L. Washburn and John C. Wise, recommended the purchase of the H. A. Patterson and E. C. Willard tracts of land and the remaining lots in Bryn Mawr addition as a site for the new dormitory for Mankato normal. The report was adopted and the property designated was ordered purchased for the state. The entire board and presidents visited the proposed dormitory site this afternoon when the purchase of additional property was decided upon. The board adjourned for luncheon and again assembled for the completion of business at 1:30, concluding at 3:30 o'clock, when the visitors were taken for an automobile ride to the Rapidan power dam and other points of interest. The directors and presidents were the guests of Resident Director Wise at a dinner served at the Elks' cafe and after which a social evening was spent.

All But Two Members Present.

E. W. Washburn, of Duluth, Resident Director Somsen, of Winona, President Ell Torrance of Minneapolis, Secretary C. G. Schulz, of St. Paul; Resident Director C. L. Atwood, and President W. A. Shoemaker, of St. Cloud; Resident Director L. A. Huntoon and President W. A. Weld, of Moorhead; President G. E. Maxwell, of Winona, and E. R. Bohannon, of Duluth, were present. Directors E. J. Jones, of Morris, and Tollef Jacobson, of Alexandria, were not at the meeting. The directors and presidents will return to their homes on the morning trains.

NEED NOT ASSESS TAX

Unnecessary When Property Owners Donate for Road.

Assistant Attorney General Smith yesterday gave an opinion that where one-quarter of the road fund to be assessed against the benefited property as provided under the new Elwell law is donated, it is unnecessary to make assessment. This will give Winona county opportunity to build $120,000 worth of good roads before winter. Otherwise work would be so delayed by assessment very little would be done this fall.

The Elwell bill provides the state will pay half, the county one-quarter and the other quarter will be assessed against the property. Dr. Donald Pritchard of Winona canvassed the county for voluntary contributions and more than the one-quarter necessary was raised. Farmers contributed more than $8,500.

Whether the counties will take this opportunity of doing away with the assessment Senator J. T. Elwell would not express an opinion. The northern counties, he thought would prefer the assessment plan.

PLAN BIG CEREMONIAL.

Minneapolis Shriners to Put On Show for State Fair Week.

Minneapolis.—Zurah Temple, Nobles of the Mystic Shrine, will hold their biggest ceremonial session of the year, at their temple here on the evening of Friday, September 8, during state fair week. On account of a large number of out of town Shriners being present for the fair, the session will be devoted mainly to out of town candidates. Already many petitions have come in from over the state and many more are expected.

FOUR ARE KILLED

PENNSYLVANIA 18-HOUR TRAIN JUMPS TRACK AT FORT WAYNE, IND.

THIRTYSIX ARE INJURED

Double-Header, Late, Runs Into Open Switch at Mile at Minute—Men Fight Women to Escape.

THE DEAD.

PETER MALONE, Ft. Wayne, engineer, on Flyer.

W. CREIGH, Ft. Wayne, fireman on Flyer.

UNIDENTIFIED PASSENGER at St. Joseph's hospital.

WILLIAM E. ARRICK, freight engineer, 1320 Winter street, Ft. Wayne Ind.

Among the Injured.

Sam Rosenthal, Grand Forks, N. D., left hip dislocated.

E. J. Massadr, Milwaukee, Wis., left hand and legs crushed.

L. B. Havens, aviator, New York city, hands and arms cut.

R. Brussell, Toronto, Ont., right ear torn off, face smashed, left collarbone broken.

Fort Wayne, Indiana.—Two people were killed, two were reported missing and 30 were injured at the western limits of this city in the second wreck within a week on the Pennsylvania railroad's Chicago-New York 18-hour train.

Pulled at top speed by double-header locomotives, the heavy train ran into a temporary switch that was too weak to stand the terrific strain. The rails of the switch were swept aside, the engines of the flyer careened crazily and sideswiped the engine of a freight train on a sidetrack. Engines and passenger coaches, a second later, were piled on their sides. In the panic of passengers which followed the piling up of the fast train, men fought women to escape, and scores were trampled and beaten.

The police department, the fire department, and every ambulance in the city were called to the scene of the accident. At least fifty doctors were on the scene within a half hour of the time the trains came together and within a short time thousands of people had collected about the wreck.

Two passenger engines, with the freight engine, were piled up in a mass of bent and twisted iron. The baggage car, smoker, buffet and two sleepers turned over in the ditch. Most of the injured were seated in the diner and smoker when the accident occurred. The main track and the track on which the freight train was located were torn up for a distance of 200 yards.

The two engines of the flier were torn from the trucks and thrown down the embankment to the park, while the engine of the freight reared up in the air over the trucks of the flier's engines. The all-steel cars of the flier were put to the first actual wreck test they have ever undergone and proved to be all that has been claimed for them by their designers. Only the first two cars of the heavy nine-car train were much smashed.

Passengers on the seven rear cars escaped with only cuts and bruises whereas, it is declared by railroad men, if the cars had been of the old fashioned wood construction the damage would have been frightful.

It will take a day or more for the wreck trains to clear away the debris, as the cars are extremely heavy. The wrecking crew from Fort Wayne arrived at the scene within a half hour of the time it occurred, while the wrecking trains from Crestline and Chicago arrived later in the evening. Thirty or more passengers, all badly bruised and cut, are at the Anthony hotel.

The body of Fred Zimmerman, who died in Milwaukee, and which was being brought here for burial, was recovered from the baggage car. One of the cars caught fire and was burning by the time the fire department arrived.

DAILY MARKET REPORT.

Twin City Markets.

Minneapolis, Aug. 14.—Wheat, September, $1.03¼; Dec., $1.04⅛; No. 1 northern, $1.06½; No. 2 northern, $1.05; No. 1 durum, 98c; No. 3 corn, 65c; No. 3 white oats, 42c; barley, malting, $1.09; No. 2 rye, 82½; No. 1 flax, $2.13½.

Duluth, Aug. 14.—Wheat, September, $1.04⅛; December, $1.04⅞; No. 1 northern, $1.05¾; No. 1 durum, 99¼c.

South St. Paul, Aug. 14.—Cattle—Steers, $4.50@5.00; cows, $3.35@4.40; calves, $3.00@8.65; hogs, $7.25@7.55; lambs, $3.25@6.00.

FARM OPPORTUNITY FOR CITY POOR

By HERBERT S. HADLEY

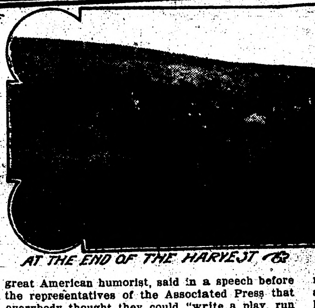
GOVERNOR OF MISSOURI

COPYRIGHT BY PEARSON PUB. CO.

GUERNSEYS AT PASTURE

GATHERING THE GRAIN

HIS FIRST CROP OF POTATOES



AT THE END OF THE HARVEST

IT is difficult for those who are concerned more with enjoying the luxuries and pleasures of life than they are in securing its necessities to understand the feelings of those to whom hunger is not an unusual experience. And, yet, we are told that one-tenth of the American people do not get enough to eat; that four-fifths of our wage earners do not earn in excess of $500 a year. Living on such an income is likewise more or less incomprehensible to those to whom the expenditure of such a year's earnings in a brief outing in the mountains, the northern woods or at the seashore is not an unusual experience.

The problem of achievement of ambition and of success that confront the business or the professional man is radically different from that problem of existence that daily demands a solution from 75,000,000 of people in the United States alone. This problem is, of course, most acute in those centers of population and industry where great wealth and great poverty exist side by side in striking contrast. While poverty and misfortune are not unknown in the country districts, they exist there generally as a result of accident, misfortune or disease, and not from the lack of opportunities or the discrimination and injustice apparently incident to our present industrial system. While the problem of the poor has always been, and doubtless will always be, with us, that is no reason why we should accept with complacency conditions which, if not capable of being completely reformed, are, at least, capable of considerable correction.

The increase in the cost of living in recent years has given a new interest to attempted explanations of existing conditions, and various theories are offered. We are told that the increase in the amount of gold production, or rather the decrease in the cost of gold production, has lowered its value, and, therefore, enlarged our measure of value, with a consequent increase in the cost of necessities as well as the luxuries of life without a corresponding increase in wages and salaries; that combinations and trusts have increased the price of their products by arbitrarily fixing the price of the raw material to the producer and the price of the finished product to the consumer; that labor unions have increased the cost of the necessaries of life by the increase that they have brought about in wages; and finally, the explanation is offered that supply has not kept pace with demand; that consumption has increased more rapidly than has production.

It is unusual that a general condition is to be attributed to any one cause. That all of these influences are more or less responsible for the present conditions is probably true. That a permanent correction of the tendency of the price of the necessities of life to increase must be based upon a proper relation between supply and demand, is at once apparent. A demand increasing out of proportion to the available supply is sufficient in and of itself to cause an increase in prices. And any correction of the other conditions which may have helped to bring about the increase in the cost of living must necessarily fail unless there is maintained a proper relation between consumption and production. The fact that in 1909 the value of our exports of food-stuffs decreased, as compared with 1908, eighty-seven millions of dollars, while the value of the food-stuffs imported into the country increased thirty-seven millions of dollars, making a charge of one hundred and twenty-four millions of dollars upon the wrong side of our national ledger, shows that the consumption of that which we produce has been increasing more than has the production.

To bring about a correction of these conditions it is apparent at once that there must be an increase in production, and the question is how is this to be accomplished. We must either use to better advantage the soil that is already in cultivation, or cultivate that which is now uncultivated. The truth is, we must do both. Production in this country, as compared with other countries, shows that we are not using to the best advantage the great resources with which nature has endowed us. The average production of wheat in the Netherlands is 34 bushels to the acre; in England, 32; in Germany, 28; in France, 20, while in the United States it is only 14. The same disparity is found in fields of corn properly cultivated compared with those not properly cultivated.

In a recent report it was stated that approximately 40 per cent. of the soil that was cultivated was used in such a way as to decrease, rather than increase, its productivity. The correction of this condition of inadequate production, due to lack of scientific methods of cultivation, must come from the agricultural department of the United States and the agricultural colleges of the different states. From these sources the farmers must get the scientific information which will enable them to adopt not only effective methods of agriculture, but effective methods for conserving the productivity of the soil. The other correction must be accomplished by inducing a larger portion of our population to engage in the cultivation of the soil.

We can all agree as to the advisability of the "Back to the Soil" movement. But how to make it effective and successful is another and far more difficult problem. Some time ago George Ade, the great American humorist, said in a speech before the representatives of the Associated Press that everybody thought they could "write a play, run a hotel or edit a newspaper." He might have enlarged his list by adding "become a successful farmer." To put seed in the ground and see it grow seems so easy that almost every one imagines himself capable of doing it successfully. But we know that farming, that is, successful farming, is both a science and a business. One can make just as complete a failure of farming as he can of practicing law, running a hotel or editing a newspaper. It would be worse than useless to encourage the "Back to the Soil" movement if it is not planned and executed in a way that is likely to be successful. The natural yearning to "get back to the soil" that comes to most people causes such a movement to appeal to those who are well qualified, as well as to those who are poorly qualified successfully to do their part as cultivators of the soil. To go back to the soil is to the man of ordinary means and under ordinary circumstances something like pioneering, and not every man, by any means, is capable of becoming a successful pioneer. To undertake indiscriminately, unscientifically and without proper method and organization, to get people back to the soil will result in more of failures than successes; in more of injury than of good. But this work can be accomplished in a way that will be both effective and successful and which will increase the proportion of producers as compared with consumers. All that is necessary for the accomplishment of this result is that the same foresight and organization should be adopted in starting the business of farming as is adopted in the inauguration of any other business enterprise. If men of means, who also have the disposition to help their fellow men, would realize that they could make a good paying investment, as well as relieve distress and suffering by helping others to return to the soil in the right way, the "back to the soil" movement would then give promise of accomplishing all that its enthusiasts have claimed for it. Such a movement must, of course, be under taken on a busines basis; upon a plan which will promise not only a profitable return on the investment, but result in giving good homes and steady employment to many people who need both.

It is easy enough to say to the poor of the large cities that they should "go back to the soil;" but for the successful accomplishment of such a result money, and considerable money, is required. One cannot expect to make a living on a few hundred dollars invested in a farm and the machinery necessary for its cultivation, any more than one can expect to make a living on the same amount invested in any other business. So, in the first place, it requires money or credit to buy a farm, and money or credit to secure necessary implements, machinery, horses, cows, etc., to successfully conduct it. It will take from five to one hundred and sixty acres, according to the character of the soil and the methods of its cultivation, to support a family. You cannot expect large returns from a poor farm, or from a good farm, poorly cultivated. You cannot expect to receive a return from a farming investment out of all proportion to the value of the investment and the labor expended thereon. The difficulty in this proposition begins at once. Many of those whom we all agree should be brought back to the soil have neither the money nor the credit necessary to accomplish it. It is as to the method by which this difficulty can be overcome and this deficiency supplied that this article is written.

There have been successfully established in Missouri and other states in recent years a number of farm home colonies, which seem to offer the best method for bringing people back to the soil in a way which is likely to make the experiment a successful one. The general plan of these farm home coloniesis for some individual or association to divide a tract of land available for farming and fruit raising into a number of small farms, which are sold on easy terms or rented to persons who desire to go back to the soil, with a central or home farm conducted in a way and with the appliances necessary not only to encourage and to instruct, but also to assist those liivng upon the other farms; the idea being that the central farm, under the control of an experienced farmer, will be a source of example, and with the establishment at some central place of a church, schoolhouse, blacksmith shop, creamery, silos, milk separators and other modern conveniences and necessities of the farm, the chances of succes swill be increased and the chances of failure correspondingly lessened. The isolation and lonesomeness incident to individual effort in getting back to the soil is thus, of course, avoided, with a consequent improvement of conditions of social life.

Under the auspices of the Catholic church, and particularly under the direction of Archbishop John J. Glennon of the St. Louis diocese, there have been established in Missouri a number of such farm-home settlements which have proven both interesting and beneficial. One was established some years ago at Knobview as an Italian colony, which has enjoyed a most successful career. There has resulted a marked benefit to the settlers, as well as to the people of the surrounding country who have been taught many things in the use of the soil by these foreign farmers that they had not known before.

One of the farm colonies that promises the most successful results is a Swiss colony recently established in Howell county, Missouri.

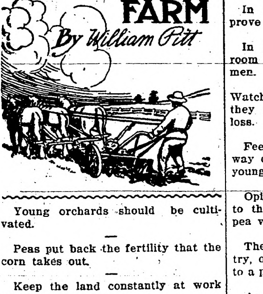
Another settlement of similar character has been established by Col. J. L. Torrey, who was the organizer of one of the "Rough Rider Regiments" in the war with Spain, and whose regiment through the unfortunate accident of a railroad wreck was perhaps deprived of the opportunity for actual service. Col. Torrey purchased a tract of 10,000 acres upon the southern slope of the Ozarks, which he is selling to deserving people upon terms which practically place it within the reach of all who are looking for an opportunity to engage in farm life who have not the means available to do so. That Col. Torrey is interested in developing good citizens, as well as good farmers, is manifest from the fact that he insists that every one of his tenants, or those to whom he sells a farm, shall own an American flag which they shall, on proper occasion, display from their homes.

These farm home colonies are all established on the same general plan. A tract of land is divided up into different farms with a central farm and village. The land is sold or rented on such terms as puts the opportunity to become a farmer within the reach of any deserving man. The profits or returns to be realized from such an investment will, of course, vary according to the size of the farm purchased and the character of the soil. Horace Greeley said that a man could make a living for himself and his family upon five acres of land. This is true of some land and not true of other land. But it is true that with a small acreage properly cultivated, with cows, hogs and chickens well managed, a good living can be made on a comparatively small investment if the enterprise is conducted with industry and intelligence. It is, however, always dangerous to "count your chickens before they are hatched." The results in farming enterprises, as in other enterprises, will usually fall short of expectation. Bad luck, accidents and other misfortunes will, of course, confront the farmer. But if he has "the right stuff in him," the land will yield him a liberal return if he will use good judgment, work hard and stick to it. He can then be independent of the beef trusts and other trusts; enjoy luxuries that the city man of means cannot secure, and view with complacency an increase in the cost of living when he realizes that he is a producer as well as a consumer.

When President Roosevelt's Country Life commission, after an extended investigation of conditions of country life throughout the country, made its report to the effect that improvement in the social life of the farmer was one of our most important problems, many regarded this statement as a mere academic or theoretical utterance. But any one really familiar with the conditions of country life knows full well that the limited social life of the country is one of the greatest disadvantages that now exists in connection with the cultivation of the soil. To provide a proper social life is an essential if the "Back to the Soil" movement is to be made generally successful.

NOTES from MEADOWBROOK FARM

By William Pitt



Young orchards should be cultivated.

—

Peas put back the fertility that the corn takes out.

—

Keep the land constantly at work growing some crop.

—

Head lice are the great drawback of chicks raised under hens.

—

Lima beans will require more manure than other beans or peas.

—

The tractor is going to be the newest and biggest help to the farmer.

—

The manure for peas, beets and onions should be fine, rich and well rotted.

—

The hens need lime and the best way to furnish it is to feed crushed oyster shells.

—

A uniform quality of dairy products whether it be milk, cream or butter, is always best.

—

Melons of all kinds require an abundance of moisture and a clean, deep mellow soil.

—

Frequent watering of the teams during harvest is good insurance against sunstroke.

—

Good poultry can be reared and made to produce in close quarters of city and suburban lots.

—

Manure as well as fertilizers should be thoroughly mixed in the soil before drilling in the seed.

—

Do you ever give your horse a cool bath in summer? You know how good it feels when you bathe.

—

Hungarian grass seed sown in rich, mellow soil will mature and be fit to cut 60 days from germination of seed.

—

Some people claim that a hog is a scavenger by nature, but he certainly thrives better on clean feed and decent surroundings.

—

Prepotency does not come by chance, but through years of proper breeding for certain characteristics and specific functions.

—

Many farmers do not have a supply of cabbage for winter because they neglect starting plants in midsummer for the fall crop.

—

Every inclosure for the hogs should be perfectly tight, and with excellent wire fences that are now manufactured this is an easy matter.

—

The silo is almost indispensable to the really up-to-date dairy, but silage is the best form in which to feed corn to sheep or to beef cattle.

—

A ewe that is troubled with caked udder would better be fattened and sold to the butcher. If she has it once it may be worse the second time.

—

The average ensilage ration is forty pounds per cow daily. This is seven and three-fifths tons per year. An acre will yield fifteen tons of silage.

—

Milk giving is a habit that responds to encouragement or neglect. It is a function which may develop or diminish by the treatment accorded the cow.

—

When acorns are fed pigs their flesh is apt to become very soft and oily, but this difficulty may be overcome by feeding corn for three weeks before slaughtering.

—

The Indian Runner ducks are not very good sitters, although they are often inclined to incubate. Their eggs are generally put into incubators or under hens for hatching.

—

There is no better feed for young pigs than fresh skimmed milk. It is also a good supplementary feed for brood sows, and, in fact, a good feed for hops of all kinds and ages.

—

Spring pigs can get along very well without shelter except from rain until fall, then if you are so shiftless as to fail to provide shelter they are better able to stand cold and rain.

—

An excellent destroyer of lice is four ounces of powdered lobelia seed and two quarts of of boiling water. Let stand till cool and apply to the affected parts with a sponge or coarse brush. One application is usually sufficient.

—

Eight thousand dollars' worth of pork saved from cholera is the record of the serum from one hog at the Missouri experiment station. More than 1,800 hogs were vaccinated with the serum. The hog was worth while [illegible] the world.

Oats make the best grain ration for horses in summer.

—

Cows differ somewhat in the amount of roughage they will take.

—

In the care of chickens women prove their superiority over men.

—

In preparing birds for the show-room women are more handy than men.

—

Watch out for worms in the hock; they will cause lots of trouble and loss.

—

Feeding sour or sloppy food is one way of inviting bowel trouble in the young chick.

—

Opinions vary somewhat as yet as to the comparative feeding value of pea vine silage.

—

The farmer who keeps better poultry, or the best, is on the right road to a paying business.

—

Asparagus shoots should not be cut too late, as late cutting will injure the vitality of the roots.

—

The proper way to apply manure is to remove it from the stable directly to the field and spread it.

—

Impatience with the heifer that is freshening for the first time is one sure way of spoiling the cow.

—

Do not attempt to raise fall pigs without having first prepared a perfect system of housing for the winter.

—

Tomatoes should be given the last working with cultivator and then bedded just before the vines fall over.

—

If dusty hay is fed, sprinkle with water and it will save the horse much annoyance; but better not feed it at all.

—

The greatest forage crop in the world is corn, and the silo is the most economical device for use in dishing it up.

—

Free range for hogs does not mean that they should be allowed to run in the highways and through the neighbors' fences.

—

Stall manure applied to the ground fresh is much better than manure that has been weathered by standing in the barnyard.

—

All vegetables which require warm soil, as okra, beans, tomatoes and egg plant, should have warm manure and never muck.

—

Farmers everywhere are looking for some economical way of maintaining the soil fertility or improving it. Dairying is the answer.

—

Fence corners full of dead weeds make a fine hibernating place for all kinds of bugs which will get busy with your crop next spring.

—

The alfalfa farmer is not cutting as heavy a crop this year as ordinarily, but he is just as many laps ahead of the all-grain farmer as ever.

—

The man who is sincerely interested in his dairy work is pretty sure to be a prosperous dairyman and in his case the dairy business booms.

—

Stall manure, mixed with ground phosphate and applied on the ground fresh, is vastly better as a fertilizer than manure in any other form.

—

The cream from the milkings must not be kept so long that it will develop a sharp acid, for that would impart an unpleasant flavor to the butter.

—

You would think the manufacturer a fool who would feed cotton into his mill and expect silk goods to be woven from it, and yet the hen is simply a machine.

—

Try the plan of flushing the ewes from now until breeding season, then follow with good pasture, and you will see from results that the plan makes most profits.

—

We need to have a clear idea of what breeding does, of what feeding does, of what care and environment do, if we secure and maintain a profitable dairy herd.

—

In order that a good horse may result the colt should not only be given a good start in life, but should be kept in healthful and thrifty condition through the growing stage.

—

Cabbage will continue to grow late in the fall if the ground is clean and the surface fine and loose. The same is true of celery, beets, carrots and some other hardy vegetables.

—

Lines of breeding which a century has developed and stamped with approval ought to prove safer than the theories of a single mind, made tangible in a few heterogeneous crosses.

—

Turkeys are tough birds, that is, they will stand almost anything after they are grown up; but for some reason very many seem to have a world of trouble getting them grown up.

—

If the fowls are not allowed free range add alfalfa meal and some high-grade beef scrap, and pullets will be grown that will be a surprise with their strong, long bodies, well prepared to shell out eggs the year round and breed strong chicks for next year's crop.

THE AMBASSADOR'S SECRET

By ROBERT NAUGHTON.

(Copyright, 1911, by F. L. Nelson.)

THE smoking, idling, late afternoon crowd of politicians in the New Willard contained little of interest for us. Rand was bored and I was uneasy. We stood by the window looking out on the expanse of Washington, typified by the amplitude of Pennsylvania avenue. For four days we had been on a tame, unsatisfactory hunt for some lost papers in a West Virginia salt-mining deal, and were now merely loitering on our return to New York, little dreaming of the drama on which the curtain was about to rise.

A negro bell-boy turned away from the call-desk just then, and his musical voice, rolling through the sea of chatter, was summoning:

"Misto La-awrence Ra-and."

"Confound him!" said Rand. "Get him quick."

That name, all too well-known, had sounded once only, but a score of eyes followed me with interest as I took from the boy the message that Rand was wanted on the telephone, and returned to him.

As Rand rejoined me, when he emerged from the booth in a few minutes, he said succinctly:

"Count von Bela-Moulkna has heard we are in town, and, as something has just happened at his wife's reception, he wants us to come instantly to the embassy."

"In top hats and all that?" I asked, as we hurried toward the elevator.

"I suppose we must," said Rand, with a slight lifting of the corners of his thin lips.

In fifteen minutes we were dressed, were downstairs, and rolling along the asphalt on our way to the handsome old residence in F street, which his government had purchased for its distinguished diplomatic representative.

The air of a function and the inevitable awning and carpet from the door to the curb marked out the house. We were met by an extremely tall, elderly servant, very widespread as to the elbows and very tight as to the maroon breeches, but with a shrewd twinkle in his guarded eyes, nevertheless. He showed us hastily into a side room, and back through others that were en suite with it, instead of taking us through the hall, where we might have been seen by the guests, until we reached the rear of the house, where an important wing projected. The difference in furnishings made it apparent that this was the ambassador's own ground.

We were ushered into a large room on the second floor, half-library, half-trophy room, and the ambassador rose stiffly from behind a big, flat desk, at which he had been sitting, smoking fiercely. He was a short, sturdy man of forty, with a blond face and an imposing head of iron-gray hair. His eyes gleaned under heavy black brows, and a large mouth was shielded by the mustacle, which one often sees on men who have walked in the shadow of Bismarck.

His courtesies were a trifle exaggerated, it seemed to me, and Rand cut them short by a somewhat abrupt inquiry as to what we could do for him.

"You can tell me who took from that square, teak cabinet there in the corner a thin package of papers, the contents of which were known only to me, and which, if disclosed, will turn Europe into a seething hell of war in three months. I put them in that cabinet with my own hands at three o'clock this afternoon. They were gone at four o'clock. It is not five o'clock, and in this hour, other than telephoning you, I have done nothing else than puzzle over the most profound mystery that I have ever encountered in my diplomatic career. Other than the door by which you came, there are no entrances to this room but the windows. They are locked, and have not been opened. The only approaches to the door behind you are always under the eyes of servants who have been brought from my own reich estates, and have the fidelity of centuries behind them. No one has been seen to enter this room since three o'clock, and the only persons in the house meanwhile have been my family and domestic staff, and our two hundred guests. There was absolutely no clue in the room, in which, by the way, nothing has been disturbed except this antique bracelet, which was lying on the top of the cabinet. I must have those papers back again, and I must have them before they can be copied, which, such are their nature and length, would take two hours. I must not tell you what they contain, but in order that you may be able to identify them if you happen on the one chance in a hundred and do recover them, I show you this packet, which is identical in appearance."

He held out a small manuscript bundle, half an inch thick, formed of thin, diplomatic correspondence paper, and covered in pale blue, with veined cross lines of darker blue. I noticed at this juncture that the elderly servant had not retired, but had taken his stand behind us.

Rand disregarded the packet and bracelet, and passed rapidly around the room, his eyes surveying the interior and fittings in every detail. He studied the heavily napped carpet intently, then resumed his seat and took up the bracelet. It was made of nineteen capsule-shaped chased gold bars, joined each to each by three band links. It was an inch wide and in the center was an oval ring two inches long, supporting two golden leaves and a coral apple. It was an antique ornament of great value. Rand turned his pocket lenses on it, and said almost instantly:

"Your servant who announced this afternoon has the guest-list of course, and if I questioned him could his memory be depended upon?"

"Absolutely, sir. He is my majordomo, and is really wonderful in that regard, as well as others."

"Will you call him, please?"

"He is here. Rudolf, answer anything the gentleman may ask you."

The stiff and towering fellow came forward to the end of his master's desk.

"Rudolf, take your guest list and check off the large, plump women."

He drew out the sheet, ran down the names, and, as he came to the last, Rand asked:

"Now, how many?"

"Eighteen, sir."

"How man, of those eighteen are blond women turning gray?"

Rudolf considered a moment.

"Three, sir."

"How many of the guests have left the house? Any of the three?"

"Nearly all of the guests are attending upon the vaudeville program, including these three ladies, sir."

Rand held up the bracelet.

"Now, Rudolf, which of the three wore this bracelet?"

Rudolf's eyes questioningly sought his master's face, which remained downcast and unchanged.

"Madame Julie——"

"Stop, you fool. Not another word!" roared the ambassador, with a sudden change of manner, leaping to his feet and clapping his hand over the startled servant's mouth.

Rand was leaning forward, the pupils of his eyes reduced to pin points, and shining brightly.

Then Count Bela-Moulkna, realizing the undignified and unfortunate appearance of his outburst, drew back and sank down in his chair, rubbing his face fiercely with his hands, till his mustache and hair, disarranged, gave him a wild, animalistic look that could have been achieved in no other way. Slowly he recovered himself, rose, and said coldly and with all the dignity he could summon:

"Gentlemen, this investigation has reached a point where you must drop it. Mr. Rand, your incisiveness is more than marvelous. You will receive my check for five thousand by messenger in an hour. I regret to be under the necessity of bidding you good afternoon."

Rand, with a slight, sardonic smile, bowed deeply and responded with equal hauteur. We were retiring, when the ambassador clapped his hands to his temples, then smote his palms together, and began to laugh.

"Gentlemen, gentlemen, one moment! Forgive my abruptness. I have made a mistake. Pray resume your seats."

He had become most gracious in an instant, and hastened to say:

"Mr. Rand, I am sorely absent-minded. The lady whose name I prevented your hearing in full was here with me clandestinely this afternoon, and wore that bracelet for the first time. Only at the mention of her did I remember seeing it. I must confess to having had a small affair with her, one breath of which would ruin me. I had the papers after she left. She cannot be responsible for their disappearance. We had a rather dramatic interview, as she wished it to be our last, and I paid little attention to that bracelet, though, as I look at it, I feel sure there was a tiny oval locket pendant from it, which is almost certain to have contained my picture. Also, I am now positive that she, toying with the bracelet, dropped it here on my desk. I found it there on the cabinet thirty feet away."

Rand, at this fact, leaped from his seat and strode to the cabinet. He turned his lens over the top, then on the mantel behind it, and caught up a polished silver topographer's tracer with a broad, flat handle. As he held it to the light, I saw his little smile of triumph. As usual, it vanished instantly, and he returned to his seat.

"Your papers were taken within the last two hours, my dear sir, probably by the same person who pried the locket from the bracelet with this tracer. See the little scratch and the trace of the soft gold." He held it up carefully between his two index fingers. "Also the person we seek seems to be blackmailer as well as spy."

"Pray tell me, Mr. Rand," said the ambassador, "how you made the marvelous selection of the owner of the bracelet?"

"Very simply. It is a large bracelet, yet the end links between each of the fence work bars are so worn by wearing well down on the wrist, with consequent strain on the end links, that its wearer must have been a large, plump woman. Then, on the inside, under the leaves, was a section of a naturally blond hair, with signs of approaching loss of color. It was merely a process of elimination."

"And now this——?"

"We must wait and see. May I have a bit of drawing paper and a fine pen—a crow's foot, if you have them?"

The ambassador had both, and Rand, getting all the light possible, carefully laid the tracer on the desk, drew forth his pocket case of instruments, and, measuring with dividers, began copying from the polished silver faces of the handle, the faint, oily lines of imprint a hand had left upon them. Twisted and distorted as they were by the hand having been closed around the instrument, Rand reconstructed them with a wonderful accuracy of imagination, and with such rapidity, that in not more than twenty minutes he had before him a line-drawing of the hand that last had held the tracer. It was the left hand, long, and with distinguished lines.

I should say at this point that before he had been at work more than a few seconds he had asked:

"Is it possible for you to inform the Countess Bela-Moulkna that you have by chance secured a noted fortune teller; say, M. Marcon, of Paris, and insist that she give me immediately a special place on her program?"

"Pardon me, I don't understand," said the diplomat, seemingly unable to follow Rand's plan of rapid action.

"I am about to reproduce the hand of the woman who has your papers and the locket that can ruin your career."

"Pardon me again, sir, that is all very wonderful, but what does it signify?"

Rand bit his lip, and his fingers holding the little brass dividers were white with the pressure they exerted.

"A fortune teller who uses palmistry as one means of divination may have an opportunity to see that woman's hand," said he, with chilling suavity.

"Ah, really. Yes—yes—marvelous. Um—ah. Yes—yes, of course," answered the ambassador, in a bewildered sort of way.

He started to give the necessary message to Rudolf.

"Would you be so good as to write that message and send it by another servant?" said Rand.

Rudolf's eyes snapped with some suppressed feeling.

When the messenger was gone and the hand nearing completion, our employer again interposed his inquiries.

"Of course, Mr. Rand, finding this woman is one step, but what then? How can you possibly recover the papers and the locket without arresting one of my wife's guests? Do you realize that any action of a sort that would provoke the slightest scene either in this house or outside of it, where it was traceable to this woman's presence here, will lead to disclosures that, no matter how small, will be followed by greater ones, all of which mean, notwithstanding your cleverness, entire and complete failure, sir?"

Rand gave me a look that besought my sympathy. Though I was as greatly daunted by the obvious difficulties as was the Count Bela-Moulkna, I had a faith in Rand that allowed me to smile. Rand did not answer at once, and when he did, he used the tone adopted with a questioning child, and did not raise his eyes from his work.

"One hill must be climbed at a time, my dear sir. I have a slight hope of being successful."

I must admit, as I realized that when he had finished his present process, he would have no more than a moral certainty that the woman whom he had picked out was possessed of the papers and locket, I was consumed with curiosity as to what possible means he could take to prove possession and effect recovery. Never for one moment did I doubt but that this was all clearly formed in his incomparable brain.

When the drawing was complete, we were accompanied by the ambassador through the curtained entrance to the large drawing rooms, and found ourselves at the back of the clustered audience, listening to a woman noted as a reader of child's poems. She was at that moment responding to her final encore. The countess, a courtly woman with high Teutonic color, moved toward us, beaming. The ambassador presented Rand as M. Marcon, and Rand, with the mildly unctuous air of the society faquir, immediately introduced me, to my utter amazement, as "my assistant, Mr. St. John Coulwer."

"Merciful heavens! I never read a palm in all my life," I whispered to him, as we moved toward the dais where the entertainers took their station.

Before I had recovered my composure we were announced, and Rand plunged into his role with a verve that, even though I had seen him play parts ranging from the priest at Doctor Karsch's house to the Swedish engineer at Marengo, nevertheless completely amazed me.

He consumed a moment or two in a little lecture on palmistry, and all that he avowed as being discernible from the lines of the hand I knew full well he could read in the facial characteristics of his subjects.

"Of course," continued he, "it is obviously impossible for me to give more than a few of the ladies before me anything like a thorough reading this afternoon in my brief half-hour with you, but I will select a number at random for a few statements each. So I am going to ask you to hold up your left hands as long as I hold up mine, if you please. Will you oblige?"

Up went two hundred left hands as he raised his.

He surveyed them rapidly, and said aside to me after they were lowered:

"Our woman is either the black velvet Elizabeth to your right, the tall eagle in the center, the chianti flask in salmon in the rear, or the lovely Lady Gainsborough on the left, second row. None of them seems to be of a professional stamp, though. We may be too late."

The outlook seemed rather hopeless, I must say, as I covertly surveyed each of the four, while he picked out several others, and brought them forward alternately, startling the company with his insight into their characters, and convulsing every one with his tactful hits upon faults apparently well known among their friends. I could merely marvel at it all.

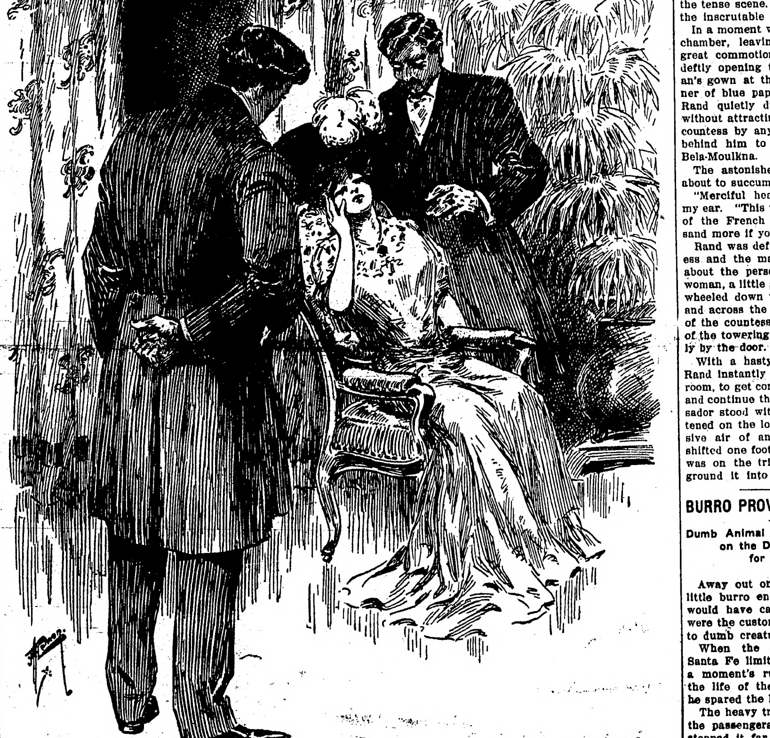
Once he came close up to me and said: "When I put this drawing on the table, pick it up and fix on your memory the deep lines across the palm and the crooked third finger."

I did as he bade me, and when satisfied that I had the mental picture, I caught his eye. A moment later, when he'd finished with a dour senator's wife, he said:

"Now, ladies, I hope that I have won your confidence; I have a feeling that there is some one here this afternoon for whom I may be able to do a great good, and, while I am lining just a few more destinies by the chance method of selection I have been pursuing, Mr. St. John Coulwer will pass among you seeking that particular palm in which are the signs of the star of the day and hour. I have a feeling that there is some one here over whom fate hangs today. If this lady, whoever she may be, will come forward, I will endeavor to draw back that mysterious veil that shuts the future from our eyes and bare the secrets that lie beyond."

There was a melancholy, depressing tone in his voice that was inimitable.

"Go down there and find our woman," he said to me, and with a tight lump in my throat that seemed to choke me more and more as I progressed, I began moving in and out among the chairs of the guests searching for the hand that matched the picture in my mind. Rand was brilliantly diverting all the others save those I was encountering at the moment. I was astounded at the vast difference in the hands extended as I passed, and was even able to exchange polite badinage with two or three ladies who besought me to give them the grand opportunity of the afternoon The first two of the four Rand had selected had hands shaped similarly to the drawing, but the lines were in no way alike. The third woman had a larger hand and no crooked third finger.



WE LOWERED HER INTO A CHAIR.

The fourth was the woman I sought!

She was pale and nervous, with her lips closely set, and when I told her that it was she whose palm bore the sign of the day and hour, she shrank back, as if from an accusation. But she thrust her pretty chin forward a trifle, and, when Rand had finished the reading then in progress, she rose to her full, stately height, pressed her trembling fingers to her masses of hair, then smoothed out the folds of her rich gown with a rapid, downward gesture, and led the way, unfalteringly, to the dais.

Rand took her hand with a marked gentleness, and his face was grave and kindly, although the steel-point glint in his eyes belied his whole manner.

There was a moment of silence, with tense interest among the spectators. The ambassador, his face a study, drew slowly nearer, with Rudolf at his heels.

"My dear madame," Rand began, so low that I alone could hear his words, "there seem to be things here which I feel sure you do not wish known."

She started visibly.

"Much of what I say I will address directly to you, but when I begin to talk of your intimate woman friend, that also will be meant for you. Pray stop me if I go too far."

Her eyes were lighting and darkening, and her breast was heaving with suppressed excitement. Slowly, and watching her narrowly, Rand told her points of her character which were plainly written on her face, such as her determination and high spirit, signified by the angles of the chin and mouth; her romantic, adventurous nature, indicated in the size and openness of the eyes and the low, arched brows, and her love of this world's goods, shown in the thinness of her lips and the unusual shape of the point of the nose. He passed from phase to phase, "hewing true to the line," as I could see by her expression. Gradually he worked up to his more telling incisions. Her perturbations and effort at self-restraint were proportionately increased.

"But you have chosen your path," he went on. "I can but warn you of pitfalls. There is one pitfall yawning just before you, and, while your danger is great, there is greater danger confronting a friend—a woman not unlike yourself, but, although you do not know it, she is bent on some desperate and dangerous practices, that are drawing near a terrible climax."

All of the faint color left her face, and I could see the fluttering of the arteries in her neck.

"She has set foot where there are graver dangers than death, and has laid hand to tasks that are to be extremely bitter in their recompense. One task she has just accomplished. I can see her eyes light with triumph. I can see her pass among her fellow human beings with the stealth of a tigress, holding to her guilty heart the secret of her deeds. Little she knows what is before her. Over her shoulder there lifts an extended hand—the hand of retribution. Even now—this very moment it falls. She is caught and disgraced before the whole world. She is——"

With a heavy sigh and a soft rustle of garments she sank backward. I caught her as she fell, and we lowered her into a chair.

"Another room, immediately," said Rand to the ambassador, who had rushed to the dais at this climax of the tense scene. Just behind him was the inscrutable Rudolf.

In a moment we were in a little side chamber, leaving the company in great commotion. The countess was deftly opening the unconscious woman's gown at the neck. I saw a corner of blue paper with darker veins. Rand quietly drew forth the packet without attracting the attention of the countess by any haste, and passed it behind him to the trembling Count Bela-Moulkna.

The astonished diplomat seemed about to succumb to apoplexy.

"Merciful heavens!" he gasped in my ear. "This woman is the daughter of the French secretary. Ten thousand more if you get that locket."

Rand was deftly assisting the countess and the maid. From somewhere about the person of the unconscious woman, a little golden thing rolled out, wheeled down the folds of her gown, and across the floor beneath the eyes of the countess, till it struck the toe of the towering Rudolf, drawn up stiffly by the door.

With a hasty word of explanation, Rand instantly turned to the drawing-room, to get control of the scene there and continue the program. The ambassador stood with his bulging eyes fastened on the locket. With the impassive air of an Indian chief, Rudolf shifted one foot slightly, until his heel was on the trinket, then turned and ground it into bits.

BURRO PROVES TO BE A HERO

Dumb Animal Stops a Heavy Train on the Desert to Get Aid for His Master.

Away out on the Mojave desert a little burro enacted a part which would have called for a medal if it were the custom to make such awards to dumb creatures.

When the engineer of the fast Santa Fe limited decided to sacrifice a moment's running time and save the life of the animal on the track he spared the life of a prospector.

The heavy train came to a stop and the passengers, wondering what had stopped it far from signs of civilization, climbed from the sleepers.

They found, standing resolutely on the center of the track, a sad-eyed little animal, plainly marked with the life of the desert. It refused to clear the path of the train until the engineer discovered tied to one of its front legs a slip of paper.

The curious passengers crowded about the engineer and read an appeal for help from Henry Gooding. Scrawled on the paper was the blunt statement he had broken a leg ten miles south of Siberia and was alone.

At the first station the message of the injured man was placed in the hands of men who brought Gooding to the town.

Not Up to Modern Ideas.

Having been in vogue for centuries, the custom of ringing two bells, one to summon the rich, and the other the poor, to vestry meetings, has now been discontinued at Northleach, Gloucestershire, England, on the ground that it is out of keeping with modern feeling.

Ambitious.

"Pop?"

"Yes, my daughter."

"This paper says that the average child of six years uses fewer than 400 words in her daily conversation."

"Yes, my child?"

"Well, pop, how soon will I be allowed to use as many as mamma?"

The Reason.

"My dear daughter, don't talk to me about young Bubbly's addresses to you. As a husband, he is a minor proposition."

"But why, pa?"

"Because he's under twenty-one."

The Northern Light
CHAS. W. LATTA
Editor and Publisher.

Published every Friday at Holt, Marshall County, Minnesota.

Subscription Price: $1.00 per year, strictly in advance.

Getting HOLT on the Map.

Here is a few comments from outside newspapers which go to show that the Northern Light is getting Holt and its territory some pretty good advertising.

Crookston Press:

Number 1, Volume 1 of the Northern Light, published at Holt, Minn., is just out. Holt has a bank, a creamery and several other business enterprises and the addition of a newspaper will mean much to that progressive little burgh.

Becker County Journal:

The first number of "The Northern Light," published at Holt, Marshall county, is one of our new exchanges. It is edited by Chas. W. Latta formerly publisher of the Crookston Press. Here is hoping that this paper will prove worthy its name.

Middle River Pioneer:

The latest newspaper venture in Marshall county is the Northern Light at Holt, the initiatory number of which reache our exchange last week. The publisher is C. W. Latta, recently publisher of the Crookston Press. Success to the Northern Light.

Warren Sheaf:

The Northern Light commenced shining at Holt last week. The Light is a weekly newspaper with Chas. W. Latta, lately of the Crookston Press as editor. Mr Latta is an experienced newspaper man and a fluent writer and the paper will seek to illumine the eastern part of the county with its effulgent rays.

Warren Register:

The first number of The Northern Light, Holt's new paper, Chas. W. Latta, publisher, reached us last week. It is a six-column quarto and is liberally sprinkled with advertising. Mr. Latta is an experienced newspaper man and will doubtless make his paper an important factor in the upbuilding of the community.

Marshall County Banner, Argyle:

"The Northern Light" is the name of a new Marshall county publication which is printed and published at Holt, with the name of Chas. W. Latta appearing as editor. Mr. Latta has been connected with several prominent publications in the past and his last venture was the Crooks-Press. Here is success to the Northern Light.

Roseau Region:

"The Northern Light" published at Holt, Marshall county, made its first appearance last week. C. W. Latta, formerly editor of the Plummer Pioneer and at one time connected with the St. Hilaire Spectator and the Crookston Press, is the editor of the new paper. That section of Marshall county in which Holt is located has developed rapidly the last few years and Mr. Latta has launched his paper in a place that will appreciate his efforts and prove remunerative.

Thief River Falls Times:

The Northern Light, Charlie Latta's paper at Holt, made its first public appearance last Friday. Mr. Latta hopes to make his paper a fitting representative of that phenomena from which he derived the name, and the Times feels confident that he will succeed. The Light is well patronised by the local merchants, has a generous amount of home news and these things coupled with its editor's versatility, will no doubt make it one of the brightest exchanges in northern Minnesota.

COMMERCIAL CLUB OF HOLT WAS ORGANIZED WEDNESDAY

The Commercial Club of Holt is the business like title chosen for an organization perfected by the local business men at an enthusiastic meeting held on Wednesday evening.

A preliminary meeting was held on Tuesday evening at which it was decided to organize, and a committee was appointed to prepare a constitution and bye-laws to be submitted at the Wednesday evening meeting.

The report of this committee was adopted with some slight amendments and the regular enrolling of members was taken up. Fifteen signed the roll of honor and paid the required fee on the spot.

The election of officers was taken up next and the following were chosen for the ensuing year:

President, S. S. Kolden.
Vice-president, Arvid Carlson.
Secretary, Chas. W. Latta.
Treasurer, B. L. Backe.
Directors; P. A. Risberg, R. Reierson, Nels Engebretsen, C. H. Gunheim, D. Payne.

The directors, with the president and secretary, will form the executive committee of the Club, and they will do their level best at all times for the development of Holt and its great territory. This executive committee will meet at any time when necessary to transact business, and regular meetings of the Club will be held on the third Tuesday of each month. Any resident of Holt or vicinity may join by calling at the secretary's office, subscribing to the constitution and bye-laws and paying the required fee.

Holt has at present the reputation of being one of the best little towns in the state in a business way. It will soon be recognized as the natural gateway to the great Mud Lake district and its volume of business must increase rapidly. It will be the duty of the Commercial Club to help in the attainment of these ends and see to it that local conditions shall keep pace in every respect with the business development that is coming very soon.

Will Construct New Bridge.

Milton Forder and J. C. Berg were here from Thief River Falls on Saturday getting ready to commence work on a new bridge over the Thief river east of Holt. The new bridge will be commenced just as quick as the big dredge passes the site of the old one and it will be finished just as quickly as possible. The new bridge will be 16 feet wide and have an 80 foot span across the river, which is being deepened and widened by the dredge.

Sunday Services

Services will be held in the Holt Church next Sunday at 11 o'clock A. M. An offering will be taken for church extension. Conferments at 3 P. M. Choir practice will be held in the church on Saturday evening.

The Young People' Society will meet Sunday evening at the home of Carl Nelson, in Excel, 3 miles southeast of Holt. All are cordially invited to attend these meetings.

SOMETHING NEW!

Within the next few days we will be able to show you a very fine assortment of Men's, Boys' and Children's Clothing. The line we will show will be by far the Biggest and Best ever seen in Holt, and our Prices will be within the reach of all. We do not claim to give you $2.00 worth for every dollar, but we always aim to give the best possible value for your money consistent with good quality and safe business.

Call and examine our Stock. We will be pleased to show you the goods we have to offer in all lines.

C. H. GUNHEIM

QUEER RELIC OF CIVIL WAR

On Delaware River Island Is Old Cannon Through Whose Wheel Grew Lofty Elm.

A small island near the mouth of the Delaware river was used by the federal authorities during the Civil war to store captured confederate guns and other war materials, as well as for the detention of prisoners. When the ammunition was removed at the close of the war one mounted gun was overlooked. When it was first placed on the island a tiny elm tree was breaking the soil between the heavy wheels of the gun carriage. Since then the elm has become sadly twisted and distorted. The body, deflected by the gun, found its way to freedom between the spokes of a wheel, forcing them apart as it grew larger. The gun has since dropped to the ground and lies half buried in the mold, but the tree still supports the crumbling wheels in position. Hundreds of ex-confederate soldiers have visited the little island to see this old war relic, and a crippled veteran of Lee's army makes a tidy sum carrying visitors to and from the mainland in a launch.

FISH TALE FOR VEGETARIANS

Captor of Thirty-Two Pound Carp Says He Saw It Picking and Eating Strawberries.

Fred Vosen, who lives near the Valley mill, has the champion fish story of the season, says the Springfield Republican. He captured a carp at the Lee Water company's reservoir that weighed 32 pounds. Now, this part of the story is positively vouched for, but the surprising part follows. Mr. Vosen says he was fishing and heard on the shore what he at first supposed was a muskrat. On investigating it proved to be a big carp. He watched the fish for some minutes, and states positively that along the shore strawberries hung over the water, varying in distance from four to ten inches from the surface, and he was surprised to see the big fish bobbing his head out of the water and grabbing the berries. He watched him repeat the operation half a dozen times. He then tried his bait, and succeeded in hooking the fish, and had to shoot him before he could land him. Mr. Vosen was accompanied by [illegible] friends, who state that his story of the carp picking strawberries is true in every respect.

OLD PROHIBITION BANNER.

A banner of much local interest has recently come to light at Livermore Falls. The banner is made of white satin with a hand painted scene in the center and is about three feet square. The Temperance Watchmen's club in 1840 presented it to the Ladies' Band of Hope of East Livermore during the temperance agitation of those days which led up to the passage of Maine's prohibition statute in 1851. The old banner helped to bring prohibition and it will now have a share in the fight for the retention of prohibition in our Constitution.—Kennebec Journal.

BIRD STRUCK AUTO DRIVER.

A bird was the cause of a serious auto crash at Bradley, Cal., a few days ago. While William Winans was speeding his automobile a sparrow struck him between the eyes Winans was momentarily stunned He lost control of his car and it struck Dr. S. A. Disbrow's runabout, throwing out the physician and his driver. Both were seriously injured. Doctor Disbrow probably fatally. Winans was not hurt save by the blow from the flying bird, which struck him with such force that it fell dead at his feet.

WHERE COLLEGE MEN LIVE HIGH

"When I was in the Imperial university here in Tokyo," a Japanese newspaper man said to me, "my father gave me $3 a month. I paid for my room, light and food $1.20 a month; for tuition, 50 cents; for paper, books, etc., 30 cents; and this left me $1 for pocket money expenditures, including the occasional treat of eating potatoes with sugar!" In such Spartan simplicity the victors of Mukden, Liaoyang and Port Arthur were bred.—Clarence Poe, in World's Work.

THEN HE GOT HIS.

She—I consider, John, that sheep are the stupidest creatures living.

He (absent-mindedly)—Yes, my lamb!—Sketch.

HE EXPLAINED THAT EASILY

Suspicious Black Hair on His Coat Came From His Pronounced Brunette Horse.

"But why," he asked, as he pulled the branches of an oak tree to and fro in the extremity of his emotion and the calm June twilight, "why do you object to me?"

"There's something about you that I don't like," she answered, as she drummed fitfully against a birch tree with her fingers.

Apprehensively he scraped the bark from a tall pine tree.

"What is it?" he demanded. "What can there be about me that could throw about you such a veil of restraint about this time?"

"The black hair about your shoulders," she answered, between clenched teeth and two rows of giant hickories.

He removed the hair and stared at it attentively. Then, barking playfully back at a dogwood tree, he laughed lightly.

"Oh, my love!" he exclaimed, kicking a spruce tree in the ecstasy of his mirth. "I can explain that. I was rubbing down my horse this morning. The horse is a pronounced brunette!"

With a gurgle of relief she fell into his arms.—Philadelphia Times.

LUCKY

First Farmer—Hayrick put four mortgages on his cow.
Second Farmer—Yes, and yesterday his cow was killed on the railroad, and he'll get damages.

BETWEEN TWO FIRES

Millions—Going to take a vacation abroad?
Billions—If I do they will say I am afraid to stay here, and if I don't they will say I am afraid to go away.

WHY, OF COURSE

Hoax—I can't see any similarity between becoming a congressman and baking good bread.
Joax—Isn't success largely a matter of dough in both instances?

THE LEAVINGS.

"Every dog has its day."
"Yes, and every cat its night, and poor man takes what it left."

Farm Lands and Farm Loans

Anyone having Land in this vicinity for sale should call or write me. I will either buy or find a buyer. Farm Loans quickly negotiated.

Something New In Kitchen Ware

The "1892" Pure Spun Aluminum Ware is rapidly coming into use for cooking purposes. It is taking the place of agate and enamel ware because while its first cost is a trifle more than ordinary ware, it is really much cheaper in the long run, as it is guaranteed for twenty-five years and will last practically a life time.

The genuine "1892" Ware, made only from pure SPUN (not cast) Aluminum, will not crack, scale, peel, break, scorch or burn.

It looks like silver but weighs only about one-quarter as much, is easily cleaned and handled, and will not rust, corrode or tarnish. Absolutely pure, non-poisonous and wholesome; saves money, time and doctor's bills.

Be sure you get the original and genuine ware stamped with the Maltese Cross. At your dealers.

Bring us the news.

When in town call at this office and let's get acquainted.

Miss Julia Knutson, of Randen, was an over Sunday guest at the home of Sam Mikkelson.

Miss Selma Wegge left on Monday for Larimore, N. D., to spend some time visiting with friends.

Miss Annie Olson went to Thief River Falls Monday on a combined business and pleasure trip.

R. L. Olsen, V. S., went to Thief River Falls on Friday last to attend to some business matters.

Axel Nelson made a drive out into the Mud Lake district last week returning late Thursday night.

D. B. Bakke was up from Thief River Falls on Friday on one of his regular bank inspection trips.

FOR SALE—A small steam threshing outfit, complete with feeder, windstacker and weigher. Enquire of S. L. Collins, Crookston, Minn.

—WANTED—Some one to put up hay on the SE 1-4 Sec. 36, East Valley township. Apply at this office.

Mrs. Richard Ruprecht was up from Thief River Falls to spend Sunday with her parents, Mr. and Mrs. Ed. Werner.

Ed. Monson left Tuesday for Langdon, N. D., where he expects to gather in a chunk of money during the threshing season.

The Young peoples Society will meet Sunday evening at Carl Larson's place three miles southeast of Holt. All are invited to attend.

Ed. Furr and sister, Mathilde, left Wednesday for Bismark, N. D. to attend the registration for the opening of the Fort Berthold reservation.

Tom Gulseth, of New Solum, left on Saturday evening for Baker in Clay county, where he expects to put in some time in threshing operations.

G. C. Smart, who has been working as temporary agent for the Great Northern here, was relieved on Monday and Wm. T. Wiig duly installed as regular agent.

Taken Up—On Sunday, the 13th inst, by Fred Larson, 3 miles east of Holt, one white, heavy wool buck with bell on. Owner can have same by calling, proving property and paying expenses.

H. O. Ekerdalen on Friday last harvested some wheat which had been quite badly hurt by black rust. There was only a few acres of it and it will yield practically nothing. The rest of his crop is in fine condition and gives promise of a large yield.

We need 150 more cash in advance subscribers before September 1st. If you are a subscriber yourself try and get others to subscribe. The building up of this paper is going to mean a great deal to Holt and its territory and we need the money in order to do our share.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

Tom Severson on Monday brought a fine sample of wheat to this town and left it at this office. This wheat was grown on land on which corn was raised last year. The straw is well over 3 feet in length and the heads are very long and well filled. Mr. Severson figures that this field will yield about 30 bushels per acre and some of his neighbors estimate it much higher.

M. A. NELSON, M. D.
PHYSICIAN AND SURGEON
Office over Holt Merc. Co's store
HOLT, MINNESOTA.

Lake Bed Now a Garden

It seems almost incredible that a place which a year ago was the bottom of a large lake, covered with several feet of water, and for many years the favorite haunt of innumerable wild ducks and other aquatic fowl, should this year be planted to various crops and producing vegetab- and grains good enough to carry off premiums at a state fair. Samples brought in last week prove that the above chang has actually taken place at Mud Lake. Carrots, rutabagas onions and turnips of remarkable size and finest quality were brought from the Rosaaen place; flax of the finest kind from the Bergeland farm, and barley thas looks fit for malting and will yield abont 40 bushdls per acre from Edwin Johnson's. These were raised on ground that was part of the bottom of Mud Lake and under water prior to the putting in last fall of the ditch that dried the lake.

These samples were brought in by Axel Nelson last week and placed on exhibition at Gunheim's store.

There are still a few 1911 brooms left; 25 cents at C. H. Gunheim's.

R. Reierson spent Tuesday night at Thief River Falls attending to some business matters.

Anton Sagstuen left on Tuesday for Lankin, N. D., to put in a few weeks at harvest work.

Mrs. Rowe arrived Wednesday from Fargo for a visit with her parents, Mr. and Mrs. Mat Olsen.

Harry Werner, buttermaker at Germantown, was here to spend Sunday visiting with his relatives.

Miss Mary Knutson left on Monday for Thief River Falls where she will spend a few days visiting.

Mrs. E. Davidson was up from Thief River Falls for a few days visiting with her son, Ole Davidson.

Mrs. A. Torrison and children from Thief River Falls are visiting here in town with R. R. Reierson's.

The Misses Backe were up from Thief River Falls yesterday and visited between trains with Mr. and Mrs. B. L. Backe.

Mrs. Ole J. Vaule returned yesterday to her home at Crookston after several weeks spent visiting with her sister on her homestead east of Mud-Lake.

Rev. M. B. Ordahl and wife were in Holt on Tuesday on their way home from a trip to West Valley and other points, where Mr. Ordahl held services and visited with members of his flock.

Geo. A Ralph, state drainage engineer, passed through here Saturday afternoon on his way back to St. Paul from a trip to Roseau where he was looking after some extensive drainage work for the state.

We want a live correspondent in every township in Eastern Marshall county to send us the news of the locality and solicit subscriptions for this newspaper. We want bright young people and will make it worth their while to represent us.

L. D. Caye, of Fergus Falls, who was an over Sunday visitor with Miss Edith Erickson, left on his return trip. He says he is very much pleased with this part of the country and may decide to invest in some land close by for straight dairy farming purposes.

While attending to her duties at the Evergreen Hotel yesterday morning Miss Bertina Risberg had the misfortune to fall downstairs. She was carrying some glassware in her hands and sustained an ugly wound in one hand. Dr. Nelson was called to dress the injury and removed a large fragment of broken glass from the cut.

Special Soap Offer — Galvanic Soap, none better for laundry work, at $4.75 per hundred bars. With each purchase of 100 bars of Galvanic soap we will give free of charge 20 bars of the celebrated Palm Olive Soap, worth $2.00 and a favorite wherever used. This soap offer has never been equalled in Holt in either quantity or quality. R. Reierson.

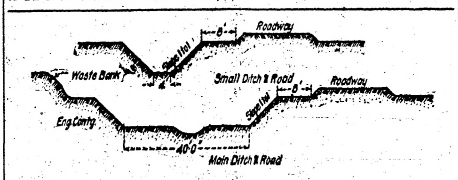
A. Welo, a prominent farmer residing southeast of Thief River Falls, was killed on Monday in a runaway. He had been transacting business in the city and started for home late in the afternoon. It is supposed that the team took fright and ran away throwing him from the rig. One of his feet got caught in the lines and he was dragged a considerable distance. His skull fractured and he was badly injured otherwise.

State Officials Will Make Visit To Great Mud Lake District

State Drainage Board Will Tour Big Ditch With Large Party Including Newspaper Men From Twin Cities and Duluth.

Saturday to Monday next will be big days in the great Mud Lake district when the members of the state drainage board, including the governor, auditor, secretary of state and state highway engineer, will make a trip over the territory traversed by the immense system of ditches. The plans for the trip contemplate a start from Thief River Falls in automobiles. They expect to travel as far as Grygla the first day; go east to Malcolm the second day, and return to Thief River Falls on the third day, going down along the Thief river to see the work done and to be done in deepening and widening the river channel.

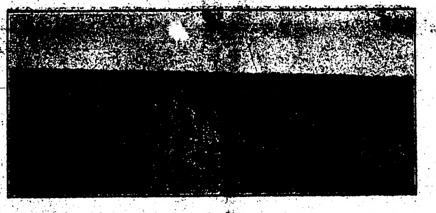
The Mud Lake drainage system will reclaim about 500 square miles of wonderfully rich farming lands, and with the dirt removed from the ditches fine graded roads are being constructed. There road grades will be made along all the main fines of the ditches, omitting only the small, short laterals, and this road building system will improve conditions for the settlers in the next two years more than twenty years of settlement and hard work would do without such a drainage system.



Cross-sectional view showing construction of ditches and road grades.

W. R. Hoag, engineer in charge of this big drainage project, will lead the party on the trip and point out the interesting features of the work and the country. Representatives of the big newspapers of the Twin Cities and Duluth are expected to be along to write up the story of this region and let the country at large know about this last and best of the great, fertile valleys of the north.

Mr. Hoag was in Holt on Friday evening last and we are indebted to him for the information given herein and also for the accompanying views, which show the method of constructing the ditches and roads and what they are like when finished. That Mr. Hoag is lookiug after the work carefully can be understood when we consider that this trip is to be undertaken by automobiles through territory where hip boots would have been very necessary less than eighteen months ago.



View from photograph showing ditch and road grade completed.

HIS IDEA.

Teacher (catching Tommy fishing on Sunday)—Do you know the wages of sin?
Tommy—Is this a sin?
Teacher—It undoubtedly is.
Tommy—I don't want wages for this. I'm satisfied to do it for fun.

LAST OF THE CO-EDS.

Four young women were graduated a short time ago from Wesleyan university at Middletown, Conn., who will be the last of their kind, as the institution now ceases to be coeducational. One of the women received the degree of bachelor of science and the other three master of arts.

Bring Us Some Samples.

We have numerous requests from southern Minnesota and Iowa points for samples of grains and other farm products raised in this district. If farmers will bring us in such samples we will distribute them where they will advertise this part of the country to good advantage.

HIS WAY.

Howe—I say, Wise, how did you happen to marry a widow?
Wise—Oh! I did my courting as I do everything else—along the line of least resistance.

OFTEN THE CASE.

Fecks—They say his wife drove him to drink.
Weeks—Perhaps she did, but from what I know of him I think he would have been awfully disappointed if she hadn't.

D. B. Bakke Pres. S. S. Kolden, Vice-pres.
HOLT STATE BANK

Do you realize that it is easier to spend after having saved than to save after having spent?

The handling of large sums of loose money naturally leads to extravagance and the temptation to buy everything in sight. Then disaster may come through some unforeseen accident and you are confronted by "hard luck." Sad, but true. Then you can realize that is is harder to save after having spent than it is to save and add to after getting a fair start.

We invite you to make HOLT STATE BANK Your Bank by giving us your banking business.

QUEER DISEASE IS IN UNITED STATES

Many Here Afflicted With Odd Ailment, Says Prof. Munyon.

GREWSOME CREATURES VERY COMMON, FINDS EXPERT.

Many people in the United States are afflicted with a queer disease, according to a statement yesterday by Professor James M. Munyon. He made the following remarkable and rather grewsome statement:

"Many persons who come and write to my headquarters at 53d and Jefferson Sts., Philadelphia, Pa., think they are suffering from a simple stomach trouble, when in reality they are the victims of an entirely different disease—that of tape worm. These tape worms are huge internal parasites, which locate in the upper bowel and consume a large percentage of the nutriment in undigested food. They sometimes grow to a length of forty to sixty feet. One may have a tape worm for years and never know the cause of his or her ill health.

"Persons who are suffering from one of these creatures become nervous, weak and irritable, and tire at the least exertion. The tape worms rob one of ambition and vitality and strength, but they are rarely fatal.

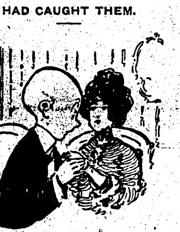
"The victim of this disease is apt to believe that he is suffering from chronic stomach trouble, and doctors for years without relief. This is not the fault of the physicians he consults, for there is no absolute diagnosis that will tell positively that one is not a victim of tape worm.

"The most common symptom of this trouble is an abnormal appetite. At times the person is ravenously hungry and cannot get enough to eat. At other times the very sight of food is loathsome. There is a gnawing, faint sensation at the pit of the stomach, and the victim has headaches, fits of dizziness and nausea. He cannot sleep at night and often thinks he is suffering from nervous prostration.

"I have a treatment which has had wonderful success in eliminating these great creatures from the system. In the course of its regular action in aiding digestion, and aiding the blood, kidneys and liver of impurities it has proven fatal to these great worms. If one has a tape worm, this treatment will, in nine cases out of ten, stupefy and pass it away, but if not, the treatment will rebuild the run-down person, who is probably suffering from stomach trouble and a general anaemic condition. My doctors report marvelous success here with this treatment. Fully a dozen persons have passed these worms, but they are naturally reticent about discussing them, and of course we cannot violate their confidence by giving their names to the public."

Letters addressed to Professor James M. Munyon, 53d and Jefferson Streets, Philadelphia, Pa., will receive as careful attention as though the patient called in person. Medical advice and consultation absolutely free. Not a penny to pay.

HAD CAUGHT THEM.



He (after he had kissed her)—My! what's that noise back of us?

She—I guess papa's trying his new motion picture machine.

The Wreck.

Mrs. Ronald H. Barlow, the eastern golf champion, was talking at the Cape May Golf club about the benefits of sea air. "To look at the cottagers and native of Cape May," she said, "speaks of these benefits more eloquently than I could do. How pale and wan seem city people beside these brown, supple, vigorous men and women! An excursionist from the city said to a fisherman on the beach the other morning:

"Do you have many wrecks here?"

"The fisherman looked contemptuously at the city man, who was in bathing dress. He looked contemptuously at his hollow chest and white, thin legs and arms, and then he replied: 'You're the fust I've saw this season.'"

AT THE PARSONAGE.
Coffee Runs Riot No Longer.

"Wife and I had a serious time of it while we were coffee drinkers.

"She had gastritis, headaches, belching and would have periods of sickness, while I secured a daily headache that became chronic.

"We naturally sought relief by drugs without avail, for it is now plain enough that no drug will cure the diseases another drug (coffee) sets up, particularly, so long as the drug which causes the trouble is continued.

"Finally we thought we would try leaving off coffee and using Postum. I noticed that my headaches disappeared like magic, and my old 'trembly' nervousness left. One day wife said, 'Do you know my gastritis has gone?'

"One can hardly realize what Postum has done for us.

"Then we began to talk to others. Wife's father and mother were both coffee drinkers and sufferers. Their headaches left entirely a short time after they changed from coffee to Postum.

"I began to enquire among my parishioners and found to my astonishment that numbers of them use Postum in place of coffee. Many of the ministers who have visited our parsonage have become enthusiastic champions of Postum." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

SERIAL STORY

The Girl of My Dreams

A Novelization of the Play by
Wilbur D. Nesbit and Otto Hauerbach
Novelized By **WILBUR D. NESBIT**

Copyright by W.D.Nesbit

SYNOPSIS.

Harry Swifton is expecting a visit from his fiancee, Lucy Medders, a Quakeress whom he met in the country. His auto crashes into another machine containing a beautiful woman and a German count. The woman's hat is ruined and Harry escapes. His sister, Caroline, arrives at his home to play hostess. Socrates Primmer, cousin of Lucy's, arrives with a hat intended as a present for Lucy. Harry is trailed to his home by the Count and Mrs. Gen. Blazes, who demands her hat, a duplicate of which she says has been delivered at Harry's house. She is in great fear lest her husband hear of her escapade. Lucy Medders and her father arrive and the count is hidden in one room and Mrs. Blazes in another.

CHAPTER IV.—(Continued.)

"All right!" Harry laughed, dropping her hands. "You always have your way with me. A girl ought to be mighty careful who kisses her after she is married, too, don't you think?"

Lucy smiled quaintly. Some of Harry's jests were a bit too flippant for her. Harry went on:

"Really, I'm mighty sorry I didn't meet you at the train. But, you see, I had a little trouble with my machine this morning."

"It was as well that thee did not meet us. It would have spoiled father's plans. We wanted to find thee in thy usual atmosphere."

Again Harry looked quickly at her. The surroundings were such as to make him keenly alive to any possible suggestion of some other meaning than her words implied. But Lucy's face was as serious as ever. She looked about the room, and sighed:

"Thy house is just lovely."

"It will be," Harry said, glancing apprehensively at the door of the room where Mrs. Blazes was waiting patiently for her hat—"It will be, when it's fixed up. Some things have to be moved out."

"And will thy sister—Carolyn—will she show me about the house?" Lucy asked.

"Certainly," Harry answered, gallantly. "But you don't need her. Just make yourself at home. Go anywhere you like."

Lucy started toward the room where Harry had placed Mrs. Blazes. But Harry was following her to detain her.

"And in here?" Lucy asked. "What have you there, Harry?"

"There? There?" Harry stammered. "Why—why, that's just some old junk in there. Wouldn't interest you at all."

"A junk room? How odd!"

"Yes—I—you see—I used to have a fad of collecting junk."

The sweat was standing on Harry's brow. He knew that Mrs. Blazes could overhear him, and his brief experience with that lady taught him that she had a natural feminine aversion to being termed junk. If she should decide to assert herself by opening the door and making a few remarks! The thought was appalling.

"Come, Lucy," he suggested. "Let's go and see—and see the goldfish."

"Nay, Harry," she smiled. "Let me see thy collection of junk. I did not know thee were an authority on that."

"Later, Lucy," he said. "Later."

"Then I will peep into thy library," she decided. "Is not this it?"

She started to the other door, opening into the room where the Count was whiling the time away and contenting his soul with such patience as he could muster.

"No, no!" Harry said, almost frantically, catching Lucy's arm. "Not now!"

"But why, Harry?"

"I—I've got a little surprise in there for you, Lucy."

"A surprise? Oh, surprise me now!"

"That would spoil it all," he assured her, feeling that his ruse was working.

"How can it surprise me later, when I know it is to be a surprise, anyway?" she asked, with feminine logic.

"Well—it will be a surprise—and I —that is—"

"Now, Harry, thee has aroused my curiosity. I will see now."

"No," he told her, firmly. "Not now. Later."

"But now, Harry."

"Oh, come, Lucy," he said, with a man's usual lack of judgment. "Be reasonable."

"Ah, thee call me unreasonable! Oh, if father knew that already thee had called me that!" she pouted.

"No, no. I didn't say you were unreasonable. I just—just asked you to be reasonable."

"But that is the same thing!" She stamped her little foot with the words.

"Lucy, you misjudge me," he said, solemnly. "I simply was not ready for you to look in there yet."

"Alas!" Lucy almost wept. "To think that we have had our first quarrel already!"

Harry came near to her and murmured:

"Well, let us make up. One kiss to show me you forgive me."

"Nay, Harry," she protested, but not very forcibly. "Thee knowest I do not approve of that."

"How can you approve of a thing until you have it?" Harry wanted to know. And then—

Socrates Primmer, hat box in hand, appeared in the doorway, and what he saw sent his heart thumping to his boot heels.

"Woe is me!" he said, sadly. "The time to give her my present is not yet."

And as he turned to go he collided with Carolyn. That plump young lady accepted his apology gaily, and left him still delivering it as he went on down the hall, while she rushed to Lucy and greeted her effusively.

"We're going to have the jolliest time ever!" Carolyn cried delightedly. "Come. Leave Harry to his own miserable company, and I'll show you your room."

As she turned, she remembered something.

"Harry," she said, "I want some pillows out of your room."

Carolyn rushed to the door of Harry's bedroom and seized the knob. Harry sank weakly into a chair and awaited the blow.

"It's all over," he said to himself. Carolyn tried the door, but it would not open.

"Why, Harry!" she said. "Your room is locked."

"Eh? Oh! What?" Harry said. "Locked? Now, who could have locked it?"

He fumbled in his pockets, meanwhile listening acutely for the sound which would tell him that Mrs. Blazes was presenting herself. But, blessings upon her head! She did no such thing. With a gasp of relief Harry said:

"I've left the key somewhere. I'll look for it after while."

Lucy looked at Carolyn with an awe-stricken face.

"Is that Harry's bedroom?" she asked, in horrified tones.

"Why, yes!" Carolyn answered.

"And I desired to see it! Oh! Harry, what must thee think of me. And how nice it was of thee to tell me it was only a junk room."

She went out with Carolyn, leaving Harry sunk dejectedly in a big chair. After the girls were gone he looked apprehensively first at one door, then at the other. Slowly he shook his head, trying to fathom the muddle into which he had plunged himself.

"If I had tried to fix this up for myself," he said, sighing deeply, "it couldn't have been worse."

But it could be—and was about to be—much worse.

CHAPTER V.

Unannounced, there entered the room a slender woman, whose face was half hidden by a huge, flopping, bushel-basket type of hat, the brim of which was draped with flaunting, flapping lace, and from whose crown lifted into the air a gorgeous array of feathers and ribbons and flowers. A tight-fitting gown, with the skirt so hobbled that her steps were painfully mincing, encased her form, and from behind her drifted the most remarkable train that ever was. She tottered in on her high-heeled shoes and peered about the place with a mingling of coyness and assurance that was amazing. Harry looked up, saw her, and groaned. Then he lapsed back further into the chair and mentally gave himself up to the inevitable with the words:

"Ye gods! Daphne Daffington!"

She looked him over coolly, and said:

"You!"

He nodded his head weakly. Things had been piling themselves up too rapidly for him to be able to face the situation with any assurance whatever.

"After all these years!" she exclaimed. "To find you at last. Where have you been all this time?"

"Oh"—confusedly—"I've been here and there—first at home and then away off."

"Well," she said, pursing her lips determinedly, "you're away off if you think you can shake me as easily now as you did the last time."

"Well, Let Us Make Up. One Kiss to Show Me You Forgive Me."

"I'm sorry, Daphne," Harry told her. "I know you have a right to think harshly of me."

"A right!" she said, scornfully.

"I know," he confessed, "that you think I treated you shabbily."

"Shabbily?" she sniffed. "You only call it shabby to ask me to go to a ball game, and leave me under an awning in a pouring rain—and that's the last I see of you in two whole, long, weary years!"

Harry squirmed.

"I guess that wasn't right, Daphne," he acknowledged.

"You said you were going for a cab," she accused him.

Harry jumped up suddenly.

"I'll go and get you one now," he offered.

Daphne stopped him with a steely glance, and demanded:

"Where's that hat I sent here?"

Harry stared at her for the moment with utter blankness. Then it slowly filtered through his brain that she was the milliner to whom Mrs. Blazes had telephoned. Daphne misinterpreted his stare for one of admiration, and with a remarkable imitation of shyness, she asked:

"Do you think my new gown is becoming, really?"

"It's a beaut," Harry informed her. "It's a beaut. How do you get it on? With a shoe horn?"

"There you go again!" Daphne said, accusingly. "You were always so full of sarcasm that you acted sour. I want that hat I sent over here."

"You never sent any hat here."

"Yes, I did. A yellow hat, trimmed with red poppies. It was a duplicate of an imported model that I sold to one of my best patrons."

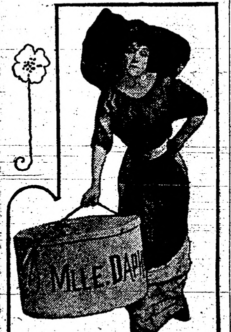
"I've heard of that hat," Harry mused. Then he said, brightly: "Why, you're not the renowned Mlle. Daphne, the milliner, are you?"

"None other," preened Daphne. "You see, I have risen to fame and achieved my ambitions, while you have been content to remain in obscurity."

"To my sorrow," Harry replied, "that is too true, Daphne. But about the hat, I really know nothing of it. There must be a mistake."

"It came here, all right," Daphne replied. "The party who got it wouldn't give his name. He just gave this number."

"Well, I wish such a hat were here.



"Ye Gods! Daphne Daffington!"

The messenger must have taken it to the wrong house. Now, Daphne, I want just such a hat as that, and I'll pay you a good price for it."

Daphne shook her head judicially, and fluttered her hands as though she had been asked to pluck a few stars from the sky.

"I can't make another," she said. "There aren't any more like the original. I had two models, but they're both gone. One I sold to Mrs. Blazes—"

"Mrs. Blazes!" Harry interrupted.

"Yes," Daphne said, "Mrs. General Blazes."

Harry looked at the door of his room, expecting Mrs. Blazes to come forth and enter the discussion. What construction Daphne might put on her presence, concealed, in his house, he feared to imagine. This, coupled with his old flirtation with Daphne, and her sensistively jealous disposition, would be sure to make things unpleasant for him. And, further, if she learned that Lucy was here, and discovered his fondness for Lucy, he knew mighty well what sort of a row she would kick up. He trembled at the thought. Daphne saw his trepidation.

"Why?" she asked. "What is Mrs. Blazes to you?"

"Nothing," Harry said, fervently. "Absolutely nothing."

"Well, you acted queer. You always did act queer," Daphne said. "Anyway, the other hat was sent here, and I want to get it."

"But it isn't here," Harry assured her. "If it were, I wouldn't let you have it, because I want one like it myself. Can't you make one for me?"

"I might," Daphne said, assuming the coy air that she fancied to be so irresistible. "Why do you want a hat? Is it for your sister?"

"No, Daphne. You see, it's this way. I—I'm to have a guest—two guests. A young lady I'm greatly interested in—you see, it has been so long since we parted that I am sure you have forgotten me—and so—well, this young lady is to visit my sister and—well, I've got to get that hat."

"Is the hat for her?" Daphne asked, interestedly.

(TO BE CONTINUED.)

Enlightened.

"Pa," said little Frank, as he turned the pages of his history, "can I ask a question?"

"What is it, my son?" asked his father, without looking up from his sporting page.

"How did the cliff dwellers keep warm in the winter time?"

"Why, I guess they used the mountain ranges. Now, don't ask me any more foolish questions."

Only Once.

"How often, my good man," said the stranger at the wayside station, "do the trains stop here?"

"The trains stop here," said the sour station porter, "only once. After that they start."—Stray Stories.

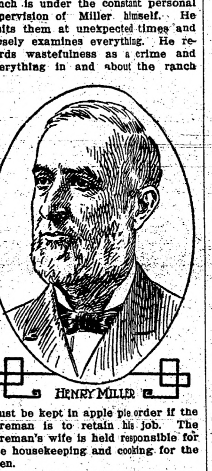
GREAT CATTLE KING

Owns Millions of Acres of Land in Three States.

Ranches of Henry Miller Are Veritable Paradises for Tramps—Once Bought All the Sheep in Nevada.

San Francisco, Cal.—The cattle king of the country is Henry Miller, who owns millions of acres in California, Nevada and Oregon. Most of this land is used for cattle and sheep ranges but about 30 per cent. is cultivated, the crops being used to fatten live stock. Cattle raising is his business and he has made a tremendous success of it, and is worth $20,000,000. He buys cattle and sheep and hogs, lean or fat, runs them on his own ranches, shipping them from ranch to ranch to utilize all the grass and stubble, puts his own grain into them, and when they go to market they always make a profit. He buys in tremendous quantities. He once ordered his head sheep foreman to buy all the sheep for sale in Nevada at any reasonable price. The foreman bought all but 15,000 head, which were held at five dollars apiece, which he thought was too high. He reported to Mr. Miller in southern California. Without a pause Mr. Miller said "Take the next train to Nevada and buy them."

His ranches are models of neatness and order and thrifty management. Every one of them is under Mr. Miller's direct, personal supervision and for forty years he has been traveling from ranch to ranch, inspecting his property, directing the planting of crops and the movement of his herds, buying and selling. Each ranch is managed by a foreman who has sub-foremen for the farming and for the care of the cattle and the sheep. Over several ranches constituting a group is a superintendent. But every ranch is under the constant personal supervision of Miller himself. He visits them at unexpected times and closely examines everything. He regards wastefulness as a crime and everything in and about the ranch must be kept in apple pie order if the foreman is to retain his job. The foreman's wife is held responsible for the housekeeping and cooking for the men.



HENRY MILLER

Despite his habit of close supervision, he allows great freedom of action to his most trusted higher employes. He is often generous to people who have no claims upon him. The cook at every ranch has orders to feed every person who stops there hungry—and to ask no questions. Anybody who reaches one of his ranches at night may stable and feed his horses, lodge in the ranch house, and eat with the employes, without charge and without question. A man who needs meat may kill a sheep or a calf from Mr. Miller's herds, provided he uses the meat himself and does not sell it. Of course, these things are more than generosity; they are a protection against the spite of tramps and the depredations of thieves; but they indicate a pretty broad-minded man, too.

He has to make concessions to necessity in other ways; he is known by everybody and he has to travel thousands of miles alone through a wild country. He is frequently held up and robbed in consequence; but he never attempts resistance nor reports such incidents to the officers of the law. If he did, the next man who robbed him would probably kill him, so he usually carries only a little money, and charges the robberies to profit and loss.

Once he was robbed in Pacheco pass by a Mexican, who took $200 from him. Mr. Miller knew the man, and reminded him that he was a long way from home and asked the highwayman to lend him enough for expenses. The Mexican handed back a $20 gold piece and disappeared. Several years later Mr. Miller saw him on the street in Hanford and offered him $20.

"I borrowed this from you once," he said.

"I never saw you before," said the Mexican.

"Oh, yes, you did. I borrowed $20 from you in Pacheco pass, three years ago."

And he made him take it.

But he is a fighter, too. He has "lawed" more, as the old-timers say, than any man on the coast. He employs an attorney in nearly every town near his ranches, and he will fight any legal dispute to the last resort.

PHILOSOPHY TO THE RESCUE

Pat Went Without His Steak, But at That Everything Was Not Lost.

Charles Nagel, secretary of commerce and labor, says the Irish race has, in addition to its sentiment and romance, a lot of philosophy as one of its characteristics.

"The best illustration I ever heard of this," he explained to a dinner party one evening, "was the case of a poor Irishman who had been given a fine, juicy piece of steak. Being a religious man, he placed the steak in front of him, and there, in the shade of the trees surrounding his benefactor's house, he folded his hands, closed his eyes, and gave thanks to heaven for the meal. When he was in the attitude of prayer, a dog rushed up and captured the steak. Pat looked around in time to see the food disappearing over the hill.

"'Thank heaven,' he exclaimed, again closing his eyes, 'he left me my appetite!'"—The Sunday Magazine.

NEW STRENGTH FOR BAD BACKS.

Those who suffer with backache, headache, dizziness and that constant, dull, tired feeling will find comfort in the advice of Mrs. C. S. Tyler, Cando, N. Dak., who says: "My back became terribly sore and lame. I was tired and restless and would arise so exhausted I could scarcely dress. The kidney secretions were terribly annoying and my feet became so swollen I could not wear my shoes. Nothing helped me until I began using Doan's Kidney Pills. They gave me prompt relief and in a short time I was entirely cured."

Remember the name—Doan's.

THAT AWFUL BACKACHE

Cured by Lydia E. Pinkham's Vegetable Compound

Morton's Gap, Kentucky.—"I suffered two years with female disorders, my health was very bad and I had a continual backache which was simply awful. I could not stand on my feet long enough to cook a meal's victuals without my back nearly killing me, and I would have such dragging sensations I could hardly bear it. I had soreness in each side, could not stand tight clothing, and was irregular. I was completely run down. On advice I took Lydia E. Pinkham's Vegetable Compound and Liver Pills and am enjoying good health. It is now more than two years and I have not had an ache or pain since. I do all my own work, washing and everything, and never have the backache any more. I think your medicine is grand and I praise it to all my neighbors. If you think my testimony will help others you may publish it."—Mrs. Ollie Woodall, Morton's Gap, Kentucky.

Backache is a symptom of organic weakness or derangement. If you have backache don't neglect it. To get permanent relief you must reach the root of the trouble. Nothing we know of will do this so surely as Lydia E. Pinkham's Compound.

Write to Mrs. Pinkham, at Lynn, Mass., for special advice. Your letter will be absolutely confidential, and the advice free.

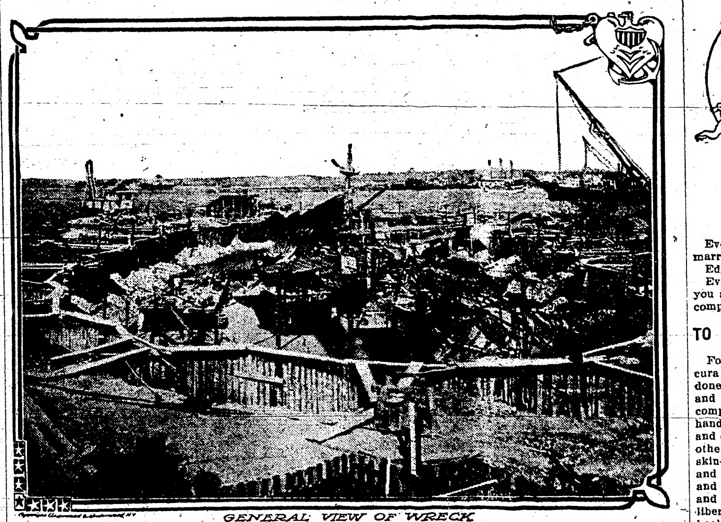
WRECK OF THE MAINE IN THE COFFERDAM.



GENERAL VIEW OF WRECK

THIS remarkable protograph shows the general view of the wreck of the Maine, when there was only five feet of water inside the cofferdam. Aside from the effort to determine the actual cause of the explosion that destroyed the battleship, the chief interest centers in the recovery of the bodies of victims. Sixteen have been found, but none of them could be identified.

SOME MICROBE TIPS

Lousiana "Bug" Car Stops in Chicago on Way Home.

Special Was Started Out Last Fall With Intention of Bringing Education to Doors of Citizens of State.

Chicago.—Ordinary germ-infected house flies caused the death of a guinea pig in twenty-four hours.

A baby under the same conditions would be killed in about twice this time.

Laziness is a disease caused by the hook worm and can be cured by proper medical treatment. The use of coal tar from which is extracted dye of a poisonous character, is permitted by the government as coloring matter for candy.

We eat too many kinds of foods.

These are some of the things that can be learned from a visit to the "Microbe Special" know nas the "Bug Car," as the exhibit under charge of officials of the state board of health of Louisiana is known, which arrived at the Park Row station the other day. The exhibit is contained in two special coaches and remained for two days, so that Chicago people could see what is being done in the south for the promotion of public health.

The "special," in charge of Dr. Oscar Dowling, president of the state board of health of Louisiana, was started out from New Orleans November 5 last year, as a means of bringing education to the very doors of the inhabitants of the state. It has been going on ever since and arrived in Chicago on the return trip from Los Angeles.

Miss Agnes Morris, in charge of the publicity department of the expedition, showed specimens illustrating ravages of diseases and talked about her particular department—domestic and school hygiene.

"Here are some fly tracks," said Miss Morris, pointing to blocks of wood covered with wax, "and here is a dead guinea pig in this jar of fluid."

Then Miss Morris told how germs from the flies in their tracks over the wax had been collected and the culture used to infect a guinea pig, which died in less than a day.

"The same principle, it was explained, would apply to a larger animal, an estimate of 48 hours being given for fatal results to an infant. From this illustration was drawn the necessity of protecting, with mosquito netting, infants and food from the ravages of the ordinary house fly. Paper wrappings for bread and other edibles, even down to a lemonade straw, were advised.

"And do not forget to swat 'em," came in conclusion.

Here are the rules prescribed by Dr. Dowling to guard most effectively against the "plague:"

Clean Air—Plenty of it night and day.

Clean Houses—Clean of dust and dirt and full of sunshine and fresh air.

Clean Foods—Plain and nourishing; eat slowly.

Clean Body—Use plenty of soap and water and invigorating baths.

Clean Morals—Intemperance and dissipation make the bed for tuberculosis to lie in.

New Orleans has discarded the deadly drinking cup and the public towel, which are prohibited in Illinois. Substitutes for these menaces to public health are shown—a paper roller towel and a bubbling drinking cup having been installed in nearly all public places.

Worsted garments, varying from sweaters to bay socks hanging to a clothes line, were used as object lessons against eating colored candies. The garments had been colored red, green and pink, from mineral dyes, extracted from such kinds of candy as is daily at the disposal of school children.

Jars of the candy, against which warning was issued, and bottle of liquid dye, which had been extracted from the candy in hues matching the garments on the clothes line, told the rest of the story.

On the case containing the dyes extracted from the candy, was this label:

"The government permits the use of these coal tar dyes."

"This candy is injurious and absolutely poisonous to the person who eats it," said Miss Morris. "And to think that the government permits it!"

Dr. George B. Young, health commissioner of Chicago, was a visitor to the "microbe special," and expressed great interest in the novel methods in use.

BUILDS ROOF IN HIS SLEEP

Workman Is Surprised at Wielding Hammer When Noise Attracts Others—Tacked Three Rows.

Wooster, O.—John Hoover, tinner, employed by Jacob Kauffman in Wayne county, is the prize somnambulist. The other day Kauffman was engaged in putting a roof on a barn near Reedsburg. Rain stopped him and he spent the night in the barn with his employes. They intended to finish the work in the morning.

Kauffman was awakened during the night by sounds from the roof and found Hoover at work. When Hoover came down for more tin he dropped a hammer on his foot. He rubbed his eyes and looked surprised. He had tacked on three rows of tin while asleep.

The workmanship was perfect.

ANGLER CATCHES GIANT CARP

Fish Weighing More Than Sixteen Pounds Is Landed by Englishman With Rod and Line.

London.—Hugh T. Sheringham, angling editor of the Field, probably caught the carp of his life, and certainly one of the largest, if not the largest, ever taken by rod and line in this country. It was caught in one of the Highbury Angling society's waters, Cheshunt (Herts) reservoir, and weighed sixteen pounds five ounces, was thirty inches long and twenty-one inches in girth, and gave great sport.

This more than makes up for the disappointment anglers experienced when they learned that the fifteen pound carp reported as taken from the Tiverton (Devon) canal on June 16 last was not caught by an angler, but shot in mistake for a big pike which had been devouring a farmer's ducks. Carp of over twenty-five pounds have been taken in this country, but not on rod and line.

SWALLOWED A PIECE OF GUM

Startled Gum-Chewer, Reproved by Court, Nearly Chokes Before He Can Explain to Judge.

Easton, Pa.—While presiding over a case in court here the other day Judge Staples of Monroe county, who is sitting in the absence of Judge Scott, took exception to the gum-chewing activities of a young man on the witness stand.

"Stop chewing that gum!" ordered the court sharply. The witness made no motion to remove the big wad that had distorted his cheek.

"Did you hear what I said? Remove that gum!" repeated the court, more sternly than before.

With flushed face and in a choking voice the witness replied: "Judge, I swallowed it!"

The court itself was forced to join in the laugh than followed.

Locusts Provide Fat Fare

Pigs, Game and Poultry Gorge on Seventeen-Year Pest—Ducks Can Hardly Waddle Back Home.

Stroudsburg, Pa.—County correspondents are sending in some rather remarkable tales concerning the 17-year-old locusts. The west end of this county seems to be the most affected. A Broadheadsville scribe writes:

"These locusts are turning some sections of the West end into a little Egypt, minus the darkness. For weeks before the hosts came out of the ground many were dug up by skunks, foxes and groundhogs as food, and these animals are living on locusts yet. Young groundhogs, highly esteemed as roasts by many people, will be fatter than ever, but whether the flavor imparted by locusts will be as delicate as that of clover blossoms on which young groundhogs are wont to feed remains to be seen.

"Crows, blackbirds and catbirds have bothered the cornfields a bit other years, but this year have left them for the locusts. Pheasants are also feeding fat on them. Nearly the whole feathered tribe revel in the swarms of locusts. The piping quail have been lured from the orchards. The robin is about the only bird big enough to eat the locust that prefers the farmer, with his strawberries and cherries. Turkeys, losing their fondness for bugs, beetles and grasshoppers, have chosen the locusts. On the Weir Mountain plateau women go out into the woods with baskets, which they shake full of locusts from the bushes and take them home for the pigs. At many places they are gathered for the chickens. Out in Polk township there are ducks that leave the barnyard every morning for a neck of woods not far away, and there become so stuffed with locusts that they can hardly waddle home.

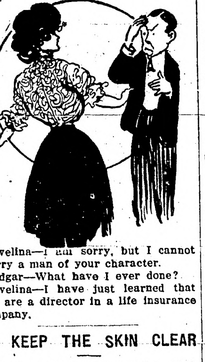
"Along McMichael's creek bushes become so loaded with this pest as to break and fall into the water, where the trout make a feast from the insects. Farmers driving through woods often have to stop and get brush to knock them off the horses; cows in the fields are greatly annoyed by them. A young son of Peter Koehler plowing in a small field surrounded by woods on the Ross township slope of Weir mountain, says at times the air is loaded with locusts and the sun is darkened."

BRACED NERVE WITH SMOKE

Searchers Find Brakeman Beside Track Calling for Help and Evidently Enjoying Cigarettes.

Woodstock, Va.—Henry Fadeley, a brakeman on a southern freight, fell from the train while it was running and crushed one foot so that amputation was necessary. Fadeley showed wonderful nerve when he realized that he probably would bleed to death, and made a tourniquet of his suspenders that stopped the flow of blood. He was not missed by his crew until the train had arrived at the end of its run, Strasburg Junction. A search found him beside the track, calling for help and smoking cigarettes.

HIS CRIME.



Evelina—I am sorry, but I cannot marry a man of your character.

Edgar—What have I ever done?

Evelina—I have just learned that you are a director in a life insurance company.

TO KEEP THE SKIN CLEAR

For more than a generation, Cuticura Soap and Cuticura Ointment have done more for pimples, blackheads and other unsightly conditions of the complexion, red, rough, chapped hands, dandruff, itching, scaly scalps, and dry, thin and falling hair than any other method. They do even more for skin-tortured and disfigured infants and children. Although Cuticura Soap and Ointment are sold by druggists and dealers throughout the world, a liberal sample of each, with 32-page book on the care of the skin and hair will be sent post-free, on application to "Cuticura," Dept. 22 L, Boston.

A Mystery.

He (during the spat)—Well, if you want to know it, I married you for your money.

She—I wish I could tell as easily what I married you for.—Boston Transcript.

A man who helps to circulate a piece of gossip is as bad as the one who originated it.—Jerrold.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

The hero is he who is immovably centered.—Emerson.

Cement Talk No. 1

Buyers of *Portland cement* should remember that there are various brands of *Portland cement* on the market and that all *Portland cement* is not the same. Every manufacturer prints on the sacks the name of the brand and the trade mark. If you find the trade mark printed above and the name *Universal* on the *cement* sacks, you may know it is the best *Portland cement* possible to make. *Good concrete* depends on good workmanship and good materials. Care and experience make for good workmanship. Good sand and gravel or crushed stone are obtainable quite cheap. With these you may feel absolutely safe, if you use *Universal Portland Cement*. It is always uniform, of good color, great strength and works easily. If you need *cement*, use *Universal*. Most dealers handle *Universal*. If yours does not, write us.

UNIVERSAL PORTLAND CEMENT CO.

The KITCHEN CABINET

LAUGH and the world laughs with you,
Weep, and you weep alone.
This grave old earth has need of your mirth,
It has troubles enough of its own.
—E. W. Wilcox.

People and flowers just naturally turn to the sunshine.

MAKING WORK EFFECTIVE.

In this day of specialists and specializing we hear so much of making everything count. There is no work, profession or business where this is more important than in home-making.

How necessary it is that the housekeeper should be trained to make every move count in order to save strength and temper. "To make her head save her heels," as our grandmothers would say.

The trained woman, one who loves her work, does her task as perfectly as she knows how to do. There is no slipshod work; things sometimes must be left undone because of circumstances, but the machinery of her home moves noiselessly because it is oiled with brains. A great painter was once asked "with what do you mix your colors?" He replied: "With brains."

The woman with trained mind begins with her appearance, wearing garments suitable to her station and work, knowing that she must be neat first and always. Because a dress is made for a work dress does not mean that it need be unattractive, for the simple little one-piece gowns with cuffs and turnover collar of contrasting material are most becoming. If one has work to do that will soil a gown, have the big-sleeved apron to slip on, and when called away it may be quickly slipped off, and one need never be ashamed of one's appearance.

The trained woman wastes no time. She rises early, "while it is yet night (for many), and giveth the meat to her household and a portion to her maidens."

It is wonderful what may be accomplished by systematic regular application. Have a book or paper at hand when resting; read the article or joke or lecture that will refresh the mind and improve it.

The workbasket with the piece of work always ready to pick up sees much work done in odd moments.

Last, but most important, she fills her mind and heart so full of the many beautiful and wonderful things about her that she has no time to think the disagreeable, gossipy things which mar so many otherwise beautiful lives.

TO HAVE what we want is riches; but to be able to do without, is power.
—George McDonald.

IDEAS ON SALAD MAKING.

The seasoning of a salad with the dressing with which it is served are very important. A potato salad is often tasteless and unpalatable because it is not properly seasoned. Potato needs a dressing to stand over it, to season well, much longer than any other vegetable. Taste the salad while preparing it, measurements are not always accurate tests for good seasoning. Much tasting means less wasting. A salad that may be prepared the day before is one most welcome as it saves the time for other things. The following is a good one:

Soak one-half a box of gelatine in one-half cup of cold water; add two cupfuls and a half of boiling water, then three teaspoonfuls of beef extract, a teaspoon of onion juice and a dash of salt. When cool, add a cupful of minced chicken, a dozen olives chopped fine, a half cup of pecan meats and half a cup of strained tomato. Pour into a mold and serve cut in cubes on lettuce leaves with mayonnaise dressing.

Pear Salad.—For a simple salad this is delicious. Wipe pears and cut into eighths, lengthwise; remove seeds. Arrange on lettuce leaves, pour over French dressing and garnish with strips of red pepper. The canned red peppers are those used in the recipe, if the fresh ones are not in the market.

The addition of a little sour apple to a potato salad adds to its palatability.

Do not put French dressing on lettuce until ready to serve, as it soon loses its crispness, after the oil and vinegar are added.

Lettuce may be kept for days in the ice chest if wrapped in a cloth and then in a paper to exclude the air.

If an ear of corn is left from dinner save it and add it to the vegetable salad for the next day. Corn is especially good in a potato salad.

Cottage cheese seasoned with chopped chives and served on lettuce leaves with a French or a boiled dressing, is a most wholesome salad. If a more elaborate one is desired, a teaspoonful of bar le duc currants will make it quite elegant.

WHAT time is it?
Time to do well,
Time to live better,
Give up that grudge,
Answer that letter.

PRESERVES AND PICKLES.

One of the finest of preserves are those made from the yellow pear tomato. Wipe the tomatoes, cover with boiling water and let stand until the skins are easily removed. Measure pound for pound of sugar and fruit; cover and let stand over night. In the morning pour off the sirup and boil until quite thick; skim, then add the tomatoes, two ounces of preserved ginger and two lemons which have been sliced with the seeds removed. Cook until the tomatoes have a transparent appearance.

Damson Preserves.—Wipe the plums with a cloth wrung out of cold water, and prick each one five or six times with a darning needle; then weigh. Make a sirup by boiling three-fourths their weight in sugar with water, allowing a cup to each pound of sugar. Cook until soft. A good plan is to use two kettles that the work may be more quickly done, and the sirup need not cook too long. Put into stone or glass jars.

Sweet Pickled Peaches.—Boil together a pint of vinegar, two pounds of brown sugar and an ounce of stick cinnamon for twenty minutes. Dip a half peck of peaches into boiling water, then rub off the fuzz with a towel. Stick four cloves in each peach and drop them into the hot sirup, using a few at a time. When soft and well scalded, put into the jar and pour over the boiling hot sirup. Cover and put in a cool place. This sirup is a great improvement to mince pies if a little is added to each pie, or to mincemeat when making it. Pears, apples and other fruits are pickled, using the above proportions.

Quince Honey.—Pare and core quinces, chop fine; allow an equal measure of sugar to the fruit; add a half cup of water to a pound of the sugar, and cook until thick and honey like. Put into glasses and cover, as for jelly.

DEAR is my friend, yet from my foe as from my friend comes good,
My friend shows what I can do, and my foe, what I should.
—Schiller.

Oh for a book and a shady nook.

PUNCHES FOR PARTIES.

When serving a drink for a large company, it is always wise to use small bottles of effervescing water, adding a pint at a time rather than a quart bottle, as it soon loses its sparkle unless often renewed.

Ginger Punch.—From a quart jar of canton ginger take three-quarters of a pound of the ginger, chop fine, add a quart of cold water and a cup of sugar; boil twenty minutes, then add three-fourths of a cup of orange juice, half a cup of lemon juice and three tablespoonfuls of ginger sirup. Strain and pour over large pieces of cracked ice in the punch bowl. Add a pint of Apollinaris water when beginning to serve and later add more as it loses its sparkle. This amount will serve forty people.

Fruit Punch.—Boil together a quart of water and two cups of sugar until clear; add a cup of tea infusion and cool, then add two cups of raspberry sirup, the juice of five oranges and five lemons, a can of pineapple and a cup of maraschino cherries. Pour over cracked ice in a punch bowl, add a pint of Apollinaris and later another pint or two. This serves fifty people.

German Punch.—Mix together and cook a cup and three-fourths of tomatoes, three chopped apples, a small piece of ginger root, two cups of water and a cup of sugar. After thirty minutes' cooking rub through a sieve and add three tablespoonfuls each of orange juice, lemon and grape juice. Freeze to a mush.

Delicious little cakes to serve with punches are made by using any rich white cooky dough; roll out and cut in small cubes, and on each place a half teaspoonful of almond paste before putting into the oven. This paste may be bought in cans, but as it is rather expensive, when using a small quantity it is best to buy it of the confectioner.

Nellie Maxwell.

A Motive Indorsed.

"I don't blame that cook of ours for wanting more salary," remarked Mr. Growcher.

"But you always are complaining of the food she prepares."

"Certainly. She undoubtedly wants a larger income so that she can afford to eat at a restaurant."

Consulted.

"Does your boss ever consult you on matters of business?"

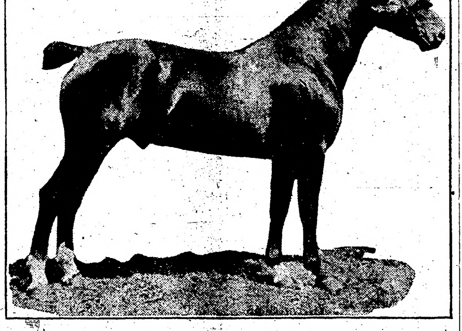
"Yes, he consulted me on a matter of business only today."

"That's fine! What was it?"

"He asked me what in thunder I thought he was paying me for?"

EXERCISE CARE IN SELECTING PARENT STOCK FOR BREEDING

Breeders Do Not Give Sufficient Thought to Individuality, Size, Bone, Substance and Soundness—Temper or Temperament Not Considered, Speed Being One Object Sought for.



A Good Horse of His Breed—A Hackney.

(By CAPT. A. H. WADDELL.)

If we are good judges of human nature, or able to judge others by their biographers, we should feel very much inclined to lay a $10 bill to a 10c piece that the wily "Richard" who once made himself hoarse shouting "A Horse, a Horse, my Kingdom for a Horse," wanted a good one.

Richard had just killed five Richmonds, or thought he had, and was looking for another when his horse was killed under him, and when he uttered his memorable words. Yes, he wanted a horse and he wanted one badly enough, but, he wanted a good one.

A good horse was what he wanted, good horses are what we all want, and it is only the large breeder who can really tell us, how many bad horses he breeds, for one good one that he sells. This is in large measure due to haphazard methods in breeding; breeders are not careful enough in the selection of their parent stock, nor do they take pains enough to ascertain the peculiarities and characteristics of the families from which the parent stock comes.

In the trotting horse everything has been neglected for speed, and in the thoroughbred in this country, nothing but this element has been considered; the result is too well known to be recapitulated. Notwithstanding this nobody seems to try to remedy the defects that this near sightedness has produced. There is not one trotting horse in a thousand whose anatomical formation, physical and constitutional soundness, will permit him to become a 2:10 trotter, nor is there one race horse in the same number that can gallop a mile in first class company with any chance of winning, for the same reason.

Breeders no not give sufficient care to individuality, size, bone, substance, and soundness; they never think of temper or temperament and only consider speed, which, although inherited on both sides is useless in a weakling.

Stamps and types of horses and ponies have been bred which are well exemplified in the Shire, Clydesdale, Suffolk, Percheron, Belgium and Hackney. Why cannot this obtain in some measure at least in the trotter and thoroughbred in America? It does in other countries and why should it not here, in the greatest and most lavishly, bestowed by nature for the purpose?

The American is the best business man in the world, as good a horseman as can be produced anywhere, and is always looking for the straightest way of getting to a certain point, and has certainly succeeded in surprising the world in this direction. He has produced the most extraordinary light harness horse that has ever been heard of, when speed alone is considered, and also some of the fastest thoroughbreds, and it seems that the time has not arrived when more care should be shown in the selection of horses for breeding purposes, so as to be able to produce sounder, bigger, and better individuals.

SUMMER WORK FOR CHICKENS

Where There Is Not Perfectly Comfortable Poultry House on Farm One Should be Provided This Summer.

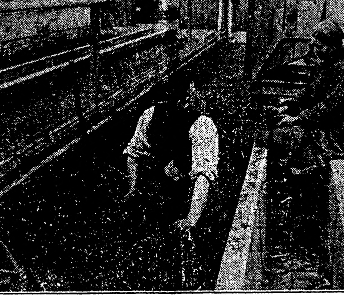
(By MILLER PUVIS.)

If there is not a perfectly comfortable poultry house on the farm, one should be planned and provided this summer, at least before cold weather sets in, for it is poor planning to put off providing a warm poultry house until the time arrives for its use. A comfortable poultry house need not be a costly one nor a particularly warm one. Every poultry house should have two rooms with a tight partition between them. If it is build in this way, the flock may be crowded into one room when very cold weather comes, and the heat of their bodies will keep the room warm. A hen does not feel the cold as quickly as a man does, for her blood is five per cent. warmer naturally, and if she can sleep where there is no draft blowing on her she will be very comfortable in a room in which the temperature runs as low as 10 to 12 degrees below the freezing point.

Sheep Will Eat Roots.

If too many sheep are confined on a pasture they will eat the grass roots right out of the ground.

ASPARAGUS PLANT IS HARDY



Asparagus may be started from seed and come into size for table use at the third year. Seed may be planted as late as mid-summer.

It requires about six weeks for the seed to germinate and come up. The young plants may be cultivated in rows as other garden vegetables and set in permanent rows or beds this fall or next spring.

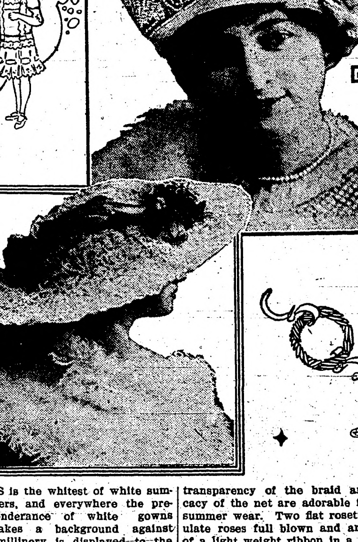
The asparagus plant is doubly useful. The young shoots can be used for food and the foliage branches for decoration. Sprays of asparagus are equaled by few other plants for their pleasing effect in decoration.

The plants are very hardy, will stand all kinds of treatment, but will respond liberally to good treatment and will thrive in one place for ten to twenty years. The illustration shows a method of planting asparagus in a French nursery house.

Green Food for Ducks.

Green oats, sweet corn fodder and rye are excellent green food for both old and young ducks.

Lovely White Hats



THIS is the whitest of white summers, and everywhere the preponderance of white gowns makes a background against which millinery is displayed to the very best advantage. The greater number of hats are white also, but not entirely. Plume-laden or flower-laden, they are adorned with exquisite colors. Pink, in the coral, seashell and other delicate tones; blue in the nattier and other grayish tints; lilac, rose, green and cerise, are favorites, and, just at the hour, yellow has put in an appearance. In any large gathering of women, out for the summer evening, these colors, in the liveliest of shades are scattered in a sea of white. For the entire costume, from shoes to chapeau, of the great majority is colorless, except for the trimmings on the hats.

Two very beautiful white hats are pictured here, which illustrate very clearly the foregoing. The small hat in white hair braid is decorated with a band of gray net on which a pattern in white beads is wrought. The transparency of the braid and delicacy of the net are adorable for midsummer wear. Two flat rosettes simulate roses full blown and are made of a light weight ribbon in a wonderful shade of pink. The rosettes are joined by a bridle of ribbon.

A rich hat in white hemp is covered with a plateau of princess lace which is fastened down with a twist of wide nattier blue ribbon having a highly lustrous surface. Small blown garden roses with foliage and some mossy stems, provide the touch of color here. Nearly half the plateau of lace is folded both from the left side and tacked to the crown, leaving the hemp braid uncovered.

Scarfs of white down and down with ostrich border finish the midsummer toilette, providing more warmth than one would imagine. In fact, they are quite equal to protecting the throat, even when their wearers are out until the "wee sma' hours," which are the coldest of the twenty-four.

JULIA BOTTOMLEY.

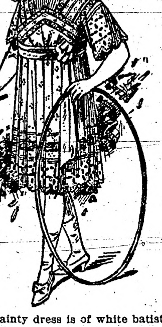
SANDWICHES EASY TO MAKE

When a Quantity Is Required, as for a Picnic, Try the Following Method.

The picnic season—hence the sandwich season—is at hand. When quantities of these unfailing requisites are required, try the following plan and see how easily this trying work can be done: Cut the crusts from a loaf of bread with four strokes of a sharp knife—front, back and sides, then cut the crustless loaf in half, butter each half where you cut the loaf, slice piece of bread from each half, put in filling and the slices will exactly fit. Proceed, cutting one slice from each side of loaf. Wrap in waxed paper, and you will have dainty, symmetrical sandwiches when the luncheon basket is opened.

Place a napkin around the top of the pineapple, give it a twist, and the stem is removed. Lay pineapple on a board and with a sharp knife (silver is preferable) cut into slices. Pare each slice as you would an apple.

DAINTY LITTLE FROCK.



This dainty dress is of white batiste elaborately trimmed with swiss embroidery and valenciennes lace.

The skirt is plaited; the blouse forms a sort of corslet and the girdle is of ribbon fastened at the side with a cockade and long ends.

BROWN SAILOR HATS LIKED

Have Achieved a Popularity Almost as Great as Has Come to the Black.

Almost as popular as the black sailor hat is the one of brown straw, or its close kin, that of burnt straw. It is especially well liked for wear with the popular brown linen suit—for brown seems to be having quite a vogue this season.

Newest, of course, are the small sailor with the large head size, the small or medium sized brim and the rather high crown. These are somewhat trying to many types of women, but look exceedingly well on the girls who are "tailorish" enough to don them.

On the black and dark brown hats white bands are the most approved and fashionable style, while the burnt straw hats are encircled by bands of darker brown.

And the smartest hats, of course, are those of the extreme straws—either very rough or quite smooth and fine.

Changeable Taffeta Garments.

Not many are yet seen, but they are expected to have a great run a little later on. One reason why they are not yet more in evidence is undoubtedly because of the price of the French chiffon qualities of which they are made. From $2.50 to $3.50 per yard is asked in the retail shops for these new taffetas. By another season domestic manufacturers will have popular-priced lines, but if one desires an exclusive silk gown for the present summer she should invest in one of changeable chiffon taffeta.

Striped Coat Set.

Fine muslin, chiffon cloth, and marquisette are all used to make collar and cuff sets for short jackets. These, with eyelet embroidered batiste, have taken the place of Irish lace, which seems at a discount these days.

The striped coat sets are in any color that one wishes, not necessarily to match the suit. The collar is quite long, deep at the back, and finished with an edge of cluny lace or a hem of colored muslin or linen to match the stripe.

Of Fascinating Quaintness.

Frock of white cachemire de soie with peachblow satin stripes. The simply designed bodice has a finely plaited fichu drapery of Malines lace, finished at the top of the wide apricot velvet girdle by a rose of pale pink chiffon. The slightly gathered skirt is quaintly trimmed with three narrow ruches of white taffeta.—Vogue.

MINNESOTA HISTORICAL SOCIETY

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, AUGUST 25, 1911 NO. 4.

TAFT VETOS WOOL

"BLEND OF AVOWED TARIFF-FOR-REVENUE AND PROTECTION MEASURES."

BUT STILL INDEFENSIBLE

Says Act Is Not in Harmony With Platform on Which He Was Elected.—Promises Data By December.

Washington, D. C. — President Taft, in a special message to the house of representatives, characterizing the wool tariff bill as a blend of an avowed tariff-for-revenue-only and anti-protection measure with a professed protection bill, vetoed the measure.

In explanation of his course President Taft said the bill was not in harmony with the platform on which he was elected. Furthermore, he declared that the American people are deeply impressed with the conviction that the interest of the consuming public can be properly guarded only by revising the tariff one schedule at a time and then upon "accurate and scientifically acquired information."

That there is a widespread belief that many of the rates in the wool schedule are too high and in excess of any needed protection for the wool grower and manufacturer is admitted by President Taft and he says he shares this belief. Asserting that December was the time fixed by both the Republican and Democratic parties in the last congress for the submission of adequate information upon schedule K, covering wool and woolens, with a view to its amendment, the president says there is no "public exigency requiring revision in August without adequate information."

After promising that the tariff board will be ready to report in December, the president argues that failure of the present bill should not be regarded, therefore, as taking away the only chance for reduction by this congress. "The message will be accepted as an indication that no tariff bill prepared in advance of a report of the tariff board upon schedules affected will be signed by the president.

The president reviewed the history of the movement for the establishment of the tariff commission or board "in order to show that the real advance and reform in tariff-making are to be found in the acquiring of accurate changes under each schedule before they are adopted, and further to show that if delay in the passage of schedule K can be had until December, congress will then be in possession of a full and satisfactory report upon the schedule.

"The business of the country rests on a protective tariff basis," he said "The public keenly realizes that a disturbance of business by a change in the tariff, and that a threat of injury to the industries of the country, ought to be avoided, and that nothing could help so much to minimize the fear of destructive changes as the known existence of a reliable source of information for legislative action.

"Schedule K is the most complicated schedule in the tariff. It classifies raw wool with different rates for different classes; it affords the manufacturer what is called a 'compensatory duty' to make up for the increased price of the raw material he has to use due to the rate on raw wool, and for the shrinkage that takes place in scouring the wool for manufacture; and it gives him, in addition, an ad valorem duty to protect him from foreign competition with cheap labor.

"If there ever was a schedule that needed consideration and investigation and elaborate explanation by experts before its amendment, it is Schedule K. There is a widespread belief that many rates in the present schedule are too high and are in excess of any needed protection for the wool grower or manufacturer. I share this belief and have so stated in several public addresses.

"But I have not sufficient data upon which I can judge how schedule K ought to be amended or how its rates ought to be reduced, in order that the new bill shall furnish the proper measure of protection and no more. Nor have I sources of information which satisfy me that the bill presented to me for signature will accomplish this result. The preliminary history of the bill is not reassuring upon this point. It was introduced and passed in the house as providing a tariff for revenue only and with the avowed purpose of departing from a protective tariff policy.

"It may well be that conditions of men in this country have changed so as to require much less protection now for the manufacturers than at the time of the Wilson bill; but in view of the possible wide suffering involved by hasty action, based on insufficient knowledge, the wise course, in my judgment, is to postpone any change for a few months needed to complete the pending inquiry.

WILEY IS A FIGUREHEAD

SAYS HE PRACTICALLY HAS GIVEN UP HIS AUTHORITY.

Says Real Heads of "His" Department Are Dunlap and McCabe.

Washington, D. C. — Dr. Harvey W. Wiley, chief of the bureau of chemistry of the agricultural department, testified before the house investigating committee that he has surrendered practically all of his authority for enforcing the pure food law to Dr. F. L. Dunlap, associate chemist, and George P. McCabe, solicitor of the agricultural department.

Overruled in two-thirds of the cases he has brought before the food and drugs inspection board, composed of these two men and himself, he declared that he had found it useless to appeal to Secretary Wilson, and had not even received an answer to one of the most important appeals he had made to the secretary.

Dr. Wiley, summoned before the committee to tell of his connection with the employment of Dr. H. H. Rusby on an alleged illegal contract, gave to the committee the most illuminating information that has been developed in the investigation now being made of the agricultural department.

"Didn't Get Rusby Letter."

He testified he had never received the letter from Dr. Rusby which was used by the personnel board to prove that he knew about the Rusby contract. He said that in using this letter, the personnel board had omitted its most essential portion, namely, the statement of Dr. Rusby that "we have agreed upon the following arrangement as fair and satisfactory, if approved by the department."

Dr. Wiley stated that Solicitor McCabe held the decisive vote on the board of food and drug inspection. When Dr. Wiley and Dr. Dunlap disagreed on questions of chemistry, it was Solicitor McCabe who decided whether a prosecution should be made. In fully one hundred cases, said Wiley, where he and Dr. Dunlap had voted together and Solicitor McCabe had disagreed with them, Dr. Dunlap changed his vote to agree with Mr. McCabe.

In two cases he did appeal, he added, where he thought public health was "seriously menaced." One of these involved the labeling of gluten flour, the food of diabetes patients. The board's decision, he believed, left physicians without sufficient information as to the exact contents and strength of the flour. In this case the secretary upheld the board.

"No Answer to Appeal."

The other case involved the labeling of fruits and fruit products which contained sulphur dioxide. This subject is now before the Remsen pure food referee board. The board, composed of three cabinet members, Secretaries MacVeagh, Wilson and Nagel, decided that manufacturers could continue to use the sulphuring process, if the fact was made clear on the label.

MILL EXPLOSION FATAL TO FOUR.

As Many Others Will Die of Injuries Sustained at Joliet Plant.

Joliet, Illinois. — Four men were killed, four were fatally injured and nine others suffered fractured arms and legs in an explosion which wrecked the moulding building at the Illinois Steel Company's plant and imprisoned 100 men. Among those who were fatally injured was Patrick Collins, a Democratic politician.

The accident occurred when a several ton label of molten metal upset on a wet floor. In an instant there was a terrific explosion which blew out the walls of the building. The roof of the wrecked building fell, imprisoning the 100 men working in the moulding room. Scalding steam swept everywhere, burning the faces and arms of nearly every man in the structure.

For more than fifteen minutes squads of rescuers fought in vain to reach the dead and injured. Those in the building who were not helplessly crippled burrowed through piles of tile and twisted iron work before they could get out. Of the men who were killed, one was buried beneath the molten metal, one was scalded to death, and two were caught beneath debris when the tile roof fell.

STORM IN ARIZONA.

Causes Two Deaths and Loss of $200,000.

Phoenix, Ariz.—Damage estimated at $200,000 was caused by a cloud burst and "twister" that swept over Winkelman and Hayden. One woman was killed and her son injured by falling timbers. The dead body of a Mexican child was found in a wrecked house. At Winkelman nearly two hundred buildings were blown down. The Mexican quarter at Hayden was destroyed and many are reported injured there.

SIMPSON RESIGNS

PRESENT ATTORNEY GENERAL NOTIFIES GOVERNOR HE WILL RETIRE JAN. 1.

L. A. SMITH SUCCESSOR

Acceptance Is Noted and an Assistant Receives the Office.—Mr. Simpson to Enter Into Law Practice.

St. Paul. — Attorney General Simpson has formally tendered his resignation to Governor Eberhart, to take effect Jan. 1, 1912. The governor accepted the resignation and offered the post to Lyndon A. Smith, of Montevideo, now an assistant attorney general, and Mr. Smith accepted.

Mr. Simpson will take up the practice of law in Minneapolis with R. J. Powell. Mr. Simpson and Mr. Powell will have several corporations as clients including the Shevlin-Carpenter interests.

Mr. Smith, who will become attorney general on Jan. 1, upon the retirement of Mr. Simpson, said:

"The office of attorney general is a great responsibility and I shall assume it realizing full well the responsibility it carries. I appreciate the honor the governor has conferred upon me. I shall do my very best."

Mr. Simpson expressed himself as pleased with the governor's choice of his successor.

HUMBIRD WORTH $5,000,000.

Estate of St. Paul Lumberman More Valuable Than Estimated.

St. Paul. — The estate of John A. Humbird, the St. Paul lumberman, who died recently, was shown to be far more valuable than was at first estimated. The safety deposit boxes in the National German American bank were opened by Thomas J. Humbird, of Spokane, son of the deceased; William H. Farnham, a son-in-law, and Frank J. Obst, representing the county treasurer.

Stocks and securities were found totaling more than $3,000,000. It is expected that the entire valuation of the estate will be about $5,000,000. The stocks represent investments in many industrial companies the worth of which is not known, and in railway companies whose stock is quoted at greatly above par.

Among the stocks are 1,500 shares of Northern Pacific, 3,000 shares of Great Northern, and 30 Southern Pacific registered bonds, valued at $300,000. There are many shares in mining companies, in lumber companies, and other enterprises in which Mr. Humbird was known to be interested. The state will profit from the inheritance tax.

MAN AND BOY KILLED.

Reports From Clinton Add Two More to List of Storm Victims.

Clinton.—In last week's storm, according to reports received here, a man near Dumont, and a boy near Holloway, were killed, being struck by flying wreckage.

The terrific wind storm, assuming at times tornado-like proportions, swept over the country north of Graceville. One man, whose name is not known here, was struck by flying debris near the village of Dumont, and instantly killed. In the town of Graceville, considerable property damage was done.

In Artichoke township the buildings on half a dozen different farms were demolished. Ole R. Pederson, one of the farmers, who suffered property loss, was also painfully injured in the storm.

From Holloway comes the report that a boy, walking along the road, was hurled against a tree by the wind and killed. All along the line of the storm damage was done to standing grain.

JUDGE BROWN, WINDOM, DIES.

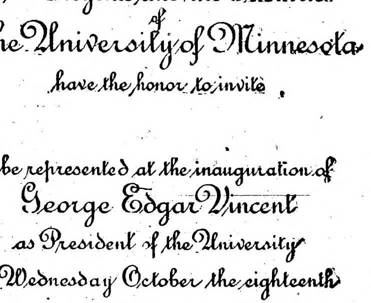
Deceased Served 15 Years on Cottonwood County Probate Bench.

Windom.—Thomas S. Brown, judge of probate of Cottonwood county, died after an illness of very short duration.

In his death this community has lost a very highly respected and loyal citizen, this being his fifteenth year as probate judge of Cottonwood county. Mr. Brown was 74 years old and was born in Scotland.

Mr. Brown had three children, Mary, who died a few years ago; Mrs. George Mathiesen and Mrs. Charles Purrington, beside two stepsons, William and Ira Hunter, and a stepdaughter, Mrs. Ella Hathiesen, and besides five brothers, S. W. Brown of West Salem, Wis.; M. M. Brown of Aneta, N. D.; J. S. Brown of Eugene, Ore.; Robert Brown of Plainfield, N. J., and John A. Brown of Windom, survive. Funeral services Thursday.

INVITATION TO THE UNIVERSITY OF MINNESOTA INAUGURAL CEREMONIES.



The Regents and the Faculties
of
The University of Minnesota
have the honor to invite

to be represented at the inauguration of
George Edgar Vincent
as President of the University
on Wednesday October the eighteenth
nineteen hundred and eleven

BID TO EDUCATIONAL FUNCTION.

The above is a reproduction of the invitation card that has been sent to 500 institutions of learning and scientific societies in the United States and over a hundred universities and colleges in Europe and the Orient to send representatives to the inauguration of Dr. George E. Vincent as president of the State University October 18, 1911. The card, which bears the seal of the university in maroon and gold at the top, will be sent to every corner of the globe and about 500 of the invitations are to be addressed personally to men of note in the United States and foreign countries.

BIG MILEAGE REBATE.

Likely to be Recovered from the Railroads.

Minnesota in all probability will recover from the several railroads in the state, which have during the past two years transported state troops to the annual encampment at an excess of 1 cent a mile, approximately $14,000, according to Attorney General Simpson.

Before the 2-cent fare became effective the roads used to transport the troops at one cent a mile, but when the 2-cent fare law was passed the roads made the state pay the same price for taking troops to camp as was paid by other persons. The legislature passed a bill ordering the roads to carry the troops at a cent a mile, but the roads refused and the state paid the full amount, half to be returned until the matter could be tested in the courts. The suit is still pending, but now that the roads have gone back to the 3-cent fare Mr. Simpson made an effort to settle the matter out of court and he believes he will be successful.

The attorney general went to Chicago to confer with the officials of the St. Paul road, and after consulting with Third Vice Presiden J. H. Hiland, a tentative promise was made that the matter would be taken up with President A. J. Earling and an agreement probably would be reached by which the road would return approximately $7,000, which is its share of the total amount. The other $7,000 will be returned by the Great Northern, Northern Pacific, Omaha and Minneapolis & St. Louis.

"I had a conference with the St. Paul people at Chicago," said the attorney general "and everything is coming along all right. I think an agreement can be reached without any difficulty for the return of the excess rates charged for transporting the militia for the two years that the 2-cent rate was in effect and during which time the railroads charged the full rate for the national guard.

Other Lines Expected to Contribute.

"The amount which will be returned by the St. Paul will be about $7,000 and the other roads will return a like amount without any difficulty, when the St. Paul makes its return. I conferred with Mr. Hiland and he promised to take the matter up with President Earling and everything will come out alright in a short time."

The total mileage charged by the several railroads approximated $28,000 during the two years in dispute.

INSURANCE GROWING.

Companies in Minnesota Show Big Increase for 1910.

Insurance companies doing business in Minnesota have shown a large increase in 1910 in number and amount of policies in effect, according to J. A. O. Preus, insurance commissioner. Figures compiled by him show the total assets of all fire and marine companies operating here increased $36,296,992.58 from 1909 to 1910.

The total assets in 1909 amounted to $492,601,290.62, and in 1910 they were $528,898,283.58. Liabilities in 1909 aggregated $338,025,662.65, and in 1910 were $362,915,171.34, an increase of $24,889,508.69.

The surplus in 1909 was $154,575,627.97 and in 1910 it aggregated $165,983,112.24, an increase of $11,407,484.27.

Capital stock and deposit capital in 1909 amounted to $72,339,000, and in 1910 aggregated $79,033,147.50.

CALL IN THE CASH.

State Treasurer's Strong Box Not Very Well Filled.

State Treasurer Walter J. Smith has written to the banks where the state's money is on deposit informing them he will have to call in some of the deposits to add to the current funds.

Since the first of August, less than two weeks, the disbursements from the state treasury have been $600,000 more than the receipts, which makes the call necessary.

The detailed statement of the state's receipts and disbursements for the fiscal year ending July 31, 1911, was completed yesterday. The total amount received was $15,612,048.79, while last year the sum was $14,810,944.43. The total disbursements this year were $16,364,789.21; last year only $13,322,963.17.

Receipts.

The receipts from the various sources are as follows: Counties, $4,244,095.26; royalties, $312,309.29; mineral leases $17,600; state institutions, $1,920,375.38; miscellaneous, $646,769.71; stumpage, $171,811.50; dairy and food commission, $7,545.78; unclaimed court deposits, $1,506.24; inebriate hospital tax, $54,614.58; bonds and interest, $1,360,305.82 inheritance tax, $459,205.70; hunters licenses, $19,696.50; fish licenses, $520.40; game and fish commission, $21,589.16; secretary of state, $11,641.50; grain inspection, $265,575.73; hay inspection, $14,651; oil inspection, $56,852.84; interest on deposits, $60,477.24; telephone companies, $125,221.83; transportation lines and express companies, $50,720.01; insurance, $411,751.92; railroads, $3,933,310.32; vessel tonnage tax, $19,571.62; incorporation fees, $68,615; insurance commissioner, $72,442.11; mortgage registration, $72,416.49; motor vehicle licenses, $30,835; school loans, $1,000,108.

Disbursements.

The disbursements were as follows: Revenue, $8,540,039.54; soldiers' relief, $126,229.49; state prison buildings, $72,325.88; road and bridge, $72,628.49; university campus, $225,881.74; permanent university fund, $73,901.42; general university, $628,853.94; internal improvement land interest, $13,290.83; swamp land, $134,628.88; swamp land interest, $59,769.90; hay inspection, $14,721.51; grain inspection, $266,997.46; drainage commission, $174,356.

BANK CASHIER IS ACCUSED.

Employe of Sleepy Eye Institution Arrested.

Sleepy Eye. — Charging Rollin M. West, cashier of Cobden state bank, with embezzlement in the sum of $9,787.04 from the said bank, State Bank Examiner Kelsey N. Chase had him arrested. This course was due to findings of Deputy Examiners Brandvold and Snyder who made an examination of the bank's condition.

The bank was closed for business and in the hands of Deputy Brandvold. From investigation it was found that funds were systematically taken from the bank for over a year. Mr. West's downfall is due to the fact that he was a big dealer in automobiles, requiring a large amount of money to conduct his business. With a large stock on hand, together with holding equities in real and personal property obtained in trades and deals, and expecting to turn his property into cash, in the capacity of cashier he took the money from the bank.

TORNADOES IN NORTH DAKOTA

NORTHWEST CORNER OF STATE FEELS THE BRUNT OF A TERRIFIC STORM.

SEVEN DEATHS ARE REPORTED

Score at Antler Believed to Be Injured.—Loraine, Mohall, Souris and McClusky Hit.—Property Damage Heavy.

Mohall, Aug. 22.—Tornadoes originating at four different points northwest of this city killed two people, a man and a girl, and caused several thousands of dollars worth of property damage. The storm traveled east. A dozen or more of farm buildings were demolished and several persons are reported injured.

Minot.—A terrific storm swet over Northwest North Dakota, killing several people and devastating property and placing the lives of many people in jeopardy. A child was killed and several picnicers injured near Antlers. The picnickers were enjoying an outing at a grove just out of town. The pleasure seekers were picked up in the air and landed hundreds of feet away in all directions. Several of them were badly injured.

According to the best information obtainable twenty-four persons were seriously injured. Telegraphic and telephonic communication with Antler is out of commission and direct information is not to be held.

All of the physicians and surgeons from Westhope and other neighborhood towns have been rushed there. From Antler the storm swept south and a trifle to the west, where it again came to the earth, uprooting trees and doing untold damage at McClusky. Three people are reported dead, there in collapsed buildings. McClusky is on the Turtle Lake branch of the Northern Pacific.

The storm was the heaviest near Sherwood and Antler and the report comes that thousands of dollars worth of property was destroyed. Heavy property damage is reported at Loraine, Mohall and Souris.

Two cyclones struck in the vicinity of Sherwood. The first took a path southeast of Sherwood, striking the farm home of Ingemar Nelson, where all the buildings were destroyed. Mr. and Mrs. Nelson and the children saved their lives by lying flat in the wheat fields.

While Elmer Carlson and wife of Sherwood were out milking their cows they noticed a heavy black cloud approaching from the southwest and started for the house, which was about a quarter of a mile distant, but before they arrived the house was swept away and their 6-year-old child killed.

Mr. Carlson sustained injuries about the head and a two-by-four scantling was driven into his side, breaking several ribs and leaving him in an unconscious condition. Mrs. Carlson was hurled several feet into the air, and while suspended was struck by a flying missile, which rendered her unconscious. It is believed that her injuries will prove fatal.

John Jeneves, a hermit who resides in the same neighborhood, was severely injured and his house was entirely demolished.

The second cyclone struck northwest of Sherwood, demolishing the buildings of Ole Johnson. Mr. and Mrs. Johnson were slightly injured. At Souris a boy was killed and at West Hope two are reported killed. Several farm buildings were blown down in the vicinity of Mohall and Loraine.

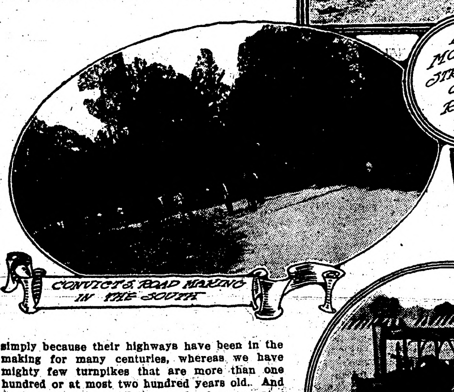
McClusky, Aug. 22. — Olaf Lee is dead and his wife and infant daughter probably fatally injured as a result of the storm which crushed their farm home ten miles from this city. Lee was found by the rescue party lying nearly 300 feet from the residence, unconscious and with his skull fractured and he lived only a short time. Mrs. Lee was conscious but was so badly injured that she could render little aid, even having to let her infant baby shift for itself, although the babe, too, was very badly injured. Lee was a member of the McClusky lodge of Masons.

Winnipeg, Aug. 22.—Winnipeg was struck by the tail-end of a storm accompanied by vivid lightning and heavy rain which apparently has swept over much of Saskatchewan and grees' in some localities and apparently most severe along the international boundary line. Hail is reported from Perdue, Sask., and farm buildings were demolished at Elmore, Sask., with one person seriously injured. Further south in North Dakota conditions appear to have been worse and reports indicate a cyclone with several fatalities.

CRUSADE for BETTER HIGHWAYS

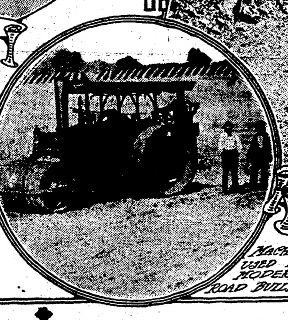
IF there is any field of public-spirited activity in the United States which stands out conspicuous above all others because of recent progress it is that which concerns itself with the betterment of our public highways. If anybody had predicted a few years back that the beginning of the second decade of the twentieth century would see so marked and widespread an improvement of the public roads of the United States he would probably have been laughed at by all save those few enthusiasts who were looked upon until a short time ago as "cranks."

A MODEL STRETCH OF ROAD



CONVICTS ROAD MAKING IN THE SOUTH

ROAD MAKING IN THE WILD WEST



MACHINERY USED IN MODERN ROAD BUILDING

BREAKING STONE FOR A NEW ROAD

This is not saying, mind you, that there is not much yet to be done to bring the highway system of this great land to the point where it ought to be and to maintain it there. We are still a very long way behind most of the countries of the old world—notably our sister republic of France—in the condition of our roads. But that is perfectly natural, not because the foreigners are any better road builders than we are, but simply because their highways have been in the making for many centuries, whereas we have mighty few turnpikes that are more than one hundred or at most two hundred years old. And furthermore on top of the youth of our country in road building there is the circumstance of the tremendous size of Uncle Sam's domain. No wonder the Europeans have been able to have good roads when half or two-thirds as many people as we have in this whole vast country have been contributing their work and their taxes to keep up the roads in a territory no larger than one of our medium size states.

But for all the lead given by time and the advantage of dense population it looks as though we would overtake our cousins overseas in the matter of the possession of good roads. Indeed, even now in some states, such as sections of Massachusetts, there are roads as fine as anything of similar character on the other side of the big pond. The secret of this boom in road building in America lies in organization as well as agitation and the country is likely to see new fruits from both during the middle week of September when a "Good Roads Week" will be held throughout the United States. This week of "missionary work" is expected to stir up a goodly share of our people on the question of good roads and it is hoped that some of the new converts and the old will that week practice what they preach to the extent of lending a hand to the building here and there of stretches of "model road" that will serve as convincing object lessons.

"Good Roads Week" is going to be held in connection with the first annual convention of the American Association for Highway Improvement which will be held at Richmond, Va., and will be addressed by many of the most prominent men in the country. This national organization will, of course, be much in the public eye in this connection, but it is only one of scores of associations great and small that have been helping in this cause. There are state organizations and county organizations and even township organizations all over the country that have been supporting our national, state and municipal governments in what they have been doing for better roads, and the results attained prove what can be accomplished when a large number of people who are very much in earnest set out to all "pull together" toward a desired goal.

A good many people who have not looked very deeply into the subject have gained the idea that the motorists are more largely responsible than any other class of people for this dawning era of good roads. Now, it would not be right to disparage what the automobilists have done, which has been considerable in one way or another, but in the interest of the truth it must be pointed out that the one factor supreme in influence for better roads has been the wide-awake farmer. To be sure it is a fact, and a mighty significant one, that the largest and most powerful corporations in the country—business interests such as our biggest railroads and the steel trust and the Standard Oil corporation—are working energetically with the new American Association for Highway Improvement because they realize that anything that will help the condition of the country at large will help their business. At the same time it is the farmer class that are supplying the backbone of this movement just as they are of every other big movement affecting rural conditions and have been from time out of mind.

It is just as well to admit right here, too, that the average farmer who is going in hard for the cause of better roads is not devoting his time and his labor to the project on any fanciful sentimental basis. Of course, it contributes to his pride to see his farm bounded or bisected by a splendid road and he is gratified that the good folk who go past his door pleasure riding should have an easy pathway, but the great underlying impetus is found in the need of good roads to enable the farmer to market his produce conveniently and economically.

The average old-time farmer was prone to look upon bad roads as a necessary evil. He realized in a sense what a detriment they were to his interests, but he put up with the situation because he did not see any way out of the dilemma—at least not without more work than he could afford to give. Then along came the United States government, when rural free delivery commenced to be introduced, and declared that these rural mail carriers could not be placed in districts where the roads were not in fair condition. This did much to awaken the farmers to the situation, for every rural home prizes the boon of a daily mail delivery. And, at about the same time the farmers, who thus had their serious attention focused upon the good roads question, found, as they looked closer, that bad roads meant a hole in the pocketbook of every tiller of the soil. It began to be realized that if a farmer required the services of four horses and an entire day's time to get a load of produce to market via bad roads the loss to him was just as serious as though he had to accept a very low price for the yield of his acres. Herein is found the supreme incentive among many that has enlisted the progressive farmer in behalf of better roads.

One of the best things accomplished for the farmer by good roads is that it has broadened his markets. With rocky or muddy highways enforcing slow progress the average farmer was in the old days restricted to one market town—the one nearest his farm. Now with good roads he can in a shorter interval than was formerly required reach any one of several communities located in different directions. This enables him to attain the market where he can get the best prices. Similarly with good roads the farmer is not likely to be so restricted to one railroad for shipping facilities. If the road nearest his farm will not give him the cars he needs or otherwise play fair he most likely has some redress by driving across the countryside to a rival line. And the very fact that the introduction of good roads is destroying such monopolies has served to render the railroads more obliging to their farmer clients.

The new country-wide Highway Improvement association which is to hold its first annual congress in the near future will not seek to drive out or supplant the various good-roads associations that have been organized all over the country and many of which are as has been said, doing an excellent work within a more or less local sphere. However, the new national institution is designed to serve as a clearing house that will pass on all good roads schemes wherever they may originate and that will seek to bring together all the various local associations, harmonizing their aims and policies where in the past they have too often been working at cross purposes.

The United States government is back of this new national organization upon which public attention is now being focused. Indeed, the first president of the body is Uncle Sam's chief expert on good roads—namely, Mr. Logan W. Page, director of the United States office of public roads. And just here it should be noted that this public roads office—a branch of the United States department of agriculture—is doing a most important work for the cause of road improvement throughout the length and breadth of the land. For one thing, laboratories are maintained at Washington, specially equipped to ascertain which of these are best adapted to use in any specified locality or under any given conditions. Even more important is the work of the government bureau in building stretches of "model road."

Under this plan of building model roads to serve as object lessons in the possibilities and benefits of highway improvements Uncle Sam sends his force of engineers and experts into any community which seems to need to be aroused regarding good roads and with their own helpers, or by means of a force of workmen recruited in the neighborhood they construct a mile or two miles of just the sort of road that is ideal for that particular district. How beneficial these object lessons are is proven by the fact that thousands of miles of good roads have been built in various parts of the country this past few years with these governmental "sample roads" as patterns. The showing made by rural roads "before and after" treatment by the government road doctors has prompted state legislatures, county commissioners, local boards of trade, farmers' granges and other bodies to appropriate money for a more extensive good roads campaign in localities that have thus had a taste of the benefits, and in some states, notably Delaware, wealthy men have paid out of their own pockets for long stretches of improved public roads for the use of the whole community.

Busy Times in Minnesota

Those in charge of digging the state drainage ditches complain that they cannot keep men because the farmers grab the laborers to work in the harvest fields, says the St. Paul Dispatch. A Minneapolis man with an automobile tells how he was shanghaied by those who wanted a machine in which to ride to and from their work as burglars. It would seem as though no one is safe in these busy harvest times.

THE KITCHEN CABINET

LIFE without hope draws nectar in a sieve;
And hope without an object cannot live.

Speak a kind word to sweeten a sorrow,
Do the kind deed you would leave till tomorrow.

PICKLING TIME.

Do not delay putting down some tender little cucumber pickles for winter use. Here is a recipe, easy to prepare, and most successful in results:

Take a pound of good ground mustard, a pint of salt and a gallon of vinegar. Mix the mustard and salt until free from lumps, then add the vinegar in a large, open-mouthed jar. Gather the small cucumbers from day to day, wash carefully and add to the vinegar, putting a plate with a weight on the pickles to keep them under the vinegar. When the jar is sufficiently full cover with a cloth and put away to be used at any time. The weight must always be left on so that none of the cucumbers are exposed to the air. If a little sweetening is desired, sugar and spices to taste may be added.

Mushroom Catsup.—When mushrooms are plenty in the cool fall mornings, gather a basket full, look them over carefully to see that none are wormy, and put them in a large-mouthed jar in layers, with salt between. Don't be too generous with the salt, or you will spoil the catsup. Let them stand in a warm place twenty-four hours covered with a towel. The next day mash and strain them through a coarse sieve. To every quart of the liquor add an ounce of pepper corns and cook a half hour, then add one-fourth of an ounce of cloves, half an ounce of ginger root, one dozen whole cloves, three blades of mace and cook fifteen minutes. Take from the fire and strain again; reheat, fill small bottles and dip the corks in wax to seal. The housewife who does not feel that she can afford to have these delicacies when bought from the grocery, will be able, at little expense to put them up, have them for herself and a few bottles for her friends.

The canned sweet red pepper is such an addition to so many dishes and in the fall when they may be had from your own garden a few cans will be easily put up. This is a tried recipe of Miss Farmers', and one only has to use the right proportions to have success: Wash and cut the stems from a peck of red peppers, remove the seeds and cut the peppers in thin rings, round and round with the scissors. Plunge into boiling water and let stand two minutes, drain and plunge into ice water. Let stand ten minutes, drain and pack into glass jars. Boil one quart of vinegar and two cups of sugar fifteen minutes. Pour over the peppers to overflow the jars, seal and keep in a cool place.

HE THAT hath never warred with misery
Nor ever tugged with danger or distress,
Hath had no occasion nor no field to try
The strength and forces of his worthiness.

A DINNER FOR A BUSY DAY.

A busy ironing day, or a day when using the kitchen range for other things is a good time to have a whole dinner, except perhaps the dessert and a salad, cooked in one dish. Buy a piece of beef for stewing, a bit of veal, and if you have a broiled chop or two of lamb left from yesterday's dinner, so much the better. Cut the meat in pieces large enough for a serving, and brown well in a frying pan, using a little suet. Add a cupful of water to the frying pan, after removing the meat. Place the meat in a stone-covered dish, pour over the liquid from the frying pan, and put into a hot oven. After half an hour's cooking add a few carrots, onions and potatoes. Baste them with the broth occasionally, and serve them from the casserole.

A simple salad to be served with this dinner is lettuce and French dressing. Prepare the lettuce early, and place on the ice, wrapped in a cloth. All water should be drained from the leaves, as the dressing will not stay on wet leaves. Prepare the dressing by beating together a tablespoonful of vinegar to three of oil, a half teaspoonful of salt and a few dashes of paprika or red pepper; a teaspoonful of worcestershire sauce or one of catsup, or both, may be used. When the dressing is thick and well blended pour over the lettuce. Serve at once, as the dressing will wilt the lettuce in a few moments.

For dessert on this busy day, a dish of fruit and a cooky or cheese, crackers and coffee may be served.

A very dainty dessert easy to prepare and most delicious is musk melons. Cut the edible portion into cubes, add a little lemon juice and sugar and serve with small cakes or crackers.

When making pastry, bake several shells, and when a fruit pie is wanted in hurry, crush the fruit, cover with a meringue and brown in a hot oven. This same pie may be served with the fruit covered with whipped cream instead of the meringue.

WHAT is the use of weeping if the sun does take a rest?
It's bound to go on shining when the good Lord thinks it's best.
—Florence M. Day.

OVEN HINTS.

It is always better in baking flour mixtures to have a moderate heat at first, until the cake or biscuit is fully risen, then increase the heat so that it will brown over quickly. If too extreme heat is used at first the dough is stiffened before it has an opportunity to rise; the result is a cracked and unsightly surface.

Biscuits and pastries are baked in a very hot oven, as the cut surfaces allow the gases to escape readily. Pastry, unless baked quickly, will be soggy.

Have a strong under heat for baking pastry.

Small ovens cool quickly and should be heated hotter than large ones. Do not cool the oven by keeping the door open too much.

The length of time for roasting or baking fish depends upon the extent of the surface exposed to the heat more than on the number of pounds. For example, a thin large roast, because of its large surface exposed would take less time to roast than a roll roast of the same number of pounds.

A steak an inch thick requires six to ten minutes for broiling; an inch and a half, eight to fifteen minutes.

Lamb should never be served rare; mutton may.

In baking angel food a very slow oven is maintained throughout the first half of the baking, then a little increase and finish with heat enough to brown the cake a rich brown.

A layer cake needs a hot oven and should bake in twelve to twenty minutes. Molasses and fruit cakes should have slower ovens. An ordinary ginger bread will bake in a good oven in forty-five minutes.

The small ovens used on the top of gas stoves are a great convenience and economy.

IF ONLY myself could talk to myself
As I knew him a year ago
I could tell him a lot
That would save him a lot,
Of things he ought to know.
—Kipling.

THINGS WE LIKE TO KNOW.

Aluminium vessels are more expensive than granite, but in the end they are safer. If a dish boils dry and burns, the granite surface is apt to crack and break off, and a bruise or fall cracks and breaks it. Pieces of granite in chicken feed are not objectionable, but the human stomach is not able to manage such questionable things with safety.

The use of enamel spoons for stirring foods is one to be deprecated for the same reason. A wooden spoon is lighter and easier on the hand. Now one can buy small wooden spoons, not at all like the old-fashioned great horn spoon.

Remember to tack pieces of old cast-off rubbers on to the bottom of the step ladder to keep it from slipping on a slippery floor. Many broken hips and legs would be saved if this advice was followed in each household.

Cabbage and onions are more delicate if, after boiling for a while, they are drained into a colander and cold water run over them; then return to finish cooking.

As soon as a bottle or jelly glass is emptied, wash it and put it away for future use.

When cooking a spare rib, sprinkle it when putting to roast with minced onion and a little powdered sage.

Put a little cold coffee occasionally on your ferns and palms. They need stimulating as well as we.

Grease the cork of the cement bottle and there will need no force to open the bottle when needed.

Rubber heels on shoes will save many a back ache and over-wrought nerve.

Use kerosene oil to save elbow grease in cleaning the sink.

Nellie Maxwell.

Necessary Labor.

Everything within and about us shows that it never was intended that man should be idle. Our own health and comfort and the welfare and happiness of those around us, all require that man should labor. Mind, body, soul, all alike suffer and rust out by idleness, the idler is a source of mental and moral offense to everybody around. He is a nuisance in the world and needs abatement for the public good, like any other source of pestilence.

THE SILVER ....JAW..

By BERNARD MEER

(Copyright, 1910 by Joseph B. Bowles)

IT was all so new and beautiful that he found himself talking with unconstrained and impersonal interest to the head nurse and to two or three of the cadet nurses in the hospital about the operation they were going to perform upon him that very day.

The nurses in their neat little uniforms of blue and white stripes, the head nurse in her spotless all-white, the resident doctor in his shining white trousers and jacket, the plainly-dressed women who visited the hospital, and to whom, in spite of their simple attire and manners, everybody seemed to pay such respect and attention, and the superintendent of the hospital himself, who had come up to see Bill three or four times the day before, while Bill was "resting up" for the operation, were all so nice and kind to him that he almost forgot it, and probably would have forgotten it altogether were it not for the fact that he missed his regular breakfast.

Over at the old homestead in Connecticut Bill had always imagined that a hospital in the big city was a dark and dismal den in which a man was flung in a wet blanket on the floor and let stay there until he died from hunger. True, Bill was only nineteen and still had the world before him; and the experience you are likely to get in nineteen years of young and care-free life on a Connecticut homestead farm is scarcely the kind of thing that makes you impervious to the strong impressions that stream in upon you when you come to the city and plunge into the intricate mazes of an ultra-modern civilization.

But the most wonderful thing about all this business was the electro-magnetic personality of Cringer.

Cringer was a surgeon for whom all sorts of hideous long words, concealing in the perfectly inscrutable depths of their Greek derivations the most awful things imaginable, were the food of his body and the breath of his soul.

To know Cringer intimately and well was to be convinced that your life was incomplete and a failure had you not been internally mutilated—and preferably by the hand of Cringer himself. And when Bill came to see him that time about that little trouble in his left upper jaw, Cringer had so thoroughly hypnotized him that Bill went to the hospital in the same state of mind with which he was wont to look forward to a Fourth of July celebration.

"It's a pity, too!" the head nurse said to Cringer. "He's such a handsome dear boy, and so simple and trusting. And he's so big for his age!"

She was pinning a towel about Cringer's head as a precaution against possible infection of the patient while Cringer would be over him at the operation.

"What do you mean?" grunted the surgeon severely.

"Why, it'll disfigure him wretchedly, won't it?"

"Disfigure him? I should say not!"

"But you can hardly remove a person's upper jaw without disfiguring a person, can you?"

"Ah-ha!" drawled Cringer, as if he had been suddenly enlightened. "I see how it is with you! You have never heard of such a thing as a silver jaw!—Never mind, now! Don't you try to let on anything to the doctor! A silver jaw is one of the little tricks of the trade that you happened to miss in the course of your wonderful experience. Don't you know that we just fit them out with a silver jaw in the place of the old one, and that they're just as good as ever? Yes, better than ever. I believe that I'd sooner have a good silver jaw than the one I've got. And as for this resection that I'm going to do—why, it's nothing; nothing at all. I've done it ten times. No more to it than there is to drinking a cup of coffee before you get up out of bed in the morning. Are they ready? Then bring him up."

As they brought Bill up he could hear Cringer laughing with one of his assistants—laughing and chatting as if hospitals and other gloomy things of the kind had no existence whatever. But Cringer's strong hypnotic influence was not quite sufficient to prevent Bill from feeling a little nervous as they gave him an eighth of a grain of morphine and placed a pneumatic pillow under his head to let him rest a little before the anesthesia. And Bill was never so surprised in the entire nineteen years of his life as he was when Cringer lifted him up to a sitting posture and asked him how he felt.

Was it over already? He knew they had been doing something villainous to his face, and he was woefully drunk from the mixture of ether and chloroform they had used in putting him to sleep. But he certainly thought it was funny if it was over already. He had been dreaming that he was one of the heroes in the battle of Bunker Hill fighting with a black giraffe who was reciting Lincoln's speech about government for, of and by the people to the audience at the high school commencement exercises in the old smoke house at home.

By no means had it been a Fourth of July celebration—at least of the sane kind—and he was glad it was over. And yet he imagined he would do it again, so jolly and kind were all the good people at the hospital in the days that followed while he was rapidly recovering from the operation and from the shock.

Bill went home and in due course of time they supplied him with a silver jaw which took the place of the one that Cringer had taken out—a silver jaw so neatly and artfully made and fitted that Bill himself—to say nothing of his mother—would never have known the difference.

Now, I will not be sure that it was the possession of this perfect silver jaw that caused Bill to feel that he was a little better than the other young fellows in the neighborhood; nor is it possible in the present uncertain state of human knowledge to assert with positiveness that the mere possession of a silver jaw, however perfect, is an extraordinary warrant for prefiguring ourselves the favorites of capricious chance.

But apart from the merits of such a question, it will be desirable to note that Bill was soon busy preparing himself for the practise of law, with the ultimate object of becoming president of the United States, or in any event a United States senator—the particular state he purposed to represent not being specified in the contract.

To be perfectly fair to Bill and to ourselves, I must admit that he was a trifle crude; crude, I mean, in his notions about the ultimate constitution of human society; which means in the concrete the peculiar opinion of their own importance entertained, as a general rule, by the rich. Likewise he was preternaturally slow—so slow as to be virtually motionless—in his ability to distinguish, by surface indications, the essential difference between the very best people—the blue points and cherry stones of the human race—and the oysters that come to us in bulk by the barrel. And if you supply this broad conception of Bill with a rank tendency to speak out his mind—but you will see how he carried it with Angelique Van Loo.

Now although Bill had managed to push himself through Yale, and to squeeze himself through the law school, and to edge himself into the privilege of practising law at the bar of New York, he was poorer at the end of it than he had been at the beginning. His silver jaw did not compensate him for the want of a golden mouth, and he was beginning his journey to the White House in the capacity of a grub-staked hanger-on in the office of a lawyer who needed for his own use the clients that sifted down to him from the upper world or that floated up to him from the under. Bill was about to make up his mind one day that he would return to his father's house in Connecticut when the mystic and magic spell that lay in the silver jaw flung him up at the feet of Angelique Van Loo, as she stood on the edge of the sidewalk, her hands clasped upon her breast, her face transfigured with terror, and her eyes fixed on some indeterminate point in space.

As Bill approached her she turned and seized him by the lapels of his coat. He felt with a strange emotion the force of her neatly gloved little hands drawing him toward her, and he was astounded by the look of distress and horror in her eyes, and by her frantic appeal.

"Oh save her! Save her, won't you? Please save her! I know I shall die if you don't!"

He gazed around in the general direction of the upper stories of the houses and then looked down into the face of his mysterious beseecher.

"You fool!" she cried. "Why do you look around you like that? Will you save her this minute or will you not? Do you wish me to go mad?"

Again did Bill take in the circumvallate avenue and again look down upon his petitioner. He was a shrewd young man with a smattering of the law, and he therefore refused to be drawn into a careless expression of a wish that madness should seize upon anyone. But while he was craftily thinking of all these things she relaxed her grip upon his coat.

"Won't you please save her?" she begged, half coaxingly, half sad.

"Save WHO?" asked Bill, the entire structure of his four years of English collapsing at a stroke.

She was looking at him by this time with an impatient yet forbearing condescension, which seemed to say that one must put up with the lack of intelligence and want of tact one finds in persons of a certain kind. Her brows were lifted with the barest perceptible touch of scorn at the mix-up in Bill's grammar, but these were things that were wholly unobserved by the lawyer.

"Who? Antoinette. Don't you see her?"

She pointed to the street, and there in the very middle of it sat a black Italian toy terrier complacently winking at its mistress from its highest pinnacle of danger. So small it was that its size, in an analysis of its general properties and characters, would be a totally negligible quantity. With the vehicles that were clattering or humming on either side of it, at the imminent risk of snuffing it out of existence, it formed the antithesis of the helplessly little in the center of the pitilessly great.

It was hardly the work of a minute for Bill to cut through the stream of automobiles and horses, to make a handful of Antoinette, and to return the toy to the hand of the lady.

"Thank you," she said with a smile of relief. "It was very good of you! Poor little thing!"

She gave him her hand and looked into his eyes.

What a nice little maid, thought Bill, now that he had a chance to study her in what was undoubtedly her normal state of mind. In spite of the hat, the volume of which seemed to have been determined in inverse ratio to that of the terrier, she was unquestionably one of the neatest little maids he had ever seen. To Bill's philosophical eyes she looked like a girl who was young enough to be in the last year of the high school and old enough to be out of it. She was just the kind of a girl he would have fancied for a companion, had he ever given any particular thought to the subject in a serious way. There was nothing extravagant about her—if you allowed for the size of the hat. And even in the matter of the hat itself, it occurred to Bill for the first time that perhaps these large hats, that to him had looked like inverted wash-tubs, and had filled him with disgust for the supine insanity of men in general and of women in particular, had been originally designed for girls of a certain natural get-up—like this one, for example. And then there was another phase of her that looked good to Bill—and it was a phase that had been markedly absent from most of the girls that had bothered him—up to the present. She was without question the most sensible girl he had ever met. She could look at you and talk to you just as if she were a man; nothing of the giggling or squeaking order about this one; none of that fool grinning you see in the case of the regular girls you pick up here and there in the stray moments of a busy and thoughtful life. He fancied that he would wait for awhile before returning to his father's roof, and he grinned like an inane lout.

"That's a nice little dog, isn't it?"

"Yes, it is a very nice little dog. Do you live in New York?"

"Yes. In the law. With Skinnim, Skinner & Skinnem. Yale, nineteen six. Phi Beta Kappa."

"What is Phi Beta Kappa?"

"Don't you know what Phi Beta Kappa is? It's the scholarship frat. They give you keys. Like this one."

"The key of knowledge, I presume. How pretty!"

"'Tisn't so awfully pretty, but it's pretty hard to get. Have you ever been to a college?"

No, she had never been to college. Not a doubt about it, she was a simple little maid. She had never even heard of Phi Beta Kappa. He had a fancy he would like to tell her about Phi Beta Kappa and the rest of it.

"Wouldn't you like to hear about the fraternities they have in the university?"

"Have you time to tell me about them?"

"Time? Why, yes. I'd just as soon tell you about them as not. You really ought to know about the college fraternities. People will believe that you never had any education at all if you happen not to know about that."

"If they do," said the girl, "they will happen to be perfectly right."

They were walking up the avenue and it seemed to Bill that she was looking straight ahead to a degree that was altogether unnecessary. Nor did she seem at all aware that Bill was making himself dizzy with the sight of her. Suddenly she stopped and faced him.

"Are you on your way to your office?" she asked him under the eaves of the hat.

"The office? Why, no. The office is away down town."

She looked at him with evident hesitation; with a deep questioning in her eyes; and then glanced up at the four-story brown stone house before them.

"This is my home," she said. "Won't you come in?"

And that was the way he met her.

It was certainly strange, thought Bill, that a big lubber like himself could win without trying a trump of a girl such as Angelique Van Loo. Win her without even making a fight for it. There was nothing fidgety or foolish about her; not a single thing. And there was nothing fidgety or foolish about either of her aunts, either. Solid, sensible women, all of them. They seemed to be boarding in that big house on the avenue, although they had never told him so in so many words. They had spoken about him with great freedom, but they seldom talked of themselves or their own affairs. They were certainly good, plain, sensible women; just the kind of women that would make a good wife for a man who had to make his way in the world by his own brains and energy. But he wondered why it was that they never seemed to have any company but himself, and why it was that her aunts seemed to be so infernally careful of her. There was something mysterious about the whole outfit—when a fellow took time to think it over of an evening with his pipe. And thinking it over, with and without the pipe, had been Bill's sole occupation for a matter of three months, during which, the more he thought of it, the stranger it seemed to grow.

Bill and the aunts had talked about every phase of the case—so far as Bill himself was concerned. Questioned by the aunts—nicely, gently, in the most simple and straight-forward way in the world, but soul-searching and practical, when he came to think of it. Bill had been turned inside out and studied in all his tissues with the microscope. At one or another time he had told them—when he came to think of it—everything of importance that had happened since the day of his birth. They would discuss him—those aunts of hers—before his very face, as if he were not there at all, with nods of approval to each other whenever they were specially pleased with any of Bill's various accomplishments or virtues. They seemed to be particularly gratified when he gave them an account of his family tree, nodding with extra vigor, as much as to say that there was no need of going into that subject any farther. Yes, yes. Good old Connecticut family—farmers, you know, but with excellent connections, and not undistinguished in history. When they discussed him in that strange way Bill seemed to feel rather queer, and yet he could not bring himself to challenge it. They did it in such a nice little way that Bill even at times imagined for a minute that he was not the party under fire at all; that he himself was one of the aunts, and that the man they were talking about was some fellow in New Jersey. But there was yet a thing that Bill had not given up to them; a thing that, one way or another, he could not bring himself to disclose, it was altogether such a delicate and personal matter with himself.

No doubt he would have told them long ago about the silver jaw had he not feared that the disclosure would prove a shock to Angelique. And yet his conscience would not let him rest while the jaw remained a secret.

Was it right for a man with a silver jaw to marry the finest girl in the world without telling her that that left upper maxillary of his was made of silver instead of bone? If she took him with the understanding that his jaw was of the usual manufacture, would not the contract be void, according to the law of contract as he found it expounded in the books?

It was indeed a knotty problem; altogether too knotty for Bill's as yet undeveloped legal penetration, and he decided in the depths of his woe to seek out Doctor Cringer and get his advice on the question. Doctors are always good counsel, thought Bill, especially when they have cut three or four pieces out of a man's anatomy and have set him up again as good as new.

When Bill had told him the story, being careful to omit the lady's name, Cringer became thoughtful a moment.

"Has she got any money?"

"No," said Bill. "She lives in a big boarding house on the avenue."

"Then," announced Cringer, with prompt decision, "your course is clear. I assume that you are looking for a wife and not for a bank-book. In which case, up and tell her that you have a silver jaw. If she cares a straw for you she won't let a little detail like that interfere for a minute with the business. She will go to you like a horse to his oats. If she balks you can be certain that she doesn't care as much for you as she cares for a baby cat. And in that case, my boy, you'll be better off without her. Take my own case, for instance. When I was courting—but come back, Bill, and let me know how she takes it, will you?"

Bill went away no better than he had come. To him, Cringer's advice had small comfort in it. If she did not care enough of him to take him with the silver jaw as boots in the bargain, he had no desire to be informed of the fact. He was anything but hankering for proof positive that she was not the square little, nice little girl he thought her. And besides all that, the business had run along so smoothly and so fast that it would be a shame to spoil it now. Hang the silver jaw, anyway!

But as Cringer's advice worked itself slowly into the texture of his mind, he began to take another view of the question. It was possible, after all, that Cringer was right. It was just possible that she had been fooling with him all this long time, putting on those nice little ways of hers, looking sideways with her eyes, and all that sort of business, and pretending to sigh like that as they were holding hands when the aunts let them alone for a minute. When he came to think of it, he never did have much faith in women, anyway. They were all a bad lot, not worth a man's while bothering with, after all! If he thought she was fooling him—! Yes. He would follow Cringer's advice and put it up to her.

But it was not such an easy thing to do when Bill tried it that very afternoon. She looked a little frightened when he began to stutter and splutter about "a secret in his life that he felt he ought to confess," and when he said that he had been the subject of a surgical operation, she distinctly drew away from him and stared at him with positive alarm. But when he plumped it out and told her that the result of the operation was the silver jaw he at that moment was using, Angelique Van Loo rose from where she sat and looked at him with immeasurable contempt.

"You!" she exclaimed. "You! How dare you tell me that! I loathe you! I hate you!"

Had he been a honored toad or a Gila monster she could not have regarded him with a superior horror; and then, recovering herself, she left him alone, the victim of her incomprehensible scorn.

Now this was a posture of things that Bill had not been prepared for. Had a volume of the revised statutes suddenly exploded while he was reading at it, he could not have been more surprised. He had figured on a thousand possibilities but he had never even thought of this; and he was sitting there with open mouth, staring at the doorway through which she had disappeared; a man that was wholly undone. She had certainly made a good job of it while she was about it.

He turned with positive relief as her aunts came into the room, apparently in great excitement. They, at least, were solid and sensible women and would listen to his story with reasonable politeness. But Bill seemed to be unfortunate in this expectation also. The ladies seemed to have become as frigid as they were hospitable before. Frigid, and decidedly fidgety. . . . A silver jaw! Oh, dear, no. It was impossible even to think of marriage when one has a silver jaw! They hoped his good sense would tell him that any expectations in that direction would be the height of the ridiculous. Would he mind if the acquaintance were considered directly at an end? Of course his own appreciation of propriety would directly inform him that it would be unkind of him to address himself further to Miss Van Loo, should he chance to meet her away from her home. In fine, they would send James to usher him out.

James was a short species of varlet with an English accent, whom Bill particularly despised; and with the natural instinct of his breed he metaphorically kicked the young limb of the law out of the door and into the street.

And then there followed with Bill a period of depression such as is common with heroic youths when the fluent current of their loves is stopped by a pie-wagon or other prosaic and material obstacle that refuses to be budged by vain incantation. For four weeks he wandered about in the rain and shine, by day and night, through the busy thoroughfares, among men, who were happy in their ignorance of Angeliques Van Loo and other disturbing factors in business. He strayed among the ships in the East river, and at times thought of apprenticing himself to a Malay pirate could be conveniently find one. And then he thought of Cringer. Cringor had requested him to return and advise with him on the result of the experiment, but Bill had forgotten all about it. Now that he recalled it, he decided that he would go back to Cringer and confess. He had to talk to somebody or jump from the bridge, and Cringer was the man.

The surgeon listened gravely to the whole story—this time with intensified interest.

"What is her name?" he asked, when Bill had finished. "Who is this miraculous Juliet of the Capulets?"

"Her name is Angelique Van Loo," said Bill from the lowest depths.

Cringer glanced at him quickly as if he were trying to make out whether Bill were suffering from homicidal mania or was afflicted only with a mild and harmless form of dementia.

"You're sure? Are you sure that that is her name?"

"Why, of course," answered Bill impatiently. "She lives in a big house on the avenue with her two old aunts. Of course it's her name. Why shouldn't it be?"

Cringer gave a long whistle.

"Bill," he said, "you are certainly the delight and the wonder of the world! Angelique Van Loo! Great Scott!"

He took a turn around the room and came back to his visitor.

"Great Scott!"

He blew his breath through his pursed up lips as if he were excessively warm and once again exclaimed:

"Great Scott!"

And then he looked at Bill with a face of wonder, as if Bill had been a live pongo that had been suddenly picked up in Africa and miraculously thrust before him.

"Don't you know who Angelique Van Loo is, Bill? Do you mean to tell me that you never heard of her?"

"No," replied Bill, taking alarm at Cringer's queer reception of the simple statement of Angelique's name.

"Why, Bill, Angelique Van Loo is one of the most notable young women in the world. She is the sole inheritor of the Van Loo millions—millions enough to set you up in the railroad business if you could get her. But that isn't all," said Cringer. "There's a great deal more to it than that. You bet there is!"

"What is it?" asked Bill eagerly. "There's something mysterious about them, whatever it is. Never saw a soul there but myself. Never even had dinner with them. But I don't care a cent about the millions, and she herself didn't seem to care about them either. Said she was willing to go and live on the farm with me in Connecticut. Aunts said they'd come along with us. Just doted on the simple life and all that, don't you know."

Cringer was puzzling himself with a question, and after a bit of reflection apparently decided he would keep his own hands out of it—just then. He took another turn around the room, again came up to Bill, and again surveyed him with absent-minded speculation. This time he said it long drawn out and laden with subsiding surprise:

"Great Scott!"

There was evidently little help to be had from Cringer. To Bill's mind Cringer was laboring under an attack of mental aberration from which there could issue no word of comfort or hope. He took his hat and went away, leaving Cringer in a state of stupid inaction. He resumed his wandering life for a period of two days, eating nothing and sleeping hardly at all. On the third afternoon his hunger tempted him to a meal, and the meal restored his courage, and the courage eventuated in a plan. He would return to the home of Angelique Van Loo and would tell her what he thought of her! He would tell her he was glad she had rejected him. He would tell her he despised her millions and her aunts. He would tell her—but he would wait until he would see her face to face for the formulation of the entire message. He could see her so clearly in his imagination that he closely watched the door of the restaurant on the chance she would enter there.

It was odd, too, that he never once thought of James; and when James opened the door for him, and came out a little way into the outer hall, and stood before Bill with a sneer on his fat red face, the angry passions of Bill began to rise. But his voice was gentle and calm as he spoke.

"Don't look at me that way, Shorty, I don't like it!"

The open hand of Bill came down on the varlet's shoulder with rare and wonderful power, so that one fat well-fed body shook with the shock of it.

"Not that way, Shorty (slap), I don't like it (slap). I don't like (slap) to be looked at (slap) that way, Shorty (slap). Do you hear what I say, (slap) Shorty? Now go and tell them, Shorty, that I'm here."

The varlet was standing up to the punishment of his shoulder like a wooden horse in a gymnasium, and he did not observe that the two guardians of Angelique Van Loo were behind him in the hall. They now came forward to Bill in warm and smiling welcome.

"Oh, William, it's you, isn't it? So fortunate you called this afternoon!"

The dear fussy ladies, one to the fore and the other to the aft of him, dragged him and pushed him into the big front room, and piled him into a chair.

One of them was telling him that she had told Angelique that she would never believe he could be such a heartless fellow as that! Surely even if it were a fact, it would be an unheard of and monstrous thing for a man to be guilty of such a cruel and unkind trick, especially when it was known to everybody, and the poor dear girl was almost insane from grief and shame.

The other one was telling him that of course they had practised a little deceit upon him in allowing him to remain in ignorance of Angelique's wealth and position, but they had done it with the best intentions in the world, as it was perfectly obvious that William, being such a simple big fellow, had really never suspected anything of the kind, and probably would never have suspected until long afterwards, but at the same time she had said to her sister that we are sure to weave a fatal web when first we practise to tell fibs to people, but everything was all right now, wasn't it, or at least she hoped it was.

And then the pair of them joined voices, and said it all over again, thoroughly revised and with the introduction of considerable new matter, which Bill was at a total loss to understand. Of course they had not suspected that he had a silver jaw, too, and that was the reason why Angelique had thought him so very contemptible for speaking of it. But they had planned to tell him all about it the very day that he and Angelique had quarreled. You know, poor child, she had made up her mind never to marry, and it was so fortunate that Doctor Cringer had called and explained to them the whole strange story! Providential, wasn't it, that they had consulted Cringer about Angelique within the very week of the operation on William himself?

Bill was still in the fog. He looked from one of the aunts to the other, as if they had been speaking a particularly difficult dialect of Chinese, the meaning of which, while intensely interesting to themselves, no doubt, was of no importance whatever to the world at large. And when they had thoroughly winded themselves with talk, they had time to take note of Bill's peculiar condition.

The big stupid! Couldn't he comprehend that Angelique herself had a silver jaw like his own? And that she had never dreamed that Bill was similarly equipped? And that she had imagined he was basely hinting at the cruel gossip that had maliciously whispered that if it were not for her millions she would never find a lover who would love her—and so on with the rest of it.

Aha! thought Bill. That was the secret that Cringer had kept from him, was it? Why, to be sure! And finally, when it was made as clear to him as it possibly could be, and when Bill, in his anxiety as to whether a silver jaw could interfere with the health and happiness of a certain high-strung and sensitive girl, had gone to Cringer for his professional opinion, Cringer had snapped his fingers in disdain and had given his characteristic reply.

"There's nothing to it, I tell you. Nothing at all. I'd be willing to make an exchange with her myself."

CHAS. W. LATTA
Editor and Publisher.

Published every Friday at Holt, Marshall County, Minnesota.

Subscription Price: $1.00 per year, strictly in advance.

There is a cry about a couple of hundred of towels having been stolen at Bemidji a few days ago. Has anybody searched the sheriff or his friends?

Champ Clark says that the president, after riding into office by a very large majority, is now thankful to escape the humiliation of having a bill passed over his veto—and it was an awful narrow escape, too.

The small country papers are the ones that come closest in touch with the real public sentiment. Most of these voice the sentiment of their community in their editorial columns, and most of them in northern Minnesota have little time for Eberhart—or Taft.

The terrible results of forest and prairie fires in northern Minnesota last year should be sufficient reason for everybody in northern Minnesota to begin at once taking precautions to prevent the starting of fires this fall. Get this idea into your head and keep it there until the fire season is safely passed.

The county board, at its meeting held the first of the present month, appropriated the sum of $300 to be used by the superintendent of schools in promoting industrial contests among the boys and girls of the county. This was a wise move and we expect to see some of the young people from this part of the county among the top notchers in the contests.

Governor Eberhart is to be called as witness in the Whittier hearing and some of the press dispatches say that interesting inside information is expected to be furnished by him. Dont believe it. He has the necessary knowledge of the facts, but he wont tell unless his masters tell him to, and they wont. If you want to see the truth skillfully evaded just watch the evidence given by the governor in this instance.

A farm of 40 acres, thoroughly tilled, will give better net results than a farm of 400 acres ploughed, seeded and harvested in a hurry, as the large farms always are. The ordinary farm of 160 acres should supply ample small grains and feed and maintain a fine herd of dairy cattle, allowing all kinds of room for pasture. That is the kind of farming that pays the best and it is the kind that this section of the county is particularly well fitted for by nature.

The extra session of Congress came to an end on Tuesday. It was called for the purpose of passing the Canadian reciprocity bill, but the democrats took the bit in their teeth and enacted a lot of tariff revision measures and other things that were calculated to embarrass the administration. With the aid of the insurgent republicans they accomplished their purpose, in so far as embarrassing the administration was concerned, but they really accomplished very little—thanks to the veto power. The democrats would not seem to be entitled to any great credit for their efforts, but it took some sort of courage for the insurgent republicans to make their stand.

Getting HOLT on the Map.

Greenbush Tribune:

The Northern Light, the new newspaper published at Holt, came to our desk last week. The first issue of the paper would indicate that the editor knew his business. May the Northern Light increase in brilliancy.

Norman County Index:

Volume 1, No. 1 of the Northern Light printed at Holt, Marshall county came to our table this week. The new publication is edited by Charles W. Latta, formerly of the Crookston Press, and is a healthy looking infant.

Stephen Leader:

"The Northern Light" is the name of a new Marshall County weekly published at Holt, with Chas. W. Latta as editor and publisher. Mr. Latta is an experienced newspaper man and from the issue received at our exchange table we would judge he will give Holt a snappy and interesting paper.

Steenerson's Opinion

Congressman Steenerson a few days ago sent us a check for a year's subscription to The Northern Light, and in his letter, has the following to say concerning the paper and its home:

"I have just received No 1 of 'The Northern Light', and congratulate you upon the neat and substantial appearance of the paper, as well as upon your first editorial therein. The village of Holt and the surrounding country is, in my opinion, destined to rapid and continued growth, as well as to increased prosperity in the near future."

Sunday School Convention

The County Sunday School Association of Marshall county will hold its annual convention at Warren on the 30 and 31st insts. Mrs. Frank Crummy, the county secretary has been very busy sending out invitations and a big crowd of people of all ages is expected to be in attendance. The program will commence with evening services on the 30th, and on the 31st there will be an attractive program both morning and afternoon. Every Sunday School in the county is entitled to send delegates to this convention, regardless of denominations.

Lightning Burned His SHocks

During the electrical storm on Sunday night last the lightening played an odd trick on L. L. Hellesylt, a prominent farmer living a couple of miles north of here. He was standing in his residence looking out through a window when he saw a bolt of lightning strike in his wheat field. Immediately following the flash a blaze sprang up and he saw that a shock of grain was on fire. The blase commenced to run through the long stubble and in a moment another shock went up in smoke. Fortunately at that time the rain commenced to pour down and put the fire out without doing any more damage.

THE DULUTH HERALD
BEATS THE CENSUS THREE TO ONE

During the past ten years the population of Duluth increased 48 per cent., St. Paul 32 per cent., and Minneapolis 49 per cent. In the Same Period the Circulation of The Duluth Herald
INCREASED 150 PER CENT.

This marvelous expansion—so much greater than that of the surrounding territory—is due solely to the merits of The Herald. The Herald has never used any kind of premium, contest, or prise reduction to gain subscribers but prints each day the very best NEWSPAPER in the Northwest. Its editorial page is thoroughly independent and its news columns cover every feature of the world's daily history.

Send for sample copy and get The Herald habit.

MANY ARE MILDLY INSANE

Never Make Trouble Unless Opposed and Seldom Meet With Anything but Consideration.

"There are more mildly insane people at large in a big city like New York than the average person imagines," said an official of a downtown safe deposit company to a New York Sun man. "We have periodical visits from a richly dressed elderly lady who has the hallucination that her son is shut up in our vaults. We go through the same procedure every time. We have one of our men show her over the building and into the big vault. We treat her with every courtesy and finally convince her that she's made a mistake. If we opposed her there might be trouble, but by following this course she leaves us much happier than when she came in. I happen to know that at a certain bank a middle-aged man comes in at regular intervals and apologizes for having overdrawn his account. His family is well known at this institution and in order to satisfy him they sometimes have to accept a deposit, which of course they return to his family. They can't reason with him and to prevent a scene they let him do as he pleases. These unbalanced people never make any trouble unless they're opposed, and they seldom meet with anything but consideration."

SURVIVAL OF OLD NAMES

Nowhere Does Aboriginal Nomenclature Stick as It Does in Parts of New England.

In all countries the names of rivers, lakes, mountains and localities longest retain the traces of the language spoken by the earlier inhabitants. This is well illustrated throughout Ireland, Scotland and Wales, and in many parts of England itself, but nowhere is the survival of aboriginal names so general as in New England and some other sections of the country. Whenever one of these names is dropped, as has been done to some extent in the White mountain region, where good Indian names have been made to give place in too many instances to names bestowed in honor of individuals. If the practice had stopped with the five peaks of the Presidential range, it would have been much better. In the case of the village of Niantic, in Rhode Island, however, there appears to be no special occasion for regret, as there is another Niantic a few miles away and this particular village was not originally Niantic anyway. It was changed from Charlestown to Dorrville, from Dorrville to Niantic, and has now been again changed to Bradford.

CHILD SAVED SISTER.

Little five-year-old Marguerite Mainguage, whose father is a farmer at Larouchevyres, in Auvergne, France, is a real heroine. She was playing with her young sister Genevieve recently, when the child fell into a deep part of a brook. Genevieve picked herself up, but the water was up to her face as she stood. She cried out for help. Marguerite held her, and at last succeeded in pulling her out of the brook. When their mother and some neighbors arrived and heard the whole exciting story they were amazed at the marvelous presence of mind and energy displayed by this child of five. Her brave conduct is to be rewarded by the authorities with a medal for saving life.

BLUEBERRIES AND CLAMS.

It is a far cry from clams to blueberries, but nevertheless they are pretty closely related to each other just at present. The clam supply is not over abundant now, and all because the blueberries are ripening. There are many places down the bay where blueberries are to be secured. The men who ordinarily dig clams are picking the berries and making a good penny, so they do not give their attention to the bivalves.—Portland Press.

AMUSING "BULL."

Dr. William H. Welch, president of the American Medical association, was defending the cause of vivisection, and arguing that many thousands of lives have been saved by the knowledge gathered from cutting up animals. Then he made an "Irish bull."

"I deny," he said, with emphasis "that the animals suffer unspeakable agonies."—Popular Magazine.

STRAUSS LED THE STORM

Col. Higginson Tells Story of Musician and His Banging, Crashing Music.

"The late Thomas Wentworth Higginson," said a Harvard instructor, "loved music, but not the extremely technical music of Richard Strauss, Ravel and others of that type. Concerning Strauss and his banging, crashing music, Colonel Higginson used to tell a story. He said that Strauss went one summer on a hunting trip in the mountains. It chanced that on a certain afternoon a terrific thunderstorm descended on the hunting party. Amid earsplitting thunder and blinding lightning, amid deluges of rain whipped by a roaring wind, the huntsmen all sought shelter. Where, though, was Strauss? Three friends set out in alarm to look for him. They feared that in the wild chaos of the storm he had fallen down a precipice. After a long while they found him, they found him doing—what do you suppose? Strauss stood bareheaded on the summit of a lofty crag. The lightning played about him in vivid violet flashes; the rain deluged him; the thunder rolled and rumbled around him; the roaring wind flapped his coattails about his head; and the musician, a ramrod in his hand, was busily engaged on his high crag in conducting the thunderstorm!"

PHOTOGRAPHY AT SEA.

Not the least attractive feature of the modern ocean liner is the completely equipped dark room placed at the disposal of passengers. One or more cabins are set aside for the purpose. The dark room is supplied with metal tanks, running water, racks, trays and all possible equipment, together with electric ruby lamps which may be switched on or off. As a rule, this room will permit several people to work together, if they desire. An experienced photographer is placed in charge, who will coach amateur photographers if desired. A complete stock of photographic supplies is, of course, carried aboard. It is a common sight to see a tourist who has taken a snapshot on deck, for instance, appear a few hours later and display the finished mounted photograph.

OLD-TIME SUMMER DRINKS.

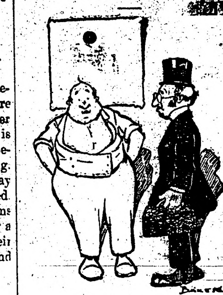
In the old days one braced himself for hot weather with plenty of "cool drinks," that is to say, liquid fire with ice in it. In this respect science is bringing about a notable reform. However the doctors may be divided as to the harmfulness of alcohol in general, they are agreed that it is not the thing for hot weather, and those who are not its slaves carefully avoid it at such times. The day of the mint julep, the gin rickey and other "pegs" supposed to be especially comforting in hot weather has passed, and the world is learning that the best thing about them is the ice.—Springfield Republican.

CHANGED CONDITIONS.

The New Station Master—I'm glad to find you such a willing worker. I was warned that I would find you the most ill-tempered and lazy man on the station."

Porter (anxious to ingratiate himself)—"An' so I was till you comed, sir."—Black and White.

FEARFUL.



Doctor—I hardly think you will live over one year.

Patient—That's a hot outlook.

LOST IN PRACTICE.

"She is a woman with a very strong mind."

"Not as strong as it was."

"How do you know?"

"Just heard her giving her husband a piece of it."

Farm Lands and Farm Loans

Anyone having Land in this vicinity for sale should call or write me. I will either buy or find a buyer. Farm Loans quickly negotiated.

Something New In Kitchen Ware

The "1892" Pure Spun Aluminum Ware is rapidly coming into use for cooking purposes. It is taking the place of agate and enamel ware because while its first cost is a trifle more than ordinary ware, it is really much cheaper in the long run, as it is guaranteed for twenty-five years and will last practically a life time.

The genuine "1892" Ware, made only from pure SPUN (not cast) Aluminum, will not crack, scale, peel, break, scorch or burn.

It looks like silver but weighs only about one-quarter as much, is easily cleaned and handled, and will not rust, corrode or tarnish. Absolutely pure, non-poisonous and wholesome; saves money, time and doctor's bills.

Be sure you get the original and genuine ware stamped with the Maltese Cross. At your dealers.

Bring us the news.

When in town call at this office and let's get acquainted.

J. O. Quisberg went down to Thief River Fall yesterday on a business mission.

Dr. H. B. Newell, veterinary, was here Tuesday and Wednesday on professional business.

Miss Carrie Peterson has been visiting friends at Thief River Falls since Wednesday.

John and Gilbert Johnson left on Tuesday for Langdon. N. D. to spend a few weeks threshing.

FOR SALE—A small steam threshing outfit, complete with feeder, windstacker and weigher. Enquire of S. L. Collins, Crookston, Minn.

—WANTED—Some one to put up hay on the SE 1-4 Sec. 36, East Valley township. Apply at this office.

A baby boy was born to Mr. and Mrs. Chris Saastad on Sunday evening. Mother and child are doing nicely.

Mrs. Sam Mickelson and daughter Olive left on Wednesday afternoon for Crookston to visit friends for a few days.

Miss Emma Olson and sister, Mrs. Rowe, left on Tuesday for Strathcona to visit with their brother who resides near there.

John Simonson spent Monday night attending to some business matters at Thief River Falls. He returned on Tuesday morning.

Mrs. D. Payne and children left on Monday evening for Nielsville to spend a couple of weeks visiting with her parents, Mr. and Mrs. L. S. Kolden.

J. O. Quisberg returned Monday from Stearns county where he spent a couple of weeks visiting with friends and doing some good missionary work for eastern Marshall county.

Taken Up—On Sunday, the 13th inst, by Fred Larson, 3 miles east of Holt, one white, heavy wool buck with bell on. Owner can have same by calling, proving property and paying expenses.

M. A. NELSON, M. D.
PHYSICIAN AND SURGEON
Office over Holt Merc. Co's store
HOLT, MINNESOTA.

Mr. Machten, who has been visiting at the Fred Heiser home for several months, returned Friday last to Marshfield, Wis.

S. S. Kolden made a business trip up into the Thief Lake country by team and was absent from Sunday until Tuesdy night.

Mr. and Mrs. Harry Montgomery returned on Monday from northwestern Canada where they have been visiting for several weeks.

Wanted —— Anyone having for sale a good, second-hand cook stove, number 9, is requested to notify this office giving full particulars.

W. B. Fuller was up from Thief River Falls on Wednesday checking over the business at the local elevator of the Hanson & Barzen Milling Co.

Strayed—From Hogan Anderson farm in Sec. 33, Holt township, about May 1st one red and white bull with small horns, 15 months old: Finder please notify Hogan Anderson, Holt, Minn.

We want a live correspondent in every township in Eastern Marshall county to send us the news of the locality and solicit subscriptions for this newspaper. We want bright young people and will make it worth their while to represent us.

Ed. Furr returned on Wednesday from Bismark, N. D. where he went to look over the land and possibly register for the opening of the Fort Berthold reservation. He was pretty much disapointed with the looks of that country and says it is not to be compared with this in any way.

E. M. Silbaugh arrived here from St. Paul on Monday and intends to remain permanently to look after his land east of nown. He is an experianced barber and intends to start a shop in the building between the Reierson and Kolden stores, doing his first days work here on Saturday.

The County Sunday School Association is an educational institution. It does not start new schools as that is the work of the denominations. It does organize the school after it has been started by the denomination. It trains and equips workers to run the school by means of leaflets, books, institutes, and conventions.

H. Ekerdalen was telling his friends here on Monday about a big moose that he saw out at his farm on Saturday. The animal was a monster, he says, and did not seem to be in very much of a hurry to get out of sight. Mr. Ekerdalen did not have any gun with him, but thought that if he had he would probably have tried a shot.

The largest amount of money ever paid to a farmer for one load of grain was paid to Martin Haugen of Wanger township, this county, on Friday last by Manager Headrick of the Farmers & Merchants Elevator. Mr. Haugen had on his load 27 sacks weighing in all 2,510 poumds, which at $11.50 per cwt, netted him $288.65.—Argyle Banner.

HOLT MERCANTILE Co.

Creamery Statement for July

The following is the statement of business done at the Holt areamery during the month of July:

Total cream received	38,500lbs
Average test	28.84
Butter fat	11,104lds
per cent overrun	18.37
Butter made	13,144lbs
Price paid to patrons	24cts
Total receipts	$3,053.05
Disbursements—	
Paid patrons by check	$2,624.64
Paid shortage for last month	17.53
Expense fund and supplies	281.55
Balance	129.33

The following received dhecks a-$40.00 and over:

Carl Larson	$77.88
John Knutson	63.39
L. L. Rosland	59.89
E. L. Nielson	59.08
Andrew Bjerk	49.92
A. Langlie	47.89
M. O. Halvorson	46.01
Fred Wegge	44.41
Ole Reierson	40.79
Ed Furr	40.65

J. A. SORUM; Secretary.

Considering the prevailing low prices for butter this year the above is a very creditable showing for a creamery that is practically new. It would seem that, with hay as plenty and cheap as it is here, it wonld be very easy for each patron to keep more cows and, consequently, draw bigger checks. If every patron will try to increase the number of cows the earnings of the creamery can be doubled in another year, and the wealth of the community increased accordingly.—Ed.

Killed By Vicious Bull

Riley Kezar, an old time resident of western Marshall county, was killed by a vicious bull early last week. Mr. Kezar with his son were at the Dan Wolf farm north of Warren, and he went to turn the bull out of his stall in the barn. When the door was opened the bull jumped at Mr. Kezar and pinned him to the wall crushing his life out. The beast had been dehorned and it was his weight that crushed the life out of the unfortunate man. Mr. Kezar was 55 years of age and has resided in the vicinity of Warren for the past 30 years.

Two Carloads From Iowa

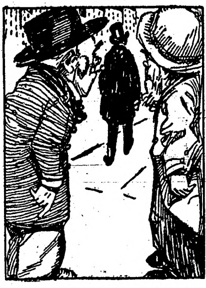
On Monday Carl and Olaf Dahl arrived from Carpenter, Iowa, with their families and household goods. They have moved out to claims east of Mud Lake to make their future home, and have hauled out lumber to build substantial improvements on the land. These are kind of people who make the most desirable settlers, and there is room for lots more of them in this part of the country.

Business Chance.

FOR SALE CHEAP—My property in Holt, consisting of good two-story building, large barn and good lot; centrally located. Cheap, if taken ac once. Easy terms.

SAM MICKELSON,
Holt, Minn.

A NEW NAME FOR IT



O'Brien—An' phwat sart av a docthor is Docthor Dunn?

O'Toole—Sure they till me he's one av them homely Pathricks.

Bring Us Some Samples.

We have numerous requests from southern Minnesota and Iowa point for samples of grains and other farm products raised in this district. If farmers will bring us in such sample we will distribute them where they will advertise this part of the country to good advantage.

SOO LINE OFFICIALS INSPECTED BIG DITCH

A party of Soo line officials made a tour of the country traversed by the big drainage ditches out in the vicinity of Grygla last Saturday to Monday. The trip planned by the state drainage board and others, announcin these columns last week, was, at the last minute, postponed indefinitely. It is promised that the state officials will make the trip a little later on, but there is no hing certain about it.

Just why the Soo party made this trip at this time is not given out, but it seem probable thas it was to determine if existing conditions will justify the early commencement of constructing the new line between Thief River Falls and International Falls. On the new Railroad and Warehouse Commissioners, map this new line is shown ar running through Germantown and Grygla, but there are those who claim that it will not touch either of those points, but will come closer to Mud Lake and cross the Beltrame county line a short distance northeast of Gatzke. During this trip, however, the party devoted particular attention to the country east from Liner, which would tend to prove that the line will be built through that territory.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

ROOM CAREFULLY SEALED.

An eerie tradition is recalled by the death a few days ago of "Squire" Thomas Green of the Old Hall, Poulton-Lancelyn, Cheshire, England whose family have been in possession of the estate since a period prior to the Norman conquest. There is in Poulton Old Hall a mysterious locked room which has never been opened except by a representative of the Green family. The hall and its lands have sometimes been let, but the Green family have always retained possession of this mysterious room, which is supposed to contain several relics and other family treasures. The last tenant would have given an increased rent for it if he could have had access to this room or could have cleared away the mysterious contents, but the owners refused to give up possession, and so the tenant left.

ECCLESIASTICAL LATIN.

For some time the pope and the vatican authorities have been occupied considering the pronunciation of Latin in the churches. While in the churches of France and some in England one hears "Deus qui fecit coelum et terram," the Italians say "Deous coui fetchit tcheloum" and the Germans "Fetsit tseloum." It follows that Roman Catholics when away from home find these divergencies on pronunciation somewhat difficult to follow; so the vatican is of opinion that there should be a uniformity of pronunciation. If there be any result from the vatican deliberations, it may be surmised that the Italian form will be adopted as most nearly that of the ancient Romans.

MIGHT INCRIMINATE HIM?

"Any of you at church last Sunday evening?" queried the bald-headed boarder.

It appeared that nobody present had been there.

"Well, the preacher, as it seemed to me, took advantage of my being in the audience to say this: 'Will all persons in this congregation who feel that they are saved please rise?'"

"Well, did you rise?" queried the inquisitive boarder.

"I refuse to answer."

CONFIDENT ASSERTION.

"Well, Charley, dear," said young Mrs. Torkins, "I don't know much about baseball—"

"You truly don't," replied her husband.

"But I'd be willing to leave it to the boys on the bleachers if I don't know more about the game than that umpire who gave three straight decisions against us."—Washington Star.

INFLAM-MATION AND PAIN

Cured by Lydia E. Pinkham's Vegetable Compound.

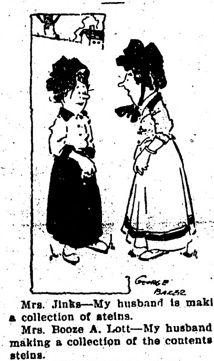
Creston, Iowa.—"I was troubled for a long time with inflammation, pains in my side, sick headaches and nervousness. I had taken so many medicines that I was discouraged and thought I would never get well. A friend told me of Lydia E. Pinkham's Vegetable Compound and it restored me to health. I have no more pain, my nerves are stronger and I can do my own work. Lydia E. Pinkham's Vegetable Compound cured me after everything else had failed, and I recommend it to other suffering women."—MRS. WM. SEALS 605 W. Howard St., Creston, Iowa.

Thousands of unsolicited and genuine testimonials like the above prove the efficiency of Lydia E. Pinkham's Vegetable Compound, which is made exclusively from roots and herbs.

Women who suffer from those distressing ills should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

If you want special advice write to Mrs. Pinkham, at Lynn, Mass. She will treat your letter as strictly confidential. For 20 years she has been helping sick women in this way, free of charge. Don't hesitate—write at once.

A DIFFERENCE.



Mrs. Jinks—My husband is making a collection of steins.

Mrs. Booze A. Lott—My husband is making a collection of the contents of steins.

In Strict Obedience.

Master Gregory Graham, aged three, had been having an ocean bath, and breaking away from his older sister he ran all dripping wet to the door of the living room, where Mrs. Graham was entertaining a caller from the fashionable hotel.

"Why, Greg," his mother greeted him, "you mustn't come in here like that, dear. Go straight upstairs and take off your bathing suit first."

A few minutes later Mrs. Graham turned toward the door in curiosity as to what sight there had sent her visitor's eyebrows up so high, and in the same moment her son's cheerful voice rang out:

"I took it off, mother, like you told me to. I'm coming in now for some cake."

GET POWER.

The Supply Comes From Food.

If we get power from food why not strive to get all the power we can. That is only possible by use of skilfully selected food that exactly fits the requirements of the body.

Poor fuel makes a poor fire and a poor fire is not a good steam producer.

"From not knowing how to select the right food to fit my needs, I suffered grievously for a long time from stomach troubles," writes a lady from a little town in Missouri.

"It seemed as if I would never be able to find out the sort of food that was best for me hardly anything that I could eat would stay on my stomach. Every attempt gave me heartburn and filled my stomach with gas. I got thinner and thinner until I literally became a living skeleton, and in time was compelled to keep to my bed.

A few months ago I was persuaded to try Grape-Nuts food, and it had such good effect from the very beginning that I have kept up its use ever since. I was surprised at the ease with which I digested it. It proved to be just what I needed.

"All my unpleasant symptoms, the heartburn, the inflated feeling which gave me so much pain disappeared. My weight gradually increased from 98 to 116 pounds, my figure rounded out, my strength came back, and I am now able to do my housework and enjoy it. Grape-Nuts food did it." Name given by Postum Co., Battle Creek, Mich.

A ten days' trial will show anyone some facts about food.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

SERIAL STORY

The Girl of My Dreams

A Novelization of the Play by Wilbur D. Nesbit and Otto Hauerbach

Novelized By **WILBUR D. NESBIT**

Copyright by W.D.Nesbit

SYNOPSIS.

Harry Swifton is expecting a visit from his fiancee, Lucy Medders, a Quakeress whom he met in the country. His auto crashes into another machine containing a beautiful woman and a German count. The woman's hat is ruined and Harry escapes. His sister, Caroline, arrives at his home to play hostess. Socrates Primmer, cousin of Lucy's, arrives with a hat intended as a present for Lucy. Harry is trailed to his home by the Count and Mrs. Gen. Blazes, who demands her hat, a duplicate of which she says has been delivered at Harry's house. She is in great fear lest her husband hear of her escapade. Lucy Medders and her father arrive and the count is hidden in one room and Mrs. Blazes in another. Harry is forced to do some fancy lying to keep Lucy from discovering the presence of the woman. The milliner, Daphne Daffington, who proves to be an old flame of Harry's, arrives to trace the missing duplicate hat and more complications ensue.

CHAPTER V.—(Continued.)

"No," Harry blundered. "It's for another woman."

Daphne drew herself up with the pose of a tragedy queen.

"Aha!" she said, in denunciatory tones. "So you're up to your old tricks, are you?"

Harry wilted at that, and could make no sufficient reply.

"Well," Daphne decided, "I'll make you the hat—on one condition. I'll get it finished this afternoon, provided that you and I—just our two little selves—shall have one of our old time cozy, comfy dinners tonight."

Harry was aghast. This was too much. The more he tried to get out of his trouble the more new troubles were invented for him.

"Daphne," he said, "I—I simply can't do that."

"Two years ago," Daphne reminded him, "you would have jumped at the chance to have the dinner, and never have bothered about the hat."

"I know, but, Daphne, it is impossible. You see, these guests will be here, and I can't be away when I should be entertaining them."

"They won't miss you," Daphne said, cruelly. "You're not so very entertaining."

"I know it—and I'm at my worst today. So," with a hopeful cadence in his voice, "you get me the hat and we'll have that little dinner some other evening."

"No dinner tonight, no hat today," was Daphne's ultimatum, when from somewhere in the house came the voices of Lucy and Carolyn calling to Harry.

"Great Scott!" he muttered. "This thing's getting worse! They mustn't see you here."

"They?" Daphne asked. "Who are they?"

"One is my sister; the other is—the other girl."

"Oh, goodness, Harry!" Daphne almost wept. "I didn't mean to get you into trouble. Hide me, hide me! Heavens! If there should be any talk about me—just when my millinery business is doing so nicely. You ought to be ashamed to allow an innocent girl to take such chances as this."

But Harry was hurrying her toward the library door. At first he had unconsciously started her toward the other one, but halted, remembering that Mrs. Blazes was there. He mutely directed her to go into the library, and then said in a hasty whisper:

"Don't pay any attention to the man in there. Just hide yourself in there a few minutes, and I'll get the girls to go back downstairs on some pretext."

As the door closed on Daphne he left the room and so he did not hear from the library the voice of the Count saying:

"Vell, py gracious! Liddle Daphne."

Nor the amazed tones of Daphne as she exclaimed:

"Why, Count! What are you doing here?"

CHAPTER VI.

For a time there was silence in the room. Then the door of one room opened and Mrs. Blazes peered anxiously forth.

"I wonder why he is so long getting that hat," she said to herself.

The door across from her began to open, and she hurriedly dashed back and closed her door. The Count and Daphne came from the library.

"Indeed," Daphne said, "he might have told me you were in there. But maybe he meant it as a surprise to me."

She simpered and peeped roguishly at the Count.

"I hope," the Count said, "it vas a surprise. To think dot now ve haff a meetings."

"The pleasure is all yours, sweet noble of teutonic blood," said Daphne, with fine sarcasm.

The Count looked at her with pique, shaking his head mournfully.

"To think!" he sighed. "After all I spend on you, den you leave me vaiting for you in such disgracefulness on der corner!"

Daphne tried to explain.

"Honest, County," she said, at which pet name he flinched. "Honest, County, I didn't mean to disappoint you, but a traveling gentleman I hadn't seen for a long time came through, and as I hadn't seen him for so long, I went to supper with him. You see, the trouble with you and me was the way we talked. Half the time I couldn't understand you and the other half you couldn't understand me."

The Count looked at her blankly. Her explanation did not explain at all.

"Such a deceitfulness!" he said. "And after I gave you my ring. How dared you keep it?"

The Count's haughty indignation over her having kept his ring was tinctured with a little twinge of conscience over the fact that, separated from them by only a thin door, was another lady to whom, that very day, he had given a similar ring. The Count had the habit of "wishing on" a ring, as an incident of his various flirtations. And no sooner did he wish it on then he began to wish it back.

"I didn't keep your old ring!" Daphne retorted.

"You didn't?"

"No. I gave it away to a gentleman friend."

"Vat!" the Count asked, in noble horror. "You gave my beautiful ring avay. Ach! To think of it, mit all its family unt historical significance, being on der finger of some common person!"

"Indeed," Daphne snapped. "He isn't any common person, I want you to know. He is the head of a noble family, a respected citizen and a particular admirer of mine."

The Count regarded her with an icy stare as he said crushingly:

"I am afraid den he iss not so particular as he might be."

For a moment the very air was tense between them. The Count glared at Daphne, and Daphne returned his glare with fiery interest. She leaned over until her sharp nose was within three inches of his face, and said to him in razory accents:

"You can't insult me. I've been insulted by experts!"

The Count jumped as though he had been pricked by a pin. This setting of him down as a nonentity, accompanied by a sharp snap of the finger, was a bit more cavalier treatment than he had ever received. He could think of nothing to say in reply. Daphne, now thoroughly angry, went on:

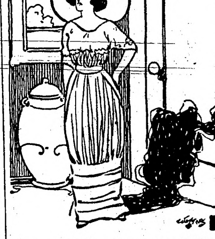
"I want you to understand that General Blazes—"

"You gave my ring to Cheneral Blazes!" the Count gasped.

"Sure," Daphne replied.

"Mein Gott im himmel!"

With one of his rings on the General's finger and the other on the finger of the General's wife, the thought was too much. The Count dropped limply into a chair and wagged his head grimly.



"The Idea!" She Ejaculated. "I Won't Breathe the Same Air With That German Foreigner!"

"Both rings in der same family! Ach, Gott!" he murmured.

Harry hurried into the room, and stopped in astonishment at sight of them.

"Here!" he exclaimed, "you shouldn't have come out here. Get back in the library for a minute and then I'll let you escape."

He smiled easily now, for he believed he had arranged matters so that he could eliminate these people from his home and have some peace the rest of the day.

Daphne and the Count meekly entered the library, and Harry ran to the door of his bedroom and was about to open it when he heard Carolyn calling him:

"Oh, Harry, where are you?"

Mrs. Blazes, hearing him at her door, opened it and was now coming out, when, to her utter astonishment he shoved her back into the room and pulled the door to.

"I'm coming," he called to Carolyn, and hurried out again.

Simutaneously the door of the library opened, and Daphne emerged.

"The idea!" she ejaculated. "I won't breathe the same air with that German foreigner!"

Then she heard some one approaching the room, and consternation seized her. She looked nervously about for a place of concealment.

"Where can I hide? Where can I hide?" she wailed.

The voices came nearer, and desperately she rushed to the door of the bedroom wherein was Mrs. Blazes. Opening the door, she dashed in.

With mutual exclamations of recognition she and Mrs. Blazes saw each other. And the door was still trembling shut when Lucy and Harry strolled into the den.

Sisters in affliction and adversity, Mrs. Blazes and Daphne were not long in confiding to each other, in bated whispers, the reasons for their presence. Daphne's position was one well calculated to upset her nerves. Outside were two men with whom she had flirted, one of whom wanted a ring he had given her and which she had presented to the husband of the lady with whom she was talking.

On the other hand, Mrs. Blazes was not happily situated. Without a perfect duplicate of her hat she felt that she could not go home. She could not leave the room now, to go home, anyway.

And now, locked in with her, was the only person who could make a duplicate of her hat.

"What are we to do?" she tearfully asked Daphne.

"Be quiet and listen to what goes on out there," Daphne told her. "Mr. Swifton is just as anxious to get us out as we are to get out. If some one else doesn't drop in and have to be hidden, I think he will work it some way."

"Well, if I get out of here undiscovered," said Mrs. Blazes, raising her hand to wipe away a tear, "I'll never flirt again."

Daphne's sharp eyes saw a familiar ring on her finger.

"What a lovely ring, Mrs. Blazes!" she dissimulated. "Did your husband give it to you?"

"What? Oh, this ring?" Mrs. Blazes answered guiltily, folding her other hand about it carelessly, so as to conceal it. "Oh, no, that's just a ring that belongs to a friend of mine."

Daphne could not understand it, and yet she could not ask any more questions. She contented herself with saying:

"I've heard that sometimes rings brought bad luck."

CHAPTER VII.

When Harry and Lucy strolled into the den, just after Daphne had succeeded in getting into the room with Mrs. Blazes, they were followed by Mr. Medders. Mr. Medders was finding many things to interest him in Harry's home. This was the first time he had ever been where he might saunter from room to room and examine pictures, books and bric-a-brac—many of which were of a kind that were not popular in his own environment.

"Oh, Harry," Lucy said, "this is just the most delightful visit!"

"I'm doing everything I can to make it pleasant for you, and I hope nothing happens to spoil it," Harry said.

Medders, moving about the den, stopped at the door of the library.

"What is in there, my boy?" he asked. "I haven't been in that room yet."

"There?" Harry repeated, nervously. "Oh, that's just a junk room."

"Thee means a bunk room," Lucy corrected him, mischievously.

"Yes," Harry said. "It's a junk bunk room."

"Varily," said Mr. Medders, "a junk bunk room must be interesting."

And before Harry could stop him he had opened the door and started in, only to step back and say:

"Why, there is some one in here."

"Is there?" Harry asked, affecting surprise, hastily trying to think how big the headlines would be in the papers the next day.

"Why, who can it be?" Lucy asked.

Harry, feeling that all was lost, still racked his brain for some half-way reasonable explanation of the presence, as he thought, of Daphne as well as the Count, in his library.

"Why, you see," he began, "they—they are—"

"They?" Medders said. "There is only one man in here."

Harry was lost for language and bereft of thought when the Count stalked majestically from the door. No one else could be seen in the library. Harry looked swiftly through the doorway into every corner of that room, asking himself: "Where the dickens has she gone?"

She was no longer there, that much was certain. And he turned to see the Count bowing stiffly to Mr. Medders and Lucy. The Count held a book in his hand, and as his head rose from one of his deep bows he winked earnestly at Harry—a helpful, friendly wink, which was as though it said for him not to worry, that the Count would back him up in any story he told.

"I beg your pardon," Harry rallied. "I had quite forgotten the Count. Miss Medders, Mr. Medders, this is the Count von Fitz."

The Count bowed beautifully, Lucy courtesied, her father shook the Count's hand—and still everything was not explained.

"And is the gentleman thy instructor, perhaps?" Medders asked, noting the book the Count held, and associating it with the fact that the Count had been in the library.

Harry fairly bubbled with joy at this helpful suggestion, all unconsciously given by Medders.

"Yes," he said, "he is my German tutor."

(TO BE CONTINUED.)

What He Meant.

"I thought from what you said to me yesterday that old Skads had lost all his money?"

"What did I say?"

"Why, you said that the last time you saw him he was at the end of his rope."

"Oh! You see the last time I saw him he was just finishing a campaign cigar someone had given him."

Always the Best Way.

It takes courage to keep quiet and go on. It is not an easy way, but it is the way which, having taken, no one ever regrets.

HISTORIC OLD HOUSE

Brought to Kansas From Ohio by Boat.

Frame Structure Transported in Sections From Cincinnati Half a Century Ago Once Housed State's First Governor.

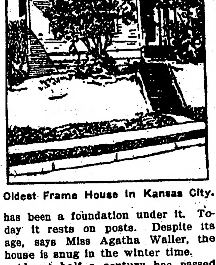
Kansas City, Kan.—Within a few hundred feet of the site of the new city hall and almost under the shadow of the beautiful St. Mary's Catholic church there stands the oldest frame house in this city. It is the home of the Misses Amelia and Agatha Waller, daughters of John Waller, one of the early settlers of Wyandotte county.

Besides being the oldest house of its kind in the city this residence has the distinction of once having sheltered for a period of several months the first governor of Kansas, Charles Robinson. The Wallers have learned that he once had his office in the front room of the house, but whether he resided in the remainder of the dwelling they do not know. His period of residence in the house was in the early '60s, before a permanent state capital of Kansas had been selected His home was near Lawrence, but business interests brought him to Kansas City, history says.

This little house—it is a one-story structure with four rooms now, and it used to have but three—was brought here from Cincinnati on a boat. It is believed that the house was occupied in the Ohio city. When it was brought down the Ohio river, and up the Mississippi and the Missouri, and into the Kaw, it was in sections. The sides had been taken apart and the weather boarding removed. The old carpenter here avers the weather boarding was fastened to the frames with wooden pins. Miss Agatha Waller thinks the house was plastered soon after it was put together here.

Just who brought the house to Kansas City has not been established. It is known, however, that it arrived in 1858 and at that time Samuel McIntyre, one of the men who platted Wyandotte county, owned the property upon which the house stood. It is probable, therefore, that it was he who was responsible for the house being transferred to the banks of the Kaw.

The house is still well preserved. The owners of it seldom have occasion to have it repaired. There never has been a foundation under it. Today it rests on posts. Despite its age, says Miss Agatha Waller, the house is snug in the winter time.



Oldest Frame House in Kansas City.

Almost half a century has passed since John Waller bought the house and several adjacent lots. His first purchase in that neighborhood was of 14 half lots and the house. For this he paid $350. Today any one of these lots would be worth several times that amount.

"When my father bought the house," said Miss Agatha Waller, "it set several lots east of its present position and faced on Fifth street. The porch which runs along the side of the house in its present position was then said to be on the front of the house. It was a neat house. We were proud of it and its fame of having been brought here from 'far off' Cincinnati. Of course in these days of fast travel Cincinnati does not seem far away, but it seemed a long distance then."

Iceberg Like Ship.

New York.—A vision in ice of Hendrik Hudson's famous "Half Moon" as she is said to have looked when she sailed up the Hudson river 300 years ago was sighted by the passengers on the steamer Nieuw Amsterdam. The iceberg was 400 feet long and 165 feet high and so near were the passengers to it that some of them claim they could make out the icy figure of a man at the tiller.

Even the masts and deck gear were clearly outlined and Captain Roggeveen remarked that it was the strangest of the many strange icebergs he had seen at sea.

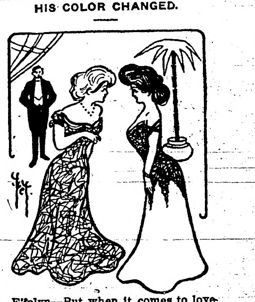
Penalty for Stealing Papers.

Washington, D. C.—Seven years in the reformatory for stealing four newspapers from a porch in Washington was the sentence imposed by Judge de Lacy on Harrison Ward, aged 14 years.

But One Cat to a Household.

Wilkesbarre, Pa.—Only one cat will be allowed in a household, according to a decision of the health officers of this city, when they ordered that Mrs. William Church dispense with 11 of her 12 cats.

HIS COLOR CHANGED.



Evelyn—But when it comes to lovemaking Harold is rather green, isn't he?

Myrtle—Not now.

Evelyn—Indeed!

Myrtle—No, he's blue; I rejected him last evening.

LAWYER CURED OF ECZEMA

"While attending school at Lebanon, Ohio, in 1882, I became afflicted with boils, which lasted for about two years, when the affliction assumed the form of an eczema on my face, the lower part of my face being inflamed most of the time. There would be water-blisters rise up and open, and wherever the water would touch it would burn, and cause another one to rise. After the blister would open, the place would scab over, and would burn and itch so as to be almost unbearable at times. In this way the sores would spread from one place to another, back and forth over the whole of my upper lip and chin, and at times the whole lower part of my face would be a solid sore. This condition continued for four or five years, without getting any better, and in fact got worse all the time, so much so that my wife became alarmed lest it prove fatal.

"During all this time of boils and eczema, I doctored with the best physicians of this part of the country, but to no avail. Finally I decided to try Cuticura Remedies, which I did, taking the Cuticura Resolvent, applying the Cuticura Ointment to the sores, and using the Cuticura Soap for washing. In a very short time I began to notice improvement, and continued to use the Cuticura Remedies until I was well again, and have not had a recurrence of the trouble since, which is over twenty years. I have recommended Cuticura Remedies to others ever since, and have great faith in them as remedies for skin diseases." (Signed) A. C. Brandon, Attorney-at-Law, Greenville, O., Jan. 17, 1911.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 3 K, Boston.

Faces Included.

Howell—He has a weather-beaten face.

Powell—Well, the weather beats everything.

LADIES CAN WEAR SHOES one size smaller after using Allen's Foot-Ease, the Antiseptic powder to be shaken into the shoes. It makes tight or new shoes feel easy. Gives rest and comfort. *Refuse substitutes.* For FREE trial package, address Allen S. Olmsted, Le Roy, N. Y.

A Commuter's Explanation.

The man in the iron mask explained. "They assured me there were no mosquitoes here," he cried

Cole's Carbolisalve quickly relieves and cures burning, itching and torturing skin diseases. It instantly stops the pain of burns. Cures without scars. 25c and 50c by druggists. For free sample write to J. W. Cole & Co., Black River Falls, Wis.

Is life worth living? I should say that it depends on the liver.—Thomas Gold Appleton.

Firmness is feminine and obstinacy is masculine—so says a woman.

Whittemore's Shoe Polishes

Finest in Quality. Largest in Variety. They meet every requirement for cleaning and polishing shoes of all kinds and colors.

GILT EDGE the only ladies shoe dressing that positively contains OIL. Blacks and Polishes ladies' and children's boots and shoes, shines without rubbing, 25c. "French Gloss," 10c.
DANDY combination for cleaning and polishing all kinds of russet or tan shoes, 25c. "Star" size, 10c.
QUICK WHITE makes dirty canvas shoes clean and white. In liquid form so it can be quickly and easily applied. A sponge in every package, so always ready for use. Two sizes, 10 and 25 cents.
If your dealer does not keep the kind you want, send us his address and the price in stamps for a full size package.

Cement Talk No. 2

Portland Cement does not come from Portland, Maine, or Portland, Oregon, and it was not first made at either of these places. It is called *Portland* because it was given this name by the Englishman who first made it. He called it *Portland* because he thought it resembled certain natural deposits on the Isle of Portland in England. *Portland Cement* is the fine powder produced by pulverizing the clinker resulting from the burning together of various materials of proper chemical composition. In the case of *Universal Portland Cement,* these raw materials are blast furnace slag and pure limestone. There are many brands of *Portland Cement* on the market, produced by different manufacturers. *Universal* is one of the best known and highest grade *Portland Cements.* You can always tell it by the name *Universal* and the blue trade mark printed on each sack. Forty million sacks of *Universal* are made and used yearly in this country. If you have any *concrete* work to do, you will make no mistake by using *Universal Portland Cement. Universal* is for sale by representative dealers everywhere.

UNIVERSAL PORTLAND CEMENT CO.
SECURITY BANK BLDG., MINNEAPOLIS
ANNUAL OUTPUT 10,000,000 BARRELS

NOT A BRITISH UNIT IN IT

Irishman Would Not for a Minute Allow the Possibility of Such a Thing.

George Mockler has just returned from an investigation of what coal is costing some of the other cities. He brought this story from Baltimore:

An Irishman there inherited a coal mine up in the state. He immediately entered the lists for one of the big coal contracts and went around to say a good word for his coal.

The man who was letting the contract heard him a moment, and then interrupted with:

"That's all right, but how about British thermal units?"

The other, being new to the coal business, did not know that coal is rated now according to the British thermal units in tests.

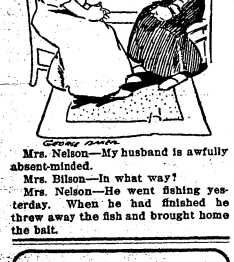
"Phat's that!" he said.

"How many British thermal units are there in your coal?"

The Irishman blinked his eye and snorted a bit.

"British thermal units is it?" he said. "Why, there ain't a wan in it."—St. Louis Post-Dispatch.

WAS IT ABSENT-MINDEDNESS?



Mrs. Nelson—My husband is awfully absent-minded.

Mrs. Bilson—In what way?

Mrs. Nelson—He went fishing yesterday. When he had finished he threw away the fish and brought home the bait.

A Large Package Of Enjoyment—

Post Toasties

Served with cream, milk or fruit—fresh or cooked.

Crisp, golden-brown bits of white corn—delicious and wholesome—

A flavour that appeals to young and old.

WILL ATTEMPT FLIGHT ACROSS AMERICA

LIEUTENANT DE CONNEAU

LIEUTENANT DE CONNEAU of the French army, who flies under the name of A. Beaumont, has announced that he will come to the United States and attempt to fly across the American continent. The lieutenant, who recently won the $50,000 prize offered by the London Daily Mail for the fastest circuit of England and Scotland on an aeroplane, is probably the most famous and fortunate of the long-distance aeroplanists.

BIG BOATS TO STAY

London Dispatch Regarding Warships Is Not Believed.

United States Naval Officers Doubt Report From England That Dreadnoughts Will Be Supplanted by Smaller Vessels.

New York.—Naval officers stationed at the Brooklyn navy yard are inclined to doubt the London dispatch, in which was predicted the passing of the dreadnought type of battleship in favor of smaller vessels of equally heavy armament.

In their opinion Great Britain and the other nations of the world will even enlarge the size of the present-day battleships.

Rear Admiral E. N. C. Leutze, U. S. N., retired, commandant of the Brooklyn navy yard, said:

"It is hard to believe England's future navy policy is to be toward the reduction in the size of its war vessel. We have found the dreadnoughts the most effective fighting machines yet produced and consequently we will continue to make our vessels in greater size.

"I can see no object unless it is for the purpose of economy in the report that England is to build vessels of smaller size. England may be listening to the demands of the persons who object to naval expenditures. Of course I can make no prediction of what our own future program will be, but from my personal viewpoint we will add to our fleet of dreadnoughts."

The man who has been sent to the Brooklyn navy yard to lay the hull of the battleship New York, Naval Constructor Robert E. Stocker, U. S. N., could not reconcile his experience in shipbuilding with the report from London.

"We need all the dreadnoughts we can get," he asserted. "In the dreadnought has been found a type which is an improvement over everything built before.

"The qualities of speed, gun strength and endurance cannot be contained in a bulk smaller than at present incloses them. Our engines give a maximum of power with a minimum of space; our guns are included in the narrowest expanse with possible safety.

"If we want greater speed and secure it in the size of the vessel, the armament must be sacrificed to a corresponding extent. Inversely, if we are to increase the armament of our dreadnoughts on a smaller vessel we would have to dispense with some of our speed."

Capt. G. E. Burd, U. S. N., in charge of the machinery department of the navy yard, said it is not possible with the present engines to economize space without losing elsewhere.

"The one thing that would help us spare some of the space now occupied by the boilers and engines of our battleships," he said, "would be a new engine that would improve on the turbine and the reciprocating engine we now carry."

COMPLEXION ROOM IN CAFE

Chicago Hotel Bids for Patronage by Furnishing Materials to Make Women Beautiful.

Chicago.—One of the big Michigan avenue hotels is making a bid for women patrons through the novelty of a "complexion room."

No matter whether the fair diner's big hat is crowning a medley of jet-black rats, puffs and red hair or whether her dome is topped with a bunch of drug store straw, the coiffure will look stunning in the "complexion room." No matter whether the roses on the cheeks were procured at the corner chemist's or whether her countenance in general is of the "marble" variety, she will "get away with it" in the "complexion room." Said the president:

"You know that certain colorings, decorations, wall paper and floor coverings will set off to disadvantage some complexions, especially by candle light or at night, making them look far from handsome. We will overcome this and make the cafe a veritable complexion room that will enhance the beauty, natural or artificial of any woman."

Amazing Nap of a Tinsmith

Philadelphian Is Found Fast Asleep With His Head Hanging Over Roof of Tall Building.

Philadelphia.—Taken into custody while soundly sleeping on the roof of the house at 634 North Front street, with his head hanging over the front eaves, Robert Morris, 22 years old, of Merchantville, is in a quandary as to how he reached his elevated slumberland and has the wiseacres at police headquarters puzzling their wits endeavoring to solve the mystery.

Passing along the street early the other morning two pedestrians were startled when a derby hat dropped at their feet. Glancing up, they were amazed to observe the head of a man protruding over the eaves. Their calls in a vain effort to attract the attention of the owner of the head awakened most of the neighbors in the block, and when the situation was explained the phone wires into the city hall carried many requests for the presence of policemen.

The first district patrol wagon was sent to the scene, and when the crew gained the second story roof by means of the third story windows of the residence of Joseph Dowling, on the corner, the man was still in slumberland. Even vigorous shaking failed to arouse him, and with the assistance of Mr. Dowling the sleeper was dragged to the street via the Dowling home with many excited residents looking on in wonderment.

Waking up at the city hall, Morris revealed his identity, and was dumfounded when the circumstances leading up to his arrest were sprung on him. He said he had no recollection of going to the roof, and was unable to enlighten the police as to how he got there. Morris is a tinsmith by occupation and one of the theories of the police is that he shinned up a rain spout while laboring under the hallucination that he was in working togs making roof repairs.

BARKING OF DOGS FORBIDDEN

Beach Order of Eastbourne Town Council Is Severely Criticised by Veterinary Surgeon.

London.—The Eastbourne town council the other day adopted a by-law imposing a fine of 40 shillings ($10) on owners of dogs which bark on the beach. The debate that preceded the vote was an animated one, one member describing the proposal as "frivolous and irritating."

A surgeon belonging to a well known veterinary institution is of the same opinion. He says: "To restrain dogs from running about and barking is exactly equivalent to preventing children playing and laughing. The by-laws will mean that dogs will have to be taken to the shore on leads, and their owners will have to punish them if they get excited, or pleased, and bark.

"Barking is an exercise which is good for dogs' lungs and helps to keep them fit, and to restrain the animals as the Eastbourne people wish to do will be very good for veterinary surgeons, but very bad for the dogs.

"Another aspect of the case is that this unnatural restraint will have a strong tendency to make the dogs sullen and savage, for the dog that is always checked and reproved develops a very bad temper.

"The natural, happy, healthy dog barks just as the child laughs and shouts, and there is no better way to keep a dog fit than to excite him to bark."

Long Lost Wealth is Found

Persistent Mountaineer Rediscovers Gold Ledge After Twenty-Three Years—Others Gave Up.

Spokane, Wash.—A search of 23 years for what may prove to be a rich deposit of gold has at last been brought to a successful conclusion by a persistent prospector, F. A. Schnicke. He has come out of one of the wildest parts of the wild Cascade mountains with specimens of gold bearing ore that promise a fortune when the ledge from which he took them is developed. He has a chart of the route that will lead him back when he has formed the party to help him.

It was in the summer of 1888 that Amos White, a mountaineer and prospector, came staggering out of the Cascades in the vicinity of Mount Adams and showed ore like that which his successor is now showing. He got backing and tried to take a party in to hew a way to his ledge. Deep snows the following winter stopped him, and when he tried to go in the summer forest fires raged and prevented him from carrying out his plans. This ill-luck followed him for two years, and then exposure brought on illness that killed him.

Just before he died White gave a crude map of the location of the gold ledge to John Snyder, a close friend. This showed the ledge to be near the shore of a small lake somewhere on the western slope of the Cascades and under the shadow of Mount Adams. Snyder found that forest fires had wiped out some of the signs by which he was to be guided and he could not locate the lake. He pursued the quest for 13 years and then gave the chart to Marion Locke, a friend. Locke went out to find White's ledge and spent a long time in the search. He was equally baffled, but fortune was kind to him, for in his wanderings he discovered the McCoy Creek mines which have since made him wealthy.

It was two years ago when the final effort was begun. Five men, including Schnicke, who called themselves "The Lucky Five," went into the wilderness. One by one all abandoned the search except Schnicke. Curiously he made the discovery at a place visited before by himself and others interested in the search but not recognized. It was a small body of water called Badger lake. He came upon it from a new angle and something about it struck him as being in accord with the chart. He searched for an old camp that White had marked and after some heavy work discovered it. He then had little difficulty in locating the ledge and finding the specimens of ore. He has filed his mining claims on all the outcroppings he could find and expects to go back and begin work before the summer is over.

WONDERFUL NEST IS FOUND

Abode of Stork Built on Top of Cathedral of Colmar Weighs Three-Quarters of a Ton.

Berlin.—An investigation of a stork's nest built on the top of the Cathedral of Colmar in Upper Alsace, brought wonders to light. The nest was about thirty years old, measured six feet across, and was five feet in height. It weighed three-quarters of a ton, and was so solid that pickaxes had to be used in destroying it. But it contents were more marvelous still. It was made of wood and clay; and its sides concealed among other things 17 stockings, five fur caps, the sleeve of a silk gown, three old shoes, a large piece of leather and four buttons that had belonged to a railway porter's uniform. Two dozen large sacks were filled with the treasures that the industrious storks had hoarded for themselves

No Wonder.

"What's your husband so angry about?"

"He's been out of work six weeks."

"I should think that would suit him first rate."

"That's it! He's just got a job."

NOTES from MEADOWBROOK FARM

By William Pitt

Weeds can be kept under by frequent cultivation.

Clip off the tops of early celery plants in the seed bed.

The best chemical to use for killing Canada thistles is coarse salt.

The idle curry comb and the fat horse seldom live in the same barn.

Orchards in full bearing may be seeded to grass and pastured with sheep.

The dairy cow is worth more than the beef steer whatever way you look at her.

Whenever you discover a sheep limping along, catch him and examine his feet for rot.

The old spring houses that are found on many farms tell of the early experiences in dairying.

Cantaloupes, watermelons and citron can only be profitably grown in a deep mellow loam soil.

By sowing a pinch of lettuce seed every ten days there will always be tender salad on the table.

The winter dairyman is the coming man, but he cannot afford to milk in a cold, dirty stable or barn.

Breeding ewes should not be too fat; see that they are in a strong, healthy and vigorous condition.

Pick out the breed you like best and stick to it; study up everything you can about that particular breed.

One of the difficult problems for the poultryman to solve is how to easily provide pure, fresh water for his fowls.

Few dairymen realize the tremendous significance of the cream trade that has been developed during the past few years.

If you want to raise a good crop of mice and insects that will damage the orchard trees, let the weeds and grass lie thick on the ground.

The cows should be milked in the barn during the summer, but the barn should be kept just as clean as it is in the winter time.

Keep the cultivator busy. Don't let the weeds get ahead of you. Remember that they use the plant food that should go into your crops.

Be sure that you furnish proper quarters for the farrowing sow. You can't afford to lose a single one of the little "squealers" this season.

Never give drugs to a horse any more than you would to a baby unless he is downright sick. Shutting off his feed will cure all minor ills.

No cow can do her best or even keep up a normal flow of milk when compelled to stand out in the hot midday sun of August and fight the flies.

One of the most important things in running a dairy successfully is brains. Brains must be applied by every branch of work if the best profit is to follow.

The weak and wabbly fence is an invitation to the cattle to try the other side and it always works a hardship, especially so during the busy season of the year.

No farm should be without some sheep; they clean up the weeds, make fine fertilizers and wool, and produce lambs, all of which may be turned into a good profit.

Diversified farming is adapted to the man who does intensified thinking. The intensive thinker is always a success as a farmer or any other occupation where talents lead him.

The pig that has been supplied with an abundance of pasture and a small grain ration during the summer should weigh from 150 to 175 pounds by the latter part of September.

Duck eggs are in demand by confectioners, as they import a glaze to their icing, which cannot be had with hen's eggs. For making plum pudding, duck eggs are more economical than those of fowls, being both larger in size and richer.

Too many chicks in one yard, coop or brooder is disastrous. Older chicks will trample on and crowd out younger ones, and the ones last hatched stand small show for feed, growth or even life. It is best to separate broods widely over the orchard.

In grading up the chickens cull all but the most vigorous.

Mutton breed lambs should receive grain as early as possible.

Women are better fitted by nature than men for poultry keeping.

Not enough attention has been given to the character of seed corn.

The best fertilizer for asparagus is rotted manure from grain-fed horses.

The farm is the ideal place for growing all kinds of poultry for meat and eggs.

Feed your fowls a sufficient amount of animal food, plenty of vegetables and bulky foods.

Young trees must be carefully cultivated, kept clear of weeds and the soil loose and mellow.

To dispose of a crop at satisfactory prices is often a more difficult problem than to produce it.

A horse that is too straight in his posture jars himself and gets all the concussions of the road.

The thermometer must be used as regularly in the dairy during the summer as during the winter.

If a soil lacks water some form of fertilizers are a positive detriment if they are present in abundance.

It is common sense that a mature sow will produce larger and more perfect pigs than a very young one.

Butter made in a sanitary dairy is always easier to keep than that which is made under poor conditions.

Don't let the buck run with the does when his breeding season is over, but confine him in a pen by himself.

Dairy-bred stock is scarce, and it will take many years to apply the rapidly increasing demand for dairy-bred cattle.

Beans can be turned into cash the quickest of any farm crop, as it is possible to sell them in ninety days from planting.

Hogs will not thrive on sour and decomposed food any more than men will. See that they get fresh, clean water to drink.

Cabbage is one of the easiest vegetables to start from seed and to transplant and to be made to grow in the garden or field.

An incubator will not run itself any more than an automobile will. A human brain must stand back of the best machine invented.

Women as a rule are more progressive and quicker to seize a new idea and put it into practice in the poultry yard than the sterner sex.

The fall fresh cow is the preferable cow and if you have not come to realize this, just try it this year and see if you will not be readily converted.

Sunshine is necessary in the milk house in the winter time, but just now all the shade that can be found will be acceptable. Trees and vines help.

The condition and the appearance of the creamery should be the very best for this will have an influence on getting favorable market for the butter.

Spring is the natural time for young animals to be born and they do better, all other things being equal, when they are ushered into this world at that time of year.

It pays to supply the fowls, especially growing ones, with charcoal, ground bone, either fresh or dry; oyster and clam shells, and a continual supply of best grit.

A good way to avoid the credit system is to grow the living at home. It is usually possible to grow the most expensive, yet the most necessary, articles of food on the farm.

At our present rate of deforestation fuel and fencing materials will be very scarce within a few years. Plant waste lands in forest trees to supply the timber required on the farm.

Arrange to save seed of the best varieties of potatoes, pumpkins, squashes and other garden products for next season's planting. Then you will be sure of plenty of good seed.

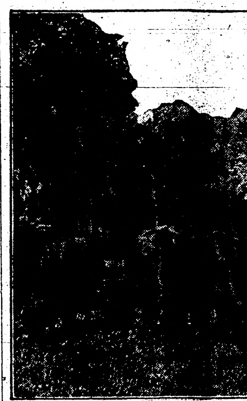
Many fail with sheep because they fail to keep the breeds that are best adapted to their farms and do not raise the kind that the market demands and is ready to pay the highest price for.

Most farmers raise chickens by the natural process, and that is all right so long as you do not care to raise more than, say, 100 chickens; but when you get up into large numbers incubators are necessary.

Don't allow hogs to be crowded in their sleeping quarters. Overcrowding results in coughs, lung fever and quite frequently, in the smaller, or weaker, ones becoming smothered from overlying. Hogs are mortgage lifters, but if allowed to "root hog or die" the lifting power is not great.

AGRICULTURE AND LIVE STOCK ARE MAINSTAYS OF HUMANITY

England, Home and Birthplace of Greatest Breeders and Farmers World Has Ever Known, Owes Honored Position to Aristocracy Who Acquired Ways of Improving Soil and Animals.



A Bunch of Fat Steers.

(By CAPT. A. H. WADDELL.)

The most useful citizen the country can produce is the man who looks upon the soil of the earth and says, "What can I grow from it or produce upon it?"

Agriculture and live stock are the main stays of humanity, and it is to the husbandman and breeder that kings and princes as well as the humble peasant must turn with thankfulness and gratitude not only for the blessings of life, but for existence itself.

Great Britain, the home and the birthplace of the greatest breeders and farmers the world has ever known, owes this honored position to the aristocracy of that country. It was these people who of their means and abundance sought for and acquired the ways of enriching and improving the soil and the animals that grazed upon it.

Let an example by the highest in the land, the country squire, the gentleman farmer, and eventually the tenant farmer himself, each to a greater or lesser extent, strive to copy the teachings of the lords of the manor until a keen rivalry of the most friendly nature sprang up between landlord and tenant, in a contest for supremac. in the productions of the farm and the live stock that were bred thereon.

Agricultural shows sprang up in the various counties at which were to be seen the great draft horses, cattle, sheep and swine of the large landed proprietors, standing side by side, though in lesser numbers, with those of the tenant farmer and even the humble cottager. Looking on and keenly observant, could be seen the noble lord with his wife and children as well as the tenant farmer and the cottager with all the members of their households and waiting for the verdict of the judges who in those early days stamped themselves as the master breeders, and whose names are written down upon the role of honor of England's great breeders and agriculturists.

Today, not only do the titled people, country gentlemen and farmers of that land continue in their breeding and its still further improvement, but the professional and business men of the towns and cities have taken it up to such an extent and with such interest and consummate skill, that it is difficult to find a man of wealth who has a taste for breeding and farming who is not occupying his leisure moments in this way.

It is this splendid state of affairs that has made breeding and farming what it is in Great Britain today, and while that glorious old country can learn much from the great, young, robust and healthy United States, it is gratifying to see American gentlemen of wealth taking a lesson from the mother's book and going in for legitimate methods of pedigreed stock-breeding and advanced modern farming.

The example that these gentlemen are setting in this country will be followed by the same wholesome and beneficial results in regard to farming and pedigreed stock-breeding as was achieved by the pioneers in England years ago, until we shall eventually find all the sections of this country best fitted by nature for the highest class of farming and breeding, occupied by gentlemen who are now leading the way and setting this splendid and useful example.

BAD SHOEING INJURES FEET

Other Troubles Cause Horses to Step Gingerly When Extended—Good Remedy Is Recommended

(By J. BAILEY BRUCE.)

Owing to bad shoeing and also many other causes many horses suffer with contracted feet.

The heels are narrowed and the horse steps gingerly with a desire to extend himself when forced to trot or gallop.

The writer is now using a horse 21 years old and when he drove him for the first time in December last saw that he experienced great difficulty in extending himself and especially on rough or stony roads.

He was shod with heel calks on the front as well as the hind feet and it was very perceptible that the heels of his front feet were too narrow.

After three unsuccessful trials with regular blacksmiths the horse was examined by a competent veterinary surgeon who pronounced his trouble to be contracted heels.

He had them shod perfectly level in front, springs were placed in between the back of his shoes to keep tht heels spread and a piece of sole leather was tacked across the hllows of the hoof below the hoof and the shoes to protect the sole of the foot and break the jar of traveling on rough and stony places.

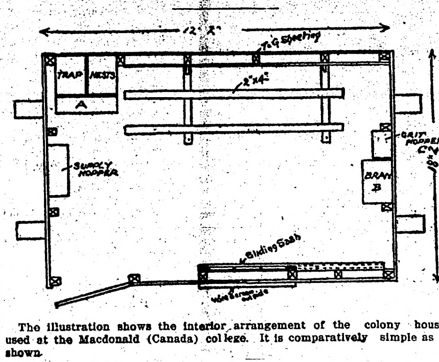
About once of twice a week a hoof ointment consisting of one pint of Neat's foot oil with two tablespoonfuls of oil of tar was applied on the outside of the front feet with a soft rag and then, raising the edge of the leather, a little is poured over the sole of the foot and a few drops in the heel cleft.

Since the last shoeing and following the treatment above described the horse has improved wonderfully in his road work and rarely flinches, even going at a 12-mile-an-hour slip.

Range Sheep.

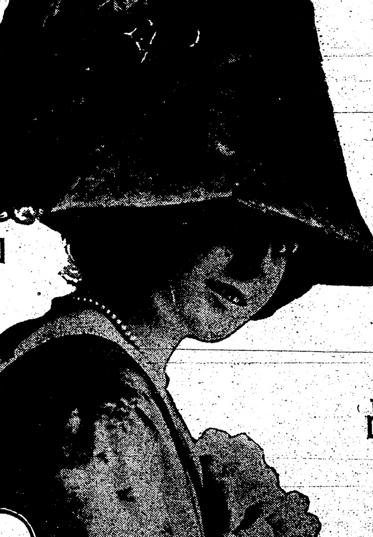
It is estimated that about 5,000,000 range sheep are fattened in the corn belt each season.

INTERIOR OF COLONY HOUSE



The illustration shows the interior arrangement of the colony houses used at the Macdonald (Canada) college. It is comparatively simple as is shown.

"Liberty Bell" Shape



Photograph by Hummel, from Underwood & Underwood.

THIS piquante and patriotic article of headwear in both comfortable and becoming. It is the first of the fall fashions to reach these shores from France, where it was especially designed for the "Les Belles filles Americanes."

The shape of the hat clearly resembles that of the historic liberty bell. The material is a rich brown plush, and the willow plume is white above, shading off into a hue matching that of the body of the hat. It is one of the season's favorites.

BAG FOR DRESSES OR HATS

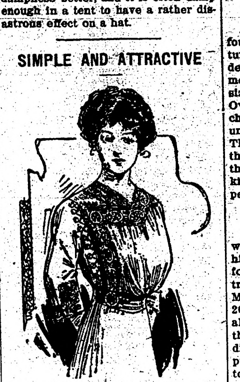
Makes for Comfort in Traveling, and Also Preserves the Articles Enclosed.

A scheme which a girl will find a great comfort in any place where she has insufficient closet space is a bag to hold her hat or her dress. In traveling it is well to take one or more of these bags, and in a camp they are almost indispensable. A girl can very quickly make all she wants of them, and if she wants to economize space they can be made of silkoline, which folds up into the smallest kind of a package, is light in weight and very inexpensive.

For a hat, make a bag three-quarters of a yard deep and half a yard wide, with a drawing string at the top. The bag is hung up by this string and the hat is kept free from dust and out of the way. This measurement is for a hat of ordinary size; if your hat is an unusually large one the bag must be larger.

For a dress the bag should be about five inches longer than the dress itself, the width being a little more than enough to slide the dress in easily. When camping it is best to put one's traveling dress and hat into these bags and leave them there, for they are seldom wanted until one is ready to leave. In making the bags for camping there are some advantages in using cretonne instead of silkoline. Being so much thicker, it keeps out the dampness better, and it is often damp enough in a tent to have a rather disastrous effect on a hat.

SIMPLE AND ATTRACTIVE



This simple waist is of marquisette or voile trimmed with a beautiful lace or embroidery and fastening at the side with buttons and loops.

The sleeves, cut in one piece with the body of the waist, are trimmed to correspond.

To Pull Bastings.

Few persons know that an ordinary orangewood stick, such as is used for the nails, is the best instrument for removing bastings. A scissors when used is very apt to cut or tear the garment. Procure the stick at any drug store.

SHOES FOR LONG TRAMPS

Highly Important Part of Equipment When a Girl Contemplates "Roughing It."

Girls who have had little experience in outdoor life often do some foolish things when they begin to try this form of enjoyment. One way in which many of them interfere with their own comfort is by going on a tramp with the wrong kind of shoes.

A girl who has played tennis and found the soft, rubber soled shoes comfortable will think that they will surely help her to enjoy a tramp; but they are the last thing to wear for a long walk, as these girls have found to their cost. They come home with their feet aching and the calves of the legs tired out from the lack of the spring that is given by heels. Walking with a flat, heelless shoes on a rough road is extremely trying, and one can feel every stone through the soft rubber soles; and these tired feet and legs will feel even worse the next day.

Quite as bad as the tennis shoes are low shoes with thin soles and high heels. These tire the feet and may sprain the ankles. The only shoes that are really satisfactory for "roughing it" are strong high shoes with thick soles. The strongest ankles need support in rough walking, and it is often wet in the woods. The girl who has once tried the two ways of tramping will never again be persuaded to wear low or thin shoes.

Paris Bridesmaid Gowns.

A shepherdess effect was shown in four bridesmaid gowns recently turned out by Paris makers. The underslips were of a thin white silk trimmed with scattered wreaths, about the size of a saucer, of tiny pink roses. Over these fell tunics of pale blue chiffon, which mellowed the flowers until they were the dimmest blush. The broad hats were wreathed with the posies held by a vast butterfly of thin white lace, and there were small knots of the buds on the blue slippers.

Suit Coats.

Suit jackets for autumn and winter will remain close fitting about the hips and hold to the straight line form. At present there is no arbitrary decree regarding the length. Models considerably shorter than the 26-inch length, and somewhat longer also, are among the new models. But the length mentioned is a happy medium. The feeling is that with the approach of winter the tendency will be to lengthen the jacket, with perhaps a revision to the short effects again in the spring.

Hunter Green.

As the season advances the vogue for emerald green noticeable for some months past appears to be on the decline, hunter green, a softer, more pleasing tone, being substituted. Scarfs of hunter green satin are draped around the crowns of outing hats of Panama and peanut braid and gracefully looped at one side. Scarfs of striped and checked silk, such as may be found at the neckwear shops, are also utilized as drapery for outing hats.

MINNESOTA HISTORICAL SOCIETY.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, SEPTEMBER 1, 1911 NO. 5.

26 DEAD; 50 HURT

PORTION OF LEHIGH VALLEY PASSENGER TRAIN WRECKED NEAR ROCHESTER, N. Y.

MANY WERE G. A. R. MEN

Two Coaches Fall 45 Feet Carrying Down Human Burden.—Diner Dragged Over Bridge and Went Down Bank.

Manchester, New York. — With a list of killed and injured far from complete, 26 persons are known to have lost their lives, and between 50 and 60 to have been injured, many of them seriously, in the wreck of Lehigh Valley train No. 4, on a trestle near here.

Two cars of the train plunged off the structure, were hurled against the stone embankment and dropped to the bed of Canadaigua outlet, 45 feet below, when the fast-running eastbound train was derailed and broken in twain on the viaduct. Another car rolled down the embankment beyond the river. The remaining 11 cars of the train kept the roadbed.

The first car which went over, a day coach, plunged to the creek and was crushed upon the rocky bed. It landed upon its side and few of the occupants escaped death or serious injury. The following car plunged head first into the chasm and with the forward end resting in the creek stood balanced almost perpendicularly.

The train carried many veterans returning from the Grand Army encampment at Rochester and at least two of the old soldiers were known to have gone to their death in the wreck. A large proportion of those killed and injured were women.

The wreck was the worst in the history of the Lehigh Valley line in this state and one of the most disastrous ever recorded on the system. Spread rails are believed to have been the cause of the accident.

The engines and two day coaches had just passed the center of a 400-foot trestle over Canadaigua outlet, 150 yards east of the station at Manchester, at 12:35 o'clock when the Pullman car "Austin," the third of the long train, left the rails. It dragged the dining car with it and two day coaches and two Pullmans followed. All bumped over the ties a short distance when the coupling between the day coach and the rear end of the diner broke. The forward end of the train dragged the derailed Pullman and the diner over safely, after which the diner plunged down the embankment and rolled over.

Both cars were filled with passengers and in a few moments the cars lay a mass of crumbled wood, metal and glass, under which 100 men, women and children were buried, many of whom had been killed instantly.

The second day coach struck on the bottom and stood end up, the rear end projecting a few feet above the top of the trestle. All of the passengers in this car were piled in a tangled mass of broken seats at the bottom of the car.

Indescribable pandemonium followed. The Pullman car Emelyn, which remained on the bridge, with one end projecting over the gulch and several cars behind it, derailed and in immediate danger of going over on the mass of wreckage below, were soon emptied of all their passengers, who, with gangs of railroad employes from the big freight yards at Manchester, rushed to the aid of the imprisoned victims of the disaster.

Axes were secured and body after body was removed and carried by the rescuers, knee-deep in the river bed, to the bank on the west side of the trestle. There the dead and injured were laid on the ground, while planks and timbers were requisitioned and a field hospital established.

It was necessary to chop through the sides and bottom of the day coach and the work of removing the victims moved with painful slowness. Death had come swiftly to many, a large number of the dead having had their skulls crushed in when they were thrown against the car seats and projections.

Memorial "U" to Close.

Mason City, Iowa. — The memorial university, which was founded here 10 years ago by the Sons of Veterans of the Nation at a cost of $100,000, will be permanently closed, according to the announcement of the trustees. This action will be taken in view of the decision of the grand encampment of the Sons of Veterans at Rochester, N. Y., to sever the relations of the organization with the institution. The trustees say the school probably will be sold in the near future.

Pope's Condition Satisfactory.

Rome, Italy. — The condition of the pope continues satisfactory.

NEW DEPOT FOR CHICAGO

FIVE LINES READY TO COMMENCE CONSTRUCTION.

Problem of Operating Trains by Electricity in Hands of Committee.

Chicago, Ill. — Plans for the new union station to be built at a cost of $25,000,000 by five railroads of Chicago have been announced by Darius Miller, president of the Burlington road. Plans for the work are still in a formative state, but it is expected by the railroad officials that work will start early in the spring. A rough estimate gives $25,000,000 as the aggregate amount to be invested, of which $14,000,000 is for the land, now owned by the five roads that will use the station, $6,000,000 for the building, and $5,000,000 for track changes, and other improvements.

The plans provide for an entrance on Canal street with the train sheds stretching back between Jackson boulevard and Adams street. The terminal will occupy all the space now used by the roads for trackage and will give 14 tracks north of the station and 16 south. The question of using electric engines for bringing trains into the station is being considered. The Chicago Association of Commerce has a committee investigating the practibility of electricity and the roads have said they will be governed by the recommendations of the committee.

The station will be built and operated by a holding company owned by the five roads each of which will have an equal share. They are the two Pennsylvania lines, the Burlington, the Milwaukee and the Alton. When completed the station will be the largest in point of accommodations of any west of New York, and will require at least five years to complete.

SON MURDERS HIS PARENTS.

Then Sets Fire to Their Home, After Robbing Them.

Booneville, Indiana. — Richard Lee, Mrs. Lee and their 17-year-old son Clarence were killed in their beds and the house set on fire here.

William Lee, 21 years old, a son of the dead man, is under arrest, charged with the triple murder. Robbery is supposed to have been the motive.

The house was discovered on fire at 4:30 a. m. When firemen reached the house it was blazing from all sides. Upon trying to enter they discovered all the doors and windows were locked. The doors were broken in and the incinerated bodies of Lee, his wife and his boy were found.

The skulls of the father and mother had been caved in with a hammer while they were lying in bed. The boy had been shot. The family, consisting of the father and mother and two children, had sold their small piece of property in Newburg and divided the money. The mother and father and younger boy took their money and went to their home in Booneville. William Lee did not return to Booneville until after his family had gone to bed.

FATALLY CHOKES ASSAILANT.

Unknown Man Who Holds Up Couple Is Strangled.

Mansfield, Ohio. — An unidentified man was choked to death here as the result of an attack upon the girl companion of the man who killed him.

Walter Clover, florist, residing near Belleville, and Miss Hortense Shafer, of that place, were seated in the north end of Sherman-Heineman park when the unknown man confronted them with a revolver and ordered them to accompany him across the adjacent railroad tracks.

Under threat of death they complied, fearing to make an outcry, but when their assailant was momentarily off his guard after he had compelled his victims to lien down on the ground, Young Clover threw a handful of dirt in the man's face, partially blinding him. He then seized his assailant around the neck with both hands and choked him to death. The dead man carried a dark lantern. He was about 30 years of age.

Wisconsin Land Owner Dead.

Milwaukee, Wis.—James L. Gates, aged sixty-one years, identified with large operations in lands in northern Wisconsin, died after a lingering illness.

Gored by Bull; Lives.

Neillsville, Wisconsin.—F. P. Smith, of this city, was gored by a bull and [illegible] narrowly escaped death. His shoulder blade and arm were broken.

New Mexico Election Nov. 7.

Santa Fe, New Mexico. — It was announced after a conference of Governor Mills and other officials that the state election will be called for Nov. 7.

GOOD ROADS HIT

SUPREME COURT HAS HELD SPECIAL ASSESSMENTS CANNOT BE LAID IN RURAL DISTRICTS.

UP TO ATTORNEY GENERAL

Fate of One Thousand Miles of Highway in North State Depends on His Conclusions.

Standing squarely in the face of the constitutionality of the Elwell law under which the Northern Minnesota Development league proposes to expend $10,000,000 during the next few years for good roads, is the legal principle always handed down by the supreme court that all highways constructed outside of incorporated districts, that is cities or villages, are general and not local improvements, and consequently abutting property owners cannot be taxed any amount for their construction, on the special benefit principle.

The question of the constitutionality of the measure, always scouted by lawyers of the state, as well as the limit of the expenditures which the State Highway commission may make under it, are now being investigated by the attorney general's office, and probably will be several weeks before an opinion on the law is rendered, as many questions are said to be involved.

Chief Objection to Law.

The legal principle of the state supreme court, however, is considered by lawyers to be the chief objection raised against the constitutionality of the law, and on account of it the assertion was frequently made yesterday that Attorney General Simpson will hold the law unconstitutional. In every similar case that has been brought before it, the supreme court, it was pointed out, had ruled that a highway which is of general benefit cannot be taxed by a special assessment as authorized in the Elwell law.

In handing down this principle, it is pointed out, the supreme court has always held that any highway constructed outside of an incorporated district is of general and not special benefit, and hence the expense of its construction should be borne by the general public, either through the county or the state. The Elwell bill provides that the state shal bear half of the expense, the county or counties through which the proposed road shall pass a quarter and the property owners benefited the other quarter.

Approximately $300,000 will be raised by the quarter mill levy next year, according to George W. Cooley, secretary of the commission, while $20,000 more will be derived from other sources However, under a resolution adopted by the last Legislature the commission will be compelled to distribute $100,000 of this among the fifty-four counties of the state which did not receive their full share of the famous pork-barrel appropriation of 1909. The amounts to each county range from $4,000 to $6,000.

Deducting this amount from the original fund, and then 10 per cent more for the non-payment of taxes, as is usually done with estimated receipts of this character, the commission will have approximately $200,000 next year for its entire good roads fund. Under the old law it received but $80,000.

With this amount available no county can receive, under the 3 per cent provision of the amendment, more than about $6,500, or less than $1,000, in the year, according to Mr. Cooley. Inasmuch as the usual cost of new construction varies from about $2,000 a mile upward, the commission under the Elwell bill, will be considerably limited in its expenditures.

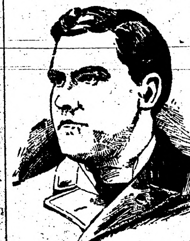
Greater expenditures, however, will be permited the commission if the 1-mill tax amendment of the Dunn bill is adopted when voted on next year. Under it the commission would derive approximately $1,250,000, and the 3 per cent provision would allow the counties an estimated maximum of from $36,000 to $40,000.

Thousand Miles of Road Projected.

Almost 1,000 miles of new roads are now projected for the northern part of the state by the Northern Minnesota Development league alone, while the good roads movement in the state is not centered in that section. Though its plans are extended to cover a number of years, the commission faces the problem of distributing its funds not only there but equally to the benefit of other counties.

Applications already have been made for the construction of a road, 450 miles long from Duluth through Bemidji to St. Vincent, and from Deer River to Northome, while the league's plans include other roads from Duluth to International Falls, Duluth to the Twin City, and Koochiching to Bemidji, approximately 1,000 miles in all.

BERG MAY RUN FOR CONGRESS.



ALBERT BERG.

Bemidji.—With James A. Tawney and Frank M. Eddy, the most frequently mentioned possibilities as Republican candidates for the newly-created position of congress-at-large for Minnesota, Albert Berg of Spooner, former secretary of state, has been proposed as good timber for the place.

FILE ON LAND IN HURRY.

Ninety Entries Made at Duluth Opening in 52 Minutes.

Duluth.—A new record in the disposition of public lands was established at the United States land office in the Duluth federal building when ninety entries for land in the Fond du Lac reservation were completed in fifty-two minutes. It has been thought that the claims thrown open to entry would not require more than two hours to dispose of, but the officials and clerks handled all the business in less than one.

The opening was at 9 o'clock and found all those in the line who have waited, several for two months and others for shorter periods, anxious to learn if they could file on the property selected. Many had several choices and if they found their first had been taken sought other places. They were admitted to the office one at a time, less than a minute being required to record each entry.

While these scenes were being enacted at the Duluth land office very different ones were taking place on the lands sought near Brookston, where many landseekers preferred to secure their claims by settlement rather than entry.

These were waiting near the land they sought and at 6 o'clock hurried on it and pitched their tents.

JANES TO TRY DUMAS.

E. E. McDonald and T. C. Bailey Will Assist Assistant Attorney General.

Bemidji.—Attorney General Simpson and Assistant Attorney General Janes were in Bemidji in connection with the Dumas arson case.

Inasmuch as County Atorney Torrance was disqualified from acting in the prosecution of Dr. Dumas, Mr. Simpson said the county would thereby be left without a representative, but that he had decided to recommend to the court the appointment of E. E. McDonald of Bemidji as special assistant county attorney to act as a local representative in connection with the attorney general's office in the prosecution. The case will be tried by Assistant Attorney General Janes, he said, but the state will also be represented by Thayer C. Bailey of Bemidji.

The attorney general declared the state has no information in its possession as to the present whereabouts of Mike Davis or Ed Le Claire. He had nothing to say as to the evidence or what the state might offer upon the trial.

BIG CHURCH MEET IN DULUTH.

Sixth Missionary District of Episcopal Sect Meets Next Month

Duluth.—Duluth will entertain the first week of September one of the biggest gatherings of religious workers ever held in the Northwest when the council of the sixth missionary district of the Episcopal church will meet here. This district includes Minnesota, Iowa, North and South Dakota, Nebraska, Montana, Wyoming and Colorado.

Fifteen bishops and the clergy of eleven dioceses will attend. Among those prominent in the Episcopal church who will attend are the primate of the Canadian church, Archbishop of Rupertsland, Winnipeg, the bishop of Kansas and Bishop Lloyd of New York.

Fire in Building at Cloquet.

Cloquet.—Fire was discovered in the attic of the Redfield building, supposed to have originated from crossed wires. The Bell Telephone company and Western Union offices are located on the second floor. Smoke poured from every portion of the roof of the building which covers half a block. The building upstairs and down was flooded with water and the damage will total $6,000.

PRIEST'S RETREAT AT WINONA.

Bishop Heffron Inaugurates Ceremony —Rev. Nugent in Charge.

Winona. — Seventy-three secular priests of the Catholic diocese of Winona entered upon a retreat of four days at the Young Ladies' seminary. Rt. Rev. Bishop Patrick R. Heffron inaugurated the retreat with solemn benediction. Rev. Nugent of St. Louis was in charge of the religious exercises during the retreat. The pastors of the diocese in attendance at the retreat are:

Fathers J. N. Bartolome, Fulda; J. T. Cotter, Clairmant; S. J. Condron, Simpson; J. J. Culliton, Mapleton; J. E. Donoven, Albert Lea; H. Daszkowski, East Chain Lake; William E. Griffin, Ellsworth; A. Gmeinder, Spring Valley; A. Hachenberger, Freeburg; R. Hughes, Mankato; E. Kasal, Jackson; D. J. Lavery, Plainview; J. Meier, Winona; S. Maddock, Chatfield; D. Manby Ex-National President R. D. Tomlinson of Milwaukee. Carl S. Pearce, Luverne; J. Meyers, St. James; J. L. O'Connor, Rochester; J. H. Paschges, Eaton; J. Packolski, Winona; F. B. Reichl, Adams; J. Schneider, Iona; P. Tibesar, Winona; E. Van Hoenackere, Madella; O. Zachmann, Adrain; M. Barresch, Avoca; D. Coleman, Waseca; J. Coyne, Lanesboro; C. Cavanagh, Currie; J. Dolle, Johnsburg; A. Ditmann, Mankato; J. Grabowski, Winona; V. Havlichek, St. Charles; A. Hennekes, Windom; G. Jaegen, Heron Lake; J. Kiely, St. Claire; P. McTeague, Browerville; G. Murphy, Blue Earth; J. Madden, Fairmont; J. Mangan, Pipestone; J. Mikaloi, Wells; M. E. O'Connor, Wykoff; J. Pudenz, Conception; William Riordan, Rochester; J. Sand, St. Kilian; J. Sherman, Worthington; J. Treanor, Waseca; M. Wurst, Wabasha; M. Greave, Lismore; A. Brazille, Mankato; W. Coleman, West Albany; J. Cassidy, Rochester; E. Devlin, Austin; H. Dolle, La Crescent; P. Fox, Janesville; L. Gossman, New Richland; J. Herrick, Winona; M. Holper, Minnesota Lake; M. Jostock, Rose Creek; P. J. Kiernan, Owatonna; P. McDonough, Rushford; R. Matousek, Somerset; A. Moore, Kellogg; F. Mueller, Mazeppa; J. O'Connor, Winona; J. A. Parkinson, Winona; J. Pivo, Owatonna; M. Riordan, Preston; N. Schmidt, [illegible]; J. Smiech, Owatonna; H. Van Den Breg, Caledonia; J. Zahner, Woodstock; C. Koegel, Minneiska, and F. T. English.

STORM DAMAGE IN CLAY COUNTY.

Bolt Hits Barn of Senator Marden, Burning Live Stock.

Moorhead.—The barn on the farm of Senator Charles S. Marden, ten miles southeast of Barnesville, on section 19, in Atherton town was struck by lightning and burned, with six horses, two calves and, it is thought 200 sheep.

The elevator at Glyndon also was struck and set on fire, but the blaze was extinguished before appreciable damage was done.

In the vicinity of Hawley, the main damage was done from water, the rain having come down in torrents. There being no weather bureau station at Hawley it is impossible to estimate the exact rainfall, but it aggregated many inches. It is said that owing to washouts and the quick rise of the many creeks and streams and general condition of the roads, the thoroughfares will be impassable for a week.

INTERNATIONAL WEDDING.

Blacque Bey and St. Paul Girl United by Bishop Lawler.

St. Paul. — St. Paul has just witnessed a wedding of international importance, when Richard Edward Blacque Bey, first secretary of the Turkish embassy in Berlin was married to Miss Josephine Kalman, daughter of Mr. and Mrs. Arnold Kalman. More than 1,000 invitations were issued for the ceremony, which was performed in the sacristy of the Cathedral by Bishop Lawler, of St. Paul. Blacque Bey, is a Catholic.

128 File at Cass Lake Office.

Cass Lake.—At the opening of the land in the Cass Lake district 500 quarter sections were made available for settlement under the provisions of the homestead act, but only 128 persons availed themselves of the filing privilege.

Swan J. Erickson, living five miles west of Cass Lake, secured the first claim, and Arthur Roberts of Sterling, Ill., the second. Eight women secured homesteads.

A large percentage of the persons who filed were residents of Koochiching county, in which the greater portion of the land is located.

There were no "pioneer day" land opening demonstrations, no gambling was in evidence and police regulations were perfect.

Exhibits From North For Land Show.

Bemidji.—With a big "market day" exhibition at Spooner, August 30, and a northern Beltrami county fair at Baudette September 11-12, there is to be big gathering for the exhibition purposes a large collection of grasses, grains, and all root crops, vegetables and dairy products. These exhibits will be shown at the state fair in September.

EXPLOSION--25 DIE

SIXTY HURT FOLLOWING CRY OF FIRE IN THEATRE IN PENNSYLVANIA.

WOMEN ARE TRAMBLED

Discovered When Playhouse Is Emptied That Building Is Not Ablaze. Flames Restricted to Operator's Booth.

Canonsburg, Pennsylvania.—A movin picture film, exploding in the Morgan opera house, caused a panic in the audience and a mad rush to the doors and exits, and before the theater was emptied 25 lives had been sacrificed and over 60 were injured. Immediately following the flash of the film, some one shouted "fire." There was a rush for the exits, and in a moment there was a writhing, screaming mass of humanity, ten feet high, in the narrow stairway leading to the entrance of the theater.

Most of the dead were smothered. In the fierce rush for the exit, people were thrown from their feet and trampled upon. Others were thrown upon them, and those at the bottom of the human pile were suffocated. The victims mostly are women and children.

When two volunteer fire departments reached the theater the sight staggered them. Those of the audience who had escaped from the building, and other spectators drawn to the scene, were rushing about the front of the building. No person, it seemed, was making any effort to aid the struggling mass within the theater.

The firemen pushed into the building and practically threw persons into the street. As they regained their feet, they ran wildly about, shrieking in terror. As the firemen neared the bottom of the pile, they began to bring out the unconscious forms of the injured, and later came the dead.

The Morgan opera house is in the center of the town and on the main street. It is a large structure and has two galleries which, with the main floor, afford seating capacity for 1,000 persons. The house was crowded at the time of the explosion, but hundreds were standing in the rear of the ground floor. The moving picture cage was located on the second gallery floor and it was there that the explosion occurred. It made a loud noise and immediately the cry of "fire" went up from the audience.

The spectators on the main floor and the first gallery heard the cry and all rose en masse and started for the exits.

Confusion at Main Entrance.

Other people, maddened with fear, sought the fire escapes and reached the street in safety. But those that had made for the main entrance not only found their own number filling the entrance, but they were stopped in their progress by a crowd of eager people trying to force their way into the theater at the same time. The latter saw the crowd coming out and were trying to get in for the second performance, which was to begin in a few moments.

The film booth was fire proof and the fire went no further than its interior. John McCullough, operator of the moving picture machine, had just thrown the subject of the next series of pictures on the screen, entitled "A Little Girl Shall Lead Them," when the film exploded and the asbestos cabinet was filled with flames. For several moments the audience, numbering upwards of 1,500, was totally unaware of the accident and the operator heroically fought down the flames and succeeded in extinguishing them.

Then, with his hands frightfully burned and almost suffocated, he opened the door of the little box and staggered out. With the opening of the door, a dense cloud of smoke poured into the auditorium. The panic followed.

BAD FIRE AT MESERVEY, IOWA.

Portion of Business District Wiped Out—Loss Estimated at $25,000.

Mason City, Iowa. — The greater part of the business portion of the town of Meservey, Cerro Gordo county, was wiped out by fire. The fire started in a harness shop and swept down the east side of the main street. Among the buildings destroyed was the new Farmers' Saving Bank building. The total loss is estimated at $25,000.

Des Moines Has $25,000 Fire.

Des Moines, Iowa. — A midnight fire destroyed three of the five warehouses of the Musgrave Automobile and Finance Company. The damage is estimated at $25,000.

Seven Horses Die in Fire.

Eau Claire, Wis. — Seven head of horses perished when fire destroyed a barn of the West Eau Claire Ice Company. The loss is $4,000.

DOCTORING SICK TREES

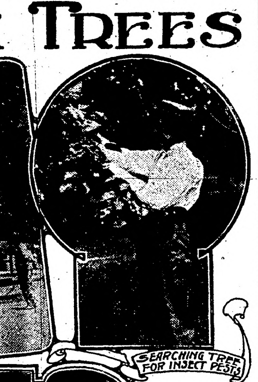
SPRAYING TREES



SEARCHING TREE FOR INSECT PESTS

INTELLIGENT PRUNING OF TREES

SHOWING RESULT OF TREE DOCTOR'S CARE

OF the newer professions that have lately been created in connection with agriculture and kindred pursuits it is probable that none is more unusual or more interesting than that of tree surgery. Tree surgeon is the customary title of the expert who devotes himself to ministering to sick and injured trees, and yet it is a question whether "tree doctor" would not be a more appropriate designation, inasmuch as in with trees as with human beings it is more often the physician than the surgeon that is needed to set things right.

The tree doctor is, perforce, a specialist in his chosen field and it may be added that the subject is a much deeper one than the layman might, at first thought, suspect, and is well worthy to be made the subject of the life work and the life study of the man who is attracted to it. For all that, "tree doctoring" within a limited range is quite within the possibilities of any farmer or other private citizen who is impelled to study it just as gardening may be made a success by a man who makes no claims to being a fancy gardener. Indeed, the owner of any wooded land who desires to preserve the mature forest growth is all but compelled to delve into the lore on this subject if he does not want to employ a professional forester, and the farmer who wants to preserve the priceless heritage of the stately trees that surround and shade the ideally-placed farm house must do likewise.

One phase of tree doctoring that the layman can undertake almost as successfully as the professional is that embraced in preventive measures. With trees, as with all other growing things, the policy of the ounce of prevention is a wise one and moreover there are some wealthy men who own large estates in this country who employ tree doctors as the Chinese employ physicians—to keep them well rather than to cure them after sickness has set in. This "stitch in time" policy as applied to trees is particularly serviceable in the case of the insects, etc., which play such havoc with tree growth if left to carry on their depredations unmolested. It is always preferable and usually simpler to bar pests of this kind from the cherished trunk and branches than it is to banish them once they have gained a foothold.

Speaking of this responsibility in tree doctoring directs attention to the exceedingly varied activities that are embraced in the ministering to our sylvan treasures. There are numerous different methods of circumventing the caterpillars and other objectionable invaders, and there are likewise any number of prescriptions that may be tried out if the pests have taken possession of trees ere the alarm is given. Prominent among these latter remedial measures are the various forms of tree spraying for which special apparatus is now provided and apropos of which extensive experiments have been carried on to determine the most effective formula to be introduced as spray. Another branch of tree surgery deals with the intelligent removal of dead or diseased limbs of trees and the repair of damage done by fire, lightning, high winds, etc. And finally we come to the true surgery which in the case of trees, as with people, involves the removal of portions of the vital tissue; the termination of decay or disease; and the substitution of other substances—in the case of trees, concrete being a favorite medium for closing wounds and fostering the healing process.

It might be supposed by many readers that tree doctoring would be restricted largely to the country and suburban districts, but such is very far from being the case. Indeed, it would seem as though the residents of our towns and cities prize their trees more highly and are willing to do more to preserve them than are the farmer class—and, perhaps, this is natural considering that tall, stately trees are much rarer in cities than in the rural districts. At any rate most of our large cities now employ one or more tree doctors to look after the trees in their parks and the shade trees on streets and boulevards, whereas it is becoming almost imperative for a man who aspires to the position of head gardener on any large private estate to have enough knowledge of ailing or insect-infested trees to cope with the situation.

The U. S. Department of Agriculture and the state governments in many of our leading states now maintain special departments that devote their attention to the problems presented in this field. In the case of Uncle Sam's Bureau of Entomology the activities are not confined to inducing good health in trees but extend to all sorts of investigations and experiments regarding injurious insects affecting field crops, fruits, small fruits and truck crops as well as the forests and forest products. This research institution has devoted much time and money to the introduction in the United States of beneficial insects—that is insects which prey upon those creatures that harm the trees—and is all the while carrying on tests and experiments with insecticides and insecticide machinery. Not the least important function of this government institution is the identification of insects for anybody who applies for such information. By this means a farmer or householder discovering an unknown bug on his trees may ascertain the record of the mysterious visitor together with hints as to how to get rid of him in case he is an undesirable.

Probably the most extensive and most costly project in tree doctoring in the history of the world is that which has been in progress for some years past in the state of Massachusetts. The object of this prolonged battle is to exterminate or hold in check the gypsy moth, which, with other kindred species, has threatened to destroy the trees throughout the Old Bay State, if not, indeed, throughout New England. In this fight millions of dollars have been expended, the experts employed by the state of Massachusetts working hand in hand with Uncle Sam's experts, headed by C. L. Marlatt, perhaps the greatest authority in the world. It is probably a trifle early to say that the fight has been won, but certain it is that much headway has been gained and doubtless the damage will be restricted to its present area.

Tremendous sums are expended every year in spraying for orchard insects. It is estimated that not less than $5,000,000 is thus expended each year in holding in check the codling moth and an equally large sum is devoted yearly to treatments against the San Jose scale. Nowhere in the world is this doctoring done so thoroughly as in the United States. The invention of special spraying apparatus began as early as the year 1880, and since that time each year has been the advent of new and improved apparatus. Some six or seven years ago the steam-power sprayer made its appearance and a little later there was evolved the gasoline outfit, which may be seen in operation today on so many farms and in many city parks. Where the poison charged liquid employed for spraying must be hauled some distance it is customary to resort to outfits of liberal tank capacity, and many of these range from 150 to 300 gallons. For spraying high trees it is necessary to use an elevated tower or platform built upon a wagon and with one man on the tower and two men on the ground spraying may be carried on with the greatest possible degree of efficiency. Of course, a good length of hose is essential—one-half inch being a popular size, and it should be capable of standing 200 pounds pressure per square inch.

Trees in towns and cities are naturally much more liable to such injuries as will later require the practice of tree surgery than are those in the country districts. The piling of building material against trees, the attaching of guy wires and the grading of streets or roads are all causes productive of injuries. Overcrowding by other trees, horse bites and girdling by wire labels are other sources of trouble. One of the worst of all, however, is improper pruning or tree butchery. As a matter of fact, intelligent, systematic pruning and tree surgery are very closely related.

Pruning requires a previous intimate knowledge of the habits of growth of trees, whereas surgery on the other hand requires in addition a knowledge of the best methods for making cavities airtight and preventing decay. The principle is much the same as that employed by the dentists who fill cavities in the teeth of human beings, and this caring for the cavities in trees is the only means of preserving affected specimens and saving to this and future generations some of the noblest specimens of woodland growth. The favorite mixture for filling cavities is composed of one part Portland cement to three parts of clean, sharp sand. After all decayed or decaying matter has been removed from the cavity the whole cavity is filled with this thin mortar, and then, when this has had time to become stiff, but not hard, there is applied a surface coat made of one part sand and one part cement and the surface is so faced as to exclude all moisture from the opening of the cavity.

It should be noted in conclusion that Providence has provided us with the best tree doctor in the form of that familiar and unappreciated bird, the woodpecker. The woodpecker is easily the most useful of all the seven hundred varieties of birds to be found in the United States and it is largely because of his constant search for and warfare against the four hundred different varieties of insects that prey upon our trees. The woodpecker is not merely a tree doctor, but is actually a tree surgeon because his most energetic quest is for those insects that injure the tree internally and to which access can be gained only by means of the unique equipment with which nature has provided the woodpecker and from the employment of which he derives his name. As a rule the woodpecker makes only shallow holes so that his work may properly be dignified as tree surgery that leaves no scars, which is not the least of its advantages.

THE SKIN AND COMPLEXION

"Oh, wad some power the giftie give us
To see ourselves as ithers see us."
—Burns.

How surprised some of us would be if we did possess this gift, and how quickly we would hasten to make some changes!

Every person's skin is a law unto itself, and what is beneficial to one may not be so to another. You never saw two persons who looked exactly alike, nor two persons who did things in exactly the same manner. So it is with the skin, no person has a skin that is exactly like another's. How foolish it is, then, to expect the same treatment to agree with all skins! Certainly an oily skin requires different treatment from one that is inclined to be dry. Exactly what agrees with a given person's skin only can be discovered by experiment. So if you find your complexion improving under a given treatment, do not change your methods because some one else recommends a different treatment.

There are a few directions that will seldom disagree with any skin. Usually it will be found beneficial to bathe the face at night with hot water to remove all dirt; then massage with good cold cream. In the morning all that is necessary is a quick rub with cold water. Do not be afraid to rub the face a little. The skin needs exercise as well as any other part of the body. How often it is neglected! Pinching or rubbing the skin tends to draw a greater supply of blood to the parts massaged. This increased circulation brings extra nourishment with it and also tends to carry away more waste material.

Pimples and black-heads show that the waste material is not being carried away properly but is being left to clog the pores. Sometimes this accumulation of waste material is due to lack of cleanliness. The waste material is left on the skin and clogs the pores so they cannot perform their work. Sometimes the fault is due to poor circulation or to diseases of the excretory organs. If one organ is incapable of performing its work, the other organs must of necessity do more than their share in trying to aid it. If the kidneys and bowels are not carrying off their share of the waste material of the body, the skin is burdened with an extra amount to be disposed of. Sometimes it is unable to do this and the waste material is left to accumulate in the skin.

Sometimes (and if we may judge by some we meet on the street, we might say oftentimes) the skin is so coated with impurities in the shape of powder, enamel and other preparations that it finds it impossible to work at all. If we would exercise the skin a little more and coat it a little less, we would have smaller need for the coating.

The Resort Prospectus.

"Going to run daily excursions this year?"

"Oh, yes."

"I notice you don't advertise a gorge any more."

"No; I made it a ravine instead. Some people thought a gorge meant a lot to eat."

IMPORTANCE OF ATTENTION TO MEMBERS OF SHEEP FLOCK

Extra Care Must be Constantly Exercised During the Hot Summer Months if Good Condition of Lambs Is to be Maintained—Should be Given Separate Pasture.

(By ELMER HENDERSON.)

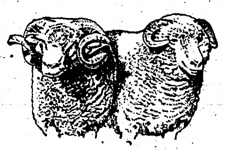
Of all the things that should merit the attention of the farmer at this time none are more important than the lambs.

The Saviour's oft repeated admonition of "Feed My Lambs" always has been and always will be the slogan of the truly successful sheep farmer.

No matter how carefully you care for the ewe during the trying period of lambing, nor how well you feed her during the raw, chilly months of early spring, if now, during the hot months you neglect the little ones, all your work has been in vain. For it is then that the really trying time comes.

Until summer climatic conditions have been fairly conducive to the best health and growth of the young lambs. Grass has been abundant and the ewe has been liberal in her flow of milk. Now, however, a change occurs in the life of the little one.

Our days, which before have been cooled by cool and balmy breezes become intolerable by the wilting glare of the midsummer sun and nothing feels the effect of this more than the sheep. Their wool makes them feel effects of heat more than any of our other animals. It makes them uncomfortable. One has but to look at a flock lying panting in the shade on a hot day to be convinced of this.



Prize Dorset, Illinois State Fair.

The wool of the lambs being longer than that of the ewe makes them suffer more than does the ewe. This alone would check the growth of the lamb, but the worst of all is the fact that with the coming of the summer's heat the ewe's flow of milk drops off. The usual shortage of pasture at this time is also conducive to this.

With the falling off of the mother's milk the lamb too often receives a serious backset. What can the poor little thing do? Its chief support is gone. It turns to the pastures, but they, too often, are bare of any save the sparsest vegetation.

Live it must and does, but between the heat of the noonday sun and the scantiness of pasture, it too often ends in what we too often see in market circles—a poor, dwarfed and runted lamb.

Right here is where the sheep farmer shows whether he is capable and efficient. If he is, he will attend to them at once. In fact, the best of them anticipate nature a little by weaning earlier.

If it has not been done before, the really capable and efficient farmer attends to it now. He may be, and often is, right where his fields need him the most, but he knows that here is something that will pay him immensely. He knows that a little brains and forethought exercised now will take the place of a lot of work and feed later on.

The best thing to do is to separate the ewes and lambs entirely. If possible give the lambs a fresh pasture on which no sheep have been grazed for a year. This is to avoid the dreaded stomach worm.

One way that has been found good is to turn the lambs into a patch of rape and allow them to graze it down. Some like to let the rape get six or eight inches high before turning in on it, but for my part I think it is too tough by that time. I much prefer the three or five-inch plant to the larger and woodier growth.

Often after the rape is eaten, the meadows have started up afresh so that the lambs can be turned into them and allowed to eat the fresh, tender herbage that springs up with the first shower.

Sometimes when nothing better is offered, I have turned the lambs into the uncut hay. They tramp down some of it, but they more than pay for what they destroy. Then, after the hay is cut, there is always a lot of good feed on the ground that is just what will do them good.

It may be that the ruinous crop of weeds is just starting up. The lambs will eat these, and with what new grass starts up will do well, to say nothing of the great good they do as scavengers in keeping the fence corners all clean.

If carefully handled during summer there is no reason why the lamb should not come on in great shape and make a great big lusty ewe or wether by Christmas.

I say ewe or wether, I wonder if all come under this classification or whether, despite all that can be said and done, there are not a lot of untrimmed rams in the sheep pens of the corn belt to-day; but that is another story.

IMPORTANCE OF FARM HORSES

Animals, in Combination With Modern Machinery, Have to Great Extent Replaced Human Labor.

(By THOMAS P. COOPER.)

At present the horse is practically the entire motive power of the farm. In combination with improved farm machinery, the horse has, to a great extent, replaced human labor. And the modern farm depends as much upon the efficiency of the horse that is kept to perform the labor as it does upon the use of the human labor upon the farm. In fact, the efficiency of human labor upon the farm, and in many instances the proper operation of the farm, depends entirely upon the farm horse. We may readily understand, therefore, that the farm horse is often the greatest single factor in the success of the farming operations. It is essential, then, that the farm horse be so cared for, and the farm so organized, that a maximum return on the horse's labor can be secured annually.

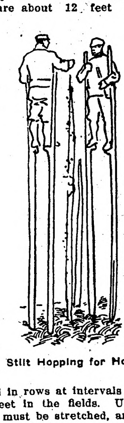
It is true that horse owners generally are not accustomed to look upon the horses of the farm, or their labor, as costing anything. The horse has been considered so much of a necessity, and so much a part of the farm, that the question of the cost of the horse labor to the farm, or of the methods by which such cost may be decreased, has been very largely neglected. The question of economy of power on the farm is only brought up at those times when consideration is being given to some other form of motive power than the horse. It is a question, though, that—with increasing cost of feed, of care, and larger investment in horses—will constantly become of greater and greater importance.

The cost of horse labor depends upon many conditions that vary on each farm, so that costs are not similar on different farms. However, the items that make up cost are similar on all farms, and only vary in amount. It is essential, then, that the farm operator have an accurate knowledge of what comprises cost, and what average costs are, that he may institute such economies in his management as seem desirable. Carefully-kept records and accounts with the farm horse, show that the average cost of horse labor on the farm is about eight and one-half cents per hour. The rate seldom averages less, and generally runs higher. This means that the actual cost, on the farm, of a horse's labor for a ten-hour day, is 85 cents, or $1.70 for a team.

HOW ENGLISH TRAIN HOP VINES

Ingenious Farmers Arrange Stilts, Fastened to Legs, Enabling Them to Reach Wires.

How growers of Kent, England, have discovered a novel way of fixing the wires on the tall poles on which the hops are trained to grow. The poles are about 12 feet high, and placed in rows at intervals of four or five feet in the fields. Upon these, wires must be stretched, and for this operation the ingenious farmers have devised long stilts, which are fastened to their legs, enabling them to stand at a height of seven or more feet from the ground.



Stilt Hopping for Hops.

Picking and Packing Pears.

Many growers pick pears when they are quite green, but this is a mistake. It is better to pick pears when they are fully matured. Wrapped carefully in paper they will reach the market in fine condition.

If pears are picked green they will remain green. They do not ripen as many people suppose. It is necessary to pack pears, plums and peaches just tightly enough so they will not bruise by jarring in the packages.

Injurious for Pigs.

When the sow is given a warm, rich slop, or other milk-producing feeds just after her pigs are born, a strong milk flow is forced. The new-born pigs get too much and have diarrhoea which often kills them.

The Shamrock and the Palm

By O. HENRY

(Copyright, 1910, by E. L. Nelson.)

ON North Rampart Street, one day, I met Clancy, whom I had not seen in months. Clancy is an American with an Irish diathesis and cosmopolitan proclivities. Many businesses have claimed him, but none for long. The roadster's blood is in his veins.

He greeted me with heartiness, and I thought I saw something in his eye that ought to be divulged. Sometimes, when Clancy has returned from his voyages into the informal and the egregious, he can be persuaded to oral construction. Now I thought I saw in him symptoms of voluntary discourse, so I hastily convoyed him to a little cafe nearby, where a fan buzzed, mitigating the torrid sultriness of the New Orleans summer.

"'Tis very near the tropics, this weather today," said Clancy—apropos—I thought—of the season. But, it appeared, it had more to do with his story. I nodded confirmatorily.

"'Tis elegant weather," continued Clancy, "for filibusterin'. 'Tis what I've been doin' for two months past, strugglin' to liberate a foreign people from a tyrant's clutch. 'Twas hard work. 'Tis strainin' to the back and grows corns on your hands."

"So," I said, "you've turned soldier of fortune in earnest. I hope you made it pay. To what country did you lend your aid?"

"Where's Kamchatka?" asked Clancy, irrelevantly, I thought.

"Why, off Siberia, up in the Arctic regions, I believe," I answered, somewhat doubtfully.

"I thought that was the cold one," said Clancy, with a nod. "I'm always gettin' the two names mixed. 'Twas Guatemala, then—the hot one—I've been filibusterin' with. Ye'll find that country on the map. 'Tis in the district known as the tropics. By the foresight of Providence, it lies on the coast so the geography man could run the names of the towns off into the water. They're an inch long, small type, composed of Spanish dialects, and, 'tis my opinion of the same system of syntax that blew up the Maine. Yes, 'twas that country I sailed against, single-handed, and endeavored to liberate it from a tyrannical government with a single-barreled pickax, unloaded at that. Ye don't understand, of course. 'Tis a statement demandin' elucidation and apologies.

"'Twas one morning about the first of June; I was standin' down on the wharf, lookin' about at the ships in the river. There was a little steamer moored right opposite me that seemed about ready to sail. The funnels of it were throwin' out smoke, and a gang of roustabouts were carryin' aboard a pile of boxes that was stacked up on the wharf. The boxes were about two feet square, and somethin' like four feet long, and they seemed to be pretty heavy.

"I walked over, careless, to the stack of boxes. I saw one of them had ben broken in handlin'. 'Twas curiosity made me pull up the loose top and look inside. The box was packed full of Winchester rifles. 'So, so,' says I to myself; 'somebody's gettin' a twist on the neutrality laws. Somebody's aidin' with munitions of war. I wonder where the popguns are goin'.'

"I heard somebody cough, and I turned around. There stood a little, round, fat man with a brown face and white clothes, a first-class-looking little man, with a four-karat diamond on his finger and his eye full of interrogations and respects. I judged he was a kind of foreigner—maybe from Russia or Japan or the archipelagoes.

"'Hist!' says the round man, full of concealments and confidences. 'Will the senor respect the discoveryments he has made, that the mans on the ship shall not be acquaint? The senor will be a gentleman that shall not expose one thing that by accident occur.'

"'Monseer,' says I—for I judged him to be a kind of Frenchman, that assortment of foreigners being doomed by nature to politeness and dialects—'receive my most exasperated assurances that your secret is safe with James Clancy. Furthermore, I will go so far as to remark, Veev la Liberty—veev it good and strong. Whenever you hear of a Clancy obstructin' the abolishment of existin' governments you may notify me by return mail.'

"'The senor is good,' says the dark, fat man, smilin' under his black mustache. 'Wish you to come aboard my ship and drink of wine a glass?'

"Bein' a Clancy, in two minutes me and the foreign man were seated at a table in the cabin of the steamer with a bottle between us. I could hear the heavy boxes bein' dumped into the hold. I judged that cargo must consist of at least 2,000 Winchesters.

"'You goin' to stir things up in your country, ain't you, monseer?' says I, with a wink to let him know I was on.

"'Yes, yes,' says the little man, pounding his fist on the table. 'A change of the greatest will occur. Too long have the people been oppressed with the promises and the never-to-happen things to become. The great work it shall be carry on. Yes. Our forces shall in the capital city strike of the soonest. Carrambos!'

"'Carrambos is the word,' says I, beginning to invest myself with enthusiasms and more wine, 'likewise, veeva, as I said before. May the shamrock of old—I mean the banana-vine or the pie-plant, or whatever the imperial emblem may be of your down-trodden country, wave forever.'

"'A thousand thank-yous,' says the round man, 'for your emission of amicable utterances. What our cause needs of the very most is mans who will the work do, to lift it along. Oh, for one thousands strong, good mans to aid the General De Vega that he shall to his country bring those success and glory! It is hard—oh, so hard to find good mans to help in the work.'

"'Monseer,' says I, leanin' over the table and graspin' his hand, 'I don't know where your country is, but me heart bleeds for it. The heart of a Clancy was never deaf to the sight of an oppressed people. The family is filibusterers by birth, and foreigners by trade. If you can use James Clancy's arm and his blood in denudin' your shores of the tyrant's yoke they're yours to command.'

"General De Vega was overcome with joy to confiscate my condolence of his conspiracies and predicaments. He tried to embrace me across the table, but his fatness, and the wine that was not in the bottles, prevented. Thus was I welcomed into the ranks of filibustery. Then the general man told me his country had the name of Guatemala, and was the greatest nation laved by any ocean whatever, anywhere. He looked at me with tears in his eyes, and from time to time he would emit the remark, 'Ah! big, strong, brave mans! That is what my country need.'

"General De Vega, as was the name by which he denounced himself, brought out a document for me to sign, which I did, makin' a fine flourish and curlycue with the tail of the 'y'.

"'Your passage-money,' says the general, businesslike, 'shall from your pay be deduct.'

"'Twill not,' says I, haughty. 'I'll pay my own passage.' A hundred and eighty dollars I had in my inside pocket, and 'twas no common filibuster I was goin' to be, filibusterin' for me board and clothes.

"Well, then, in three days we sailed alongside that Guatemala. 'Twas a blue country, and not yellow, as 'tis mis-colored on the map. We landed at a town on the coast where a train of cars was waitin' for a dinky little railroad. The boxes on the steamer were brought ashore and loaded on the cars. The gang of Dagoes got aboard, too, the general and me in the front car. Yes, me and General De Vega headed the revolution, as it pulled out of the seaport town. That train traveled about as fast as a policeman goin' to a riot. It penetrated the most conspicuous lot of fuzzy scenery ever seen outside a geography. We run some forty miles in seven hours, and the train stopped.

"They unloaded the boxes from the train and begun to knock the tops off. From the first one that was opened I saw General De Vega take the Winchester rifles and pass them around to a squad of morbid, sore-toed soldiery. The other boxes was opened next, and, believe me or not, divil another gun was to be seen. Every other box in the lot was full of—pickaxes and spades.

"And then—sorrow be upon them tropics—the proud Clancy and the dishonored Dagoes, each one of them, had to shoulder a pick or a spade, and march away to work on that dirty little railroad. Yes; 'twas that the Dagoes shipped for, and 'twas that the filibusterin' Clancy signed for, though unbeknownst to himself at the time. In after days I found out about it. It seems 'twas hard to get hands to work on that road. The intelligent natives of the country was too lazy to work. Indeed, the saints know 'twas unnecessary. By stretchin' out one hand, they could seize the most delicate and costly fruits of the earth, and, by stretchin' out the other, they could sleep for days at a time without hearin' a seven-o'clock whistle or the footsteps of the rent man upon the stairs. So, regular, the steamers traveled to the United States to seduce labor. Usually the imported spade-slinger died in two or three months from eatin' the over-ripe water and breathin' the violent tropical scenery. Wherefore, they made them sign contracts for a year when they hired them, and put an armed guard over the poor devils to keep them from runnin' away.

"'Twas thus I was double-crossed by the tropics through a family failin' of goin' out of the way to hunt disturbances.

"They gave me a pick, and I took it, meditatin' an insurrection on the spot; but there was the guards handlin' the Winchesters careless, and I come to the conclusion that discretion was the best part of filibusterin'. There was about a hundred of us in the gang startin' out to work, and the word was given to move. I steps out of the ranks and goes up to that General De Vega man, who was smokin' a cigar and gazin' upon the scene with satisfactions and glory. He smiles at me polite and devilish. 'Plenty work,' says he, 'for big, strong mans in Guatemala. Yes. T'irty dollars in the month. Good pay. Ah, yes. You strong, brave man. Bimeby we push those railroad in the capital very quick. They want you go work now. Adios, strong mans.'

"'Monseer,' says I, lingerin', 'will you tell a poor little Irishman this: When I set foot on your cockroachy steamer, and breathed liberal and revolutionary sentiments into your sour wine, did you think I was conspirin' to sling a pick on your contemptuous little railroad? And when you answered me with patriotic recitations, humping up the star-spangled cause of liberty, did you have meditations of reducin' me to the ranks of the stump-grubbin' Dagoes in the chain-gangs of your vile and grovelin' country?'

"The general man expanded his rotundity and laughed considerable. Yes, he laughed very long and loud, and I, Clancy, stood and waited.

"'Comical mans!' he shouts, at last. 'So, you will kill me from the laughing. Yes; it is hard to find the brave, strong mans to aid my country. Revolutions? Did I speak of r-r-revolutions? Not one word. I say, big, strong mans is need in Guatemala. So. The mistake is of you. You have looked in those one box containing those gun for the guard. You think all boxes is contain gun? No, no. There is not war in Guatemala. But, work? Yes. Good. T'irty dollar in the month. You shall shoulder one pickax, senor, and dig for the liberty and prosperity of Guatemala. Off to your work. The guard waits for you.'

"'Little fat, poodle dog of a brown man,' says I, quiet, but full of indignations and discomforts, 'things shall happen to you. Maybe not right away, but as soon as J. Clancy can formulate somethin' in the way of repartee.'

"The boss of the gang orders us to work. I tramps off with the Guineas, and I hears the distinguished patriot and kidnaper laughin', hearty, as we go.

"'Tis a sorrowful fact, for eight weeks I built railroads for that misbehavin' country. I filibustered twelve hours a day with a heavy pick and a spade, choppin' away the luxurious landscape that grew upon the right of way. We worked in swamps that smelled like there was a leak in the gas mains, trampin' down a fine assortment of the most expensive hot-house plants and vegetables.

"One old man named Halloran—a man of Hibernian entitlements and discretions, explained it to me. He had been workin' on the road a year. Most of them died in less than six months. He was dried up to gristle and bone, and shook with chills every third night.

"'When you first come,' says he, 'ye think ye'll leave right away. But they hold out your first month's pay for your passage over, and by that time the tropics has its grip on ye. Ye're surrounded by a ragin' forest full of disreputable beasts—lions and baboons and anacondas—waitin' to devour ye. The sun strikes ye hard, and melts the marrow in your bones. Ye get similar to the lettuce-eaters the poetry book speaks about. Ye forget the elevated sintiments of life, such as patriotism, revenge, disturbances of the peace and the dacint love of a clane shirt. Ye do your work, and ye swallow the kerosene ile and rubber pipestems dished up to ye by the Dago cook for food. Ye light your pipeful, and say to yoursilf "Nixt week I'll break away," and ye go to sleep and call yersilf a liar, for ye know ye'll never do it.'

"'Who is this general man,' asks I, 'that calls himself De Vega?'

"'Tis the man,' says Halloran, 'who is tryin' to complete the finishin' of the railroad. 'Twas the project of a private corporation, but it busted, and then the government took it up. De Vegy is a big politician, and wants to be prisident. The people want the railroad completed, as they're taxed mighty on account of it. The De Vegy man is pushin' it along as a campaign move.'

"'Tis not my way,' says I, 'to make threats against any man, but there's an account to be settled between the railroad man and James O'Dowd Clancy.'

"'Twas that way I thought, mesilf, at first,' Halloran says, with a big sigh, 'until I got to be a lettuce-eater. The fault's wid these tropics. They rejuices a man's system. 'Tis a land, as the poet says: "Where it always seems to be after dinner." I does me work and smokes me pipe and sleep. There's little else in life, anyway. Ye'll get that way, yerself, mighty soon. Don't be harborin' any sintimints at all, Clancy.'

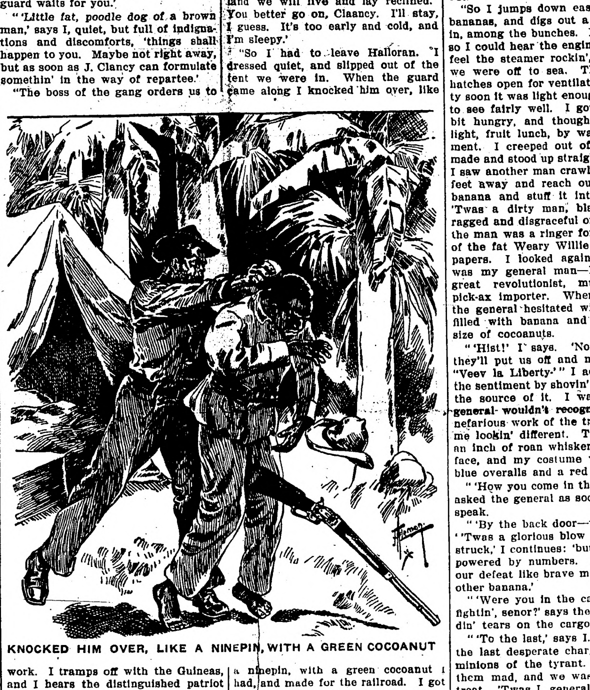
"'I can't help it,' says I, 'I'm full of 'em. I enlisted in the revolutionary army of this dark country in good faith to fight for its liberty, honors and silver candlesticks; instead of which I am set to amputatin' its scenery and grubbin' its roots. 'Tis the general man will have to pay for it.'

"Two months I worked on that railroad before I found a chance to get away. One day a gang of us was sent back to the end of the completed line to fetch some picks that had been sent down to Port Barrios to be sharpened. They were brought on a handcar, and I noticed, when we started away, that the car was left there on the track.

"That night, about twelve, I woke up Halloran and told him my scheme.

"'Run away?' says Halloran. 'Good Lord, Clancy, do ye mean it? Why, I ain't got the nerve. It's too chilly, and I ain't slept enough. Run away? I told you, Clancy, I've eat the lettuce. I've lost my grip. 'Tis the tropics that's done it. 'Tis like the poet says: "Forsaken are our friends that we have left behind; in the hollow lettuce-land we will live and lay reclined." You better go on, Claancy. I'll stay, I guess. It's too early and cold, and I'm sleepy.'

"So I had to leave Halloran. I dressed quiet, and slipped out of the tent we were in. When the guard came along I knocked him over, like a ninepin, with a green cocoanut I had, and made for the railroad. I got on that handcar and made it fly. 'Twas yet awhile before daybreak when I saw the lights of Port Barrios about a mile away. I stopped the handcar there and walked to the town.



KNOCKED HIM OVER, LIKE A NINEPIN, WITH A GREEN COCOANUT

"I was wonderin' how I was goin' to move away from them tropics without bein' hired again. Dark as it was, I could see a steamer ridin' in the harbor, with the smoke emergin' from her stacks. I turned down a little grassy street that run down to the water. On the beach I found a little brown nigger-man just about to shove off in a skiff.

"'Hold on, Sambo,' says I, 'savvy English?'

"'Heap plenty, yes,' says he, with a pleasant grin.

"'What steamer is that?' I asks him, 'and where is it going? And what's the news, and the good word, and the time of day?'

"'That steamer the Conchita,' said the brown man, affable and easy, rollin' a cigarette. 'Him come from New Orleans for load banana. Him got load last night. I think him sail in one two hour. Verree nice day we shall be goin' have. You hear some talkee 'bout big battle, maybe so? You think catchee General De Vega, senor? Yes? No?'

"'How's that, Sambo?' says I. 'Big battle? What battle? Who wants catchee General De Vega? I've been up at my gold mines in the interior for a couple of months and haven't heard any news.'

"'Oh, says the nigger man, proud to speak the English, 'verree great revolution in Guatemala one week ago. General De Vega, him try be prisidnt. Him raise armee—one—five—ten thousand mans for fight at the government. Those government send five—forty—one hundred thousand soldier to suppress revolution. They fight big battle yesterday at Lomagrande—that about nineteen or fifty mile in the mountain. That government soldier wheep General De Vega—oh, most bad. Five hundred—nine hundred—two thousand of his mans is kill. That revolution is smash suppress—busted—very quick. General De Vega, him r-r-run away fast on one big mule. Yes, carrambos! The general, him r-r-run away, and his armee is kill. That government soldier, they try find General De Vega verree much. They want catchee him for shoot. You think they catchee that general, senor?'

"'Saints grant it!' says I. 'Twould be the judgment of Providence for settin' the warlike talent of a Clancy to gradin' the tropics with a pick and shovel. But, 'tis not so much a question of insurrections, now, me little man, as 'tis of the hired-man problem. 'Tis anxious I am to resign a situation of responsibility and trust with the white wings department of your great and degraded country. Row me in your little boat out to that steamer, and I'll give ye five dollars—sinker pacers—sinker pacers,' says I, reducin' the offer to the language and denomination of the tropic dialects.

"'Cinco pesos,' repeats the little man. 'Five dollee, you give?'

"'Twas not such a bad little man. He had hesitations at first, sayin' that passengers leavin' the country had to have papers and passports, but at last he took me out alongside the steamer.

"Day was just breakin' as we struck her, and there wasn't a soul to be seen on board. The water was very still, and the nigger-man gave me a lift from the boat, and I climbed onto the steamer where her side was sliced to the deck for loading fruit. The hatches was open, and I looked down and saw the cargo of bananas that filled the hold to within six feet of the top. I thinks to myself, 'Clancy, you better go as a stowaway. It's safer. The steamer men might hand you back to the employment bureau. The tropics 'll get you, Clancy, if you don't watch out.'

"So I jumps down easy among the bananas, and digs out a hole to hide in, among the bunches. In an hour or so I could hear the engines goin', and feel the steamer rockin', and I knew we were off to sea. They left the hatches open for ventilation, and pretty soon it was light enough in the hold to see fairly well. I got to feelin' a bit hungry, and thought I'd have a light, fruit lunch, by way of refreshment. I creeped out of the hole I'd made and stood up straight. Just then I saw another man crawl up about ten feet away and reach out and skin a banana and stuff it into his mouth. 'Twas a dirty man, black-faced and ragged and disgraceful of aspect. Yes, the man was a ringer for the pictures of the fat Weary Willie in the funny papers. I looked again, and saw it was my general man—De Vega, the great revolutionist, mule-rider and pick-ax importer. When he saw me the general hesitated with his mouth filled with banana and his eyes the size of cocoanuts.

"'Hist!' I says. 'Not a word, or they'll put us off and make us walk. "Veev la Liberty"!' I adds, copperin' the sentiment by shovin' a banana into the source of it. I was certain the general wouldn't recognize me. The nefarious work of the tropics had left me lookin' different. There was half an inch of roan whiskers coverin' my face, and my costume was a pair of blue overalls and a red shirt.

"'How you come in the ship, senor?' asked the general as soon as he could speak.

"'By the back door—whist!' says I. 'Twas a glorious blow for liberty we struck,' I continues: 'but we was overpowered by numbers. Let us accept our defeat like brave men and eat another banana.'

"'Were you in the cause of liberty fightin', senor?' says the general, sheddin' tears on the cargo.

"'To the last,' says I. 'Twas I led the last desperate charge against the minions of the tyrant. But it made them mad, and we was forced to retreat. 'Twas I, general, procured the mule upon which you escaped. Could you give that ripe bunch a little boost this way, general? It's a bit out of my reach. Thanks.'

"'Say you so, brave patriot?' said the general, again weepin'. 'Ah, Dios! And I have not of the means to reward your devotion. Barely did I my life bring away. Carrambos! what a devil's animal was that mule, senor! Like ships in one storm was I dashed about. The skin of myself was ripped away with the thorns and vines. Upon the bark of a hundred trees did that beast of the infernal bump, and cause outrage to the legs of mine. In the night to Port Barrios I came. I dispossess myself of that mountain of mule and hasten along the water shore. I find a little boat to be tied. I launch myself and row to the steamer. I cannot see any mans on board, so I climb one rope which hang at the side. I then myself hide in the bananas. Surely, I say, if the ship captains view me, they shall throw me again to those Guatemala. Those things are not good. Guatemala will shoot General De Vega. Therefore I am hide and remain silent. Life itself is glorious. Liberty, it is pretty good; but so good as life I do not think.'

"That General De Vega was a man inhabited by an engorgement of words and sentences. He added to the monotony of the voyage by divestin' himself of conversation. He believed I was a revolutionist of his own party, there bein', as he told me, a good many Americans and other foreigners in its ranks. 'Twas a braggart and a conceited little gabbler it was, though be considered himself a hero. 'Twas on himself he wasted all his regrets at the failin' of his plot. Not a word did the little balloon have to say about the other misbehavin' idiots that had been shot, or run themselves to death in his revolution.

"The second day out he was feelin' pretty braggy and uppish for a stowed away conspirator that owed his existence to a mule and stolen bananas. He was tellin' me about the great railroad he had been buildin', and he relates what he calls a comic incident about a fool Irishman he inveigled from New Orleans to sling a pick on his little morgue of a narrow-gauge line. 'Twas sorrowful to hear the little, dirty general tell the opprobrious story of how he put salt upon the tail of that reckless and silly bird, Clancy. Laugh, he did, hearty and long. He shook with laughin', the black-faced rebel and outcast, standin' neck-deep in bananas, without friends or country.

"'Ah, senor,' he snickers, 'to the death would you have laughed at that drollest Irish. I say to him: "Strong, big mans is need very much in Guatemala." "I will blows strike for your down-pressed country," he say. "That shall you do," I tell him. Ah! it was an Irish so comic. He see one box break upon the wharf that contain for the guard a few gun. He think there is gun in all the box. But that is all pickax. Yes. Ah, senor, could you the face of that Irish have seen when they set him to the work!'

"'Twas thus the ex-boss of the employment bureau contributed to the tedium of the trip with merry jests and anecdote. But now and then he would weep upon the bananas and make oration about the lost cause of liberty and the mule.

"'Twas a pleasant sound when the steamer bumped against the pier in New Orleans. Pretty soon we heard the pat-a-pat of hundreds of bare feet, and the Dago gang that unloads the fruit jumped on the deck and down into the hold. Me and the general worked a while at passin' up the bunches, and they thought we were part of the gang. After about half an hour we managed to slip off the steamer onto the wharf.

"'Twas a great honor on the hands of an obscure Clancy, havin' the entertainment of the representative of a great foreign filibusterin' power. I first bought for the general and myself many long drinks and things to eat that were not bananas. The general man trotted along at my side, leavin' all the arrangements to me. I led him up to Lafayette Square, and set him on a bench in the little park. Cigarettes I had bought for him, and he humped himself down on the seat like a little, fat, contented hobo. I look him over as he sets there, and what I see pleases me. Brown by nature and instinct, he is now brindled with dirt and dust. Praise to the mule, his clothes is mostly strings and flaps. Yes, the looks of the general man is agreeable to Clancy.

"I told him not to move from the bench, and then I went up to the corner of Poydras and Carondelet. Along there is O'Hara's beat. In five minutes along comes O'Hara, a big, fine man, red-faced, with shinin' buttons, swingin' his club.

"'Is 5046 workin' yet, Danny?' says I, walkin' up to him.

"'Overtime,' says O'Hara, lookin' over me suspicious. 'Want some of it?'

"Fifty-forty-six is the celebrated city ordinance authorizin' arrest, conviction and imprisonment of persons that succeed in concealin' their other crimes from the police.

"'Don't ye know Jimmy Clancy?' says I. 'Ye pink-gilled monster!' So, when O'Hara recognized me beneath the scandalous exterior bestowed upon me by the tropics, I backed him into a doorway and told him what I wanted, and why I wanted it. 'All right, Jimmy,' says O'Hara. 'Go back and hold the bench. I'll be along in ten minutes.'

"In that time O'Hara strolled through Lafayette Square and spied two Weary Willies disgracin' one of the benches. In ten minutes more J. Clancy and General De Vega, late candidate for the presidency of Guatemala, was in the station house. The general is badly frightened, and calls upon me to proclaim his distinguishments and rank.

"'The man,' says I to the police, 'used to be a railroad man. He's on the bum, now. 'Tis a little bughouse he is, on account of losin' his job.'

"'Carrambos!' says the general, fizzin' like a little soda-water fountain, 'you fought, senor, with my forces in my native country. Why do you say the lies? You shall say I am the General De Vega, one soldier, one caballero ——'

"'Railroader,' says I, again. 'On the hog. No good. Been livin' for three days on stolen bananas. Look at him. Ain't that enough?'

"Twenty-five dollars or sixty days, was what the recorder gave the general. He didn't have a cent, so he took the time. They let me go, as I knew they would, for I had money to show, and O'Hara knew me. Sixty days. 'Twas just so long I slung a pick for the great country of Kam—of Guatemala."

Clancy paused. There was a look of happy content on his deeply sunburned face.

"Would you just step around the corner a minute with me?" he asked. "If ye don't mind, I'll walk with ye there, and show ye Exhibit A. I go around there myself, every ten minutes, to look at it, and the time's about up now."

I walked with him to the corner of Ursulines and down the street a little way. A gang of men, under guard from the parish prison was at work cleaning the very rubbishy street, thus working out the fines they were unable to pay otherwise.

Clancy stopped me on the sidewalk opposite a little, rotund, dark-featured man of foreign aspect, who was struggling feverishly with a heavy iron rake. The heat was almost tropical, and the little man showed vast areas of dampness through his tattered clothes.

"Hey, monsoor!" called Clancy, sharply. The little man looked up and scowled darkly. "Fat, strong mans," shouted Clancy, cheerily, "is needed in New Orleans. Yes. To carry on the good work. Carrambos! Erin go bragh!"

Roosevelt's strength has been failing as Taft's weakness has been growing. The people will never forgive Roosevelt for giving them Taft.

What was the Canadian reciprocity bill, anyway, if it was not tariff legislation. Taft should have waited for a "scientific" report on it from the tariff board.

Just as soon as the big main ditch in the Mud Lake drainage system is finished the people out in the eastern part will bid Thief River Falls a swift good-bye, and the settlers will drive in along a good road to do their shopping in a good town—Holt.

The Thief River Falls Times publishes a "Directory" giving the names of all the city officials and the county officials of Pennington, Red Lake and Marshall counties. They omit entirely any mention of their Commercial Club. We wonder if that body is a secret society, or if the Times is ashamed of the organixation.

A land owner at Hallock sold thirty acres of timothy for the hay a couple of weeks ago at $2 per acre. The party who bought it cut the hay and threshed it. He realized $1,000 for the seed and had the hay besides. It is needless to say that the man who sold the hay land has got his eyes opened since he made the deal. —Argyle Banner.

The Greenbush Tribune speaks of the present State Board of Control as being narrow-minded and incompetent, and says there is need for new material on the board. To those who know the members of the board personally and the individuals who are trying to get them ousted, the Tribune's remark shows only ignorance of the men and the motives. There is not a man on the board of control but is mentally and morally a giant as compared with Stephens, Eberhart and Wheelock.

The Thief River Falls Commercial Club and its newspapers, assisted by the Warren Sheaf, are all making strenuous efforts to convince the outside world that there is no other way to get into the country opened by the Mud Lake drainage system than to drive into it from Thief River Falls. All of which is straight bunco, and done for the benefit of the Thief River Falls business men. The easiest way to get to the best part of the Mud Lake district is through Holt, and the combined efforts of Thief River Falls and Warren cannot keep the knowledge of that fact from the public for very long.

When it is taken into consideration that both of the members of the firm of Widsten & Moorhead, publishers of the Warroad Plaindealer, have worked side by side with the editor of this paper in the past, the following editorial in that paper is highly appreciated as an expression of their good will:

"The Northern Light is a new newspaper at Holt, Marshall county. Chas. W. Latta, one the best known newspaper men in northern Minnesota, is the editor. If the folks at Holt will furnish the oil Charles is the wick that can make the Northern Light shine to beat the band."

There is a good deal of a demand for an extra session of the legislature. The governor has no time to attend to the business of state at home—Wheelock does that—and need not be expected to make a move until his bosses get through playing politics with the Red Wing Training School investigation. If an extra session should be called it would be well to enact a law taking the Board of Control completely out of politics; make the members thereof subject to election on a purely non-partisan basis, and make their removal an impossibility except by the legislature or a referendum vote of the people. The present system allows petty political sneaks altogether too much latitude.

Roosevelt's strength was considered lost when New York stand-pat republicans flocked to the democratic fold and elected a democrat instead of the republican nominee. This happened only last year and there was a lot of the newspapers that did not call those bolting republicans traitors—they blamed it on the weakness of Roosevelt. For many years New York has been held up as the criterion for the political actions of other states and we fail to see wherein the action of a few northwestern "insurgents" would be any more ignoble, provided they saw fit to bolt the party nominee, than was the action of the New York stand-patters. The stand-pat "fire in the rear" of the republican party has demoralized that party hopelessly. The insurgent who will bolt rather than uphold party rottenness is a better man than the present party head.

Must Carry White Light

(From the Minneapolis Journal.)

Down in the body of the new automobile code that the last legislature passed and which will be effective after Jan. 1. there is imbedded, it has been discovered, a paragraph which will compel all vehicles other than motors that go out after dark to carry "a white light." A team driver under the new law will have to carry a light that will show both front and rear. If he does not, and an automobile runs into him, he is barred, under the new code, from recovering damages.

"All the vehicles in Minnesota must carry a white light" is the literal import of the code as laid down. That every vehicle must be provided with such a light is the evident intent, rather than that a certain, specific white light, somewhere existent, must be used by all.

Severe upon automobile drivers and requiring not only that two front lights be carried, but that a rear light be affixed that will shine upon the license number, the code is even more drastic than in its application to horsemen. Front and rear, the white light that every rig must carry will have to show, to comply with the code. The law stops right there. So long as the light shows from both front and rear of a rig, the law cares not, seemingly, if it is held aloft in the hand, or swings from the crosstree of a mast with rigging. Although it is doubtful if team drivers or horsemen generally have as yet had knowledge of it the application of this paragraph is state wide. The driver of a horse or team who neglects to provide his rig with a "white light" showing front and rear, will be taking a chance after January 1.

CAREER OF HEROISM CLOSES

Passing of Mrs. Janet Helen King, Who Was Angel of Mercy on Many Battlefields.

A career of heroism on the battlefields of Europe and Africa has closed by the death of Mrs. Janet Helen King of Purley, Middlesex, England. When only about nineteen years old she was one of a party sent out to assist in nursing the troops engaged in the war between Russia and Turkey. After the party lost its way, and the night was passed in open carts, bitter cold and the howling of wolves effectually preventing sleep. To Sister Janet's care were allotted ome 200 patients who lay in huts scattered amongst the hills. Daily as she trudged through the snow from hut to hut on her mission of mercy, she was exposed to attacks from the wild dogs that infested Bulgaria. More than once these brutes had her down, but her stick and dagger protected her until her cries brought assistance. At the close of the war she received the Imperial Order of the Red Cross of Russia. She went out, too, to the Zulu war, and at Utrecht 3,200 sick and wounded passed through her hands.

CANADA NEVER HAD LYNCHING

Respect for Law Instilled Through Centuries of British Rule Is the Reason.

"When a Canadian visits the United States and reads in your papers of the outrageous lynchings that frequently occur in the south, it surprises and shocks him," said Andrew Shearer, a solicitor of Montreal, at the Raleigh. "Such a thing as a lynching was never known in Canada, though, I suppose, that occasionally crimes are committed that arouse the people to an intense state of horror and indignation.

"Such is the respect for the law, however, instilled in the people through centuries of British rule, that no one would think of raising a hand against an officer of the law. I have seen crowds around a prisoner guilty of committing murder or other crime that arouses the wrath of the people, but there never is an attempt to injure him. The law must take its course, and the people never interfere. It is astonishing to Canadians, therefore, to read of the lawlessness that exists in some parts of the United States."—Washington Post.

LIGHT AS BARRIER TO EELS.

The Danish government has begun an interesting effort to aid the fishermen of the Baltic by preventing the migration of eels from that sea into the ocean. The means employed is a "barrier of light," formed by placing fifty electric lamps along a submerged cable between the island of Fano and the coast of Funen. The effectiveness of such a barrier depends upon the fact that the eels migrate only during the dark hours. Accordingly, as soon as darkness begins, in the season of migration, the lamps are illuminated, and thus a wall of light is interposed from which the eels recoil. A similar principle is said to have been employed from time immemorial by fishermen on certain parts of the coast of Italy

ANALOGY.

"If nature had intended man to fly," said the positive person, "she would have given him wings."

"I suppose, then," replied the aviator, "that if man were intended to travel by water he would be webfooted."

IS QUEEREST OF ANIMALS

Chameleon's Capabilities in Line of Changing Color, Contrary to Popular Belief, Are Limited.

It is popularly supposed that the chameleon possesses the power of assuming all the colors of the rainbow, but, as a matter of fact, its capabilities in that line are restricted, inasmuch as certain colors are quite beyond its attainment.

The chameleon can, however, pass through a series of yellows, grays, greens and browns until it reaches a color almost black; and, unlike the leopard, the chameleon can and does change its spots. The chief causes of these rapid changes are anger, excitement, fear, heat and cold.

In the full blaze of the summer sun the chameleon takes on a blackish hue, with pale, pinkish-yellow spots and a central stripe.

The chameleon presents, perhaps, the quaintest physical features in all animaldom, for he resembles nothing so much as one of the mediaeval gargoyles, such as adorn the tower of Notre Dame. His toes, in their arrangement of three on one side and two of the other of each hand and foot, are most suggestive of a birds as is also the manner in which they grasp the bough upon which the little fellow is resting or climbing. The expression of sardonic humor that seems to play about the mouth of the chameleon is curiously heightened by the weird effects of the independently moving eyes.

GENIUS NEAR TO INSANITY

Many Maladies Called Degeneracy Just Too Much of Highly Developed Nerves.

Where my eugenic friend goes wrong is in failing to realize that a great many of the maladies which he calls degeneracy are just too much of the highly developed nervous system which is the special endowment of the gifted families.

Overcharge the battery ever so little and genius becomes insanity; give one member of the family a volt too much and the delicate balance of phyiscal and mental qualities on which sanity depends is broken down. Extinguish the family and you will rid the world of some degenerate, but you will also and at the same time rob it of its most gifted men.

My eugenist would never have let Cowper, Lamb, Coleridge, Stevenson, Keats, Ruskin, Henley or De Quincey see the light.

The doctrine of heredity should never be forgotten by parents or remembered by children. To the first it is the assertion of their responsibility; to the second a rembinder of their helplessness.—J. A. Spander in the Westminster Gazette.

HOW CHINA LIVES.

No natural resource is too trifling to be turned to account by the teeming population. The sea is raked and strained for edible plunder. Seaweed and kelp have a place in the larder. Great quantities of shellfish no bigger than one's finger-nail, are opened and made to yield a food that finds its way far inland. The fungus that springs up in the grass after a rain is eaten. Fried sweet potato vines furnish the poor man's table. The roadside ditches are bailed out for the sake of fishes no longer than one's finger.

Careful observers say that four-fifths of the conversation among common Chinese relates to food.—Edward Alsworth Ross, in Century.

FOR CONSCIENCE SAKE.

Collector Loeb of the New York custom house received a two-dollar bill inclosed in the following letter signed D. C. and dated Evanston, Ill.:

"Some time ago I past tru your custom house on my way from Europe and had in my trunk a article that I have to pay duty for but did not at that time now I feel I must and will pay it for conscience sak I am a christian man and enclose 2 dollars the article was worth about 8 dollars the article was cloth to an overcoat will you forgive me for not doing it in right time Hope you will received it."

A SAFE SURMISE.

"I see where a rich man has married a soubrette who reflected a spotlight into his eyes with a mirror while she was singing a song."

"What conclusions do you draw from that."

"She evidently dazzled him."

Farm Lands and Farm Loans

Something New In Kitchen Ware

The "1892" Pure Spun Aluminum Ware is rapidly coming into use for cooking purposes. It is taking the place of agate and enamel ware because while its first cost is a trifle more than ordinary ware, it is really much cheaper in the long run, as it is guaranteed for twenty-five years and will last practically a life time.

The genuine "1892" Ware, made only from pure SPUN (not cast) Aluminum, will not crack, scale, peel, break, scorch or burn.

It looks like silver but weighs only about one-quarter as much, is easily cleaned and handled, and will not rust, corrode or tarnish. Absolutely pure, non-poisonous and wholesome; saves money, time and doctor's bills.

Be sure you get the original and genuine ware stamped with the Maltese Cross. At your dealers.

Bring us the news.

Next week is State Fair week.

When in town call at this office and let's get acquainted.

Editor Grimstad, of the Newfolden Review was a business visitor here on Sunday.

Ernest Paulick went up to Middle River yesterday to make a short visit with his sister.

Mr. and Mrs. Ole Johnson were in from their home south of Mud Lake on Monday to do some shopping.

Mrs. Geo. Anderson went to Crookston on Friday last on business and to make a brief visit with relatives.

Lars Backe was up from Thief River Falls on Monday visiting with his son, B. L. Backe, and other friends.

Rev. M. B. Ordahl will conduct services at Thief Lake next Sunday at 3 o'clock P. M. Everybody is invited to attend.

Mrs. Fred Lufkin returned to her home at Thief River Falls on Monday after a visit with her parents, Mr. and Mrs. P. Reierson.

Mrs. Torrison and children returned to Thief River Falls on Monday after a visit of ten days or so with friends in Holt and vicinity.

Wanted — Anyone having for sale a good, second-hand cook stove, number 9, is requested to notify this office giving full particulars.

Carl Surmo was in Monday from his homestead west of Mud Lake and made this office a pleasant call. He says that the settlers out there are well pleased with their prospects this year.

Strayed—From Hogan Anderson farm in Sec. 33, Holt township, about May 1st one red and white bull with small horns, 15 months old. Finder please notify Hogan Anderson, Holt, Minn.

G. H. Knudtson was up from Thief River Falls on Tuesday looking after his property interests in Holt and visiting with friends. Hereafter he will be one of the steady readers of the Northern Light.

We want a live correspondent in every township in Eastern Marshall county to send us the news of the locality and solicit subscriptions for this newspaper. We want bright young people and will make it worth their while to represent us.

The Nazareth Young Peoples' Society, of Holt, will hold their next regular meeting at the home of Rev. M. B. Ordahl, in section 25 of East Valley, on Sunday afternoon, September 10th. Divine services will be held at 2 o'clock in the afternoon and the Young Peoples meeting immediately afterwards.

B. L. Backe made a business trip to Thief River Falls on Tuesday.

Anders Peterson came up from Thief River Falls on Wednesday for a visit with friends.

Sam Goplin and wife were over from Ellerth for an over Sunday visit with Mrs. Thomas and family.

Christ Strom was up from Thief River Falls on Wednesday for a visit with his father, Martin Strom.

Miss Albertina Nyberg went to Grand Forks on Wednesday to spend a few days visiting with relatives.

Miss Belle Knutson came up from Thief River Falls on Saturday to spend a few days with the home folks.

Ole Iverson has been busy this week doing some repair work and decorating on the Reierson store building.

Mrs. Alex Strom and children are here from Thief River Falls visiting with her parents, Mr. and Mrs. P. A. Risberg.

Miss Julia Lunde returned on Tuesday from Warroad where she has been visiting with her sister for the past five weeks.

Miss Ruth Knudson left on Tuesday for Gary where she will visit for some time with her sister and may decide to remain and attend school this winter.

Rev. S. Tunheim, of Newfolden, will conduct Gospel services on Sunday in the Holt schoolhouse. The service will begin at 10:30 A. M. and all will be cordially welcomed.

Taken Up--On Sunday, the 13th inst, by Fred Larson, 3 miles east of Holt, one white, heavy wool buck with bell on. Owner can have same by calling, proving property and paying expenses.

Mrs. Olaf Mickelson came in from her home south of Mud Lake on Wednesday and went out for a visit with her parents southwest of here. She also intends to make a visit with friends in Dakota before returning to life on the claim.

H. O. Ekerdalen was in town on Wednesday and reports that he seeded his winter wheat last week and that the seed is already sprouting nicely. He believes in getting his work done in good time and finds that it pays to be early.

Miss Tillie Tunheim came over from Newfolden on Saturday and went to Roseau where she remained until Tuesday visiting with a brother. She says it rained about all the time up there and harvesting and threshing operations were at a standstill.

On next Tuesday the hunting season opens for prairie chickens, grouse, ducks and geese. The partridge season does not open until October 1st, and any hunter killing partridges before that time is subject to the same penalty as for killing other feathered game before season.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

On Sunday evening Mrs. C. H. Gunheim entertained a big crowd of the people of Holt at a sumptuous supper. About forty guests were present and all enjoyed the occasion to the utmost. After the supper the evening was spent in a social manner until the midnight hour when a lunch was served, after which the good-nights were said and all returned to their homes having spent an evening that will be long remembered as a most pleasant occasion.

THREE MONTHS FOR $1.00—Mailed Daily.

ADDRESS HERALD CIRCULATION DEPT., DULUTH, MINN.

Voted $40,000 Bond Issue

A special election was held last Friday in Thief River Falls to vote on a proposition to issue city bonds in the sum of $40,000 for the purpose of installing steam power as an auxiliary to the electric light and power plant, which is owned by the city. The bond issue was carried by nearly a 10 to 1 vote.

With the water in the Red Lake river so low as to be practically useless for power purposes, the outlook for the users of the city light and power was not any too bright, and the approach of winter made heroic action necessary. Now that the bond issue has been decided upon the prospects are greatly improved, as it is expected that the council will let a contract for the work just as quickly as legal procedure will permit.

New Creamery at Malcolm

A new farmers' co-operative creamery was organized a few days ago at Malcolm, about 45 miles east of here in Beltrami county. The farmers are very enthusiastic over their venture, in spite of the fact that they will have to haul their butter further than any other creamery in the state, unless a new railroad is built before they get the creamery started. At present they haul to Thief River Falls, but, when the big main ditch of the Mud Lake system is finished, it will be shorter by many miles to come to Holt.

While driving in from the new bridge across Thief river on Wednesday morning Omar Warring had an odd experiance in a runaway. He was driving the running gear of a wagon and had a pole lying on it The pole fell off over the front end and the end of it hit him in the head knocking him off at the rear end. The team ran away and he found them later tied to a telephone pole five miles further along the road.

Bring Us Some Samples.

We have numerous requests from southern Minnesota and Iowa points for samples of grains and other farm products raised in this district. If farmers will bring us in such samples we will distribute them where they will advertise this part of the country to good advantage.

CRUSOE IN MANHATTAN.

Another reason why an Englishman is apt to tire of New York with unexpected rapidity is the curious isolation of the city. One feels in New York singularly cut off from the rest of the world and not least from the rest of America. Personally I confess I never really regard myself as in the United States until New York is left behind and I am free of its atmosphere of concentrated self sufficiency. . . . A Londoner who is used to being at the center of things and watching beneath his very eyes the convergence of a thousand worldwide interests not only feels in New York that he has been banished to the outer circumference, but feels also that he has left England without really reaching America.—From the narrative of a revisiting Englishman in Harper's Weekly.

WASN'T QUITE SURE

Effie—Wasn't it Tennyson, mamma, that wrote "In Memoriam?"

Mrs. Quickrich—I don't know exactly if that was the place, but it was somewhere in England, I believe.

THE EXCEPTION.

"The big peaches are always on top."

"Not always. I know a little peach who leads everything in this town."

Wheat Yield is Very Good

Wheat threshing in this vicinity was commenced on Tuesday by the Ellingson-Knudson threshing rig at the Otto Johnson farm northeast of Holt. The yield turned out better than was expected and proved to be a little over 25 bushels per acre. The grain is of a very fine quality and is expeced to grade up to the top notch when hauled to the elevator. Business men and others in this vicinity, who were familiar with the Johnson field, are now predicting that wheat will average from 20 to 25 bushels per acre in this neighborhood, though there are sone spots where rust has damaged the crop slightly.

Homestead For Sale.

For reasonable price will sell relinquishment to one of the most desirable quarter sections in the Mud Lake district. Address L. G., care of The Northern Light, Holt, Minn. (a1-15)

Business Chance.

FOR SALE CHEAP—My property in Holt, consisting of good two-story building, large barn and good lot; centrally located. Cheap, if taken at once. Easy terms.

SAM MICKELSON,
Holt, Minn.

Farms Wanted.

I have prospective buyers for a few good improved farms; also for 960 acres of wild land. All must be in eastern Marshall county.

CHAS. W. LATTA, Holt, Minn.

REALLY LIVING.

"The cure for a narrow and confined understanding is to see many things and many men; to taste of the sweetness of truth in science and to cultivate a love of it; to have the words liberality, candor, knowledge often in your mouth, and at length they will get into your heart; to ask the reason of things and find the meaning of words; to hear patiently anyone who confirms what you thought before, or who refutes it; to propose to yourself in life the same object as the law proposes in the examination of evidence—to get at the truth, and nothing but the truth."—Sydney Smith.

A MIDNIGHT ROBBERY.

Brown—I tell you, a man misses a whole lot by being married.

Benedict—Right you are. I missed $4.90 my wife took out of my pocket last night.

HE FLIRTED WITH HER, TOO.

Mrs. Jigson (at the seaside hotel)—Oh! guess what! I caught your husband flirting today.

Mrs. Flipper (absently)—That's the way I caught him.

BUSINESS.

"How much milk does your cow give?"

"Eight quarts a day."

"How much of it do you sell?"

"Ten quarts, miss."—Life.

HARVESTER AT WORK

Uncounted Miles of Bountiful Crops Make Glad the Farmers of Western Canada.

YIELD WILL BE RECORD ONE

Practically Beyond Reach of Accident, the Fruit of the Fertile Fields Is Being Gathered—Elevators and Railroads Will Be Taxed to Their Capacity.

On a beautiful Saturday afternoon, four weeks ago, the writer started for a twenty-mile drive into the country, from one of the hundred or more new towns that have been well started during the past spring, in the Province of Saskatchewan, in Western Canada. Mile after mile, and mile after mile, was traversed through what was one continuous wheat field, the only relief to the scene being the roadways that led back into other settlements, where would have been repeated the same great vista of wheat.

What a wealth! Here were hundreds and thousands, and millions of bushels of what was declared to be a quality of grain equal to any that has ever been grown in the province. As we drove on and on I thought of those fellows down on the Board of Trade at Chicago, St. Louis, Minneapolis and Duluth. While they were exploiting each others' energies the farmer of Saskatchewan, Alberta and Manitoba was contemplating how much he would realize out of his crop, now past any danger of accident, over what his anticipations were two months ago. One man said to me: "The profits of that field of wheat will give me sufficient money to purchase 320 acres of land, for which the railway company is asking $6,400, and pay it in cash." Another, with a field of flax—it was only 320 acres—said he could do the same and still have a balance in the bank. Flax produces wonderfully well, and the current price is about $2.50 per bushel. We then drove over into another township, getting further back from the railway, and the main traveled road. Here we found ourselves in the center of a Swedish settlement. Those forming the settlement were originally from Nebraska. Invited to put up our horses and stay over for dinner, and a dinner that was enjoyed not only on account of the generous appetite created by the exhilarating drive, but also because of the clean linen, the well-prepared dishes of roast fowl, potatoes, cabbage, and a delightful dessert, some of the history of the settlement was learned. The host and hostess were modest in describing their own achievements, and equally modest as to those of their friends, but enough was learned to satisfy us that they had come there about three years ago, in moderate, almost poor, circumstances. Most of them had received their homesteads as a gift from the government, and by careful diligence had purchased and paid for adjoining land. They had plenty of cattle and horses, some sheep and hogs, and large well-kept gardens, showing an abundance of potatoes and cabbage and other vegetables. Their buildings were good. Schools were in the neighborhood and there was evidence of comfort everywhere.

On to the Park Country.

Reluctant to leave these interesting people, the horses thoroughly rested, were "hooked up" and driven on, under a sun still high in the heavens, with the horses pulling on the bit and traveling at a 12-mile an hour gait over a road that would put to shame many of the macadamized streets, we were whirled along a sinuous drive through the woods and then out in the park country.

Here was another scene of beauty, groves of poplar, herds of cattle, fenced fields of wheat and oats and barley and flax. Here was wealth, and happiness and surely contentment. The crops were magnificent. The settlers, most of them, by the way, from Iowa, had selected this location because of its beauty. Its entire charm was wholesome. Fuel was in abundance, the soil was the best, the shelter for the cattle afforded by the groves gave a splendid supply of food, while hay was easy to get. They liked it. Here was a sturdy farmer, with his three boys. He had formerly been a merchant in an Iowa town, his children had been given a college education and one of the boys was about to marry the accomplished daughter of a neighboring farmer.

Through Land of Wealth.

The invitation to remain to supper was accepted, but that given to remain over night was tabled. It was only a 25-mile drive into town over the best of roads, through such a splendid country, all one beautiful picture, and such an opportunity to use one's imagination in figuring up the amount of the wealth of the crops through which the trip into town took us, was not to be enjoyed every day. And away we started.

It was delightful. We drove and drove through avenues of wheat, which today, having yellowed with the beneficent sun, is being laid low by the reaper, stacked and threshed by the thousands of hands required to do it, and in great wagons is being taken to the elevator.

A night's ride by train took us through 225 miles of this great province of Saskatchewan—into the southwestern part—and from appearances it might have been as though a transfer had been made across a township. There were wheat fields, oat fields, barley fields and flax fields, and many more that could not be seen. Yet there they were, and during the night we had passed through a country similarly cultivated.

It will all secure a market and get its way to ocean or local mill by means of the great railways whose well-arranged systems are penetrating everywhere into the agricultural parts.

Prosperous Alberta.

We afterward went over into Alberta, and here again it was grain and cattle, cattle and grain, comfortable farm homes, splendidly built cities and towns, the best of churches and the most thoroughly equipped schools.

While talking with a Southern Saskatchewan farmer he said that the land he was working, and for which he had been offered $60 an acre, had been purchased five years ago for $12 an acre, but he won't sell. He is making a good profit on his land at $60 an acre, and why should he sell? Farther north, land was selling at from $15 to $18 and $20 an acre. It was learned afterward that the soil was similar to that in the south, the price of which today is $60 an acre. The climate was similar and the markets as good. In fact the only difference was that today these northern lands occupy the same position that the more southerly ones did five years ago, and there are found many who say they will come into a price nearer their legitimate value of $50 or $60 an acre quite as quickly as the southerly lands. And I believe it.

Steam Plowing in Western Canada.

Throughout all this great country, practically 500 by 800 miles square, there are still a great many homesteads which are given free to actual settlers. Many who have secured patents for their homesteads consider their land worth from $18 to $25 per acre.

Immense Crops Assured.

Throughout the southern portion of Alberta, a district that suffered more or less last year from drouth, there will be harvested this year one of the best crops of fall wheat, winter wheat, oats, flax and alfalfa that has ever been taken off these highly productive lands.

In Central Alberta, which comprises the district north of Calgary and east two hundred miles, through Camrose, Sedgewick, Castor, Red Deer, Wetaskiwin, Edmonton, Lacombe, Vegreville, Tofield, Vermillion and a score of other localities, where are settled large numbers of Americans, the wheat, oats and flax, three weeks ago, was standing strong and erect, large heads and promising from 30 to 35 bushels of wheat and as high as 100 bushels of oats on carefully tilled fields, while flax would probably yield from 15 to 18 bushels per acre. In these parts the harvesters are busy today garnering this great crop and it will shortly be known whether the great anticipations are to be realized.

Throughout all parts of Saskatchewan, whether north, south, east or west, the same story was heard, and the evidence was seen of the splendid and bountiful crop.

Rich Yield in Manitoba.

In Manitoba it was the same. The fields of grain that were passed through in this province promised to give to the growers a bumper yield, and as high as 35 bushels of wheat and 60 bushels of oats was freely discussed.

It would appear as if the expectation of an average of 25 bushels of wheat throughout the three provinces would be met.

In a few days the 40,000,000-bushel elevator capacity throughout the country will be taxed, the 25,000,000 bushels capacity at Fort William and Port Arthur will be taken up, and the railways and their equipment will be called upon for their best. Today the great, broad, yellow fields are industrial haunts, the self-binder is at work in its giant task of reducing into sheaves the standing grain, the harvesters are busy stocking and stacking, the threshing machines are being fed the sheaves, the large box wagons are taking it to the elevators, and no matter where you go it is the same story and a picture such as can only be seen in the great grain fields of Manitoba, Saskatchewan and Alberta.

SERIAL STORY

The Girl of My Dreams

A Novelization of the Play by Wilbur D. Nesbit and Otto Hauerbach

Novelized By WILBUR D. NESBIT

Copyright by W. D. Nesbit

5

SYNOPSIS.

Harry Swifton is expecting a visit from his fiancee, Lucy Medders, a Quakeress whom he met in the country. His auto crashes into another machine containing a beautiful woman and a German count. The woman's hat is ruined and Harry escapes. His sister, Caroline, arrives at his home to play hostess. Socrates Primmer, cousin of Lucy's, arrives with a hat intended as a present for Lucy. Harry is trailed to his home by the Count and Mrs. Gen. Blazes, who demands her hat, a duplicate of which she says has been delivered at Harry's house. She is in great fear lest her husband hear of her escapade. Lucy Medders and her father arrive and the count is hidden in one room and Mrs. Blazes in another. Harry is forced to do some fancy lying to keep Lucy from discovering the presence of the woman. The milliner, Daphne Daffington, who proves to be an old flame of Harry's, arrives to trace the missing duplicate hat and more complications ensue. Daphne is hustled into the room occupied by the Count. The latter, with whom Daphne had flirted at one time, demands the return of a ring he had given her on that occasion. She tells him that she gave the ring to General Blazes. As the Count had also given Mrs. Blazes a duplicate of the ring he becomes somewhat excited. Daphne leaves the room and seeks refuge in the one occupied by Mrs. Blazes. Mr. Medder discovers the Count, who is introduced as Harry's German tutor.

CHAPTER VII.—(Continued.)

"And art thee a teacher of German?" Lucy asked, artlessly, of the Count. Before he could reply, Harry laughed:

"Yes, he's a German teacher of German German. Ha, ha! Good joke, dear teacher!"

He nudged the Count in the ribs, to that gentleman's discomfiture.

"He iss alvays choking ven he should be learning," the Count gravely informed Lucy.

"Has he learned much?" Lucy wanted to know.

"He has a lot to learn yet," the Count replied, with significance that was not lost on Harry.

"Oh, Harry!" Lucy cried, clapping her hands together delightedly. "Wilt thee speak some German for me? Wilt?"

"Sure, I'll wilt," Harry smiled. "Ich liebe dich."

"Is that good German?" Lucy asked the Count.

"Very fine," the Count assured her. "He iss a quick scholar—he iss—vat you call—rapid—fast."

"What does that mean—what he said?" Lucy asked.

"It iss not for me, hiss tutor, to translate for him. Later, he vill tell you vat it means, I know," the Count replied.

"What was thy last lesson about, Harry," asked Mr. Medders. "Was it some passage from the German masters, or a chapter of history, perchance?"

"What was our last lesson about?" Harry asked the Count.

"It vas reading writing," the Count said.

"Reading and writing, you mean?" Lucy asked.

"No, no. Reading writing. I am writing der reading und den he iss reading der writing."

Harry saw that the Count had some plan in his mind, but what it might be he could not imagine. However, he willingly lent himself to forward it.

"He means that he would write something and then I would try to read it," he said. Mr. Medders nodded gravely; to him it appeared to be a very good plan. Lucy, with great interest, said:

"Oh, write something in German now, then—it must be awfully hard to write in German, isn't it?—and then thee let Harry read it."

So the Count tore the fly leaf from the book in his hand and solemnly wrote thereon the line:

"Find die dame ihr hut?"

He handed the sheet to Harry, who assumed the painfully awkward position of a schoolboy and laboredly read the line, with an atrocious mispronunciation of almost every word. The Count smiled, and took the paper from him, saying:

"You see, he has der Cherman accent, but not yet der Cherman vords. Der line is: 'Find die dame ihr hut?' It iss a question, you see, unt iss to be answered yet."

"Oh, and what does it mean in English?" Lucy asked.

"It means," the Count said, with much significance, and speaking with great deliberation and emphasis, "it means: 'Did the lady find her hat?'"

"Did the lady find her hat?" Lucy repeated after him.

"Not yet!" Harry said, absentmindedly.

"Ah," the Count said, smiling, "Noch nicht."

"Of course! Of course!" Harry said, as though being corrected in his pronunciation. "Nock nit."

The Count nodded his head with commendation.

"Some day he vill be a great Cherman scholar—some day," he asserted.

Harry beamed with pride—and amusement. Mr. Medders observed to him:

"Verily, thy tutor must be a learned man."

"He reads nothing but the classics," Harry replied. "You'll always find him in the library. He's dying to get back there now, I expect."

"And no doubt that is a classic he hath in his hand even at this moment," Medders said.

"I've no doubt," said Harry, taking the book from the Count's hand and glancing at the title, which was "Three Weeks." "Ah, it is an old treatise on the brevity of time."

He tossed the book into the library, and said:

"Now, I don't want to have to think of any more German today. This is to be a real holiday, Count, and I refuse to study any more."

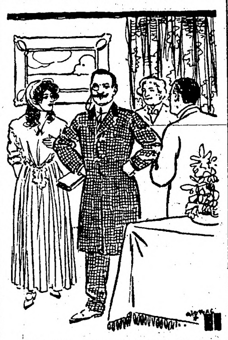
"I think thee art doing a great work," Lucy said to the Count, "to teach Harry German. It is fine that he hath thee for a tutor. How did thee happen to be engaged by him?"

"Merely by accident," the Count answered.

"Yes," Harry added, "through a mere accident."

CHAPTER VIII.

Harry felt that there was nothing he could do which would sufficienly show his gratitude to the Count. Everything was straightening out nicely. To git rid of the Count would be simple. As his German tutor, what could be more natural than for the Count to put on his hat and walk away? And then there was the quick manner in which the Count had rallied to his support. Evidently, in spite of his grievance, the Count was a man who would not stand or sit idly by and see a fellow man suffer because of a mistake, or a combination of mistakes.



"He Has a Lot to Learn Yet."

With a quiet wink to the Count, Harry said to Lucy and her father:

"I want to take you around the grounds a bit, now. Count von Fitz will excuse us, I know."

"Most certainly," the Count replied, grandly. "Und I vill pursue my studies."

But more noise was heard from the hallway, and Harry flinched. He could not imagine what further trouble fate had in store for him, but he had experienced so much in this brief time, and his nerves were on such a wire edge, that he knew any unusual noise meant trouble, and any unusual silence might mean worse.

"What can it be?" Lucy asked in alarm.

"Let us go and see," Medders said.

They were saved the effort, for Carolyn came running in, her eyes big with alarm, and her face white with fright. She rushed to Harry and clung to him.

"Oh, Harry!" she cried. "That terrible old General!"

"Gott!" the Count exclaimed, turning toward the library. "He hass discovered me!"

"What is it, Carolyn? What about the General?" asked Harry.

"There, there, my girl," soothed Mr. Medders. "Calm thyself."

"Do tell us what has frightened thee," Lucy begged, taking Carolyn's hand in hers and patting it.

"General Blazes," Carolyn said, straightening herself up and catching her breath. "General Blazes is coming, and he swears he will do desperate things, Harry. Oh, I am so afraid."

The deep voice of the General boomed from the hall.

"Where is she?" he shouted. "Where is she? I want my wife, I tell you!"

He stormed into the den and confronted them. He stalked up to Harry, brandishing his cane.

"Where is my wife?" he clamored. "You scoundrel! Where is my wife?"

Harry waited until the General had run out of breath; this procedure also allowing him to collect his wits. Then he asked:

"Why, General, what in the world is wrong?"

"Everything's wrong! You're a scam doundrel; I'm a fam dool! My wife is a ficked wirt—I mean a wicked flirt!"

"It's coming in bunches," Harry thought to himself. He determined that, even though the General had reason to believe his wife was in the house, he would affect to misunderstand him and thus disarm him.

"Why, General," he said, "you're excited."

"You bet I'm excited!" the General yelled, shaking his cane in the air, while Lucy and Carolyn shuddered and held each other tight, behind Mr. Medders, and the Count stood ready to jump into the library if the fury of the General should be directed at him.

"You bet I'm excited. I'm as loozy as a crane—I mean crazy as a loon. I want my wife, I tell you. Where is she?"

"Well, General," Harry replied stiffly, "I'm not running a guessing contest, you know."

"None of you nam donsense! You know where my wife is."

Mr. Medders stepped forward with his hand raised to calm the General, and, speaking to Harry, asked:

"Knowest thou aught of his wife, Harry?"

"I don't know what can be the matter with him," Harry evaded.

The Count sidled toward the door into the hall, saying meekly:

"I think I am going, now."

The General stopped him with a flourish of his cane, and shouted:

"You stay right here! You may know something of this."

Lucy now found a chance to ask something.

"What is it the man sayeth of thee, Harry?" she asked.

Before Harry could reply to her the General demanded:

"Has my wife been here today?"

"I can answer for him," Lucy replied, gently. "No strange woman has been here."

The General looked puzzled. He took off his hat, tucked his cane under his arm, and mopped his brow.

"That's remarkable," he said. "My wife telephoned from this house not half an hour ago. They told me so at the millinery store down the street. I stopped there to inquire for her."

"They must have been mistaken," Harry said. "It is just possible that they had the number mixed. I don't believe they even know who we are here. We don't deal with them."

"Well, Harry," the General said, slowly, looking from one to the other of the faces before him, and realizing that he had been in error. "I'm sorry I made such an ass of myself. You don't know what it is to be worried about a wife—yet. You'll pardon me, won't you?"

"Why, certainly, General," Harry said, grasping his outstretched hand. "Let bygones be bygones and all that. I know how you feel. I've been worried once or twice myself—but not about a wife."

"Well, my boy, your time will come," sagely promised the General. "I trust the ladies will pardon me, and you gentlemen, also."

Lucy and Carolyn, Mr. Medders and the Count cheerfully forgave him and he started out, when—Oh, luckless fate!—from the room where Daphne and Mrs. Blazes waited, came a sneeze. It was not a stifled sneeze, it was not a weak, apologetic sneeze—it was a big, whole-souled sneeze—sneeze that told by its very sound that it had been held back as long as possible and was glad to be given its liberty! The General flamed into wrath, and whirled on his heel to confront Harry.

"Ha!" he exclaimed. "My wife's own sneeze! I'd know it among a million. I'd recognize her sneeze in the midst of a battle. It's no use to bamboozle me. My wife is in there!"

He leveled his cane at the door as thought about to fire a volley through the panels. Harry clutched a chair back to steady himself.

Mr. Medders came over to Harry slowly, waving a hand at the General to inform him that he would take charge of the case from now on.

"Harry," he said, seriously. "What does this mean?"

"I don't know," Harry replied. "I'm guessing, just as much as anybody else."

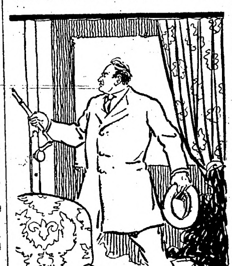
"Thee would not let me look in there!" Lucy said, accusingly.

"Oh, Harry!" Carolyn wept.

The Count chewed his mustache and trembled.

The General's eyes were now blazing. He awaited the denouement.

Harry looked at them all. Save Carolyn he could find no sympathy. Suddenly he reflected that, after all, he was blameless. He would open the door, allow Mrs. Blazes to come out, and throw himself on Lucy's mercy. He stepped to the door, yanked it open, and—



"My Wife Is In There."

With a complacent smile out stepped Daphne Daffington.

"That is not my wife!" shouted the General.

"It seems impossible to escape you, my dear General," Daphne said sweetly. She swept out with as much grandeur as she could muster—and Daphne could muster a plenty.

Disgusted with himself, the General whirled about and stamped away.

"I told him his wife wasn't here," Harry said, turning to Lucy. But she was weeping in her father's arms, while Carolyn was huddled on a couch crying. The Count stepped up to Harry.

"I get you out of dis yet!" he said

(TO BE CONTINUED.)

MUNYON'S WORK TALK OF CITY

Big Success Shown by Numbers of Callers at Philadelphia Headquarters.

LOCAL MAN TELLS OF REMARKABLE RELIEF FROM RHEUMATISM IN YEAR'S TIME.

The apparent success with which Professor James M. Munyon, the world-famous health authority, has been meeting has started much discussion. Every street car brings dozens of callers to his Laboratories at 53d and Jefferson Streets, Philadelphia, Pa., and every mail brings thousands of letters from people inquiring about Munyon's Famous Health Cult. Professor Munyon's corps of expert physicians is kept busy seeing callers and answering the mail. Peculiar to say, these physicians prescribe no medicine at all for 60 per cent. of the callers and mail inquiries; health hints, health advice and rules for right living are given absolutely free. Medical advice and consultation absolutely free.

Munyon's followers seem to be enormous. Those who believe in his theories seem to think he possesses the most marvelous powers for the healing of all sorts of diseases. Munyon, himself, laughs at this. He says: "The hundreds of cures which you are hearing about every day in Philadelphia are not in any way due to my personal skill. It is my remedies, which represent the combined brains of the greatest medical specialists science has ever known, that are doing the work. I have paid thousands of dollars for a single formula and the exclusive right to manufacture it. I have paid tens of thousands of dollars for others of my various forms of treatment. This is why I get such remarkable results. I have simply bought the best products of the best brains in the world and placed this knowledge within the reach of the general public."

Among Munyon's callers yesterday were many who were enthusiastic in their praise of the man. One of these said: "For six years I suffered with rheumatism. My arms and legs were afflicted so badly that I could hardly work, and I could not raise my arms to my head. The pain was most severe in the back, however, and I was in perfect torture. I tried in many ways to get cured, or even to secure temporary relief, but nothing seemed to help me until I was persuaded by a friend to try Dr. Munyon's Uric Acid Course. It was the most marvelously acting remedy I ever saw, within a week the pain had most gone and inside of a month I considered myself entirely cured. I can now go out in the worst weather—cold, wet or anything else, and I have not felt any suspicion of a return of the disease. I think that every person who has rheumatism and does not take the Uric Acid Course is making a great mistake."

The continuous stream of callers and mail that comes to Professor James M. Munyon at his laboratories at 53d and Jefferson Sts., Philadelphia, Pa., keeps Dr. Munyon and his enormous corps of expert physicians busy.

Write today to Professor James M. Munyon personally. Munyon's Laboratories, 53d and Jefferson Sts., Philadelphia, Pa. Give full particulars in reference to your case. Your inquiry will be held strictly confidential and answered in a plain envelope. You will be given the best medical advice, and asked more questions. Remember there is no charge of any kind for consultation, or medical advice. The only charge Munyon makes is, when his physicians prescribe his remedies you pay the retail selling price. It is immaterial whether you buy from him or from the nearest druggist.

Dangerous Bacilli in Dust.

A statement issued recently by the National Association for the Study and Prevention of Tuberculosis speaks of the dangers from house dust, especially in rooms that are not well ventilated. The association warns against dry sweeping, and against the use of the feather duster, or other devices that scatter, but do not take up the dust. Since the ordinary dust blown about in the streets is impregnated with disease germs, the National Association urges the adoption of methods that will prevent the further dissemination of such bacilli. It also urges for the coming months of fall and winter, more open windows and more fresh air in house, shop, and schoolroom.

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it

Bears the Signature of Chas. H. Fletcher

In Use For Over 30 Years.

Children Cry for Fletcher's Castoria

Mean Man.

"Why don't you speak to Mr. Millyuns any more?"

"Aw, he wouldn't let me shoot him in the leg," answered the Florodora girl, "when he knew it would gimme some fine advertising."

An Equivalent.

"The man in the office with me did not get the advantage of me. I gave him a Roland for his Oliver."

"But which is really the better make?"

Particularly the Ladies.

Not only pleasant and refreshing to the taste, but gently cleansing and sweetening to the system, Syrup of Figs and Elixir of Senna is particularly adapted to ladies and children, and beneficial in all cases in which a wholesome, strengthening and effective laxative should be used. It is perfectly safe at all times and dispels colds, headaches and the pains caused by indigestion and constipation so promptly and effectively that it is the one perfect family laxative which gives satisfaction to all and is recommended by millions of families who have used it and who have personal knowledge of its excellence.

Its wonderful popularity, however, has led unscrupulous dealers to offer imitations which act unsatisfactorily. Therefore, when buying, to get its beneficial effects, always note the full name of the Company—California Fig Syrup Co.—plainly printed on the front of every package of the genuine Syrup of Figs and Elixir of Senna.

For sale by all leading druggists. Price 50 cents per bottle.

RENEWED INTEREST IN LIFE

Something Really Happened at Reception, and Old Attendant Is Encouraged.

The guests at Mrs. Arthur Mize's tea yesterday afternoon detected an odor of something burning. They looked at each other knowingly and said: "Poor Mrs. Mize, something is burning up in the kitchen." But the odor grew stronger, and at last one woman said: "It smells as though feathers are burning." Then suddenly one woman screamed: "Mrs. Challiss, look at your hat!" Sure enough, Mrs. Jim Challiss had been standing near a lighted candle, and the aigrette on her hat was on fire.

The guests had a great time putting out the fire. The aigrette was what the insurance men call a total loss. An Atchison woman who has gone to thousands of receptions says the burning of the aigrette yesterday is the first time she ever knew anything to really happen at a reception. She has given up going because nothing ever happened, but now will start in over again.—Atchison Globe.

A WONDERFUL CHANGE.

Mrs. R. Crouse, Manchester, Iowa, says: "For two years my back was weak. Rheumatic pains racked my lower limbs day and night. The passages of the kidney secretions were annoyingly irregular. When I started using Doan's Kidney Pills, these troubles soon lessened and the dull backache vanished. My kidneys now act normally and I give Doan's Kidney Pills credit for this wonderful change."

Remember the name—Doan's.

For sale by druggists and general storekeepers everywhere. Price 50c. Foster-Milburn Co., Buffalo, N. Y.

Monotonous.

Madge—So the place you spent your vacation got to be awfully dull?

Marporie—Just dreadful, dear. Toward the end I had to get engaged again to a young man I was in love with early in the summer.

Stop the Pain.

The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly and prevents scars. 25c and 50c by druggists. For free sample write to J. W. Cole & Co., Black River Falls, Wis.

It's dead easy to be an optimist when only the good things of life are coming your way.

UNIVERSAL PORTLAND CEMENT COMPANY CHICAGO—PITTSBURG

Cement Talk No. 3

Concrete is the hardened rock-like product made by using some brand of *Portland cement* with sand, gravel or broken stone and water. The *cement* is the material which binds the sand, gravel or broken stone together; this binding action is produced by water. The terms "*Cement*" and "*Concrete*" thus have different meanings, although they are frequently used interchangeably. While cement is only one of the materials in *concrete*, it is perhaps the most important. To insure the best results in *concrete* work, the highest grade of *Portland cement* should be used. The *concrete* worker may rest assured that he has the best *cement* if he will make certain that the word *UNIVERSAL* is printed on each sack of *cement* that he buys. Representative dealers everywhere handle *UNIVERSAL*.

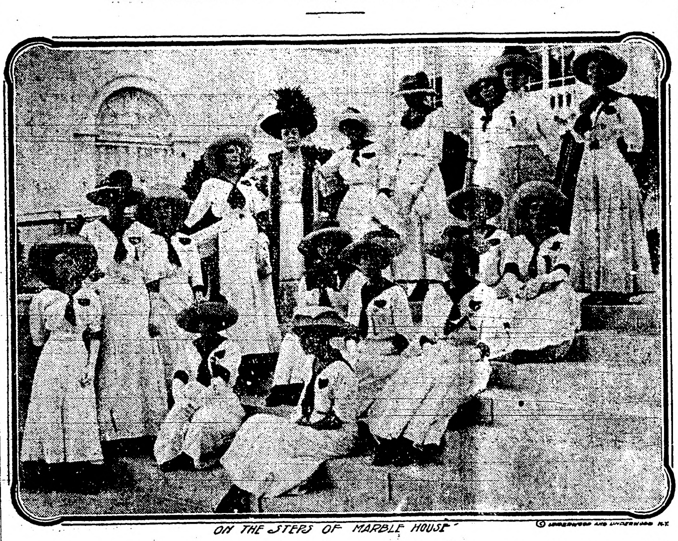
MRS. BELMONT'S "FARMERETTES" AT NEWPORT



ON THE STEPS OF MARBLE HOUSE

© Underwood and Underwood N.Y.

NEW YORK.—A score of young women who, having suffragette propensities, are the proteges of Mrs. O. H. P. Belmont and are learning to be farmers on that lady's Long Island estate, accepted her invitation recently to pay her a visit at Newport. They were entertained at Mrs. Belmont's magnificent mansion, Marble House; lunched there; listened to a musical program, and bathed at Bailey's Beach, where their hostess introduced them to some of the society notables. After that they had afternoon tea and then returned to the cows and the plows, the fields and their yields of the farm.

RATS CAUSE PLAGUE

First Cases Appeared Nearly Ten Months Ago.

Infected Rodents Imported With Grain Held Responsible—War of Destruction Is Being Strongly Urged.

London.—Three reports of the extremest importance, dealing with the suspected cases of human plague in East Suffolk, and more especially with an epidemic of plague in rats, were issued the other day by the local government board with a covering letter by Dr. Newsholme, the medical officer of the board.

The history of the outbreak, which has been the subject of many articles in the Daily Mail, is as follows: On October 2, 1910, four cases of pneumonic plague were notified to the board at Freston in Suffolk. All four persons affected died, and it is a reasonable inference," says Dr. Newsholme, "that the cases may have been plague; and there is a further possibility that two previous limited outbreaks of illness in the same part of East Suffolk may also have been plague."

On investigation being made it became clear that rats were infected. Rats and hares found dead were bacteriologically examined and proved to have had plague. At first the infected animals were found only in the portion of the Samford rural district between the Orwell and the Stour. But in the middle of November the Woodbridge, Cosford and Tendring districts were also affected.

"From the first it was realized that grave significance attached to the presence of a focus of plague in rodents in East Suffolk," Dr. Newsholme says, and the local authorities were urged to show activity in meeting the danger. Other sanitary authorities in England were warned, but though rats from various parts were examined none of them were found to be infected. In the infected area rat destruction has been hampered by the failure of some owners of property to co-operate. It is suggested that the question may arise whether the local authorities may not have to compel "the assistance of individual owners and occupiers in destroying rats on their premises and rendering their premises and food stores fairly safe against invasion by rats."

In December, 1910, a systematic examination of rats from a belt of country round the infected districts was carried out. Altogether 6,071 rats were examined and none showed traces of plague. Rat fleas from the infected area were also examined, and it was found that the number per rat is small. From 568 rats only 584 fleas were obtained, and of these about half were of a kind that does not bite man. The other kind readily bites man and was found in many cases to be infected. The test was made in November, and it is not certain whether the comparative freedom of the English rat from fleas holds good in the summer.

The probable channel by which plague was introduced was infected rats, imported with foreign grain. But it is pointed out that no other instance, with the possible exception of Glasgow, has been known in this country of the spread of plague from ship rats beyond the limits of a port. This is reassuring, the more so as if there had been any such spread it would have been indicated by excessive mortality in rats.

"The evidence appears to indicate that rat plague has been present for several years in East Suffolk. Nevertheless, during that time only three very limited outbreaks of probable human plague have occurred, showing that under the conditions there existent human infection is an exceptional and, as it were, an accidental phenomenon. As is well known, the possibilities of spread of plague from rats to man are much smaller in this country than in India."

Bubonic plague is spread by rat fleas. Pneumonic plague, however, can spread from human being to human being, especially where the domestic conditions are uncleanly. The precaution of regarding all cases of pneumonia in a suspected district as plague, obtaining bacteriological analysis and securing isolation is recommended.

"A considerable outbreak of human plague might be anticipated," Dr. Newsholme concludes, "if such failure to recognize early cases occurred in a district in which the conditions favored spread by direct infection by means of fleas."

LONELY WILD PIGEON

Only Survivor of Species Believed to Be in Chicago.

Reward of $500 Offered for Any Pair, and Public Is Warned: "Don't Kill This One if You Find It."

Chicago.—Is there a wild pigeon in Jackson Park? Is an individual bird of a species once numbered by the millions, but now supposed to be extinct, making Chicago its summer home and thereby reviving hope that somewhere there are others and that the pigeons one day may come back to their own?

The story of the reappearance of the bird has much to give it the color of truth. Most scientists are convinced that the wild pigeon, ectopistes migratorius they call it, has gone never to return. The other day, however, Charles E. Hayden, an old-time sportsman and bird student, told Ruthven Deane, president of the Illinois Audubon society, that he had seen a wild pigeon in Jackson Park and that "there was no mistake about it."

About three weeks ago a high school teacher, a man who has made ornithology a study, reported that he had seen a wild pigeon in Jackson Park. The discovery was recorded in the papers, but the scientists who had run down hundreds of reports of this kind, only to find a mistake had been made, were skeptical to the point of disbelief.

Now comes Mr. Hayden, who knew the pigeon when its tribe numbered millions, to make positive statement that a fine male bird of a supposedly extinct race was under close observation by him in Jackson Park for an hour.

It was 4:30 o'clock in the morning when Mr. Hayden went "bird studying" in Jackson Park. He was astounded when he saw the pigeon. He knew the tribe was supposed to be extinct, and that a reward of $500 had been offered for authentic knowledge of the existence of a single nesting pair. He made allowance for deceptive lights and shadows, conditions which might exaggerate the common mourning dove to the size and semblance of its bigger relative, and then was convinced that the stranger was the wild pigeon which he had known in youth.

There was another early morning stroller in Jackson Park, Attorney F. A. Pennington, and Mr. Hayden called him over to see the bird. Mr. Pennington pronounced the bird a wild pigeon. He is familiar with the bird only from description and picture, but he knows the mourning dove, the only species with which the pigeon is likely to be confused, and he knows it well. Mr. Pennington said that barring what appeared to be a mottling of the feathers on the back of the neck of the bird was a wild pigeon to a dot.

FEAT OF A MODERN COWBOY

Texas Ranchman Evades Law With Automobile and Lariat—Plenty of Trophies as Witnesses.

Dallas, Texas.—Folks used to think that Buffalo Jones was quite some wild west performer. Of course, he is all right in a way, and little stunts like lassoing lions and rhinos in the African jungle land is, at least, out of the ordinary; still, his work is crude. At least, it lacks the final touch of refinement and eclat which marks the really finished performer.

Down on the plains of Texas, north of Big Springs, is the Soash ranch, owned by the C. C. Slaughter company. R. L. (Bob) Slaughter, a merchant, club man and all-round good fellow of Dallas, Texas, is president and general manager of the ranch and, incidentally, is interested in the automobile trade. His favorite sport, it seems, is hunting animals.

Now, as a matter of fact, it is against the law to shoot antelope in Texas. Slaughter is a law-abiding citizen, so he wouldn't shoot one for anything. He simply gets out his trusty auto, loads it with gasoline and a lariat and goes out after the game. He ties one end of the lariat to the steering post of the auto. He handles the rope with one hand and the steering wheel with the other. When he sights a bunch of antelope he simply throws the throttle wide open, goes down among them and deftly plants his noose over the best one in the herd. To prove that this isn't a fish story, Bob has plenty of trophies and witnesses.

In a recent letter to his brother, telling of a trip he made in the early part of the month, when he took his father out to Soash, he says: "My tires are giving wonderful satisfaction. I got two more antelope last week. This makes six we have caught without even a puncture, and you can imagine what a hardship that turf work is on tires at the speed antelope generally force you to use."

Board for Goose.

Youngstown, O.—Judge Brandmiller will decide whether M. J. Strawiarski can collect board for a goose which wandered onto his premises and which he fattened in expectation of a feed, but which was later claimed by its owner, M. Susman.

Bicycle Balks Wild Cats.

Tacoma, Wash.—Returning on a bicycle from summoning a physician to attend his father Jesse Chadwick was attacked in the outskirts of Tacoma by three wild cats. Chadwick interposed the machine between the beasts and himself and escaped. The bicycle was found with the tires chewed off.

"Rat" Saves Girl

Frankfort, Ky.—Miss Na[illegible] Duncan, a school teacher, was kicked in the head by a horse the other day, but her life was saved by her "rat."

SPOILED JOKE FOR WILLIE

And Now the Youngster Is Convinced That Women Have No Sense of Humor.

Willie is convinced that women have no sense of humor. Willie is seven, and he judges all women by his mother. What he considered a splendid joke occurred to him, and he resolved to make his father its mute and admiring witness or auditor.

"Mamma," said Willie, "when papa comes home I'll climb up on the stepladder and pretend to be doing something to the picture. Then you say:

"'Willie, what are you up to?' Then I'll say: 'Up to date.' Won't papa be surprised?"

Papa came home in due time and was hardly seated before Willie dragged in the stepladder, and climbed up to a picture. This was mamma's cue to ask the question that would give Willie the opening for the joke. So mamma hurriedly asked:

"Willie, what are you doing up there?"

Willie turned a look of disgust, chagrin and disappointment upon his mother, climbed down the ladder and left the room without a word.

CHILD'S HEAD A MASS OF HUMOR

"I think the Cuticura remedies are the best remedies for eczema I have ever heard of. My mother had a child who had a rash on its head when it was real young. Doctor called it baby rash. He gave us medicine, but it did no good. In a few days the head was a solid mass, a running sore. It was awful; the child cried continually. We had to hold him and watch him to keep him from scratching the sore. His suffering was dreadful. At last we remembered Cuticura Remedies. We got a dollar bottle of Cuticura Resolvent, a box of Cuticura Ointment, and a bar of Cuticura Soap. We gave the Resolvent as directed, washed the head with the Cuticura Soap, and applied the Cuticura Ointment. We had not used half before the child's head was clear and free from eczema, and it has never come back again. His head was healthy and he had a beautiful head of hair. I think the Cuticura Ointment very good for the hair. It makes the hair grow and prevents falling hair." (Signed) Mrs. Francis Lund, Plain City, Utah, Sept. 19, 1910.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 12 L, Boston.

A Grandson of Burns.

James Glencairn Thomson, a grandson of Robert Burns, died in Glasgow recently in his eighty-fourth year. He was the son of Betty Burns, daughter of the poet, and was a bachelor. Mr. Thomson resided nearly all his life in the suburbs of Glasgow and was a frequent guest at social gatherings, where his singing of Burns' songs was a feature. He possessed a small civil list pension.—Pall Mall Gazette.

As Waists Used to Be.

A London paper prints an article from the ladies' treasury of 1866, in which a prize is offered for the woman with the smallest waist in proportion to her size. A silk dress was the first prize, and a gold watch second prize. In the school in which the prize was offered by the principal the pupils were required to sleep in corsets, which could, however, be loosened when retiring.

The next time you feel that swallowing sensation gargle Hamlins Wizard Oil immediately with three parts water. It will save you days and perhaps weeks of misery from sore throat.

Not so Much.

"Is he a captain of industry?"

"No, nothing more than a second lieutenant."

Fargo, N. D.

Some men are honest because it is too much trouble to be otherwise.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

Calling people down is not a very uplifting process.

MY DAUGHTER WAS CURED

By Lydia E. Pinkham's Vegetable Compound

Baltimore, Md.—"I send you herewith the picture of my fifteen year old daughter Alice, who was restored to health by Lydia E. Pinkham's Vegetable Compound. She was pale, with dark circles under her eyes, weak and irritable. Two different doctors treated her and called it Green Sickness, but she grew worse all the time. Lydia E. Pinkham's Vegetable Compound was recommended, and after taking three bottles she has regained her health, thanks to your medicine. I can recommend it for all female troubles."—Mrs. L. A. CORKRAN, 1103 Rutland Street, Baltimore, Md.

Hundreds of such letters from mothers expressing their gratitude for what Lydia E. Pinkham's Vegetable Compound has accomplished for them have been received by the Lydia E. Pinkham Medicine Company, Lynn, Mass.

Young Girls, Heed This Advice.

Girls who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion, should take immediate action and be restored to health by Lydia E. Pinkham's Vegetable Compound. Thousands have been restored to health by its use.

Write to Mrs. Pinkham, Lynn, Mass., for advice, free.

Whittemore's Shoe Polishes

Finest in Quality. Largest in Variety. They meet every requirement for cleaning and polishing shoes of all kinds and colors.

GILT EDGE the only ladies shoe dressing that positively contains OIL. Blacks and Polishes ladies' and children's boots and shoes, shines without rubbing, 25c. "French Gloss," 10c.
DANDY combination for cleaning and polishing all kinds of russet or tan shoes, 25c. "Star" size, 10c.
QUICK WHITE makes dirty canvas shoes clean and white. In liquid form so it can be quickly and easily applied. A sponge in every package, so always ready for use. Two sizes, 10 and 25 cents.
If your dealer does not keep the kind you want, send us his address and the price in stamps for a full size package.

WHITTEMORE BROS. & CO.,
20-26 Albany St., Cambridge, Mass.
The Oldest and Largest Manufacturers of Shoe Polishes in the World.

Constipation Vanishes Forever

Prompt Relief—Permanent Cure
CARTER'S LITTLE LIVER PILLS never fail. Purely vegetable — act surely but gently on the liver. Stop after dinner distress—cure indigestion, improve the complexion, brighten the eyes.
SMALL PILL, SMALL DOSE, SMALL PRICE.
Genuine must bear Signature

HAD COME TO STAY, ANYHOW.

The stranger, who had been detained in the village by a washout on the railway, stepped into the office of the local newspaper.

"I see you call your paper the Experiment-Vindicator," he said. "It's a consolidation, I presume."

"No, sir," answered the editor; "this is the only sheet that ever has been published in the town. I gave it that name because I rather liked the sound of it."

"I see."

"Besides, I wanted to see if the people here would give me support enough to vindicate the experiment. If they don't, by gravy, sir, I'm going to change the name of it to the Snipe-Bag, edited by A. Holder!"

Thackeray's Reckless Feet.

It may be feared that some people will find proof of Thackeray's possession of a lively sense of humor in the story that he once put his feet out of a hack window while riding through a Boston street.

When we consider the narrowness and crookedness of those thoroughfares, it isn't the humor, but the wild recklessness of Thackeray's feet that most impresses us.

A Hard Fate.

"So your firm is going to transfer you to Baltimore?"

"Yes, confound the luck."

"Why do you regard it as bad luck? Baltimore is a fine town, near the sea shore and only a short run from New York. Aren't you getting a raise of salary?"

"Yes, but Baltimore has no major league ball club."

Risky.

"Is the lunch room you patronize well lighted?"

"Yes."

"That's good."

"Why do you say, 'That's good'?"

"Because I once heard of a fellow who went into a lunch room that was rather dark and mistook a cockroach for a lima bean."

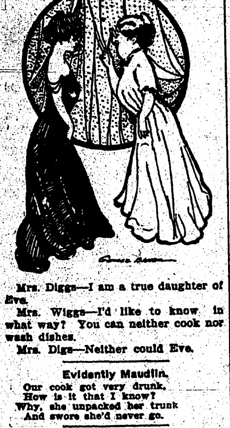
He Knew His Business.

Proprietor of Millinery Shop—Why didn't that lady buy anything?

New Assistant—Because we hadn't got what she wanted.

Proprietor—You'll kindly remember in future, miss, that you're here to sell what I keep, and not what people want!—London Opinion.

HITTING BACK.



Mrs. Diggs—I am a true daughter of Eve.

Mrs. Wiggs—I'd like to know in what way? You can neither cook nor wash dishes.

Mrs. Digs—Neither could Eve.

Evidently Maudlin.

Our cook got very drunk,
How is it that I know?
Why, she unpacked her trunk
And swore she'd never go.

The Last Word.

"You know that you simply ran after me until you got me to promise to be your wife," she said in a taunting manner.

"Well," he replied, "I didn't have to run very fast to overtake you."

"I was wearing a hobble skirt at the time," she defiantly retorted.

Painful Comparison.

"A swollen fortune," said the energetic but crude reformer, "is as bad as a sore finger on the body politic."

"Yes," replied Mr. Growcher; "and, like a sore finger, the oftener you hit it the more it seems to swell."

Too Elemental!

Euclid was boasting of his prowess.

"Here's one," remarked his wife. "If we pay Bridget $25 per month and a neighbor offers her $26, how long will she stay?"

With a wail he fled into the night.

That's Why.

Dentist—Why, my dear sir, you seem to be frightened half to death.

Patient—I am doctor, and yet I brought my nerve with me.

The Cause.

"Why are those men disputing so angrily over the water question?"

"I guess they're quarreling over the irritation problem in the west."

Circumstantial Evidence.

"Do you believe marriage is a lottery?"

"Well, you see many married people who look blank."

The Same Old Story.

"It's curious how habits fasten themselves on people. You know Wappsley?"

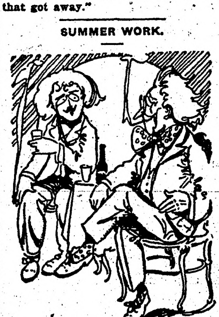
"Yes."

"He's an enthusiastic fisherman, and always has a story to tell about some gigantic monster of the deep that he almost caught."

"I've heard him tell a lot of lies of that kind."

"Well, it seems that burglars broke into his house the other night and he got up and captured one of them—a little fellow—but you ought to hear him tell about the size of the one that got away."

SUMMER WORK.



First Poet—You look warm and tired out.

Second Poet—I am. I've been busy all day writing Christmas stuff.

Perplexing.

A railroad train ran off the track—
An accident, 'twas said;
But there was none to blame, alack,
Because no one was dead.

Halves, Mister.

It was at a theater in Dublin. The king, aged and infirm, was blessed with two sons. He was pacing up and down the stage with a wearied look, exclaiming aloud: "On which of those two sons shall I bestow the crown?"

The house was nearly brought down with laughter when a little man in the gallery stood up and said: "Treat 'em fair, guv-nor. Can't yer give 'em half a crown apiece?"—Ideas.

No Connection.

A boy was throwing stones at a noisy dog when a passerby stopped and addressed him.

"My boy," the stranger remonstrated, "don't you know you should be kind to dumb animals?"

"Yes," replied the boy, "but what's dumb animals got to do with yelping dogs?"—The Housekeeper.

No Buyers.

He (loftily)—I will marry no girl because she has money. I would not sell myself.

She (caustically)—Don't worry. A girl with money enough to buy any kind of a husband she wanted, would never pick you out for a bargain.

Atlas Remarks.

Atlas was bearing the world on his shoulders.

"It is easier to have everything my wife wants me to get on one spot," he explained.

Thus we see it was a labor-saving device.

One Punishment for Perjury.

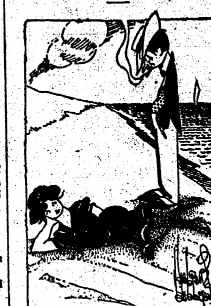
Among the Sea Dyaks of Borneo lying is almost unknown; and the telling of a lie is shamefully recorded by heaping a pile of branches, to whom every passerby contributes—a punishment dreaded beyond all others.—London Saturday Review.

She Forgot Something.

New Nurse—Please, mum, I can't do a thing with the baby. He cries all the time.

Mistress—Well, I declare! How stupid of me. His other nurses were colored girls. You'll find some stove polish in the kitchen.

HER PROMISE.



He—I leave tonight. Can't you give me a little hope?

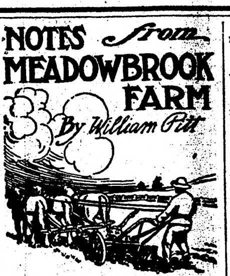
She—Well, if I'm not married by next season, I promise you I'll let you teach me how to swim again.

Stuck Up.

The Bingles have a touring car—
First time it gets a biff
I'm 'fraid their heads will break right off.
Their necks are all so stiff.

NOTES from MEADOWBROOK FARM

By William Pitt



One of the very best feeds to grow for sheep is fodder corn.

Blue grass and white clover make an ideal pasture for sheep.

Corn for grain and alfalfa hay go well together in animal feeding.

Sudden changes in the calf's feed are almost certain to start trouble.

All dairy utensils should be washed as soon as possible after being used.

If you grow squashes and have never seen the squash bug you are fortunate.

Be sure there are no drafts in the hen house or your hens are likely to have the roup.

Chicks and young cockerels are apt to become weak in their legs while running at large.

Look out for ticks. Your sheep can not fatten if they are troubled with these pests.

The brood mare in foal should be handled by a firm, steady hand, not an excitable, rash hand.

With over 100 breeds of chickens already in existence, breeders are at work trying to fix new ones.

Stagnant water should never be allowed to remain where sheep can get at it. It conveys parasites.

There is no crop that a stock feeder can grow that will make as much feed as corn and peas or soy beans.

If the man who has no silo would watch his neighbor feed and watch the results he would soon have one.

After the asparagus season is over remove the weeds, stir the soil and put a coating of well-rotted manure on the bed.

There is only one time when a poultryman is justified in selling a good pullet, and that is when he is going out of the business.

Dairying does not imply that any other line of farming is bad. It makes the fields more profitable and the farm more profitable.

It makes some horses ugly to work them with horses that do not travel up with them. Match them as to gait as well as to other things.

A drop of melted lard rubbed on top of the head and another drop under its bill and along the neck will put an end to the head lice.

One reason why more farmers do not have better breeds of poultry is because the hatching and brooding season comes in their busiest time of the year.

To succeed with celery you should have cold manure or muck applied in large quantities. It is a deep feeder and does best on a compact cold or deep soil.

All crops should be severely thinned—better have a good ear of corn than two nubbins; better have a good nubbin than a thrashy nubbin and an empty shoot.

In order that a horse may trot or pace he must have the physical conformation, adoption to the gait, and a favorable condition of mental and nervous organizations.

Keeping down the weeds will aid the garden crops in maturing, and make picking easier. Mulch the clean surface of the ground with old straw in case of dry conditions.

If you have a crop of heifer calves, be sure to select those that have the greatest promise of being producers. Give them the best of care and build up your future herd in this way.

The condition of the soil, the location with regard to schools, and markets and the desirability of a farm from a general standpoint are three things that should enter into consideration before buying.

The cow is the final judge as to the real worth of silage. She is its "ultimate consumer," and when she says by a full pail and satisfied expression that silage is the best dairy feed the wise dairyman will abide by her decision.

It is poor policy to starve and stunt a pig during the first few months, expecting to make it up by heavy feeding later. The 100-pound pig makes gains 20 per cent. cheaper than the 200-pound pig if equally thrifty.

Warm milk is best for the calf, no matter how old it is.

If you haven't a silo, think over the matter of building one.

Some horses have learned to balk by being overloaded and abused.

The cow that loses flesh in October or November will be an expensive one to winter.

Alfalfa hay is a fine rough feed for horses once per day if fed in moderate quantities.

All over the country people are keeping better poultry than they did a few years ago.

Sweet corn is a very profitable crop. One reason for this is because it is so easily handled.

Cow pox is a contagious eruption; running a fixed course, and accompanied by a slight fever.

Mature hogs that are thin may be made a gain of a half pound a day on alfalfa without grain.

Running the mower along the sides of the ditches will make it easier keeping them clear of weeds.

Hot water and sunshine are two of the best cleansers for the dairy utensils that can be found anywhere.

Until we get perfect animals we should search for a sire that in some particulars is superior to the cows in our herds.

A good pedigree counts, and the good ram is bound to show his good points; if he is not good he will show his defects.

Many orchards have sufficient available plant food, but lack water at that critical period while the tree is fruit making.

The man who has plenty of soiling crops does not fear the dry pastures so much as the one who depends upon the grass alone.

The sow should be given a warm millfeed slop, made fresh for each meal, whole oats and a little sound corn twice a day.

Of the insects attacking squashes, melons, cucumbers, pumpkins, etc., the common striped cucumber beetle is the most injurious.

The right time to castrate pigs is a week or so before they are weaned, if healthy; if delicate, wait a week or so until they are stronger.

The separator is an absolute necessity upon the modern dairy farm. It safeguards the health of the calves and the pigs and increases the profits.

No cow can properly digest and assimilate balanced rations and economically convert them into milk unless she has been properly developed.

The keeping of goats for milk is not a fad; and the breeding of dairy goats is coming to the front most rapidly in both the United States and Canada.

A well planned garden is one that will allow as much of it as possible to be cultivated with a horse. Hoeing in the garden doesn't set well with most of us.

When pigs are six weeks old they may be turned into grass, and clover pasture if the weather is warm. If cold and ground wet, keep them in dry, roomy pens.

When water is given a short time before feeding it passes out of the stomach quickly and leaves that organ free to deal with any food consumed afterward.

Expert truckers and market gardeners apply, in connection with manure spread in the drill or hill, 600 to 800 pounds of some standard bone phosphate to the acre.

Young pigs should have the best of care and get to eating nicely while on the mother. They should not be weaned until they are nine weeks old if good results are obtained.

A vicious old mare in a herd of horses, in the pasture is likely to do great harm by biting and kicking. She should either be hobbled or kept entirely away from other horses.

A field of rape makes an excellent summer pasture crop for sheep pasture during the dry summer period when the regular pastures are either too short or burned entirely down.

Experiments made at the Pennsylvania experiment station show that hill strawberries are not larger and better formed than those grown in matted rows, provided the matted row is a narrow one.

It is important that every drop of milk should be drawn from the udder for the richest milk comes last and in addition to this, if the cow it not milked dry she will fall off in her flow more quickly.

When selecting a cow for the dairy look and see if the eye of the animal is large and full. The largeness of the eye indicates a strong nervous system. Digestion and milk secretion is the work of the nerve system. The nerve system is the power that drives the animal's milk machine.

Love Works by Wire

By M. J. PHILLIPS

Copyright, 1910, by Associated Literary Press.

"Hello," said Neil Blanding; "is this Broad five-nine-eight-seven?"

"Nine" and "five" sound much alike, especially when the line is not working well. A girl's voice at the other end of the line said "Yes," in that faraway, eerie, impersonal tone that a contrary telephone will sometimes impart.

"This is the Williams-Valentine Machine company. Please send one of your trucks down for a pickup."

"Just a moment, please," returned the other voice, a little more distinctly, "you have the wrong number. This is Broad five-five-eight-seven."

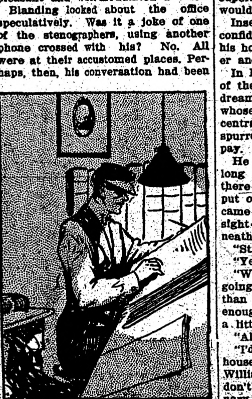
"Oh!" ejaculated Blanding; "I wanted five-nine instead of five-five. Beg pardon."

"Granted—Mr. Blanding!"

Blanding secured the express company's office and delivered his message before allowing himself to ponder on this most surprising rejoinder. The girl with the faraway voice knew his name.

He was a humble unit in the big office force of the Williams-Valentine company. He knew scarcely a score of persons in the city's swarming hundred-thousands, and certainly, he recalled to himself, not a girl with so pleasant and well-modulated a voice.

Blanding looked about the office speculatively. Was it a joke of one of the stenographers, using another phone crossed with his? No. All were at their accustomed places. Perhaps, then, his conversation had been carried on with the private office of Mr. Williams or Mr. Valentine.



There Was Work to Be Done.

But this guess proved incorrect. The doors were open; from the president's office came the urgent click of Miss Peters' typewriter. From the other room sounded the steady drone of Mr. Valentine's voice as he dictated to Miss Marion.

Neil Blanding put the mystery away for pondering during less urgent moments. There was work to do now. He lay awake half that night in his narrow, stifling hall bedroom. But the baking heat seemed more bearable than usual. He had the incident of the day to think about.

The next day, when the hands of the clock pointed to 11 Blanding found it necessary to call the express company again.

He smiled as he took down the receiver. It was just this hour yesterday he had called, and had been given the wrong number. Of course the incident was closed, as far as he was concerned. In due time he would undoubtedly find out who that girl was.

"Number?" said Central.

Blanding replied "Broad five-five-eight-seven."

He realized, before the words had barely passed his lips that he had called the number which had been uppermost in his mind for 24 hours.

"Broad five-five-eight-seven," said the girl's voice, as familiar to Blanding's waiting ear as though he had been hearing it for years.

"Oceanic Express company?" he queried, craftily.

Came a little ripple of laughter. "No, Mr. Blanding; you have the wrong number—again."

"Who is this?" he demanded boldly.

"Broad five-five-eight-seven," came the demure reply.

"Yes, but who is that?"

"Why don't you look it up in the book?" was the retort, in a voice fairly bubbling with mischief. He heard the receiver click back on the hook.

Why, indeed? It would be a monumental task, as he divined by a glance at the ponderous, blue-bound book.

Blanding loitered that night until he was the last person in the office. Then he took the telephone book from its shelf and hurried out with it.

After midnight he found the number and its complement: "Frank Zolinski, 328 Twenty-fifth street."

That didn't sound very encouraging; but then, with swift loyalty he told himself that it would be all right. He fell asleep and dreamed about a girl of wonderful beauty with a voice of gold.

He was two hours early the next morning, partially that he might go far out of his way to pass 328 Twenty-fifth street, and partially to return the telephone book before it would be needed.

His heart sank to his boots when he stopped in front of the number. It was a small, dingy brick store in a neighborhood of small, dingy brick stores. Over the store was a big sign: "Frank Zolinski, Fine Wines and Liquors."

He rebounded happily when he saw that the place was empty, and that a "To Rent" sign was displayed prominently in the window. Of course! The phone number had been transferred to another subscriber, whose name was not yet in the book.

That day he called Broad 5587 without subterfuge. The girl was pleased to be serious.

"You mustn't think I am doing something I shouldn't," she said. "Mamma knows I have talked to you. And since we are acquainted—"

"I know you?" interrupted the mystified Blanding.

"Yes, indeed. How easily you forget your friends!"

The habit of talking with the girl daily was now established. They were not long chats, never more than a few minutes. But they brightened his labors materially.

Blanding made no further efforts to discover her identity. He had a half-superstitious feeling that in time it would be revealed.

Insensibly she grew deeply into his confidence. He told her of his home, his hopes and ambitions; of his mother and father.

In Blanding's mind a certain dream of the future began to form itself, a dream in which himself and the girl whose voice only he knew were the central figures. And that dream spurred him to promotion and more pay.

He was pegging away one evening, long after the others had left, for there was work which could not be put over, when the president himself came in. Mr. Williams started at the sight of the shirt-sleeved figure beneath the single light.

"Still at it, Blanding?" he asked.

"Yes, sir."

"Well, don't work too hard. We're going to need you in the future more than we do now. I guess you've done enough for tonight. I want you to do a little errand for me."

"All right, sir," said Neil.

"I'd like to have you go up to the house with this package for Mrs. Williams. It's pretty valuable, and I don't want to entrust it to an ordinary messenger. You can ride in my car."

"Yes, sir."

"I'll tell them you're coming," and he took the telephone receiver down. "Broad five-five-eight-seven, please."

So that was the solution of his mystery! Broad 5587 was Mr. Williams' phone; then the girl with whom he had been talking each day for weeks was the president's daughter, Maryette Williams.

He had met her once in the office with her mother. To him she had been a beautiful vision as unattainable as the farthest star. And yet—she liked him. Their daily talks proved that.

While he—he loved her, because she was his mate, intended for him since the world was fashioned. She was near to loving him, too—she would care for him dearly. That glorious certainty thrilled him.

Back in the office Williams was saying over the phone:

"I've just sent young Blanding up to the house, mother. If you like him, invite him to call. He's worth a dozen of the average chaps of the day. He's got the stuff that partners are made of."

"You've prejudiced me already in his favor," replied Mrs. Williams.

"I don't suppose he has $300 to his name," mused the president.

His wife's voice unconsciously took on a note of tenderness when she replied: "Neither had you, Fred, when we were married!"

True Bond of Marriage.

"Sacred things not performed sincerely as they ought are in no way acceptable to God in their outward formality. If personal duties be not truly done, the fault is in ourselves; but marriage to be a true and pious marriage is not in the single power of any person; the essence whereof as of all other covenants is in relation to another; the making and maintaining causes thereof are all mutual, and must be a communion of spiritual and temporal comforts. If, then, either of them cannot or obstinately will not be answerable in these duties, so as that the other can have no peaceful living, or enduring the want of what he justly seeks and sees no hope, then from that dwelling love, which is the soul of wedlock, takes his flight, leaving only some cold performances of civil and common respects, but the true bond of marriage, if there were ever any there, is already burst like a rotten thread."—John Milton.

'Tis False.

"She claims she can prove that at the time the crime was committed her little girl was brushing her hair."

"That proves an alibi for her hair, but how about herself?"

Should Supply Furniture.

Mother—"In his last letter, my son asked me to send him half a dollar to buy him a logarithm table." Friend—"Well, really, I do think his college should at least supply his furniture."

THE NORTHERN LIGHT

MINNESOTA HISTORICAL SOCIETY.

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, SEPTEMBER 8, 1911 NO. 6.

INSURGENTS ACT

W. L. HOUSER, IN CHARGE OF WASHINGTON QUARTERS, TELLS OF PLANS.

W. I. HOUSER MANAGER

Says They Are Not La Follette Offices, But Opposed to Mr. Taft—Says Progresives Will Fight to Limit.

Washington, D. C. — Formal statements were made by Walter L. Houser of Wisconsin, in charge of the new progressive Republican headquarters here, indicating in detail the plans of the campaign to be pursued by the members of the party who have established these headquarters.

The progressive Republicans have two reasons for establishing headquarters here, according to Mr. Houser.

"These are," he declared, "to promote progressive Republican policies and to nominate a progressive for president.

"We believe," he added, "that no other than a progressive candidate can be elected on the Republican ticket. We are in the fight to the limit of fairness to control the next national Republican convention.

Not La Follette Headquarters.

"These are not La Follette headquarters; they have been established by the progressive Republicans of the country and from here we will conduct the fight, which we hope to win."

It is believed here from the course pursued by Mr. Houser in entering promptly into the field of publicity, that the progressive Republicans, in placing him at the head of their organization here, intend to take advantake of the facilities for publicity afforded in Washington.

Mr. Houser talked about the plans of the progressives, which, he says, will include aggressive fights in the various states, notably Wisconsin, North Dakota, Nebraska, Oregon, New Jersey, California and Kansas, where they have presidential preference laws. Active efforts, he says, also will be made in Minnesota, Iowa, Illinois, and other states of the West to secure delegates to the national convention.

In fact, the entire campaign of the progressives to be waged from here will be to secure control of the Republican convention, prevent the renomination of President Taft, and secure the nomination of some candidate satisfactory to the progressive element.

Believed La Follette Is Choice.

Although they do not openly say so, the fact that a number of the progressive leaders have announced a preference for Senator La Follette is understood to place him far in the lead as the choice of that element of the party.

Another statement made by Mr. Houser is with regard to the work which the progressive organization intends to do in the doubtful states and in the south. He said that in the opinion of the progressives the southern states cannot be relied upon to favor the renomination of President Taft, and he mentions Missouri, Tennessee, Florida and Arkansas as having such strong progressive sentiment in both Republican and Democratic ranks as to insure that no candidate favorable to the regular policies of either party can secure the delegates from those states.

The opinion was expressed also by Mr. Houser that it will not be the plan of the progresive leaders to make a personal attack upon President Taft or to notice any references he may make to the personal members of the progressive faction during his tour through the country.

MEXICANS ADOPT PLATFORM.

Progressive Party Holds First National Convention.

Mexico City, Aug. 31.—Wearied by the exercise of their constitutional, but hitherto unused rights to nominate candidates for the presidency and vice presidency, delegates to the first national convention of the progressive party adopted a platform that sags beneath its burden of reforms. The arranging of the different planks of the platform was accomplished only after noisy debate.

The party pledges its representatives to work for the reform of the judicial, legal and educational systems of the country, to carry out the principles of the anti-re-election law and to work for a revision of the election laws.

Francisco I. Madero, Jr., will undoubtedly be the choice of the convention for president.

Madero Named by Progressives.

Mexico City, Mexico.—With no dissenting voice, Francisco I. Madero, Jr., received the nomination of the progressive party for president.

MILLERS GET RATE CUT

FREIGHT CHARGES TO NEW YORK REDUCED 1½ CENTS.

Minneapolis Manufacturers Welcome Ruling as Great Victory.

Minneapolis. — The Jennison grain rate case, said to be the most celebrated lake and rail rate case that ever came before the interstate commerce commission, has been settled, and the Minneapolis millers are to pay 21½ cents per hundred pounds on flour from Minneapolis to New York instead of 23 cents.

The case had been held in abeyance since 1901 by the commission. Millers have been shipping at the old rate in spite of the fact that they won a decision that was never banded down.

Minneapolis millers then began a battle on their own account, taking the matters out of the hands of the commission. "We fought the railroads on their own grounds," said J. C. Andrews of the Pillsbury Flour Mills company. "We were going to install a line of boats of our own on the Great Lakes. This victory means more to Minneapolis than can be estimated."

Rate Effective Oct. 6.

The new rate will become effective Oct. 6 on all lines from Minneapolis and Lake Michigan points, like Chicago and Milwaukee. The main fight of the millers has been for a differential of 3½ cents per hundred pounds lake-and-rail as against 2 cents which had practically killed lake and rail traffic. Before the 2-cent differential was in vogue, 80 per cent of the traffic of the mills was carried on the lakes East.

Not over 20 per cent of the traffic has gone lake and rail. The Great Northern, Northern Pacific, Soo and Omaha lines are the principal routes to the head of the lakes for Minneapolis shippers.

Men Who Framed Plan.

The solution of the problem that has taxed the ingenuity of Minneapolis millers for a decade was hit upon by Mr. Andrews of the Pillsbury company, who is chairman of the traffic committee of the Chamber of Commerce; H. H. King of the Sheffield-King Milling company, and H. P. Gallaher of the Northwestern Consolidated Milling company. These three evolved the scheme of combating the railroads and boat lines by means of their own line of steamers.

The all rail rate east of 25 cents per hundred pounds has not been changed.

TAFT AND UNDERWOOD HIT.

Bryan Calls Committee Appointments Greatest Mistake of Democrats.

Lincoln, Nebr. — The president's reason for vetoing the tariff revision measures passed by congress were lamentably weak. The farmers ought to remember that the president has deliberately surrendered them to the greed of the protected interests and has cast his lot with those who furnished his campaign funds. The president's veto of the cotton reduction bill will furnish further evidence of the subserviency to the interests. No real relief is to be hoped for from him."

William Jennings Bryan thus sums up his opinion of Taft, in an extended review of the work of the special session. He declares also that several mistakes were made by the democratic house. One was in putting a tariff on raw wool, another in adjourning without submitting an amendment for direct election of senators, another in not passing an anti-trust bill, and another in permitting a secret caucus to control legislation. Greatest of all he puts down the making of Underwood chairman of the ways and means committee.

"He is not a thorough-going tariff reformer and his environment is against progressive democracy. The party had a right to expect that a positive and progressive opponent of the whole protective policy would be placed at the committee's head. The mistake has already cost the party dearly."

Batleship Utah In Commission.

Philadelphia, Penna. — With its crew of more than 700 men standing at attention, the battleship Utah, one of the most powerful afloat, was placed in commission at the Philadelphia Navy Yard.

Medical Professor Operated On.

Rochester, Minnesota. — Dr. John Kelly of the Johns Hopkins university of Baltimore, and one of the prominent medical men of the country, underwent an operation at St. Mary's hospital for gall trouble.

One Painting Sold for $200,000.

London, England.—The National Gallery has bought the painting "Adoration of the Kings," by Jan Gossaert, of Mabuse, from Rosalind, Countess of Carlisle. The price paid was $200,000.

CELEBRATE FIRE

SEVENTEENTH ANNIVERSARY OF HOLOCAUST OF SEPTEMBER 1, 1894, WAS OBSERVED.

GOV. SPEAKS AT HINCKLEY

Band Concerts and Banquet to Visiting Officials to Mark the Day's Memorial Exercises.

With addresses by Governor Eberhart and others, band concerts and a banquet to visiting officials, residents of the new Hinckley, celebrated the seventeenth anniversary of the holocaust of flame that swept over Pine county in 1894, destroying in one day—September 1—Hinckley, Sandstone and six other prosperous towns, causing the death of 418 residents and making 2,000 others homeless.

Famous in the annals of Minnesota for the devastation that it caused is the Hinckley fire, when the residents of the village, penned like rats in a trap, were smothered and burned to death in the worst forest fire in the history of the United States. Last year, when Chisholm and Baudette, with other Northern Minnesota villages, were visited by fires, the minds of Minnesotans traveled back in memory to the day sixteen years before when what had been a happy, prosperous village was transformed into a "veritable hell on earth," in the words of a survivor, so quickly that but few escaped.

Warning of Approaching Danger Unheeded.

Not unheralded had been the catastrophe, for the woods had been burning for weeks and a heavy pall of smoke, reaching even to St. Paul, had hung in the sky, at times almost shutting out the light of the sun. Other towns in the neighborhood had been threatened, but backfiring had saved them, and now and then a homesteader would come fleeing to one of the little villages of the distict, his family and what worldly possessions he could scramble together loaded on a wagon, dragged by a jaded team. But there had been no loss of life.

So the residents of old Hinckley, somewhat inured to the ever-present danger, ignored it. Chroniclers since have laid the entire blame for the great loss of life upon the persons themselves, for failure to heed the warnings and to leave the district.

For the summer had been unusually dry, no rain falling for three months, and the woods and underbrush were like tinder. Fortunately there had been but little wind, and the fire smoldered in brush heaps, windfalls and old logs—only some dead, standing monarch of the forest, ablaze at night, serving as a beacon, locating the progress of the flames.

Sun Like Red Ball of Fire.

Hot and ominously still was the morning of September 1, 1894. The sun hung like a great red ball of fire in the sky; the air was fearfully opppresssive—there was every indication of cyclonic conditions. Yet to these warnings the residents of old Hinckley paid no heed—they were sturdy, hard fellows, those men of the northern pines, and they felt they could cope with an ordinary blaze.

And so they attended to their businesses as they had always done that morning. The first intimation the residents of Hinckley had that anything unusual might occur was about noon when the smoke semed to grow more dense, and was accompanied by considerable heat. Again they paid no heed, and chroniclers tell of little groups gathering here and there throughout the village, watching the southern sky and joking about their ability as firefighters.

But suddenly, about 2:30 in the afternoon, the storm cloud rose, like an almost perpendicular wall of black smoke, surging and roaring and rolling, sweeping everything in its way to destruction. In Pine City, fifteen miles away, where it appeared to be only a short distance off, its roar was heard—in Hinckley its progress was terrific.

All morning the wind had blown a gale from the south, and, gaining strength at 1:30, it reached a velocity of sixty miles an hour within a short time.

Heat of First Wave Fatal to Hundreds.

By the intense heat of the first wave most of the 418 persons were killed. In Hinckley itself many of the bodies were burned, but in the surrounding country many were found without a blister on them, and it is presumed that the lives of the victims were snuffed out by poisonous gases generated by the flames.

A freight train on the Eastern Minnesota road reached Hinckley at 2:40, and waited for a south-bound passenger, which arrived at 3:25, when a combination train was made up and proved to be the principal means of escape of the affrighted people.

A south-bound limited on the Duluth road, now the Northern Pacific's line to Duluth, due at Hinckley aht 4:05, ran through the smoke and flames to within about a mile and a half of the village. There it was met by refugees from the town, and its crew, learning of an unsafe bridge, was run back to Skunk lake, a little lake near the track, about five and a half miles south of Hinckley, where its passengers passed through a frightful, yet successful battle for their lives.

Gravel Pit Refuge for Scores.

Directly east of the town itself was a gravel pit owned by the Great Northern, about three acres in extent and filled with three or four feet of water at the time of the fire. This was the nearest means of escape from the fury of the flames. Many deeds of heroism were recorded, of villagers who helped in the rescue of their friends, and especially of the crews of the two railroad trains.

As soon as news of the disaster reached the Twin City, relief expeditions were organized and special trains, equipped with supplies, physicians and nurses, were rushed to the scene. Senator Knute Nelson, who was then Governor, immediately called a mass meeting, of which the late Charles A. Pillsbury was made chairman. He also served as chairman of the permanent relief committee, which established headquarters at Hinckley and supplied money and provisions to the sufferers.

Country-wide Response to Appeal.

Persons all over the United States responded to the appeal for funds, and $185,000 was raised in a short time for the help of the refugees. This was sufficient to care for their immediate needs, and later a part of it was used to help rebuild the burned towns.

Hinckley is now the center of one of the most prosperous communities in that section of the state, the ash heap of 1894 having been converted meanwhile into thrifty dairy farms, and the town itself has become the home of two or three times as many people as lived there before the fire.

NORMAL TERM IS ENDED.

Summer School at St. Cloud Graduates Nine.

St. Cloud.—The State normal summer school in St. Cloud closed, when nine graduates were presented with diplomas.

The members of the graduating class were preceded by fifty members of the Alumni asociation who marched in and took seats on the platform. Miss Irene Swenson sang two solos, with Miss Zama Taylor as accompanist. President Shoemaker delivered the address and presented the class to the normal board. Resident Director C. L. Atwood responded for the board and presented the diplomas.

In presenting the class to the normal board, President Shoemaker in his remarks to the class members spoke of the growth of the local institution which has now 2,200 alumni. Resident Director C. L. Atwood presented the diplomas for the board.

The following were the graduates:

Advanced Course—Joseph Roy Campbell, Howard Lake; Herbert B. Gould, St. Cloud; Elizabeth McElroy, St. Cloud; Helen Irene Mangan, Morris.

Elementary Graduate Course—Ella Fraser, Washburn, Ill.

Elementary Course—Florence E. Johnson, St. Cloud; Florence Gertrude Oliver, Selah, Wash.; Dassa Leona Terry, Parker's Prairie; Beda Tonnell, St. Cloud.

BOOM FOR LA FOLLETTE.

Smoker for Gifford Pinchot Will Begin Senator's Race.

St. Paul. — With a large number of prominent progressive insurgent leaders attending, the first gun in the campaign for Senator La Follette's candidacy for the presidency was fired in St. Paul. The occasion was the smoker given Gifford Pinchot at the Saint Paul hotel, where Ramsey and Hennepin county insurgents mingled with those from other parts of the state. A representative group was there, including Congressman Anderson and Lindbergh and John C. Applegate of Cannon Falls.

Among others who attended were: A. L. Ward of Fairmont, of the Second district; Dr. A. J. Tilton and A. Stark, of Harris; M. S. Mourelius, of Lindstrom; Judge J. F. Wilson and J. Q. McIntosh, of Stillwater; Alex McKnight, of Duluth, and John H. Grass, of Fergus Falls.

PREPARING FOR CLUB WOMEN.

Mrs. Higbee at Sauk Center Arranging for State Meeting.

Sauk Center.—Mrs. C. G. Higbee of St. Paul, president of the Federation of Minnesota Women's clubs, was in the city making arrangements for the annual convention of the federation which will be held in this city September 26-28. Local club women are arranging details for the entertainment of the visitors. Delegates will be entertained in the homes of Sauk Center residents during their stay here.

TO RAISE PRICE OF LAGER

STATE-WIDE INCREASE IN BARREL CHARGE ON BEER STARTED.

Retailer Will Have to Sell Smaller Mugs to Get Same Profit He Is Now Reaping.

Winona.—Winona breweries, as well as those throughout the state, see an advance in the selling price of beer product as the only solution of a combination of circumstances which affects their business.

It is stated here on authority that, in order to meet the steady increase in the cost of the ingredients which enter into the manufacture of beer, it will be necessary to increase the charges for the product. The increases have been almost revolutionary within the past five years. A comparison will emphasize, say the brewers, the fact that if a wide margin was left brewers between the cost of production and the selling price five years ago that margin is wiped out at this time unless prices have witnessed a similar and corresponding advance. Beer sells at the same price now that it did five years ago.

Ingredients Cost More.

Five years ago malt sold for 55 cents a bushel, while today it is quoted at $1.25 to $1.30. In the same period hops advanced from 10 cents a pound to 38 cents; barley from 40 cents a bushel to $1.12 a bushel; bottles have seen a steady advance in cost, and labor has developed a notable increase.

The present situation is not confined to Winona. It is nation-wide, declared a prominent Winona brewer yesterday. The largest brewers in the country today are working upon some method whereby they may overcome the advance in the cost of the ingredients of manufactured beer. The increase will probably bring the cost to $7, and it is more than likely that all of the Winona breweries will concur in the action. The advance will not be confined to Winona, but will probably extend over the entire state, and take in practically all of the breweries. The present outlook is that the Winona breweries probably will establish the schedule first, for beer here at this time is cheaper than at any other point.

It is not expected that the advance will affect the consumer to any appreciable extent. Beer will be sold for 5 cents a glass as heretofore, but the saloonkeeper must take his own precaution in the way of realizing on the sales the same revenue as at the present time. He will probably meet this by serving the drinks in smaller glasses. The advance here will go into effect within another month.

3,000 SUBPOENAS SERVED.

Great Number of Witnesses Called in Indian Land Cases.

St. Paul. — More than one thousand chancery case each involving from one to five subpenas have already been started in Minnesota in the big blanket equity suit in which the United States is seeking to recover the title to land in Becker, Clearwater and Mahnomen counties which was given to white people by Indians. The big equity suit is brought by the United States against the numerous people in Minnesota who acquired some title to land on the White Earth Indian reservation through people who are alleged to be full-blooded Indians.

Already some 3,000 subpœnas in the big case have been served by the United States marshal and a large number are still to be sent out. It is said that none of the owners of the property reside in St. Paul and that no subpœnas in the cases have yet been served locally.

A referee to take evidence in the case has not yet been appointed by the court and it is not thought that cases will close up for hearing at the November term of United States circuit court at Fergus Falls.

PREPARE FOR "BOOSTERS" MEET.

St. Cloud Business Men Named to Entertain Development League.

St. Cloud.—The general committee representing the Commercial club of this city met and appointed subcommittees to make local arrangements for the entertainment of the delegates to the annual convention of the Northern Minnesota Development League, which will be held in St. Cloud December 8 and 9.

It is expected that more than five hundred delegates from the northern counties and cities will attend the convention.

The program will be arranged by the officers of the association, President Maxwell of Wadena and Secretary McKenzie of Bemidji, who have been invited to St. Cloud in the near future to advise with the local committees as to what is expected of the convention.

AVIATOR KILLED

WITH MACHINE WORKING BADLY, J. J. FRISBIE MAKES ASCENT IN KANSAS.

CROWD CALLED HIM FAKER

Falls One Hundred Feet and Dies When Machine Fell On Him.—Wife Bitterly Denounces Jeering Spectators.

Norton, Kan., Sept. 4. — John J. Frisbie, the Curtis aviator, was killed by a fall at the Norton county fair. Frisbie met with an accident and only went into the air again when driven to do so by the taunts and jeers of the crowd. Frisbie fell about 100 feet and the engine of his aeroplane fell on him, crushing his left side. He lingered for about an hour before he died.

Frisbie had been giving exhibitions at Elmwood Park for several days. His machine worked badly and he fell 40 feet, but beyond bruises and a shaking up was not injured.

He was skeptical about the ability of his machine to stand another flight and announced that he would not take the air, but when this statement was communicated to the crowd there was an angry demonstration. The spectators hooted and shouted "faker" and refused to listen to explanations.

It was then Frisbie announced that rather than have the big crowd leave with the impression that he was not willing to do his best, he would attempt a flight.

He ascended without difficulty, but in attempting to make a turn the plane tipped, and Frisbie lost control. As he came crashing to the earth the spectators could see the aviator trying to right the machine, but as it approached the ground one of the wings crashed into a barn and the biplane, glancing off, struck the earth, with Frisbie underneath.

Frisbie's wife, son and little girl were witnesses of the accident. Mrs. Frisbie fainted when she saw her husband fall. She bitterly denounced the action of the spectators in forcing her husband to make the flight with a disabled machine. Frisbie is well-known among the aviators, having been a participant in the recent big meet at Chicago.

CONDITION OF COTTON 73.2.

Department of Agriculture Makes Estimate.

Washington, Sept. 2.—The condition of the growing cotton crop on Aug. 25 was 73.2 per cent of a normal, as compared with 89.1 per cent on July 25, 1911, 72.1 per cent on Aug. 25, 1910, 63.7 per cent on Aug. 25, 1909, and 73.5 per cent, the 10-year average, on Aug. 25, according to the department of agriculture estimates based on reports of correspondents and agents.

The comparison of conditions by states follows:

States.	Aug. 25, 1911.	July 30, 1911.	Aug. 25, 1910.	10-Year Av.
Virginia	96	102	82	80
North Carolina	76	87	76	78
South Carolina	74	86	73	77
Georgia	81	95	71	77
Florida	85	95	74	78
Alabama	80	94	72	73
Mississippi	70	86	71	76
Louisiana	69	84	60	70
Texas	68	86	69	68
Arkansas	78	94	78	75
Tennessee	88	92	78	82
Missouri	88	96	78	82
Oklahoma	62	88	85	76
California	100	99	95	..

PAUL GEIDEL FACES PRISON.

New York Boy Found Guilty of Killing Aged Broker in Hotel.

New York, N. Y. — The jury in the case of Paul Geidel, the 17-year-old bell boy charged with the murder of Wm. H. Jackson in the Iroquois hotel on July 26, returned a verdict of murder in the second degree. By the verdict of the jury Geidel escaped the electric chair, but will be sent up for a long term in either the Sing Sing or Auburn prison. A verdict of second degree murder provides for imprisonment for a minimum term of 20 years to a maximum of imprisonment for life.

When Geidel was brought into court to learn his fate he was pale. Tears welled into his eyes and rolled down his face when he heard the verdict and he clenched his hands in an effort to control himself. None of his relatives were in court.

DAILY MARKET REPORT.

Twin City Markets.

Minneapolis, Sept. 2. — Wheat, September, $1.01¼; Dec., $1.03¼; No. 1 northern, $1.05¼; No. 2 northern, $1.03¼; No. 1 durum, $1.00; No. 3 corn, 61½c; No. 3 white oats, 43c; barley, malting, $1.18; No. 2 rye, 81c; No. 1 flax, old, $2.48.

Duluth, Sept. 2.—Wheat, September, $1.04¾; December, $1.03½; No. 1 northern, $1.05¾; No. 1 durum, $1.00¼.

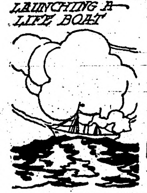
South St. Paul, Sept. 2. — Cattle—Steers, $4.25@6.25; cows, $3.65@4.25; calves, $5.00@7.50; hogs, $7.00@7.35; sheep, spring lambs, $3.00@5.50.

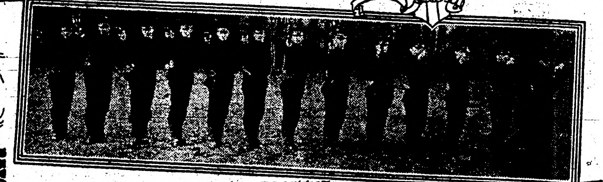
UNCLE SAM'S POLICE OF THE SEA

PHOTOS © BY WALDON FAWCETT

AT THE CADET SCHOOL OF THE U.S. REVENUE CUTTER SERVICE

LAUNCHING A LIFE BOAT





YOUNG OFFICERS AT PISTOL PRACTICE

CREW READY TO FIGHT FIRE

A REPRESENTATIVE NEW U.S. REVENUE CUTTER THE APACHE

To widen its sphere of beneficial activity is the aim of every well-managed branch of our national government, but it is doubtful if any of these have been more successful in the effort than the United States revenue cutter service. This organization under the treasury department, was long ago nicknamed "Uncle Sam's police of the sea," and the designation has stuck because it is manifestly so appropriate. The title was obviously fitting in the old days when the chief duties of the officers and men of the revenue cutter service were to apprehend smugglers and pirates, but it is not the less suitable in this age when in addition to the quest for such enemies of the law the revenue cutter organization is obligated to lend aid to every form of life saving at sea—for it is recognized that the ideal policeman is charged not only with the duty of protecting life and property, but also with responsibility for aiding humanity in distress under any circumstances.

The United States revenue cutter service has had a most interesting history. After the freedom of the American colonies had been won through the Revolutionary war, the country returned to a peace basis and the continental navy was disbanded. From that time forward there was no sea force available for the protection of the coasts and the maritime interests of the new republic until there came as a response to a long-felt want the organization of the revenue cutter service. This was one of the acts of our first congress. President George Washington signed the act in August, 1790, and within little more than a year ten vessels were ready for duty. Thereafter for a period of nearly seven years the little fleet formed the only armed force afloat flying the stars and stripes, and the ships were constantly engaged in patroling the coastline of the country and enforcing its maritime laws. The first appointments of officers in the revenue cutter service were made from among those who had served in the continental navy, and since that time many men who prepared themselves for our naval service have amended their life plans to the extent of taking commissions in the maritime police force.

The work of the revenue cutter service, as defined by the various laws which have been enacted on the subject, consists in the enforcement of almost every statute bearing upon the maritime interests of the nation. At the head of the category comes, of course, the protection of the customs revenue and if smuggling in any form is suspected the revenue cutter officers have the right of search of all merchant vessels arriving within or near the United States or bound for an American port. The suppression of piracy is not a heavy responsibility any more, but the search for wrecked and missing vessels is a responsibility which has expanded as the other has contracted. The enforcement of the neutrality laws is always something of a chore, thanks to the South and Central American revolutions that are hatched in the United States. Another important task is found in the enforcement of law and the protection of property in Alaska, including the protection of the seal and other fisheries in Alaskan water—a form of oceanic patroling which has been productive of many exciting episodes in recent years.

The suppression of mutiny is another duty delegated to Uncle Sam's police of the sea, but mutineers alike to pirates have become rather scarce in the neighborhood of Uncle Sam's domains in late years. On the other hand there has been a tremendous increase in the volume of work required in connection with the destruction of derelicts and other menaces to navigation and in the rendering of assistance to vessels in distress.

The revenue cutter service is charged by law with the construction and inspection of life-saving stations and the drilling of the life-saving crews, but in addition it has virtually developed a life-saving service of its own, and every revenue cutter might be designated as a floating life-saving station. The police of the sea have to afford protection for the sponge fisheries in the Gulf of Mexico and the Straits of Florida; they play an important part in enforcing quarantine regulations when Uncle Sam is "putting up the bars" against some plague-infested country abroad, and they guard the safety of the public at all great yacht races and regattas.

Persons who bear in mind the principal events of the Spanish-American war will recall that the revenue cutters with their officers and men played an important part in the defense of the country during that conflict. But this was no innovation. In the preceding wars in which this nation engaged the revenue cutter service always had a hand, and, indeed, there is a standing arrangement whereby, in the event of war, the police of the sea co-operate with the navy. It is a question, after all, however, whether the greatest victories of the revenue cutter service have not been won in times of peace. Take, for example, the great yellow fever epidemic that in the summer of 1905 ravaged the gulf coast of our country. Revenue cutters and a fleet of chartered vessels commanded by revenue cutter officers patrolled the waters of Louisiana, Mississippi, Alabama and Florida and for the first time in the history of such epidemics there was not a single instance of the spread of the disease through communication by sea. The ships were constantly within the infected districts, and although one of them had to fight the fever among its own crew never once did the vigilance against the scourge relax.

As has been said, one of the most important duties of the service is the relief of vessels in distress, and within late years this has developed a regular "winter patrol" of far-reaching scope and immense value. The president designates certain cutters each year during the stormy winter months from November to April to patrol our far-flung coast line in search of vessels in distress and to respond for any calls for assistance, that may be received via wireless. In the performance of this duty thousands of persons have been rescued from the perils of the sea and property to an aggregate value of many millions of dollars has been saved. The "beats" covered by the police of the sea on this winter "watch" are not confined to the Atlantic, Pacific and Gulf of Mexico, but include also the great lakes and the Bering sea and Arctic ocean. A kindred work of almost equal importance is the destruction of derelicts which menace all ships on the ocean pathways. Every revenue cutter carries high explosives and the paraphernalia for blowing up or otherwise destroying a derelict as soon as discovered, but in addition the service has a ship specially constructed as a "derelict destroyer"—the only vessel of the kind in the world.

Commissioned officers of the United States revenue cutter service have rank with the officers of the army and navy and receive the same benefits of retirement as are accorded these officers. The officers are trained for the service at the revenue cutter cadet school, located at New London, Conn. Young men enter at any age between eighteen and twenty-four, and in addition to exactions in book learning must undergo a military and nautical training that in some respects is even more arduous than that given at Uncle Sam's big academies at Annapolis and West Point. Of course the classes at the cadet school are comparatively small—sometimes there are not more than two dozen embryo officers enrolled at the institution, but this is to be expected, for the revenue cutter service does not need the great numbers of officers required for our rapidly growing navy. Indeed, there are less than three hundred commissioned officers on the revenue cutter roster, where as the warrant officers and enlisted men will probably not total more than fifteen hundred, although Uncle Sam is constantly adding to his fleet of revenue cutters, and this expansion is reflected in the active list.

The navigating responsibilities of the officers of the nation's sea police boats probably exceed those of any other men in the naval or maritime service. Unlike many of the men who go down to the sea in ships, they do not confine themselves to a given ocean path. On the contrary, the young revenue cutter officer may be called upon at short notice to navigate his own ship in any waters from southern Florida to northern Alaska, and he must enter many bays and arms of the sea where no naval or merchant vessel would ever be required to go. For these versatile demands the revenue cutter officers are especially trained during their cadet course. Each year during the three-year course the cadets spend several months on a cruising "practice ship," which jogs back and forth across the Atlantic, partly under steam and partly by sail power. The boys attend to all the operations connected with the navigation of the vessel—gaining that grounding of practical experience that will be so valuable in later years—and incidently they continue that small arms and ordnance practice which is a feature of their schooling on shore. The motto of the United States revenue cutter service is "Semper Paratus," which may be translated as "Always Ready," and certainly the Yankee police force of the high schools has eloquently proven in recent years that the words of this slogan convey no idle boast.

Escaping the Drudgery

Woman Tells How Household Work May Be Made Less Unpleasant.

The old-time household duties also disappeared to a great extent. Scrubbing was no longer a necessity. I found a waxed floor with simple but effective rugs, just as practical as in other parts of the house, says a writer in Success. The next step was to eliminate that second frightful bugbear of housekeeping—washing the pots and pans. No dish or kettle used in cooking was allowed to become cold before being washed with a combination wire and bristle brush. The hand thus came in contact only with the handle of the vessel, doing away with the most unpleasant part of dishwashing, while the immediate cleansing minimized labor by preventing particles of food from drying and sticking to the sides of the utensil.

Table tops of glass and marble also helped to reduce labor in the kitchen. These were constantly kept spotless by the free use of paper napkins as "wipe-up rags." The employment of paper is one of the most valuable means of saving work. Paper napkins when bought in quantities are cheap, they are absorbent, easily handled and may be quickly disposed of.

Another of our schemes was to have all garbage instantly dropped down a tube from the sink to an incinerator in the cellar, doing away with that most unpleasant chemical combination of a mixture of nondescript scraps, so unpleasant to the senses of sight, smell and touch. We have not as yet reached Mrs. Rorer's ideal of minimum waste, but we are striving to approach it, for therein lies another real source of economy.

A great deal of dirt and the labor of removing it was prevented by having all vegetables washed before they were brought into the house. To this end I devised a little drop table near the pump on the back porch, only a step from the garden. We live in the country and grow some of our own vegetables, but the principle of leaving all possible dirt outside is one that could be applied almost everywhere. All market deliveries were left in a basket just outside the door, obviating the running in and out of delivery boys.

"Chimney Pot" Hat

Copyright, Underwood & Underwood, N. Y.

Fickle fashion has again made a right-about-face. Last year, feminine headwear was all breadth, this year it is height; very broad brims were the vogue in 1910, exceedingly narrow brims the vogue in 1911. Milliners have reverted to 1860 models for their confections for the coming autumn, as this picture, showing a hat of a typical kind, goes to prove.

The hat is of silk beaver, trimmed with a broad velvet band and a tall plume of uncurled ostrich. They come in several colors, black, brown, grey, golden and so on.

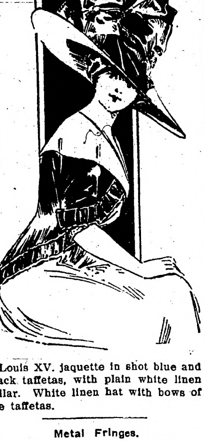
PAY ATTENTION TO THE ARMS

Easy to Dress Them Becomingly So as to Overcome Any Natural Defects.

Thin arms are very easily dressed becomingly, though there have been women in the world who had every device of the toilet at their beck and call and yet failed to understand the needs of their meagre arms. A celebrated actress and well known society woman was one of these, and even the surpassing loveliness of her face could not make up for the ugliness of the arms she was forever showing off in short sleeves.

However, estimates of beauty have changed somewhat, and with the present formless lines striven for in clothes match-like arms are no longer a bar to good looks. But they must be dressed becomingly—in long sleeves gathered over the arms or in the shape of loose bishop puffs ending in a long hand ruffle. The closer sleeve should have a pointed bottom covering the back of the hand if this member is also too thin or otherwise unlovely, but where the bishop sleeve is used the material of the bodice must be thick enough to hide the outlines of the arm, for otherwise there will be an unpleasant X-ray effect when the light pierces the thin texture.

FOR WHITE SUMMER DRESSES



Louis XV. jaquette in shot blue and black taffetas, with plain white linen collar. White linen hat with bows of the taffetas.

Metal Fringes.

Metal fringes are being much employed on evening dresses. These are made from bullion cords, and are in both the bright gold and silver and in the darker antique metals. Retailers unquestionably will have a big call throughout the fall and winter season for fringes in similar effects.

CLOAKINGS FOR THE FALL

Ratine Cloths Are Certain to Be Much Used by All the Fashionable Costumers.

A great deal of interest is expressed in ratine cloths for fall. There seems no question that they will be considerably used by all of the best houses. The new idea is, of course, the double faced finish, and beautiful lines in two colors reversible, or in plain colors with plaid back are being shown.

Colors in cloakings are both dark and dull. In double faced materials we see such combinations as navy blue and dark red, two shades of Havana brown, sage green, and beige, dull blue and mode, navy and taupe, Bordeaux red and Oxford gray, olive green and khaki.

The newest ratine cloths are lightweight and thin also. The first of these cloths brought out last year were much heavier, and were found to be clumsy, and, therefore, were not a great success. This season's offerings are much thinner, and are, therefore, expected to please.

Diagonal and boucle weaves are both being shown in ratine novelties. These diagonal effects are in both one and two tone colorings, often a lighter shade, such as blue or Bordeaux illuminates the background, while the boucle knots are in black. These materials are called "velours de laine" as well as "ratine."

Cushion Covers.

Brown suede leather is the covering of a very convenient pillow for the weary or delicate traveler. This particular small article appeals as the most convenient of its kind. It is about ten by fourteen inches, and is covered smoothly on one side with suede leather and on the other side with a noverlapping piece of the suede, which forms a flat pocket, into which a handkerchief or time table may be slipped. There is a small leather handle along the side of the pillow, so that in the hand it looks almost like a brown suede bag.

A nautical pillow has a heavy binding cord loosely inserted through loops in practically the same manner that sails or flags are attached or suspended aboard ship. It is made of smoke blue linen and worked in three shades of different colors. Serviceable boat cushions are also made of bright-colored ticking.

Here and There.

The veils that are put on perfectly loose and that flow all around are very popular.

Bordered foulards being shown in the silk departments are more beautiful than ever.

Many girls are making their combination skirts and corset covers of white wash silks.

The new trimming ribbons are striped, plaided, bordered, brocaded, etc., and are lovely.

Delicately colored buttons in soft blues, pinks and purples will be used on silks and chiffons.

For girls plaids will not be as much favored as stripes and checks with material trimming.

The Buckskin Shirt

By O. HENRY

(Copyright, 1910, by E. L. Nelson.)

DEER pardner.

"This is my furst leter. I kno all about how you saved muther on the desert from the injuns, so she named me after you in grattitude. Each time Crismus comes she says you send me something and call me little pardner. so i guess we are. i want to play injun but aint got no buckskin shirt like buflo bill wore. if you see Santy Klaus loafin around out there tell him. muther says he lives somewhere near you. goodbye Willie Smith Parks.

"ps. ain't this a long letter."

The big, gaunt man read it with chucklings and interpolations of "God bless his little heart" or "Ain't he a brick, durn him; ain't he a brick!"

The half-written, half-printed missive was familiar to him through many readings, for it had been his evening custom now for several weeks to scan its pages before commencing the herculean task which he had set himself—the making of the shirt.

He relighted his pipe, carefully folded and religiously replaced the letter in his safety vault, a baking-powder can on a shelf. In this can, too, was his store of gold-dust, his only reward for months of isolation and toil.

With a sigh of touching profundity, he once more bent over a bundle of buckskin, which lay in crumpled folds beneath his clumsy, toil-worn hands. When he straightened up, after intense study of the lines on which miners' shirts are made, its crude design became visible.

He was lank and huge. His skin was wrinkled by desert suns and winter winds. He was wholly unprepossessing until one came to look deeply into the eyes that at first glance were merely pieces of blue-gray steel, set into the dun color of his face. The more one looked the deeper they became. Then, if his face contorted itself into a mass of crisscrossed wrinkles, the eyes became wells of kindliness and gladness; and the man was beautiful. After that you forgot to look anywhere else.

His habitation was a mere shack of a cabin, perched on the edge of a bluff away off up in the tops of the Sierras, where winter snows lie deep, where the wind croons through fir-trees watching over splendid loneliness; and where the lean, gray wolf has come into his own again, after the passing of a civilization. It was a day's hard snow-shoeing in winter, and an equally long tramp in summer to the nearest neighbor.

A black hole in the hillside, deserted since those earlier argonauts had gone their ways, had lured him to the place with gleaming invitations. From its overlook crannies he drove a meager "Stake."

It was late autumn now, and the snow had covered over that forgotten city in the canon below; and blanketed in white the old camp cemetery. On this night and other nights the wind sang varying tunes, and drove the snow like spray against the cabin window from a sea of unbroken white.

But neither the night nor the hole in the hillside was of interest to the man in the cabin, who alternated little pieces of whistled tunes with half-whispered soliloquies; and occasionally, when the problem became very perplexing, thrust his fingers through his shock of hair, and swore great, meaningless oaths.

For seven years now the gaunt one had never failed in a Christmas remembrance, the only one he gave, and to a stranger's child. For seven years, luck with him or against him, he had sent this Christmas offering. Once, down in Tucson, he had been in such straits that he had to pawn his silver-mounted saddle to gain the wherewithal to buy a geegaw for this little boy. But as he said at the time when he mailed it, he had "made good. And what's the use in havin' a little pardner named after you, if you don't give him his'n on Christmas?"

But this was the hardest year of all. The most difficult task. Not a squaw within a hundred miles. Indians all gone. Nobody much who knew how to tan buck. Ought to have beads on it, but that couldn't be done. Wished he had learned beadwork. Never cut nor sewed a boy's shirt in all his life. How big was a seven-year-old, anyhow! But "Sure as shootin', there was a real Buffalo Bill shirt goin' back East this year."

So through this winter's evening and many others he worked steadily, and looked forward to that fast approaching time when he must venture out from the wilderness and away to the abode of men, in order that he might express with due formality his annual gift.

On the night of its completion as he held it to the light it proved a wonderful creation. Never was such a tan, and never did finer claws grace a neck-piece. Its thrums were of the thinnest, and a quill or two lent chic. True, the sewing was a trifle irregular in stitch, and there were places that looked rather crude, but it was "A mighty strong shirt, and them stitches was all put in thar to stay. You bet it was a strong shirt."

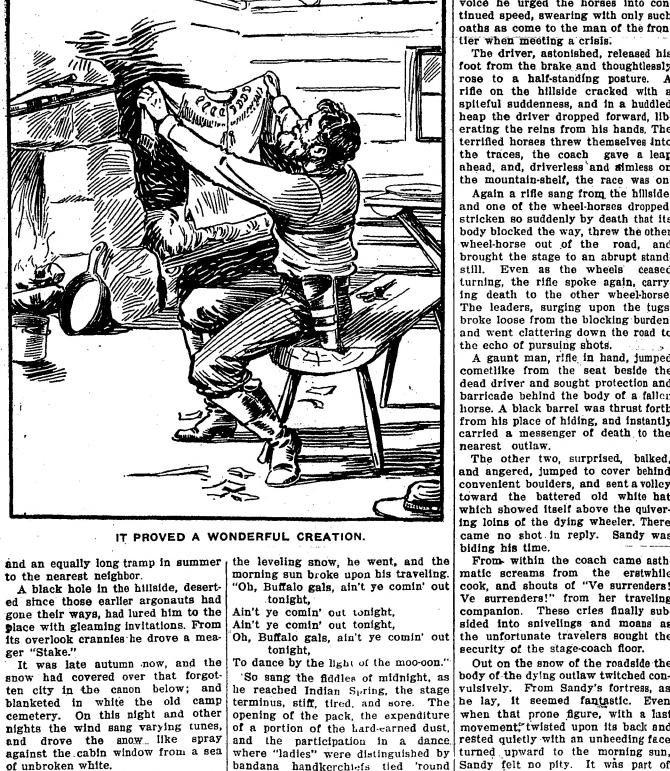
There came the night of the starting. Fresh thongs to the shoes, the homely lunch, and the packing of the precious bundle that was to bring gladness to those two Easterners. The buckskin shirt and the meager supply of gold-dust were rolled into a tight little wad and carefully bound around with strips of flour sack.

The wind was not wearied of the night when the moccasined feet were slipped into the rawhide thongs, the diminutive pack thrust over sinewy shoulders, and the belt tightened for the day's journey. Out through the singing pines, which bade him a friendly good-by, up to the crest of the divide where undergrowth and barren rock were rendered a plain by the leveling snow, he went, and the morning sun broke upon his traveling.

"Oh, Buffalo gals, ain't ye comin' out
tonight,
Ain't ye comin' out tonight,
Ain't ye comin' out tonight,
Oh, Buffalo gals, ain't ye comin' out
tonight,
To dance by the light of the moo-oon."

So sang the fiddles of midnight, as he reached Indian Spring, the stage terminus, stiff, tired, and sore. The opening of the pack, the expenditure of a portion of the hard-earned dust, and the participation in a dance where "ladies" were distinguished by bandana handkerchiefs tied 'round muscular male left arms came as a matter of course, and an exhilarating dissipation after all those weary days of toil and weary nights of effort in the hills.

"Sandy must hev somethin' mighty precious in that bundle of hissen," was the comment of the stage agent as he received a wad of buckskin with reiterated instructions to keep it safeguarded.



IT PROVED A WONDERFUL CREATION.

But neither through the hours of night nor in the early dawn, when he mounted by preference the vacant seat by the stage-driver, did "Whistling Sandy" vouchsafe an explanation of the whys and wherefores of his burden. None but an observant eye could have detected when he bound his tiny "poke" of gold inside the little shirt, that in his estimation the latter was the more precious. Nor could any one have observed that this solicitude was continued at Forest Hill, where the steaming horses and sleigh from Indian Spring gave place to fresh ponies and wheels.

Away off down the divide, through ever-decreasing snow and over wind-swept, rock-strewn spots, the stage clumsily rattled. Its inside passengers, consisting of a traveling man for an Eastern mining-machine house and a large, fat woman, who had been a cook at an upland mining-camp, bumped hither and yon as the vehicle found declivities.

Every now and then the driver, as he threw his lash out over the leaders, complained, in the whispering voice of the West, about the responsibilities that had been thrust upon him in this trip.

"Here comes a clean-up from the Golconda—twenty thousand, anyhow—and for the fust time in a year they ain't no Wells-Fargo man along to watch the job. Last time this thing happened they stuck us up and poor old Tom Smith gits shot off'n the box for forgettin' to shove up his hands when a gent with a handkerchief tied over the lower half of his mug makes a gentle request."

Sandy involuntarily thrust his hand around the buckskin shirt, which, together with the scant store of wealth, reposed within the sagging folds of his blue flannel shirt.

Great heavens! He had never thought of this before. Suppose they should be held up on this trip? He wouldn't mind the loss of his poke or any other valuable possession of his own, but the shirt! Why, if the highwaymen got that, his "little pardner" 'way back east would wait disappointed on that fast-approaching Christmas day. "But, shucks! they wa'n't goin' to be no hold-up," and he lighted his pipe.

Even in the land of certainty the unusual happens. So it was that as they rounded the turn of dread Dead-Man's Curve, there came crisply out in the morning air the command "Halt and hands up! The brakes for yours!"

Sandy, for the instant bewildered, caught a kaleidoscopic glance of two masked men on the hillside above the mountain-road, a menacing figure near the head of the leaders, a pointed rifle, and the driver's frantic efforts to pull up. Like a flash came the thought of his mission and the necessity for escape.

The whip lay before him. Without a thought of consequences and regardless of the recklessness of his action, he seized the whip, sprang to his feet in the box, and sent the long lash curling, quivering and viciously snapping across the palpitant flanks of the maddened leaders. At the top of his voice he urged the horses into continued speed, swearing with only such oaths as come to the man of the frontier when meeting a crisis.

The driver, astonished, released his foot from the brake and thoughtlessly rose to a half-standing posture. A rifle on the hillside cracked with a spiteful suddenness, and in a huddled heap the driver dropped forward, liberating the reins from his hands. The terrified horses threw themselves into the traces, the coach gave a leap ahead, and, driverless and aimless on the mountain-shelf, the race was on.

Again a rifle sang from the hillside, and one of the wheel-horses dropped, stricken so suddenly by death that its body blocked the way, threw the other wheel-horse out of the road, and brought the stage to an abrupt standstill. Even as the wheels ceased turning, the rifle spoke again, carrying death to the other wheel-horse. The leaders, surging upon the tugs, broke loose from the blocking burden, and went clattering down the road to the echo of pursuing shots.

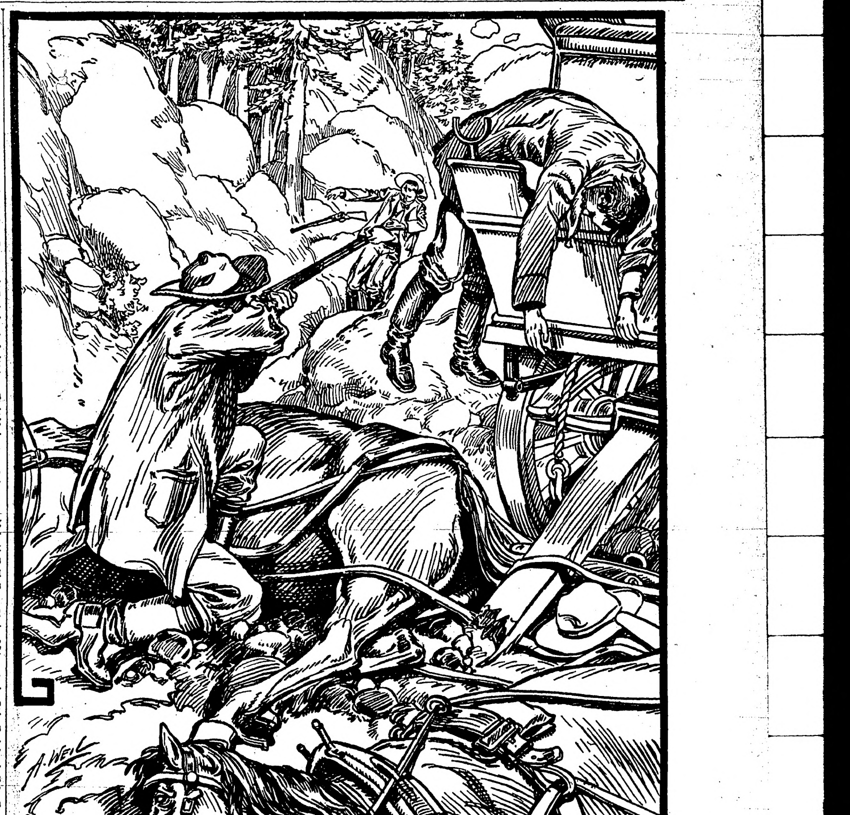
A gaunt man, rifle in hand, jumped cometlike from the seat beside the dead driver and sought protection and barricade behind the body of a fallen horse. A black barrel was thrust forth from his place of hiding, and instantly carried a messenger of death to the nearest outlaw.

The other two, surprised, balked, and angered, jumped to cover behind convenient boulders, and sent a volley toward the battered old white hat which showed itself above the quivering loins of the dying wheeler. There came no shot in reply. Sandy was biding his time.

From within the coach came asthmatic screams from the erstwhile cook, and shouts of "Ve surrenders! Ve surrenders!" from her traveling companion. These cries finally subsided into snivelings and moans as the unfortunate travelers sought the security of the stage-coach floor.

Out on the snow of the roadside the body of the dying outlaw twitched convulsively. From Sandy's fortress, as he lay, it seemed fantastic. Even when that prone figure, with a last movement, twisted upon its back and rested quietly with an unheeding face turned upward to the morning sun, Sandy felt no pity. It was part of the game, and the game was one which must be played to a finish. He knew, as did the others, that there would be no compromise here. It was to the death

As he watched with steely eyes aflame with battle light, he counted his chances, but felt no weakening and no fear. Over and over again, between his clenched teeth, he muttered: "They can't win, damn 'em, they can't win. They got Jack, but they can't get me. If he'd been game from the jump we'd have all pulled through."



A MESSENGER OF DEATH TO THE NEAREST OUTLAW.

A sudden movement on the hillside caught his attention.

There was a swift rush of a black form silhouetted against the whiteness as one of the robbers, adopting new tactics, sought a vantage-point higher on the mountain, from which he might shoot down to the road. Quick as a flash and with deadly certainty, Sandy's rifle recognized the danger, gave answer, and another huddled heap was added to the morning's tragedy. Down the hill it came, tumbling grotesquely, displacing stone in its journey, and finding a resting place within a few feet of its comrade.

Sandy chuckled grimly. "There's just one more," he said to himself, "and mebbe I kin get him to lay down his hand.

"Hey, there!" he shouted, "I don't wanter kill you, and I reckon you don't care in nowise particular about gettin' me. If you've got enough already, you kin chuck your guns over in front of that rock, h'ist your hands, and come down here where we can palaver."

A shot was the only reply. "A pretty game cuss, I reckon," said Sandy, as the bullet ripped through the top of his hat, carrying with it a neatly mown lock of red hair.

"Whew, some good shootin', I calkerlate." Then he began to try, after carefully withdrawing his rifle, to gain a position of vantage from farther up the side of the fallen breast. As he crawled forward upon his side, he inadvertently exposed himself, and the last outlaw lost no time in seizing the opportunity.

A spurt of flame shot like lightning from the hillside battle-ground. Sandy felt a paralyzing shock, and released his hold on his rifle, which fell and clattered out of reach.

"He got me! He got me!" Sandy murmured over and over to himself. His hand sought his breast and came away redly stained. He was helpless, but through his mind flashed a recollection of an old Indian strategy, and at once he simulated death.

A long interval of silence followed.

A head appeared above the outlaw's refuge. From around the corner of the rock protruded a part of a face. Still no shot from the traveler crouched behind the dead wheeler. Emboldened by this, the outlaw cautiously got on his feet and peered toward his enemy. Satisfied that he had nothing to fear, he advanced into the open.

Over the field of tragedy he strode, the lust of gold still upon him. He reached the box of the stage; shifted his rifle to the hollow of his arm, and stretched out a grasping hand toward the coveted loot.

The prescience which is every man's inheritance caused him to turn toward his fallen adversary.

From behind that barricade of flesh, upon his knees, resting dizzily on one arm and weakly seeking steadiness of aim was the supposed dead man. The outlaw's rifle and a heavy Colt's rang in unison. The robber spun upon his heel, dropping his weapon. Slowly he settled to his knees, and then, as though tired, fell forward upon his face. He was not alone in relinquishment.

As if he, too, were wearied of the struggle, Sandy had twisted over on his side, his pistol dropping from nerveless fingers, and one arm distorted under him.

To the ears of the frightened passengers in the coach there came the welcome sound of clattering hoofs and excited voices from down the road. A cavalcade of furiously riding men swung around a curve and made upon them.

"Lucky that only one horse went over the cliff and that we met the other leader," said the foremost man, as his spurred heels rang on the ground, and his mount, with steaming flanks, came to a dejected halt. While two of the men listened to the frightened explanations of the passengers, the others grouped themselves about the prone figure of Sandy. They lifted him to an easier position and set to work to revive him with gathered snow.

His eyes opened as though from sleep, and his uninjured arm sought the blood-stained breast.

"Must get this to express," he murmured. "Won't get there in time, unless I do. Christmas most here. Had to fight for it, and can't fall down now."

"Well, I'm darned," said one of the men. "This is all that saved that hole from letting his life out. He'll get well, all right."

To the amazement of the curious group, he held in the air and shook out of its foldings a tiny buckskin shirt, stained with blood and perforated through its wadded thickness with a bullet meant to kill.

Again the winds caressed the hilltops, laid loving hands on the fir-trees, and played dancing tunes for the wild flowers that carpeted the domes back of Sandy's home. Everything seemed good to him in this spring world of his. It was an old world, too, and one whose buffets and scant rewards he had faced uncomplainingly. But tonight, he thought, what more could a man want than this? He reviewed in order the facts that unexpected treasures of gold had been found, that new friends had been made, and, greatest of all, that a letter was lying on his lap. It read:

Deer Pardner:

Of course i was glad to get the gold watch those men sent with the shirt. Muther says they sent it to your namesake because you wouldnt take nothing. But all the boys think the shirt is the best part of the present. muther wanted to wash the stains out but i wouldnt let her. and i wont let her mend the holes in it. Gee but you must have licked 'em Its got another stain on it now where I cut my thum with my new nife trying to open the insides of the watch. Good bye Willie Smith Parks.

ps. Somehow that watch dont run well no more.

CUPID AND JEWELRY TRADE

Very Close Connection Between the Two Is Shown by a Little Reflection.

Have you ever stopped to think what would become of the jewelry business if it wasn't for its friend Cupid? It might also be well to stop and think what would become of Cupid if it wasn't for its friend the jeweler. There is a closer business relationship between these two than many may imagine.

A young man falls in love, proposes and is accepted, thanks to Cupid. Then there is an engagement ring to buy and Cupid gets more thanks, this time from the jeweler. The friends of the engaged couple hear of the approaching wedding and off they go to the jeweler to buy suitable wedding presents. Then there are silver and golden wedding presents to buy also suitable gifts to provide for christenings and birthdays.

Under the circumstances it is easy to understand why jewelers and their assistants aid Cupid somewhat by never neglecting any possible opportunity to introduce eligible young men of their acquaintance to suitable young women. The rest is simple. Introductions are often followed by engagements. The jeweler, to whom the young couple feel indebted for their new found happiness, is patronized when the engagement and wedding rings are bought. And as weddings mean wedding presents they are all very good for the jewelry business.

PASSING ON THE "REMEDY"

Afflicted One, "Cured," Was Willing Others Should Have Benefit of His Experience.

Dr. Nicholas Murray Butler, at a luncheon at the Mohonk Peace Congress, said with a laugh:

"There is a type of man who declares that it will never be possible for mankind to get along without war. This type of man, whom nothing can convince, reminds me in his blind, stupid obstinacy of a chap who once consulted a famous Philadelphia physician about his dyspepsia.

"The patient was very deaf. The dialogue between the physician and him ran like this:

"'What do you usually breakfast on?'

"'Oh, no! At least two miles in the morning, and a motor ride after lunch.'

"'How many hours do you sleep?'

"'Well, doctor, I was 69 my last birthday.'

"'Are you married?'

"'Thirst.'

"With a gesture of impatience the physician turned and wrote out a simple remedy for dyspepsia. The patient, as he departed, shouted in the loud, harsh tones of the very deaf:

"'Doctor can cure deafness?'

"The other shook his head in the negative.

"'Well,' said the patient, 'you've been very kind, and therefore I'm going to make you a present of this prescription.' He took a folded paper from his pocket. 'It cured me.'"

CHAS. W. LATTA

Editor and Publisher.

Published every Friday at Holt, Marshall County, Minnesota.

Subscription Price: $1.00 per year, strictly in advance.

"Have you been mentioned fo Congressman-at-large yet? If not you are surely off the political map," remarks the Minneapolis Journal.

Seems like that description fits A. D. Stephens.

If governor Eberhart makes an attemp to shoot off his mouth for Taft in this state next year, he will be sent to the dump so swift that you can play a game of euchre on the tail of his coat.—Sunbeam.

In his political column in the Minneapolis Jonrnal Charles B. Cheney says that the mention of 'A. D. Stephens for lieutenant governor "has aroused quite a chorus of protest." Wonder if he expected it to be received with a chorus of approval.

The Warroad Pioneer is the name under which the publishers of the former Warroad Plaindealer will issue their lively newspaper in the future. It appeared last week under its new title, and its editors explain that the main reason for the change was that they did not like the old name. And that's a plenty good enough reason.

We Can Suit You

C. H. GUNHEIM'S

The Minneapolis Journal says:

"The biplane William H. Taft is is about to start on a great cross-country flight. The monoplane Boblafollette is still circling around Washington."

Why not call things by their right names? The Journal should have called Taft an "ex-plain" and LaFollette a "com-plain."

Over at Argyle the farmers are hauling in a few bushels of timothy and taking home with them pretty nearly all the available cash in the two banks. Timothy seed is worth eleven cents a pound. and when a man with long whiskers comes to town the villagers catch him and comb the seeds out of it.—Warroad Pioneer.

It is not our intention to keep nagging at the opposition, nor is it our intention to make a bad matter worse, but we would just like to ask those who voted the saloons in this year how they like their surroundings at the present, time. And to the ladies of Argyle we would like to say, is it not a pleasure to promenade on the business streets these evenings? Surely we ought to be proud of the "business" appearance Argyle has taken on since the saloons came in again.—Argyle Banner.

Dr. Dumas, the Cass Lake man who gained notority by being arrested for complicity in various burglarious enterprises, and who, with his friends, has been laughing at the prospects of a trial in district court for the crimes he is charged with, has been bound over to the federal court and placed under $10,000 bonds to appear for trial at Fergus Falls in November. The newspapers say that his attorney is indignant. Cant blame him much for being put out, because local pull counts for very little in the federal courts.

Should Repair Church Steps

Editor Grimstad, of the Newfolden Review, made his first trip to Holt a few days ago and, in celebration of the event handed his readers a story that was remarkable, if not very intellectual. Judging from the comments he makes the visit to Holt must have been quite an event in his life, and, after reading the article, we can readily believe that some of his friends may have felt anxious during his absence. He concludes his story with this remark:

"A church also noticed at this place altho its doorsteps appeared very little worn in comparison with any of the three churches in our own."

From this we would gather that the Newfolden editor is a very observant young man, and also that he intends to compliment Holt on the neat and well kept condition of its place of public worship. We have our doubts about the wisdom of his thus calling attention to the dilapidated condition of the Newfolden church steps. Perhaps he has some grievance that we know nothing of.

However, he might give the trustees a hint to build some new steps to those churches and paint them. Then he might sound a note of warning to the young people of his town to keep off the church steps except when going to and returning from public worship.

THE DULUTH HERALD

BEATS THE CENSUS THREE TO ONE

During the past ten years the population of Duluth Increased 48 per cent., St. Paul 32 per cent., and Minneapolis 49 per cent. In the Same Period the Circulation of The Duluth Herald

INCREASED 150 PER CENT.

This marvelous expansion—so much greater than that of the surrounding territory—is due solely to the merits of The Herald The Herald has never used any kind of premium, contest, or price reduction to gain subscribers but prints each day the very best NEWSPAPER in the Northwest. RAVAGES OF FOREST FIRES

Loss Estimated at $150,000,000 in One year Laid to Carelessness of Woodsmen.

With a total estimated forest fire loss for the entire country last year ranging from $150,000,000 to $200,000,000, and causing the death of several hundred persons, uneasy, indeed must rest the knowledge upon any woodsman, experienced or amateur, that he caused a fire which may have contributed in this loss of life and property, says Guy Elliott Mitchell in the Review of Reviews. On the other hand, the man who extinguished an incipient fire may take just pride in the act.

The way to prevent big fires, as Chief Forester Graves says, is to put them out while they are small. If people are careful not to start fires. or if in case fires do start there are enough people available to fight them. they will gain no headway. The forest service in its posted notice lays down a few simple rules to keep in mind when in the woods and particularly requests in case of fire that the forest guards be notified. If the fire has not gained too large headway it may be very possible to check and extinguish it, always remembering that fire runs rapidly up a slope, burns slowly on the crest and travels down hill yet more slowly. Many an incipient fire has been put out by a single guard or ranger, or an experienced camper, using his blanket or a green branch for beating the fire or throwing on loose earth or sand.

DUTY OF HAPPINESS.

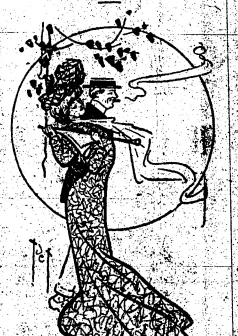
There is no duty we so much underrate as the duty of being happy. By being happy, we sow anonymous benefits upon the world, which remain unknown even to ourselves, or when they are disclosed, surprise nobody so much as the benefactor. A happy man or woman is a better thing to find than a five-pound note. He or she is a radiating focus of good will; and their entrance into a room is as though another candle had been lighted. We need not care whether they could prove the forty-seventh proposition; they do a better thing than that, they practically demonstrate the great theorem of the liveableness of life.—Robert Louis Stevenson.

IN SCIENCEVILLE.

The Visitor—High Olympus, but there's a beautiful monument! What here could have inspired so costly a structure?

The Native—That's a tribute to the germ of appendicitis, sir. Come up and read the inscription. You'll see it's a token of grateful appreciation from 11,397 surgeons.

WOMAN'S WEAKNESS.



Clara—Oh, for a thousand tongues to sing.

Clarence—If you had them you'd use 999 of them to talk with.

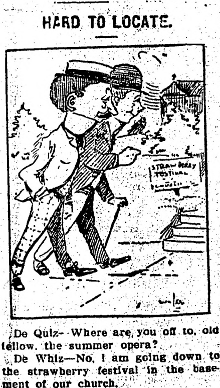
BETTER STILL.

CHAMPION HARD LUCK YARN

Tout Who Was Following Ponies Has Tough Experience With Stingy Horseman.

In the days when the race tracks were doing a big business the so-called race track touts were always in evidence at every meeting and the hard luck stories these fellows could tell were never excelled by any other single class of individuals. One of the best of these stories concerns a tout who was following the ponies and who reached an eastern city when a race meeting was about to open. The tout was broke and, accosting a rather stingy horseman of his acquaintance, told him of his predicament. "Why, I haven't had a thing to eat in two days," said the tout. "Well," said the horseman. "step in here to this restaurant and I'll buy you something." With visions of a big meal the poor tout followed the stingy horseman into the restaurant. "Give this party a glass of milk and a piece of custard pie," said the horseman to one of the waiters. "Gee," said the tout, "I thought I was going to get some meat." "Change that order from custard pie to mince pie," said the horseman as he left a dime on the counter and went out.

HARD TO LOCATE.



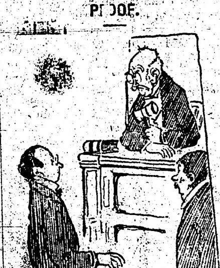
De Quiz—Where are you off to, old fellow, the summer opera?

De Whiz—No, I am going down to the strawberry festival in the basement of our church.

De Quiz—Strawberry festival! Why what in the world are you going to do with those opera glasses?

De Whiz—Why, look for the strawberry.

PROOF.



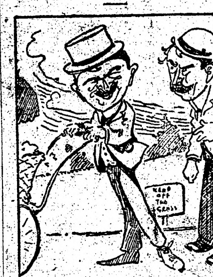
Magistrate—Did you strike this man?

Prisoner—I did, but he made the first assault.

Magistrate—How was that?

Prisoner—He struck me for $5.

SURE



Visitor—I like little babies, but only before they can talk

Mr. Newpop—Indeed? Why so young?

Visitor—Before they learn to talk there is no danger of their parents telling you the wonderful things they have said.

Mrs. Askitt—Are you careful to make your husband tell you everything that happens to him?

Mrs. Tellitt—Yes, and I'm careful to see that nothing happens to him.

Bring us the news.

August Helquist went to Warren Monday on business.

When in town call at this office and let's get acquainted.

J. O. Quisberg and W. T. Wiig drove to Thief River Falls Sunday to call on friends.

Mrs. George Anderson returned Saturday after several days spent at Crookston and Climax.

Mrs. Julia Knutson, from Randen, went through here Monday on her way to Langdon, N. D.

Mrs. Martin Strom and granddaughter, Alpha, spent Saturday last visiting relatives at Thief River Falls.

Miss Edna Risberg went to Thief Thief River Falls on Monday to attend school which commenced there on that day.

Wanted —— Anyone having for sale a good, second-hand cook stove, number 9, is requested to notify this office giving full particulars.

Dr. M. A. Nelson joined the crowd and left on Monday for Minneapolis to spend a few days visiting with his folks and taking in the fair.

Arvid and A. L. Carlson left for the Twin Cities on Monday to take in the state fair and purchase new stock for the Holt Mercantile Co.

Andrew Olson, the merchant prince of Argyle, motored over with his family and spent Snnday as guests at the Mat Olson home southwest of town.

S. S. Kolden left Monday for a trip to the state fair and to visit with a brother at Durand, Wis. While absent he will call on the wholesalers with whom he does business in the twin cities.

The Misses Sophie, Ella and Mary Olberg came down from Middle River on Saturday and spent Sunday at the Kolden home. On Monday they went to Thief River Falls where the last named two will attend school,

M. A. NELSON, M. D.

PHYSICIAN AND SURGEON

Office over Holt Merc. Co's store

HOLT, MINNESOTA.

Miss Mabel Knutson went to Thief River Falls on Monday to attend school.

R. Reierson is among the number from here who are spending the week at the state fair.

Harry Werner was over from Germantown for an over Sunday visit with his relatives.

R. L. Olson went to Thief River Falls Monday afternoon to attend to some business matters.

Miss Alice Mickelson is spending a few days here as a guest at the home of her uncle, Sam Mickelson.

Arvid Carlson drove over to Strip on Sunday and spent the day very pleasantry calling on old costomers.

A. G. Mellem and Emil Peterson, both of St. Paul, were here yesterday looking over farm lands with a view to investing.

Mrs. Gunder Sorter and Mrs. John Engstrom left on Monday for Minneapolis to spend the week visiting friends and taking in the state fair.

John F. Naughtin, the Fidelity Life Insurance man, came up from Crookston yesterday to transact business with some of our local people.

When Mr. and Mrs. and Miss all get started travelling on Monday it takes a whole lot of capital "M"s to tell the story in the columns of a newspaper.

We want a live correspondent in every township in Eastern Marshall county to send us the news of the locality and solicit subscriptions for this newspaper. We want bright young people and will make it worth their while to represent us.

Mathias Hanson was in yesterday from his fine farm northwest of town after a missing part for his new corn binder. He has quite a large field of very fine corn and enjoys the distinction of being the first man in this vicinity to own a corn binder.

Mrs. E. M. Silbaugh and two sons arrived from St. Paul on Saturday to make their future home here. Their household goods arrived on Monday morning and they are confortably installed in rooms in the Holt Mercantile Co. building until Mr. Silbaugh gets around to putting up a dwelling on the farm east of town.

Ed Follsmith, of Carpenter, Ia., and O. E. Thoreson, of St. Ansgar, Ia., arrived here on Monday morning to look over the country in the vicinity of Mud Lake with a view to taking up homesteads. They are making their headquarters with the Dahls, east of Mud Lake, until they have decided upon location.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

To The Public:

Dont buy your Fall Goods until you have seen the extraordinary large line we are to have in about the 15th of September.

We decided to go to the cities the week of September 4th to September 9th to buy up this large line, so we know just what we are getting. Some merchants buy their Fall goods thru travelling salesmen, with their few samples and catalogs, but this is a very poor policy, because a merchant has to be just as careful in buying as the consumer in order to get the best value for his money.

Wait, and dont buy until you have called on us to see our goods.

Yours Respectfully,

Holt Mercantile Co.

Gathering the Chicken Crop

Between the opening of the hunting season yesterday and the state fair this week most of the local people have been absent from their homes more or less. The chicken crop proved very alluring and the birds seem to be quite plentiful. Nearly every one who could tote a gun was out yesterday and most of them did not get back until too late to tell the story of their prowess in this issue of the paper.

One report we have that we know to be reliable. The editor shouldered his gun and started out on foot at 6 a. m. yesterday and returned at 9:30 a. m. with all the game he cared to carry—eleven chickens and one rabbit.

Want New School District

The good people living out in the territory south of Mud Lake, in the southeast corner of East Valley, will have a meeting on Sunday afternoon at the home of Rev. B.M. Ordahl to lay plans for the formation of a new school district in that vicinity. The meeting will be held after church services, which will be held at 2 P. M., and should be attended by every resident of the locality.

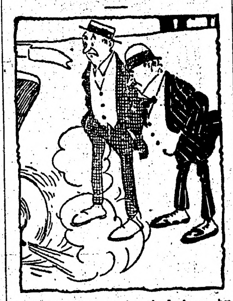
Mrs. D. Payne and the children returned Wednesday from Nielsville where they have been visiting with her parents for the past couple of weeks.

On Saturday Mr. and Mrs Carl Dahl were driving from their home home east of Mud Lake to Rollis when they were thrown from their wagon while crossing a rough spot. Mr. Dahl escaped with some slight bruises but Mrs. Dahl sustained a badly sprained knee that will confine her to her home for some time.

F. W. Tabor went to Middle River on Monday to make entry on his homestead in section 14 of East Valley. He contested a prior filing some time ago and took up his residence on the land. He has just received word from the U. S. Land Office that his contest was successful and he lost no time in making his filing.

Ed Ellingson had the misfortune to take a bad fall on Saturday while running the engine on the Ellingson-Knutson threshing rig. The fall was hard enough to crack one his ribs and he came to town on Sunday and had Dr. Nelson fix up the injury. While he is suffering some pain he is still sticking to his post at the throttle of the engine and the threshing goes merrily on.

CAUGHT THE FEVER

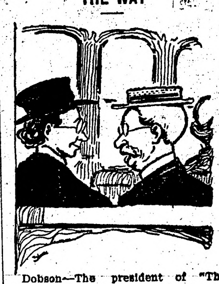


Wicks—He was knocked down by an auto, you know. Got $3,000 damages from the fellow.

Dicks—The idea! I wonder what he'll do with the money?

Wicks—Oh, he's spent it. Bought the fellow's car with it.

THE WAY



Dobson—The president of "The Hide and Seek bank" speculated.

Hobson—And, naturally, was not successful?

Dobson—Why do you jump at that conclusion?

Hobson—Because they don't call it speculation when bank president's win.

Arrived From South Dakota

On Monday morning L. H. and Ed Gudmanson arrived with a lot of stock and machinery from Bison, S. D., to make their future home on land a few miles southwest of here which they purchased a few years ago. They originally came from Winnebago county, Ia., and went to South Dakota three years ago where they took up homestead land after having bought here. They say that in the past two years they raised absolutely no crop on their South Dakota land so decided to come here to live. They had spent very little time in this vicinity when they were here to buy their land and were very agreeably surprised to see the fine corn crops which they saw from the train as they drew near this section of the country. They consider the corn crops in this part of Minnesota the equal of any they have seen, even in Iowa.

Got Good Water at 170 Feet

The Erickson brothers, who have been engaged in drilling a well on Oscar Hanson's farm, have finished the job and found an excellent water supply at a depth of 170 feet. They spent several weeks drilling in one spot, but abandoned it after meeting with various kinds of hard luck. On starting over again in a new place they had better luck and got down to the water in a hurry. The water in the 4-inch pipe comes to within about 30 feet of the surface. Steady pumping does seem to make any difference in the supply and Mr. Hanson is well pleased.

Grain Yields Run High

Threshing operations are being rushed to the limit every day during this fine weather and the reports from all directions are that grain yields of all kinds are running very high in this vicinity. Wheat runs from 20 to 26 1-2 bushels and some oats over 65 bushels per acre. Send the news of these grain yields to your absent friends and let them know that you are living in one of the garden spots of the earth.

Business Chance.

FOR SALE CHEAP—My property in Holt, consisting of good two-story building, large barn and good lot; centrally located. Cheap, if taken at once. Easy terms.

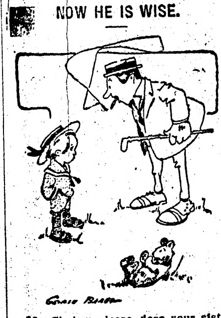
SAM MICKELSON,
Holt, Minn.

Farms Wanted.

I have prospective buyers for a few good improved farms; also for 960 acres of wild land. All must be in eastern Marshall county.

CHAS. W. LATTA, Holt, Minn.

NOW HE IS WISE.



Mr. Shyboy—Jesse, does your sister like to see me better than she does Mr. Huggard?

Jesse (aged nine)—She must, 'cause when he's in the parlor she keeps the gas so low that she can't see him at all.

SPOKE TOO SOON.

"Have you ever seen pink and green monkeys?"

"Certainly not."

"Then you are all right."

"Not so fast, I once saw a couple that were sky-blue."

ITS STYLE.

"I see in some colleges they want to introduce a course in courtship."

"Yes; a system of co-education, as it were."

D. B. Bakke, Pres. S. S. Kolden, Vice-pres.

HOLT STATE BANK

Incorporated June 1st, 1910.

Our List of Customers is Steadily Increasing.

Why pay out $1.50 in fees for a few Money Orders when a check answers the same purpose without a cent of cost to you? We urge everyone to systematize their business and to pay all bills by check. You not only hold a record of your earnings and expenditures during a season, but also hold a separate receipt for each and every check bearing endorsement. Also, by conducting your business on an economical basis, your balance steadily increases. A surplus entered to your credit in your pass book is a most worthy friend to have and far-reaching in its effects within the community, as it places money in circulation among your fellow neighbors.

Your entire banking business earnestly solicited.

SERIAL STORY

The Girl of My Dreams

A Novelization of the Play by Wilbur D. Nesbit and Otto Hauerbach

Novelized By WILBUR D. NESBIT

Copyright by W. D. Nesbit

SYNOPSIS.

Harry Swifton is expecting a visit from his fiancee, Lucy Medders, a Quakeress whom he met in the country. His auto crashes into another machine containing a beautiful woman and a German count. The woman's hat is ruined and Harry escapes. His sister, Caroline, arrives at his home to play hostess. Socrates Primmer, cousin of Lucy's, arrives with a hat intended as a present for Lucy. Harry is trailed to his home by the Count and Mrs. Gen. Blazes, who demands her hat, a duplicate of which she says has been delivered at Harry's house. She is in great fear lest her husband hear of her escapade. Lucy Medders and her father arrive and the count is hidden in one room and Mrs. Blazes in another. Harry is forced to do some fancy lying to keep Lucy from discovering the presence of the woman. The milliner, Daphne Daffington, who proves to be an old flame of Harry's, arrives to trace the missing duplicate hat and more complications ensue. Daphne is hustled into the room occupied by the Count. The latter, with whom Daphne had flirted at one time, demands the return of a ring he had given her on that occasion. She tells him that she gave the ring to General Blazes. As the Count had also given Mrs. Blazes a duplicate of the ring he becomes somewhat excited. Daphne leaves the room and seeks refuge in the one occupied by Mrs. Blazes. Mr. Medder discovers the Count, who is introduced as Harry's German tutor. General Blazes arrives and accuses Harry of concealing his wife. Daphne steps out and the general is dumfounded. Lucy gives way to tears.

CHAPTER IX.

The group stood in a dead silence, broken only by the stifled sobs of Lucy and Carolyn, while the heavy tramp of General Blazes died away in his slamming of the outer door.

Harry shook his head doubtfully, as the Count continued to assure him in dumb show that he could clear things up for him.

"Come, daughter," Mr. Medders said, "thee must quiet thyself. Then we will go home."

"Aren't you going to give me a chance to explain?" Harry asked.

"Explain!" Carolyn blazed forth, looking up at them with her eyes red and her cheeks stained with tears. "Explain! How can you explain? Oh, dear! I never should have gone away to school. I should have stayed at home and done my duty by my brother."

"Nonsense, Carolyn," Harry reproved her. "You simply make things look worse for me by such talk as that."

"How could they be any worse for you!" Carolyn demanded. "Oh, men are wretches! I suppose they are all alike. I thought I could trust my own brother. I—I—even doubt—Pigeon, now!"

The Count smiled grimly at Harry and shrugged his shoulders. Harry looked at him in mute appeal, as though asking him to come to the front now with his plan of squaring things. But the Count was a man of experience. For all his flippancy and gaiety, he was man of experience enough to know that when you are going to defend anything or any position which is being attacked you are better off if you wait until the attacking party has exhausted its ammunition and arguments.

So he bided his time, while Carolyn gradually relieved her mind by means of tears and recriminations, and while Lucy, who was completely mystified, but who felt that something was tremendously wrong, slowly arrived at a state of calm on the haven of her father's shoulder.

Shrewd old Amos Medders, being by birth and training a patient man, said nothing beyond a few soothing words to Lucy. He had concluded to end their visit and take her home, yet he was a fair man and he would give Harry a chance to come from under the cloud, if he could.

"Well, Carolyn," Harry said at last, "if you have finished all you have to say, we will get at the real truth of the matter. Count von Fitz, I think, can tell us something that will at least interest us."

The Count straightened his shoulders and took a deep breath. He twisted his mustache thoughtfully, and then flecked an imaginary piece of dust from his lapel.

"Iff you vill all sit down," he observed, "I can talk bedder. Dare iss no occasion for weepings, nor for attacking Mr. Swifton. Iff anybody shall be attacked, it is me, for vat has happened, and vat may yet happen, iss my fault."

Carolyn resumed her seat, Lucy, with a wondering expression, took a chair, and Mr. Medders, nodding gravely, also sat down. Harry lounged on a settee, and carelessly chewed an unlit cigar.

"It iss like diss," the Count said, as though addressing a jury. "In life dare iss many things vich seem imbossible of explanation, but vich ven ve know vat dey are, do not mean so much."

Mr. Medders bowed assent and Harry looked at the Count with considerable admiration for his self-possession and his control of the situation.

"You haff seen somding," the Count continued, "vich excites natural suspicion und distrust. Ve haff all seen dis. Und, as usual, ven suspicion is aroused, id iss like a swarm of bees—it lighds varever id pleases. Und also somebody geds stung."

He chuckled to himself, but his chuckle did not raise an echo.

"Id vould be easy for me," he said, "to allow you to continue mit der imbressions you haff receifed. But I cannot allow it. Efen at der expense of a wrong imbression of myselluf, I must giff you my explanation—vich you can belief or not belief, as you like. Mr. Swifton iss a man dot you know—a man you vill alvays know throughoud hiss life. Me—I am a strancher. I haff been teaching Mr. Swifton some Cherman—but I resign now as his tutor."

"No, no! I won't have that!" Harry bluffed.

"Unless you accept my resignation, I cannot say vat I vish to say," the Count decided.

Accepting Harry's silence as a confirmation of the alleged resignation, he went, checking off his points as he made them, upon his fingers.

"First, vat do we haff? Ve haff Cheneral Blazes coming here in a great rage, saying his wife is here. He iss assured dot she iss not, und he goes avay."

"Verily, I told him she had not been here. I saw not her nor any other woman—not even that one who—"

Lucy's father patted her hand and ceased speaking. The Count bowed to her and went on.

"Later, Cheneral Blazes returns. He iss sure hiss vife iss here. He has heard from der milliner store dot she iss supposed to haff called up from here on der telumphones. Der rest you all know—or think you know. He demands his vife. He iss again convinced she iss not here, und as he starts oud, he hears a sneeze. Such a sneeze is von dot iss echoed in hiss heart. He beliefs it iss hiss own vife's sneeze. Der door iss opened, und instead off hiss vife, oud comes der milliner! Amazement!"

With a sense of the dramatic unities, the Count paused. The others nodded mutely in confirmation of his summing up of the evidence.

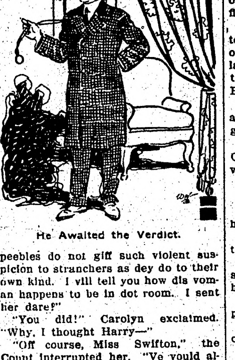
"Vell, den," he resumed. "Vat iss der natural deductions you draw. Darefore, und consequently, our first conclusion iss dot things look plack for Mr. Swifton. Iss it not so?"

They agreed, silently.

"But vy should it be so?" the Count asked, pleasantly. "Iss Mr. Swifton der only man in der house? Iss he der only man in der vorld dot flirts? May I ask vy I, a poor, unknown, unnoticed Cherman—though id iss not so in my own country, I assure you!—iss dare any reason vy I should be neglected in your suspicions?"

Lucy and Carolyn looked at each other triumphantly. Here was a ray of hope for Harry, after all.

"But," the Count went on, "I must beg you not to suspect me as you do Mr. Swifton. I know you vill not for



He Awaited the Verdict.

peebles do not giff such violent suspicion to strainchers as dey do to their own kind. I vill tell you how dis voman happens to be in dot room. I sent her dare!"

"You did!" Carolyn exclaimed. "Why, I thought Harry—"

"Off course, Miss Swifton," the Count interrupted her. "Ve vould always giff der benefit off der doubt to any von but our own folks. Is it not so? Now, vy did I sent her dare? She comes here to see aboud a hat she hass sent to a wrong address. I recognize in her a lady mit whom I haff flirted. You see, I do not hesitate to acknowledge dot I haff flirted. Vy should I? I am in diss country for dot purpose. Ladies flirt mit me—a gallant chentleman vill at least be polite enough to respond. Beauty vas effer a veakness mit me. So! I meet dis lady here—dis milliner. I engage her in conversations. Ve hear some von coming. She cannot get oud. I tell her to hide in dot room a moment. She hides. But dare is no chance for her to get oud. Und at last, ven it seems dot dare vill be a chance, der explosion comes—und you know der rest."

The Count removed his eyeglass and swung it nonchalantly by its cord. He awaited the verdict. He did not look at Harry at all. Smilingly, he studied the wall.

"Dost thee realize that thee has endangered the name of this woman?" Medders asked, in quiet tones.

"Not so," the Count defended himself. "I vas protecting it. Der Cheneral, und all der rest off you, by making her come out—you put her in danger."

"Well," Harry said, after seeming to think the matter over very seriously, "I confess that I am surprised by what you have told us. But I think we should make allowances for you. You are unfamiliar with our view of things and of conduct. What seems right to you may seem utterly wrong to us. I am not defending you, but I am not condemning you. I only ask you, next time you chat with a milliner, not to hide her around here."

This concluding remark of his, accompanied with a sunny smile, broke the tension, but Carolyn almost spoiled everything by saying:

"It sounds reasonable enough, but how does it happen that Harry was so determined no one should go into that room?"

"I haff no answer," the Count replied. "I haff told as much as I should tell."

"It looks to me as if he knew what you had done, and was trying to help you out," Carolyn declared.

"It ill beseems me to offer advice in the house where I am a guest," said Mr. Medders, "but I might suggest to thee that we ask Harry to tell us his side of this story later. It is unfortunate, truly, but I do not doubt that he will explain all to us. Daughter, we will remain here, as we planned, and now let us try to forget this unpleasantness, and make ourselves welcome."

"Thank you, Mr. Medders," Harry said. "I can see that you and Lucy still have a faint suspicion of me—but I can clear that up readily enough."

"I've got more than a faint one," Carolyn told him.

"Oh, well, I don't have to explain everything to you, sis," Harry said, easily. "But arguments are bad on an empty stomach. I happen to know that there's to be a pretty good dinner tonight, so we'll all get ready and eat it."

"You vill excuse me," the Count said. "I must—"

"No, sir!" Harry said, heartily. "I want you to show the folks that you're not half as black as you have painted yourself."

CHAPTER X.

It was a quiet dinner they ate that evening. After much persuasion, the Count had remained. But even his stumbling attempts at witty sallies brought few smiles.

Harry had succeeded in quieting Carolyn's alarms, and she in turn had given her own version of matters to Lucy. And a long talk Harry had with Mr. Medders had helped. Harry would not tell Medders the inside facts, but he told him that later he would make everything plain. At this time, he said, to disclose everything would be to tarnish a woman's name—and Medders partly understood. The good old man was fond of Harry. And he had lived long enough to know that appearances were often deceitful. He was willing to give Harry the benefit of the doubt.

But it was a quiet dinner. After they had left the table Harry succeeded in getting Lucy to come and talk with him in the reception room, and there he begged her to be patient until he felt that the time had arrived for him to make a clean breast of everything to her. At last he coaxed back the smiles to her face, but only after giving his word of honor that so far as he was concerned, the presence of Daphne in his house was not a reflection upon him.

Meanwhile the Count, endeavoring to keep his promise to get Harry out of the scrape, slipped out into the lawn, and by throwing pebbles against the window of the room where Mrs. Blazes was attracted her attention.

She opened the windows, and in an almost hysterical voice, begged him to get her out.

"I vill, iff you only be quiet," the Count said. "Your husband chust vent in. I saw him ven I come out."

"But what can I do?" she asked.

"Trust me!"

"I did," she sighed, "and lost my hat."

"Yess, und I let you haff my ring, too,"

"Bother your old ring!" she answered. "I'll give it back to you. I hate the sight of it!"

"Giff it to me, den," the Count whispered, eagerly.

"I will," she hesitated, "when I get out of here."

The Count swiftly disappeared from view as the front door opened and Harry and the General came down the steps. The General's arm was across Harry's shoulders.

(TO BE CONTINUED.)

A Manly Minister.

There'll be less sleeping done in future in the First Christian church of Los Angeles, because the rector just won't stand for it, as is evidenced by what he did some nights ago. It seems that the worthy man went into the pulpit to discourse, when he was annoyed by two men who were sound asleep in one of the front pews. He called attention to the fact, and one of the sleepers was aroused, and did not transgress again, but his partner did not wake to the rebuke, and quietly slept on. The parson became indignant, and as he had several hymn books in the pulpit with him, he fired one or two at the sleeper, but without avail, and then he unloaded all the books he had at the intruder, to the astonishment of the congregation, who by this time were tittering at a great rate, but the sleeper didn't seem to mind it much, for he looked up, changed his position, and fell asleep again. This is an astonishing case, probably unparalleled in history, but it goes to show that there's a limit to what preachers will stand, even when they are in the pulpit. And they are right. If a man doesn't go to church to worship, he should remain away, and such sacrilegious scamps as sleep, chatter and scandalize should be put out.—New Orleans Picayune.

Good Jokes

FAVORITE FICTION.

"No, I'm Not a Bit Seasick; I'm Staying Out Here on Deck to Get the Fresh Air."

"Yes, Indeed, the Water is Delightfully Warm; I'm Coming Out Because I Promised Mamma I Wouldn't Stay in More Than a Minute or Two."

"It's so Good to Get Back to Work Again After Your Vacation!"

"We Had to Stop at the Chuckstake House Because All the Good Hotels Were Full."

"Boats on This Line Make Close Connection With Trains at Sandville for All Points in the Interior."

"Ml'le, How I Envy You That Splendid Coat of Tan!"

Marked Down.

Two little boys were selling lemonade to earn circus money. A thirsty old gentleman stopped at the stand of the first little boy and drank three glasses of the beverage. He then passed to the stand of the second little boy. "Are you aware," he asked pleasantly, "that the little boy across the way only asks three cents a glass for his lemonade, while you charge five?"

The lad addressed answered very readily: "Yes, I know, mister, but his lemonade is what the puppy fell in."—Metropolitan Magazine.

New Bed Needed.

"During the days of the gold fever in California," said an old sea captain, "our ship was so crowded that you could hardly get a place to sleep. 'Captain,' said a man when we were three days out, 'I have just got to have some place to sleep.'

"'Where have you been sleeping?' asked.

"'I have been sleeping on a sick man,' the passenger said, 'but he's getting better now.'"—Success.

Sounded That Way.

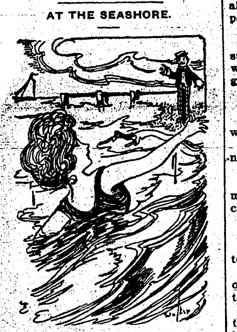
"I have mislaid my fountain pen," said the father.

"I guess mother found it," said the daughter.

"What makes you think so, daughter?"

"Because I heard her say she'd been doing nothing but washing her hands all day."

AT THE SEASHORE.



The Beautiful Girl (floundering about in the surf)—Save me!

The Married Man—You'll have to excuse me. I'm already married.

No Wonder.

How sweetly poets warble
When spring is in the air,
But when they sing of summer's heat,
What fervent looks they wear!

Makes It Embarrassing.

"Why were you so anxious to get away from that man?"

"He's a Socialist."

"I know, but he's a very decent sort. Nothing at all dangerous about him."

"Oh, yes, but I always hate to have to argue with a man who seems to know all about everything."

Embarrassing Effort.

"Good intentions ought to count for something," remarked the generous person.

"But they don't," replied Miss Cayenne. "The most impolite acquaintance I have is one who lets you see what an effort she is making to be polite."

Splendid Generosity.

Harry—You do look nice in this frock, dear, but it cost me a heap of money.

Mrs. Harry—You dear old boy! What do I care for money when it's a question of pleasing you?—London Opinion.

Not a Bad Guess.

"Are you interested in telepathy?"

"Not a great deal, but I can tell you what you are thinking about at the present moment."

"Well?"

"You are thinking, 'I wonder what on earth we can talk about?'"

Getting On.

"That's queer."

"What is?"

"Last week my daughter wrote me from the summer resort that she is engaged to a man named Frank, and in her next letter she calls him John."

An Apology.

"The table looks bare, my dear."

"I know it does; that's why I dressed the salad on it."

Salt, Please.

"I have been in some very hot countries indeed," said the man who can tell 'em, "very hot countries."

"How hot?" asked somebody.

"Well, amazingly hot. I remember once, in India, I think it was, we started a football club, but we had to give it up."

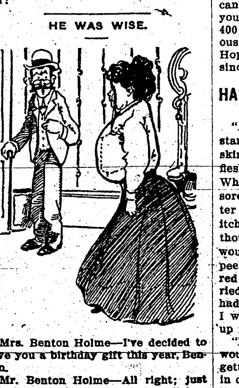
"Too hot to play?"

"Too hot to play! Let me tell you, the heat was so great that the air in the football expanded, and it used to sail right away in the air. We lost half a dozen balls like that."

"Great Scott!"

"Yes. It is a fact. And, of course, we only played football in the winter!"

HE WAS WISE.



Mrs. Benton Holme—I've decided to give you a birthday gift this year, Benton.

Mr. Benton Holme—All right; just tell me what it shall be, and I'll buy it on my way home tonight.

A Brute.

The meanest man I ever saw,
A chap who should be put in jail,
Contrived his wife to overawe
And kept her from a bargain sale.

Educational Qualifications.

"If they can train fleas, I wonder if they can't educate flies?"

"I don't see why not. Flies have already demonstrated arithmetical powers."

"In what way?"

"Don't they multiply themselves, subtract from our food, add to our worries and divide interest with the germ theory?"

A Gleam of Hope.

"I hear that Bilter's daughter eloped with his chauffeur."

"Yes, and Bilter wired his forgiveness."

"What did he do that for?"

"He said he thought now there might be a chance for him to use his car."—Puck.

Didn't Get It.

"So you think you are are entitled to a raise of salary?"

"Yes, sir. I am always the first one here in the morning and the last to leave at night."

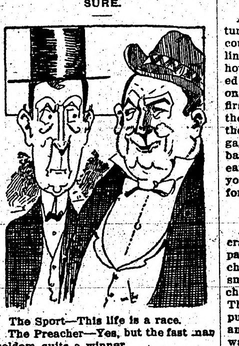
"Oh, that's no argument. I happen to know that your home life is unhappy."

As a Disturbing Element.

Mrs. Ferguson (after the guest had gone)—George, why didn't you ask Dr. Fourthly to say grace?

Mr. Ferguson—I was afraid it wouldn't do, Laura; there were too many things on the table of which Dr. Woods Hutchinson disapproves.

SURE.



The Sport—This life is a race.

The Preacher—Yes, but the fast man seldom quits a winner.

Steering Clear.

I know a certain citizen
Who seldom wears a frown,
But when his wife a party gives
He lingers late in town.

The Kind.

"I understand, Mr. Joblets, that your son's ambition to become an aviator is a great trouble to you."

"Yes, it's a soar affliction."

Harmony.

"Miss Johnson wore such a loud tennis gown to the game."

"I suppose she wanted it to match her racquet."

Detailed Explanation.

"Is this camping out proposition of yours a tentative one?"

"No tents about it; bungalow."

WAS NOT THE WHOLE THING

Sweet Girl in Error When She Imagined Herself Sole Empress of "His" Heart.

She imagined his room with her photograph smiling down at him from over the mantel, while another of her photos looked demurely at him from a leather case on the dressing table.

She could see him often standing in front of her mirrored likeness and making vows of constancy and fidelity. She knew he would rather part with anything he had than those likenesses. But they had quarreled and she felt she must ask him to return her photographs, and she wrote him accordingly.

When she received his reply she nearly fainted. Here is what the wretch wrote:

"Dear Mabel: I would like awfully much to return your photos, but, honestly, you girls all dress and pose so much alike for the camera that I can't tell any two of you apart. If you like, I will send you over 300 or 400 photos that I have of miscellaneous girls and you can pick yours out. Hoping this will be satisfactory, I am, sincerely, etc., etc."—Royal Magazine.

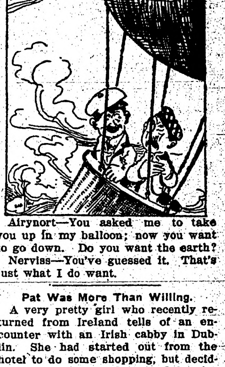
HANDS WOULD CRACK OPEN

"About two months ago my hands started to crack open and bleed, the skin would scale off, and the good flesh would burn and itch dreadfully. When my hands first started to get sore, there were small blisters like water blisters which formed. They itched dreadfully, it just seemed as though I could tear the skin all off. I would scratch them and the skin would peel off, and the flesh would be all red and crack open and bleed. It worried me very much, as I had never had anything the matter with my skin. I was so afraid I would have to give up my employment.

"My doctor said he didn't think it would amount to anything. But it kept getting worse. One day I saw a piece in one of the papers about a lady who had the same trouble with her hands. She had used Cuticura Soap and Ointment and was cured. I decided to try them, and my hands were all healed before I had used one cake of Cuticura Ointment. I am truly thankful for the good results from the Cuticura Soap and Ointment, for thanks to them I was cured, and did not have to lose a day from work. I have had no return of the skin trouble." (Signed) Mrs. Mary E. Breig, 2522 Brown Street, Philadelphia, Pa., Jan. 12, 1911.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 6 K, Boston.

WANTED SOMETHING SOLID.



Airynort—You asked me to take you up in my balloon; now you want to go down. Do you want the earth?

Nerviss—You've guessed it. That's just what I do want.

Pat Was More Than Willing.

A very pretty girl who recently returned from Ireland tells of an encounter with an Irish cabby in Dublin. She had started out from the hotel to do some shopping, but decided instead of make a tour of the city on a jaunting car. Arriving at the first car stand, and having selected the smartest-looking vehicle, she told the driver that she "wanted to engage him for the day." Pat, never backward in paying homage to beauty, earnestly replied: "Begorra, ma'am, you are welcome. I only wish it was for life!"

A Sandwich Filling.

A delicious filling for sandwiches or crackers is made by mixing equal parts of cream cheese and snappy cheese with French dressing to a smooth paste, then stirring in it chopped red peppers or chopped olives. This paste should be very creamy and put on thickly, at least a quarter of an inch. It is nice between salted wafers or on thin rounds of brown or rye bread.

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it

Bears the Signature of Chas. H. Fletcher

In Use For Over 30 Years.

Children Cry for Fletcher's Castoria

Taking No Chances.

"They say that people, through association, grow to look like each other."

"Then I must decline to be engaged to you, Mr. Wombat, even for a couple of weeks."

No man is base who does a true word; for true action is the highestt being.—Henry Giles.

LIFE SAVED BY FRIEND'S ADVICE

About three years ago I suffered with appendicitis and after having an operation performed it left me with a severe case of kidney trouble. I was doctored by several physicians and getting no relief I took the advice of a friend and procured a bottle of Dr. Kilmer's Swamp-Root. After taking the contents of the first bottle I felt greatly relieved and decided to continue it. After using the contents of three more dollar bottles, I experienced a complete cure. I cannot recommend Dr. Kilmer's Swamp-Root too highly to anyone suffering from kidney or bladder trouble.

Yours very truly,
E. P. HILAM.
Cartersville, Ga.

Sworn to and subscribed before me this July 12th, 1909.

CONCRETE IN THE COUNTRY

Cement Talk No. 4

We will send you free upon request, a handsome 116 page book with illustrations, entitled "Concrete in the Country," describing how to build various things out of concrete. It tells in plain, simple language how permanent, enduring structures can be built on your place with cement, sand, gravel or crushed stone. It will pay you to write for this book today and it will cost you nothing except the postal card. Up-to-date people are now building fence posts, barn floors, foundations, cisterns, sidewalks, cellars, stairways, feeding floors, and so on, of Portland cement concrete. Things built of concrete are easily constructed, cheap and everlasting. They cannot be destroyed by fire and make permanent, handsome improvements on any place. Write us today for the free book. Universal Portland cement handled by representative dealers everywhere.

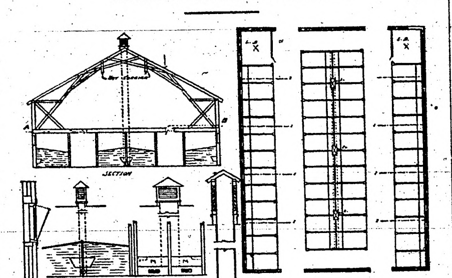
EXCELLENT VENTILATION OF STABLES OF ORDINARY SIZE

Most Satisfactory System is Described and Illustrated—No Plan That Will Automatically Meet All Conditions of Wind and Weather—The Cause of Corrosion of Metal Frames.



Plan of Stable Showing Method of Ventilation—A, Inlets between ceiling joists; B, Inlets on hay floor; C, Window inlets; D, Side section of double stall and exhaust flue; E, Back view, same; F, Exhaust flue and side connection; I, I, I, Location of passage inlets.

For stables of ordinary width, the common and most satisfactory form of fresh air inlet is a sash at each stall hinged at the botton, opening inward, but with galvanized iron pieces attached to the sides of the window frame, so that the only air admitted has to take an upward course over the top of the sash, writes George F. Weston in the Country Gentleman. This prevents direct drafts. A piece of chain stapled to the top of the frame, with a beheaded wire nail projecting from the top of the sash, allows the window to be opened any number of links. The free edges of the metal side plates are turned upward so as to make a stop that prevents the windows from falling open too wide.

There is no system of ventilation that will automatically meet all conditions of wind and weather, which at times will call for the closing of all windows to windward, and opening of those on the sheltered side a mere crack. In winter when the horses come in hot, and, in the case of work horses, cannot be rubbed quite dry, it will often save colds to keep everything tight until they are dry and have cooled off. The stable shown in the illustration is an extra wide one, and to secure sufficient fresh air inlets for the central double row of horses, it may be necessary to make ducts from the outside to the openings in the ceiling over the center of each passage, about 14 by 20 inches, and marked I, I, I in the plan. These can be closed by a board, with pin sliding on bottom of inside. The easiest way to make these ducts is to enclose between two ceiling joists, or if this cannot be done, make as at B on hay floor above.

The exhaust flues for a stable of this design should be three in number, about two feet six inches by one foot six inches, extending from bottom of manger clear to the roof. Each one connects with lateral flues below manger, so as to tap eight stalls, and the openings to each stall should increase in size as they leave the main flue, and be screened with half-inch wire netting to keep out rats. All main exhaust flues in a stable should also have two or the opposite sides made with a door just below the ceiling, and two feet down, so that this can be opened up against the ceiling and take out all hot air in summer. Frequently the hay chutes can be so arranged as to serve also for exhaust flues by having a tight-fitting door at the hay floor, which is only opened for feeding. They can be of galvanized iron as far up as the ceiling of stable, but in such a climate as Canada, where the upper space is much lower in temperature, should be of wood, and it may even pay to cover with a couple of layers of heavy building paper.

It is well to remember that ventilating flues only work when their air contents are at a higher temperature than the outside air. This means that the air is expanded and is of lesser weight than an equal column of the colder outside air. Finally there must be a material difference in temperature, for the stable air is loaded with moisture and products of animal combustion. There have been cases in northern winters of the metal flues being almost entirely stopped by condensed moisture deposited as ice on the inside top end. The best results are secured from many small inlets, instead of the few larger ones, especially as to prevention of injurious drafts.

Moisture condensed during cold weather is the cause of the corrosion of metal frames, and we suggest giving them a couple of coats of asphaltum paint over the interior surface, especially on the sash bars. When of metal the expansion of these is so much greater than of the glass that it is impossible to get a perfect seal or seat between these and the glass, and as a result there have been put on the market many special forms of metal sash to remedy the trouble of drip from condensed moisture. Under some conditions, cypress bars may be more durable than iron.

TO DESTROY GROUND HOGS

May be Poisoned With Wheat Soaked in a Solution of Strychnine—Also Easy to Trap Them.

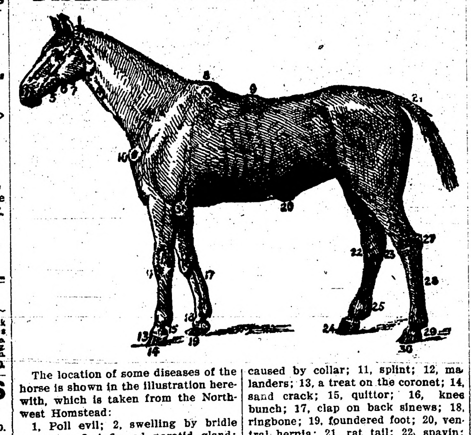
(By WALTER B. LEUTZ.)

Ground hogs may be poisoned with wheat soaked in a solution of strychnine, but they can easily be trapped at the entrance of their burrows. A better way is to soak a bit of moss or hay with bisulphate of carbon and place it well down into the burrow covering the entrance with a heavy cloth. The carbon being heavier than air it penetrates to the bottom of the burrow and kills the animals instantly. Great care in handling bisulphate of carbon must be observed because it is a deadly poison and must never be inhaled. The bottle containing it should be kept tightly corked until the moment it is to be used.

Strength of Mule.

The average mule will do as much work when two years old as the horse will at three or four.

DISEASES OF HORSE LOCATED



The location of some diseases of the horse is shown in the illustration herewith, which is taken from the Northwest Homstead:

1, Poll evil; 2, swelling by bridle pressure; 3, inflamed parotid gland; 4, inflamed jugular vein; 5, caries of the lower jaw; 6, fistula of parotid duct; 7, bony excrescence; 8, fistula of withers; 9, saddle gall; 10, tumor caused by collar; 11, splint; 12, malanders; 13, a treat on the coronet; 14, sand crack; 15, quittor; 16, knee bunch; 17, clap on back sinews; 18, ringbone; 19, foundered foot; 20, ventral hernia; 21, rat tail; 22, spavin; 23, curb; 24, quarter crack; 25, thick leg; 26, malanders; 27, capped hock; 28, swelled sinews; 29, grease; 30, sand crack; 31, tumor of elbow.

HUBBY QUICK TO SEE POINT

Most Married Men Will Understand Just Why That Particular Hat Was So Becoming.

Mrs. Jones came downstairs one evening, after dinner, and displayed herself to her husband, embellished with the result of her all-day skirmishing in the milliners' shops.

"John," she asked, "how do you like this hat on me?"

"Oh, I don't know," he answered. "Have you bought it?"

"No, not exactly. I brought it home on approval. I intend to take either this or another one, which is five dollars more than this, but I thought—"

"Say, Florence," he interrupted, "that's the most becoming hat I ever saw you have on. Telephone to them first thing in the morning that you'll take it, so as to make sure they'll not sell it to anybody else."—Youth's Companion.

WHY BE WEAK?

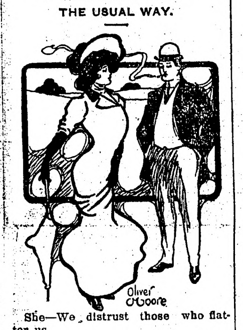
Why suffer backache, headache, dizziness, weariness, urinary irregularities and other troubles that arise from disordered kidneys? Doan's Kidney Pills have cured thousands. John O. Sedain, Modesto, Cal., says: "I was so weak I staggered like a drunken man. I ran down in weight from 176 to 137 pounds. I had practically no control over the kidney secretions and the pain in my back was terrible. I became a nervous wreck and was given up by our best physicians. Like a drowning man grasping at a straw I began using Doan's Kidney Pills and steadily improved. In a few months' time I was back at my old weight. Doan's Kidney Pills cured me and I give them the entire credit."

Every Picture Tells A Story

Remember the name—Doan's.

For sale by druggists and general storekeepers everywhere. Price 50c. Foster-Milburn Co., Buffalo, N. Y.

THE USUAL WAY.



She—We distrust those who flatter us.

He—And dislike those who do not.

Knew Just What to Do.

A parlor lamp which did duty for the same young man seven nights in the week had struck and was slowly going out. The red glow grew fainter and fainter, and as the shadows merged one by one into the gloom a weird and eerie feeling crept into the young girl's soul. "George," she asked, in tones that were tremulous with suppressed agitation, "what would you do if you were strapped hand and foot in a chair while a candle, stuck in the top of a keg of gunpowder a foot from your head, burned slowly down and down and down?"

And Georoge, who has been gazing expectantly at the lamp, answered, "I would blow it out."

She shivered.

FOUND RIGHT PATH

After a False Start.

"In 1890 I began to drink coffee.

"At that time I was healthy and enjoyed life. At first I noticed no bad effects from the indulgence but in course of time found that various troubles were coming upon me.

"Palpitation of the heart took unto itself sick and nervous headaches, kidney troubles followed and eventually my stomach became so deranged that even a light meal caused me serious distress.

"Our physician's prescriptions failed to help me and then I dosed myself with patent medicines till I was thoroughly disgusted and hopeless.

"Finally I began to suspect that coffee was the cause of my troubles. I experimented by leaving it off, except for one small cup at breakfast. This helped some but did not altogether relieve my distress. It satisfied me, however, that I was on the right track.

"So I gave up coffee altogether and began to use Postum. In ten days I found myself greatly improved, my nerves steady, my head clear, my kidneys working better and better, my heart's action rapidly improving, my appetite improved and the ability to eat a hearty meal without subsequent suffering restored to me. And this condition remains.

"Leaving off coffee and using Postum did this, with no help from drugs, as I abandoned the use of medicines when I began to use the food drink." Name given by Postum Co., Battle Creek, Mich.

"There's a reason," and it is explained in the little book, "The Road to Wellville," in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

GETS FINE POSITION.

Ed. Cosgriff, who went to Fargo to take the Dakota Business College training course, has just been sent to an excellent position as bookkeeper for the big Manchester Biscuit Co. Ed. says he now realizes the truth of the saying, "To get the best position, you see, you must attend the D. B. C."

A Gleam of Hope.

"I hear that Bilter's daughter eloped with his chauffeur."

"Yes, and Bilter wired his forgiveness."

"What did he do that for?"

"He said he thought now there might be a chance for him to use his car."—Puck.

Woman's Danger Periods Made Safe

By Lydia E. Pinkham's Vegetable Compound

The Change of Life is the most critical period of a woman's existence, and neglect of health at this time invites disease.

Women everywhere should remember that there is no other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs. Here is proof:

Natick, Mass.,—"I cannot express what I went through during the Change of Life before I tried Lydia E. Pinkham's Vegetable Compound. I was in such a nervous condition I could not keep still. My limbs were cold. I had creepy sensations and could not sleep nights. I was finally told by two physicians that I had a tumor.

"I read one day of the wonderful cures made by Lydia E. Pinkham's Vegetable Compound and decided to try it, and it has made me a well woman. My neighbors and friends declare it has worked a miracle for me. Lydia E. Pinkham's Vegetable Compound is worth its weight in gold for women during this period of life. If it will help others you may publish this letter."—Mrs. Nathan B. Greaton, 51 No. Main St., Natick, Mass.

ANOTHER SIMILAR CASE.

Cornwallville, N. Y.—"I have been taking Lydia E. Pinkham's Vegetable Compound for some time for Change of Life, nervousness, and a fibroid growth.

"Two doctors advised me to go to the hospital, but one day while I was away visiting, I met a woman who told me to take Lydia E. Pinkham's Vegetable Compound. I did so and I know it helped me wonderfully. I am very thankful that I was told to try Lydia E. Pinkham's Vegetable Compound."—Mrs. Wm. Boughton, Cornwallville, N. Y., Greene Co.

The makers of Lydia E. Pinkham's Vegetable Compound have thousands of such letters as those above—they tell the truth, else they could not have been obtained for love or money. This medicine is no stranger—it has stood the test for years.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills. No sick woman does justice to herself who will not try this famous medicine. Made exclusively from roots and herbs, and has thousands of cures to its credit.

Mrs. Pinkham invites all sick women to write her for advice. She has guided thousands to health free of charge. Address Mrs. Pinkham, Lynn, Mass.

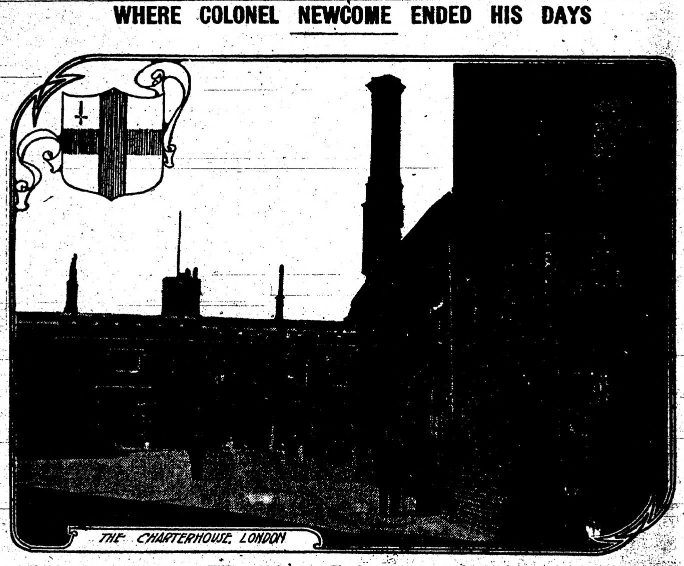
WHERE COLONEL NEWCOME ENDED HIS DAYS



IN this, the centennial year of William Makepeace Thackery, visitors to London have been especially eager to seek out the places intimately connected with the books of the great novelist. One of these is the Charterhouse, a hospital for poor gentlemen founded by Thomas Sutton in 1611. To this retreat Colonel Newcome in "The Newcomes" goes to end his days after the loss of his fortune. Thackeray draws a touching picture of the colonel's life among the Poor Brothers, and of his death in a room in the old buildings. In the accompanying photograph the buildings at the right date from the medieval Cartusian monastery, and those in the background are more modern dwellings for the Poor Brothers.

DREAM REVEALS $300

Lost Money Found in Home of the Accuser.

Police Are Not Convinced and Arrest of Furniture Dealer Is Ordered After Investigation of Mystery.

St. Louis.—When Assistant Chief of Police Gillaspy declined to allow his prosaic conception of things to be swayed by any suggestion of the occult and in consequence ordered the arrest of Louis P. Brasch, thirty-three years old, who conducts a furniture store at 2618 Franklin avenue, he spoiled a good "dream" yarn.

Brasch was arrested at 1926 Montgomery street, his home, by Special Officers Doyle and Murphy of the Dayton station and Ira Cooper of headquarters after the latter had worked up the case.

Brasch is accused by the police of being responsible for the departure of three $100 bills from the home of Mrs. M. E. Nichols, living at 1702 Chestnut street. Mrs. Nichols said that Brasch called at her house to collect a $10 bill, and she said she placed the three big bills on her bed while paying the smaller amount. The bills disappeared. She searched for them and even went to Brasch's store.

Brasch, she said, denied all knowledge of the bills, and said Mrs. Nichols must have misplaced them. He said she ought to search the house thoroughly before making any such accusation. Mrs. Nichols then told the police about the case, and Cooper went with her to the Brasch store. He and Mrs. Nichols claim that Brasch again insisted that Mrs. Nichols was mistaken.

"I am so convinced that you have misplaced the money that I will be willing to pay $250 for the privilege of searching your house on the chance of find the $300," Brasch is said to have declared.

Mrs. Nichols wanted to take him up, but Cooper would not permit. He says that he and Mrs. Nichols left the Brasch store and that Brasch and his wife followed, Brasch all the way pleading with Mrs. Nichols to make no accusation until she had thoroughly searched her home. At the house Mrs. Brasch asked to be allowed to search.

"I had a dream about this money," she is said to have declared. "I am good at finding things, and this dream ought to lead me to it."

She asked the way to the parlor and inquired if there was a bookcase there. Mrs. Nichols said there was. Mrs. Brasch went into the room. She told Mrs. Nichols the money ought to be in the bookcase, if the dream were true. Then, the officer and Mrs. Nichols state, Mrs. Brasch went to the bookcase. She fumbled in it for a moment and then with a cry fell back, apparently half fainting.

"There it is. Look there. Didn't I tell you I could find it? I am good at finding things," Cooper said Mrs. Brasch cried.

Mrs. Nichols went to the spot indicated and there found the three missing bills. She was positive she had not placed them there. Brasch and his wife were equally as positive they had not put the bills there, and so Cooper decided to put it up to Chief Gillaspy. He brought Mrs. Nichols and the bills to headquarters. After Gillaspy had heard the story he ordered the arrest of Brasch.

Brasch is well connected here and both he and his wife insist the police and Mrs. Nichols are wrong.

Mrs. Brasch is gifted with a remarkable mind for finding lost articles. A few months ago her husband lost a valuable diamond stud, which Mrs. Brasch found in a joist of the ceiling of a new-erected addition to their home. Shortly afterward she found a $20 bill in a handkerchief which her husband had thrown into a clothes hamper.

BLOW WINS MAN AND MONEY

Railroad Gate Figures in Pretty Little Romance Having Its Inception at Spokane, Wash.

Spokane, Wash.—A slap in the face has won for Miss Marjorie R. King of Spokane a husband, a happy home and $125,000.

One of the prettiest romances ever known in Spokane, starting with an accident, culminated the other afternoon when Rev. E. L. House of the Westminster Congregational church joined in wedlock John H. Starbird, partner of T. E. Westlake in the grocery and provision business, and Miss King, a Spokane hairdressing expert. Starbird is forty-five years of age and was a widower, while the new Mrs. Starbird is twenty-three.

While riding in Starbird's automobile the machine approached the railroad crossing. The gates were open and the party started to cross the tracks. Then the long arm of the wooden gate fell across the automobile just in time to strike Miss King, the blow knocking her unconscious.

Starbird rushed the injured girl to his home, thus starting the romance. In 1896 Starbird caught the Klondike fever. He brought back something over $125,000.

"Boy" Rooster Angers Town.

Philadelphia. — Maurice Megonigal, the eight-year-old son of Charles Megonigal of Lansdowne, a suburb, has developed an obsession for crowing like a rooster and cackling like a hen.

All the birds answer him, causing such a din in the neighborhood that all of the residents are up in arms, declaring his crowing and cackling are becoming a nuisance.

Maurice says he cannot help it as he was born with a proclivity to crow and he expects to keep on crowing until he dies.

OIL ON ROAD KILLS FLIES

Expert of Massachusetts Town Says Tarvia Destroys Eggs and Larvae of Little Insects.

Lenox, Mass.—A Lenox entomologist asserts that the absence of flies along oiled highways is due to the destruction of the eggs and larvae by the application of tarvia and the byproducts of oils which are being used to prevent dust. After conducting a series of experiments the Lenox man has found that there is almost a total absence of the stable or biting fly.

The Lenox experimenter says that tarvia has practically killed the breeding places of the stable fly and that there are fewer house flies.

Since it has been established that typhoid germs are carried by flies, also Asiatic cholera, and that there is strong evidence that the fly is also the carrier of tuberculosis and other diseases, the discovery that oiling highways lessens the common fly and almost entirely exterminates the stable fly appears to be of the highest importance.

Tot Falls Seven Stories.

New York.—Delena De La Monte, seven, fell from the roof of her home, seven stories to the pavement. She was picked up unhurt and crying because her dress was dirty. The girl struck a clothes line during the descent, breaking the fall.

Germans on Tour.

Berlin.—The Union of Merchants and Industrialists, the leading commercial association of Berlin, is planning to visit the United States.

DEATHS FROM HEAT

Records of Many Decades for Fatalities Are Broken.

Munich Savant Says High Temperature Depletes Body of Necessary Salt—Speaking Stones Cause Much Alarm.

London.—When the statistics from the various European countries are gathered it probably will be found that last month beat the records of many decades for heat fatalities. Following on the theory that the living human organism is merely a compound of chemical combinations, Dr. George Hirth, a Munich specialist, propounds a new explanation of the direct cause of death from heat stroke, which he attributes to electrolytic disturbances due to the abstraction of salt from the system.

His investigations show that persons who perspire copiously, especially those who perform heavy physical labor in hot weather, may lose in the course of a single day thousands of grams of moisture containing from two-thirds to four-fifths of 1 per cent. of salt. He comes to the conclusion that the human body under these conditions may lose as much as thirty grams, and in extreme cases forty grams of salt a day, an amazing quantity, which is not replaced in the ordinary course by food.

Drinking large quantities of water is of no avail; although it has this advantage, that water attracts the remaining salt reserves of the body and prevents thickening of the blood, which otherwise would cause giddiness, the first warning of impending heat collapse.

Dr. Hirth recalls that some forty years ago the inmates of some German prisons were deprived of salt, under the mistaken notion that salt was a luxury, not a necessity. The consequence was that prisoners collapsed with precisely the same symptoms as those observed in heat stroke. He further adduces in support of his theory the fact that indulgence in alcohol in hot weather enormously increases the danger of collapse, this being explained by the fact that alcohol is an enemy to the saline electrolyte.

Dr. Hirth expresses the opinion that heat stroke means simply starvation of the body for lack of salt.

Superstitious persons have been alarmed by the simultaneous appearance, near Paris and Lisbon, of the so-called "speaking stones"—rocks in the river beds of the Seine and the Tagus, which only come in sight during a severe drought and which, legend says, indicate further heat and drought to come, with death and disease in their train.

The French stone has chiseled upon its surface the words: "Whoever sees me shall weep, for the world has wept whenever I was seen." The stone was last noticed in 1870. The Lisbon stone was observed in 1755, when an earthquake destroyed the city, and since then only once for a short time, in 1872. It bears the inscription: "Whoever sees me knows that I foretell evil."

ORIGIN OF A SONG

History of "The Little Brown Church in the Vale."

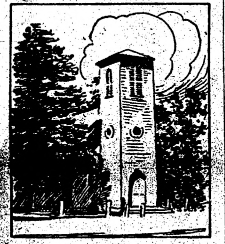
Touching Little Ditty Composed by an Iowa Physician Fifty Years Ago Has Since Been Sung Around the World.

Des Moines, Iowa.—Not so very long ago the writer attended a great religious convention. There were thousands of people in attendance. There were great speeches and great singing. The influence of this great meeting was so inspiring that hundreds of men marched the streets with banners bearing appropriate mottoes. Nearly every convention has a favorite song. The favorite song at this convention was, "The Little Brown Church in the Vale," and it was sung with an enthusiasm that would make any one want to come to the church in the wildwood or anywhere else where a church might be located.

The town of Bradford, Iowa, has to do with the history of the song. The homes in this little village, as easterners would call it, are of the New England type and shelter a class of people who stand for moral, intellectual and religious development.

In 1859 or 1860—or thereabouts—the good people of Bradford resolved to build a church where they might worship God and teach their children the importance of Christian living and Christian service. The times were close and the people were poor; but, being "masters of circumstances and not their abject slaves," they conquered the hard times and their poverty by donations of stone, lumber, hardware, paint, and labor. The Congregational Church Building Society came forward with a generous donation of money, and the little brown church was ready for dedication without debt.

A little to the south of Bradford lies the little town of Fredericksburg. In this little town, surrounded by one of the most fertile farming regions in the world, lived a physician, W. S. Pitts. He was born in New York, received his degree from Rush Medical College, and, pitching his tent in Fredericksburg, Iowa, gave forty of the best years of his life to his profession.



The Little Brown Church.

Dr. Pitts was quite a noted man and had a large and increasing practice. His round of calls included Bradford. He was well acquainted with her people and took a lively interest in everything that pertained to their welfare. He heartily seconded their efforts in building the little church. Dr. Pitts was also a man of musical and literary turn of mind. Just prior to the dedication of the church he was inspired to write a song to be used on dedication day. He said, speaking of his songs, "I call them inspirations, as they came to me with force, and I had to write them out."

The name of the song may not have been less inspired. The little church is surrounded by large, stately trees whose overhanging branches have sheltered both it and its worshippers from the hot rays of the summer's sun and the cold blasts of the winter's wind. And as he thought of this little sanctuary surrounded by these great giants of the forest whom God planted there, as if to protect His chosen ones from harm, he penned this title, "The Little Brown Church in the Vale," to his song and wrote:

There's a church in the valley by the wildwood,
No liveller place in the dale;
No spot is so dear to my childhood
As the little brown church in the vale.

How sweet on a bright Sabbath morning
To list to the clear ringing bell;
Its tones so sweetly are calling,
Oh, come to the church in the vale.

There, close by the church in the valley,
Lies one that I loved so well;
She sleeps, sweetly sleeps, 'neath the willow;
Disturb not her rest in the vale.

There, close by the side of that loved one,
'Neath the tree where the wild flowers bloom,
When the farewell hymn shall be chanted
I shall rest by her side in the tomb.

CHORUS.
Oh, come, come, come, come,
Come to the church in the wildwod,
Oh, come to the church in the vale;
No spot is so dear to my childhood
As the little brown church in the vale.

This little bit of history will correct a wrong impression that "The Little Brown Church in the Vale" is only a child of the imagination, and to assure all that it is "a sure enough church," and can be seen by any one who will make a pilgrimage to Bradford. "The Little Brown Church" still remains as a monument to the enterprise and devotion of the pioneer Christians of the vicinity of Bradford.

THE KITCHEN CABINET

HE THAT commends me to my own content,
Commends me to the thing I cannot get.
—Shakespeare.

"To market, to market to buy a fat pig."

WE GO A MARKETING.

It is wise to decide before making the visit to the market just what and how much is wanted. There will be plenty of opportunity to change the mind when you find there is nothing in the market that you had planned for.

It is not always possible to visit the market yourself, but it pays in quality and it pays in price when those visits can be made.

The experienced buyer notices the amount of bone, gristle and other waste which certain cuts have, and she will consider the family to be served, the amount likely to be consumed and what may be done with the left-over meat.

If you see the meat cut and weighed you will then know what you have bought.

The one who takes the trouble to do her marketing in person has the pick of the choice things, and those who telephone must take what is left.

Beef to be good should be a bright color, the grain of the meat fine and the fat, yellowish white. Meat that has a fat, mottled appearance is doubtful. The suet of a good animal is white. Good beef is elastic to the touch and will not leave the impress of the finger when removed, although very tender beef may be easily pierced by the finger when pressed too hard.

If you have a good-natured butcher, he will not object to your looking over the meat; they appreciate an intelligent buyer, and the wiser they are in their business the more they enjoy a customer who wants to learn to buy intelligently. Mutton is known at a glance. Bright, crimson red, the fat white and firm. If you can get a sight of the liver it will tell of the state of health better than any other test.

Veal should never be eaten when hung more than a few days in summer, as it taints very quickly. If eaten too fresh it is apt to be tough and should be at least an animal of six weeks before marketing.

In testing fowls, a pliable breast bone is a good test if it isn't broken, a test some butchers use to deceive. The skin should be clean, the fowl plump and the legs and feet pliable, and the spurs short in young fowls.

Practice makes perfect in marketing as in other things.

WHY man, she is mine own!
And I as rich in having such a jewel
As twenty seas if all their sands were pearl.

THE PICNIC PARTY.

In these days of swift transportation by auto, when a few friends, a shady nook at the water's edge is found, the picnic hampers unloaded and the men of the party hunt up the drift wood for a good fire, all are ready for the hearty picnic supper.

By digging a hole in the ground, laying in a few stones and covering with coals, a fireless cooker can be improvised for roasting corn and potatoes the like of which is hard to beat. A good stove is made with a piece of heavy screening or a piece of sheet iron. Build a fire and place several rocks to support the stove, then set on the coffee pot and the pail of water or the frying pan, and everything may be cooked in a short time.

Aluminum cups and plates are light, but more expensive than the paper goods of which there is now an assortment.

A picnic is not a dinner party, and when one tries to make it one the joy of the outing is spoiled.

The thermos bottles, which will carry hot or cold drinks, are very nice for a picnic.

The usual picnic dishes are those that may be carried easily. Sandwiches are the main starter, and fruit of all kinds is always appreciated.

Chicken sandwiches are usually the preferred of all kinds. Lamb also makes a good sandwich filling.

Cream cheese with olives or stuffed olives and walnuts all put through the meat chopper make a delicious filling mixed with mayonnaise dressing.

Deviled eggs each wrapped in waxed paper and sections of orange prepared at home and wrapped in waxed paper are nice little relishes.

Fried chicken, each piece wrapped in a waxed paper, is a very nice way to serve that always popular dish.

Small sponge cakes that have been hollowed out and the centers filled with whipped cream, then the slice from the top replaced, make a dainty dessert with fresh berries or fruit.

Nothing tastes better than good rich doughnuts well sugared, with a hot cup of coffee for dessert.

When one is picnicing the simple, wholesome, old-fashioned substantials are those most aprpeciated.

KNOW ye not that a little leaven leaventh the whole lump.

Birth does not determine destiny.

All things are possible to a sound body.

CARING FOR PEACHES.

To each pound of pared and sliced fruit add three-quarters of a pound of granulated sugar. Add a cup of water to the sugar, and when boiling hot add the peaches. When thoroughly scalded remove the peaches and cook the sirup until thick and clear. Fill the jars with the peaches and pour over the boiling sirup, and seal.

Peach Marmalade.—For every pound and a quarter of fruit add three-quarters of a pound of sugar. Remove the skin and pits from the peaches, add to the sugar and a cup of water, and cook until smooth. Stand on the back part of the stove and simmer for an hour. Add the juice of a lemon, then put into glasses. Seal by covering with writing paper wet with flour and water. This method keeps the glasses free from mold.

A delicious pie made from the fresh peaches sliced, is prepared as follows: Bake a good rich shell of pastry and fill it with the freshly prepared fruit; sweeten and heap sweetened whipped cream flavored with almond over the top.

Peach Ice Cream.—To a pint of cream sweetened to taste, add a cup of peach pulp that has been put through a sieve, and a tablespoonful of lemon juice added. Freeze as usual. Equal parts of peaches and apricots make a nicely flavored dish when frozen.

Baked Peaches.—Peel, cut in halves, remove the stones and place in a granite pan. Fill each cavity with a teaspoonful of sugar, one-half a teaspoon of butter, a few drops of lemon juice and a grating of nutmeg. Cook twenty minutes, and serve on pieces of buttered toast.

Brown Betty with peaches is delicious. One may use cake crumbs instead of bread. Butter a baking dish and put in a layer of peaches, then a layer of cake crumbs, a sprinkling of brown sugar and nutmeg. Repeat until the dish is full, leaving the crumbs on top for a finish. Bake until heated through.

OH, IT is excellent
To have a giant's strength; but it is tyrannous
To use it like a giant. —Shakespeare.

DISHES NEW OR UNUSUAL.

We are constantly looking for new dishes to vary the monotony of our diet. The following are some that will appeal to the tastes of some.

A Farmers' Dainty Dish.—The size of the pot will depend upon the size of the family and its appetite. Peel and slice five potatoes and one small onion; take half a pound of sweet salt pork, cut in thin slices, a pound of veal or beef cut in small pieces; shorten some bread dough and line the bottom of a greased stew pan, put in a few slices of pork, then a layer of meat, potatoes and onion; dust with pepper and salt and cover with a layer of bread dough. Repeat until the dish is full; finish with a crust on top and pour over sufficient boiling water to cover. Cook at the simmering temperature until the vegetables are soft.

The season for venison will soon be here. Just try this when you are fortunate enough to have a steak: Rub the steak with a little butter, and lay it in a hot pan; when cooked on one side turn it over and add a tablespoonful of orange juice and two of currant jelly. Simmer gently for about twelve minutes. Season with salt and pepper and serve.

This is a nice dish for a chafing dish party and can be easily prepared at the table.

Rabbit With Herbs.—Cut a rabbit in pieces and place it in a stew pan with butter, parsley, chives, mushrooms, bayleaf and thyme chopped fine. Add sufficient water to cook, and simmer until the rabbit is tender. When ready to serve add a spoonful of flour to the gravy to thicken it.

Wild duck are delicious roasted without stuffing, using instead a bunch of celery in each bird. Do not serve the celery.

Wil duck is better served a little more underdone than tame duck

Oxtail Soup.—Take two tails and put into a kettle with a gallon of water and a little salt. When the meat is well cooked take out the bones, add onion, carrot and tomatoes and boil an hour longer.

Nellie Maxwell.

Flowers of the Sea.

The sea has flowers as the land has, but the most brilliant of the sea flowers bloom not upon plants, but upon animals. The living corals of tropical seas present a display of floral beauty which in richness and vividness of color and variety and grace of form rivals the splendor of a garden of flowers.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, SEPTEMBER 22, 1911 NO. 8.

STOLYPIN IS SHOT

ATTACKED WHILE ATTENDING A THEATER AT KIEV—EMPEROR ALSO PRESENT.

ASSASSIN UNDER ARREST

Is the Third Attempt to End the Life of Much-Hated Official of Czar Nicholas.

Kiev, Russia. — The Russian premier, P. A. Stolypin, was attacked while attending a gala performance at the opera. He was wounded twice by his assailant. One bullet entered his hand, while the other penetrated the body, grazing the liver and lodging in the spine. The premier's wounds are mortal. Emperor Nicholas was present in the theater at the time. The premier's assailant was arrested.

The two bullets were fired from behind by a lawyer named Bogrof. The audience tried to lynch the assassin. Some reports have it that a musician also was wounded.

The minister of finance, M. Kokovsoff, was sitting beside the premier at the time of the attack.

This is not the first attempt against the life of Premier Stolypin. When he was governor of Saratov in 1905, three shots were fired at him, but without effect.

On Aug. 25, 1906, a bomb was thrown when Stolypin, then premier, was holding a public reception at his country house on Apterkarsky island. The premier was slightly wounded. Thirty-two persons were killed and a still larger number wounded. Among the latter was the premier's 15-year-old daughter and his three-year-old son.

When Stolypin accepted the premiership in July, 1906, he was perfectly conscious of his danger. As Stolypin outlined the policy of the government it was to be one of "strong handed reform." He promptly issued [illegible] directing them to spare no efforts to prevent disturbances.

As minister of the interior, prior to taking over the premiership, he was assailed in the duma, in making his first speech, with cries of "murderer!" and "assassin!" when he defended the alleged illegal acts of police officials and provincial governors in the suppression of disorder.

The retaliatory steps which he took against the terrorists and liberals alike won him the detestation of the administration. "Stolypin's necktie" became the synonym of the hangman's noose throughout Russia.

ALLEGED ASSAILANT CORNERED.

Canadian Posses Ask for Reinforcements to Capture Man.

Manitou, Manitoba. — Word was received that "Bill" Wilson, the alleged assailant of Miss Eleanor Gladys Price, who was held captive in the woods near here for 30 hours, has been sighted and positively identified at Bluff, 12 miles south of Snow Flake, in the Pembina valley. "We have got him surrounded, but we want more men so that we can overawe him with numbers," is the appeal brought here. A large posse was hurriedly organized and started for Bluff.

Manitou, Man., Sept. 18.—Word was

CARL MORRIS NO GOOD.

Another "White Hope" Meets His Waterloo.

Madison Square Garden, N. Y. — Jim Flynn, the Pueblo fireman fought a winning battle of ten rounds with Carl Morris, the gigantic heavy-weight of Oklahoma. As a possible "white hope" for championship class recognition Morris proved a failure. He had nearly fifty pounds in weight and five inches in height over the Pueblo man, but failed to daze Flynn at any stage.

Clubman Becomes An Aviator.

St. Louis, Mo. — Flying in a rising gale at Kinloch field, with lightning flashes illuminating the aviation plain, Albert B. Lambert, president of the Aero Club of St. Louis, rode a Wright biplane through five figure eights and qualified for an aviator's license. The millionaire clubman already holds a balloon pilot's license. Mr. Lambert is the fifth man in the United States to qualify both as an aviator and balloon pilot and is said to be the first aero club president in the Aeronautic federation to qualify as an aviator.

Beasts Escape From Cage.

Ottawa, Ontario. — Five ferocious animals at the Ottawa exhibition broke loose and caused a panic among the employes in the shows. The only one injured was an American, Captain Herbertine, chief trainer, who was scratched on the leg by a lion.

GOVERNORS GOING EAST

SPECIAL TRAIN TO LEAVE ST. PAUL WITH EXECUTIVES.

Population Centers to Be Made Acquainted With Northwestern Men and Products.

St. Paul, Minn. — Former Governor Brady of Idaho and Reilly Atkinson, secretary of the Commercial club of Boise, Idaho, conferred with Louis W. Hill, president of the Great Northern road, and announced that plans have been perfected for the running of a governors' special to eastern cities and land shows this fall.

The train will consist of four exhibition cars, in which products of the Northwest will be exhibited, an observation car, dining car, two standard sleepers, and a baggage car. It will leave the Twin Cities about Nov. 20 on a 5,000-mile tour to Chicago, Pittsburg, Philadelphia, New York city, Rochester, Buffalo, Indianapolis and about twenty other eastern cities to be decided upon later when the itinerary is decided upon.

Eye-Opener for East.

The purpose of the trip is to extend through the governors and state representatives a cordial invitation to the people of the east to visit the west and get acquainted with its varied agricultural and industrial advantages.

The exhibits are incidentals to the social features and intended only to indicate the nature of the resources of the various states. Those aboard the special will be Governor Hawley of Idaho, Governor Johnson of California, Governor West of Oregon, Governor Norris of Montana, Governor Hay of Washington, Governor Eberhart of Minnesota, Governor Burke of North Dakota, Governor Shafroth of Colorado, Governor Carey of Wyoming, Governor Oddie of Nevada and Governor Vessey of South Dakota.

United States senators, state immigration agents, newspaper publishers and prominent public citizens will also accompany the party.

The "get acquainted" special idea belongs to Governor Brady, and is backed by the Western and Northwestern Development leagues, which represent practically all the cities and industrial and commercial interests of these states.

Mr. Atkinson is in charge of the business details of the trip and is cooperating with various organizations. The special will leave St. Paul Nov. 20 and return about Dec. 21.

American Bad Man Is Caught.

Buenos Ayers, Argentine.—Richard Perkins, who is said to be one of a band of American outlaws who for the last ten years have been robbing and murdering in Chubut territory, was arrested here. The band is headed by Harry Longbaugh, alias "The Sun Dance Kid," who, when a youth, spent eighteen months in prison at Sun Dance, Wyo. On June 28, 1897, he robbed a bank at Belle Fourche, S. D. He was arrested, but fled. Some time ago they attacked a bank at Villa Mercedes and got $12,000.

Says Sugar Will Be Lower.

New York, N. Y.—"Happily the domestic sugar crops promise a good yield, and with their harvesting, which will be in full progress in October, the present flurry should disappear." So reads in part a statement issued by the American Sugar Refining Company, disclaiming responsibility for the rise.

Rammed Tug Sunk, Crew Saved.

Hancock, Michigan. — The government tug Circle was sunk in 20 feet of water at the entry to Portage lake canal by the 500-foot freighter Martin Mullen of Cleveland. The tug's crew was saved.

Storm's Damage in Joliet, Ill., $50,000.

Joliet, Illinois. — The storm which swept over Joliet and vicinity did $50,000 damage. At least twelve buildings were struck by lightning and three fires resulted.

20,000 Flee Flood of Lava.

Catania, Italy. — The 20,000 inhabitants of Castiglione and Francavilla turned their backs on their homes today, fleeing before the advancing flood of lava from Mount Etna.

Lion Mauls a Little Girl.

Syracuse, New York. — Clawed and bitten by a huge lion in a side show at the state fair, Laura Burns, 7 years old, of Morrisville, lies between life and death at a local hospital. The girl's body was frightfully mangled.

Governors Choose Richmond.

Spring Lake, New Jersey. — The house of governors selected Richmond, Va., as the scene of the next conference which will begin the first Tuesday in December, 1912.

Four Killed in Wreck.

Cleveland, Ohio. — Four persons were killed and more than a score injured in the wreck of a Pittsburg & Lake Erie work train.

VINDICATE WILEY

PRESIDENT TAFT APPROVES HIS CONDUCT IN EVERY DETAIL.

TROUBLE IN DEPARTMENT

But the President Doesn't Think the Famous Pure Food Specialist Is to Blame For It—Rusby's Employment Justified.

Beverly, Mass. — The resignation of Dr. Harvey W. Wiley, chief of the bureau of chemistry in the department of agriculture and probably the best known pure food expert in the government service, will not be asked for by President Taft, despite recommendations that it be requested made by the personnel board of the department and indorsed by Attorney General Wickersham.

The "condign punishment" for Dr. Wiley which Mr. Wickersham held to be necessary, will not be meted out by the chief executive. The president's opinion, carrying no word of criticism for Dr. Wiley but many a word of praise, was made public here. There is no indication in it that the president feels that he turned down Mr. Wickersham by not accepting his recommendations. He explains that the attorney general's finding in the case were made with less complete data than was before him when he took it up.

Admits Friction in Department.

In the opinion the president admits what has been well known to many persons close to the administration that there is trouble in the department of agriculture. Speaking of the congressional inquiry into that department, unfinished at the last session but to be taken up again next winter, Mr. Taft says:

"The broader issues raised by the [illegible] weightier relation than this one to the general efficiency of the department, may require much more radical action than the question I have considered and decided."

That this statement indicates a serious shake-up in the department next winter was freely predicted here today. There have never been any intimations that Secretary Wilson was disposed to retire and it is not believed here that the president would request him to do so. A general clean-up of affairs in the department, however, could easily be required by the president and carried through when he returns to Washington in November.

The Wiley case arose over the employment by the bureau of chemistry of Dr. H. H. Rusby of New York, pharmacognosist of the bureau. In effect Dr. Wiley, Dr. L. F. Kebler, chief of the drug laboratory, and Dr. W. D. Bigelow, assistant chief of the bureau, were charged with having conspired to pay Dr. Rusby a salary of $1,600 a year with the tacit understanding that he was to do only enough work to secure this amount at the rate of $20 a day. This was held to violate the acts of congress approved March 15, 1898, which declared that no classified scientific investigator should receive more than $9 a day. In addition to the recommendation that Dr. Wiley be allowed to resign, the personnel board held that Dr. Rusby should be dismissed, that Kebler be reduced and that Dr. Bigelow be allowed to quit the service. None of these recommendations is upheld in the president's opinion.

Dr. Kebler is reprimanded for "disingenuous conduct" in his letter writing to Dr. Rusby and the president says that the letters suggest "a willingness to resort to evasion" that calls for official reproof. Dr. Bigelow is held to have been "over zealous" and a reprimand by the secretary of agriculture to whom the opinion, which is in letter form, is directed, is ordered by the president.

Rusby Held to Be Guiltless.

Dr. Rusby is held to be as guiltless as Dr. Wiley in this particular matter. A charge against him, however, of securing the appointment on the common "laborer's roll" of a physician and expert "whom he could use to do his work at a very small stipend when he himself was called away," the president holds to be "not especially creditable." The case, the president says, has made apparent the "doubtful legislative policy of placing limitations upon bureau chiefs to exact per diem compensation for experts."

"The government," he says, "ought not to be at a disadvantage in this regard and one cannot withhold one's sympathy with an earnest effort by Dr. Wiley to pay proper compensation and secure expert assistance in the enforcement of so important a statute as the 'pure food law,' certainly in the beginning when the questions arising under it are of capital importance to the public."

ROBBERS GET $320,000

$35,000, TOO HEAVY TO CARRY, LEFT BEHIND.

Biggest Haul in Forty Years Reported From New Westminster, B. C.

New Westminster, British Columbia —The biggest haul in the history of modern bank robberies was made here when five masked robbers blew the safe of the branch of the Bank of Montreal and escaped with $320,000 in gold and bills. Besides this, they left $100,000 in gold in the safe and on a couch in the banking rooms, because it was too heavy for them to carry.

The robbers were caught red-handed in their work by a Chinese porter when he went to the bank to clean it out shortly after 5 a. m. He saw the robbers at work in the safe. They immediately seized the intruder, bound and gagged him and proceeded with their work. They blew the safe with a charge of nitroglycerin, took what money was in it and fled by the rear exit. As soon as he could get free from his bonds, the Chinaman gave the alarm and several posses took up the pursuit of the bandits.

Explosion Not Heard.

The bank is next door to the police station, but the explosion was not heard, according to the night sergeant. The local police have sent out a general alarm to all the cities and towns in British Columbia, but as yet have no clue to the identity of the bandits or their whereabouts.

Biggest Haul in Forty Years.

The robbery was the biggest cash haul made by cracksmen in over forty years. The only other robberies comparing with it in the amount of loot taken are two by what was known as the "Jimmy Hope gang," in April and August, 1869. In April of that year this gang robbed the Kensington Savings bank of Philadelphia of $180,000 in cash. In August the gang looted the Ocean bank, New York, of $1,000,000 in cash and bonds. A few days later the bonds were found, having been thrown away by the cracksmen.

MAINE WETS APPARENTLY WIN.

Majority of 134 Votes for Repeal Officially Announced.

Portland, Maine. — An apparent majority of 134 votes for repeal of the liquor prohibitory amendment of the Maine constitution was announced in an official statement issued by Secretary of State Cyrus W. Davis. The secretary's report is based on signed returns from town clerks.

Certain discrepancies which indicate errors by town officials in returning the vote are not taken into account in the secretary's report as the law requires the secretary of state simply to tabulate the figures as received. These discrepancies are declared by leaders of the anti-repeal side to be sufficient to change the result to a "dry" majority.

Only the canvass of the vote by the governor and council later can adjust any discrepancies that may exist. Press returns compiled in this city indicate a "dry" majority of 356, taking into account the alleged discrepancies in town clerks reports.

LUTHERANS PLAN CELEBRATION.

Will Raise $2,000,000 for Reformation Anniversary Fund.

Lancaster, Pennsylvania.—The general council of the Evangelical Lutheran church in North America at its meeting here decided to take steps to raise a fund of $2,000,000 by 1917, the interest from which is to be used in a world-wide jubilee celebration of the 400th anniversary of the Reformation. The jubilee fund committee recommended that the entire fund be used as an endowment.

McKINLEY TO ROME.

Illinois Man Represents Uncle Sam At Peace Meeting.

New York, N. Y. — George William McKinley of Illinois has sailed for Rome to attend the international peace meeting, which will open Sept. 22. He will be the representative of the United States at this conference. He contemplates a trip to The Hague before he returns to America, to look over the new Peace palace now under construction there.

St. Paul Rates Are Attacked.

Washington, D. C. — Refusal of transcontinental railways to establish from St. Paul to Denver class and commodity freight rates, declared by the interstate commerce commission to be just and reasonable from Mississippi river transfer points to Denver, induced an attack upon the St. Paul rates before the commission. The complaint was made by the Hendrie & Balthoff Manufacturing & Supply Co. and the Moore Hardware & Iron Co. of Denver. A reduction of all rates is requested.

JUDGE STANTON'S JURY INDICTS DR. DUMAS

JUDGE C. W. STANTON.

Bemidji. — "Attempted arson in the third degree," reads the indictment of the Beltrami county grand jury, returned against Dr. Delbert F. Dumas, mayor of Cass Lake.

Although the maximum penalty on this charge is but three and one-half years in prison, it is the most serious offense that can be charged, as a result of Dr. Dumas' alleged conspiracy to rob and burn the postoffice and general store building at Puposky on the night of June 16 last, when Martin Behan and Mike Davis were fired upon, and Behan captured, Dr. Dumas being arrested the next day in Hibbing.

Dr. Dumas was arraigned before Judge C. W. Stanton, but his attorneys, Judge Marshall Spooner and A. A. Andrews, waived a reading of the indictment. When the Cass Lake mayor was arraigned a plea of not guilty was entered in his behalf.

There still is a possibility that the case will not be tried here. While the state has signified its willingness to proceed, the attorneys for the defense have never said for certain that they would not ask for a change of venue, and on this point Judge Spooner remained uncertain. It is generally understood that other indictments were returned against Dr. Dumas and that other persons are to become involved in the charges, as the grand jury presented four different documents to the court. All, however, are kept secret with the exception of the one indictment on which Dr. Dumas is arraigned.

TO CANCEL MINING OPTIONS.

Longyear Company Will Not Buy Otter Tail Lands.

Fergus Falls.—The hopes of those who have been confidently expecting to see Otter Tail county become a great mining center were shattered when the Longyear Exploration company sent word that it was ready to file cancellations of the options which it secured on a number of tracts of land near New York Mills in the eastern part of the county.

The company secured options on many farms there two years ago, as the magnetic needle strongly indicated the presence of iron. The company paid $2.50 an acre for the options and agreed to pay $100 an acre for the land in case it wanted it. Drills were put in and the work of searching for iron has continued almost ever since. The company has kept the result of its explorations a carefully guarded secret, everything brought up by the drills being immediately sent to the assay offices in Duluth, but, as the work continued for nearly two years, the farmers have felt certain that iron was being found.

The options expired on August 15 of this year, and the farmers interested held a meeting this week and appointed a committee to call on the company and find out what it proposed to do about them. The company immediately gave notice that cancellations of the options would be sent to those interested, as it did not want the land. The people in that locality are nearly all Finlanders, and a large percentage of them have come from the iron range, in the northern part of the state. They still believe there is iron in their lands and are talking of clubbing together and securing a diamond drill to make independent explorations.

Christians Accept Parker.

Winona.—Rev. O. H. Loomis, pastor of the Christian church in this city, has been advised that the gift from the Free Will Baptist denomination of Minnesota of Parker College at Winnebago has been accepted by the Christian church. Mr. Loomis has been asked to go to Winnebago September 19, to assist in the formalities of taking over Parker college. The offer of the college from the Free Will Baptists was made when the Christian church was in session at Austin a few months ago. Parker college has fifteen acres of campus and buildings worth $25,000. It has an endowment of $70,000 already earning.

20% EXPRESS REDUCTION.

Cut in Rates by Companies Doing Business in Minnesota.

St. Paul.—The several express companies doing business in Minnesota have made an offer to the state warehouse and railroad commission to reduce the intrastate and interstate joint express rate by more than 20 per cent.

It was the most sweeping reductions offered by the companies in recent years. Members of the railroad and warehouse commission withheld official recognition of the new schedule until the tariff could be examined and the actual effects of the offer determined.

The proposal of the companies is in response to the demand of shippers all over the country, who have been agitating reductions on joint express rates for several years. Under the old schedule the joint express rate was the sum total of the local rates. In other words, when express was shipped from some point in Minnesota to Minneapolis on one line and then to some tributary point on another, the regular rate was paid to Minneapolis and the local rate to the tributary point. Under the new rules, the total rate would be reduced 20 per cent.

This reduction is considered by far of the greatest importance. It means that if express were shipped, for instance, from a point east of Chicago into Chicago on one line, then from Chicago to either of the Twin Cities on another and then to a tributary point on a third line, there would be a reduction of 20 per cent on the entire rate. Members of the railroad and warehouse commission said that this reduction would mean a saving of many thousands of dollars to the shippers.

Dies With Head in Noose.

Mankato.—Joseph Weber was found dead upon his farm three miles north of Madison Lake. The body was found seated in the doorway of the barn with the chin resting in the noose of a rope suspended from the top of the doorway, but the corner pronounced death due to heart disease. The rope was slack, and it is thought that the man lost consciousness and his head fell forward into the noose. The deceased was forty-five years old and is survived by a widow and five children.

Dr. J. J. Elklund of Duluth, member of the state board of visitors, has tendered his resignation to Governor Eberhart, declaring that his duties at home were such he was unable to attend the board meetings. The resignation will be accepted.

The DOG on the FARM

THE HOUND A FAVORITE WITH MANY FARMERS.

THE POPULAR FOX TERRIER

A FARM DOG AT HOME

PUPS READY FOR MARKET

FARM LASSIE AND HER PET

ST BERNARD, A FAVORITE ON THE FARMS

DINNER TIME AT THE FARM KENNELS

LONG familiarity induces the average farmer to bestow nary a second thought upon many a factor in farm life that he would discover, when he was suddenly deprived of it, plays a most important part in the routine of rural existence. Among these things animate and inanimate of whose influence we are so dimly conscious a prominent place should be accorded to "the farm dog,"—or probably it would be better to say the farm dogs, for it is rather unusual for a farmer to have only one canine helper and he may possess half a dozen, without giving any more thought to the subject than the average city man would have to bestow upon one small four-footed servitor.

For all that the busy and preoccupied farmer accepts the presence of his favorite dog so much as a matter of course it is noticeable that the favored animal seems to have some mission as "man's best friend" that requires his presence on all occasions. Certainly a trip to town would be incomplete without Rover romping along, barking teasingly and snapping playfully at the patient Dobbin or leaning out of the tonneau to bay at passing vehicles if his master has arrived at the luxury of an automobile. And in nine cases out of ten the farmer and his family could not drop contentedly off to slumber at night without the assurance that one or more dogs are on watch to give quick warning of anything out of the ordinary.

The dog on the farm helps in a variety of ways, but it is a question after all whether his greatest value does not lie in the companionship he affords. The farmer and the farmer's wife, particularly if they live in an isolated locality, would be mighty lonely at times save for the faithful dog and a lone child on a farm, with no playmates within several miles, might be hard put to it for amusement were it not for the self-same animal—proverbially patient under childish tyranny and ever ready to join in any diverting project. And, since most people consider big dogs the best companions, the farmer is fortunate in his ability to choose with reference to such preference. The city man living in a house in a row or, worse yet, cooped up in a flat, finds the term "house dog" synomous with small size, but in the country, where the average home has a large lawn and the dwelling has wide porches, there need be no line of discrimination drawn between the house dog and the "out doors dog."

Closely linked to the sentimental value of the farm dog as a companion is the worth of the service he renders as a guardian of life and property on the farm. It is not merely, for instance, that such a dog can serve as companion for the farmer's wife when she is left alone, but better yet, he is able to offer very tangible protection from annoyance by tramps or other unwelcome visitors. Similarly the intelligent canine can exercise an almost human watchfulness over the children when they are out of sight and out of hearing of their elders, and in proof of the dog's capabilities in this role it is only necessary to point to the very frequent rescues from drownings in which dogs play the part of heroes.

At night when the farmer and his family are asleep this vigilance on the part of alert canines is an almost invaluable safeguard and under ideal conditions it affords the farmer as good or better protection than can be claimed for his city cousin residing on a street patrolled by policemen. It is because of the diverse responsibilities of this night sentry work that many a shrewd farmer thinks it wise to keep not merely one good dog, but three or four. With one dog inside the house and another outside the building and with other dogs inside and outside the barn the farmer need have little fear that he will lack for warnings should anything out of the ordinary transpire. These dogs can be depended upon, moreover, not only to give warning of the approach of trespassers, but they are equally serviceable as alarmists should fire break out or should any of the stock get loose in the night or invade the feed bins.

Such canine services, tangible as is their value, are by no means all the responsibilities that grateful dogs assume in return for their modest keep. Volumes have been written regarding the remarkable intelligence and judgment displayed by the shepherd dogs of this and other countries in minding flocks of sheep and thousands of dogs are today doing men's work in this field. Similarly efficient service is performed very frequently by dogs in assisting to drive cattle to market or to the railroad yards and even in the more delicate work of "rounding up" poultry. Finally there are a hundred minor services as, for example, that performed by the numerous farm dogs that have been taught by their masters to meet the rural free delivery carrier each day and to bring to the farm house the mail and the daily paper. This is a big time-saver for the farmer when, as is so often the case, the R. F. D. box is located a considerable distance from the dwelling.

Some persons have even predicted that the time will come in America when some of our farmers will employ dogs as they do in Holland and other foreign countries to draw the carts of milk to the creameries and do other work that we now entrust to horses, but this prediction is not generally accepted because of the great distances involved in this country. However, there is no reason why the usefulness of intelligent canines should not be still further developed and certainly as the "automobile habit" spreads in the rural communities the farmers are going to find dogs indispensable in one more direction, for it has been proven that there is no deterrent like a dog that looks as though he meant business for warning off the joy riders who are wont to appropriate automobiles that they find standing unguarded in the streets or in a market space or at a picnic.

All the above has reference, of course, to the value as helpers on the farm, but this by no means exhausts the possibilities of the subject. On an increasing number of farms it has been found that dogs can be made a source of actual revenue. This is accomplished by breeding blooded dogs for the market. It is of necessity a "side line" to be sure, but it can be made a most profitable one, for fine dogs bring big prices and the farmer has the facilities for breeding dogs under the best conditions without a fraction of the investment that would be required of a man who established a kennel on a tract of land used for no other purpose. Moreover the farmer's wife and children can do most of the work of caring for the dogs, just as they do in so many instances in the case of the poultry. There is not much danger that it will prove irksome either, for there is nothing more amusing than the average puppy, and he does not as a rule require that extreme solicitous care that must be bestowed upon some other classes of pet stock.

The species of dogs which may most advantageously be selected as farm helpers is, of course, a matter of individual opinion and there are almost as many different opinions on the subject as with the regard to the age at which people should marry. Naturally, personal preferences on the part of the farmer and the members of his family ofttimes have much to do with a choice and then again the sort of assistance that is desired from a dog on the farm has a bearing on the case. As a sheep dog or indeed for any duty in connection with "minding the stock" there is no dog to compare with the faithful collie. And the collie is a mighty fine all-around dog, too. Proverbially good-tempered and gentle and possessing the highest order of intelligence, he justifies by the possession of good qualities his handsome appearance. And finally, be it said in his favor that if a farmer desires to establish a canine colony for profit there is no class of dogs that will sell more readily or bring better prices than the collies.

The old-fashioned Newfoundland dogs that were once the favorite playfellows of the tots on the farms seems to have disappeared for the most part. In their place we now have the Great Danes and the rough and smooth-coated St. Bernards. The latter, slow and ponderous in movement, will put up with any amount of pulling and pummeling by childish hands and they are usually a very saleable dog if pure-blooded. Hounds of one kind or another are to be found on many American farms and so likewise are hunting dogs, such as pointers, particularly in districts where the farmers have the time and the inclination to go out after small game in season. On most farms the dogs make their headquarters in the barn or stable or in some one of the outbuildings, but an increasing number of country gentlemen have taken to providing dog houses of greater or less pretentions and on the estates of some wealthy Americans, such as J. Pierpont Morgan, there are kennels that cost a good deal more than the barn of the average prosperous farmer.

The bulldog is famous as a watch dog on the farm and there are many farms all up and down the land where one of these pugnacious beasts is considered indispensable. However, the seeming inability of many a bulldog to distinguish between friend and foe has put the clan in bad favor on many a farm where there are numerous unexpected callers or where summer boarders from the city are included in the household in vacation season. The smaller dogs such as the Boston and fox terriers, the black and tans, etc., are well represented on the farms. Such dogs are more dependable than some of the heavier species for duty as watch dogs inside dwellings or farm buildings and if the canine family becomes too numerous it is usually easy to fidn a market in the city for the surplus, the city folks being partial to these small dogs. One thing that the farm dogs have had to learn of late years is a respect for the automobiles that whiz past at scandalous speed. Not a few valuable dogs were killed on the rural roads ere the meaning of the new menace was learned.

BIRDS FIGHT THEIR IMAGES.

But So Do Fish, for That Matter, According to Darwin.

A correspondent for the Scotsman recently reported what he described as the "curious freak" of a blackbird flying against a parlor window many times at the same spot continuously. Such an incident is not uncommon. Birds have been known to fight for hours at a time, day after day, with their own image reflected in a pane of glass, pecking and fluttering against the pane and quite exhausting themselves in their fury to demolish the supposed rival. It is another instance of how the arts of our civilization corrupt and confuse the birds.

It is the same with fishes. Darwin tells a story of a pike in an aquarium separated by plate glass from fish which were its proper food. In trying to get at the fish the pike would often dash with such violence against the glass as to be completely stunned. It did this for more than three months before it learned caution. Then when the glass was removed the pike would not attack those particular fish, but would devour others freshly introduced.

Algy Wasn't Slow.

Pa Munn—I want Helen to marry a business man. She's going to get all my money.

Algy—That's grand! What business would you like to set me up in?—Philadelphia Bulletin.

GATHERED SMILES

A SCARY HORSE.

A man in upper New York state, who was desirous of purchasing a horse for the use of his wife, recently entered into negotiations with a veteran horse dealer.

"Now, I'm not so particular about speed," said the prospective purchaser, "but I must have a gentle horse."

"Here is one that I'll warrant to be perfectly safe," said the dealer, indicating a sad looking steed near by.

"Are you sure he is not afraid of anything?" insisted the man.

The dealer assumed an air of deep reflection. "Well," he said, "there's one thing he has always appeared to be afraid of ever since I got him. It seems as if he's scared to death for fear some one might say 'whoa!' and he not hear it."—Lippincott's.

Independence of Mother-in-Law.

"Well, Binksey," said Jiggers, genially, 'did you celebrate the Fourth of July in fitting manner?"

"You bet I did," said Binksey, with a swelling chest.

"What did you do?" asked Jiggers.

"I read the Declaration of Independence to my mother-in-law," said Binksey.

"Phee-ew!" whistled Jiggers. "You are a brave man, aren't you?"

"Oh, not so very," said Binksey. "I did it over the long-distance wire."—Harper's Weekly.

Plain Henglish.

Proprietor and Author of Music Hall Sketch (to a member of his company)—The manager of the Grandiose is complainin' of your grammar. 'E tells me that you say on enterin', 'Old Varlet, what are ye a-doin'?' P'raps in future you'll be edicated enough to speak wot I've wrote, 'Old Varlet, wot are ye a-doin' ov?"—London Tatler.

Useless.

"Why did you decide to come out of hiding?"

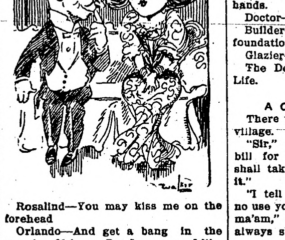
"Ah, my friend," replied the ex-dictator, "you have never tasted of fame. What satisfaction can there be in remaining hidden when the public no longer displays the slightest curiosity as to your whereabouts?"

Per Program.

A man having fallen into the water was suddenly given considerable concern by his past life flashing upon him in a series of pictures.

"Bless me, I must have sunk for the third time!" he exclaimed. The gift of ready conjecture is often of great service in an emergency.—Puck.

HIS PREFERENCE.



Rosalind—You may kiss me on the forehead

Orlando—And get a bang in the month. Oh! no. But I must say I like your cheek.

Revised.

Pease porridge hot,
Pease porridge cold;
Pease porridge in a can
No one knows how old.

A Mean Disposition.

"Do you enjoy a cross-country trolley ride?"

"Oh, yes."

"And what is the most enjoyable feature?"

"The number of automobilists one sees all along the route, fuming over their disabled machines."

Can't See Out.

"Do you know it's a fact that few women are in the habit of looking ahead?"

"I hadn't thought much about the matter. How do you account for it?"

"Well, at the present time their failure to look ahead may be due to the kind of hats they are wearing."

His Suffragette Wife.

"Does your wife insist on being allowed to vote?"

"Yes," replied Mr. Meekton. "She is not content with having the last word in a political argument. She must go to the polls and put in a postscript."—Red Hen.

There Yet.

"Brink, you spend about half your time tinkering with that motor boat. What is there about it that's so attractive?"

"The $750 I put into it, old chap."

Small Chance.

Tommy—Pop, does liquor improve with age?

Tommy's Pop—Yes, my son, but the trouble is the average man won't let it.

GREATLY EXAGGERATED.

She had been at the seaside and in the country for the holidays, and her industrious fiance had been working and waiting for her during the long, long days. Now she had returned and he had been hearing many things of her, and was sore displeased.

"They tell me," he said, painfully, "that you flirted desperately with no fewer than six men."

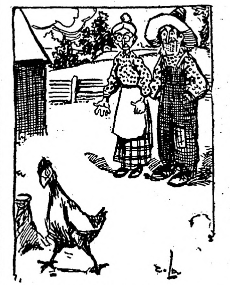
Her cheeks flushed and her eyes blazed. "Who told you that?" she asked, angrily.

"Several people. It has become common talk."

Her anger gave way to sobs. "Oh, Frank," she pleaded, as she flung herself on his neck, 'it isn't true—it isn't true."

A great load was lifted from his heart. "No, Frank," she went on, "it isn't true; there were only four."

IN THE COUNTRY.



The Farmer's Wife—Ezry, do you think that ere chicken is tender enough for roasting?

The Farmer (a joker)—Axe her.

A Vacation Tip.

The man who's wise
Will plan to roam,
Then compromise
By staying home.

A Girl's Way.

"Why do you keep asking me to be your wife. You surely wouldn't want me to marry you if I didn't love you."

"No, I don't want you to marry me if you don't love me; but I can't help thinking the practice I'm getting in asking you may some time come in handy. Now I'm going to give you another chance to turn me down."

"Oh, well, if you're determined to have me I suppose I may as well say yes."

Reasons for Some Recent Failures.

Laundryman—Clothes competition.

Musician—Unable to discount his notes.

Jeweler—Too much time on his hands.

Doctor—Losing his "patients."

Builder—Making up stories without foundations.

Glazier—A pane in the side.

The Dentist—He lost his pull.—Life.

A Community of Interests.

There were only two lawyers in the village.

"Sir," said the lady client, "your bill for services is outrageous! I shall take legal advice before paying it."

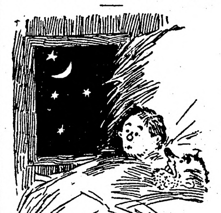
"I tell you frankly, ma'am, there's no use your going to the other lawyer, ma'am," said the able attorney. "We always share whatever we get."

In Plain Words.

Father (to his daughter, whom he sees whispering to her mother)—Elsie, how often have I told you not to do that? Speak out if you want anything.

Elsie—Well, father, I wanted to know why the woman near me has such a red nose.—Fliegende Blaetter.

"ONE TOUCH OF NATURE," ETC.



Luna Parker—Say, pard, there's lots of poetry about the moon, ain't there?

Dusty Rhodes—Gush! Bosh! Dere's no po'try in anythin' wot so offen gits down to its last quarter.

His Excuse.

Immortal is our present plight,
For each man who is fuddled,
Pleads when he staggers home at night,
'Tis 'cause the water's muddled.

Couldn't Help Himself.

"Here comes our modern Diogenes! Well, have you found an honest man?"

"Yes—in jail."

"Queer place, wasn't it to find one?"

"No; he had to be honest there."

ADVENTURES of the WORLD'S GREAT DETECTIVES

By George Barton

The French Antique Dealer

An Episode in the Life of M. Robert, the celebrated Parisian detective.

COPYRIGHT 1911 BY W. G. CHAPMAN.

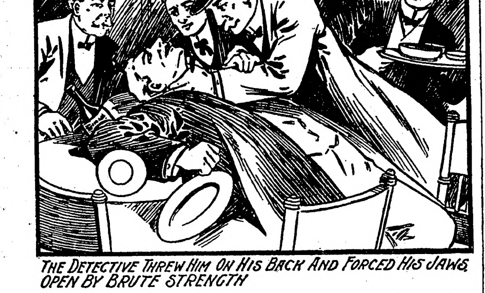
THE Rue Madame is one of the quaint streets of old Paris. It is on the left side of the river Seine. The artistically fashioned balconies of the houses of the ancient aristocracy of France rub elbows, so to speak, with new hotels and antique shops. One of the best known of these shops was kept for many years by Leon Olbert, a whimsical fellow, whose knowledge of the value of works of art was only exceeded by his inexhaustible fund of good humor.

Many royalists reside in the Rue Madame, and they haunted the shop of Monsieur Olbert, for he possessed the rare things of the past—the things they loved to examine and talk about, even if impaired fortunes prohibited them from purchasing. Even the name of the street suggested the glories of the past, for Madame was the title that was given at the court of the Bourbons to the daughters of the King and the King's brother's wife.

Monsieur Olbert was a royalist at heart, and he was in his element in his little shop, filled with all sorts of antiquities and visited with great condescension by his royalist neighbors. Clocks of all sizes and conditions and ages were ticking out the moments that lead to eternity. And around them were mirrors that reflected the love and the hate and the fear and the ambition of men. Silver candlesticks and mahogany bureaus all were there, and Monsieur Olbert loved them every one.

One morning the gendarme who was patrolling that section of the city noticed that the door of M. Olbert's shop was ajar. He entered and found the old man seated in an armchair—dead. There was a look of peace on his face and he clasped a morning newspaper between his icy fingers. The physician who examined the body said that he had probably died from heart disease.

But there was one doubting Thomas,



THE DETECTIVE THREW HIM ON HIS BACK AND FORCED HIS JAWS OPEN BY BRUTE STRENGTH

and he was M. Robert, the famous Parisian detective. M. Robert was one of the many men who had often been attracted to the shop on the Rue Madame, and he entertained a fondness for the old dealer in antiques. He felt instinctively that it was the sort of a place that a professional crook would like to rob. It was "different," and the possibilities of a rich haul were alluring. He called at the shop after the death of M. Olbert and tried to ascertain if any of the stock were missing. But alas, no one could give the required information. The old dealer knew his business by heart, but he kept it locked up in his own breast. The only catalogue of the stock was in that quaint old head that would no longer nod.

In the emergency Robert disguised himself and mingled with the friends and neighbors of the dead man. For some days he worked without results. But one night a bit of information was dropped that illumined the situation like a flash of lightning. A group of men were seated about a table in the rear room of the shop, discussing the good qualities of the deceased.

"He could tell a piece of Chippendale at sight," said Robert, by way of making conversation.

"Yes," remarked another, "he was very successful. I have no doubt that he left a great fortune."

"And the marvelous part of it all," chimed in a third, "was the fact that he made his money without knowing how to read or write."

Robert jumped up with a cry of surprise. He hurried to the prefect of police.

"M. Olbert," he cried, "was murdered."

His superior looked at him wonderingly.

"How do you know this?" he asked.

"Because he could not read or write."'

The prefect was puzzled.

"Murdered because he could not read or write?" he murmured.

"No! No!" cried the detective, with impatient eagerness. "But the positive knowledge that he could not read proves that he is a victim of foul play."

"How?"

"He was found dead with a newspaper in his hand."

A light broke in on the prefect's mind.

"I see," he said; "I see."

And indeed the two men visualized the scene. They could see the thieves killing the old man and then propping him up in the armchair, with the newspaper in his cold fingers to give the appearance of a natural death.

A second careful medical examination proved that the old man had been strangled to death. Faint blue finger marks were to be seen under the chin and near the back of the ears. Also, it was demonstrated that valuable bits of stock had been stolen from the shop. Beside this, certain bank notes remained unaccounted for. Thus, what would have passed as a natural death had now developed into a very mysterious murder.

M. Robert went at the problem with all his heart and soul. He spread out a vast police net that included the whole of Paris, but when it was hauled in it did not contain the particular fish he was most anxious to secure. There were all sorts of petty thieves, highway robbers and some murderers, but not the particular person for whom M. Robert held his rod in pickle. The marvelous secret detective system of the French capital—a system that knows everybody and everybody's business—for once failed to bring results. Months, and finally a year, went by. At the end of the second year the murder of the gentle old dealer in antiques was still unavenged. M. Robert had assumed all sorts of disguises. He had associated with all manner of criminals. He had been assisted by a corps of clever men, and still the problem remained unsolved.

The long arm of coincidence is a thing which occasionally appears in all of our lives. M. Robert was to see it in its most interesting phase. After the close of the second year since the Olbert murder the detective went to the country for the purpose of taking a brief vacation. On the return trip he met a delightful old gentleman, M. Dupret, a country banker. They made themselves known to one another and the long journey back to the city was shortened by an interchange of experiences. M. Dupret had met with with some curious experiences in his lifetime. He had frustrated some of the best bank thieves in the country and naturally felt proud of his achievements. M. Robert, in turn, related some of the adventures wherein he had rounded up famous criminals. They separated at the station with many expressions of mutual esteem. The next morning, while M. Robert was seated at his desk in the police headquarters of Paris, he received a telegram which said:

"Come down here at once. The vault in my bank has been broken open and robbed of valuable negotiable securities."

It was signed by his banker friend of the day before. M. Robert responded at once, and after reaching the rural bank obtained a complete description of the stolen bonds. He expressed confidence in his ability to recover them within a reasonably short time. He returned to Paris and began the work of obtaining information concerning the securities. It was not a difficult task; indeed, M. Robert looked upon it as one of the routine features of his daily work. It did not present any intricate phases; it was simply a matter of tracing stolen property, a sort of property that could not be offered for sale without exciting suspicion. At the end of the third day Robert learned that a well-known thief, named Oscar Vialard, had been in the financial quarter of the city offering to dispose of some of the stolen securities. He started out immediately to apprehend the fellow. He knew the haunts of thieves well enough to know just where to look for such a person. The first two or three places he visited yielded no results, but finally, entering a cafe on the Boulevard St. Germain, he found the person in whom he was interested, seated at a table with some companions, just in the act of topping off an elaborate meal with a very green-looking cream de menthe. The officer slipped in quietly. He noticed that Vialard had a letter in front of him. It was a mere scrap of paper. The officer touched the thief on the shoulder.

"Come, my friend," he said, "I would like to interview you at my office."

To his surprise, the thief grabbed the small scrap of paper and, crushing it up into a little ball, put it in his mouth and tried to swallow it. The detective determined to recover that bit of paper at all hazards. He grappled with Vialard, threw him on his back and then forced his jaws open by brute force. The man struggled like a maniac, but finally yielded and gave up the crumpled piece of paper. It was an undated and unsigned letter written to a thief named Blum, who was then in jail. The epistle was commonplace and apparently had no significance, but Robert had been a thief taker for too many years to permit any trifle to look like a trifle in his eyes. Vialard was taken into custody and then Robert arranged his plan of campaign. First, he recovered the stolen securities; after that, which was an easy task, they were returned to the country banker, and the detective proceeded to see how much more he could develop from the circumstances that confronted him.

One morning he sent for an officer and had the prisoner Blum brought to his office. He told him to take a seat in an armchair next to the window, which overlooked a courtyard leading from one side of the police headquarters to the other. He had placed the fellow where the light fell squarely on his face. M. Robert pretended to be busily engaged at his work, but all the while he was intently watching Blum's countenance. At a given signal two uniformed men appeared in the courtyard with Vailard handcuffed between them. As Blum saw his pal under these significant circumstances he jumped from his chair and gave a cry of distress.

M. Robert noticed it and said to him in a tone of deep emphasis:

"Well, my friend, you see that the game is up."

Blum looked at him with terror in his eyes. He moistened his dry lips with his tongue and echoed in a stammering voice:

"The game—the game is up?"

"Yes," said the detective, blithely "and further concealment would be folly."

"Has—has he—"

"Yes," finished M. Robert, with a smile on his face, "your pal has confessed everything."

Blum turned to him eagerly.

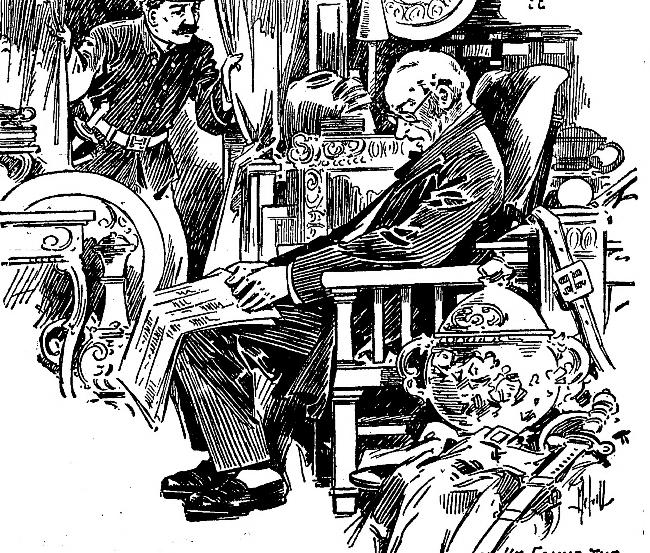
"It is not too late for me to tell the truth, is it?"

"No," was the calm response. "It is never too late to be truthful."

Then, in an endeavor to set himself straight and to prove that he was more sinned against than sinning, the thief poured out his amazing confession.

M. Robert sat there and listened with placid face and cool demeanor, but his heart beat a little quicker than usual and it was all that he could do to remain passive. And no wonder! For the thief before him was telling in short, quick words, the story of the murder of Olbert, the old shopkeeper on the Rue Madame.

Blum had jumped to the conclusion that he had been betrayed by Vialard, and he confessed that he had accompanied Vialard to the house and had guarded the door while his pal strangled the old man to death. They did not intend to commit murder, and when they found that M. Olbert was dead they were very much alarmed. There were no marks of violence on the old man, and the notion to prop him up in the chair came as an afterthought. It appealed to their sense of the romantic. It would be such a clever thing to make the public believe the old man had died a natural death while sitting in his armchair. The idea of placing a newspaper in the dead man's hand came as a sort of inspiration to Vialard. It was so clever, he thought, that he had chuckled over it many, many times during the two years that had passed. Yet, that was the one false move that had given proof of foul play and led finally to the discovery and arrest of the assassin and his accomplice.



HE FOUND THE OLD MAN SEATED IN A CHAIR—DEAD

PASSING OF THE OLD HOME

Herding of People in Cities Makes Home Building Now Almost Impossible.

(Copyrighted by J. S. Kirtley.)

There are those who say that the home is passing away. That would be a very dishonorable thing for the home to do, after its honorable history, through all the Jewish and Christian centuries. It first found itself among the Jews. Rabbi Abraham Isaacs has written a good characterization of the Jewish home; and what it stood for among them is exactly what it stands for among us—religion, education and the unity of the family. We may not have to ask the Hebrews to take over our homes, but we shall have to go back to the very things that made the Jewish home the only thing of the kind in the ancient world and won a great many noble-minded Gentiles to their faith.

The home will not pass away, though it now seems that the old style of home may have gone forever. Those elemental things that must be in it, or it is not a home at all, are now engaged in adjusting themselves to conditions that were never encountered before, and it is because of those new conditions and the present unsettled habits of people that so many are uttering lamentations. The family will not pass away till the race does. The family must have a place to live. It will make some sort of a home in that place, whether good or bad. Let us hope that, when we emerge from this transition period, the home growing industry will be an easier and more popular one.

But we are being told of the perils of the home. Let us face them without flinching. They may vitiate but cannot exterminate it. They may degrade it to a lower or regrade it to a higher level. Here are some of the disintegrating forces now at work: Specialized industry is robbing it of some of its former functions and that loss has changed the family life. The question is whether those functions are essential in a home or were taken on only as a temporary duty and can be dropped without loss. There was a time when almost everything was made in the home. The women spun and wove the cloth and made the clothes for the family; the men did their work and made many of the tools with which they worked, but trades have developed, industries and arts have become specialized. One can buy better things and for less money, made by those who give their whole time to one thing, and, by the aid of machinery, can each one do the work of a dozen or twenty men. It is more wholesome to have the mind free for other interests of the home. But here is the peril: The home sentiments grow through work with and for each other. The industries can be surrendered, but when mutual and altruistic things go, when no one is called on to do anything for any one else, but each one goes off, makes his little purse and spends it, it is a blow at the very heart of the home. Other mutual and unselfish work must take the place of the industrial work given up. If the girls are not to wash the dishes, they must assist their mother some other way. The home life demands it.

The transfer of interest from the founding to the furnishing of the home raises the question as to the moral effect of the externals rather than the internals, of consuming rather than producing. Again, everybody is so busy with some outside work of so technical and personal a kind that none can be taken into it, no mutual interest be found in it, except in the income from it. The man is at work all day, and at night wants to settle into restful ease or go to an entertainment, in order to get his jaded and jangled spirits back to normal. He has no time to get acquainted with his family. The women are busy with clubs and receptions and circles and mothers' meetings and sororities and they are too tired for anything but relaxation, at that very hour which is the most critical of all the 24, in the family life, the get-together hour, after the centrifugal travels of the day. Even the children have their social duties that keep them occupied. The ready-made plays have lessened the originative and initiative powers. The old-fashioned frolic and fun they used to have, when the mutual interests were more numerous and attractive than the outside and individual, helped the unity of the family. Little energy or inclination is left for originating and carrying out enterprises for the making of the home.

But the tale is not finished. Standards of living are high and compelling; and people of small means have large ideas of keeping up with these standards. That throws the thoughts out from the arts of home making to the arts of money making and spending. Instead of accepting this rare opportunity for culture, in the virtues of restraint and self-sacrifice in the interest of the home, they often rebel in dissatisfaction and fault finding. That marks the end of the home, as such, though the house and the family may keep together, for years. Unity is one of the elements of home, and nagging is the end of unity. In that stage of low finances and high living, the flat is the favorite resort for those who would evade the responsibilities of home building. The flat is not an unmixed evil and many happy homes are made in them, in spite of them; but too many lives are made "flat, stale and unprofitable" by them. They unite with other adverse conditions in making the essential virtues of unselfishness, hospitality and mutual constructive work for the home much harder.

Nor is that all. The herding of people in the citites, unrooted in any holdings of their own, with no sense of ownership in anything and so few home interests in common, makes home building almost impossible. The example of the rich whose wealth can purchase release from all kinds of obligations, who can dishonor the home with divorce and dissolute lives, without loss of social standing, has destructive weight with the less wealthy.

Now, the home is a set of principles, vitalized by a set of persons; sentiments throbbing in sensitized hearts; an atmosphere exhaled from those persons and partaking of their nature, as the atmosphere around us has in it some of the very elements found in the earth. In these adverse conditions, the home instincts may become atrophied by disuse or perverted by misuse, especially the building, the proprietary and the co-operative instincts.

But look long enough and we get an optimistic outlook of the home. As it is a necessary expression of the family, it is to become better and greater. If its essential instincts found culture in the old industrial life, we must tax our ingenuity to find co-operative work of the intellectual and artistic and religious kinds. The flat has its limited mission, but it may be still further limited by a larger exodus to the suburbs and to the hospitable country. Clubs may be transformed to include attention to the home interests that are mutual and may be made a true synthesis of the family ideals. The two sexes will continue to attract each other. The family will remain. The home will still grow up out of the family. New interests, not before suspected, may be found. Old responsibilities will reassert themselves. Out of the changing conditions, the eternal home instincts will emerge with new triumphs and new opportunities. The old ideals are to realize themselves in new ways.

Hospital Its Own Cannery.

Hereafter the Southern California State hospital at Patton will not sell its green fruits for a song and pay a high price for canned goods. Arrangements have been made to put up from eight to ten thousand gallons of peaches, apricots and tomatoes, and a consignment of 6,000 gallon cans has recently been received for that purpose.

On the state grounds are several acres of deciduous fruits. Superintendent Blair could see no reason why this should not be conserved for use in the institution, which feeds more than 1,500 persons, rather than buying canned goods in Los Angeles or Pomona.

So it has come about that a room has been prepared in which to carry on the work, and the apricot crop is being successfully handled at this time. Next in order of ripening will be the peaches, and later thousands of gallons of tomatoes, almost indispensable in an institution of this kind, will be stored away in the hospital larder.

The Northern Light

CHAS. W. LATTA,
Editor and Publisher.

Published every Friday at Holt, Marshall County, Minnesota.

Subscription Price: $1.00 per year, strictly in advance.

Bye and bye, when Holt is having a county fair, we must try and be more courteous to the Warren bunch than they have been to this part of Marshall county.

For some time past Holt has had the name of being one of the best little towns in the northwest. Let us hope that it will also merit the reputation of being one of the neatest.

The comments of Editor Grimstad of the New Folden Review, upon the conditions of the steps on one of the churches at Holt, would lead one to think that maybe he found a few slivers there.—Thief River Falls Times.

According to the newspaper reports from Bemidji it appears that Dr. Dumas, alleged to be "king of the Yegg-men," kept a supply of dynamite in his safe for the purpose of blasting stumps out of prairie land. Sounds funny, but it will no doubt be properly explained by his attorneys.

Over at Warren they had what they called the Marshall County Fair this week. So far as we have been able to learn nobody in this part of the county was ever written or talked to about this fair or asked to be exhibitors or even attendants. About all that the people in this section are supposed to know about the matter is to pay their share of taxes so that a good appropriation can be made by the county board every year for the benefit of the west end, for it is only the west end that is given a chance to derive any benefits from the fair.

President Taft has already been several days on his tour of the country, which may properly called the opening of his campaign for re-nomination. In his tour he will visit many of the principal western cities where he is assured of a cordial welcome from the big business interests and the people directly dependent upon them. In these cities, too, he is sure of the newspapers publishing only those things which are good concerning the remarks he may make, and thus attempt to manufacture public sentiment in his favor. It is safe to say that the published reports of his trip will not carry to the country absolutely truthful account of what he says to the people or how the people feel towards him.

Do you love your cock-tail in the morning? It is great stuff, booze, no matter how you take it. It makes a man forget so many things—and it piles up things for him to remember at the same time. At Huron, S. D., on Sunday morning, a young man who had filled up on booze the night before, woke up feeling ugly. His wife, to whom he had been married a little more than a year, took their infant son and tried to go downstairs with him but the hilarious father interfered and taking the baby by the feet beat its innocent brains out against the wall. Any old booze lover who may have read this tragedy undoubtedly has considered it to be a horrible thing, and then took another drink to help him forget it. Yes, booze is great stuff—for filling jails, insane asylums and coffins. If you really want to, stick to it and it will soon do your family and the rest of the community the favor of sending you where you belong.

List of Grand and Petit Jurors

For the general November, 1911, term. Drawn Sept. 5th, 1911. Grand Jurors:

O. H. Hanson, Viking
Olof C. Johnson, Veldt
John P. Erickson, West Valley
Fred Lenhart, Comstock
E. M. Powell, McCrea
Wm. Lineman, Comstock
H. C. Naesett, Rollis
Fred Jarshaw, New Solum
Carl J. Johnson, Oslo
Ole Erickson, Nelson Park
Amund Johnson, Grand Plain
Eugene Labine, Bloomer
Carl Youngdahl, Warren
Sam Lee, New Folden
August Low. Eagle Poimt
John Hanson, Alma
P. N. Peterson, New Solum
Ole Berge, New Maine
Chas. Hull, Warren
John Gustafson, Viking
P. A. Johnson, Moylan
Peter E. Kvickstad, Argyle
D. A. Mack, Wagner

Summoned to appear November 27th, 1911, at 10 A. M.

Petit Jurors:

Andrew Amundson, Linsell
John J. Anderson, McCrea
George Benson, Augsburg
Peder Bakke, Marsh Grove
E. J. Amundgaard, Argyle
Tor Hellickson, Fork
Lars Ahlm, Big Woods
Ole Olson, Spruce Valley
L. Johnson, Spruce Valley
Charlie Anderson, Oslo
Ingvald Wold, Adger
Ole P. Ramsey, Eckvoll
Frank Legault, Tamarac
Alfred Johnson, New Folden
Olof Opseth, New Solum
E. O. Bystrom, Vega
E. Torgeson, Comstock
Lars Ihle, New Eolden
Otto Hohle, Valley
Henry Sustad, Viking
Aaron Johnson, Warrenton
H. Harris, Big woods
Halvor Kallock, Oak Park
Ole J. Lunke, East Valley

Summoned to appear November 28th, 1911, at 10 a. m.

Establishing a Precedent

The following notice appeared in the Warren Sheaf last week:

"To the Rural School Officers of Marshall County:

Permit me to suggest that you give your teachers and pupils one day's vacation (Tuesday or Wednesday, Sept. 19th or 20th) during the Marshall County fair, to give them the opportunity to see the bigget and the best agricultural exhibit ever shown in our county and to take part in the industrial contest in connection with the fair.

Signed,
—David Johnson,
County Supt."

We understand that the schools in general were closed on Wednesday in accordance with the above "suggestion," although none of the pupils from the eastern end of the county could make the trip to attend the fair if they tried. It looks like poor judgement to "suggest" closing the schools all over the county when all cannot take advantage of the opportunity in the proper manner.

INSECTS KILLING BIG GAME

Bulldog Flies Attack the Moose, Which Take Refuge in Water and Are Drowned.

Bulldog flies are killing big game along the international boundary, according to County Commissioner Helic Clementson. Two moose were killed last week near a lumber camp on the east fork of Rapid river, and in his opinion large numbers of fine animals have lost their lives the last week.

The flies, which are fully a half inch long, are more plentiful than for many years and attack the moose in large numbers. Their stings drive the animals to distraction and in a crazed condition the rush through the woods, often entering log camps filled with men. They seek water and several have been drowned in attempting to evade the tormenting flies. A big moose was pulled out of the river twice last Thursday by lumbermen and the flies brushed off.

The deer are more fortunate in escaping the pests and have not suffered very much as yet, but are having their troubles from the deer flies.—Bemidji correspondence Minneapolis Journal.

THE REASON.

Senator Rayner, the wit of the senate, told at a dinner in Baltimore a story of the South.

"A northerner," he said, "was surprised, during a southern tour, by the number of Taliaferros he found everywhere. Doctors, lawyers, undertakers, clothiers—all seemed to be Taliaferros. The northerner put up in nearly every town at a Hotel Taliaferro, and, if he wanted a cigar, a Taliaferro sold it to him.

He couldn't understand it at all—till one day, motoring through a splendid country, he saw a tremendous mill that bore in vast letters the inscription, 'Taliaferro Manufacturing company.'

"'Oho!' he said, 'they turn them out by steam!'"

A "WREATH OF BABIES."

Imagination is the making of a writer, so one has been led to believe.

Perhaps; but some writers go too far. Just listen to this description of a bit of simple summer millinery from a foreign publication:

"It goes with a yellow print frock, like the poet's—

"Buttercup-color was her print gown,
So sweetly rare, so quaintly fair!"

and here we had gray chip, very coarse, but dull of surface, and buttercup-yellow taffetas Winterhalter bows, with raveled ends, sitting all around the low crown, with their fat, short legs sticking out well apart in front of them, for all the world like a wreath of chubby babies."

"CAPTURING" AN EAGLE.

One of the incidents of the last season in Dead River region that escaped press notice at the time was the fact that William Ledgyard of Boston and Albert Leavering of New York, then guests at Round Mountain camps, attempted to capture an eagle and were unable to carry off the sky king alive. The furious bird made such good use of his beak and claws that the gentlemen were finally obliged to hold him under water until he was drowned, in order to demonstrate that one of them was not in reality a captive of the eagle.—From Maine Woods.

LONG RECORD BROKEN.

The Rev. Robert Hugh Benson, the novelist, is now Monsignore Benson, having been promoted by Pius X. His father was an Anglican archbishop, and he is the first case since 1606 of a member of an archbishop's family going over to the church of Rome.

LOVE-MAKING STYLES CHANGE

Today the Flowery Sentiment of Old-Time Plays Is Considered Merely Melodramatic.

When a successful play of 25 or 30 years ago is revived critics invariably hasten to point out how theatrical and "old-fashioned" dramatic fare used to be in the last generation. And, in a sense, the criticism is quite justified. The sentiment of a former day cloys; the heroics only amuse us. Even so expert a workman as Sardou feels the changes of time. His set scenes—rage, denunciation, jealousy, terror—are nowadays dismissed as melodramatic. Actually, the difference is one of manner and not of essence. We are quite as fond of melodrama today as people were 30 years ago, if by melodrama one means impossible human beings acting in an impossible way. And, if anything, we are more sentimental today than the Victorians were. Only, once upon a time sentiment voiced itself in nicely turned and nicely balanced sentences succeeding each other in oratorical form. Today even sentiment has a lot of "go" to it. On the stage, as in the magazines, today the broad-shouldered young man who addresses spasmodic half sentences to the only woman in the world is as popular and as offensive as the heroes were in the age of vapors and antimacassars.

NOT BUILDING THE TEMPLE

Methodist's Rebuke of Presbyterian Brother Who Was One of the Quiet Kind.

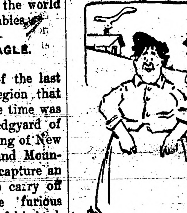
A Presbyterian minister who had very conservative ideas dropped in one night on a Methodist revival where an extraordinary amount of exhorting and shouting were going on. He sat down in a seat far toward the back, and though he felt in sympathy with the work going on he could not bring himself to engage in the same kind of vocal activity. Presently a Methodist brother named Smith went back and urged him to come up and join the rank of workers, but the conservative held back, exclaiming: "I am one of the quiet kind, you know, and don't believe in so much noise and hubbub; you must remember, Brother Smith, that in the building of the temple there was heard neither the sound of saw nor of hammer.

"Humph!" snorted Brother Smith, "we are not building temples here, we are just blasting rock. The Lord's going to look after the temple."

THE TRAVELER'S COMFORT.

A slipper without a heel, which is so soft that it can be folded and put into a very small space, is a new invention designed for the traveler. We have had cretonne hats and coats, cretonne covers for the furniture, and now cretonne slippers are among the latest things. A woman was making a pair the other day without a pattern. She bought a pair of soles, such as are used for the crocheted slippers, put her foot on the floor, fitted the cretonne over the instep and the rest was easy. She bound the top of the slipper and sewed the lower edge to the sole. It will prove a great convenience for wear in the sleeper during the night journey.

THE REASON



Mrs. Rigby—Is she happy since she secured her divorce?

Mrs. Digby—Very. As a wife her allowance was only $20 a week, but now he has to pay her $50 a week alimony.

FOLLOWING INSTRUCTIONS.

"Good heavens, John, how did you come to send such an ugly woman from the intelligence office. She's scared the baby into fits."

"My dear, I did exactly as you told me, and informed the office we wanted a plain cook."

THE DULUTH HERALD
BEATS THE CENSUS THREE TO ONE

During the past ten years the population of Duluth increased 48 per cent., St. Paul 32 per cent., and Minneapolis 49 per cent. In the Same Period the Circulation of The Duluth Herald

INCREASED 150 PER CENT.

This marvelous expansion—so much greater than that of the surrounding territory—is due solely to the merits of The Herald. The Herald has never used any kind of premium, contest, or price reduction to gain subscribers but prints each day the very best NEWSPAPER in the Northwest. Its editorial page is thoroughly independent and its news columns cover every feature of the world's daily history.

Send for sample copy and get The Herald habit.

Bring us the news.

When in town call at this office and let's get acquainted.

S. S. Kolden made a business trip to Middle River on Tuesday.

Wanted—Pure bred Brown Leghorn cockerel. Apply at this office.

Willie Werner spent Sunday his relatives here and left on Monday for Greenbush.

Miss Olga Hoff was down from Middle River and spent Sunday as a guest at the Thomas home.

Mrs. Swenson has returned to her North Dakota home after a pleasant visit with the Nyhus family.

A. C. Kvennes and Oscar Schenk came down from Middle River yesterday afternoon and spent some time visiting friends.

Attorney G. Halvorson, of Thief River Falls, made a very brief stop-off here Monday to shake hands with some of his friends.

R. M. Nyhus was in from his New Solum home on Tuesday and remembered the editor with a dollar for a year's subscription.

Miss Christine Reierson went to Red Lake Falls on Tuesday and remained until yesterday visiting with friends and taking in the county fair.

A. L. Carlson went down to Thief River Falls on Wednesday to run the linotype machine in the Press office for a day or two and set up the news for this week's issue of that paper.

TAKEN UP—On Sunday August 13, by Fred Larson, 3 miles east of Holt, one white Angora buck, with bell on. Owner can have same by calling, proving property and paying expenses.

We want a live correspondent in every township in Eastern Marshall county to send us the news of the locality and solicit subscriptions for this newspaper. We want bright young people and will make it worth their while to represent us.

M. A. NELSON, M. D.
PHYSICIAN AND SURGEON
Office over Holt Merc. Co's store
HOLT, MINNESOTA.

Christ Shevland, of New Folden, was a business visitor in town yesterday.

Oscar Anderson spent Wednesday night visiting with his folks at Thief River Falls.

J. O. Quisberg spent Wednesday night attending to business matters at Thief River Falls.

Miss Inga Johnson, of East Valley is a guest at Hogan Anderson's home and may remain over winter.

Jonas Sjoberg and son, Orie, drove down from Middle River on a combined business and pleasure trip.

T. T. Solum and family were over from Newfolden yesterday to do some trading with the Holt merchants.

Miss Inanda Fosholm came up from Silverton on Monday to spend a few days visiting with her folks.

Wanted —— Anyone having for sale a good, second-hand cook stove, number 9, is requested to notify this office giving full particulars.

Mr. and Mrs. R. Schenkey returned to their home in East Valley last Saturday after some months spent in the southeastern part of the county.

Orvis Hinds, the Crookston surveyor, was a visitor in town Wednesday. He is doing some work on the state ditches in place of Mr. Macauley and expects to be in this vicinity pretty much all fall.

The Ladies Aid met with Mrs. S. Borsheim on Wednesday afternoon. There was a large attendance and a good time. They will hold their next meeting with Mrs. C. H. Gunheim on Wednesday, October 4th.

On Wednesday night of last week lightning struck and set fire to a big barn belonging to John Peterson a short distance from Warren. Horses and harness were saved but the barn and the rest of its contents were entirely destroyed.

The Young People Society of Holt went out in a body last Sunday to attend the services and Young Peoples meeting at the home of Rev. M. B. Ordahl in East Valley. They found Mr. Ordahl's home a most delightful place to spend the afternoon and all hope to enjoy other visits there in the future.

At the home of the bride's parents near Steiner Miss Ella Swanson and Target Brokke were united in marriage on the 18th inst, Rev. J. B. Smith officiating. They went to Duluth and Superior to spend their honeymoon after which they will go to housekeeping in Thief River Falls where Mr. Brokke is employed in the postoffice.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

NEW GOODS
SOME HERE; MORE COMING!

During the past few days quite a lot of our new Fall Goods have arrived and are now on our shelves for your inspection.

We want you to see this Big, New Stock, and you ought to see it as soon as you can. Our Dry Goods Department is especially worth your attention, and contains the finest lot of High-grade, Up-to-date goods ever shown in this vicinity.

W have a splendid line of Blankets, all wool, mixed and cotton, and many other necessities for the season.

Remember:
Those who come first can get the Best Selections.

SERIAL STORY

The Girl of My Dreams

A Novelization of the Play by Wilbur D. Nesbit and Otto Hauerbach

Novelized By **WILBUR D. NESBIT**

Copyright by W. D. Nesbit

SYNOPSIS.

Harry Swifton is expecting a visit from his fiancee, Lucy Medders, a Quakeress whom he met in the country. His auto crashes into another machine containing a beautiful woman and a German count. The woman's hat is ruined and Harry escapes. His sister, Caroline, arrives at his home to play hostess. Socrates Primmer, cousin of Lucy's, arrives with a hat intended as a present for Lucy. Harry is trailed to his home by the Count and Mrs. Gen. Blazes, who demands her hat, a duplicate of which she says has been delivered at Harry's house. She is in great fear lest her husband hear of her escapade. Lucy Medders and her father arrive and the count is hidden in one room and Mrs. Blazes in another. Harry is forced to do some fancy lying to keep Lucy from discovering the presence of the woman. The milliner, Daphne Daffington, who proves to be an old flame of Harry's, arrives to trace the missing duplicate hat and more complications ensue. Daphne is hustled into the room occupied by the Count. The latter, with whom Daphne had flirted at one time, demands the return of a ring he had given her on that occasion. She tells him that she gave the ring to General Blazes. As the Count had also given Mrs. Blazes a duplicate of the ring he becomes somewhat excited. Daphne leaves the room and seeks refuge in the one occupied by Mrs. Blazes. Mr. Medder discovers the Count, who is introduced as Harry's German tutor. General Blazes arrives and accuses Harry of concealing his wife. Daphne steps out and the general is dumfounded. Lucy gives way to tears. The Count takes the blame for the whole affair upon himself, but the verdict is reserved until Harry can vindicate himself. General Blazes admits to Harry that he has flirted with Daphne, and Mrs. Blazes overhears the talk.

CHAPTER XI.—(Continued.)

"Isn't it a lovely evening?"

Then she began to sink gracefully upon the seat, when an even more ominous ripping sound was heard. Carolyn abandoned her project with due and proper suddenness, while Pigeon mopped his brow, and said, in flustered tones that he tried to make sound matter-of-course:

"I thought earlier today that we might have some rain."

He lifted his foot to rest it carelessly upon the bench, not caring to try to sit down any more, but with the movement came a terrific rip as though something had torn loose forever.

He dropped his foot and tried to whistle a popular air.

Carolyn looked the other way and became nervous.

"I can't do a thing with my hair tonight," she observed, lifting her arms to pat it into shape.

R-r-r-rip!

Her arms dropped to her sides, soldierwise.

"I think," Pigeon said, desperately, "that the evening is the most pleasant time of the day."

He sat down, in spite of the ripping that still sounded.

"Won't you be seated?" he asked politely.

Carolyn slowly, carefully allowed herself to sit beside him, and to her evident relief there was no further sound of ripping.

"Isn't it funny," Pigeon said, "how lonesome a fellow gets at this time of the evening, if he is all alone?"

"Now, don't get sentimental," Carolyn said, tapping him playfully on the shoulder.

Simultaneously with her movement there was a sudden, short rip. She drew back in confusion.

"Is it wrong to get sentimental?" Pigeon asked, carelessly dropping his arm along the back of the seat and behind her, and at the same time hearing another vicious rip. He pulled his arm back as though his hand had encountered a pin.

"It's silly to be sentimental," Carolyn declared, without a motion of any sort. By this time she was afraid even to turn her eyes toward him.

"I'm silly, am I?" Pigeon asked, sulkily.

"I didn't say that," she answered.

"You did!"

"I didn't!"

"You did, and I can prove it!"

"I didn't, and I can prove it!"

Pigeon attempted to arise haughtily, but—r-r-r-r-rip!—and he sat down again.

"I suppose," he said to her, pettishly, "you think I can't do anything?"

"You can't!" she replied, pouting, for she was angry because of the ripping, and naturally wanted to vent her wrath on the nearest object, which in this instance happened to be the poor youth. "You can't. Doing nothing is the best thing you do."

"Boarding school wit!" Pigeon retorted. "Oh, well, there are plenty of other girls!"

"And don't you forget, Mister Williams," she snapped, with a heavy accent on the "Mister," "that there are plenty of other men!"

She brought out the word "men" with all the emphasis and meaning necessary to convey to him the idea that she regarded him as a boy.

Then she arose, utterly ignoring a terrific ripping noise, and strode into the house with the cold, heartless tread of a princess. But as she went up the steps, Pigeon, had he been watching, would have seen her clutching nervously at her skirt, while the ripping went merrily on.

Pigeon got up with an air of gloom, and grasped his belt in a tight clutch and marched off, his steps being timed by staccato rips, which he did not locate as coming from the room wherein was Mrs. Blazes.

And in that room Mrs. Blazes was feverishly tearing and tying strips of sheets, and towels, and table covers, together, all unconscious that in her strenuous efforts to effect her escape she was creating the first bump upon the pathway of a young love—but then love, as Mr. Shakespeare observed long long ago, never did run smooth.

CHAPTER XII.

Mrs. Blazes opened her window silently, and lowered to the ground a rope that was fearfully and wonderfully made. She had used everything and anything, from pillow slips to the cords of the portieres. She had enough rope to let her out of a six-story building, instead of from a window a scant twelve feet from the ground. The end of the rope she tied to a table near the window. Then she looked down anxiously.

"It is dangerous," she sighed.

The Count wandered into view. He was growing weary of waiting for the hat. At sight of the rope he brightened up.

"Jump oud," he suggested.

"Silly!" she said; "I've got to climb down. Steady the rope."

He took hold of the lower end and straightened the rope against the building.

"But how in the world am I to climb down?" she demanded.

"Led yourselluf oud slow, und den slide for life," he told her.

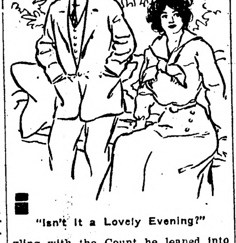
Their argument grew more intense. She was afraid to trust herself to the frail means of reaching the earth, and he was insistent that she should come down at once. In the midst of their talk the front door opened. Mrs. Blazes heard the sound and darted back from the window, taking the rope in with her so swiftly that she left the Count standing with his hands in the air.

Amos Medders came slowly down the steps, looking intently at the Count, whom he could not recognize in the dark. The Count had not heard him coming and could not understand why Mrs. Blazes had pulled the rope in so suddenly.

Count von Fitz was dumbfounded when he was seized in a grip of iron and the cold tones of Medders came:

"What are thee doing, scoundrel?"

General Blazes came up the walk at that instant. He had his hat in his hand and was still laboring under excitement. When he saw Medders struggling with the Count he leaped into the fray and separated them.



"Isn't It a Lovely Evening?"

"What's happening?" he asked.

"Well, I am surprised," Medders said. "I thought this foolish little man here was a burglar."

"What foolish little man?" Blazes asked.

"This one they call a Count—this tutor. I thought he was trying to break into the house."

"Wouldn't be surprised if he was," Blazes asserted, vehemently. "Isn't your daughter in there? Isn't Harry's sister in there? These Counts will do anything to capture a girl with money."

"It iss not so!" Count von Fitz sputtered, rubbing his neck.

"Verily, thee has a suspicious look," Medders said to him.

"It's a gam dood thing I happened along," Blazes observed.

"A what, friend?" Medders inquired curiously.

"A gam dood thing—doesn't count, you know when you cuss backwards."

"Verily," Medders said, "there be times when a man could cuss sidewise."

"Well," Blazes said, turning again to Count von Fitz. "It's a lucky thing for you there was nothing in the report that you were with my wife today. I'm a jealous man. I'm desperate when I'm roused."

"Don't rouse!" the Count begged.

"Once," the General said, "I caught a man flirting with her. What did I do?"

"Vat did you do?" the Count asked, weakly.

"They buried his hat," the General said. "Just his hat! Just—his—hat!"

"Chust his hat!" the Count echoed. Mentally he wondered if it had been a yellow hat with red poppies.

"Thou art a man of wrath, General," Medders said. "Once I grew angry at a man—in my youthful days."

"And what did you do to him, man of peace?" asked the General, laughing, while the Count listened nervously.

"In those days," Medders said, "I was vain of my strength and given to yielding to my angry passions. I went unto this man, and I seized him thus—"

Before the Count could dodge, Medders held him as though in a vise.

"And I said unto him: 'Thou condemned wretch, dost thou not know it is unwise so to conduct thyself in our midst?' And I smote him thus, and I shook him thus"—illustrating upon the helpless Count—"and then I said unto him that if he offended me again I should smite him full sore."

"Please," begged the Count, "please don'd remember anything else!"

"I beg thy pardon," Medders said, contritely. "I did forget myself."

"Come in out of the night air, gentlemen," suggested Harry, who came to the door just then. The trio, smiling over the unconscious way in which Medders had shaken the Count, started in, when a messenger boy arrived.

He carried a large hat box. The Count tried to intercept him, but Harry was as anxious as the Count to get that hat.

She turned it out quick enough," Harry murmured to himself, paying the boy the seventy-five dollars that was called for on delivery. When the boy had left, Harry chanced to look at the address and read:

"Count Herman von Fitz. Why, this hat isn't for me, after all."

"No," the Count said. "I ordered it, but it isn't for me."

Medders turned and said:

"Is there some mistake, Harry?"

Harry looked at the Count, but that gentleman was pretty well satisfied with the situation and made no move to correct matters.

"No, there isn't any mistake," Harry said.

"Did I understand aright," Medders asked, "that thee are paying seventy-five dollars for that hat?"

"I did—without taking chloroform, too," Harry ruefully asknowledged.

"Some hats are worth that much," the Count remarked.

"Sure!" boomed the General. "My wife often spends more than that for a hat."

"Is it for thy sister, Harry?" Medders asked, casually.

"I don't know if it will fit her," Harry answered, non-committally.

"Wouldst thee let us see it?" Medders asked. "Truly, a hat worth that much must be a wonderful thing."

Here the Count nervously interposed, afraid that the General would become aroused if he saw the hat.

"No, no. Der night air might spoil it!"

"I confess I am curious to see it," Medders said. "Ah, what forms the vanity of women and the foolishness of man do take!"

From the house came the lank form of Socrates Primmer. In his hand he carried the hatbox which all day he had been endeavoring to open in the presence of Lucy.

"What is the trouble?" he asked.

"No trouble at all—until you came," Harry replied, drily.

"Harry has simply been doing what I have often done," General Blazes explained "He has bought a hat."

Primmer glanced at the hat box Harry held, and then looked at his own.

"This then, is for his wife?" he inquired, sadly.

"What?" the General said, misunderstanding Primmer. "Another man buy a hat for my wife? How dare you!"

Primmer shrank away from him.

"Nay," Medders soothed. "The hat Harry has is for his sister, Carolyn."

"No," Harry corrected him, fearing some further complication. "The fact is, I was going to give the hat to Lucy—with your permission, Mr. Medders. But I didn't like to ask your permission before all the others here."

"Bully for you, Harry!" the General beamed. "You couldn't do a finer thing."

Primmer lapsed into a fit of dejection.

"Alas!" he sobbed. "Homer was right when he said:

"Alas, faint hope I leaned upon!
Alas, thou too art dead and gone!"

"Cheer him up!" General Blazes suggested. "Let him see your present for Lucy."

"I, too, have a present for Lucy," Primmer said.

"Thee hast?" Medders asked. "What is it, Socrates?"

"A hat," Primmer announced.

Harry leaped to a conclusion. Instantly he coupled Primmer with the mysterious man who had bought the duplicate hat at Mlle. Daphne's.

"Let's see it," he said.

He opened Primmer's hat box, and one glance was enough to confirm his suspicion. He dropped the lid quickly, took the box from Primmer's unresisting hold, and said:

"I'll take your hat to Lucy. She'll be—"

"No. I shall present it to her myself," Primmer declared, taking the box from Harry.

"All right," Harry said. "Don't let any one profane that hat by seeing it until it gets to the one for whom it is intended. And neither will I with mine. You won't let any one see it?"

"Surely not," Primmer agreed.

"All right. That's a sacred compact. Let's all go in now."

And as he ushered them into the house Harry said things to himself because of his foolishness in paying seventy-five dollars for a hat when the duplicate was in the house all the time.

"And," he growled, "I've still got one coming from Daphne!"

"What did thee say?" Medders asked, as they went into the reception room.

"I was saying that I hoped no one was coming this evening to break up our quiet little party."

(TO BE CONTINUED.)

That which is unjust can really profit no one; that which is just can really harm no one.—Henry George.

THE KITCHEN CABINET

SOME say that we should Eat to live
And some say Live to eat,
But look at it which ever way,
'Tis true, to live, we eat.

WAYS OF SERVING LIVER.

To many this plebeian dish will not appeal, but we can only feel sympathy for those who miss the good things that may be served alone and in combination with liver.

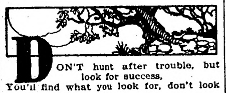
For minced liver simmer the meat in water for twenty-five minutes. Then drain and chop finely. Add two onions chopped and pepper and salt. Return to the saucepan and cover with cold water and cook twenty minutes; then add enough bread crumbs to make it thick. Make a border of mashed potatoes around a platter and pour the minced liver in the center.

Liver with bacon is the most common way of serving liver. Parboil the slices of liver, drain and roll in flour. Have a few slices of bacon fried until crisp; remove them and add an onion, cook until yellow, then remove and add the liver. Brown well on both sides, and when well cooked place on the platter and garnish with the bacon and rings of fried onion.

Bacon and small pieces of liver placed alternately on skewers, then baked in the oven is another dainty way of serving liver.

Roasted Liver.—Cut little slits in a fresh calf's liver and put into these slits small pieces of fat salt pork cut into strips. If you have, and can use, a larding needle, this may be done very neatly. Allow the liver to lie in the following mixture for an hour: The juice of one lemon, one tablespoonful of olive oil, a slice of onion, two tablespoonfuls of vinegar, three cloves, a half a bay leaf and salt and pepper. Turn frequently while soaking. Drain and wrap in buttered paper and roast for an hour and a half, longer if the liver weighs very much. When nearly done remove the paper, dredge with flour and brown, basting with a little butter. Serve with a tomato sauce.

Liver in Casserole.—Lard the liver and lay it on a bed of diced vegetables. A few stalks of celery, a small turnip, one carrot, an onion and bits of salt pork. Add two cups of stock or boiling water, two cloves, a sprig of parsley and a fourth of a bay leaf. Cover and cook until the vegetables are tender. Serve from the dish. A little flour may be added for thickening, if desired.



DON'T hunt after trouble, but look for success,
You'll find what you look for, don't look for distress.
If you see but your shadow, remember, I pray,
That the sun is still shining, but you're in the way.
Don't grumble, don't bluster, don't dream and don't shirk,
Don't think of your worries, but think of your work.
The worries will vanish, the work will be done,
No man sees his shadow who faces the sun.
—Today's.

WHAT TO EAT.

Salmon, canned, or if one is fortunate enough to live where they may be procured fresh, are one of our most satisfactory fish. They are so many nice ways of serving it that a few may be reminders. As a salad with a chopped pickle and a bit of celery and dressing it is universally liked.

Salmon Loaf.—Shred with a fork a can of salmon, pour off the oil and set aside. Add one egg, three-fourths of a cup of milk, salt, two tablespoonfuls of butter, and three-fourths of a cup of bread crumbs. Mold in a loaf, put into a pan and pour over the oil; bake half an hour and serve with tomato sauce. A cup of strained tomato seasoned with red pepper, cloves and onion. Pour around the loaf and serve.

When the fresh fish is obtainable, which is, of course, so very superior to the canned, try broiling a salmon steak. Dry it well, and dredge with flour, then lay on a well-buttered broiler or gridiron. If using an iron, turn with a broad-bladed knife and an egg whisk on top to prevent its breaking. When cooked to a light brown, lay on a hot platter, season with pepper and salt and serve at once.

Salmon Corquettes.—These may be made from left-over salmon when it has been served plain. To half a can of salmon add a cup of bread crumbs and pepper and salt. Mix two mashed potatoes with the salmon and the white of an egg, well beaten. Roll in egg and crumbs and fry in deep fat.

Salmon served with macaroni makes a good dish; also with rice.

Baked Salmon.—Take a small can of salmon, three eggs and two tablespoonfuls of butter. Drain the salmon, flake carefully, season with salt and pepper and mix with the three eggs, hard-cooked and chopped fine, and one and a fourth cups of bread crumbs. Soften with a half cup of milk or water, add the butter and form into a loaf. Bake twenty minutes.

THE presence of a large amount of cellulose in food enables us often to satisfy the appetite without injury from over-eating.

Cellulose is the woody fiber in fruits and vegetables.

WHEN MARKETING.

Remember that fresh fish have eyes bright, not glazed and sunken. The flesh is firm, the odor good.

Look to see that your milk bottles hold the standard measure. They are usually a quarter of a cup short on a quart. This amounts to a good deal in the course of a year's bills.

Does your baker carry bread uncovered through the street and handle it with uncovered hands? Or do you have it wrapped in paper? Pay a cent more and have clean bread.

Never buy cheap cotton toweling for dish towels. Linen keeps white, wears better, absorbs the water and are all-'round better towels.

Have a pair of scales, good reliable ones, in the kitchen, and keep a strict watch on the weights. A good merchant respects such a careful buyer and will see that she is fairly treated.

Suggestions for Housekepers.

When fruit juice refuses to jell, add a tablespoonful or two of vinegar to the juice. When fruit is high, save the peelings and cores and many an extra glass of good jelly may be added to the store.

An easy way to fill preserve jars is to use a gravy boat. The handle makes it easy to dip and the spout is just right to enter the top of the jar.

If fat or milk is spilled on a soft pine floor, or in fact on any floor, pour cold water on it at once and the fat will harden and save sinking into the floor and making a spot.

Before using the casserole, put it into a pan of cold water and bring the water slowly to the boiling point. This tempers the dish and makes it bear strong heat without cracking. Boil about five minutes.

Never let dish water dry in the towels; rinse first in cold water, then wash them in hot soap suds and rinse again, and dry. Towels cared for in this way will never get gray.

Keep a cork on the letter file or spindle on your desk. It may save an eye or two.

WE, ignorant of ourselves,
Beg often our own harms, which the wise powers
Deny us for our good; so find profit,
By losing your prayers.
—Shakespeare.

SUGGESTIONS FOR HOUSEWIVES.

When cane seats in the chairs sag, turn them upside down and scrub with hot soapsuds, then rinse in hot water. When dry they will be drawn tight again.

Insist upon getting sixty pounds of potatoes to a bushel, exclusive of the basket.

Use the small-sized clothes pins; they stay on better than the large ones.

Old oil cloth is useful for mats and pads to save the table. Cut in squares and use it under hot dishes.

Old paint stains may be removed from cloth by rubbing first with olive oil and then with chloroform.

Add sugar to fruit when half cooked, and save in the amount of sugar used.

A crochet hook is a good article to keep in the bathroom to draw out lint, hairs, etc., from the paste pipes which stop the flow of water.

A little powered pumice will remove stains from under the finger nails. Apply it with an orange stick.

To keep corns from troubling rub them often with a fine piece of sand paper.

To clean and renew the shine of leather, dust well, then rub with a mixture of three parts benzine and one of sweet oil.

Dip a sperm candle in the hot starch just before taking off the stove, or add a piece of paraffin as large as a pea. It keeps the starch from sticking.

A shoe case to hold half a dozen pairs of shoes and slippers is almost an indispensable addition to the inside of the closet door. The shoes are always in pairs and can be found in the dark.

As a perspiration deodorant soda is excellent. It is used dusted on like powder.

To prevent the sink pipe from clogging, use plenty of washing soda in hot water once a week.

Nellie Maxwell.

A Problem in Finance.

"Perkins looks worried. Must have some big problem on his mind."

"Yes. He's trying to figure how to fit a 1910 mortgage to a 1911 touring car."—Life.

Wide Doorways.

Club President—This is a very select club; some big men come here.

Country Visitor—I presume that's why you have such spacious doorways.—Judge.

WOMAN ESCAPES OPERATION

Was Cured by Lydia E. Pinkham's Vegetable Compound

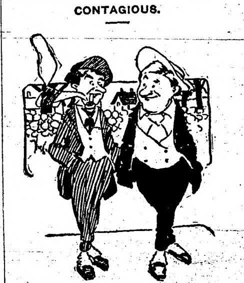
Elwood, Ind.—"Your remedies have cured me and I have only taken six bottles of Lydia E. Pinkham's Vegetable Compound. I was sick three months and could not walk. I suffered all the time. The doctors said I could not get well without an operation, for I could hardly stand the pains in my sides, especially my right one, and down my right leg. I began to feel better when I had taken only one bottle of Compound, but kept on as I was afraid to stop too soon."—Mrs. SADIE MULLEN, 2728 N. B. St., Elwood, Ind.

Why will women take chances with an operation or drag out a sickly, half-hearted existence, missing three-fourths of the joy of living, when they can find health in Lydia E. Pinkham's Vegetable Compound?

For thirty years it has been the standard remedy for female ills, and has cured thousands of women who have been troubled with such ailments as displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, indigestion, and nervous prostration.

If you have the slightest doubt that Lydia E. Pinkham's Vegetable Compound will help you, write to Mrs. Pinkham at Lynn, Mass., for advice. Your letter will be absolutely confidential, and the advice free.

CONTAGIOUS.



Gayboze—When my wife saw the condition I was in when I got home from the club last night it just staggered her!

Martini—I'm not surprised. You know you drank enough for two, old man!

Practical Illustration.

To shorten a long Sunday afternoon for Fred, aged eight, his mother told him that he might illustrate the twenty-third Psalm in any way he chose. Quiet reigned for a time, as Fred, busy with pencil and pad, drew "shepherd" and "green pasture," "rod and staff." Then a silence ensued, followed by a noisy clatter which brought his mother to the room. Fred was busily arranging a train of cars, a toy gun, marbles, etc., on the table.

"What are you doing, Fred?"

"Why," he answered, "these are the presents of my enemies."

A HIT

What She Gained by Trying Again.

A failure at first makes us esteem final success.

A family in Minnesota that now enjoys Postum would never have known how good it is if the mother had been discouraged by the failure of her first attempt to prepare it. Her son tells the story:

"We had never used Postum till last spring when father brought home a package one evening just to try it. We had heard from our neighbors, and in fact every one who used it, how well they liked it.

"Well, the next morning Mother brewed it about five minutes, just as she had been in the habit of doing with coffee without paying special attention to the directions printed on the package. It looked weak and didn't have a very promising color, but nevertheless father raised his cup with an air of exceptancy. It certainly did give him a great surprise, but I'm afraid it wasn't a very pleasant one, for he put down his cup with a look of disgust.

Mother wasn't discouraged though, and next morning gave it another trial, letting it stand on the stove till boiling began and then letting it boil for fifteen or twenty minutes, and this time we were all so pleased with it that we have used it ever since.

"Father was a confirmed dyspeptic and a cup of coffee was to him like poison. So he never drinks it any more, but drinks Postum regularly. He isn't troubled with dyspepsia now and is actually growing fat, and I'm sure Postum is the cause of it. All the children are allowed to drink it and they are perfect pictures of health." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Qualified Prayer.

Marion's mother was ill, and the aunt who took her place at the head of the household plied the children with unaccustomed and sometimes disliked articles of diet. One day, after being compelled to eat onions, Marion refused to say grace.

"Then you must sit at the table until you are ready to say it!" was the aunt's stern judgment. An hour or so later, when the brilliant sunshine and impatient calls of her comrades together comprised an irrestible appeal, Marion capitulated—thus:

"Oh, Lord, make me thankful for having had to eat horrid old onions, if you can do it. But I know you can't."

Don't Expect Kindness.

There are six sorts of people at whose hands you need not expect much kindness. The narrow minded think of nobody but themselves, the lazy are too indifferent, the busy have not time to think, the rich disregard appeals for kindness, the poor have neither spirit nor ability, and the good natured fool is not capable of serving you.—Home Notes.

Too Little Ton.

Smiley—That iceman down the street will have to change his name if he wishes to do any business.

Wiley—Why? What's his name?

Smiley—Littleton. Some people might not notice it, but I am afraid most folks would shy at a name like that on an ice-dealer's sign.

Such a platitude of a world, in which all working horses can be well fed, and innumerable working men die starved.

The Flavour of Post Toasties

Is so distinctly pleasing that it has won the liking of both young and old who never before cared much for cereal food of any kind.

Served direct from the package—crisp and fresh, and—

"The Memory Lingers"

Postum Cereal Company, Ltd., Battle Creek, Mich.

QUALITY AND CONFORMATION OF TYPICAL DRAFT HORSES

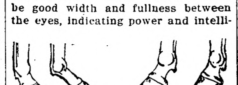
Ideal Animal Will Show Vigorous, Lively, Energetic Disposition, Yet be Docile, Tractable and Intelligent—Form Should be Broad, Deep and Evenly Proportioned.

(By A. S. ALEXANDER.)

The typical, ideal draft horse stands over 16 hands (5 feet 4 inches) and under 18 hands high, and weighs 1,600 pounds or more in ordinary flesh.

The form should be broad, deep, massive, evenly proportioned, and symmetrical, the entire make-up suggesting great strength and weight. The body should be massive, blocky, and compact, and squarely set on short, broad, clean, sturdy legs showing fine skin, large joints and prominent tendons.

The head should be large, proportionate in size to the body, well formed, clean and free from coarseness and irregularities. The forehead should be broad, full and not dished or too prominent. The profile of the face should not be too straight or of "Roman-nose" form. There should be good width and fullness between the eyes, indicating power and intelligence. The eyes should be bright, clear, mild, full, sound and of the same color. The lids should be smooth, well arched, and free from angularities and wrinkles. The ears should be of medium size, well placed, alert, normally active, and free from coarseness. The nostrils should be large and flexible; the lips thin, even, and firm, and all of the parts neat and clean cut. The skin and hair of the muzzle should be of good quality. There should be a wide space between the lower jaws free from meatiness, abscesses, or tumors. The neck should be of a size proportionate to the rest of the body, well arched, evenly muscled, with large windpipe and smooth insertion into the shoulder. It should not curve downward (ewe neck) or be broken in crest.



Correct and Incorrect Types of Pasterns and Feet; a, Pastern Too Straight and Upright; b, Pastern Too Sloping; c, Correct Type of Forefoot; d, Correct type of Hind Foot.

The shoulder should be moderately sloping, smooth and extending well back.

The arm, which extends from the point of the shoulder to the elbow, should be short, heavily muscled and well thrown back. The forearm, extending from the elbow to the knee, should be long, flat, wide, heavily muscled, and free from coarseness. The knees should be straight, wide, deep, strongly formed, and smooth. The cannons, extending from the knees to the fetlocks, and composed chiefly of bones and tendons, should be short, strong, clean and wide, with prominent and smooth tendons. The fetlocks should be wide, straight, strong, and free from puffs, callouses, or interfering sores. The pasterns, extending from the fetlocks to the hoof heads, should be moderately sloping, strong and clean.

The tendency in the average draft horse is toward short, upright pasterns and stubby gait. This is highly objectionable as are also very long, weak pasterns, which bring the back of the fetlocks too close to the ground. The latter cause strain upon the tendons when drawing heavy loads. The short upright pasterns are even more objectionable since they prevent springy, elastic action of the feet and allow concussion to jar the bony columns of the legs. The irritation and inflammation induced by continued jarring often results in sidebones, ringbones, corns and kindred diseases. The bone of the pastern should have a slope of about 45 degrees and the front of the foot 50 degrees. Horses having upright pasterns and consequent stubby action wear out quickly when used upon paved streets.

The hoofs should be ample in size, sound, smooth and symmetrical in shape.

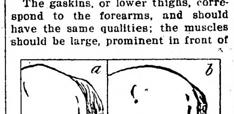
The chest, inclosing the heart and lungs, should be roomy in every respect. "An ample, wide, deep chest denotes vigor, power, strong constitution and easy keeping qualities." The ribs form the "barrel" and should be deep, well sprung and carried low at the flanks and close to the hips. The back, extending from the rear of the withers to the last rib, should be broad, straight and muscular. In general appearance it should denote great strength and compactness. The loins should be short, wide, deep and strong. The underline should run back full and low from the floor of the chest.

The upper part of the hind quarter should show great development of wide, thick, smooth muscle without angularities and coarseness. The croup, the part of the hind quarter from top of the hip to the insertion of the tail, should show comparative levelness, ample muscle and great strength.

The most notable deficiency of this part in draft horses is excessive droop, or steepness and shortness, with weakness of muscle. Such conformation tends to slouchiness in gait and often is associated with "sickle" hocks. The draft croup should be smooth, of fair length, and neither too steep nor perfectly level.

The thighs from the hips down to the stifles should be strong, muscular, wide and long.

The gaskins, or lower thighs, correspond to the forearms, and should have the same qualities; the muscles should be large, prominent in front of the bone, and carried well downward. The hocks are most important joints because the great strain of starting and hauling a load falls upon them, and they will soon break down if not very strong and perfectly sound. The joints should be large, clean, sharply defined, wide, deep and well set.



Good and Poor Form in Croup and Hips; a, Too Short and Steep; b, Good Draft Type.

Forage for Sheep.

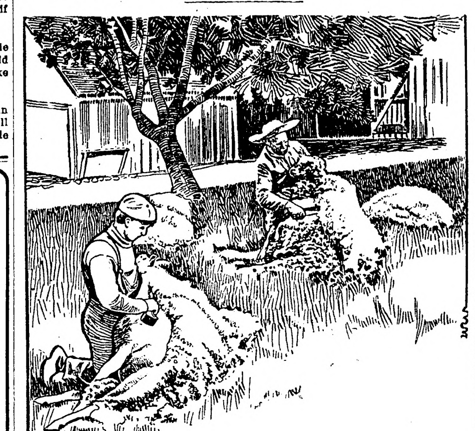
Every flock owner should give special attention to providing the best of supplemental forage and pasture for his sheep to help out the other pasture and supply the flock with a change of feed.

Every sheep feeder should awaken to his opportunities and put a stop to selling his lambs in a poor condition.

The comparatively small expense of maintaining a breeding flock and fattening wethers is distinctly attractive to the trained business mind.

A ewe showing too much masculinity and a ram showing too much feminity are to be avoided for such animals are apt to produce progeny that are not uniform.

SHEARING SHEEP IN OLD WAY

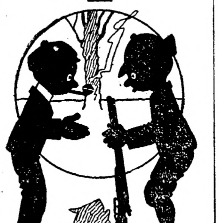


Machine clippers are rapidly taking the place of hand shears, as they do the work more quickly and with less laceration of the animal's skin. On the large sheep ranches of the west a number of sheep-shearing machines are run from a shaft propelled by an electric motor or gasoline engine. Smaller machines are also made which can be turned by hand and with the aid of one of these two men can do as much work in a day as six in the old-fashioned way.

Dairy Farming in Arkansas.

Dairy farming in Arkansas is attracting wide attention and is growing very rapidly.

ADDED 'EM UP.



Hix—You said your gun would shoot 900 yards.

Dix—I know I did.

Hix—It's marked to shoot only 450 yards.

Dix—I know, but there are two barrels.

PHYSICIAN SAID ECZEMA CAME FROM TEETHING

"When my little girl was about eight months old, she was taken with a very irritating breaking out, which came on her face, neck and back. When she first came down with it, it came in little watery-like festers under her eyes, and on her chin, then after a few days it would dry down in scaly, white scabs. In the daytime she was quite worrysome and would dig and scratch her face nearly all the time.

"I consulted our physician and found she was suffering from eczema, which he said came from her teething. I used the ointment he gave me and without any relief at all. Then I wrote for a book on Cuticura, and purchased some Cuticura Soap and Ointment at the drug store. I did as I found directions in the Cuticura Booklet, and when she was one year old, she was entirely cured. Now she is three years and four months, and she has never been troubled with eczema since she was cured by the Cuticura Soap and Cuticura Ointment. (Signed) Mrs. Freeman Craver, 311 Lewis St., Syracuse, N. Y., May 6, 1911. Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 2 K, Boston.

A Matter of Creed.

"Two men were disputing over their respective churches," says the Slater News in reviving an old story which is still good. "One was a Baptist and the other a Presbyterian. Finally one of them called a neighbor who was passing and asked his opinion as to which was the better church in which to be saved. 'Well, neighbor,' he said, 'son and I have been hauling wheat for nearly forty years. There are two roads that lead to the mill. One is the valley road and the other leads over the hill, and never yet has the miller asked me which road I came, but he always asks, 'Is the wheat good?' "—Kansas City Times.

A Trifle Withered.

In his native tongue no one could have made more graceful speeches that Monsieur Blanc, but when he essayed compliments in English he was not quite so successful.

"Have I changed in the five years since we met in Paris?" asked the elderly woman who desired above all things to be thought younger, much younger, than she was.

"Madame," said the courtier, his hand on his heart, "you look like a rose of 20 years!"—Youth's Companion.

A FREE SCHOLARSHIP
in the school of his choice is offered by Prof. Watkins of Fargo to any young person who can find in the entire northwest another school so well equipped for the teaching of business and shorthand as the Dakota Business College—yet tuition is no higher there than in other business colleges.

Forebodings.

Webster had made his great speech in reply to Hayne.

"Some day, I suppose," he mused, "it will devolve upon Hennery Cabot Lodge or Winthrop Crane to squelch Ben Tillman, and I'm not so blamed sure they can do it!"

Children Cry for Fletcher's Castoria

Lingering.

"Did you have a trial before you hanged that horse thief?"

"We sure did," replied Piute Pete "He was a mighty bad man and we wanted to give him all the unpleasant suspense possible."

Do you ever have Headache, Toothache, or Earache? Most people do. Hamlins Wizard Oil is the best household remedy and liniment for these everyday troubles.

A woman isn't self-made just because she makes her own complexion.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c a bottle.

Sooner or later most of us get what we deserve

HAVE YOU SUSPECTED YOUR KIDNEYS?

Thousands suffer from backache, headache, dizziness and weariness without suspecting their kidneys. Mrs. Joseph Gross, Church St., Morrillton, Ark., says: "For weeks I was all doubled over with pain. I became so dizzy I had to grasp something to keep from falling and my ankles were swollen to nearly twice their natural size. None of the doctors understood my case and I felt myself sinking lower day by day. I improved rapidly through the use of Doan's Kidney Pills and at last was entirely cured."

"Every Picture Tells A Story"

"When Your Back is Lame, Remember the Name—DOAN'S."

For sale by druggists and general storekeepers everywhere. Price 50c. Foster-Milburn Co., Buffalo, N. Y.

The Trouble With Humor.

E. N. Brown, president of the National Railways of Mexico, discussing in New York a railroader who was always out of work, said: "He is too quick with his tongue—that's his trouble. He has a ready wit that he is too apt to use upon his boss." Then, with a laugh Mr. Brown uttered this epigrammatic and true saying:

"Repartee has lost as many men their jobs as it has made other their reputations."

Stop the Pain.
The hurt of a burn or a cut stops when Cole's Carbolisalve is applied. It heals quickly and prevents scars. 25c and 50c by druggists. For free sample write to J. W. Cole & Co., Black River Falls, Wis.

True Philosophy.

To have what we want is riches, but to be able to do without is power.—George Macdonald.

Color more goods brighter and faster colors than any other dye. One 10c package colors all fibers. They dye in cold water better than any other dye. You can dye any garment without ripping apart. Write for free booklet—How to Dye, Bleach and Mix Colors. MONROE DRUG COMPANY, Quincy, Ill.

SOLDIERS AND CIVILIANS MADE NON-SINKABLE

KEPT AFLOAT BY THEIR CLOTHES

BERLIN.—A remarkable demonstration was given the other day in the Spree, near here, of a new fabric designed to make clothing so buoyant that it will keep its wearer afloat in the water. The composition of the invention which brings about this result is a well-guarded secret. To don a garment lined with it is to become unsinkable. On the occasion mentioned, infantrymen, in full marching kit, clad in uniforms lined with the material, which rendered the clothing neither heavier nor thicker than usual, threw themselves into the water, and not only did not sink, but were able to "march" in the water and to fire. At the same time, coffee was served to a party in the water, waiter and guests being clad in the special fabric. It is reported that recently the inventor, wearing his suit, jumped into the water before the Kaiser's steamer to demonstrate the value of his device, and that the police arrested him for impropriety.

DEVOUR PIGS' FEET

City of Chicago Eats 40,000,000 Every Year.

Big Demand for Pickled Product in Windy City—Lovers of Delicacy Are Men of Brawn and Muscle.

Chicago.—Chicagoans eat annually about 40,000,000 pigs' feet.

This was the estimate made today by packers and retail meat dealers. Incidentally it was announced that the pigs' feet season is in progress. Within a few days retail meat dealers expect a big demand for the article and are laying in big stocks.

Chicago is said to consume more pigs' feet annually than any other city in the country. The demand is largest in the foreign colonies, but a large number of Americans also are fond of the product. The Germans and Scandinavians are said to be the largest consumers, many of those nationalities doing their own pickling and eating the meat at all times of the year.

This year nearly 5,000,000 hogs have been received at the Union stock yards and most of the feet have been sold to dealers in Chicago and vicinity.

"Pigs' feet nearly always find a ready market," said a representative of the Swift Packing company. "The big demand is in the winter. Thousands of fresh pigs' feet are sold by retail dealers to families who pickle them. The packing companies also pickle large quantities of them throughout the year and in the fall and winter find a ready market."

"Yes, there is always a demand for pigs' feet among the Scandinavians," said Charles Erickson, meat dealer, 3212 Sheffield avenue. "Most of my customers prefer to pickle them themselves and buy large quantities of the fresh article late in the summer or early fall. However, I have found that the article is liked by other nationalities, especially the Germans. Like oysters, pigs' feet have their regular season. This continues throughout the fall, winter and spring, but there are many who eat them during the summer months as well."

Pigs' feet as a health and flesh producing food was commended in many quarters.

"It is a notable fact that most of the lovers of pigs' feet are among the men of brawn and muscle," said Andrew Benson, 3314 North Clark street. "There is little or no demand for the article among the wealthy class, but the man who toils all day in the shop or open air is, as a rule, fond of pigs' feet."

BELSHAZZAR CALLED A PIKER

University Professor Says Supposed King Was Only Deputy—Says Daniel Made Many Errors.

Chicago.—Belshazzar of Babylon was not a king. The famous host who feasted a thousand of his lords in state has been weighed in the balance of higher criticism and has lost his royal crown.

Prof. Herbert L. Willett of the University of Chicago Divinity school reduced the ancient hero's rank in a lecture on "The Appeal to the Supernatural" the other day in Haskell hall.

Far from being a king and sole owner of the golden vessels in the Babylonian palace, Belshazzar was merely a deputy, the professor declared, and only "a kind of deputy" at that.

The writer of the book of Daniel erred in many historical facts, Professor Willett told the students. The story of Belshazzar's feast and the handwriting on the wall was given as but one example of inaccuracy.

Lost Jewel in Chair.

Los Angeles, Cal. — A diamond weighing two and a half carats, a priceless heirloom in the wealthy Lanphar family of Mexico for more than 300 years, lay for ten days in a chair in the lobby of the Van Nuys hotel unnoticed by the hundreds or more persons who occupied the chair during that time. The gem was found by Campbell McGavin, a bellboy, who reported his discovery to the clerk. Miss Lanphar offered the bellboy $100 as a reward, which he refused to accept. The diamond was given to Miguel Lanphar by Philip II. of Spain in 1590.

Bank of England Is Sinking

Financially a Gibraltar of Money, but a Little Too Heavy for Earth—Repairs Begin at Once.

London.—The phrase "As safe as the Bank of England" is rather shaken in its meaning by news of a subsidence of the foundations of the famous old building in the city.

The clerks in the private drawing office—which is situated at the Princess street corner of the Bank of England and communcates with the bill office—were startled recently by a loud report coming apparently from the roof of the building.

Careful examination by experts failed to disclose any defect in the roof, and the authorities, therefore, decided thoroughly to inspect the foundations of the bill office. It was then found that an undoubted subsidence had taken place. The foundations have sunk away from the main structure to such an extent that a rod can easily be swept through the intervening space.

Repairs were at once begun, and the work now in hand involves the underpinning of the Princess street corner of the bank. This necessitates the cutting away of the original wooden piles upon which the bank—which covers an area of between four and five acres—has stood for nearly 200 years, and the putting in of, a solid raft of concrete, six feet in depth, beneath the outer walls. In spite of the years that they have lain buried, the piles brought to the surface are in an extraordinary good state of preservation.

During the necessary excavations many interesting curios in the form of Roman pottery ware, tusks of boars and fossilized remains of other animals have been unearthed. The work now in progress does not interfere with the daily routine of the bank's business.

The vaults containing the millions of pounds' worth of unclaimed gold and silver plate and securities remain intact. In addition to the work at the Princess street corner an enlarged stock office is in course of construction at the Bartholomew lane end of the bank, and three floors have been added to the library.

BABY IS SHAKEN FOR A PIN

Pat Swallowed It, Aunt Got It and X-Ray Test Is Called Off—Curious Mix-up on First Avenue.

New York.—"Pat has swallowed a pin!" screamed Mrs. Susie Gibbon, as she dashed from her apartments on the third floor of No. 846 First avenue, and ran with her eighteen-months-old baby in her arms, into the home of her sister, Mrs. Mary Mahoney, across the hall.

Mrs. Mahoney seized the struggling Pat and dangled him by the legs for five minutes. Then he was taken to Flower hospital.

The doctors were about to turn the X-rays on Pat when Mrs. Mahoney appeared carrying a pin.

"Pat swallowed that pin, doctor," she began, "but I shook it out of him and didn't know it. Here's the pin."

Then Mrs. Mahoney took Pat home

WONDERS OF LONG LIFETIME

Michigan Nonogenarian Who Has Lived Through Ninety-one Most Marvelous Years.

Plainwell, Mich.—From the slow plodding of the saddle horse and the groaning ponderosity of the ancient stage coach to the rapid rush of the great locomotive; from the lingering postman to the wireless message; from the crude sailing vessel to the airship of the present day—these are some of the changes witnessed by anyone who may have lived through the most of the past century—an epoch-making period—and Mrs. Sophia Bush of this village, who recently passed her ninety-first birthday, remembers them all and her lively and unclouded mentality still maintains an interest in these great things of life, extraneous though they may be to her quiet ways of existence.

MRS. SOPHIA BUSH

Grandma Bush, as she is commonly called, is a remarkable woman, silver of hair and benign of expression, and she scans her daily paper without the aid of spectacles.

She was born at Dingwall in the highlands of Scotland. It was a little town and during her girlhood she remembers seeing there Lord Brougham, Lord John Russell and William E. Gladstone, indeed the grandfather of the last named was mayor of the town. She remembers distinctly the festivities incidental to the coronation of Queen Victoria.

She came to America in 1839 by sailing vessel and the voyage took five weeks. The few steamboats of that day were considered entirely too dangerous to be trusted. From New York she came west via the Hudson river, Erie canal and the great lakes. At that time there were only two railroads in the United States; one ran from Schenectady to Albany, N. Y., and the other from Detroit to Ann Arbor, Mich. By means of the latter railway, in a train that was plain, slow, cramped and jolty, she reached Ann Arbor. There a man and team were engaged and for days she rode through the dense forests to Gun Plains, Allegan county, where her home has since been.

In contrast is her latest journey, upon which she visited Chicago. Boarding a parlor car at her home station, she reached the city without change, and an automobile took her to the home of her relatives. She is not at all nervous about the "devil wagons" and rather enjoys a little speed stunt down the boulevard. In going to the station upon her return home, she motored past Grant park, where a dozen aviators were clearing the air like birds, in close prophecy of yet more wonderful modes of transportation.

ENGAGEMENT IS ANNOUNCED

Miss Olga Roosevelt, a Popular Young Washington Heiress, Soon to Be Married.

Washington.—Miss Olga Roosevelt, whose engagement to Dr. Breckenridge Bayne of Washington has just been announced, is the daughter of Robert Roosevelt of Washington and New York. She is the possessor of several million dollars, which she inherited from her mother, who was Mr. Roosevelt's first wife. Miss Roosevelt made her debut in Washington two years ago, and is one of the most popular of the capital's younger set.

MISS OLGA ROOSEVELT

NOTES from MEADOWBROOK FARM

By William Pitt

Keep the pigs growing.

Chicks must have fresh water.

Never expect to work miracles with the cow.

Chicken wire makes a good trellis for tomatoes.

The greatest damage to soil is usually done after harvest.

Grind the corn you feed the old sheep. Their teeth may be poor.

Young chicks still with the hens thrive better on a variety of foods.

The disk is the tool to prepare the corn stubble for the small grain.

Horses enjoy a good drink, but they don't have to go to town to get it.

Never throw fruit of any kind into a basket or box. Lay it in gently.

The production of a cow above a certain standard constitutes the profit.

Manure, sod and lime are three best ways of increasing the humus in the soil.

Keep the hedges clipped. Buckthorn is one of the easiest hedges handled.

There is hardly a limit to the resources of the rat to exterminate chicks.

Sheep suffer the least from a deficiency of drinking water, and horses and cattle the most.

It is well worth while to exert every energy possible to keep your present supply of live stock.

When the pigs' tails begin to hang down straight it is time to get out the worm medicine.

A good colt bred for a purpose, and fed and trained for a purpose, is never a drug on the market.

Spray pumps and spray materials are now the main topic of conversation among fruit growers.

The best use of stable manure is to haul it out as fast as made and spread it broadcast over sod ground.

The present shortage of forage crops should emphasize the necessity for a reserve supply in silos.

More small hogs have probably been marketed in the last two years than ever before during the same time.

For the protection of dairy stock, as well as for live stock generally, windbreaks and tree sherter are invaluable.

A litle salt sprinkled with coal ashes is as much relished by the hogs as "Cracker Jack" is relished by the boys.

The first step in better cream quality in hot weather is to separate the milk immediately, as soon as it is milked.

Keep the new strawberry bed clean cultivated until the runners are matted too much to permit the cultivator to go through.

Those farmers who kept up their cultivation of the soil not only kept the corn over the dry spell but increased the yield.

The wild high-bush cranberry, common in many marshy districts, is good, both as an ornament on the lawn and for making jelly.

The right time to castrate pigs is a week or so before they are weaned, if healthy; if delicate, wait a week or so until they are stronger.

All milk cans should be washed first in cold water, then thoroughly cleansed with warm water, and finally rinsed in scalding hot water.

We cannot expect even the best pure-bred to produce animals without a blemish every time. It is always a case of the survival of the fittest.

An excellent plan in providing against shortage of pasture is to grow each year some of the supplementary crops, such as rye, millet, cow peas, rape or sorghum, to be used during the dry season.

After some summer rain you will find your hogs wallowing in some puddle and enjoying it. Then is the time to have crude oil on hand and pour a pailful in the wallow. It will float on top and kill the lice on the hogs. This is cheap and easy warm weather way of dipping.

Provide the hogs with a wallow.

The cement silo is growing steadily in favor.

The A-shaped pig pen is too hot for summer.

Many weeds interfere with the rotation of crops.

Silage may be cut in almost any size desired.

Watch the swill barrel. Keep it sweet and clean.

Hogs thrive much better on a ration rich in nitrogen.

There are a few who save some of their own seed from the garden.

Hogs enjoy a tank of clean water to bathe in during the hot days.

Never allow roses to remain on the bush until the petals begin to fall.

The common and cut-leaf elders have proved good lawn plants this year.

One of the best foods for growing chickens is the curd from skimmed milk.

A majority of poorly formed draft horses have shoulders which are too steep.

Get a good variety of Lima and bush beans and save the first to ripen.

Too many farmers have failed to appreciate the possibilities of rye as hog pasture.

Second crop alfalfa is fine for the pig, but if pastured very closely it will soon run out.

A straw-colored open shed for the stock is a much needed thing on the treeless farm.

Rotted manure should be spread on the plowed ground and well worked in with the harrow.

Even if we can not get fancy prices for our horses, there are good profits in growing colts.

A good sized horse has a wider field of usefulness than a small one, and is worth more accordingly.

Uniformity in the size of a bunch of hogs has a great deal to do with the price they will bring.

If you have your hogs on sour milk, keep them there. To change to sweet may upset their digestion.

The large farm is more profitable than the small farm if managers of the proper ability can be had.

There is no feed better for young pigs and calves than sweet skim milk right from the separator.

If a poultryman or a farmer does not take an interest in poultry, he had better not keep any at all.

Keep the sweet peas picked. It is better for the plants and the house can be made more attractive by their use.

Save seeds of trees and shrubs, as they ripen, and plant them. This is one way to multiply your ornamental plants.

Many people recognize the value of a pure bred sire but comparatively few stop to think just how valuable he is.

The sow should be given a warm mill-feed slop, made fresh for each meal, whole oats and a little sound corn twice a day.

Weed out the inferior birds, whether as to size, form or quality, at the earliest possible moment, feeding the two lots separately.

A large per cent. of poultry, especially young chicks, die through drinking from puddles and dirty water in their drinking troughs.

Every inclosure for the hogs should be perfectly tight, and with excellent wire fences that are now manufactured this is an easy matter.

It makes some horses ugly to work them with horses that do not travel up with them. Match them as to gait as well as to other things.

Supply clear water. It is essential to health and to the hen for the production of the egg, the contents of which are nearly three parts water.

If sows are carelessly fed during pregnancy, trouble of some kind is sure to follow at farrowing; if overfed after farrowing, losses may occur among the pigs from scours and thumps.

Keep in mind that if your silo is partly filled with Indian corn or any other one crop, you can later finish filling it with any other crop or crops which you may grow, and in this manner get your silo full.

No up-to-date farmer will be without a hand separator, and the skim milk, when improved in quality by the addition of some concentrated food, is solving the problem of raising good dairy stock on the farm, in addition to turning every ounce of fat in the milk into butter.

MINNESOTA
HISTORICAL
SOCIETY.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, SEPTEMBER 29, 1991 NO. 9.

6 ARE MURDERED

MEMBERS OF TWO NEIGHBORING FAMILIES ARE VICTIMS IN COLORADO CRIMES.

NEAR M. W. A. HOME

Axe Used by Unidentified Murderer Is Picked Up Near the Scene.—Police See No Motive for the Deed.

Colorado Springs, Colo. — Murdered in their own homes while they slept by an unidentified person, who used an axe, the bodies of six persons, three in each of two neighboring houses, were found here. The heads of all had been smashed in and the appearance of the bodies indicated they had been dead several days.

An axe which had been loaned to Mrs. Henry F. Wayne, one of the victims, by J. R. Evans, a neighbor, last week, was found, blood stained, by Mrs. Evans near the back door of the Wayne home. No attention was paid to this fact, however, as it was thought the axe had been used in killing chickens.

The dead are:

Mrs. Alice May Burnham, wife of A. J. Burnham, cook at the Modern Woodmen sanitarium. Their two children, Alice, aged 6, and John, aged 3 years.

Henry F. Wayne, a consumptive, until recently a patient at the Woodmen sanitarium; Mrs. Wayne, and their one year old baby girl.

The discovery of the bodies was made by a neighbor who called at the Burnham home to spend the afternoon. Not getting any response and noticing a strong odor, she forced an entrance. The bodies of Mrs. Burnham and those of her two children were found in their beds, which were covered with blood, and the walls and ceiling also were spattered.

The woman rushed to the street and [illegible] persons went to the Wayne house, where there had been no signs of life since Sunday, and the same terrible scene was presented. Covered in bed as though in their natural sleep were the bodies of Mr. and Mrs. Wayne and their baby, all horribly mangled as in the case of the bodies in the Burnham house.

So far as can be learned, there is no motive for the crime. Both the Burnham and Wayne families were of moderate means. Burnham, who lives at the sanitarium where he is employed, about ten miles from here, was placed under arrest soon after the discovery of the crime, but there seems nothing to implicate him in the tragedy.

His employers say he was at work when the crime must have been committed. He is a member of Colorado Springs Camp No. 7226, M. W. A., and is a native of Michigan. He was last seen at his home Sunday afternoon and is said to have left there about 5 o'clock.

Little is known of the Wayne family here except that Wayne came to the Modern Woodmen sanitarium about ten months ago from Indiana as a patient. One month ago his term in the institution was up and he brought his wife and child here and rented the house in which they were murdered. Neither has relatives here.

When brought into the morgue, the bodies were almost unrecognizable. The head of every one of the six victims was either cut or smashed open, and in almost every case the number of wounds indicated that the murderer had cut and smashed until he was sure that he had destroyed life.

ODD FELLOW CONTROL CHANGES

Military Branch Placed Under Grand Lodge Direction.

Indianapolis, Ind. — Control of the Patriarchs Militant was given into the hands of the grand sire of the sovereign grand lodge when the sovereign lodge voted that the commander of the militant branch of the order should be appointed by the grand sire instead of elected by the rank and file, as at present.

Gen. M. A. Raney of Iowa, commander of the Patriarchs Militant, and his friends had opposed the reform, and he will retire on Jan. 1 next to be succeeded by a commander to be named by Grand Sire John B. Cockrum of Indianapolis. It is generally conceded that if the sovereign lodge had not taken this action, General Raney would have been re-elected for a four years' term. Asked if he would appoint Raney, Mr. Cockrum declined to discuss the matter.

The sovereign lodge empowered state grand lodges to establish sanitariums for members suffering from tuberculosis, but it was decided not to establish a national home. Twenty-five thousand Odd Fellows marched in a brilliant parade through the thronged principal streets.

SENTENCE BOGROF TO DIE

ASSASSIN HEARS HIS DOOM WITHOUT A TREMOR.

Chief of Police Only Witness Heard Before Courtmartial at Kiev.

Kiev, Russia.—Dmitry Bogroff, the assassin of Premier Stolypin, was tried by courtmartial and sentenced to death by hanging. Bogroff shot M. Stolypin during a gala performance at the opera, and the premier succumbed to the wound.

Bogroff is about 24 years old and a graduate of Kiev university. He was a member of the secret police and also a revolutionist, and is said to have been assigned to the murderous task by the revolutionary organization.

The courtmartial was attended by 20 officials, six of them having been witnesses of the shooting, among them Minister of Justice Chtcheglovitoff. In view of Bogroff's plea of guilty, however, none of them was called to the stand, and only Colonel Kuliabko, chief of the secret police, was examined. It was through the instrumentality of Kuliabko that Bogroff gained admittance to the theater to assassinate M. Stolypin.

Bogroff declined counsel. Every one was amazed at his calmness and firmness of his voice as he related the history of his life. He also described how he had deceived the police in getting the opportunity to assassinate the premier, but did not betray any of his accomplices. He heard the sentence of death pronounced without even a tremor.

Stolypin's Funeral Held.

The funeral of Premier Stolypin was held in the Pechersky monastery and was the occasion for universal mourning. Deputations came to Kiev from all parts of the empire to attend the ceremony and laid more than 200 wreaths on the catafalque.

Thousands of persons were unable to gain admission to the church and grouped themselves outside the edifice. After the ceremony had been completed three volleys were fired by the troops as a military honor to the dead man.

ACROSS ATLANTIC BY AIR.

Daring Danish Aviator Proposes Hazardous Trip.

New York, N. Y. — The conquest of the Atlantic, the most ambitious exploit yet undertaken by an aviator, is contemplated by a Danish airman who describes his plans in a letter published in the Nord Lyset, a Danish newspaper published in Brooklyn. This aviator writes that he has enlisted the necessary financial aid and made arrangements to fly next spring from Copenhagen to New York, resting only at London and Queenstown, and upon ships stationed at intervals across the North Sea and the Atlantic ocean.

At the aviator's request his name is withheld at this time. He says he will use a biplane of American manufacture and expects to fly at the rate of about 56 miles an hour.

The steamers stationed at intervals across the ocean will be equipped with landing stages and apparatus for generating a wireless current which will supplement gasoline as motive power for his engines. By the same means he expects to communicate with his auxiliary ships by wireless telegraphy.

In case of accident the Danish airman believes that he can notify the nearest ship of his plight and then by means of pontoons with which the biplane will be equipped keep afloat until rescued.

Aviator's Leg Broken.

Batavia, New York. — Todd C. Shriver, a Hammondsport aviator, fell in Captain Baldwin's Red Devil biplane at the Genessee county fair. His left leg was fractured and he was severely bruised. Shriver had just started his first flight and had reached a height of about 100 feet when a gust of wind caught his biplane causing it to fall.

SIXTY PERISH AT NAPLES.

Scores of Others Missing As Result of Floods and Storms.

Naples, Italy. — Sixty bodies have already been recovered and it is feared that the casualty list will be much larger as a result of violent storms and floods here. Scores of others are missing and are undoubtedly dead, while the property damage is enormous. Results from the outlying districts are fragmentary, but it isfeared that there is a heavy death roll.

Patriarchs Militant Head Named.

Indianapolis, Ind. — Major General A. R. Stocker of Miamisburg, O., was appointed commander of the Patriarchs Militant, the military branch of the Odd Fellows by Grand Sire John B. Cockrum.

WHEAT SOARING

AFTER WILD SCENES IN MINNEAPOLIS CHAMBER, DECEMBER ADVANCES 6 CENTS.

5,000,000 BUS. ORDERED

Heavy Declines in Wall Street Stocks—Partial Recovery Follows Bear Drive Against Steel and Hill Roads.

Minneapolis, Minn. — Wild scenes were witnessed in the wheat pit when the chamber of commerce began business and the price advanced 5⅛ cents in five minutes, scoring 6 cents advance before the day was over. While frantic brokers fought to fill buying orders for wheat in Minneapolis, heavy declines occurred in Wall street. Steel common fell 5 points, Canadian Pacific advanced 4¾, Great Northern and Northern Pacific fell 2 points, Soo went down 5 points, Union Pacific was strong, and Wisconsin Central up from 48 to 49½.

Barley went up 8 cents in Minneapolis. Flax, corn, oats and rye also registered material advances.

Wild-eyed grain brokers, seizing telegrams that were rushed to them, dashed into the pit to fill orders, but the price went up so fast that they could not get them filled without paying up for the wheat.

Rush of Country Orders.

North Dakota alone sent into Minneapolis buying orders for 1,000,000 bushels of wheat.

Messages from Fargo, Grand Forks, Minot and Devils Lake to Minneapolis grain commission firms, said that the towns were filled with farmers who had stopped their theshing or other farm work and were in town to celebrate and talk over the defeat of reciprocity.

From towns like those named, and from Comstock, Sioux Falls, Aberdeen and other places where Minneapolis brokers maintain branch offices with private wire connections, the orders to buy wheat were heavy.

Immense Amount Sold.

Buying directions for five million bushels or more came in before the noon hour in the form of orders for 5,000 and 10,000 bushels from towns in Minnesota and the Dakotas, and some from western Canada points.

Meanwhile the local element that trades in privileges or "puts and calls" found themselves obligated on sales of a million or more calls at prices from $1.06¼ to $1.07, and they started to cover. Chicago held back after a moderate advance, but Minneapolis kept climbing.

The advance was so sudden and direct that reaction followed, December wheat going back from $1.09 to $1.07⅝, and May, which had risen from $1.07¾ to $1.12¾, came back to $1.11¾. But the excitement broke out afresh along towards the noon hour. December went to another high point at $1.09⅝ and May bounded up to $1.13⅝. Then the last of the short sellers bought in, December shot up to $1.10¼ and May to $1.14¼. December closed at $1.09⅝@1.09¾, and May at $1.13⅝.

"Calls" for December wheat, sold on the curb, after the close at $1.13 or 4¼@4⅜ cents above the closing price of the option, a difference greater than for years and witnessed only a few times before during periods of great excitement.

Slumps in Stocks.

In the stock market, Steel common that had declined from 63 to 58 Thursday, fell quickly to 53¼, and Steel preferred that had been 114 and had declined before the close to 106, was down to 103¾. Great Northern fell from $124½ to 120¼, Northern Pacific to from 114½ to 112⅞ and other stocks were proportionately weak, except Union Pacific and Canadian Pacific, which were stronger.

Local traders who stood about the tickers and saw stocks go sliding downward were surprised to see them turn suddenly and start up again later in the day. Steel came up to 57¼, Northern Pacific to 114 and Great Northern to 123. Canadian Pacific against yesterday's close of 224¾, sold up to 229⅝.

AMERICAN TENNIS TEAM.

Larned Heads Party That Will Tour Australia.

Boston, Mass. — The makeup of the American Lawn Tennis team that will visit Australia this winter in quest of the Davis cup, was announced here. The selections are:

William A. Larned, the national chairman; Maurice E. McLaughlin, the winner of the Allcomers tournament at Newport, and Beals C. Wright the runnerup to McLaughlin.

2 MORE AIR MEN KILLED

YOUNG AVIATOR BURNED TO DEATH DURING EXHIBITION.

Other Loses Life at Elmira, N. Y.—Ward Withdraws From Race.—One Dying at St. Louis.

Dayton, Ohio. — Forced into the air by the jeers of thousands who called him a coward, Frank H. Miller, aged 23, a Toledo aviator, shot into the sky at twilight and at the height of 200 feet was burned to death before the eyes of the terrified spectators on the Miambi county fair grounds at Troy.

Miller had circled the race track and was just starting on a spiral glide into a neighboring corn field when something went wrong. He could be seen making a frantic attempt to get his machine under control when suddenly the whirring of the propellers ceased. The craft then dropped like a shot for fifty feet, a tiny flame shooting from the engine and then the gasoline tank exploded.

The machine was wrecked by the impact and debris was hurled hundreds of feet in all directions. What remained of the machine and its driver burned almost to a crisp as they dropped rapidly to the earth. Miller used a Strobel biplane.

Elmira, N. Y.—Castellane, a Curtiss aviator, fell to instant death at the Mansfield fair. He had started in an exhibition flight and when three-quarters of a mile from the ground his machine careened, turned turtle and fell on a hillside. Castellane was found buried beneath the wreckage of his engine and plane. His wife witnessed the fatality.

Aviator Is Scalped.

St. Louis.—Raymond M. Raymond, amateur aviator and mechanician for Ademee V. Reyburn, Jr., was scalped and his skull fractured while attempting to start the engine of an aeroplane at Kinloch field. The blades of the propeller struck him when the engine started suddenly. Physicians say he has small chances for recovery.

Rogers Alone in Flight.

Elmira, N. Y.—Aviator Calbraith P. Rodgers, who is competing in the coast to coast flight, landed on a farm just outside the city after making his longest single day flight since leaving New York on Sunday.

Rodgers left Hancock, N. Y., at 11:08 a. m., and because he lost his way when near Susquehanna, he was forced to fly more than 200 miles in order to reach this city, a distance of but 118 miles from Hancock. Rodgers intended to follow the tracks of the Erie railroad, but he mistook a branch line for the main tracks and did not discover his mistake until he reached Scranton, Pa.

Lockport, N. Y.—James P. Murphy, manager for James J. Ward, announced that Ward has withdrawn from the coast-to-coast aeroplane race as a result of his fall near Addison.

Aviator in Sad Accident.

Chippewa Falls.—Bechwith Havens, the Curtiss aviator, met with an accident when a mile from the fair grounds. His engine died while he was in the air and in gliding to earth the machine caught on a telephone wire and was thrown against a fence, smashing the front. Havens received minor bruises.

ITALY IS READY FOR TURKEY.

Navy Ready for Conflict Should Protectorate Request Be Refused.

Paris, France.—Advices from Rome say that the entire Italian naval force is ready for a conflict with Turkey if the Ottoman government refuses to consent to an Italian protectorate over Tripoli. While Italy is perfecting her military plans, every effort is being made to induce Turkey to come to an amicable arrangement, Italy being even willing to leave Tripoli under the sovereignty of the sultan in case Italy's preponderating influence is assured. Germany and Austria are supporting the plan and France and Italy stand ready, in case of its acceptance, to indemnify Turkey.

The Italian fleet will be divided into five divisions, one of which the Duke d'Abruzzi will command. Taranto has been proclaimed in a state of siege. The cruiser Chester is expected to arrive in Tripoli next week to protect the members of the American archaeological expedition at Cyrenno.

Representative Madison Buried.

Dodge City, Kansas. — With a score of senators and representatives, appointed by the national government, present, and a wide representation of prominent Kansans attending, the funeral of Representative Edmond H. Madison was held here. All business houses in the city were closed.

MINNESOTA NEWS

SWEDISH PASTORS APPOINTED.

Ministers Are Assigned to Churches at Close of Northern Conference.

Minneapolis.—Rev. August Bongfeldt, of Litchfield, Minn., was appointed to the pastorate of the Second Swedish M. E. church, Minneapolis, by Bishop McIntyre, at the close of the eighteenth annual session of the Northern Swedish conference. The session was held in the First Swedish M. E. church. Rev. C. H. Sundstrom was retained as pastor of the First church. Rev. Mr. Bongfeldt succeeds Rev. William Lundin.

A Swedish historical society, organized for the purpose of studying Swedish Methodism from its birth, was formed.

Rev. C. F. Edwards was reappointed superintendent of the Minneapolis district. Following are the appointments to churches in the Minneapolis district: Afton, Scandia and Siren, Rev. Andrew Nelson; Aitkin, Brainerd and Fleming Lake, Rev. T. G. Olson; Atlas, Rev. Axel J. Anderson; Atwater and Rosendale, Rev. A. G. Hultgren; Belgrade, Colfax and Melby, Rev. A. F. Peterson; Grasston circuit, Rev. A. M. Rice; Hamlin and North Dakota Mission, Rev. C. E. Schmidt; Hector and Palmara, Rev. O. F. Shallman; Lafayette and Clear Lake, Rev. O. N. Hildeton; Lindstrom, Rev. Fred Stromberg; Litchfield and Maynard Lake, Rev. Carl E. Dahl; Little Falls, Rev. G. E. Peterson; Lund circuit, Rev. C. N. Holmberg; Minneapolis, First church, Rev. C. H. Sundstrom; Second church, Rev. August Bongfeldt, and North Mission, Rev. Gustaf Nelson; Oak Park and Louriston, Rev. L. G. Edgren; Ortonville, Rev. T. Livingstone and C. E. Dahl; Red Wing, Rev. J. A. Forsbuerg; St. Paul, Arlington Hills church, Rev. E. A. Wahlquist, and First church, Rev. Andrew Anderson; Stillwater and Marine, to be supplied; Vasa and White Rock, Rev. Ludwig Pehdson; Willmar, Rev. Theodore Livingstone; Winthrop and Mankato, Rev. Carl A. Holmes.

The place of meeting for the conference next year has not been determined.

TAWNEY DUE FOR PROMOTION.

May Succeed to Chairmanship Held by Late Former Senator Carter.

Washington. — Former Representative James A. Tawney of Minnesota may become chairman of the American section of the international boundary waterways commission, as a result of the death of Thomas H. Carter of Montana. With the death of Senator Carter, Mr. Tawney becomes the ranking member of the commission. The new chairman probably will be elected as soon as the vacancy on the commission caused by Senator Carter's death is filled.

NEW RICHLAND IMPROVING.

Minneapolis & St. Louis Gives the Town a New Station.

New Richland.—This place now considers itself in advance of other stations along the line of the Minneapolis & St. Louis, the company having just completed a fine new station here. Last winter the editor of a local paper took the initiative and caused the old station to be condemned by the railroad and warehouse commission, because it had but one waiting room. Two are required, and the new structure is properly equipped.

VICTIM OF A JOKE.

Sleepy Eye Woman Has Offers of Marriage by the Score.

Sleepy Eye.—Mrs. Mary D. Conley, widow of Dan Conley, is daily receiving letters and photographs from men all over the Northwest, offering themselves on the altar of matrimony, as the result of an advertisement which recently appeared in a Duluth paper, and which was unauthorized and evidently inserted by someone as a joke. This advertisement said that "M. D. C.," a widow of 45, box 104, Sleepy Eye, desired to secure a husband.

BANK CASES CONTINUED.

Royalton and Bowlus Men Will Not Have Hearing Until the 26th.

Little Falls.—The hearing of H. A., H. J. and Stephen Schwartz, officers of the Royalton State bank, charged with receiving deposits after they knew the institution was insolvent, came up, but was continued until Sept. 26. The case of O. H. Havill, a former officer of the Royalton bank and of the Bowlus bank, also was continued until the same date.

LICENSE CASE UP TO COURTS.

Fergus Falls Saloons Will Not Get Refund Tomorrow.

Fergus Falls.—The troubles of the saloonkeepers of this city are not yet ended. A week ago the city council voted to return to them the unearned portion of their license money, which was due them when they were closed by the city going dry in the spring of last year. Then Mayor Anderson vetoed the ordinance in so far as it related to the claims that had been assigned to the breweries, and today five taxpayers filed a written protest with the city attorney against the payment of the balance of the claims.

Under the city charter, when a claim is protested by five taxpayers, the city attorney must appeal to the district court to test its legality. Ten days must elapse between the allowance of a bill and its payment, and the saloonkeepers had expected to secure their money tomorrow.

Last week the council had an ordinance before it to permit the saloons to remain open until 11 o'clock instead of closing at 10 as they are now required to do. The ordinance was defeated by a vote of 4 to 4. Another ordinance permitting them to restore the screens on their windows was defeated by a vote of 5 to 3. A third ordinance to punish minors who enter saloons was adopted.

HARD DITCH JOB DONE.

Koochiching County Drainage Contractor Wanted $17,000 Extra.

Ditches 59 and 60 in Koochiching county are virtually complete and the finishing touches will be made in a few days, according to George A. Ralph, state drainage engineer, who returned from Northern Minnesota.

The ditches have been the cause of a great deal of annoyance to the drainage commission, as they were built through a floating bog that settled after the dredge. They have been redredged seven or eight times in some places. The contractor applied to the Legislature last year for $17,000, which, he said, was what the ditch had cost him above the contract price. His application was turned down. The ditches will be inspected by the commission October 10.

Mr. Ralph reports the farmers have about completed the gathering of their crops and that happier people than the Northern Minnesota farmers are hard to find. They have just harvested the best corn crop they ever had. Many farmers have selected their seed for next year.

SEVEN COUNTY NURSES.

Commissioners Where They Are at Work Enthusiastic Over Results.

Seven counties now have visiting nurses paid from money appropriated by the county commissioners, according to reports received by Christopher Easton, secretary of the State Anti-Tuberculosis society.

The seventh county was Lake, the commissioners of which appropriated $250 Saturday.

The counties besides Lake are Todd, Kandiyohi, Marshall, Polk, Stevens and Mower. While the appropriations in many cases were small, it is understood the nurses are doing such invaluable work the commissioners of all the counties named have pledged themselves to appropriate more money as soon as it is needed.

The visiting nurses all have been employed in the last three months. The recent Legislature pased a law providing for their employment.

NAP ON TRACK IS FATAL.

Clitherall, Minn., Man Meets Death While Asleep on Rails.

Fergus Falls.—John Stewart, who lives near Clitherall, was killed by a train on the Soo railway, a short distance from his home. He was asleep on the track, and the train, coming down grade, could not be stopped. His widow is visiting Montana and she was notified by telegraph of the accident.

EBERHART AT WINONA FAIR.

Governor Proves Big Drawing Card on "Minnesota Day."

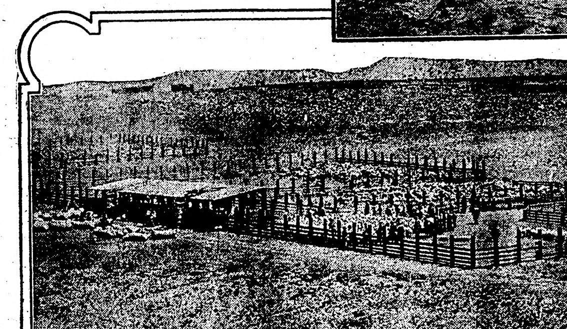
Winona.—On "Minnesota day" at the Tri County fair Governor A. O. Eberhart visited the fair and made an address before the grand stand. This proved a drawing card for the farmers, who came in from the country for many miles around in great numbers. The entries exceeded expectations and the fair was a success all around.

SHEEP RAISING IN AMERICA

A YOUNG SHEEP RAISER

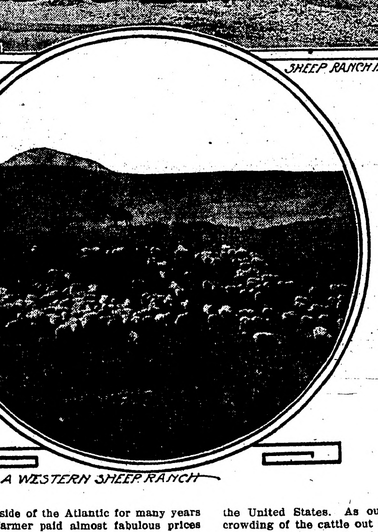
SCENE ON TYPICAL NEW MEXICO SHEEP RANCH

A SHEEP HERDER RIDING THE RANGE



SHEEP RANCH IN NEW MEXICO

PROSPEROUS SHEEP RAISER'S HOME



A WESTERN SHEEP RANCH

SHEEP raising is one of the chief activities of the American rural domain, and it is one that has shown a constantly expanding scope year after year, seemingly without much regard to the good years and bad which are so visibly reflected in many of the other occupations of the farming community. It is interesting to note that sheep are associated with man in the earliest records of the human race. They were first used only for milk, and later the skins were used for clothing. Up to about a century and a half ago wool was the primary consideration in sheep raising, but about the time mentioned an Englishman began the first systematic and intelligent improvement of mutton sheep and it is a question whether this is not now the most important branch of the industry both at home and abroad.

The mutton sheep was rather slow in invading America. The wool-producing Merino (which came originally from Spain) was monarch of all he surveyed on this side of the Atlantic for many years and many a farmer paid almost fabulous prices for sheep having no adaptation to anything except wool production. Perhaps this state of affairs was due to the impression that so long held sway that the American people were pre-eminently a nation of pork eaters and had little appreciation for good mutton. Whatever justification there may have been for this in the past it certainly ceased years ago. A depression in the price of wool some score of years ago was very influential in bringing about a change of conditions, and once started the new movement in behalf of mutton sheep swept all before it. Indeed, in some years a single market, such as Chicago, has shown a gain of fully a million sheep over the twelve months preceding. Canada sends great numbers of mutton sheep to this country as well as considerable quantities of wool.

The experience of later years has proven that the rich lands and abundant feeds of the United States are well suited to the economical production of superior mutton and the furthermore mutton sheep if properly selected can grow a large part if not all of the wool demanded for American manufacturing. Experts declare that there is no greater error than the impression on the part of many people that sheep are suited only to inferior land. To be sure, sheep, unlike some other animals, can get along on scanty vegetation, and consequently will graze profitably on semi-arid land, but on the other hand they render an especially large return for a liberal ration of good foods. As showing how much more appreciation of this fact there is in other countries than in the United States it may be cited that recent statistics showed that there were not to exceed 25 sheep per thousand acres of land in our leading agricultural states, whereas in England the high-priced agricultural lands sustain an average of 680 sheep per thousand acres, and in Scotland there may be found as high as 1,380 sheep re thousand acres.

The champions of scientific agriculture in the United States are just now striving earnestly to impress our farmers with the fact that it would be better to convert their surplus grain products into meats, such as mutton (at least to the extent of supplying home demands) than to export the corn and other grains as such. For example, it is claimed that to raise $1,000 worth of corn takes from the soil producing the crop about $300 worth of fertility, but the same amount of corn converted into mutton is claimed not to take from the land more than $50 worth of fertility, whereas if sold in the form of wool it will not take from the land more than $2 or $3 worth of fertility. With mutton as the primary consideration, however, sheep raising will return a satisfactory profit year after year without very much regard to the price of wool.

In later years the western territory known as the range became the great breeding ground for sheep, and as far back as a dozen years ago this locality produced about one-half of the total number of sheep in the United States. As our readers know the crowding of the cattle out of many section of the range by the sheep has been attended by much bitterness and controversy. There are three principal species of range sheep. The old Mexico sheep are the direct descendants of the original Spanish Merinos, brought over two hundred years ago by the Spaniards in Old Mexico. They have long legs; a long, thin body, and the wool is fine and thin. They are hardy, excellent travelers and will keep in good condition on the poorest and driest of ranges. Often they outsell all other sheep, for the meat has an excellent flavor and the hide is thin, firm and soft. These original Mexican sheep have been largely graded with Merino rams in New Mexico and southern Colorado. The New Mexico sheep, as they are denominated, are small-bodied sheep, and although they never grow very large they get very fat. They bring good prices, for the same reasons that obtain in the case of the Mexican sheep above mentioned. Merinos are also to be found on the range in great numbers, many of them having been bred from Merinos brought from the east. The lambs are short-legged and not as good travelers as the southern sheep, but they need not be, for Wyoming, Idaho, etc., have, on the average, better ranges than are to be found in New Mexico, and it is in these northern states that the Merinos hold sway.

Almost all range sheep are affected with scab, though it is frequently so held in check as to be scarcely noticeable. As a remedy it is the general practice to "dip" all range sheep, and this operation, as carried on extensively on a large sheep ranch is decidedly picturesque. Oftentimes it is deemed necessary to give the same sheep several dippings at intervals of ten days, and occasionally this dipping is done in zero weather. On the large ranches there are specially constructed dipping vats with runways for the sheep as they approach and leave the vats, etc. Various ingredients are used in the preparation of the dips, among the most popular being lime, sulphur and tobacco.

As is well known, the American market has become the most discriminating in the world on beef products and is rapidly coming to demand a corresponding superiority in mutton. Consequently farmers and ranchers realize the necessity of selecting the best sheep. The value of improved blood in sheep has come to be realized. A difficulty in mutton production has always been the scarcity of stock sheep, particularly sires, having sufficient merit to fill the standard of excellence. The ideal sire, it may be added, should be impressive, resolute and of noble bearing—distinctly the head of the flock in every sense of the word. This requires, of course, good constitutional and vital powers.

It has likewise come to be regarded as essential, as above pointed out, that a mutton sheep should have a good fleece as well as a good carcass. This combination has been proven both practical and profitable, and it is no longer regarded necessary to grow one sheep for a fleece, another for a carcass and another for a lamb. An intelligent, up-to-date flockmaster combines them all in one class. Some of the best mutton sheep are producing as profitable fleeces as those kept exclusively for wool and their lambs are decidedly superior. As is well known, one of the first essentials in a good fleece is compactness or density, this quality not only insuring a better yield of wool, but also affording better protection against storm. This indicates a hardier animal and one better able to withstand exposure. It is desirable to have a close, even, dense fleece, with no breaks, cover all parts of the body, including the head, limbs and under parts, and the tendency in latter day breeding is toward carrying the fleece more completely over the head, face, limbs and under parts.

The far-sighted sheep raiser is also coming to guard against neglect or undue exposure of his flock, periods of sickness, or indeed anything that will impair the vitality of the animals, for it has come to be pretty well understood that such influences diminish both the length and strength of fiber and fineness, whereas, length and strength of fiber are essential qualities in a good fleece. Well-fed sheep always produce the best wool and the greatest quantity of it, and expert opinion is to the effect that a fleece almost invariably begins to decline in value after a sheep has passed the age of four years. The best grade of wool is invariably found on the rear part of the shoulder, and wrinkles or folds of the skin about the neck or other parts of the body are detrimental, inasmuch as the wool that grows within these folds is unlike other parts of the fleece and there is a consequent lack of uniformity.

The proper feeding of sheep is one of the chief responsibilities connected with the industry. In some localities the "self-feeder" is extensively employed, but in other localities it is not in much favor. Properly cured alfalfa has come up wonderfully in popularity as a food for sheep and many sheep feeders have purchased extensive areas of alfalfa for use in this connection. Many of the large feeders in such states as Nebraska, Colorado and Minnesota have no shelter for their flocks, but it is generally conceded now that properly constructed sheds are an advantage, although, of course, involving considerable outlay in the case of large feeding yards. Some of the most progressive sheep men now recommend feeding three times a day, although others still cling to the old idea that it is not necessary to feed more than twice a day. Along with all these other requisites for success in sheep raising there is the necessity for the good shepherd of judgment and experience. Even on the range where sheep are supposed to be able to shift for themselves there is a tendency to employ a better class of men as sheep herders.

The Genuine Article.

"I don't know about this picture, Bobby," said the visitor, as he ran over specimens of the youngster's camera work. "I am afraid a dog with a propeller instead of a tail is something of a fake."

"That ain't a propeller," said Bobby. "That's his tail. He kept waggin' it while his picture was being tookened."—Harper's Weekly.

DEAR OLD SOUL.

When Smith fell heir to that little legacy he changed his name to Smythe, and did everything in style. Not a word of protest did his mother make till the telephone appeared. Then she struck.

"Never, Albert," she said, firmly. "Never shall one of those things come into my house!"

"But, mother—" he began.

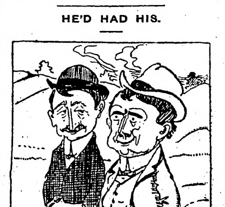
"I wonder you dare," she went on. "Look at all those poor Hindus it killed last year! Why we might—"

A light broke over Smythe's countenance.

"That wasn't a telephone, mother! That was a typhoon!"

"Albert," said the old lady, very sternly; "don't you try to fool your poor old mother with tales like that. Typhoon, indeed! I know just as well as you do that the typhoon is the emperor of Japan!"

HE'D HAD HIS.



Dobbins—Cheer up, old fellow; there's a good time coming.

Bronson—Not for me. My wife is coming back from the country tomorrow.

Ever Notice?

Please don't ask me to explain it,
I beseech, on any score;
But the stork is always friendly
With a fellow when he's poor.

What He Wanted Most.

"Now," said the head of the reception committee, when the distinguished visitor had stepped from the car, "if you think you'd like it we'll be glad to get an automobile and take you for a drive through the parks. We have one of the finest boulevard systems in the world, and—"

"Say, do you know where there's a bath tub about six feet long and four feet wide and three feet deep?"

"I think they may have something of the kind in one of the hotels."

"Lead me to it. Never mind the parks and boulevards."

Merely a Temporary Disadvantage.

The widow had just announced her engagement.

"But, my dear Maria," said her friend, "you don't mean to tell me that you intend marrying a man you've only known for two weeks?"

"Oh, yes," said the happy widow. "I can easily overcome that objection in time. I hope to know him tolerably well after we have been married a couple of years."—Harper's Weekly.

Last Resort.

Friend—I suppose it was hard to lose your daughter?

Father—Well, it did seem as if it would be at one time, but she landed this fellow just as we were beginning to give up hope.—Christian Intelligencer.

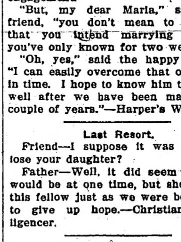
Vigilant and Speedy.

"There's nothing slow about Jones."

"I guess you never loaned him money."

"Oh, yes, I have. That's what made me speak that way. I loaned him $10 six months ago and I haven't been able to catch him since."

SAME OLD STORY.



Senior Partner—I learn, Mr. Smith, that while I was gone Mr. Gayboy was intoxicated. Why didn't you fire him?

Junior Partner—I didn't know he was loaded.

Satisfied.

I know a happy fisherman,
Whose heart is e'er content;
E'en when he gets no bite at all,
He deems the time well spent.

Mixed Botany.

"Do you share this craze about the chrysanthemum?"

"Yes, indeed! I think it is a daisy."

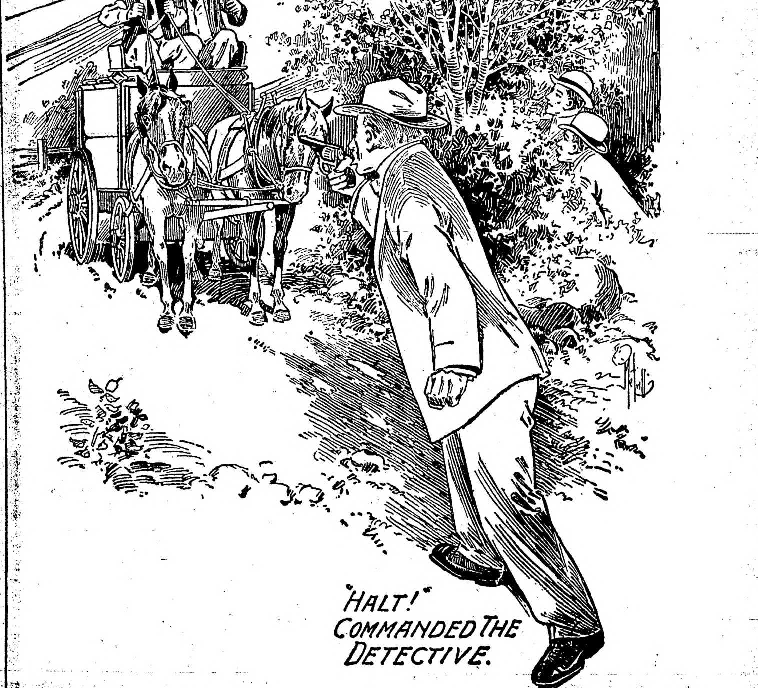
ADVENTURES of the WORLD'S GREAT DETECTIVES

By George Barton

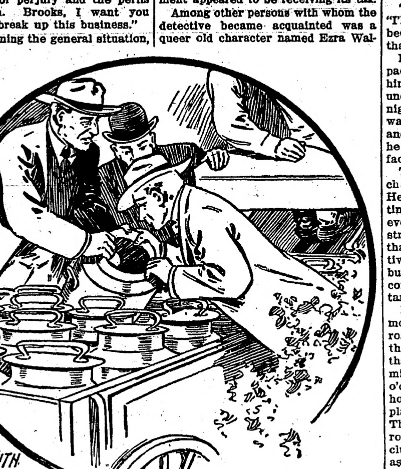
The Milk Punch Revenue Fraud-

An Episode in the Life of James J. Brooks, once Chief of the United States Secret Service.

COPYRIGHT 1911 BY W. G. CHAPMAN



"HALT!" COMMANDED THE DETECTIVE.



THE CAN WAS FILLED WITH WHISKEY

IN THE summer of 1866, Internal Revenue Commissioner Rollins summoned James J. Brooks to Washington. The officers of the government were greatly perplexed. Congress had placed the almost prohibitive tax of two dollars per gallon on whisky, and immediately illicit distilleries sprung up in all parts of the country. Commissioner Rollins very much desired to break up the illegal traffic, and he had selected Brooks as the man for the purpose. The interview between the two men was long and important.

"Brooks," said the commisioner, "the frauds connected with the production and removal of spirits are becoming alarming. Great public dissatisfaction has arisen from the failure to collect this tax. Besides it is ruining discipline in the service, and unless some remedy is obtained, I fear further demoralization."

"Are the conditions as bad as that?"

"Worse! I have figures which show that 60 per cent. of the whisky reported made and warehoused has been sold without payment of the revenue tax. Such extensive fraud is not possible without the knowledge of responsible revenue officers. It is exceedingly difficult for officers in Washington to detect collusion on the part of their subordinates in other places. These frauds have not only robbed the national treasury, but have corrupted many men of heretofore acknowledged integrity. Men of capital but without conscience have sometimes been found to be partners of those whom they have put to the front for bribery or perjury and the perils of detection. Brooks, I want you to help me break up this business."

After outlining the general situation, the commissioner became specific in his statements and informed the detective just what he expected him to accomplish. That night Brooks departed on his assignment, which was to a little town near Cincinnati, and which, for the purposes of this narrative, shall be known as Meadboro. He wore no disguise. He never did. He was in the habit of saying humorously that his actual appearance was all the disguise he ever needed.

The man who alighted from the train at Meadboro was a tall, commanding figure. He had a benevolent look which seemed to say: "I am at peace with all the world." Only two parts of his organism could be said to talk. His eyes bespoke intelligence, and his lips expressed determination. He was about 40 years of age, but his whiting hair gave him the appearance of being much older than that. Before he had been in the little village long, it was whispered about that he was a tract distributor and an agent for some charitable institution. He registered at the only hotel in the place under an assumed name. It did not take him long to get into conversation with the proprietor and so some of the loungers about the place. The talk, after exhausting itself on the weather, and horses, and politics, and church matters, finally turned on Meadboro and its inhabitants.

He learned that John Davis was probably the most important man in the locality. He combined the business of a distiller and a dairy man. He had 20 cows and a distillery, and a farm of a hundred acres. Everything seemed to be open and above board. Davis apparently worked hard, and with a son and his hired men, did not seem to have much spare time on his hands.

Brooks managed to come in contact with Davis, but there was nothing about the personality of the man that gave him any clue. Davis wore a look as though he were constantly exhausted through lack of sleep. His countenance did not give any indication of the operation of his mind. He was a man of few words. He had preferences, but no friendships. The dull horizon of his life seemed undisturbed save by occasional streaks of tact in business matters. One of the loungers in the hotel credited him with having once brought about a corner in pork on a limited scale. Another indicated that he had once mixed fine white meal with his lard. These things did not seem very important in themselves, and yet they were traits of character which made it possible to believe the charge that he had habitually withheld from taxation nearly three-fourths of his yield of whisky.

Brooks contrived to visit his farm on various occasions. He went through the dairy, examined the live stock and managed to get a peep into the distillery. He arranged his visits so that one day he went in the morning, another in the afternoon, and still another in the dusk of evening, but he was never able to find anything out of the way. From time to time whisky was sent out in casks, but it was always properly gauged and the government appeared to be receiving its tax.

Among other persons with whom the detective became acquainted was a queer old character named Ezra Wallace. He was a Scotch Presbyterian, and was the sexton of the village church. He was an intensely religious man and hungered for discussion of theological subjects. Brooks accommodated him more than once, and it was not long before he found himself among the boarders of Ezra Wallace's humble home. The old man would have cheerfully lodged and fed him for nothing for the sake of religious controversies on which he lived, and thrived, and had his being. One night the two men needed a book to verify some disputed point. It happened to be in the church library. Brooks volunteered to go after it. The sexton handed him the key and he went to the church and obtained the book, but he conveniently forgot to return the key.

Some time after midnight he quietly hurried to the church, and using the purloined key, made his way into the edifice. It was quite dark and the place was unfamiliar, but he managed to grope along until he reached the stairway leading to the choir loft. From thence he climbed to the dingy attic at the base of the church steeple. He crawled up by easy stages until he reached the belfry. A rustling noise startled him. This was followed by another and then still another. He realized that the rats were scampering from their accustomed haunts. The fluttering of wings near the top of the structure reminded him that he had disturbed the bats. It was still quite dark, and he began to feel quite chilly, but determained to remain in the belfry until daylight.

He never realized before how slowly it is possible for minutes to pass by, but his long vigil finally came to an end. Daylight appeared and the detective brought forth a powerful telescope. With the aid of this instrument he was enabled to get a splendid view of the surrounding country. In fact, he could see everything quite clearly within a radius of a mile or more. Good housewives at work in their gardens, farmers driving their wagons to market, and men working in the fields, were all to be seen with wonderful clearness.

Presently his curiosity was satisfied and he climbed down from his lofty perch and quietly retraced his steps. He went to his boarding house and ate breakfast with a heartiness that made the cook tell him that he had the appetite of a horse. While he was at the table, Ezra Wallace came in. The sexton spoke to him very coldly. Brooks became alarmed. He did not desire the ill will of the old man, and, above all, did not wish to have his plans go astray, so he tried to conciliate him.

"Good morning, Ezra! you're looking fine this morning."

"That's the way all respectable folks should look," was the gruff rejoinder.

"Sure," responded the detective, who did not quite grasp the meaning of the sexton's remark.

The latter eyed him coldly for a moment and then said in an accusing voice:

"I may have my faults, but I've never stayed out all night in my life."

At this psychological moment the detective gave a terrific sneeze.

"If you had been in your warm bed last night," said Ezra, now making his accusation direct, "you probably wouldn't have had that cold."

"Oh, that's all right," was the cheerful reply.

"It is not all right," retorted the sexton, "and I'll thank you to give me back that key."

Brooks handed it to him with some misgivings.

"What are you going to do?" asked the detective.

"I don't know yet," was the reply. "I'll find out first whether anything's been taken out of the church. After that I'll decide what to do."

It took Brooks nearly an hour to pacify the old man, and in convincing him that although he was traveling under an assumed name, and spent the night in the steeple of the church, he was engaged in a legitimate business, and assured him that in a short time he would explain it all to his satisfaction.

The day after his night in the church steeple, Brooks was very busy. He telegraphed to Cincinnati several times, and during the afternoon and evening it was noticed that several strangers alighted from the way train that stopped at Meadboro. The detective was very stiff from his exposure, but he managed to conceal his discomfort in the thought of the important work that lay before him.

He was up at daylight the following morning. He stationed himself in the road that led from the Davis farm to the station. The two-horse team that was in the habit of hauling the milk to the train was due at six o'clock. It rumbled along just at the hour. Davis, himself, occupied a place on the seat beside the driver. The detective stood near a turn in the road. Behind him, concealed in a clump of bushes, were two able-bodied assistants. As the team reached that point Brooks stepped in front of the horses.

"Good morning, Mr. Davis—how are you feeling this morning?"

"None of your business," was the rough rejoinder. "Get out of the way and let these horses pass."

"You're not very polite this morning."

"I'm in a hurry, and I've got no time to waste on you."

"Then you'll have to take the time."

Davis' answer was characteristic of the man. He cracked his whip and started the horses. But the detective moved with amazing quickness and coolness. He pulled his pistol and pointed it at the farmer's head.

"Halt!" he cried.

At the same moment his two assistants rushed from their places of concealment.

"You see," said Brooks, pleasantly, "it's three against two. You might as well give up."

"But I don't understand," replied Davis, who did look dazed. "What's the meaning of this performance?"

"It can be explained in a few words, "said the detective. "I'm a representative of the United States government, and I charge you with maintaining an illicit distrillery."

"But I pay the government tax."

"On a small part of your product only. You've been cheating Uncle Sam for a long while."

Davis laughed dryly.

"That's easy to say, but you can't prove it."

"Yes I can."

"How?"

"Here and now. That wagon's full of whisky on which you have not paid a cent of tax."

Davis' lips curled with scorn.

"I thought you didn't know what you were talking about. We have 20 cans of milk in the wagon and it's consigned to the Harvey Milk company of Cincinnati. Isn't that true, Sam?"

The driver of the wagon, being thus appealed to, nodded a sleepy head.

"Yes, sir," he said, "that's as true as gospel."

Brooks climbed up on the hub of the front wheel and looked at the wagon.

"If you have milk here," he said, "let's see it."

"Yes," said the other detective, jocularly, "I'll take a quart."

"But it's fastened for shipping."

"Open it," said Brooks. "Open that can on the end."

The man did as he was bade, and sure enough it contained nothing but pure milk.

"Any other you'd like to see?" asked Davis triumphantly.

"Yes; open the can on the other end."

That was opened and that, like the other, yielded only Alderney milk.

"Now," said Brooks, "let me see the contents of the can in the middle."

"Oh," exclaimed Davis, "this is carrying a joke too far."

The can was opened, however, and it was found to contain high proof whisky. Every one of the other 17 cans were filled with distilled spirits. Davis was arrested, tried and convicted, and the far-reaching conspiracy of defrauding the government defeated. Brooks was highly complimented by Commissioner Rollins, and shortly afterwards was assigned to Philadelphia, where he won new laurels in ferreting out and convicting those who were cheating Uncle Sam of his legal dues.

FIRESIDE VS. THE FURNACE

Place Where One Founds His Home Is Within His Own Choice.

(Copyrighted by J. S. Kirtley.)

The fireside is like the flower in the crannied wall, which roots itself in such far reaching soils that Tennyson claimed he would know both God and man, if he knew all that was to be known about the flower; it is like the wing of a bird from which Couvier claimed he could describe the whole bird that it belonged to without having seen it. It brings to the mind's eye the whole local life, the appointments of the home. Given the fireside and you know the people it belongs to.

It is the reaction of the people upon the place that makes the home. That makes the place a critical matter. It houses the greatest group of emotions that any one ever felt, emotions that begin with courtship and grow till the diamond wedding, central in the husband and wife; fruiting in parenthood, childhood, brotherhood and sisterhood, supported by all the forms of religious and patriotic impulses and ideals. From that place, friendships flow out, and reproductions of the original and originating affections come. The physical nature of the place will affect the working out of the essential principles of life in that institution which is alphabetical in the spelling of human destiny. It furnishes creative love its habitat and opportunity. The questions of unselfishness, co-operation and unity are involved in the mere place.

There is power in place. The poets of Greece were born, for the most part, where "the mountains look on Marathon and Marathon looks on the sea." Most of the poets of England were born up there where the sky bends with such tenderness over the earth and reflects itself in the lakes that are set like mirrors in their framework of hill and mountain. Our own poets were mostly born where the mountains lift them to a purer air and a broader view, or where the sea is ever singing to them of the profound, eternal things of nature. One's destiny may be affected by removal around the corner. The good thing about it is that the place where one founds his home is within his own choice and it can be chosen so as not to militate against the interests of home but really to co-operate with them.

It must be as ample as one can afford without wasting any values.

The place must be chosen with a view to permanency, which is essential to the highest home culture. It is all the better if the residence is an heirloom and the family ideals and spirit can have an unbroken continuity. Whether it is an antique frame or a colonial brick or a lazy log house in the country, or a place in the city not yet pre-empted for a mansion or a skyscraper or a railroad track. Memories of the past give might for the present, and every corner of the dear place will be echoing with the voices of victors in the warfare now renewed by their children. Ownership is a dream of youth, and if one lose it, something passes out of the life. The spot should be chosen with a view to ownership sooner or later.

The place must lend itself, in the highest degree possible, to home making, as that is the real business of the couple, just starting. The flat is not immoral, save as it discourages the instincts of home building and turns the family into parasites. If it gives the family no chance to objectify itself in the making or adorning of the building, if it puts steady and stubborn limitations on service for each other, by having everything machine made, it arrests the unifying processes and militates against the home. The place must not blur the vision, and somehow the vision of the flat or boarding house does not seem to stir the blood of man or boy. Men don't fight, bleed and die for their "apartments" or lodging houses. The place for "light housekeeping" is not the spot in which one wants to enshrine his household gods. The young man and his beloved may both be wage earners, and money makers, but not be home makers. The apartment that cuts out cats, dogs, flowers, babies, sickness, company and memories is to be placed on the discard list. When no mutual tasks tie the heartstrings together around the place, the heartstrings will miss it. It is hard to imagine a great person living that way, except in the early days of struggle. The most alleviating thought is that such a place is a temporary convenience and easy to give up.

One of the unifying influences of the old home was the fireplace, where the carbon went up the chimney, the oxygen into the air, and ozone into the spirits. Around the fireside was a fine place for story telling and reading aloud, and playing games. It seemed to loosen the tongue and call out a native eloquence. Down in the cellar, which we called the "cellar," and not "basement," though we shall have no quarrel over mere words, were about 25 barrels of apples, at the beginning of the season, four or five barrels of cider, I don't know how many barrels of hickory nuts, walnuts and popcorn. They just fitted the fireside and seemed to be the very things that six boys and girls needed to complete the comforts of home.

Joke and jest and play and prank sometimes consumed the whole evening, leaving a residuum of unity in variety and hearty good will to help each other as comrades, in a common life. Hospitality was one of the prized virtues, when neighborhood or kindred came in for the evening or to "stay all night," or longer, it was enjoyed without nervous fear of an outside call or too long a "call" inside. Even a peddler found food and shelter and apples and cider, as once, on a snowy day, we filled up a jolly German with cider that had grown too old, and he became uncontrollably "funny."

It is a gloomy thing when we must get our glow, not from fireplace and firmament, but from bulbs and basement, not from stellar radiance, but from cellar register. We gain by the hot air and hot water furnaces, but we lose, in the pleasures of the fireside, the light that gleams and the lives that gladden. To make the curbstone instead of the hearthstone, the radiator instead of the illuminator, the rallying point of the home is to impose on the family the needs of discovering unseen centers of unity and gathering around them.

Application for entry as second-class matter at the postoffice at Holt, Minn., pending.

The millions spent in connection with the special session of congress have evidently failed to accomplish much of anything save disaster for the administration.

One of our exchanges remarks that the recall of judges does not matter much. O, yes it does. Does any one suppose that if Judge Sanborn had been subject to recall, the people of Minnesota would be paying 3 cents a mile on railroads today?—Kennedy Star.

According to the Thief River Falls News it is possible that Allen W. Clark recently of Fram, but now retired from farm life, may become a candidate for representative next year. Eastern Marshall county ought to have some representation in public affairs as well as the west end and we know of no reason why Mr. Clark should not be the right man for the job.

Crookston was slightly stirred last week by the news that its leading hotel keeper had assaulted, battered and badly injured the city editor of the Times. The extreme punishment handed to the scribe does not seem to have been warranted by his offense, and it is to be hoped that the aggressor will have to pay the limit in the way of penalty. However, Crookston and northern Minnesota may derive real benefit from the affair, because it is an actual breach in a gang that has ridden roughshod over common people in various ways. "When rogues fall out, honest folks may get their own," is an old saying that comes to mind in connection with [illegible]

Canadian reciprocity is dead; killed by the Canadian people themselves. The big newspapers of the cities in the United States deplore the fact and in their editorial comments the bitterness of their disappointment is easily apparent. Many reasons are advanced for the action of the Canadian people but, if we should accept the general opinion of the city papers, we must admit that the Canadians are a lot of —— fools, to say the least. A glance at their election returns show that the provinces of Alberta and Saskatchewan gave large majorities for reciprocity, while every other province voted more heavy against it. This goes to show that the grain producing sections were alive to the great benefits offered by the opening of the American markets, while all other sections feared that only disaster could come to all other Canadian interests by letting down the bars according to the Taft schedule. So the Canadian people refused to sanction a measure that would ruin their business interests and build up those of the United States. And Canada did right. The Canadian manufacturers are equally as well entitled to protection as are those of the United States, and more so for the reason that their manufacturing industries are, as yet, on a smaller scale. Special interests have for years controlled American politics and government. What had Canada to gain by killing off her home industries and handing that business to American interests? The American farmers were not considered in this fine plan to give American Big Business control of the entire continent, and the Canadian manufactures would have been sacrificed along with the American farmer. This time the plans of Big Business were somewhat upset by the action of the Canadian people, and the American farmers give thanks.

Business Is Improving?

Argyle Banner: One of those real old time stand-up-and-take-it scraps took place Monday at the rear of one of the saloons in Argyle. As is customary in such cases, one of the participants got licked in the presence of about fifty witnesses. Mayor Onstad, assisted by the marshall, escorted the pair, after they got cooled off, over to the cooler where they got another cooling off. Let us think [illegible] this kind last year. No, not if our memory does not fail us. This is about the 'steenth one we have had this year, and only two arrests thus far.

Subscribe for The Northern Light. Only $1.00 per year.

MOTION PICTURES and DANCE

We will put on a Motion Picture show, followed by a Eance, at the M. W. A. Hall in

Holt, Friday Evening, Sept. 29th

BATTLESHIP OF THE FUTURE

May Be Gigantic Submarine Capable of Diving Below Surface After Firing Broadside.

Albert Knox, discussing in the Navy the necessity of a new style of warship, says that if modern steel protective armor has failed to answer the purpose for which it was manufactured—a fact that seems to have been demonstrated beyond dispute by the experiments on the San Marcos—then heavily armored ships of war may soon be things of the past and modern battleships must seek new means and methods of protection from the attack of, or while attacking, an equal or superior enemy. Among the methods might be suggested increased speed, greater accuracy of gunfire (if possible), shortened time for finding range. Even with these points of superiority the future battleship needs as a requirement of paramount importance the ability to hide or to become invisible to the enemy. Of course this requirement can only be met by the future Dreadnought being a gigantic submarine capable of diving below the surface of the sea after firing a broadside and reappearing in an unexpected place. That such battleships will be built within the coming century is entirely within the range of probability.

HE WAS ROLLING IN WEALTH

Man in Vermont Mountains Who Had a Hundred Dollars Was Considered Very Rich.

Fred Emery was visiting in the mountains of Vermont last summer when he met, on the road, a large whiskered and talkative old man. There ensued the following conversation between the mountaineer and Emery:

"Be you acquainted in these parts?"

"I sure be."

"Be you acquainted with Seth Anderson?"

"I sure be. I know Seth well. He lives up on the Valley road."

"Waal, waal! Be you acquainted with Cy Southbridge?"

"I sure be. He lives down on the Mill road."

"Waal, now! Be you acquainted with Cy's daughter, Mary?"

"I sure be. She's a mighty [illegible] looking girl [illegible] Mary is married [illegible] wealthy man—an all-fired [illegible] man."

"You don't tell me!"

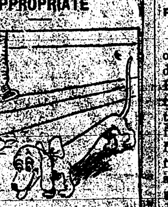
"An all-fired wealthy man! Why her husband is worth one hundred dollars!"—Popular Magazine.

ELECTRICITY IN THE AIR.

We have a comparatively new trouble with our teeth in which the teeth loosen in the jaw without apparent cause and drop out, leaving the dentist in mystery. In these recent years the general tendency toward baldness has been marked as unusually apparent. Are the electric waves used night and day in wireless telegraphy a cause?

Professor Hensingmuller suspects they may be. The effect of electrolysis is marked as it escapes from the cables of a power station. He says that in the sending of a wireless message only one mile, that portion of the electrical energy used is only 1-300,000,000ths of the energy expended. The rest goes into the air.

APPROPRIATE



The Cur—What's your name?

The "Dachs"—My mistress calls me "Linked Sweetness," but why, I don't know.

EVEN TO MARRY.

"I hear they were married in the professor's laboratory."

"Yes; the professor could only spare half an hour."

MORE NURTURE THAN NATURE

Character Depends Especially on One's Surroundings, His Conduct and His Habit.

A Chicago preacher gives this definition of character: "The mutual product of nature and nurture, with more of nurture than of nature." One's surroundings, his conduct, his habit, are more important than his ancestry and his blood. We note this every day—how children of alleged blooded stock drop out of the race and other fellows, with no heredity behind the old cottage or dusty shop, forge ahead. If there is spirit in a man's blood, he is all right. He will win. But this blood may have been pounding nails or hoeing corn for fifty years before.

It is the knack of getting at a thing that tells, and when one stops to count the profit of it he will likely fail. It is the doing of the thing unselfishly and almost blindly that commands success. Let any man go over his life and pick out some work or success that he is proud of, and he will find he didn't think it out, but rather strayed into it; saw an opening and wandered in. That is why so many poor boys get rich—they had to do something, and did it.—Ohio State Journal.

TURNED OUT TO BE GOOD TIP

Hotel Room Clerk Still Drawing Dividends on Stock Given Him for a Favor.

The room clerk took out a check for $1.50 drawn on a Philadelphia bank and indorsed it. "That's my semi-annual dividend," he remarked.

"One night about six years ago a man telephoned over to me from Philadelphia to say that he had left some valuable patented models behind. He said he was afraid to trust an ordinary messenger, and asked if I could arrange to bring the things over myself. I was to go off duty at eleven o'clock, so I caught the midnight train, delivered the models, and was back in good time for my work next day, which began at noon. The owner of the models paid all my expenses, and then gave me $100 worth of stock in the concern he had just formed. I did not think anything much of it, but in six months arrived a check for $1.50, and I have drawn altogether $18 in the same way. Not a bad little tip, eh?"—New York Sun.

ALTITUDE AND THE VOICE

Races Living in Loftier Countries Speak in Higher Tones, As a Rule.

Generally speaking, races living at high altitudes have weaker and more highly pitched voices than those living in regions where the supply of oxygen is more plentiful.

Thus, in South America, among the Indians living on the plateaus between the ranges of the Andes, at an elevation of from 10,000 to 14,000 feet, the men have voices like women, and the women like children, their singing being a shrill monotone.

The Australian native have a weak voice, but a knack of sending it a long distance, and the lowest tribes of African Bushmen would come into the same category; but, it is said, of all human beings, the pygmies of central Africa have, in point of volume and compass, the weakest of human voices.—Harper's Weekly.

POET AT POET'S BIRTHPLACE.

Shepherd M. Dugger, the bard of Grandfather mountain, recently described for the Observer a dance at Blowing Rock. Could any words, in truth, embody more sense sublime than these? "Just as the saffron fan from the sunset gathered in its folds, men and women darted into the dance like meteors, and as the sweet zephyrs from the Grandfather whispered poems through the windows they glided metrically on the thrilling pulse of music to the rhythmic metre of souls." Or than these? "The gaudily dressed couples were so thick on the floor that they looked like a wilderness of blooming rhododendrons stirred by a breeze."—Charlotte Observer.

MADE JOB FOR WHITE MEN.

Heretofore Japanese and Malays have done most of the pearl diving in Australian waters, it not being work that white men could endure. But now the commonwealth government has decided that after January 1, 1913, white men only shall be employed as divers and tenders.

Something New In Kitchen Ware
The "1892" Pure Spun Aluminum Ware is rapidly coming into use for cooking purposes. It is taking the place of agate and enamel ware because while its first cost is a trifle more than ordinary ware, it is really much cheaper in the long run, as it is guaranteed for twenty-five years and will last practically a life time.
The genuine "1892" Ware, made only from pure SPUN (not cast) Aluminum, will not crack, scale, peel, break, scorch or burn.
It looks like silver but weighs only about one-quarter as much, is easily cleaned and handled, and will not rust, corrode or tarnish. Absolutely pure, non-poisonous and wholesome; saves money, time and doctor's bills.
Be sure you get the original and genuine ware stamped with the Maltese Cross. At your dealers.

Bring us the news.

When in town call at this office and let's get acquainted.

Wanted—Pure bred Brown Leghorn cockerel. Apply at this office.

Miss Edna Risberg was up from Thief River Falls to spend Sunday at her home here.

For Sale—Pure bred Chester White Pigs, five weeks old. C. Schwartz, Section 14, Excel township.

Do not miss the moving picture entertainment at the M. W. A. Hall tonight. Admission 10 and 15 cts.

The Misses Bet and Tina Johnson were at Thief River Falls last Monday to visit with friends and relatives.

S. S. Kolden and son, Thorwald, left on Monday for Nielsville to spend a couple of days visiting at the L. S. Kolden home.

After the motion picture show at the M. W. A. Hall this evening a dance will be given. Take your lady friend along to the show and dance.

Ole Johnson and George Smith returned on Tuesday from North Dakota where they spent several weeks trying to thresh but only getting in a few days of work.

J. O. Quisberg left on Monday for Stearns county where he expects to spend a good deal of his time for the next few weeks preaching the gospel of Marshall county to prosective land buyers.

The dance at the M. W. A. hall last Saturday evening did not draw an overcrowded hall. What the crowd lacked in numbers it made up in sociability and [illegible]

We want a live correspondent in every township in Eastern Marshall county to send us the news of their locality and solicit subscriptions for this newspaper. We want bright young people and will make it worth their while to represent us.

M. A. NELSON, M. D.
PHYSICIAN AND SURGEON
Office over Holt Mercantile Co's store
HOLT, MINNESOTA.

R. Reierson transacted business at Thief River Falls Monday night.

Arvid Carlson drove over to Strip on Tuesdry afternoon on a combined business and pleasure trip.

Mrs. Sam Mickelson went to Thief River Falls on Tuesday evening to make a short visit with friends and attend to some business matters.

The Misses Julia and Betsy Knutson returned from North Dakota on Monday and are visiting with Mrs. Sam Mickelson. Miss Julia may stay here quite a while.

Johnnie Knudson was in from his home on the shore of Mud Lake Monday and had his name enrolled on our subscription list as well as transacting other business.

Mayor T. P. Hanre and wife were here from Thief River Falls on Monday, Mr. Hamre having some business matters to attend to. They came by automobile and made a very brief stop.

George Olson was in Wednesday from his home south east of Mud Lake and made the printing office a pleasant call as a result of which The Northern Light will shine in his home for the coming year.

W. R. Hoag, the drainage engineer, passed through here on Saturday on his way to the cities. He was carrying his right hand in a sling, having cut it badly by falling on a scythe a few days previously.

We want more subscribers and will take potatoes, chickens, or wood at current market prices on subscription. Of course we prefer the money, but if you haven't the cash bring on the produce. Dont be without your home paper anyway.

P. A. Vorwald was here from Kenmare, N. D., the first of the week to look over claims in the Mud Lake district belonging to his two sisters. He returned on Wednesday afternoon but expects to come back and rent a farm near Holt, if he can get one.

The prices of admission to the motion picture show appearing tonight at the Woodman hall will be only 10 and 15 cents. The entertainment will be high class, as the machine and the films shown are the best. There will be a dance given after the show and you simply can't afford to stay at home.

Mrs. Hannah Davis, who has been making her home at the Evergreen [illegible] for the past four months, was [illegible] to the state institution for the feeble minded at Faribault Monday. She has not been very strong [illegible] mentally, and of late seemed to be getting worse. Axel Nelson acted as her escort.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

SECRET OF PASTORS' SUCCESS

Writer Is of Opinion That Proper Manner Has Much to Do With the Matter.

The reason why a good many ministers of fair ability are out of a job is because they do not want to visit, because they are looking for a church that will fit their own notions rather than trying to fit themselves to the needs of a church. It is true that a good many men do not know how to call, they do not know how to behave when they get into a house, they do not like it and will shirk it every chance they get. Yet calling is the secret of success in almost every parish today—not the same kind of calling in all places, but some kind in every place—and if our seminaries had wisdom they would fit their students to do their work in the best way, in the only way in which it can be done in the country at least. Give one year to sermon-making and three years to making gentlemen in the truest sense of that word. Thus send out men who can adapt themselves to the needs of the place where they are called, and can thus serve human souls, who, being as they are, want to be better. The problem of the country church is to be solved by the pastor rather than the preacher.—University Leader.

Suburban Sobriquets.

Everybody else had lived in the summer colony long enough to name his home for whatever tree or shrub grew most abundantly in the front or back yards. Up and down the road were cottages labeled the Elms, the Wistaria, the Lilacs, and so on through the horticultural guide book. The newcomer had no name for her house, but after studying the tactics for a week she took a survey of the premises and thenceforward dated her correspondence the Rhubarbs.

SERIAL STORY

The Girl of My Dreams

A Novelization of the Play by Wilbur D. Nesbit and Otto Hauerbach
Novelized By WILBUR D. NESBIT

Copyright by W. D. Nesbit

SYNOPSIS.

Harry Swifton is expecting a visit from his fiancee, Lucy Medders, a Quakeress whom he met in the country. His auto crashes into another machine containing a beautiful woman and a German count. The woman's hat is ruined and Harry escapes. His sister, Caroline, arrives at his home to play hostess. Socrates Primmer, cousin of Lucy's, arrives with a hat intended as a present for Lucy. Harry is trailed to his home by the Count and Mrs. Gen. Blazes, who demands her hat, a duplicate of which she says has been delivered at Harry's house. She is in great fear lest her husband hear of her escapade. Lucy Medders and her father arrive and the count is hidden in one room and Mrs. Blazes in another. Harry is forced to do some fancy lying to keep Lucy from discovering the presence of the woman. The milliner, Daphne Daffington, who proves to be an old flame of Harry's, arrives to trace the missing duplicate hat and more complications ensue. Daphne is hustled into the room occupied by the Count. The latter, with whom Daphne had flirted at one time, demands the return of a ring he had given her on that occasion. She tells him that she gave the ring to General Blazes. As the Count had also given Mrs. Blazes a duplicate of the ring he becomes somewhat excited. Daphne leaves the room and seeks refuge in the one occupied by Mrs. Blazes. Mr. Medder discovers the Count, who is introduced as Harry's German tutor. General Blazes arrives and accuses Harry of concealing his wife. Daphne steps out and the general is dumfounded. Lucy gives way to tears. The Count takes the blame for the whole affair upon himself, but the verdict is reserved until Harry can vindicate himself. General Blazes admits to Harry that he has flirted with Daphne, and Mrs. Blazes overhears the talk. Mrs. Blazes attempts to escape with the aid of the Count and the latter is mistaken for a burglar. The duplicate hat arrives and Harry solves that mess.

CHAPTER XIII.

A short while later Harry left his guests gathered about the piano, singing, and quietly slipped outside. The Count made an excuse and left the room also. Harry went immediately to the front of the house and threw a pebble against Mrs. Blazes' window.

"Sst!" he cautioned, as she appeared.

"Oh, dear! I'm distracted!" she said, almost hysterically.

"How do you think I feel?" he asked. "Listen. I've got the hat. I put it in my sister's room, until I get a chance to give it to you."

"Why can't I have it right away?" she asked.

"Some one would see me getting it to you. We can't take a chance. General Blazes is in there with the rest—don't you hear him singing?"

"Oh, yes. It is such a blessing that the dear old fellow can forget his troubles."

"He'll remember them soon enough."

Around the corner of the house came Count von Fritz, laboriously carrying a long ladder that he had found.

"By gracious!" Harry said. "You're not such a fool after all. Here! I'll help you."

"Now you see," said the Count. "Ve ged her oud."

With infinite pains, and as much silence as they could command, they raised the ladder and adjusted it against the window sill. Mrs. Blazes watched the proceeding eagerly.

"Am I to come down on that?" she inquired.

"No," Harry answered, with the sarcasm the occasion required. "We are going to train a morning glory vine on this."

"Smarty!" she sniffed at him. "That's just like a man!"

"Be careful, and be quiet. Get out on the ladder and creep down," Harry told her.

Mrs. Blazes stepped on a chair and planted herself on the window sill. She was just swinging a neatly-shod foot over to the ladder when Harry hissed:

"Get back! For the love of Mike, get back!"

She fairly fell back into the room, and as she did so Harry and the Count dropped their ladder to the ground among the shrubbery and dashed around the corner.

The irrepressible Carolyn had come to the front steps, adorned in a splendid hat of yellow straw, wreathed with gorgeous red poppies. Behind her came Pigeon Williams, his eyes drinking in the beauties of the girl and the hat.

"Say," he remarked, "that's a peach of a hat. Where'd you get it?"

"I found it in my room," she said. "Harry must have meant it as a surprise for me. Now I'm going to surprise him when he finds out I've found it. Let's stroll in the garden."

Nothing loath, the enamored Pigeon accepted the invitation. Harry and the Count peeped around the corner of the house, with grimaces of wrath and despair.

"Never mind," Harry whispered. "We've still got a hat up our sleeves."

General Blazes came from the door, bidding the others good night.

"Tell Harry I'm sorry I had to hurry off," he said. "My wife will surely be at home by this time, worrying herself sick over my absence."

As he descended the steps Daphne Daffington, breathless, came up the walk. In her hand she carried a hat box containing the hat she had rushed to completion as a favor to Harry. That worthy and Count von Fitz nudged each other as they saw the general and the little milliner meet.

"General!" said Daphne, dropping the box and clasping her hands.

"Daphne!" exclaimed the General. The window above opened slowly and Mrs. Blazes peeped out upon the tableau.

"So!" the General said, bitterly. "Flirting, were you! And with that scrub of a Dutch count!"

"Loafer vat he iss!" mumbled the Count, and Harry clapped his hand over the Count's mouth in fear of being discovered.

"Any woman," said the General sternly to Daphne, "ought to be ashamed of being seen with him."

Daphne looked about her for some way of escape. But the General went on:

"And this ring you gave me! His ring! His ring that he—Didn't he give you this very ring?"

"No," Daphne answered, nervously. "He didn't give it to me, General. He—he wished it on."

"Well! I'll bet you the scoundrel doesn't wish it on any other woman!"

The General tore the offending ring from his finger and threw it away. It rolled directly to the Count, who grasped it fervently and whispered to Harry:

"For diss I forgif him all der rest!"

Harry kicked him, as a gentle signal for silence.

"I suppose," the General accused her, "you are back here looking for him, eh?"

Lucy opened the door and looked out, evidently wondering where Harry might have gone. She thought he would be waiting for her on the lawn bench. Seeing the General and Daphne she drew back, but she heard his question about the hat, and Daphne's answer.

"No," Daphne said, "I brought this hat for Harry Swifton."

Lucy silently came down the steps and stood in the shadows.

"What?" the General asked. "Is he getting up a hat trust? He must think a lot of that little fiancee of his."

"Oh," Daphne explained carelessly, "it isn't for her. He told me it was for another woman."

Daphne passed the General, first picking up the hat box, and tripped up the steps and through the open doorway. The General walked away, shaking with laughter and chuckling:

"Harry is up to his old tricks."

Harry, from his place of concealment, was about to rush forth and speak to Lucy, but this time the Count restrained him. Lucy stood and sighed:

"Oh, Harry!"

Primmer appeared, still lugging his hat box. He almost fell down the steps, at seeing Lucy alone at last.

"My time has arrived!" he said, ecstatically. "My poor, poor Lucy! I have tried so hard to see you alone. Here! Let me present you this slight token of my affection—this hat! Wear it for my sake!"

"So! the General Said. "Flirting Were You?"

He was surprised by the eagerness with which Lucy seized the box from his hands.

"A hat! Yes!" she exclaimed. "Give it to me. Yes, I will wear it!"

Primmer was about to burst forth into rapturous words, when she said:

"Nay! Do not speak to me! Leave me, I beg!" and rushed into the house.

Primmer followed her in, bewilderment holding him dumb for once.

Daphne came out of the door, saying:

"Well! They're all going crazy here. I can't find any one who will listen to me at all."

Harry came from his hiding place and said:

"Did you want to see me?"

"Yes. Here's your hat. Now, let's have our supper, Harry."

"It's no use, Daphne," he told her. "I can't accept your kind invitation. You're a couple of years late with it. I'll pay you any price for the hat, but—"

Daphne came down to him and looked at him with amazement.

"You don't mean that, Harry, do you?" she said. "Why, don't talk about the cost of the hat. It's the dinner I want."

Lucy again came to the door. She wanted to find Carolyn and tell her that she was going home. Now she saw Harry and the milliner. Daphne refused to be convinced by Harry's shaking of his head, and said:

"To think of you treating me like that! After all I've done for you."

"Yes, Miss Daphington, I know," Harry replied, soberly.

"Oh, Harry! How can you be so cold and cruel?" Daphne asked.

"No," Harry said, decisively. "That's all off the slate now. I'm engaged to be married to the dearest little girl in the world, and all this fluffing business is out for good."

"Is that so?" Daphne whipped out, angrily. "Suppose she knew about that other woman who is hiding in your room!"

Lucy gasped, and clutched her hands together.

"For heaven's sake, don't talk so loud!" Harry begged.

"Of course General Blazes is a good friend of yours," Daphne sneered, "but he might not relish it to hear that his wife"—

"Stop right there!" Harry ordered. "Don't pretend that you don't know I am perfectly innocent in this whole thing. You know how I accidentally ran over her hat this morning. You know that you, yourself, sent to this house a duplicate of that hat, and that I never met the woman before in my life. And you came here to see her and that was how you happened to be in that room with her. And you know that everything I have done, and all the lies I have told, and all the suspicions I have endured, have been because of my honest effort to protect her good name."

Waiting Until the Coast was Clear Count von Fitz Came From His Hiding Place.

"Still, appearances are against you," Daphne argued.

Lucy smiled with joy, however.

Amos Medders strolled out and saw Lucy.

"Daughter," he said, "art thou not afraid of catching cold?"

Harry and Daphne turned, almost guiltily.

"Why, bless my soul!" Harry said. "I didn't see you folks come out."

"I just come," Lucy told him. "And what art thee getting, Harry?"

"He's buying a hat," Daphne said.

"What? Another hat?" Medders asked.

"Oh—er—yes, certainly," Harry replied.

"And for Lucy?"

"If you will let me give it to her, sir."

"What? Two? Why, Harry, my boy, thee art extravagant."

"Two?" Lucy asked.

"I wanted you to have your choice, Lucy," Harry said.

Daphne maliciously opened the box and placed the hat on Lucy's head. From her window Mrs. Blazes watched the proceeding in abject despair.

"Thank you, Miss Daphington," Harry said, taking control of the situation. "I'll let you hear from me tomorrow."

"Good evening all," Daphne said, sweetly, and left.

Mr. Medders, Harry and Lucy went in, but Lucy kept Harry back far enough to squeeze his arm and tell him he was a dear.

CHAPTER XIV.

Waiting until the coast was clear, Count von Fitz came from his hiding place and discreetly lifted the ladder.

"Wait a minute," he said to himself. Quietly he went into the house, and as quietly reappeared in a few moments, carrying the hat box which Lucy had taken from Primmer, and which she had left in the hallway.

"Brains in der head beats cash in der pocket," he moralized.

He wedged the hatbox under his arm and crawled up the ladder to the window. Tapping gently upon it, he almost fell off the ladder when Mrs. Blazes swung it open.

"Be careful, voman!" he urged. "If I fall off diss ladder on diss hat you stay in diss house for life."

(TO BE CONTINUED.)

The Passion Play.

The now world-famous "Passion Play" at Oberammergau is said to have had its origin, about 1833, in the deep contrition of mind born of a great pestilence. Certain survivors of the plague resolved that ever afterward, at stated intervals, they would celebrate the "Passion of Christ" as a token of their reverential gratitude. Beginning on a small scale, the play gradually grew in importance until it is now known all over the world, having visitors from pretty nearly every civilized country on earth. While Oberammergau is still, and will probably remain, the center of the institution, Passion plays are beginning to be established in the surrounding regions, notably in Switzerland.

Cheeses as Heirlooms.

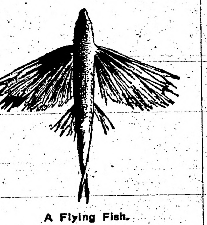
In some parts of Switzerland it is said that cheeses form family heirlooms which are sometimes handed down from one generation to another. At Les Ormonts, in the canton of Vaud, it is customary to make special cheeses for certain family feasts. They are tagged with explanatory labels and eaten several years later, at other feasts, or even at funerals. Recently, at Les Ormonts, in a concealed shelter, there was discovered a cheese dating from 1785. It was as hard as a rock and had to be cut with a saw. It is reported to have tasted good.

FLYING FISH OF CALIFORNIA

Innumerable Numbers of Them Along Southern Coast and Around the Catalina Islands.

Los Angeles, Cal.—Along the coast of southern California there are almost innumerable numbers of flying fish. Especially is this the case around the Catalina islands, which lie about 30 miles off shore.

In point of size, these fish range from 6 to 16 inches. They skim along the surface of the sea, and, at brief intervals rise above the waters and indulge in short flights through the air. In length and height these flights vary, much depending upon the state of the weather, the wind, and the size of the waves. Sometimes they will fly from five to ten feet above the surface.



A Flying Fish.

With the wing-like fins they throw themselves swiftly forward and upward and then dart ahead, sustaining and propelling their course through the air. All this is done with great rapidity; then the creature suddenly drops back into the water. An instant later it is ready for another flight. These brief excursions in the air are generally made just ahead of vessels and along the sides as they advance through the sea. Sometimes there are great schools of these creatures rising, darting ahead, following and falling and rising again, just like a flock of birds.

It is a very curious and interesting spectacle to watch these schools of fish from the deck of a vessel.

They are more frequently seen early in the morning than during any other time.

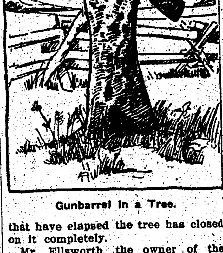
It often happens that these fish drop on the deck of the vessels and are captured. The flying fish are not deemed edible.

TREE IS A FREAK OF NATURE

Grows Around an Old Gunbarrel Left in the Crotch Many Years Ago.

Murfreesboro, Ark.—A curious natural phenomenon of Pike county is a wild cherry tree on the Ellsworth farm two miles north of this place. The tree is about sixteen inches in diameter and twenty feet to the first limb.

About ten feet up, at what was probably one time the fork in the tree, since grown into a solid trunk, an old musket is grown into the tree. The barrel sticks out at one side, the stock protruding from the other. On the stock is cut the initials "J. P." The general belief is that some one left the gun in the old crotch of the tree and forgot it, and in the years that have elapsed the tree has closed on it completely.



Gunbarrel in a Tree.

Mr. Ellsworth, the owner of the farm, has refused fancy prices offered for the tree by several curio collectors.

QUEER VISITATION OF FATE

Wealthy New Yorker, Who Cast Kinsfolk Aside, Visited by Strange Prank of Fate.

New York.—By a strange prank of fate Arthur J. Mace, the wealthy manufacturer of refrigerators and toys, who refused to permit two crippled brothers to remain in his house in this city, now lies himself a hopeless cripple in his splendid mansion. Just a year after he ordered his brothers out he fell and broke his back and is paralyzed from the waist down.

The two brothers, Henry B. Mace and Edward H. Mace, have been sufferers from a peculiar nervous trouble since they were boys. It renders them practically helpless, and they are obliged to be constantly attended by trained nurses.

When they go out they have to be wheeled in roller chairs. Their lower limbs are useless for purposes of locomotion. These two brothers, however, have the income from $300,000, so that they are amply able to maintain themselves.

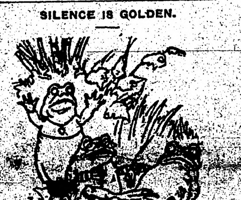
SILENCE IS GOLDEN.



Mrs. Roley—Poor dear, he hasn't said a word for three weeks.

Dr. Bull-Frog—Well, you don't want him to croak, do you?—Exchange.

Buying Legislators in Joblots.

One day, writes Sloane Gordon in Success Magazine, a former member of the Ohio house displayed, inadvertently, a large roll of bills in the Neil house lobby. A fellow member gazed in awe at the show of wealth.

"I just sold a drove of hogs," explained the former member rather hastily and confusedly.

The observing one was thoughtful. He did not reply for the half-minute usually essential to the full-measured beat of his mental processes. And then—

"Yaas," he drawled, "and I'll bet I'm one o' them hawgs."

Plenty of Biz.

"How is your son, the young doctor, making out?"

"First rate, since he learned to adapt himself to circumstances. He started out as a lung specialist, but he's a green apple specialist now."

FOOD AGAIN

A Mighty Important Subject to Every One.

A Boston lady talks entertainingly of food and the changes that can be made in health by some knowledge on that line. She says:

"An injury to my spine in early womanhood left me subject to severe sick headaches which would last three or four days at a time, and a violent course of drugging brought on constipation with all the ills that follow.

"My appetite was always light and uncertain and many kinds of food distressed me.

"I began to eat Grape-Nuts food two or three years ago, because I liked the taste of it, and I kept on because I soon found it was doing me good.

"I eat it regularly at breakfast, frequently at luncheon, and again before going to bed—and have no troubles in 'sleeping on it.' It has relieved my constipation, my headaches have practically ceased, and I am in better physical condition at the age of 63 than I was at 40.

"I give Grape-Nuts credit for restoring my health, if not saving my life, and you can make no claim for it too strong for me to endorse." Name given by Postum Co., Battle Creek Mich.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

SHE GOT WHAT SHE WANTED

This Woman Had to Insist Strongly, but it Paid

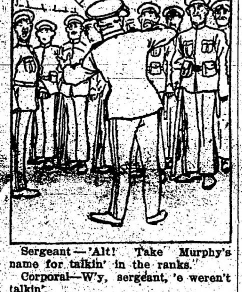
Chicago, Ill.—"I suffered from a female weakness and stomach trouble, and I went to the store to get a bottle of Lydia E. Pinkham's Vegetable Compound, but the clerk did not want to let me have it—he said it was no good and wanted me to try something else, but knowing all about it I insisted and finally got it, and I am so glad I did, for it has cured me.

"I know of so many cases where women have been cured by Lydia E. Pinkham's Vegetable Compound that I can say to every suffering woman if that medicine does not help her, there is nothing that will."—Mrs. JANETZKI, 2963 Arch St., Chicago, Ill.

This is the age of substitution, and women who want a cure should insist upon Lydia E. Pinkham's Vegetable Compound just as this woman did, and not accept something else on which the druggist can make a little more profit.

Women who are passing through this critical period or who are suffering from any of those distressing ills peculiar to their sex should not lose sight of the fact that for thirty years Lydia E. Pinkham's Vegetable Compound, which is made from roots and herbs, has been the standard remedy for female ills. In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound.

THE DECEIVER.



Sergeant—'Alt! Take Murphy's name for talkin' in the ranks.

Corporal—W'y, sergeant, 'e weren't talkin'.

Sergeant—Wasn't 'e? Well, cross it hout and put 'im in the guard room for deceivin' me.—The Tattler.

Cause of the Excitement.

The sons of the rich were all enthusiastically following some one down the street.

"What's up?" somebody asked.

A rather more accommodating young nabob than the others turned around.

"Do you see that tall fellow up front?" he asked.

"Yes."

"Well," he said, "he's discovered a new way to spend money."

Needed at Home.

Brown—That is the worst behaved kid I ever saw. Do you know his parents.

Jones—His father is one of those scientific management experts.—Puck.

Some men never reach the top because the elevator isn't running.

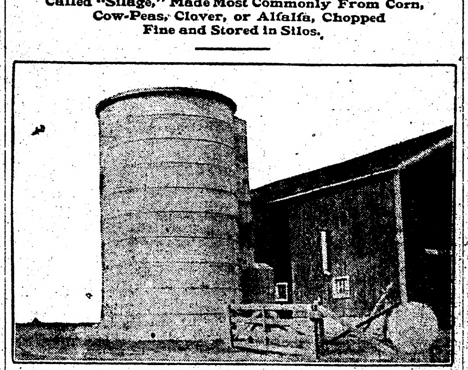
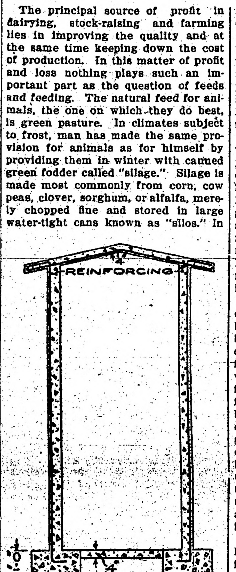
FEEDING IS IMPORTANT AS PRINCIPAL SOURCE OF PROFIT

Farmer Now Provides Live Stock With Canned Green Fodder, Called "Silage," Made Most Commonly From Corn, Cow-Peas, Clover, or Alfalfa, Chopped Fine and Stored in Silos.



Solid Modern Concrete Silo.

The principal source of profit in dairying, stock-raising and farming lies in improving the quality and at the same time keeping down the cost of production. In this matter of profit and loss nothing plays such an important part as the question of feeds and feeding. The natural feed for animals, the one on which they do best, is green pasture. In climates subject to frost, man has made the same provision for animals as for himself by providing them in winter with canned green fodder called "silage." Silage is made most commonly from corn, cow peas, clover, sorghum, or alfalfa, merely chopped fine and stored in large water-tight cans known as "silos." In dry weather or in winter, when green pasture cannot be had, this feed is equally good in producing a flow of milk or in putting fat on animals. One acre of a crop harvested as silage will feed twice as much stock as the same amount harvested in any other manner.



Showing Reinforcing.

Like a glass fruit jar, a silo must be water-tight and jointless to keep the silage from molding or "dry firing." For this reason, and also because no painting or repairing is ever necessary, solid-wall concrete silos are coming into general use.

The best silos are built circular in shape. The size depends upon how many animals are to be fed daily, the quantity in pounds for each animal's daily feed, and the number of days it may be necessary to feed them. The silo should be of such size that a layer of silage at least two inches in depth will be removed each day after feeding has begun. This prevents a thin top layer from molding. A dairy cow requires about forty pounds of silage per day, and the following table is based on this amount. Forty pounds is also the average weight of a cubic foot of silage.

Locate the silo where it will be convenient for feeding. Usually it is joined to the barn by means of a chute and passageway with doors. Since the silo and its contents are heavy, it must be built on solid ground. The bottom of the foundation should go below frost line. The silo may, with advantage, extend four to five feet into the ground. Dig the pit large enough to allow for the thickness of the circular walls and a footing two feet wide.

In order to save lumber the concrete is poured into forms which can be moved up as the concrete sets or becomes hard. These movable forms consist of two circular shells three to four feet high, so made that one fits within the other with space between for a six-inch wall. The horizontal framework consists of 2 by 4 inch timbers cut to a circle, which are covered with sheet metal or wooden lagging. Each piece must be long enough to provide for a six-foot three-inch length of the circumference of the circle as well as several inches for the lap or strap joints. The forms are raised by loosening them at the joints and setting them up again on the finished section of the silo.

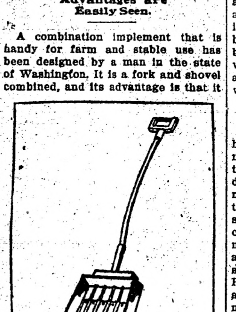
Concrete for silos should be rich in Portland cement and should be put into the forms mushy wet. Mix it one part cement to two parts sand to four parts crushed rock. Four parts of clean pit or bank-run gravel may be used instead of the sand and rock. Measure all materials on the basis that one bag of cement equals one cubic foot. Many persons raise the concrete in buckets, but the work can be done more quickly and easily by using a horse together with a derrick or a well braced jib-boom fixed to an adjoining building.

The first cost of concrete silos may or may not be greater than that of the best of any other kind. The time is now at hand when farmers, like railroads and corporations, are considering the lasting qualities of buildings. Concrete silos need no insurance; they do not blow down or burn up. They never have to be painted or repaired. With other kinds of silos during their short lives these expenses alone equal the first cost. Concrete lasts forever.

COMBINED TOOL HANDY ON FARM

Scoop Detachably Connected and Has Grooves for Tines—Advantages are Easily Seen.

A combination implement that is handy for farm and stable use has been designed by a man in the state of Washington. It is a fork and shovel combined, and its advantage is that it takes up no more room than one of these tools and can quickly be turned from one into the other. The basic implement is a fork, and the shovel portion is adjustably connected. In the head of the scoop are holes through which the tines of the fork pass when the scoop is to be attached, and across the bottom is a metal strip with a series of longitudinal grooves, through which the tines also pass and which serves to hold the shovel firmly in position. The usefulness of such a tool can readily be understood. In a case where a man has both shoveling and forking to do, as around a barnyard, he can accomplish the work by a quick transformation of this device instead of having to go and get a different implement every once in a while.



Fork and Shovel In One.

Cow Weeding.

The removal of weed cows from the herd is doing more for the dairy business than perhaps any other one thing. So profitable has this line of dairy work proved that many dairymen who were about ready to abandon the dairy business have taken a fresh start. But the mere removal of weed cows is not enough. Their places must be taken by better ones. These are easily secured by using pure-bred sires of known milk producing strains. Records show that this line of work is also profitable. More and more dairymen annually are adopting it. Some men themselves do the work of weeding and breeding; others rely upon cow-testing associations. These associations cost little and pay well as cow weeders.

Wants Bureau of Inspection.

The Kansas department of agriculture wants to establish a bureau to inspect grain feed, seed and hay with the purpose of raising the standard on these commodities. Chicago and St. Louis already have such bureaus

AT HOUSE CLEANING

SOME POINTS WORTH KEEPING IN THE MEMORY.

Much Labor Can Be Saved by Knowing Just What Are the Best Things to Use—Proper Care of Silver.

Brass can be polished by rubbing with a mixture of powdered chalk—precipitate kind used for tooth powder—rubbed into a paste with lemonn juice. Let it dry on and polish with chamois. There is an excellent pomade that is a good brass cleaner.

In applying any pomade or paste for cleansing it will be more efficacious if moistened with kerosene instead of water. In the same way use alcohol for silver pastes.

Old copper can be rubbed bright quickly with lemon skins and salt or salt and vinegar. Let it stay on a very short time and polish with chamois.

Where silver that is kept in chests most of the year must be cleaned it will save time to boil in soapsuds, to which has been added a good-sized lump of washing soda. Rinse thoroughly in hot water and, if extra polish is necessary, rub up with a little silver powder.

Put your silver back in the chest in tissue paper wrappings and a lump of camphor in the box and you will be saved work the next time it is taken out.

Never use soapsuds on cut glass. Wash in ammonia water—not so hot as to crack the glass—scrub with a fine brush in the facets, rinse in fresh ammonia water and dry for an hour or more in cheap, fine sawdust. This brushes out quickly and your pieces shine like new.

When cleaning the china closet do not content yourself with just dusting off unused sets with a damp cloth. China should be well scrubbed at least once a year or it may stain. Soak for half an hour in lukewarm soapsuds and rinse in clear water, not too hot, or it will crack delicate porcelain.

Stains on china can be removed with a little dry salt or by rubbing well with wood ashes moistened with kerosene.

If you do not superintend the washing of your own fine china, insist upon the maid using a rubber pad in the bottom of the dishan and not putting in too many pieces at a time.

Have a good carpet soap for rugs and carpets, or use a fine olive oil soap, scrub well with the lather, rinse twice, once in lukewarm water, then in cold. Rub until nearly dry, then hang in the air.

If floors are much stained and cannot be done over, wipe off carefully with gasoline, then rub to polish with a mixture of half a pound of porcelain, a quarter pound of beeswax, melted and mixed when hot with four tablespoonfuls of turpentine. Beat until cold. Apply with flannel, rub with another piece, and polish with iron covered with wool padding and fine velveteen, if you have no regular floor polisher.

Sparkling Mead.

Sparkling mead is made by boiling fourteen pounds of honey in six gallons of water for half an hour, breaking into it four eggs; then stir into this a half ounce each of cinnamon, cloves, mace and bruised ginger, and small bunches of marjoram, balm and sweetbrier; boil a quarter of an hour longer and pour out to cool. Then toast a large slice of brown bread, spread it over with fresh yeast, and put it into the liquor. Let it ferment for a day, and then put it into a cask, but keep it open till the fermentation is complete. Then cork the cask tightly. This may be bottled in a month, and if bottles are used which have not the patent spring stoppers the corks must be securely tied.

Escalloped Cabbage.

Escalloped cabbage is a delicious dish made from left-over boiled new cabbage. Cut half a boiled cabbage in pieces, put in a buttered baking dish, sprinkle with salt and pepper and one cupful of white sauce. Lift the cabbage with a fork that it may be well mixed with the sauce, cover with one cupful of buttered cracker crumbs and bake in a hot oven until the crumbs are brown. From one-quarter to one-third of a cupful of melted butter may be evenly coated and light rather than compact.

Boiled Dinner.

For a family of from four to six, seven pounds of corned beef will be required. Brisket is best. Cut one large cabbage into quarters, slice two turnips an inch thick, then slice six of each carrots, parsnips and potatoes. Put the beef over the fire in a large pot and cook steadily five hours. An hour before serving add the vegetables and cook until tender. Put meat on large platter and surround with vegetables. Sliced beets, in vinegar are nice with this dish.

Cooking Asparagus.

Prepare it same as you would to cook in boiling water, but instead of putting in a double boiler without any water except what remains on it from washing, put in a little salt and cook same as you would oatmeal. It takes about two hours to cook, but is much nicer cooked this way.

Rainmarks.

Rainmarks upon clothes may be removed by placing a clean damp cloth upon the material and pressing with a moderately warm iron.

WHEN CUPID WAS OFF DUTY

Lover's Bad Cold That Led to Most Unfortunate Misunderstanding With Girl.

Sweet was the lass, low was the gas; it was the evening she expected him to put across the big question.

He did not look well. Something seemed to be troubling him. He tried to say something, but the words stuck in his throat, and the girl, noticing this, turned the gas even lower.

Suddenly he turned to her and cried, "I'm a dub!"

"No," she said, fondly. "You don't appreciate yourself as well as some others do, perhaps. Tee hee!"

"Yes," he persisted stubbornly, "I'm a dub!"

"No," she maintained.

"Yes," he almost shouted, "I'm a dub!"

She was a sensible girl, and so, realizing that he ought to know best, she thanked him kindly for warning her in time and handed him his hat. It was only after the door slammed behind him forever that she realized the awful truth.

He had contracted a nasty cold, and what he had been trying to say was, "I'm in love!"

HANDS BURNED LIKE FIRE

"I can truthfully say Cuticura Remedies have cured me of four long years of eczema. About four years ago I noticed some little pimples coming on my little finger, and not giving it any attention, it soon became worse and spread all over my hands. If I would have them in water for a long time, they would burn like fire and large cracks would come. I could lay a pin in them. After using all the salves I could think of, I went to three different doctors, but all did me no good. The only relief I got was scratching.

"So after hearing so much about the wonderful Cuticura Remedies, I purchased one complete set, and after using them three days my hands were much better. Today my hands are entirely well, one set being all I used." (Signed) Miss Etta Narber, R. F. D. 2, Spring Lake, Mich., Sept. 26, 1910.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 2 L, Boston.

Only a Moose.

"The modern woman isn't a bluff," asserted Mrs. Gobbolink, looking up from her newspaper. "This suffrage movement has more in it than mere ideas. The new woman is brave and fearless. Here is a story of a woman up in Canada who killed a mouse. It seems that she—"

"Impossible!" interjected Mr. Gobbolink. "There must be some mistake—read it again."

Mrs. Gobbolink searched out the paragraph and then blushed vividly. "How stupid of me," she stammered. "I did make a mistake. It wasn't a mouse she killed—nothing but a moose."

Folly of Vain Regrets.

The late John W. Gates, an incurable optimist, harped continually on the futility of pessimism. One of Mr. Gates's epigrams, still quoted on the Chicago Stock Exchange, ran:

"He who nurses foolish hopes may be an ass, but he is not such an ass as he who nurses vain regrets."

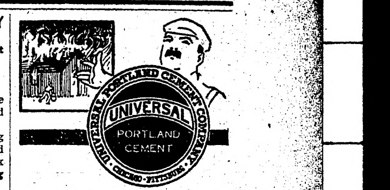
TOMMY MURPHY,
The great horseman who is winning most of the big races for fast trotters with that farm horse, "R. T. C.," record 2:08¼ says: "SPOHN'S DISTEMPER CURE is the best remedy for all forms of Distemper and coughs I have ever known. I have used it a number of years." All druggists or send to manufacturers. 50c and $1 a bottle. Spohn Medical Co., Chemists, Goshen, Ind., U. S. A.

Play It or Raise It.

A German composer has written an altisonant piece of music called "Hell." There will be any number of people in this country able to play it at a glance.—Houston Post.

The Pure Food Law stopped the sale of hundreds of fraudulant medicines. They could not stand investigation. Hamlins Wizard Oil has stood the test of investigation for nearly sixty years.

Few of us can do more than one thing well. Many a man who has no difficulty in making money is a dismal failure as a spender.



Cement Talk No. 7
Newspapers print nearly every day the story of some *fire disaster* involving the complete destruction of great property values and sometimes the loss of human lives. The annual fire losses of the United States are measured by the millions; in fact, it is stated that over two hundred and fifty million dollars worth of property was wiped out by fire in the United States last year. While it is true that the precautions to prevent fire and fire fighting systems are often inadequate, the main trouble lies in *flimsy, non-fireproof building construction*. Experience has proved that fireproof construction is both practicable and economical. In some industries fireproof building is compelled by law. Reinforced *concrete* has come to the front as the most important agent in building against fire. The use of *cement* in building is becoming more and more common, due to its fireproofness, durability and economy. When building anything from the back porch steps to an office building, concrete construction may be safely adopted. The use of *Universal Portland Cement* in the *concrete* will insure *cement* of the best quality possible to manufacture. *Universal* is handled everywhere by the best dealers.
UNIVERSAL PORTLAND CEMENT CO.
SECURITY BANK BLDG., MINNEAPOLIS
ANNUAL OUTPUT 10,000,000 BARRELS

Whittemore's Shoe Polishes
Finest in Quality. Largest in Variety.
They meet every requirement for cleaning and polishing shoes of all kinds and colors.
GILT EDGE the only ladies shoe dressing that positively contains OIL. Blacks and Polishes ladies' and children's boots and shoes, shines without rubbing, 25c. "French Gloss," 10c.
DANDY combination for cleaning and polishing all kinds of russet or tan shoes, 25c. "Star" size, 10c.
ELITE combination for gentlemen who take pride in having their shoes look A1. Restores color and lustre to all black shoes. Polish with a brush or cloth, 25 cents. "Baby Elite" size 10 cents.
If your dealer does not keep the kind you want, send us his address and the price in stamps for a full size package.
WHITTEMORE BROS. & CO.,
20-26 Albany St., Cambridge, Mass.
The Oldest and Largest Manufacturers of Shoe Polishes in the World.

Make the Liver Do its Duty
Nine times in ten when the liver is right the stomach and bowels are right.
CARTER'S LITTLE LIVER PILLS
gently but firmly compel a lazy liver to do its duty.
Cures Constipation, Indigestion, Sick Headache, and Distress After Eating.
SMALL PILL, SMALL DOSE, SMALL PRICE.
Genuine must bear Signature
Brent Good

ALLEN'S ULCERINE SALVE
For the treatment of Chronic Ulcers, Bone Ulcers, Scrofulous Ulcers, Varicose Ulcers, Indolent Ulcers, Mercurial Ulcers, White Swelling, Milk Leg, Fever Sores, all old sores. Very successful. By mail 50 cents. J. P. ALLEN MEDICINE CO., Dept. A4, St. Paul, Minn.

PARKER'S HAIR BALSAM
Cleanses and beautifies the hair. Promotes a luxuriant growth. Never Fails to Restore Gray Hair to its Youthful Color. Cures scalp diseases & hair falling. 50c, and $1.00 at Druggists

If afflicted with sore eyes, use Thompson's Eye Water

W. L. DOUGLAS
$2.50, $3.00, $3.50 & $4.00 SHOES
WOMEN wear W. L. Douglas stylish, perfect fitting, easy walking boots, because they give long wear, same as W. L. Douglas Men's shoes.
THE STANDARD OF QUALITY FOR OVER 30 YEARS
The workmanship which has made W. L. Douglas shoes famous the world over is maintained in every pair.
If I could take you into my large factories at Brockton, Mass., and show you how carefully W. L. Douglas shoes are made, you would then understand why they are warranted to hold their shape, fit better and wear longer than any other make for the price.
CAUTION The genuine have W. L. Douglas name and price stamped on bottom
If you cannot obtain W. L. Douglas shoes in your town, write for catalog. Shoes sent direct from factory to wearer, all charges prepaid. W. L. DOUGLAS, 145 Spark St., Brockton, Mass.
ONE PAIR of my BOYS' $2, $2.50 or $3.00 SHOES will positively outwear TWO PAIRS of ordinary boys' shoes

A LANDSLIDE AGAINST RECIPROCITY

CONSERVATIVES THROUGHOUT THE DOMINION SWEEP ALL BEFORE THEM.

MAJORITY WILL REACH 50

Agricultural Vote Almost Solidly Against Reciprocity.—Seven Ministers in Sir Wilfrid's Cabinet Lose Out.

Montreal, Ontario. — The Laurier government and reciprocity suffered an overwhelming defeat in the Canadian elections. By a veritable landslide the Liberal majority of 43 was swept away, and the Conservative party secured one of the heaviest majorities, upwards of fifty, that any Canadian party ever has had. Seven cabinet ministers who had served with Premier Laurier were among the defeated candidates.

The results with a few of the distant constituencies estimated, were:

Province.	Liberals.	Conservatives.
Ontario	13	70
Quebec	36	27
Nova Scotia	9	9
New Brunswick	8	5
Prince Edward Island	2	2
Manitoba	1	9
Saskatchewan	7	3
Alberta	6	1
British Columbia	0	6
Total	82	132

Opposition majority, 50.

The Liberals lost ground practically in every province of the Dominion. Where they won, their majorities were small. Where the Conservatives won, their majorities were tremendous. Ontario, the leading province of Canada, declared almost unanimously against the administration and reciprocity.

Robert L. Borden, leader of the Conservative party, shortly will become the prime minister of Canada. He will be supported in parliament by a working majority of members far more than ample for his purposes.

Pact Not to Be Introduced.

The government defeat means that the Fielding-Knox reciprocity agreement, ratified by the American congress in extra session, will not be introduced when the twelfth parliament assembles next month, and that a revised basis of trade with the United States, looking to closer commercial relations, will not be possible in the immediate future. The Conservatives are committed to a policy of trade expansion within the empire and a closed door against the United States.

Although re-elected in two constituencies in Quebec, the defeat of the Liberal party also means the retirement from public life of Sir Wilfrid Laurier, who for nearly two decades has directed the destinies of the Dominion. Several times during the bitter campaign the venerable premier said that defeat of his party at the polls meant the end of his career; that he never would consent to lead a minority in opposition to a Conservative government.

A Liberal membership of 53 from Quebec was cut down to 36, which, taken alone, seriously threatened the supremacy of the party. But it was in Ontario that the Conservatives won their greatest victories.

Opposition Sweeps All Before.

Spurred on by appeals to patriotism and the cry that reciprocity was the entering wedge for annexation, the Conservatives swept nearly everything before them. Ontario, which in the last parliament was represented by 35 Liberals and 51 Conservatives, will send a delegation to the next composed of 13 Liberals and 75 Conservatives. A notable feature of the defeat was the opposition's capture of two hitherto Liberal seats in Saskatchewan.

Landslide Is Unexpected.

The landslide was not expected by either side. The Liberals were confident that they would be returned by the people with an increased majority, for they believed that reciprocity would be most acceptable to the Canadian electors. While the Conservatives claimed that they would have a majority, they did not expect that it would be so large or that the general verdict of the country would be given so decisively against the government.

They feared that reciprocity would prove popular with the farmers of Ontario and the farmers and fishermen of the maritime provinces, and, while confident that they would win the cities, they were dubious as to the result in rural constituencies. However, in Ontario especially, the agricultural vote went almost solidly against reciprocity, and in the maritime provinces it did not prove to be the popular issue expected.

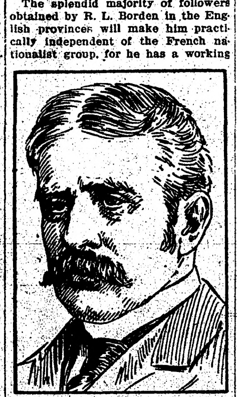
The farmers and fishermen of the East do not appear to have placed the high value upon the American market which was anticipated. While Sir Wilfrid Laurier, the prime minister, was safe in two counties, the Conservatives made a great harvest of ministerial heads; thirteen members of the Laurier cabinet sought reelection and seven of them were defeated.

Makers of Pact Defeated.

Minister of Finance Fielding and Minister of Customs Patterson, who made the reciprocity bargain with the United States, failed to win their elections. Sir Frederick Borden, minister of militia; Mac Kenzie King, minister of labor; Sidney Fisher, minister of agriculture; George P. Graham, minister of railways, and William Templeman, minister of inland revenue, also went down to defeat.

The ministers who survive the landslide are William Pugsley, of New Brunswick, minister of public works; Charles Murphy of Ontario, secretary of state; Frank Oliver of Alberta, minister of the interior; Premier Laurier; Rudolphe Lemieux, minister of marine and fisheries, and Dr. H. S. Beland, postmaster general in the province of Quebec.

The splendid majority of followers obtained by R. L. Borden in the English provinces will make him practically independent of the French nationalist group, for he has a working majority without them. The effect of this will be to minimise greatly the Nationalist party which Henri Bourasa has been creating for eight years past.



Robert Laird Borden.

The result of the election works so complete a disorganization of the Liberals that the Conservatives probably will remain in office for many years before their authority can be seriously challenged. The former Conservative government held office for 18 years and the Laurier government, which has just been turned out, followed with 15 years of power.

The verdict is looked upon as a triumph for the cause of protection and a victory for the manufacturers of Canada, who openly and avowedly were opposing the government because they feared the removal of duties upon natural products would be followed by an attack upon the protection which Canadian manufacturers have enjoyed for many years.

Laurier Expected to Resign.

Ottawa.—The result was a complete surprise to both parties in Canada's capital. The Liberals expected a victory, the Conservatives did not hope for the landslide which occurred in their favor.

It is expected that Sir Wilfrid Laurier, the premier, will tender to Governor General Earl Grey his resignation within the next two weeks, although not required to do so until defeated by an adverse vote in the house.

Cavalier Expected to Yield.

Poughskeepsie, N. Y. — Confirmation is given by local attorneys to the story of Sidney Harris' trip to Paris to settle the Cavalieri-Chanler affair. Chanler's attorneys are firmly of the belief that when Harris returns he will have Cavalieri's signature to a settlement for $70,000 and an abrogation of the marriage contract. The statement that $70,000 would be the price is said to be absolutely true, though as a bonus for a quick waiver $10,000 more may be given.

American Buys Castle.

London, Eng. — It was announced that Tattershall castle, in Lincolnshire, a medieval structure dating from the fifteenth century, has been purchased by an American millionaire. The old castle will be pulled down and re-erected on Long Island.

Waterloo, Iowa, Sept. — The Upper Iowa Methodist conference took occasion to denounce Secretary Wilson for accepting the honorary chairmanship of the National Brewers' association.

Suicide May Be Missing "Jim."

Brainerd. — The police at Brainerd believe that "Billy Smith," who ended his life in the city jail there, was the missing "Jim," sought to explain the murders of Mrs. Amelia Bolton and Frank Edward Rhodes, on the Bolton farm, near Wyoming, last week.

Canada's Census Under 8,000,000.

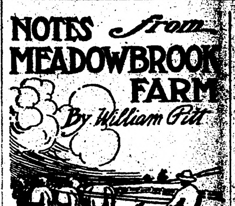
Ottawa, Ont. — The completion of Canada's fifth census, begun in June, wil show a total poulation much under 8,000,000 according to unofficial calculations.

Conners Quits Committee.

Albany, N. Y. — William J. Conners of Buffalo, former chirman of the democratic state committee, has resigned his membership on the committee to take effect immediately.

Father Sherman Insane.

San Jose, California. — Rev. Father Thomas E. Sherman, son of General William Tecumseh Sherman, is an inmate of the state hospital for the insane at Agnew following an attempt at suicide at the Jesuit novitiate at Los Gatos.



NOTES from MEADOWBROOK FARM

By William Pitt

Try a patch of alfalfa.

Gentleness pays best with the colt or horse.

There is a great deal of humanity in axle grease.

The pigs and light porkers should go to market early.

The boar should be well fed but not allowed to get too fat.

A draft horse should have a large chest and square shoulders.

Soils destitute of humus and nitrogen are impotent to produce clover.

Hogs should have clean pastures, beds and water, and a variety of food.

Old ewes and poor breeders should be fattened now, and sent to the butcher.

Always and with any variety of hens variety in feed brings the best egg results.

Pork production appeals strongly to a man of limited means who desires quick returns.

The busy bacteria gets busy in the milk almost at the moment it is drawn from the cow.

If too many rich table scraps are fed to the hens in confinement look out for soft-shelled eggs.

Sell to private customers and deliver on a certain day. Never fail to be there at the appointed time.

Many a bunch of promising feeders go to the country and return with indications of being half starved.

The fairs give a good opportunity to compare breeds, and farmers should [illegible]

The point of keeping the cows clean has been proven to be a saving in feed as well as an increase in milk.

It requires two-thirds of a full ration to keep a cow in fair condition before there is any milk production.

On every farm, where soil and climatic conditions are favorable, corn should be grown for fodder purposes.

Locate vines of bitter-sweet and fruiting grapes, that you wish to move from the woods to that porch or arbor next spring.

Work horses should be allowed to run out in the pastures at nights in all weather except during very severe cold and storms.

The man who feels that he is bigger than his job is generally mistaken. If he was he would quickly get a job that would fit him.

Homogenized milk is milk treated in such manner as to disrupt the fat globules so that they will not rise in the form of cream.

The vigorous hen and her rooster will start off a chick that will stand much more wear and tear than immature or weakly parents.

Alfalfa is a lime plant, and a dressing of 60 bushels of slacked oyster shells or 50 bushels of slacked stone lime to the acre should be given.

A simple way of finding out the value of each cow is by keeping a daily record of the quality of milk given by each, and testing it at intervals.

Humus was intended by nature to create and conserve the fertility of the soil for the production of the necessities to conserve the human race.

In feeding value silage compares favorably with other crops, although this will vary with the kind of stock and the grain rations with which it is used.

If the swine are in the fattening stage they should have all they will eat up clean, but growing animals should have just enough to keep them in a thrifty growing condition.

If your cow has obstructed teats, be very cautious about inserting tubes, probes, or quills. Nothing of the kind should be inserted in a cow's teat, excepting as a last resort; and then only with the most extreme care and cleanliness.

Soils that are heavily manured for cabbage, lettuce, celery and other crops will not need very much manure the following year, when planted with tomatoes, peppers and root crops, especially if a fair amount of commercial fertilizer is used.

Teach the colt to draw loads by degrees.

About ten weeks after shearing dip the lambs.

A horse suffering from colic should be kept quiet.

Keep sows over that have proved to be good breeders.

Keep the ewes in the stable on dry feed for a day or two.

The boar should be of good type and character and of pure blood.

To maintain normal soil fertility the supply of humus must be conserved.

Blood-meal is better for ducks than meat scraps, and it works into a mash fine.

Persistency in milk flow is one of the qualities which makes a profitable dairy cow.

The country fairs are announced. Be sure not miss them, especially the home one.

Poultry cannot be successfully raised without the application of brain and muscles.

Be careful about feeding horses inclined to heaves, too much hay, or hay that is dusty.

A fowl that will not fatten when heavily fed on corn is not in good physical condition.

Extra feed increases the growth of a proper kind and makes larger animals at maturity.

If when the hogs are growing fast their hind legs become weak, feed a little bone meal daily.

Stop the churn as soon as the butter granulates if you want to work out all the butter milk.

What has become of the old-fashioned farmer who used to keep a savage dog to catch his hogs?

Culling the pullets may seem a small matter to many, but it adds dollars to the year's profits.

A bull tied in the stall will get lazy and useless, besides making extra work in his care and feed.

Use your skim milk. Five pounds of skim milk have been found equal to one pound of grain for pigs.

A drove of hogs of all colors and sizes brings as much money as a drove of the same breed, color and size.

To obtain a maximum supply of milk, small pastures, allowing frequent changes of feed, should be provided.

If a small hatching house is once used, no poultry keeper ever likes to do without its convenience afterward.

As a rule, a large flow of milk is associated with a low per cent. of fat, while a small flow shows a higher test.

Sheep are comfort lovers and the man who neglects to provide them with good, dry shelter makes a costly error.

Grinding the grain makes it more digestible, and the more digestible the feed the more milk from a given amount.

It is not a common sight at any of the stock yards to see a large drove of hogs from one farm all showing the same breed.

Oats, wheat bran, and a litle corn or linseed-meal is a grain ration that will keep the lambs growing and in good flesh by winter.

There should be no hidden, inaccessible places in milk vessels. The seams should be soldered over smoothly inside and out.

The egg-producing qualities of the hen, like the butter-making qualities of the cow, will determine the hen's value at the end of the year.

Veal calves in hot weather will grow better if kept during the day in a dark, cool stable, but the stable must be cleaned out and well ventilated.

Except in unusual cases of rush work, the teams should cease work in time to cool off before the dampness and falling temperature of evening.

A mixture of barley, corn-meal, wheat bran and roots will put flesh on horses fast. With this, of course, a small quantity of hay should be given.

If care is taken to keep the surface of the silage level, two and one-half inches removed daily will be sufficient to keep the silage from decaying.

In filling the silo, extra tramping should be done around the edges, and when the silage is settling, it is well for some one to go into the silo every few days and tramp the silage near the edges of the silo.

Prof. James E. Rice, in his Cornell reading course for farmers, says: "Corn is an excellent grain. It is, perhaps, the grain most relished by fowls. Therein lies the danger. Fowls eat it so greedily that, it being a fattening food, they are likely to become overfat, if it is fed too freely."

A CHANGE OF HEART

By ESTELLE TRACY

(Copyright, 1911, by Associated Literary Press.)

"You don't play the game fair, Catherine." Barry Churchill looked down with frowning impatience at the fair girl who sat idly tracing fantastic patterns in the white sand at her feet. She waited to give a final embellishment before raising dark eyes that held a look of quiet amusement in their depths.

"Oh, I don't know, Barry," she replied. "It really isn't my fault that you insist on repeating that tiresome question at regular intervals never more than six weeks apart, nor am I to blame that I can't give you the answer you desire me to give. So just where I break any of the rules of the 'game' as you choose to call this summer friendship of ours, I am at a loss to understand." With a light shrug of her shoulders, Catherine Hollister rose to her feet and opened the gay little parasol.

"Granting that," returned her companion quietly, "still you might at least give a reason for your continual refusals. Why won't you marry me, Catherine?" he insisted as he took the parasol from her hands.

The girl's face flushed deeply at his touch, but her voice was even as she replied. "I have given you my woman's reason before and to all intents and purposes it proved wholly inadequate, so why bother to repeat it? I might add, though, what I have refrained from saying heretofore out of a kind consideration for your feelings——"

"And that is?" the man inquired.

"That you aren't at all the sort of man I would care to marry," she continued.

The man gave a laugh that was intended to be careless but his face whitened at her words. "If your distaste is engendered by any one particular shortcoming that I might change," he began somewhat sarcastically.

"It isn't," the girl broke in abruptly. "You are you and I am I," she said, "and any attempt to weld two such natures into one harmonious whole would result in inevitable disaster, so why talk about it further?" And she dismissed the matter with a little impatient gesture of her hands that was meant to express finality.

Sat by Her Open Window.

Together they walked along the beach in silence, the man with grave face and set lips, the girl carelessly swinging along beside him. She had removed her wide-brimmed hat and the cool evening wind blew the soft hair around her face. The man felt a tightening sensation in his throat as he looked at her and every line and curve of face and figure was stamped indelibly on his remembrance.

With all her winsomeness there was yet an unapproachableness about Catherine Hollister that kept most men at a distance, and it was a hint of mockery that ever lurked in half-tantalizing eyes that had kept Barry Churchill from revealing the whole strength and tenderness of a passion that had touched the very depths of his self-contained nature. Like a wall his cold restraint and pride rose between himself and the girl until her very soul cried out against it.

That night she sat by her open window looking out over the storm-swept expanse of ocean that had been so placid a few hours before. Her eyes were wide and her heart was filled with a tumultuous pain that all her calm reasoning could not still.

"Why can't he be more warmly human?" she said fiercely to herself as she rose and began to take down heavy braids of gold that were coiled around her head.

"You're a perfect goose," she said to the girlish reflection in the glass. "To think of you, Catherine Hollister, accustomed all your spoiled life to a perfect excess of love and tenderness, dreaming of marrying Barry Churchill! Why, his proud indifference and self-centered affection would break your hungry little heart into a thousand fragments in less than a month and he would never dream that he had been the cause of it!" With a laugh that was half a sob she turned down the light and slipped downstairs to her sister's room.

Opening the door softly, she peeped in. "Hello Cathie," exclaimed her sister's husband. "Come in and join our happy circle."

"Can't," returned Catherine. "I thought Madge said you were going to be away tonight or I wouldn't have ventured down. I'm lonesome and want to borrow the baby if she isn't asleep."

"Not by a whole lot, she isn't," returned the fond parent as he turned to a silk-lined crib that held the jewel of the household.

"Here Dolly Dimple," he said as he lifted a crowing bundle of soft muslin and lace from its depths. "Go comfort the lonely heart of this spinster aunt of yours while I enjoy my book and pipe in peace for half an hour."

As he laid the baby in the girl's outstretched arms, he gave one of her long braids a gentle tweak. "Why don't you marry Barry and settle down to a happy home life of your own?" he asked, teasingly.

"Why should I, when I can borrow all its joys and save myself its sorrows?" she retorted laughingly.

As she stepped out into the hall, the entrance door was hurriedly opened and the tall, coated figure of Barry Churchill confronted her.

"Where's Jack, Mrs. Weston?" he began breathlessly, his eyes blinded for the moment by the bright light of the room.

"Oh, I beg your pardon," he exclaimed quickly, as he discovered the identity of the slender figure. "Madonna," he breathed, as he looked down at the lovely vision, and a warmth and tenderness such as Catherine had not dreamed his nature capable of came into his face.

When he spoke again, after a long, tense moment, his voice was quiet and unmoved as ever. "I want to see Jack a moment," he explained. "There's a vessel struck the cliffs and I think we can do the poor fellows some good."

With flushed cheeks and holding the baby more closely in her arms, Catherine led the way into the little sitting room. A few minutes later both men were hurrying down the beach toward the scene of the wreck while the two women, counting long weary hours, waited fearfully for their return.

Shortly after midnight heavy tramping on the stone walk caused both women to spring to their feet. As the door opened and Catherine [illegible]

"Oh, Barry's all right, [illegible]" Mrs. Weston cried quickly. "He would go out one time more to try and save a fellow—did it, too, by Jove, and the breakers took most of the starch out of him."

"He'll be right when we get him warmed up and a little brandy down his throat," one of the fishermen said kindly, as he laid a fatherly hand on the girl's shoulder. Thus reassured, she crept back into the room, refusing all orders to go until she saw the light of consciousness slowly returning to Churchill's eyes. As he recognized the white figure at his side he reached out a comforting hand. With a glad cry the girl caught it to her lips, then fled from the room.

Bright and early the following morning Catherine slipped quietly downstairs and out upon the wide veranda overlooking the sea. Early as she was, Churchill was there before her. At her step he turned.

For a single moment the girl stood, deep-shadowed eyes gravely searching his face.

"Catherine," the man's voice held a question in it as eager eyes swept her lovely face.

The girl stepped to his side. "I wanted to tell you," she began bravely, "that I have changed my mind since yesterday—and if you think you care to ask me that question again——"

But for reasons that would be obvious to an understanding person, the stumbling sentence was never completed.

Shining Record.

To have performed the duties of a responsible position for 47 years without making a single mistake is an achievement which is probably unique in the annals of public service. Such is the enviable record of Mrs. Willa A. Leonard, who, at the age of 71, has just resigned the post of chief of counterfeit detectors in the treasury department.

During her remarkable term of service Mrs. Leonard was required every day to pass upon the genuineness of hundreds of currency notes of various denominations. The notes passed first through the hands of subordinate examiners and came to Mrs. Leonard for final judgment, she being a sort of supreme court whose opinion was the last word. She never made an error as to the character of a note, though she had handled millions and millions of dollars. Here is an unparalleled record of efficiency, little short of genius.

Surely Qualified.

Manager—Do you think she is really capable of creating a part?

Friend—Sure! I've seen her create a scene many a time. I used to be her husband.—Puck.

The Neighbor.

"Early to bed and early to rise," makes many a man a nuisance with the grass cutter.

MINNESOTA HISTORICAL SOCIETY.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL CO UNTY, MINNESOTA, FRIDAY, OCTOBER 6, 1911 NO. 10.

300 DEAD IN PENNSYLVANIA FLOODS

Breaking of Huge Paper Mill Dam Sends Torrent of Water Down the Valley

COSTELL AND AUSTIN DESTROYED

Flames, Caused by Bursting Gas Mains, Break Out In Wreckage of Ruined Villages, Adding to Horror of the Catastrophe, as Soon as the Floods Had Subsided.

Austin, Pa., Oct. 2. — While men were at their work, women busy in their homes or shopping, and children at play in their yards or in the streets, without the least warning the great dam of the Bayless Pulp and Paper Company, located a mile and a half above here, swept down the valley of Freeman, and before the inhabitants had time to realize what had happened, between 250 and 350 lives had been snuffed out.

Nearly half a billion gallons of water, freed from the reservoir formed by the recently built dam, rushed with great velocity down the narrow valley and crushed frame, brick and concrete structures alike into nothingness, and with them were whirled to death those persons who were unfortunate enough to be caught in the rush of water.

The wall of water in a few minutes had swept through the town of Austin, leaving devastation and death in its wake, and struck Costello, a few miles below here, where practically every building in that town was destroyed. Only three or four perished, as news of the breaking of the dam reached Costello in time to allow most of the residents to escape to higher ground.

Survivors in a Frenzy.

Hundreds of men, women and children [illegible] frenzy. The only light was the glare of hundreds of houses which caught on fire from broken gas pipes almost before the flood had passed. Chaos reigned from the moment the mighty wall of water tore through the town.

The Bayless Pulp and Paper Company's dam, which was 530 feet long and 49 feet high, was 32 feet thick at the base and held back 400,500,000 gallons of water. For the first time since its construction two years ago the water ran over the top, and many people from Austin and the surrounding country had gone out to the dam to see the unusual sight, and it was while they were watching the overflowing water that the first break in the dam occurred.

There was nothing to indicate that the dam was about to give way, when, with a sharp report, a hole appeared in the west end. In a moment water poured through, and it was immediately seen that the hole was getting larger. In a minute it was 20 feet wide and extended almost the entire height of the dam. Then there was another report, and it seemed as if the whole structure was giving way.

Flee to High Ground.

With a cry to alarm, the people fled to the nearest high ground, and persons scattered in every direction. It was apparent that all the great body of water behind the dam was going out. Some were caught, and before it was hardly realized the water was tearing down Freeman Run, a wall 50 feet high and sweeping everything before it.

The sound was deafening. Harry Davis, a locomotive engineer, reached a telephone and notified the operator at the exchange. She called as many persons as possible, but the time was short. The raging flood tore down the little valley carrying death on its debris-covered crest. Hundreds of women and children were caught in their homes and drowned or were crushed before they knew what had happened. Houses went down before the mighty onrush of water and gas pipes, bent and broken, released their dangerous fluid.

Before the water had passed on its terrible course through the town a dozen fires were burning in as many places and the cries of injured and imprisoned persons joined in the terrifice thunder of the flood.

Much of the debris lodged against the shops of the Buffalo and Susquehanna railroad and there the fire raged fiercest. Many men were caught here, and few, if any, escaped with their lives.

The course of the flood was through the business center of the little village. A majority of the buildings were of wood and those which were not immediately wrecked by the torrent were soon in flames.

So sudden was the onslaught of water that many persons had no time to flee to the hills, but others received the warning and, believing it was fire, hastened to the center of the town, only to be caught in the flood and swept away.

The flood passed quickly, leaving desolation in its wake. Houses had been crushed and tossed about like toys, while hundreds of bodies had been carried down on the crest of the surging torrent.

With the passing of the water, those who had fled to the hills hastened to return to their ruined homes in search of relatives and friends. Here and there bodies had been cast up along the path of the torrent and 130 bodies were recovered in a short time. Some of them had been so badly battered by the tossing debris that they were beyond recognition, while others had been carried along with no apparent injury.

Many were caught in burning buildings, and it will be days before the real extent of the calamity will be known. It is believed that no less than 850 persons perished and some estimates are higher.

Fire Adds to Horror.

A dangerous situation developed immediately after the water had passed. Austin is piped for natural gas, and the great force of the flood tore the mains from the streets, and the largest [illegible] section. The gas rushed out and in a twinkling had taken fire.

The flames leaped to a height of twenty feet, and, blown by a strong wind, were communicated to the nearest house. In ten minutes a dozen other pipes had burst and were pouring their inflammable fluid into the air. Men who had rushed forward in the hope of doing some good were overcome and fell, while others were caught in the flames and incinerated. The street became a glowing hell, and there was no salvation for those who chanced to be near. How many perished there is not known, but one estimate places it at a score.

Austin had little fire protection at best, and with no one left to man the little apparatus the town possessed, the progress of the flames was uninterrupted. Rapidly they swept along, always fed by the continual supply of gas from bursting mains, there was no staying their progress. They licked up what the water had left.

Down at the shops of the Buffalo and Susquehanna railroad, history was in the making. The buildings were located below the business section on the banks of Freeman Run, and were more substantial than most of the houses which had been swept away by the flood. When the great mass of crushed and broken timbers, representing houses but a few minutes before, came crashing down they lodged against the shops. The impact was so great that the walls were crushed in, but the framework stood and formed a barrier against which flotsam and jetsam of the flood found lodgement.

Men Caught at Machines.

Here also the gas pipes burst, and as the shops were in operation, fire quickly was communicated to the heterogeneous mass. Men were caught before they could leave their machines. Some of them were crushed to death without a warning, but others less favored of fortune were pinned down and met most horrible deaths in the flames.

Nearby was the plant of the Standard Lumber Company, which had on hand a large stock of stove wood. It was the fuel the flames most desired, and when the pipes burst there and the burning gas broke through the building it was soon destroyed. Here, too, debris had piled high, and here luckless ones who had been swept down stream met death.

For hours the machine shops and the lumber plant burned, and the odor of burning flesh was so strong as to drive many persons from the scene. How many died here never will be known, but, counting the employes of the plants and the persons in the flood, it will not fall short of 200.

But worst of all were the cries of the women and children. Most all the men were at work and they were at home alone. They had heard the warning sent out by the telephone girl, at least some of the people say the fire bell rang and thought it was a fire. Some of them rushed to the business section, and were caught in the water, for the flood traveled like a race horse. Those not drowned were crushed by the crumbling buildings, and others were caught in the flames.

Little children playing in the yards at home were caught up by the water and tossed about on the flood like playthings. Cattle and horses were swept off, and even the sidewalks were torn up. And over and above it all were the shrieks of the hundreds of poor people who could not escape.

Only Four Buildings Left.

One thousand buildings were torn from their foundations and crushed by the flood or destroyed by fire. The water made its way through the business section of the town, and left only four buildings standing.

Food Supply Soon Exhausted.

Until help comes from the outside little can be done to ascertain the loss or succor the injured. Those so fortunate as to live above the line of the flood were called to help the sufferers from the valley and the food supply was soon exhausted, as every grocery store with the exception of one small establishment, was swept away. Many went without their evening meal, and unless help comes they will have no breakfast today.

Among the principal places destroyed was the plant of the Emporium Lumber Company, not a vestige of it being left. A part of the plant of the Bayless Pulp and Paper Company, whose dam gave way, also disappeared under the raging waters, and the Commercial hotel and Davis [illegible] went down before the rush. The White house, another hotel, was wrecked, and it is believed that a number of persons perished with the building.

One of the spots where the force of the flood was felt most severely was at the junction of Freeman Run with another small stream in the middle of the business section. The primary election was in progress in the building not far away and many men were in the vicinity. They did not heed the warning shout and [illegible] ing in which the election was being held could be seen.

Man in Auto Gives Warning.

At Costello, which was practically destroyed by the raging water, the people were warned by a young man who sped through the valley in an automobile shouting to the people to take to the hills. His course was over a rock road through the narrow valley, but he maintained a lead over the rushing water and arrived at the little hamlet in time to spread the news before the flood arrived.

The first alarm of the dam breaking was given by a Bell telephone lineman, who saw the advance of the water from the top of a pole. He tore open a long distance wire and notified Galeton with his test set and then fled to the hills, barely escaping with his life.

The dam that broke was about half a mile above the town. It was 600 feet long and 50 feet high. It backed the water for more than a mile. The dam was constructed of concrete masonry. Only a year ago it threatened to give way, but the damage was repaired in time to prevent a catastrophe.

Heavy Rains Swell Stream.

Heavy rains in the hills that surrounded the town, had been falling for the 24 hours. Violent freshets in small brooks that feed the Sinnamahoning caused a sudden, swift rise of that stream. The new masonry gave way with a terrible roar as a great volume of water rushed into the main stream from its little tributaries. The thunder of the crash came so swiftly that the people in the peaceful village below, walled in by high hills, had no warning of their impending doom. The deluge hit with full force every building immediately in its track and either carried them down or wrecked them before their occupants were aware of what had happened. In scores of instances people were drowned in their homes without knowing what had caused the flood.

A sudden stop has been put to all traffic within a wide area of the stricken section. Railroads have discontinued their trains and help is being rushed over water swollen roads in automobiles, wagons and other hurriedly contrived conveniences. Coudersport, the nearest town of any size, has started every able-bodied man to the assistance of the village. Scores of bodies have been rescued and are now being hurried to Coudersport.

The dam was completed in November, 1909, by the paper company at a cost of $100,000. The company's plant, of which the dam was part is estimated to be worth $1,000,000.

The Johnstown flood, which is recalled by the Austin, Pa., disaster, occurred on the afternoon of May 31, 1889, and 2,142 lives were lost and property was damaged to the extent of more than $9,500,000.

CANADIAN WHEAT COMING

IN SPITE OF DEFEAT OF RECIPROCITY.

Traffic Association Starts Campaign for Lower rates to Northwest Fields.

Minneapolis. — The Minneapolis Traffic Association has started a campaign for lower rail rates from the western Canadian wheat fields to Minneapolis so that Minneapolis mills may be able to grind Canadian wheat under the United States "drawback" provision. The Canadian wheat would be ground exclusively for export and would in some measure make up for the defeat of the reciprocity pact with Canada.

Flour Rate Fight Renewed.

Advices have been received by officials of the Washburn-Crosby company to the effect that the Eastern trunk lines are planning to refuse concurrence next year in the 21½-cent lake and rail rate on flour from Minneapolis to the Atlantic seaboard, and that in order to win the Great Northern, Northern Pacific and Soo lines over they are planning to refuse concurrence in tariffs on other classes and commodities that have been in existence a long period.

This, it is said, will tend to make the three Minneapolis lines consider before they establish the lowered flour tariff next year. Members of the traffic managers' staffs of the Great Northern road said that this problem must be settled by a conference of traffic men of the three roads and that nothing definite regarding the matter could be announced at this time.

The grain and milling committee of the Minneapolis Traffic association is perfecting an arrangement with Western railroads looking to proportional grain rates from territory west of Minneapolis to Chicago. The plan is being worked out to protect the Minneapolis mills against Chicago and Milwaukee.

The present system provides for a 7½-cent rate on wheat from Minneapolis to Chicago and Milwaukee from all Western producing point. The [illegible] Minneapolis is greater than the sum of both locals to Minneapolis and to Chicago, and the adjustment to be effected will be an equalizing of the through and local rates, so that Chicago cannot draw upon Minneapolis territory to the detriment of the mills here.

AGED MEN ATTEND FAIR

Rice County Show Attracts Hundred-Year-Old Spectator.

Northfield—Officials of the Rice county fair, believe that one attendance record for the whole state was broken when Joseph Stowe, who lives on a farm near Dundas, came in to see the exhibits. Mr. Stowe was born on April 14, 1811, and is more than 100 years old. Another man 91 years' old, another 90, five men more than 81 yers old and one woman whose age is 85 attended the fair.

This information was obtained by a firm of furniture dealers, who offered a cane as a prize to the oldest person attending the fair.

The following is a list of the names entered: William Jackson, 91 years old, born September 28, 1820; Lamber Watt, 90 years old, born December 2, 1820; Lot Huestis, 82 years old, born August 3, 1829; J. C. Cooper, 81 years old, born January 24, 1830; Henry Potter, 84 years old born Mar. 8, 1827; E. T. Archibald, 84 years old, born June 14, 1827; A. D. Holt, 83 years old, born August 23, 1828; Martha Wheaton, 85 years old, born August 19, 1826.

Mr. Stowe, the winner, was born in Halifax, Vt. He has lived in Minnesota more than half of his life. He is now living with a son, John Stowe on a farm near Dundas.

ROYALTON BANKERS PLEAD.

Cashier and President of Institution Answer to Indictments.

Little Falls—H. J. Schwartz and Henry A. Schwartz, pleaded not guilty to indictments returned by the grand jury here and were released on $2,000 bail. The former is cashier and the latter president of the State bank of Royalton, which recently was declared to be insolvent.

H. J. Schwart was arraigned on four counts, two charging him with accepting deposits after the bank was insolvent, and two accusing him of larceny in the first degree. He is charged with embezzling funds belonging to E. E. Crome while acting as his agent, and with the larceny of $12,000 from Joseph Woltman also while acting as agent.

Henry A. Schwartz was indicted on two counts charging him with accepting money when the bank was insolvent. The cases have not been set but probably will not come up until next January owing to other business of the court.

NORTHFOSS WILL APPEAL.

Constitutionality of Criminal Insane Act to Be Put Up to Supreme Court.

Fergus Falls.—The attorneys for William L. Northfoss, who is admittedly sane, but who is confined to the insane hospital here because the superintendent does not feel justified in signing a certificate to the effect that he will never prove dangerous again, are preparing to take an appeal to the supreme court. In habeas corpus matters of this kind, an immediate appeal can be taken, and a hearing will probably be held next week. If the supreme court sustains the district court and refuses to declare the law unconstitutional, all those who plead insanity to escape imprisonment for crime will remain in the hospital for life unless the law is repealed.

MAYOR JONES IS MODERATOR.

Congregational Association of Minnesota Ends Convention.

Alexandria.—The annual meeting of the general Congregational association of Minnesota closed with a session given largely to the men and religion movement at which addresses were made by Prof. Fred B. Hill, of Carleton college and L. J. Hunt, St. Paul, president and vice president, respectively, of the state brotherhood.

Former Mayor D. P. Jones, of Minneapolis, was elected moderator for the ensuing year winning over A. M. Miller of Crookston by one vote. The assistant moderator elected is Rev. W. C. A. Waller of Lake City; secretary, Rev. M. B. Morris of St. Paul; and scribe Rev. W. N. Payne of Wayzata.

Northfield, Minn., was selected as convention city for 1912.

HUNTER KILLS FARMER

Newry, Minn., Man Shot by Neighbor Accidently When They Meet.

Austin.—Frank Greagan, a farmer living at Newry, west of here was instantly killed by the accidental discharge of both barrels of a shotgun belonging to a hunter who happened, to run upon Greagan and a neighbor, who with their children, were picking walnuts. The hunting party [illegible]

NEW MINING COMPANY.

Iron Valley Co., at Brainerd, Capitalized at $100,000.

Brainerd.—The Iron Valley Mining company incorporated by Attorney W. W. Barron, Surveyor L. Knudsen and Dr. R. A. Beise, all of Brainerd, has been capitalized at $100.000. The company has an option on the northeast quarter of section 10, town 43, range 32, about one mile southwest of Lenox near the Northern Pacific tracks.

Blue Earth Bank Statements.

Mankato.—Total deposits in the banks of Blue Earth county are $6,159,898, and the total loans are $5,047,602. This is a decrease in the deposits in the last six months of $585,958, and an increase in loans of $173,641. The total deposits in the city of Mankato are $4,603,243, a decrease in the last six months of $565,344, and an increase over July 1910, of $166,474. The total loans by the Mankato banks are $3,675,255, an increase in the last six months of $52,080. The total deposits in the banks of the county outside of Mankato are $1,556,654, a decrease in six months of $20,614, and the total loans in the banks of the county outside of Mankato are $1,372,346.

Boys Admits Forging Checks.

Canby.—Folly Karp is accused of having passed bogus checks. It is said he passed one on the First National bank of Canby for $10 and went to Marshall to attend a circus. The check purporting to be signed by Chris Rock, the boy's stepfather, was pronounced a forgery. The boy is said to have passed similar checks at Marshall and Springfield. He was caught at Gary, S. D., where he cashed a check. The boy admitted forging Mr. Rock's name to four checks and had several made out. He will be placed in a reform school.

May Use Oil For Power.

Thief River Falls.—This city recently voted $40,000 bonds for an auxiliary steam plant to aid the city electric plant. Committees sent to investigate steam and oil plants reported in favor of steam. It is felt that possibly oil will give satisfactory results so all bids for erection of the plant have been laid aside.

Low water in Red Lake river causes erection of an auxiliary plant. Many believe the great drainage ditches are drying the north country. Water is becoming scarce in parts of Northern Minnesota.

State to Sell Much Timber.

St. Paul.—Thirty-five million feet of timber in northern Minnesota will be opened for auction sale Oct. 31 by the Minnesota State Timber Board. The timber is valued at nearly $2,000,000. The timber is in Lake, St. Louis, Itasca, Koochiching and Beltrami counties.

KILLS WIFE NO. 2

CHICAGO INTERNE SAYS WOMAN FOUND SLAIN NEAR DIXON WAS HIS VICTIM.

MYSTERY QUICKLY CLEURS

Committed Crime to Hide Marital Duplicity From First Mate—Makes a Full Confession.

Chicago, Illinois. — Dr. Harry Elgin Webster, a Rush Medical college graduate student and interne at the Polychnic hospital, in a remarkable confession to the police, admitted that he murdered one of his two young wives, Bessie Kent Webster of Chicago, in the woods of Ogle county, ten miles from Dixon, Il., Sept. 16. The authorities declare that the motive for the crime was Webster's desire to hide from his first wife, Zoe Varney Webster, of Cedar Rapids, Ia., the fact that he was a bigamist. He had married the two women within one week last January.

The accidental discovery of Bessie Kent's body, almost two weeks after she had been killed, was followed by identification and the arrest of Webster.

The young medical student was arrested at the hospital shortly after he had left Zoe Varney Webster, wife number one, at a down town hotel, where he had attempted to explain his marital duplicity to his first wife. She had been greatly shocked by her husband's revelations, but he had convinced her that he knew nothing of the murder near Dixon.

Rarely has a complex police case, with so many complications, unfolded with more rapidity. Mrs. Webster number one was waiting at the Chicago & Northwestern railroad station for a train to Dixon when the police found her.

One of the peculiar features of the case was the manner in which the Chicago police work [illegible] with that of the county officials who came to Chicago to arrest the murderer. The credit for solving the murder mystery belongs to W. P. Delany, sheriff of Ogle county, and W. P. Emerson, assistant state's attorney in the same county.

Webster, still mopping his eyes with his handkerchief and the back of his hand, began the story of his life from birth. He said that he was born in Freeport, Ill., in 1882. He led up to his education in Rush Medical college and, finally, to his meeting and infatuation with Bessie Kent. But, he continued, he had not thought of marrying her. Miss Kent, he said, was to be a "chum" and not a wife.

"I really was in love with Zoe Varney, whom I married Jan. 4 in Cedar Rapids," he said.

"Still Bessie followed me. She was so insistent that I agreed to marry her and the ceremony was performed in a justice's office in the county building just a week after my marriage to Zoe."

Bessie was to get a divorce, but failed to do so, and an application made by the doctor failed. He attempted to leave her, but she followed him to Dixon and demanded to see his parents. He took her for a drive into their country to gain time, their quarrel increased and he finally killed her.

DAILY MARKET REPORT.

Twin City Markets.

Minneapolis, Oct. 2. — Wheat, December, $1.08⅜; May, $1.12⅝; No. 1 northern, $1.08⅜; No. 2 northern, $1.06⅜; No. 1 durum, 98c; No. 3 corn, 66c; No. 3 white oats, 46c; barley, malting, $1.18; No. 2 rye, 91½c; No. 1 flax, old, $2.26.

Duluth, Oct. 2.—Wheat, December, $1.08¼; May, $1.12¼; No. 1 northern, $1.08¼; No. 1 durum, 97½c.

South St. Paul, Oct. 2. — Cattle—Steers, $5.25@5.85; cows, $3.25@5.00; calves, $3.00@7.75; hogs, $6.10@6.75; sheep, spring lambs, $2.50@5.00.

Chicago Live Stock.

Chicago, Oct. 2.—Cattle receipts estimated at 800; market weak; beeves, $4.75@8.15; Texas steers, $4.30@6; western steers, $4.25@7; stockers and feeders, $3.25@5.65; cows and heifers, $2@6.20; calves, $6@9.50.

Hogs—Receipts estimated at 8,000; market slow, generally steady; light, $6.10@6.75; mixed, $6.05@6.80; heavy, $5.80@6.70; rough, $5.80@6.05; good to choice heavy, $6.05@6.70; pigs, $4@6.25; bulk of sale, $6.10@6.60. Sheep receipts estimated at 3,000; market weak, native, $2.25@4; western, $2.75@4.10; yearlings, $3.85@4.50; lambs, native, $4@6; western, $4.50@6.

Chicago Grain Market.

Chicago, Oct. 2.—In the absence of any development indicating that the war would involve other powers besides Italy and Turkey, the wheat market here showed a tendency today to decline. Foreign exchange did not give evidence of so much excitement as had been looked for, and the fact received attention that neither of the belligerent countries would be likely to import wheat, Italy in particular having produced this year a record-breaking crop. Another circumstance favoring the bears was improved weather in Canada. Big receipts northwest acted as an influence, too, against the bulls. The opening was ⅛c lower to ⅛c up. December started at 98⅜c to 98¾c, the same change from last night as the market taken altogether. A fall to 98¼c followed.

Subsequent rumors of fighting between Greek and Turkish forces led to an upturn but the effect did not last. The close was weak with December ⅝@¼c net lower at 98⅛@98¼c.

A LANDSLIDE AGAINST RECIPROCITY

CONSERVATIVES THROUGHOUT THE DOMINION SWEEP ALL BEFORE THEM.

MAJORITY WILL REACH 50

Agricultural Vote Almost Solidly Against Reciprocity.—Seven Ministers in Sir Wilfrid's Cabinet Lose Out.

Montreal, Ontario. — The Laurier government and reciprocity suffered an overwhelming defeat in the Canadian elections. By a veritable landslide the Liberal majority of 43 was swept away, and the Conservative party secured one of the heaviest majorities, upwards of fifty, that any Canadian party ever has had. Seven cabinet ministers who had served with Premier Laurier were among the defeated candidates.

The results with a few of the distant constituencies estimated, were:

Province.	Liberals.	Conservatives.
Ontario	13	70
Quebec	36	27
Nova Scotia	9	9
New Brunswick	8	5
Prince Edward Island	2	2
Manitoba	1	9
Saskatchewan	7	3
Alberta	6	1
British Columbia	0	6
Total	82	132

Opposition majority, 50.

The Liberals lost ground practically in every province of the Dominion. Where they won, their majorities were small. Where the Conservatives won, their majorities were tremendous. Ontario, the leading province of Canada, declared almost unanimously against the administration and reciprocity.

Robert L. Borden, leader of the Conservative party, shortly will become the prime minister of Canada. He will be supported in parliament by a working majority of members far more than ample for his purposes.

Past Not to Be Introduced.

The government defeat means that the Fielding-Knox reciprocity agreement, ratified by the American congress in extra session, will not be introduced when the twelfth parliament assembles next month, and that a revised basis of trade with the United States, looking to closer commercial relations, will not be possible in the immediate future. The Conservatives are committed to a policy of trade expansion within the empire and a closed door against the United States.

Although re-elected in two constituencies in Quebec, the defeat of the Liberal party also means the retirement from public life of Sir Wilfrid Laurier, who for nearly two decades has directed the destinies of the Dominion. Several times during the bitter campaign the venerable premier said that defeat of his party at the polls meant the end of his career; that he never would consent to lead a minority in opposition to a Conservative government.

A Liberal membership of 53 from Quebec was cut down to 36, which, taken alone, seriously threatened the supremacy of the party. But it was in Ontario that the Conservatives won their greatest victories.

Opposition Sweeps All Before.

Spurred on by appeals to patriotism and the cry that reciprocity was the entering wedge for annexation, the Conservatives swept nearly everything before them. Ontario, which in the last parliament was represented by 35 Liberals and 51 Conservatives, will send a delegation to the next composed of 13 Liberals and 75 Conservatives. A notable feature of the defeat was the opposition's capture of two hitherto Liberal seats in Saskatchewan.

Landslide Is Unexpected.

The landslide was not expected by either side. The Liberals were confident that they would be returned by the people with an increased majority, for they believed that reciprocity would be most acceptable to the Canadian electors. While the Conservatives claimed that they would have a majority, they did not expect that it would be so large or that the general verdict of the country would be given so decisively against the government.

They feared that reciprocity would prove popular with the farmers of Ontario and the farmers and fishermen of the maritime provinces, and, while confident that they would win the cities, they were dubious as to the result in rural constituencies. However, in Ontario especially, the agricultural vote went almost solidly against reciprocity, and in the maritime provinces it did not prove to be the popular issue expected.

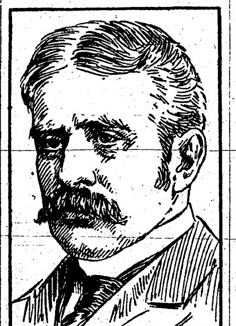
The farmers and fishermen of the East do not appear to have placed the high value upon the American market which was anticipated. While Sir Wilfrid Laurier, the prime minister, was safe in two counties, the Conservatives made a great harvest of ministerial heads; thirteen members of the Laurier cabinet sought reelection and seven of them were defeated.

Makers of Pact Defeated.

Minister of Finance Fielding and Minister of Customs Patterson, who made the reciprocity bargain with the United States, failed to win their elections. Sir Frederick Borden, minister of militia; Mac Kenzie King, minister of labor; Sidney Fisher, minister of agriculture; George P. Graham, minister of railways, and William Templeman, minister of inland revenue, also went down to defeat.

The ministers who survive the landslide are William Pugsley, of New Brunswick, minister of public works; Charles Murphy of Ontario, secretary of state; Frank Oliver of Alberta, minister of the interior; Premier Laurier; Rudolphe Lemieux, minister of marine and fisheries, and Dr. H. S. Beland, postmaster general in the province of Quebec.

The splendid majority of followers obtained by R. L. Borden in the English provinces will make him practically independent of the French nationalist group, for he has a working majority without them. The effect of this will be to minimize greatly the Nationalist party which Henri Bourasa has been creating for eight years past.



Robert Laird Borden.

The result of the election works a complete a disorganization of the Liberals that the Conservatives probably will remain in office for many years before their authority can be seriously challenged. The former Conservative government held office for 18 years and the Laurier government, which has just been turned out, followed with 15 years of power.

The verdict is looked upon as a triumph for the cause of protection and a victory for the manufacturers of Canada, who openly and avowedly were opposing the government because they feared the removal of duties upon natural products would be followed by an attack upon the protection which Canadian manufacturers have enjoyed for many years.

Laurier Expected to Resign.

Ottawa.—The result was a complete surprise to both parties in Canada's capital. The Liberals expected a victory, the Conservatives did not hope for the landslide which occurred in their favor.

It is expected that Sir Wilfrid Laurier, the premier, will tender to Governor General Earl Grey his resignation within the next two weeks, although not required to do so until defeated by an adverse vote in the house.

Cavalier Expected to Yield.

Poughskeepsie, N. Y. — Confirmation is given by local attorneys to the story of Sidney Harris' trip to Paris to settle the Cavalieri-Chanler affair. Chanler's attorneys are firmly of the belief that when Harris returns he will have Cavalieri's signature to a settlement for $70,000 and an abrogation of the marriage contract. The statement that $70,000 would be the price is said to be absolutely true, though as a bonus for a quick waiver $10,000 more may be given.

American Buys Castle.

London, Eng. — It was announced that Tattershall castle, in Lincolnshire, a medieval structure dating from the fifteenth century, has been purchased by an American millionaire. The old castle will be pulled down and re-erected on Long Island.

Waterloo, Iowa, Sept. The Upper Iowa Methodist conference took occasion to denounce Secretary Wilson for accepting the honorary chairmanship of the National Brewers' association.

Suicide May Be Missing "Jim."

Brainerd. — The police at Brainerd believe that "Billy Smith," who ended his life in the city jail there, was the missing "Jim," sought to explain the murders of Mrs. Amelia Bolton and Frank Edward Rhodes, on the Bolton farm, near Wyoming, last week.

Canada's Census Under 8,000,000.

Ottawa, Ont. — The completion of Canada's fifth census, begun in June, wil show a total poulation much under 8,000,000 according to unofficial calculations.

Conners Quits Committee.

Albany, N. Y. — William J. Conners of Buffalo, former chirman of the democratic state committee, has resigned his membership on the committee to take effect immediately.

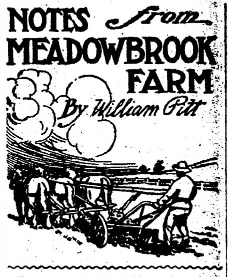
Father Sherman Insane.

San Jose, California. — Rev. Father Thomas E. Sherman, son of General William Tecumseh Sherman, is an inmate of the state hospital for the insane at Agnew following an attempt at suicide at the Jesuit novitiate at Los Gatos.

Intentional Duplicate Exposure

NOTES from MEADOWBROOK FARM

By William Pitt



Try a patch of alfalfa.

Gentleness pays best with the colt or horse.

There is a great deal of humanity in axle grease.

The pigs and light porkers should go to market early.

The boar should be well fed but not allowed to get too fat.

A draft horse should have a large chest and square shoulders.

Soils destitute of humus and nitrogen are impotent to produce clover.

Hogs should have clean pastures, beds and water, and a variety of food.

Old ewes and poor breeders should be fattened now, and sent to the butcher.

Always and with any variety of hens variety in feed brings the best egg results.

Pork production appeals strongly to a man of limited means who desires quick returns.

The busy bacteria gets busy in the milk almost at the moment it is drawn from the cow.

If too many rich table scraps are fed to the hens in confinement look out for soft-shelled eggs.

Sell to private customers and deliver on a certain day. Never fail to be there at the appointed time.

Many a bunch of promising feeders go to the country and return with indications of being half starved.

The fairs give a good opportunity to compare breeds, and farmers should use this opportunity intelligently.

The point of keeping the cows clean has been proven to be a saving in feed as well as an increase in milk.

It requires two-thirds of a full ration to keep a cow in fair condition before there is any milk production.

On every farm, where soil and climatic conditions are favorable, corn should be grown for fodder purposes.

Locate vines of bitter-sweet and fruiting grapes, that you wish to move from the woods to that porch or arbor next spring.

Work horses should be allowed to run out in the pastures at nights in all weather except during very severe cold and storms.

The man who feels that he is bigger than his job is generally mistaken. If he was he would quickly get a job that would fit him.

Homogenized milk is milk treated in such manner as to disrupt the fat globules so that they will not rise in the form of cream.

The vigorous hen and her rooster will start off a chick that will stand much more wear and tear than immature or weakly parents.

Alfalfa is a lime plant, and a dressing of 60 bushels of slacked oyster shells or 50 bushels of slacked stone lime to the acre should be given.

A simple way of finding out the value of each cow is by keeping a daily record of the quality of milk given by each, and testing it at intervals.

Humus was intended by nature to create and conserve the fertility of the soil for the production of the necessities to conserve the human race.

In feeding value silage compares favorably with other crops, although this will vary with the kind of stock and the grain rations with which it is used.

If the swine are in the fattening stage they should have all they will eat up clean, but growing animals should have just enough to keep them in a thrifty growing condition.

If your cow has obstructed teats, be very cautious about inserting tubes, probes, or quills. Nothing of the kind should be inserted in a cow's teat, excepting as a last resort; and then only with the most extreme care and cleanliness.

Soils that are heavily manured for cabbage, lettuce, celery and other crops will not need very much manure the following year, when planted with tomatoes, peppers and root crops, especially if a fair amount of commercial fertilizer is used.

Teach the colt to draw loads by degrees.

About ten weeks after shearing dip the lambs.

A horse suffering from colic should be kept quiet.

Keep sows over that have proved to be good breeders.

Keep the ewes in the stable on dry feed for a day or two.

The boar should be of good type and character and of pure blood.

To maintain normal soil fertility the supply of humus must be conserved.

Blood-meal is better for ducks than meat scraps, and it works into a mash fine.

Persistency in milk flow is one of the qualities which makes a profitable dairy cow.

The country fairs are announced. Be sure not miss them, especially the home one.

Poultry cannot be successfully raised without the application of brain and muscles.

Be careful about feeding horses inclined to heaves, too much hay, or hay that is dusty.

A fowl that will not fatten when heavily fed on corn is not in good physical condition.

Extra feed increases the growth of a proper kind and makes larger animals at maturity.

If when the hogs are growing fast their hind legs become weak, feed a little bone meal daily.

Stop the churn as soon as the butter granulates if you want to work out all the butter milk.

What has become of the old-fashioned farmer who used to keep a savage dog to catch his hogs?

Culling the pullets may seem a small matter to many, but it adds dollars to the year's profits.

A bull tied in the stall will get lazy and useless, besides making extra work in his care and feed.

Use your skim milk. Five pounds of skim milk have been found equal to one pound of grain for pigs.

A drove of hogs of all colors and sizes brings as much money as a drove of the same breed, color and size.

To obtain a maximum supply of milk, small pastures, allowing frequent changes of feed, should be provided.

If a small hatching house is once used, no poultry keeper ever likes to do without its convenience afterward.

As a rule, a large flow of milk is associated with a low per cent. of fat, while a small flow shows a higher test.

Sheep are comfort lovers and the man who neglects to provide them with good, dry shelter makes a costly error.

Grinding the grain makes it more digestible, and the more digestible the feed the more milk from a given amount.

It is not a common sight at any of the stock yards to see a large drove of hogs from one farm all showing the same breed.

Oats, wheat bran, and a little corn or linseed-meal is a grain ration that will keep the lambs growing and in good flesh by winter.

There should be no hidden, inaccessible places in milk vessels. The seams should be soldered over smoothly inside and out.

The egg-producing qualities of the hen, like the butter-making qualities of the cow, will determine the hen's value at the end of the year.

Veal calves in hot weather will grow better if kept during the day in a dark, cool stable, but the stable must be cleaned out and well ventilated.

Except in unusual cases of rush work, the teams should cease work in time to cool off before the dampness and falling temperature of evening.

A mixture of barley, corn-meal, wheat bran and roots will put flesh on horses fast. With this, of course, a small quantity of hay should be given.

If care is taken to keep the surface of the silage level, two and one-half inches removed daily will be sufficient to keep the silage from decaying.

In filling the silo, extra tramping should be done around the edges, and when the silage is settling, it is well for some one to go into the silo every few days and tramp the silage near the edges of the silo.

Prof. James E. Rice, in his Cornell reading course for farmers, says: "Corn is an excellent grain. It is, perhaps, the grain most relished by fowls. Therein lies the danger. Fowls eat it so greedily that, it being a fattening food, they are likely to become overfat, if it is fed too freely."

A CHANGE OF HEART

By ESTELLE TRACY

(Copyright, 1911, by Associated Literary Press.)

"You don't play the game fair, Catherine." Barry Churchill looked down with frowning impatience at the fair girl who sat idly tracing fantastic patterns in the white sand at her feet. She waited to give a final embellishment before raising dark eyes that held a look of quiet amusement in their depths.

"Oh, I don't know, Barry," she replied. "It really isn't my fault that you insist on repeating that tiresome question at regular intervals never more than six weeks apart, nor am I to blame that I can't give you the answer you desire me to give. So just where I break any of the rules of the 'game' as you choose to call this summer friendship of ours, I am at a loss to understand." With a light shrug of her shoulders, Catherine Hollister rose to her feet and opened the gay little parasol.

"Granting that," returned her companion quietly, "still you might at least give a reason for your continual refusals. Why won't you marry me, Catherine?" he insisted as he took the parasol from her hands.

The girl's face flushed deeply at his touch, but her voice was even as she replied. "I have given you my woman's reason before and to all intents and purposes it proved wholly inadequate, so why bother to repeat it? I might add, though, what I have refrained from saying heretofore out of a kind consideration for your feelings—"

"And that is?" the man inquired.

"That you aren't at all the sort of man I would care to marry," she continued.

The man gave a laugh that was intended to be careless but his face whitened at her words. "If your distaste is engendered by any one particular shortcoming that I might change," he began somewhat sarcastically.

"It isn't," the girl broke in abruptly. "You are you and I am I," she said, "and any attempt to weld two such natures into one harmonious whole would result in inevitable disaster, so why talk about it further?" And she dismissed the matter with a little impatient gesture of her hands that was meant to express finality.

Sat by Her Open Window.

Together they walked along the beach in silence, the man with grave face and set lips, the girl carelessly swinging along beside him. She had removed her wide-brimmed hat and the cool evening wind blew the soft hair around her face. The man felt a tightening sensation in his throat as he looked at her and every line and curve of face and figure was stamped indelibly on his remembrance.

With all her winsomeness there was yet an unapproachableness about Catherine Hollister that kept most men at a distance, and it was a hint of mockery that ever lurked in half-tantalizing eyes that had kept Barry Churchill from revealing the whole strength and tenderness of a passion that had touched the very depths of his self-contained nature. Like a wall his cold restraint and pride rose between himself and the girl until her very soul cried out against it.

That night she sat by her open window looking out over the storm-swept expanse of ocean that had been so placid a few hours before. Her eyes were wide and her heart was filled with a tumultuous pain that all her calm reasoning could not still.

"Why can't he be more warmly human?" she said fiercely to herself as she rose and began to take down heavy braids of gold that were coiled around her head.

"You're a perfect goose," she said to the girlish reflection in the glass. "To think of you, Catherine Hollister, accustomed all your spoiled life to a perfect excess of love and tenderness, dreaming of marrying Barry Churchill! Why, his proud indifference and self-centered affection would break your hungry little heart into a thousand fragments in less than a month and he would never dream that he had been the cause of it!" With a laugh that was half a sob she turned down the light and slipped downstairs to her sister's room.

Opening the door softly, she peeped in. "Hello Cathie," exclaimed her sister's husband. "Come in and join our happy circle."

"Can't," returned Catherine. "I thought Madge said you were going to be away tonight or I wouldn't have ventured down. I'm lonesome and want to borrow the baby if she isn't asleep."

"Not by a whole lot, she isn't," returned the fond parent as he turned to a silk-lined crib that held the jewel of the household.

"Here Dolly Dimple," he said as he lifted a crowing bundle of soft muslin and lace from its depths. "Go comfort the lonely heart of this spinster aunt of yours while I enjoy my book and pipe in peace for half an hour."

As he laid the baby in the girl's outstretched arms, he gave one of her long braids a gentle tweak. "Why don't you marry Barry and settle down to a happy home life of your own?" he asked, teasingly.

"Why should I, when I can borrow all its joys and save myself its sorrows?" she retorted laughingly.

As she stepped out into the hall, the entrance door was hurriedly opened and the tall, coated figure of Barry Churchill confronted her.

"Where's Jack, Mrs. Weston?" he began breathlessly, his eyes blinded for the moment by the bright light of the room.

"Oh, I beg your pardon," he exclaimed quickly, as he discovered the identity of the slender figure. "Madonna," he breathed, as he looked down at the lovely vision, and a warmth and tenderness such as Catherine had not dreamed his nature capable of came into his face.

When he spoke again, after a long, tense moment, his voice was quiet and unmoved as ever. "I want to see Jack a moment," he explained. "There's a vessel struck the cliffs and I think we can do the poor fellows some good."

With flushed cheeks and holding the baby more closely in her arms, Catherine led the way into the little sitting room. A few minutes later both men were hurrying down the beach toward the scene of the wreck while the two women, counting long weary hours, waited fearfully for their return.

Shortly after midnight heavy tramping on the stone walk caused both women to spring to their feet. As the door opened and Catherine recognized the figure being borne in she gave a low, heart-broken cry.

"Oh, Barry's all right, Cathie," Weston cried quickly. "He would go out one time more to try and save a fellow—did it, too, by Jove, and the breakers took most of the starch out of him."

"He'll be right when we get him warmed up and a little brandy down his throat," one of the fishermen said kindly, as he laid a fatherly hand on the girl's shoulder. Thus reassured, she crept back into the room, refusing all orders to go until she saw the light of consciousness slowly returning to Churchill's eyes. As he recognized the white figure at his side he reached out a comforting hand. With a glad cry the girl caught it to her lips, then fled from the room.

Bright and early the following morning Catherine slipped quietly downstairs and out upon the wide veranda overlooking the sea. Early as she was, Churchill was there before her. At her step he turned.

For a single moment the girl stood, deep-shadowed eyes gravely searching his face.

"Catherine," the man's voice held a question in it as eager eyes swept her lovely face.

The girl stepped to his side. "I wanted to tell you," she began bravely, "that I have changed my mind since yesterday—and if you think you care to ask me that question again—"

But for reasons that would be obvious to an understanding person, the stumbling sentence was never completed.

Shining Record.

To have performed the duties of a responsible position for 47 years without making a single mistake is an achievement which is probably unique in the annals of public service. Such is the enviable record of Mrs. Willa A. Leonard, who, at the age of 71, has just resigned the post of chief of counterfeit detectors in the treasury department.

During her remarkable term of service Mrs. Leonard was required every day to pass upon the genuineness of hundreds of currency notes of various denominations. The notes passed first through the hands of subordinate examiners and came to Mrs. Leonard for final judgment, she being a sort of supreme court whose opinion was the last word. She never made an error as to the character of a note, though she had handled millions and millions of dollars. Hers is an unparalleled record of efficiency, little short of genius.

Surely Qualified.

Manager—Do you think she is really capable of creating a part?

Friend—Sure! I've seen her create a scene many a time. I used to be her husband.—Puck.

The Neighbor.

"Early to bed and early to rise," makes many a man a nuisance with the grass cutter.

MINNESOTA HISTORICAL SOCIETY.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL CO UNTY, MINNESOTA, FRIDAY, OCTOBER 6, 1911 NO. 10.

300 DEAD IN PENNSYLVANIA FLOODS

Breaking of Huge Paper Mill Dam Sends Torrent of Water Down the Valley

COSTELL AND AUSTIN DESTROYED

Flames, Caused by Bursting Gas Mains, Break Out In Wreckage of Ruined Villages, Adding to Horror of the Catastrophe, as Soon as the Floods Had Subsided.

Austin, Pa., Oct. 2. — While men were at their work, women busy in their homes or shopping, and children at play in their yards or in the streets, without the least warning the great dam of the Bayless Pulp and Paper Company, located a mile and a half above here, swept down the valley of Freeman, and before the inhabitants had time to realize what had happened, between 250 and 350 lives had been snuffed out.

Nearly half a billion gallons of water, freed from the reservoir formed by the recently built dam, rushed with great velocity down the narrow valley and crushed frame, brick and concrete structures alike into nothingness, and with them were whirled to death those persons who were unfortunate enough to be caught in the rush of water.

The wall of water in a few minutes had swept through the town of Austin, leaving devastation and death in its wake, and struck Costello, a few miles below here, where practically every building in that town was destroyed. Only three or four perished, as news of the breaking of the dam reached Costello in time to allow most of the residents to escape to higher ground.

Survivors in a Frenzy.

Hundreds of men, women and children rushed through the ruins of the village for their families and friends. The only light was the glare of hundreds of houses which caught on fire from broken gas pipes almost before the flood had passed. Chaos reigned from the moment the mighty wall of water tore through the town.

The Bayless Pulp and Paper Company's dam, which was 530 feet long and 49 feet high, was 32 feet thick at the base and held back 400,500,000 gallons of water. For the first time since its construction two years ago the water ran over the top, and many people from Austin and the surrounding country had gone out to the dam to see the unusual sight, and it was while they were watching the overflowing water that the first break in the dam occurred.

There was nothing to indicate that the dam was about to give way, when, with a sharp report, a hole appeared in the west end. In a moment water poured through, and it was immediately seen that the hole was getting larger. In a minute it was 20 feet wide and extended almost the entire height of the dam. Then there was another report, and it seemed as if the whole structure was giving way.

Flee to High Ground.

With a cry to alarm, the people fled to the nearest high ground, and persons scattered in every direction. It was apparent that all the great body of water behind the dam was going out. Some were caught, and before it was hardly realized the water was tearing down Freeman Run, a wall 50 feet high and sweeping everything before it.

The sound was deafening. Harry Davis, a locomotive engineer, reached a telephone and notified the operator at the exchange. She called as many persons as possible, but the time was short. The raging flood tore down the little valley carrying death on its debris-covered crest. Hundreds of women and children were caught in their homes and drowned or were crushed before they knew what had happened. Houses went down before the mighty onrush of water and gas pipes, bent and broken, released their dangerous fluid.

Before the water had passed on its terrible course through the town a dozen fires were burning in as many places and the cries of injured and imprisoned persons joined in the terrifice thunder of the flood.

Much of the debris lodged against the shops of the Buffalo and Susquehanna railroad and there the fire raged fiercest. Many men were caught here, and few, if any, escaped with their lives.

The course of the flood was through the business center of the little village. A majority of the buildings were of wood and those which were not immediately wrecked by the torrent were soon in flames.

So sudden was the onslaught of water that many persons had no time to flee to the hills, but others received the warning and, believing it was fire, hastened to the center of the town, only to be caught in the flood and swept away.

The flood passed quickly, leaving desolation in its wake. Houses had been crushed and tossed about like toys, while hundreds of bodies had been carried down on the crest of the surging torrent.

With the passing of the water, those who had fled to the hills hastened to return to their ruined homes in search of relatives and friends. Here and there bodies had been cast up along the path of the torrent and 130 bodies were recovered in a short time. Some of them had been so badly battered by the tossing debris that they were beyond recognition, while others had been carried along with no apparent injury.

Many were caught in burning buildings, and it will be days before the real extent of the calamity will be known. It is believed that no less than 850 persons perished and some estimates are higher.

Fire Adds to Horror.

A dangerous situation developed immediately after the water had passed. Austin is piped for natural gas, and the great force of the flood tore the mains from the streets, and the largest pipe in town burst in the business section. The gas gushed out and in a twinkling had taken fire.

The flames leaped to a height of twenty feet, and, blown by a strong wind, were communicated to the nearest house. In ten minutes a dozen other pipes had burst and were pouring their inflammable fluid into the air. Men who had rushed forward in the hope of doing some good were overcome and fell, while others were caught in the flames and incinerated. The street became a glowing hell, and there was no salvation for those who chanced to be near. How many perished there is not known, but one estimate places it at a score.

Austin had little fire protection at best, and with no one left to man the little apparatus the town possessed, the progress of the flames was uninterrupted. Rapidly they swept along, always fed by the continual supply of gas from bursting mains, there was no staying their progress. They licked up what the water had left.

Down at the shops of the Buffalo and Susquehanna railroad, history was in the making. The buildings were located below the business section on the banks of Freeman Run, and were more substantial than most of the houses which had been swept away by the flood. When the great mass of crushed and broken timbers, representing houses but a few minutes before, came crashing down they lodged against the shops. The impact was so great that the walls were crushed in, but the framework stood and formed a barrier against which flotsam and jetsam of the flood found lodgement.

Men Caught at Machines.

Here also the gas pipes burst, and as the shops were in operation, fire quickly was communicated to the heterogeneous mass. Men were caught before they could leave their machines. Some of them were crushed to death without a warning, but others less favored of fortune were pinned down and met most horrible deaths in the flames.

Nearby was the plant of the Standard Lumber Company, which had on hand a large stock of stove wood. It was the fuel the flames most desired, and when the pipes burst there and the burning gas broke through the building it was soon destroyed. Here, too, debris had piled high, and here luckless ones who had been swept down stream met death.

For hours the machine shops and the lumber plant burned, and the odor of burning flesh was so strong as to drive many persons from the scene. How many died here never will be known, but, counting the employes of the plants and the persons in the flood, it will not fall short of 200.

But worst of all were the cries of the women and children. Most all the men were at work and they were at home alone. They had heard the warning sent out by the telephone girl, at least some of the people say the fire bell rang and thought it was a fire. Some of them rushed to the business section, and were caught in the water, for the flood traveled like a race horse. Those not drowned were crushed by the crumbling buildings, and others were caught in the flames.

Little children playing in the yards at home were caught up by the water and tossed about on the flood like playthings. Cattle and horses were swept off, and even the sidewalks were torn up. And over and above it all were the shrieks of the hundreds of poor people who could not escape.

Only Four Buildings Left.

One thousand buildings were torn from their foundations and crushed in the flood or destroyed by fire. The water made its way through the business section of the town, and left only four buildings standing.

Food Supply Soon Exhausted.

Until help comes from the outside, little can be done to ascertain the loss or succor the injured. Those so fortunate as to live above the line of the flood were called to help the survivors from the valley and the food supply was soon exhausted, as every grocery store with the exception of one small establishment, was swept away. Many went without their evening meal, and unless help comes they will have no breakfast today.

Among the principal places destroyed was the plant of the Emporium Lumber Company, not a vestige of it being left. A part of the plant of the Bayless Pulp and Paper Company, whose dam gave way, also disappeared under the raging waters, and the Commercial hotel and Davis house went down before the rush. The White house, another hotel, was burned, and it is believed that a number of persons perished with the building.

One of the spots where the force of the flood was felt most severely was at the junction of Freeman Run with another small stream in the middle of the business section. The primary election was in progress in a building not far away and many men were in the vicinity. They did not heed the warning shout and all of them are believed to have been carried away. Not a trace of the building in which the election was being held could be seen.

Man In Auto Gives Warning.

At Costello, which was practically destroyed by the raging water, the people were warned by a young man who sped through the valley in an automobile shouting to the people to take to the hills. His course was over a rock road through the narrow valley, but he maintained a lead over the rushing water and arrived at the little hamlet in time to spread the news before the flood arrived.

The first alarm of the dam breaking was given by a Bell telephone lineman, who saw the advance of the water from the top of a pole. He tore open a long distance wire and notified Galeton with his test set and then fled to the hills, barely escaping with his life.

The dam that broke was about half a mile above the town. It was 600 feet long and 50 feet high. It backed the water for more than a mile. The dam was constructed of concrete masonry. Only a year ago it threatened to give way, but the damage was repaired in time to prevent a catastrophe.

Heavy Rains Swell Stream.

Heavy rains in the hills that surrounded the town, had been falling for the 24 hours. Violent freshets in small brooks that feed the Sinnamahoning caused a sudden, swift rise of that stream. The new masonry gave way with a terrible roar as a great volume of water rushed into the main stream from its little tributaries. The thunder of the crash came so swiftly that the people in the peaceful village below, walled in by high hills, had no warning of their impending doom. The deluge hit with full force every building immediately in its track and either carried them down or wrecked them before their occupants were aware of what had happened. In scores of instances people were drowned in their homes without knowing what had caused the flood.

A sudden stop has been put to all traffic within a wide area of the stricken section. Railroads have discontinued their trains and help is being rushed over water swollen roads in automobiles, wagons and other hurriedly contrived conveniences. Coudersport, the nearest town of any size, has started every able-bodied man to the assistance of the village. Scores of bodies have been rescued and are now being hurried to Coudersport.

The dam was completed in November, 1909, by the paper company at a cost of $100,000. The company's plant, of which the dam was part is estimated to be worth $1,000,000.

The Johnstown flood, which is recalled by the Austin, Pa., disaster, occurred on the afternoon of May 31, 1889, and 2,142 lives were lost and property was damaged to the extent of more than $9,500,000.

CANADIAN WHEAT COMING

IN SPITE OF DEFEAT OF RECIPROCITY.

Traffic Association Starts Campaign for Lower rates to Northwest Fields.

Minneapolis. — The Minneapolis Traffic Association has started a campaign for lower rail rates from the western Canadian wheat fields to Minneapolis so that Minneapolis mills may be able to grind Canadian wheat under the United States "drawback" provision. The Canadian wheat would be ground exclusively for export and would in some measure make up for the defeat of the reciprocity pact with Canada.

Flour Rate Fight Renewed.

Advices have been received by officials of the Washburn-Crosby company to the effect that the Eastern trunk lines are planning to refuse concurrence next year in the 21½-cent lake and rail rate on flour from Minneapolis to the Atlantic seaboard, and that in order to win the Great Northern, Northern Pacific and Soo lines over they are planning to refuse concurrence in tariffs on other classes and commodities that have been in existence a long period.

This, it is said, will tend to make the three Minneapolis lines consider before they establish the lowered flour tariff next year. Members of the traffic managers' staffs of the Great Northern road said that this problem must be settled by a conference of traffic men of the three roads and that nothing definite regarding the matter could be announced at this time.

The grain and milling committee of the Minneapolis Traffic association is perfecting an arrangement with Western railroads looking to proportional grain rates from territory west of Minneapolis to Chicago. The plan is being worked out to protect the Minneapolis mills against Chicago and Milwaukee.

The present system provides for a 7½-cent rate on wheat from Minneapolis to Chicago and Milwaukee from any Western producing point. The through rate from a point west of Minneapolis is greater than the sum of both locals to Minneapolis and to Chicago, and the adjustment to be effected will be an equalizing of the through and local rates, so that Chicago cannot draw upon Minneapolis territory to the detriment of the mills here.

AGED MEN ATTEND FAIR

Rice County Show Attracts Hundred-Year-Old Spectator.

Northfield—Officials of the Rice county fair, believe that one attendance record for the whole state was broken when Joseph Stowe, who lives on a farm near Dundas, came in to see the exhibits. Mr. Stowe was born on April 14, 1811, and is more than 100 years old. Another man 91 years old, another 90, five men more than 81 yers old and one woman whose age is 85 attended the fair.

This information was obtained by a firm of furniture dealers, who offered a cane as a prize to the oldest person attending the fair.

The following is a list of the names entered: William Jackson, 91 years old, born September 28, 1820; Lamber Watt, 90 years old, born December 2, 1820; Lot Huestis, 82 years old, born August 3, 1829; J. C. Cooper, 81 years old, born January 24, 1830; Henry Potter, 84 years old born Mar. 8, 1827; E. T. Archibald, 84 years old, born June 14, 1827; A. D. Holt, 83 years old, born August 23, 1828; Martha Wheaton, 85 years old, born August 19, 1826.

Mr. Stowe, the winner, was born in Halifax, Vt. He has lived in Minnesota more than half of his life. He is now living with a son, John Stowe on a farm near Dundas.

ROYALTON BANKERS PLEAD.

Cashier and President of Institution Answer to Indictments.

Little Falls—H. J. Schwartz and Henry A. Schwartz, pleaded not guilty to indictments returned by the grand jury here and were released on $2,000 bail. The former is cashier and the latter president of the State bank of Royalton, which recently was declared to be insolvent.

H. J. Schwart was arraigned on four counts, two charging him with accepting deposits after the bank was insolvent, and two accusing him of larceny in the first degree. He is charged with embezzling funds belonging to E. E. Crome while acting as his agent, and with the larceny of $12,000 from Joseph Woltman also while acting as agent.

Henry A. Schwartz was indicted on two counts charging him with accepting money when the bank was insolvent. The cases have not been set but probably will not come up until next January owing to other business of the court.

NORTHFOSS WILL APPEAL.

Constitutionality of Criminal Insane Act to Be Put Up to Supreme Court.

Fergus Falls.—The attorneys for William L. Northfoss, who is admittedly sane, but who is confined to the insane hospital here because the superintendent does not feel justified in signing a certificate to the effect that he will never prove dangerous again, are preparing to take an appeal to the supreme court. In habeas corpus matters of this kind, an immediate appeal can be taken, and a hearing will probably be held next week. If the supreme court sustains the district court and refuses to declare the law unconstitutional, all those who plead insanity to escape imprisonment for crime will remain in the hospital for life unless the law is repealed.

MAYOR JONES IS MODERATOR.

Congregational Association of Minnesota Ends Convention.

Alexandria.—The annual meeting of the general Congregational association of Minnesota closed with a session given largely to the men and religion movement at which addresses were made by Prof. Fred B. Hill, of Carleton college and L. J. Hunt, St. Paul, president and vice president, respectively, of the state brotherhood.

Former Mayor D. P. Jones, of Minneapolis, was elected moderator for the ensuing year winning over A. M. Miller of Crookston by one vote. The assistant moderator elected is Rev. W. C. A. Waller of Lake City; secretary, Rev. M. B. Morris of St. Paul; and scribe Rev. W. N. Payne of Wayzata.

Northfield, Minn., was selected as convention city for 1912.

HUNTER KILLS FARMER

Newry, Minn., Man Shot by Neighbor Accidently When They Meet.

Austin.—Frank Greegan, a farmer living at Newry, west of here was instantly killed by the accidental discharge of both barrels of a shotgun belonging to a hunter who happened, to run upon Greegan and a neighbor, who with their children, were picking walnuts. The hunting party, three in number, were also neighbors.

NEW MINING COMPANY.

Iron Valley Co., at Brainerd, Capitalized at $100,000.

Brainerd.—The Iron Valley Mining company incorporated by Attorney W. W. Barron, Surveyor L. Knudsen and Dr. R. A. Beise, all of Brainerd, has been capitalized at $100,000. The company has an option on the northeast quarter of section 10, town 43, range 32, about one mile southwest of Lenox near the Northern Pacific tracks.

Blue Earth Bank Statements.

Mankato.—Total deposits in the banks of Blue Earth county are $6,159,898, and the total loans are $5,047,602. This is a decrease in the deposits in the last six months of $585,958, and an increase in loans of $173,641. The total deposits in the city of Mankato are $4,603,243, a decrease in the last six months of $565,344, and an increase over July 1910, of $166,474. The total loans by the Mankato banks are $3,675,255, an increase in the last six months of $52,080. The total deposits in the banks of the county outside of Mankato are $1,556,654, a decrease in six months of $20,614. and the total loans in the banks of the county outside of Mankato are $1,372,346.

Boys Admits Forging Checks.

Canby.—Folly Karp is accused of having passed bogus checks. It is said he passed one on the First National bank of Canby for $10 and went to Marshall to attend a circus. The check purporting to be signed by Chris Rock, the boy's stepfather, was pronounced a forgery. The boy is said to have passed similar checks at Marshall and Springfield. He was caught at Gary, S. D., where he cashed a check. The boy admitted forging Mr. Rock's name to four checks and had several made out. He will be placed in a reform school.

May Use Oil For Power.

Thief River Falls.—This city recently voted $40,000 bonds for an auxiliary steam plant to aid the city electric plant. Committees sent to investigate steam and oil plants reported in favor of steam. It is felt that possibly oil will give satisfactory results so all bids for erection of the plant have been laid aside.

Low water in Red Lake river causes erection of an auxiliary plant. Many believe the great drainage ditches are drying the north country. Water is becoming scarce in parts of Northern Minnesota.

State to Sell Much Timber.

St. Paul.—Thirty-five million feet of timber in northern Minnesota will be opened for auction sale Oct. 31 by the Minnesota State Timber Board. The timber is valued at nearly $2,000,000. The timber is in Lake, St. Louis, Itasca, Koochiching and Beltrami counties.

KILLS WIFE NO. 2

CHICAGO INTERNE SAYS WOMAN FOUND SLAIN NEAR DIXON WAS HIS VICTIM.

MYSTERY QUICKLY CLEURS

Committed Crime to Hide Marital Duplicity From First Mate—Makes a Full Confession.

Chicago, Illinois. — Dr. Harry Elgin Webster, a Rush Medical college graduate student and interne at the Polychnic hospital, in a remarkable confession to the police, admitted that he murdered one of his two young wives, Bessie Kent Webster of Chicago, in the woods of Ogle county, ten miles from Dixon, Il., Sept. 16. The authorities declare that the motive for the crime was Webster's desire to hide from his first wife, Zoe Varney Webster, of Cedar Rapids, Ia., the fact that he was a bigamist. He had married the two women within one week last January.

The accidental discovery of Bessie Kent's body, almost two weeks after she had been killed, was followed by identification and the arrest of Webster.

The young medical student was arrested at the hospital shortly after he had left Zoe Varney Webster, wife number one, at a down town hotel, where he had attempted to explain his marital duplicity to his first wife. She had been greatly shocked by her husband's revelations, but he had convinced her that he knew nothing of the murder near Dixon.

Rarely has a complex police case, with so many complications, unfolded with more rapidity. Mrs. Webster number one was waiting at the Chicago & Northwestern railroad station for a train to Dixon when the police found her.

One of the peculiar features of the case was the manner in which the Chicago police work compared with that of the country officials who came to Chicago to arrest the murderer. The credit for solving the murder mystery belongs to W. P. Delany, sheriff of Ogle county, and W. P. Emerson, assistant state's attorney in the same county.

Webster, still mopping his eyes with his handkerchief and the back of his hand, began the story of his life from birth. He said that he was born in Freeport, Ill., in 1882. He led up to his education in Rush Medical college and, finally, to his meeting and infatuation with Bessie Kent. But, he continued, he had not thought of marrying her. Miss Kent, he said, was to be a "chum" and not a wife.

"I really was in love with Zoe Varney, whom I married Jan. 4 in Cedar Rapids," he said.

"Still Bessie followed me. She was so insistent that I agreed to marry her and the ceremony was performed in a justice's office in the county building just a week after my marriage to Zoe."

Bessie was to get a divorce, but failed to do so, and an application made by the doctor failed. He attempted to leave her, but she followed him to Dixon and demanded to see his parents. He took her for a drive into their country to gain time, their quarrel increased and he finally killed her.

DAILY MARKET REPORT.

Twin City Markets.

Minneapolis, Oct. 2. — Wheat, December, $1.08¾; May, $1.12¾; No. 1 northern, $1.08¾; No. 2 northern, $1.06¾; No. 1 durum, 98c; No. 3 corn, 66c; No. 3 white oats, 46c; barley, malting, $1.18; No. 2 rye, 91½c; No. 1 flax, old, $2.26.

Duluth, Oct. 2.—Wheat, December, $1.08¾; May, $1.12¼; No. 1 northern, $1.08¾; No. 1 durum, 97½c.

South St. Paul, Oct. 2. — Cattle—Steers, $5.25@5.85; cows, $3.35@5.00; calves, $3.00@7.75; hogs, $6.10@6.35; sheep, spring lambs, $2.50@5.00.

Chicago Live Stock.

Chicago, Oct. 2.—Cattle receipts estimated at 800; market weak; beeves, $4.75@8.15; Texas steers, $4.30@6; western steers, $4.25@7; stockers and feeders, $3.25@5.65; cows and heifers, $2@6.20; calves, $6@9.50.

Hogs—Receipts estimated at 8,000; market slow, generally steady; light, $6.10@6.75; mixed, $6.05@6.80; heavy, $5.80@6.70; rough, $5.80@6.05; good to choice heavy, $6.05@6.70; pigs, $4@6.25; bulk of sale, $6.10@6.60. Sheep receipts estimated at 3,000; market weak, native, $2.25@4; western, $2.75@4.10; yearlings, $3.85@4.50; lambs, native, $4@6; western, $4.50@6.

Chicago Grain Market.

Chicago, Oct. 2.—In the absence of any development indicating that the war would involve other powers besides Italy and Turkey, the wheat market here showed a tendency today to decline. Foreign exchange did not give evidence of so much excitement as had been looked for, and the fact received attention that neither of the belligerent countries would be likely to import wheat, Italy in particular having produced this year a record-breaking crop. Another circumstance favoring the bears was improved weather in Canada. Big receipts northwest acted as an influence, too, against the bulls. The opening was ¼c lower to ⅛c up. December started at 98⅜c to 98¾c, the same change from last night as the market taken altogether. A fall to 98¼c followed.

Subsequent rumors of fighting between Greek and Turkish forces led to an upturn but the effect did not last. The close was weak with December ⅝@¼c net lower at 98⅛@98¼c.

ADVENTURES of the WORLD'S GREAT DETECTIVES

By George Barton

The Clue of the Bamboo Canes

An Episode in the Life of General Trepoff, Chief of Police of St. Petersburg.

COPYRIGHT 1911 BY W. G. CHAPMAN.

THE winter palace at St. Petersburg is one of the largest buildings in the world. There was a time, it is averred, when the wonderful structure housed several thousand persons. Noblemen, attendants, servants and employes of all kinds came and went in swarms. The discipline was lax. Scores of soldiers, detectives, policemen and secret service officials were employed to guard the person of the czar, but their very numbers helped to make them a menace rather than a protection.

In October, 1879, a carpenter, carrying his box of tools on his shoulder, appeared at one of the basement doors of the palace and said that he had been sent to assist in making some repairs to the drying rooms of the czar's winter residence. He was admitted without question and within an hour was at work with other mechanics in the lower part of the great building.

The foreman of that section came lounging along. He noticed a new face among the men. He stopped and said:

"What is your name?"

"Sergay Batyschkoff."

"Who sent you here?"

"My employer—" giving the name of a well-known cabinet maker.

The foreman shrugged his shoulders impatiently.

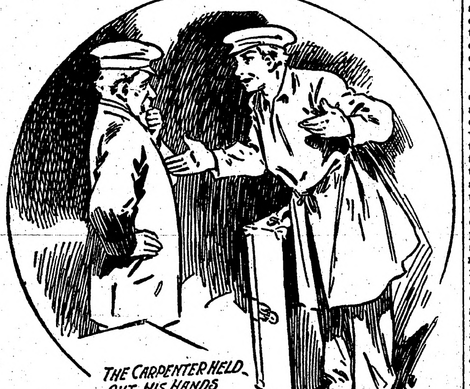
"That is irregular. I am tired of having men put on me in this way."

The new carpenter held out his hands pleadingly.

"I'm sorry," he said, "but I need the work badly—please overlook the irregularity this time."

"Very well," was the gruff response, "but this will be the last."

So his name was entered with the other mechanics, and that act had far-reaching consequences.



THE CARPENTER HELD OUT HIS HANDS PLEADINGLY.

On the 5th of February, 1880, the czar had arranged a splendid dinner in honor of the Prince of Bulgaria. It was a state affair and all of the details were planned on a scale of grandeur commensurate with the greatness of the Russian empire. Five minutes before the royal guests had assembled in the state dining room there was a dynamite explosion in the imperial palace. The mine had been set in the basement and the explosion pierced the two stone floors and made a gap ten feet long and six feet wide in the dining hall in which the table had already been laid for the dinner. The explosion killed five men of the police guard and injured thirty-five others.

The greatest consternation prevailed. The czar, of course, realized that the Nihilists had been at work, but he was terrified to think that they had gained entrance into the palace and that the explosion which had just taken place was intended to encompass his death as well as that of the members of the royal family.

The conspiracy in this case seemed to be widespread and far-reaching. Almost on the eve of the explosion in the winter palace a woman visited General Trepoff, the chief of the St. Petersburg police. She said her name was Vera Zassulic, and that she had called for the purpose of demanding satisfaction of General Trepoff for his tyranny in ordering a political prisoner, named Bogolinbuss, to be flogged for a slight breach of prison discipline. It seems that for years she had been nursing a grievance against the chief of police. She believed that she was to be the instrument by which Trepoff was to be removed from his position. Her life, it is asserted, was an apprenticeship for one thing—the killing of the czar's chief of police. At the age of seventeen she had been arrested and kept in prison for two years because she had received letters from a revolutionist. After that she passed an examination as a school teacher and was working at book binding. At the end of 1875 she returned to St. Petersburg. Her experience had prepared her for the deed. On the morning in question she presented him with a paper, and while he was reading it fired her revolver and then escaped.

It was soon after this that the czar called upon Trepoff, promoted him to the position of counsellor of state and then charged him with the commission of capturing and punishing the man or men who were guilty of the outrage in the winter palace.

Trepoff was a man of remarkable capacity. He was burly in form but singularly nimble in thought. He had the cunning of the fox with the patience and persistence of a well-trained hunting dog. A number of men were arrested on suspicion. That was necessary. It seems to be the practice of the police in all countries to arrest somebody at some time in connection with every crime that is committed. Afterwards, if the person can prove his innocence, all is well, but in the meantime there is a feeling that the police have been alert and have done everything in their power to capture the criminal. But in this instance those who were acquainted with the redoubtable Trepoff knew that he was not satisfied. A dozen or more men, who were placed in confinement immediately after the explosion, might or might not be guilty, but Trepoff knew in his own mind that he had not captured any of the principals.

The months lengthened into a year, and still he had not run across the person who was guilty of this great outrage. But the case was never out of his mind day or night, and scarcely a week passed by that he did not invent some new scheme for bringing the guilty man to justice. From time to time persons were arrested for minor political offences, and in these instances he closely scrutinized the evidence in order to form some connecting link with the affair of the explosion at the winter palace.

One morning one of the secret agents informed him that a number of men had been seen in the vicinity of the winter palace carrying bamboo canes. That, in itself, did not seem like a very extraordinary proceeding, but the fact that a number of persons carried the same sort of walking stick made it sufficiently interesting to be worthy of report to the chief of police. The response of Trepoff to this bit of news was characteristic:

"Arrest every man of them and bring them before me."

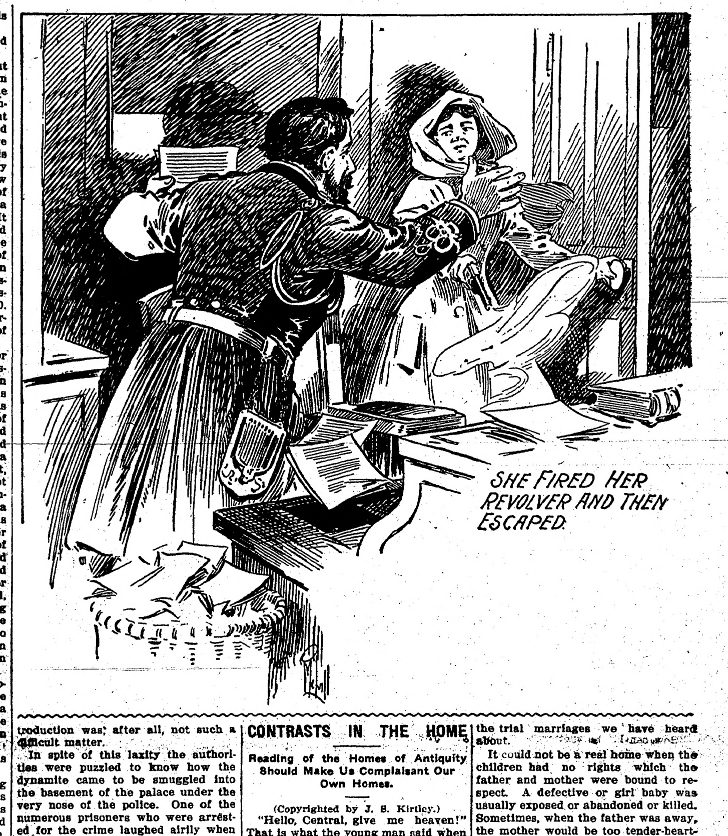
His instructions were carried out to the letter. Some fourteen men were rounded up and brought to the central police headquarters for examination. They were examined, but nothing of any importance was found on their persons. Then the canes were taken and carefully scrutinized. This search brought rich results. Every one of the sticks proved to be hollow and each one contained a sheet of tissue paper on which was printed a call for a meeting of revolutionists. It was the biggest haul that Trepoff had made in many months. The evidence proved that the men were enemies of the government. It did more than that—it paved the way to another discovery which bore directly on the mysterious explosion of February 5, 1880. One of the prisoners, being put to torture, revealed the names of several of his associates.

One of these was a certain Victor Chalturin. He was the son of a peasant, a very energetic agitator and an experienced organizer of associations of malcontents. The police visited his rooms and made a thorough search of the premises. A number of books and pamphlets found on the shelves and in closets indicated that he was a man with Nihilistic tendencies. That, in itself, while interesting, was not very important. The searchers continued at work and finally came to a cabinet with locked doors. It was broken open and in a secret drawer they found a blue print of the plans of the winter palace. It was worn and frayed at the edges as though it had been carried in someone's pocket for a long while. Most significant of all, the lines indicating the great dining hall were marked with a cross. These facts were promptly communicated to Trepoff, and he sent out a description of Chalturin to every police official in the Russian empire.

While awaiting reports from his subordinates the energetic chief of police made another discovery. It was a slip of paper which was found in the basement of the imperial palace. On it was written these words:

"Do not delay any longer. Now is the time to act."

Some bits of paper corresponding with the material on which this was inscribed, were found in Chalturin's room. The case against him appeared to be complete. It was in March, 1882,—over two years after the explosion occurred—that the chief culprit was taken into custody. He was given a speedy trial and on the 22d of March of that year was executed, and it was then, and then only, that he was recognized as the man who had introduced himself as a carpenter in the winter palace.



SHE FIRED HER REVOLVER AND THEN ESCAPED.

The testimony which was brought out at the trial of Chalturin gave the authorities some idea of the marvelous ingenuity and wonderful perseverance of the Nihilists. Just prior to the explosion in the winter palace they had organized their forces under the title of "The Will of the People" and at once began to issue proclamations and pamphlets in order to swell their numbers and strengthen their cause. In January, 1880, their secret printing presses were discovered and seized by the police, and numerous arrests were made. In spite of this, they managed to issue, on the 26th of January, a program in which they declared that unless the government granted constitutional rights the czar must die. The result of this was fresh arrests, banishments to Siberia for some and death on the scaffold for others.

It was at this stage of the game that the Nihilists planned their most daring program. It was to blow up the emperor in his own palace. Its execution, as has already been stated, was undertaken by Chalturin, who was young and fervent and filled with an exaggerated sense of his own wrongs and the wrongs of the people. He was a clever cabinet maker and this enabled him, under the assumed name of Bátyschkoff, to obtain a situation as a carpenter in the imperial palace. He ascertained that the emperor's dining room was above the cellar in which the carpenters were at work, although between it and the cellar there was a guard room used by the sentinels of the palace. Chalturin lived in the palace for nearly four months, and every night he used a package of dynamite for his pillow. A gendarme had been installed in the carpenter's cellar shortly after he began to work there, and this made the introduction of the dynamite exceedingly difficult, and incidentally had delayed the execution of the plot for many months.

It became generally known during the investigation in this case that the winter palace for years had been the refuge for vagabond workmen, friends of the servants, and others. Many of these were without a passport and could not have lived anywhere else with impunity. It seems that there is an old law which gives the right of sanctuary, so far as the police are concerned, to criminals taking refuge in the imperial palace. Naturally, the greatest disorder prevailed there. Discipline was at a low ebb, and the introduction was, after all, not such a difficult matter.

In spite of this laxity the authorities were puzzled to know how the dynamite came to be smuggled into the basement of the palace under the very nose of the police. One of the numerous prisoners who were arrested for the crime laughed airily when questioned about this phase of the conspiracy.

"It was easy," he said, "as easy as breathing."

"Did Chalturin carry it with him?"

"Not at all. That might have been fatal to our plans. At least a dozen men assisted in the delivery of the dynamite, and had any one of them been arrested the other eleven would have remained to have carried out the program."

"But what sort of men were they?"

"Just every-day, ordinary kind of men. The sort that would not be noticed in a crowd. For instance, the fact that a baker handed a couple of rolls to Chalturin would excite no comment, and yet these innocent bits of bread might have contained one-tenth of all the dynamite smuggled into the palace. Some of it was hidden in carpenter's tools, some in the lining of workingmen's caps. But why go further? The men who plan great things must possess great ingenuity as well as great courage."

But to get back to the narrative.

Chalturin said that while he was in the basement of the palace he suffered frightfully from headaches, which were caused by the poisonous exhalations of the nitroglycerine on which he rested every night. When the first of February arrived, fifty kilogrammes of dynamite had been introduced, and the counterfeit carpenter was now in a position to go ahead with his deadly work.

He hesitated at the last moment, but it was too late to retreat. He felt that in any event his own life was imperiled. If he accomplished the dastardly plot, he would be executed by the government; if he refused to do so, he was likely to be assassinated by his associates. While he was still in a state of uncertainty, he received a letter from the executive committee telling him to delay no longer, but to fire the dynamite.

In the excitement that ensued, Chalturin escaped and left St. Petersburg, but in the end, as already related, he was caught in the vast net spread by Trepoff and suffered death as the penalty of his great crime.

Why Not?

"Munyon says that death before the age of 100 years is reached is suicide."

"That's good news. I guess I'll live to be a hundred."

"You guess you will?"

"Sure. My relatives won't care; I ain't got any money."—Houston Post.

Adding Insult to Injury.

First Hen—Stopped laying?

Second Hen—Yes, they expect us to lift the mortgage for the auto that runs over us.—Harper's Bazar.

CONTRASTS IN THE HOME

Reading of the Homes of Antiquity Should Make Us Complaisant Our Own Homes.

(Copyrighted by J. S. Kirtley.)

"Hello, Central, give me heaven!" That is what the young man said when he installed the new telephone in the study and wanted to test it. At once they connected him with his home and he found the instrument working to his intense satisfaction. And he had been married several years, at that.

The general level of the American home is pretty high, if we may judge by the external signs of comfort—the average quality of the houses, foods that come from all over the world, good clothes, schools for children, with text books furnished free, in many places, large and attractive parks for recreation, or, better still, open country, and luxuries like the telephone in almost all homes, whether in city or country. And, if we judge by the sentiments of orators and writers, especially the apostrophes of the poets, we may be led to imagine that Eden is blooming and even booming here in our country, the lost Paradise regained.

We certainly have a right to be somewhat complaisant over our homes when we read about the homes of antiquity. When Mrs. Wiggs was asked if she did not feel her privations, she gave a good long list of her blessings and asked in reply, "Ain't you proud you ain't got a hare lip?" We may be proud we are not a part of an old Roman home, for instance. To use a Hibernicism, it would not be a home at all. The Latins had a word for family and one for house, but none for that something which a family in a house constitutes, which we call home. The family, with or without children, plus the house form something called home, a thing more easily spoken of than described. Well, the Romans had no word for that, because they had no need for such a word. And whenever we catch anyone trying to reestablish such a domestic anachronism and monstrosity in our land and time, it is taken in hand either by the white caps or the blue coats, or the petticoats, themselves.

It takes at least two persons to make a home, and in the Roman house there was only one, the man. The woman was not a person, in her own right, under the law. She could not intervene in the government of the family. If one of the children wanted to get married, her consent was not necessary. If her husband wanted to put her to death or leave her for a handsomer woman, he had a right to do so, without legal process or prejudice. Seneca speaks of his friend, Macaenas, as having been married a thousand times. He was certainly living up to his privileges. And Cicero, the ideal orator, repudiated his wife Terentia, in order to escape from his creditors, by using the money he would get with his new wife, Publia, and he afterward repudiated Publia. After awhile they improved the laws a little, by having what they called free marriages, somewhat like the trial marriages we have heard about.

It could not be a real home when the children had no rights which the father and mother were bound to respect. A defective or girl baby was usually exposed or abandoned or killed. Sometimes, when the father was away, the mother would be too tender-hearted to kill the child and would abandon it. The abandoned children were usually left at Velabrum, near the city, and those who were childless would sometimes watch for the castaways, pick out one and adopt it. The rest of them went to the witches or the slave dealers or wild beast or birds of prey. That same wise and noble Seneca said it was not anger but reason to thus separate the useless from the sound. If we were hunting for a home in Greece we would not fare any better, even where esthetic and intellectual culture was the very highest. There was purity among the women of the early Germans till the Romans took them over, but even there the wives were bought and could be sold and beaten at pleasure.

There is space left to speak of two facts about the American home. One is that it is safeguarded by just and generous laws. The reason for this is that the people themselves hold in their deepest consciousness and convictions the sentiments that are essential in the home; and the legislatures and courts have given them what they were taught by the home to give. Every child is guaranteed protection against brutal treatment; so is every woman; so is every man, if he should need such protection. The state reserves the right to take away any member of the family thus mistreated.

Another fact is that the American home has been the most powerful institution in generating tides of patriotism and education and in conserving the treasures of religion. It has felt the need of schools, and, under urgent home sentiments, the leaders have gone forth to found and fashion educational agencies to assist the home in its nurture of the young. The home, rather than the state, has been the nursery of patriotism, as mothers have taught and fathers have showed their children how to live for the land they love. And religion's mightiest work has been done in aiding the home in its sacred tasks.

And two very hopeful signs encourage us. One is that the psychologist has invaded the home. He is studying the institution as a whole and in detail, especially mothers and boys. The great international home congress, just held in Brussels, helped. The children's exhibit on home conditions, now being prepared by some men and women in New York, will help some. The other sign is that movements are starting in the home for self-inspection and self-rectification. It has got as far as the mother and we have mothers' clubs. Next we must have fathers' clubs for the study of the whole situation. We have boys' and girls' clubs, but no sons' and daughters' clubs as yet. These will come next.

SERIAL STORY

The Girl of My Dreams

A Novelization of the Play by Wilbur D. Nesbit and Otto Hauerbach

Novelized By WILBUR D. NESBIT

Copyright by W. D. Nesbit

SYNOPSIS.

Harry Swifton is expecting a visit from his fiancee, Lucy Medders, a Quakeress whom he met in the country. His auto crashes into another machine containing a beautiful woman and a German count. The woman's hat is ruined and Harry escapes. His sister, Caroline, arrives at his home to play hostess. Socrates Primmer, cousin of Lucy's, arrives with a hat intended as a present for Lucy. Harry is trailed to his home by the Count and Mrs. Gen. Blazes, who demands her hat, a duplicate of which she says has been delivered at Harry's house. She is in great fear lest her husband hear of her escapade. Lucy Medders and her father arrive and the count is hidden in one room and Mrs. Blazes in another. Harry is forced to do some fancy lying to keep Lucy from discovering the presence of the woman. The milliner, Daphne Daffington, who proves to be an old flame of Harry's, arrives to trace the missing duplicate hat and more complications ensue. Daphne is hustled into the room occupied by the Count. The latter, with whom Daphne had flirted at one time, demands the return of a ring he had given her on that occasion. She tells him that she gave the ring to General Blazes. As the Count had also given Mrs. Blazes a duplicate of the ring he becomes somewhat excited. Daphne leaves the room and seeks refuge in the one occupied by Mrs. Blazes. Mr. Medder discovers the Count, who is introduced as Harry's German tutor. General Blazes arrives and accuses Harry of concealing his wife. Daphne steps out and the general is dumfounded. Lucy gives way to tears. The Count takes the blame for the whole affair upon himself, but the verdict is reserved until Harry can vindicate himself. General Blazes admits to Harry that he has flirted with Daphne, and Mrs. Blazes overhears the talk. Mrs. Blazes attempts to escape with the aid of the Count and the latter is mistaken for a burglar. The duplicate hat arrives and Harry solves that mess. Lucy overhears a conversation between Harry and Daphne which satisfies her of his innocence.

CHAPTER XIV.—(Continued.)

"Give me the hat! Give me the hat!" Mrs Blazes exclaimed.

"Giff me my ring," the count replied.

She slipped his ring from her finger and offered it to him hastily. But, with one hand clutching a round of the ladder and the other arm about the hatbox, he was hardly in a position to take it.

"How can I?" he sputtered. "It iss a ring, not der mumps."

"Put the hat in the window; then you can take the ring," she advised.

"Und den you get der hat und giff me der laugh?"

"Nonsense!" she answered. "I never want to see your ring, or you again!"

"Der same to you, und many off dem," he retorted, swinging the hatbox around and trying to shove it through the window. She caught hold of it, also, but it was too wide to go through the opening. In the effort to force it through the count lost his balance and came perilously near going down with a crash. He saved himself by clutching the window frame, however. Mrs. Blazes fretfully said:

"Give Me the Hat!" Mrs. Blazes Exclaimed. "Giff Me My Ring," the Count Replied.

"Clumsy! Let me show you."

She untied the string on the box, took off the lid and took out the hat. She let the box drop to the ground, and with a little scream of delight stepped back into the room and hurriedly donned the hat.

"It's a perfect duplicate!" she said, happily. Then, while the count was descending the ladder she started to climb out of the window, but the count stopped her.

"My ring, iff you blease!" he said.

"For goodness sake! Take it and let me go!"

She thrust the ring into his hand, and he ran down the ladder and steadied it at the bottom. Mrs. Blazes carefully crept from the window, with much manipulation of her skirts, and anxiously let herself down a rung at a time. When she was half way down she cried:

"Oh! I'm scared! I'm going back!"

She started up the ladder again, and the count almost fainted. He shook the ladder violently and threatened:

"Iff you go up anudder round, I upset it!"

Timorously, she came down, and at last stood on the ground.

"Oh! How heavenly it is to be free!" she exclaimed.

Up the walk again stormed the general, and Mrs. Blazes at sight of him screamed, and would have climbed the ladder had not the count caught her arm and restrained her.

General Blazes had not found her at home, and had returned to hold counsel with Harry as to the best way to locate her. And now he found her in the company of the count, in Harry's lawn, with a ladder leading to a window in Harry's house.

"Aha!" he shouted.

"Merciful heavens! My husband!" she wailed.

"Und he only buries nodding of dem but deir hats!" the count reflected, keeping Mrs. Blazes between him and the general.

"So!" the general roared, confronting her. "This has been your plan, has it?" He turned on the count vindictively. "Trying to inveigle my wife to climb into that house!"

"My dear, you are wrong!" Mrs. Blazes wept. "Listen a moment, and I can explain."

"Wrong?—Explain?—Woman, I see it all now! You have planned an elopement with this—this pretzel!"

"Bretzel! Ach Gott! Und I must stand dis!" the count fumed.

"What?" Mrs. Blazes demanded. "I elope with that?"

She pointed a scornful finger at the count.

"Don't try to palaver me!" the general shouted.

All this noise and shouting of course was heard by those in the house, and first Harry came running out, followed by Lucy and her father.

"What in the world is happening?" Harry asked, rushing up to the excited trio.

"I have trapped this wretch!" General Blazes yelled, indicating the count with a gesture of his clenched fist.

Harry, helpless, looked from one to the other. Mrs. Blazes, desperate, glanced at him and said:

"Mr. Swifton can explain. I have nothing more to say."

She assumed an air of supreme indifference to whatever fate might hold in abeyance for her.

"Well, Harry," the general said, "if it's up to you, tell me how this happened."

"Tell you how what happened?" Harry asked, dazedly.

"How does it happen that I find my wife trying to climb into your house, assisted by this—noodle."

"Noodle! Gott in Himmel! I forget myselluf yet!" the count gritted between his teeth.

"Oh! What? Trying to climb into my house?" Harry repeated, brushing his hand over his brow. "Why—why—it must have been some kind of a joke, general. Yes—surely it was some kind of a joke."

"Joke!" the general blurted out.

"But why should she want to get into thy house, Harry?" Lucy asked, with a bit of mischievousness, for now she knew the whole story.

"Yes!" the general barked, turning to his wife. "Why should you want to get into his house?"

Mrs. Blazes saw light ahead.

"My dear, if you will only calm "I will tell you everything. I know you will think I am a foolish woman—but, darling, I have been jealous of you."

"Jealous of me?" said her liege lord.

"Forgive me!" she pleaded. "But when I heard those reports about you, I—"

"Reports? What reports?"

"That you were infatuated with a milliner—Mlle. Daphne."

"I? I infatuated with a milliner?" the general asked, with a look of terribly injured innocence. "I? Ridiculous!"

"And I saw her enter this house this afternoon," Mrs. Blazes continued, "and then I heard that you were here—and oh, darling, forgive me!—I came to spy on you!"

"Perfectly amazing!" Harry said to himself. "I'm in the primary class, compared to her."

"Why," the general said. "My own little pet!" He took his wife into his arms. "I—I forgive you! I want you to forgive me. The idea of my giving you even a moment's unhappiness of that kind!"

"T-take me ho-home!" pleaded Mrs. Blazes, from the shelter of his shoulder.

The twain, reunited, went slowly down the walk and into the street.

Mr. Medders observed that Harry and Lucy looked as though they had something to say to each other, and said to the count:

"The young man whom they call Pigeon is sitting in the summer house with Carolyn, and Cousin Socrates is again in the attic writing a sonnet. Wilt thou come in with me and see if thee can find a cigar?"

"I thank you, from my heart," the count replied. "But I haff some writing to do—und iff you excuse me, I go down to der hotel now."

"Then I will say farewell, until we meet again," Medders observed, shaking the count's hand and returning to the house.

Count von Fitz stood before Harry and Lucy a moment.

"I vant to say choost diss," he spoke. "I vant to say 'Bless you, my children!' Und I can't make a present off a hat, but iff you vill honor me, Mr. Swifton, by allowing Miss Lucy to accept a liddle token of my good vishes, I vill giff her diss."

"Now," He Said, "I'm Ready to Explain."

He slipped his fingers into his pocket and produced a little case, which he opened and then took out a ring—not such a ring as either of the ones he had recovered—but a beautiful cluster of diamonds surrounding a ruby.

"Diss," he said, "is a ring I vas keeping to giff to der most beautiful, der sweetest, der truest girl I shouldt find in America. I haff found her—und now I lose her, because you found her, Mr. Swifton."

He dropped the ring into Lucy's hand, and was gone.

Harry led Lucy to a seat.

"Now," he said, "I'm ready to explain."

"Nay," Lucy said, happily. "Thee need not explain now, Harry, dear. I I know all thee would tell me of that. Tell me something else."

And he told her.

THE END.

HEARD IN A SOUTHERN HOTEL

Little Girl Explains That Young Lady Is "Her Papa's New Stepwife."

It is said to have happened in a southern hotel, where those who seek perpetual spring spend the winter. The usual number of idle and curious old ladies sat upon the great veranda, discussing everybody but themselves, and attention was suddenly attracted by a handsome couple that passed through the hotel corridor, followed by a little girl, who, small as she was, appeared to be too old to be the daughter of the lady in the case. The handsome couple entered a motor car, and, waving an affectionate goodby to the little girl, sped out of the hotel grounds with a loud whirr and disappeared up the distant roadway. The little girl watched them until they were quite out of sight, and then turning around she sought out a chair not far from the group of gossips. It was not long before her loneliness was noted by one of the ladies, who called out a pleasant greeting.

"I don't think I have seen you here before, my little girl," she said, with a gracious smile.

"No, ma'am," said the little girl. "We only got here last night."

"And do you like it here?" she was asked.

"Very much," she replied. "It's lovely here."

"And you didn't go motoring with your papa and mamma, did you?" said the good lady, subtly.

"No, I don't like motor cars," said the child. "It makes me seasick to ride in them."

"Your mamma is a very young looking lady to have so big a child as you are," said the good lady.

"She isn't my real mamma," said the child.

"Oh, indeed," said the good lady.

"No," said the little one, gravely. "She's my papa's new stepwife."—Horace Dodd Gastit, in Judge.

He Snored Into Safety.

Wilkesbarre, Pa., is in the field with this story: Michael Benner of Plains owes his life to the fact that he can snore loud enough to be heard some distance away. Early one morning Policeman Schneider of North Wilkesbarre heard snores coming from the direction of the Lehigh Valley railroad tracks, and fearing that some one might be asleep on the tracks, and knowing that an express train was about due, he investigated. Guided by the snoring he came upon Benner asleep, just in time to pull him from the track before the train thundered by. Benner can thank his snore for saving his life, and Wilkesbarre can congratulate herself that she has a policeman who knows a snore when he hears it.

Fashion the Course.

"I understand Brindle and his wife have quarrelled. What was the cause?"

"Why, Brindle lost his wife in the crowd and went about peeking under all the peach basket hats that looked like hers—and she saw him and got mad."

Mean Scheme.

"Yes, I'm saving for a house."

"I can't save any money. How do you manage it?"

"By getting my wife to go without things. She thinks we are saving for an automobile."

SMILES

A PRACTICAL SUGGESTION.

It was his first Sunday school, and he sat in the infants' department, eagerly watching the superintendent illustrate the lesson on the board.

The superintendent drew the path to heaven—one straight line—and started the figure of a man on it. Gradually the man became larger and larger; and finally when he arrived at the gate of heaven he could not get in.

The superintendent turned to his small audience and in a tragical and sorrowful tone said:

"You see, he is so puffed up with sin that he cannot enter in."

"Try him sideways, mister—try him sideways," came the small, shrill voice from the infants' department.

Remembered the Accent.

"Queen Mary," said the teacher to the class in the history lesson, "loved France so much that she declared 'Calais' would be found written across her heart after she was dead."

Pausing a moment, the teacher looked at a boy steadily.

"Jimmy Smith," she said, "you were not listening."

"Oh, yes, I was," Jimmy replied.

"Well, what did Queen Mary say would be written across her heart?"

"Kelly," was little Jimmy's triumphant reply.—National Monthly.

Two Words That Sound Alike.

"Was it cool at the summer resort where you spent your vacation?"

"Well, yes; it was decidedly cooler than here in town."

"Umph! From the way you talk I presume there was sleighing every day."

"Oh, yes."

"What!"

"I was slaying most of the time. In fact, I must have slain a thousand flies and mosquitoes."

Maintaining Business Secrecy.

The Dad—My son, I want to tell you that the secret of my success, as it must be of any man's, is hard work. I—

The Son—Sh! Dad, I don't care to hear other people's secrets and I am too much of a gentleman to take advantage of information gained in that way. Say no more.

Bulk.

The curious person had opened a conversation with the fat woman in the sideshow.

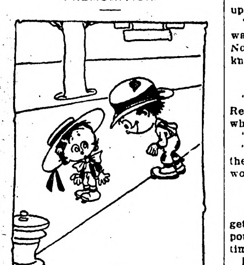
"Are your parents living?" he asked.

"Yes, sir."

"Have they a large family?"

"Rather large, sir," answered the fat woman; "I'm the family."

PREMONITION.



The Dude Kid—What?

The Other—I sez you'd better git tway quick. I feel a brainstorm com'n' on me an' you might git hurted!

How 'Twas.

Mary had a little pain—
I think it was on Monday.
The doctor said, 'twas very plain
She'd filled up on a sundae.

Careful Mother.

"I mustn't let my social activities make me neglect my children," declared Mrs. De Styles.

"Quite right," assented her secretary.

"Send them a marked copy of this society paper. It outlines my plans for August in full."

Homesickness.

Beauty—Don't you sailors get dreadfully homesick at times?

Bo'sun—Bless yer heart, Miss, we ain't never home hardly long enough.—Century Magazine.

Reasons Therefor.

He—This is very poor coffee.

She (looking at him fiercely)—Have you any reason to say so?

He (looking in his cup)—I have grounds.

Up Against It.

"Going away this summer?"

"No; if I go away I'll be sure to gain several pounds."

"And then?"

"Then I can't wear my gowns."

Chance to Demonstrate.

"This beauty surgeon claims he can remove wrinkles."

"Going to give him a trial?"

"I shall, provided he makes a demonstration on my pet bulldog first."

The Famine.

"This must be a poor season for show girls."

"So few engagements?"

"No; a reported decrease in the supply of lobsters."

ADVISING HER DADDY.

"Mary!"

Father's voice rolled down the stairs and into the dim, silent parlor.

"Yes, papa, dear."

"Ask that young man if he has the time."

A moment of silence.

"Yes, George has his watch on him."

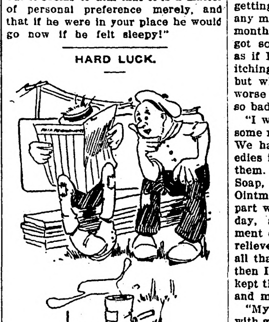
"Then ask him what is the time."

"He says it is 11:48, papa."

"Then ask him if he doesn't think it about bedtime."

"He says, papa," the silvery voice announced, impersonally, "he says that he rarely goes to bed before one, but it seems to him that it is a matter of personal preference merely, and that if he were in your place he would go now if he felt sleepy!"

HARD LUCK.



Raggeden Torne—Say, dat bay mare made a quarter in 23 seconds.

Dusty Rhodes—Gee! an' I ain't made a nickel in tree days!

Plenty.

He kissed his little wife
Twice a day,
The postman did the same,
So they say.

Loneliness at the Seaside.

Inquirer, at Summer Resort—Why don't you associate with that lady?

Mrs. Gotham—She lives in Harlem.

"Well, what is the matter with that other lady?"

"Horrors! She lives in Brooklyn."

"But you don't associate with the lady behind her, either, and she lives on Fifth avenue."

"She won't associate with me."—New York Weekly.

The Worst Way.

"We need rain the worst way."

"Oh, no we don't."

"Why, look! Everything's drying up!"

"Yet, but if we got rain the worst way it would be a repetition of what Noah had to go up against, you know."

Long and Dreary.

"Think well before you marry him. Remember that marriage is a thing which cannot be set aside in a day."

"Oh, I know, I have thought of it."

"I speak from experience. I thought the six months I spent in Reno never would end."

Wide Range of Choice.

Rankin—What are you going to get with that big boxful of cigar coupons you've been collecting all this time?

Fyle—I'm hesitating between a 1911 motorcycle and a 25 cent razor—will probably take the razor.

His Confession.

"Tel me, before it is too late," she pleaded, "if you have ever done anything that you regret."

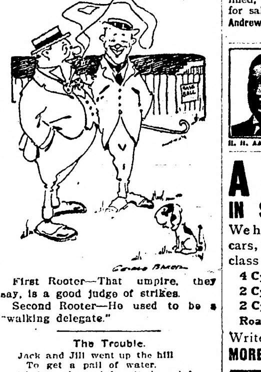
"Yes, there was one thing," he reluctantly admitted. "I once tried to rescue a man who had rocked a boat."

Her Lack.

"Jigsby says his daughter is peerless."

"So she is. The foreign nobleman she was engaged to has jilted her."

NATURALLY.



First Rooter—That umpire, they say, is a good judge of strikes.

Second Rooter—He used to be a "walking delegate."

The Trouble.

Jack and Jill went up the hill
To get a pail of water.
Their mother cried as it she spied,
"Oh, ain't it muddy sorter?"

Absolutely Nothing.

She—No. I know nothing about golf; I don't even know which end of the caddie you use.

Wise Uncle Joshua.

"Be you the elevator conductor?" asked Uncle Joshua, who had strayed into town out of the sweet rusticity of a comic paper.

"Yes, sir," grinned the boy.

"Well, I come ter this village ter see the high buildin'. Haow high up d'ye go?"

"To the top—twenty-first floor."

"Take me up to th' 'leventh. Sho! What's th' use o' riskin' my life an' goin' all the hull way when the folks to home 'll never believe I went any higher than ten stories, no matter what I tell 'em?"

"ECZEMA ITCHED SO BADLY I COULDN'T STAND IT."

"I suffered with eczema on my neck for about six months, beginning by little pimples breaking out. I kept scratching till the blood came. It kept getting worse, I couldn't sleep nights any more. It kept itching for about a month, then I went to a doctor and got some liquid to take. It seemed as if I was going to get better. The itching stopped for about three days, but when it started again, was even worse than before. The eczema itched so badly I couldn't stand it any more.

"I went to a doctor and he gave me some medicine, but didn't do any good. We have been having Cuticura Remedies in the house, so I decided to try them. I had been using Cuticura Soap, so I got me a box of Cuticura Ointment, and washed off the affected part with Cuticura Soap three times a day, and then put the Cuticura Ointment on. The first day I put it on, it relieved me of itching so I could sleep all that night. It took about a week, then I could see the scab come off. I kept the treatment up for three weeks, and my eczema was cured.

"My brother got his face burned with gun-powder, and he used Cuticura Soap and Ointment. The people all thought he would have scars, but you can't see that he ever had his face burned. It was simply awful to look at before the Cuticura Remedies (Soap and Ointment) cured it." (Signed) Miss Elizabeth Gehrki, Forrest City, Ark., Oct. 16, 1910. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 17 L, Boston.

Its Location.

Little Brother—Where's my fishin' pole gone to?

Bigger Brother—Sister's usin' it for a hatpin!—Puck.

CHAS. W. LATTA

Editor and Publisher.

Published every Friday at Holt, Marshall County, Minnesota.

Subscription Price: $1.00 per year, strictly in advance.

Application for entry as second-class matter at the postoffice at Holt, Minn., pending.

OUR MARKET DAY

In getting up a market day the citizens of Holt were actuated by several different motives. Governor Eberhart and the other members of the State Drainage Board were scheduled for a visit to Holt on official business, and the people here felt that they would like to show some token of their respect for the chief executive of the state, and they decided to make special inducements for the people at large to come and meet him. This may be said to have been the principal reason for the occasion. Then, too, there was much to be gained for the entire community by calling public attention to the *splendid territory surrounding Holt* and its wonderful natural resources; and it was considered that the idea in connection with the governor's visit should prove a great aid in securing publicity and inducing new settlers to come. And another reason was that local business interests—the advantages of Holt as a trading centre—would be brought more forcefully to the attention of the people in the surrounding country. All these things argued in its favor and market day was decided upon. The progressive business men concluded that it would prove a great benefit to the country, and as a consequence, to themselves in time; so they are offering special inducements to the public to be in Holt on market day. It is an undertaking that is destined to bring great ultimate benefits to the country and the town, so why should we not all do our part willingly to attract the people here? More particularly should we endeavor to treat them, when here, in a manner that will make them want to come again. It is the proper spirit of progress and the man who is not willing to do his share in the progressive movement will soon be left behind in the march of prosperity. So let us all together push and pull to bring a record making crowd and treat them well. It is a movement for the common good and merits our best efforts.

Senator Knute Nelson is making the least noise of any politician in the state just at present. This does not mean that he will not be a candidate for re-election, however.

Now that Canadian reciprocity has been killed Jim Hill is turning his attention to the boosting of western lands. You can trust him to develop the country that will give the long haul to the railroads.

Score two more victories for the booze. An elevator agent at Erskine committed suicide Monday, no cause known except drinking, and at Kelliher two men are dead and a third badly wounded as the result of a shooting affray started by drinking. Creat stuff.

The Holt Northern Light takes the management of the Marshall county fair to task for not letting the people of Eastern Marshall county know there was to be a fair. Evidently Bro. Latta did not read the Pioneer very closely, as the fair was announced through this paper in a quarter pag ad, besides several news notices.—Middle River Pioneer.

Without casting any reflections on the value of the Pioneer as an advertising medium, we submit that the people generally in this end of the county knew very little about the fair until it was all over.

Newfolden Editor Wedded

The Northern Light acknowledge the receipt of the wedding anouncement of Editor E. L. Grimstad, of the Newfolden Review, and Miss Ruth Evelyn Maxim. The wedding took place at Brainerd on September 27th, and the announcement states that the happy couple will be at home at Newfolden after October 15.

We hasten to extend congratulations and join with their numerous friends in best wishes for their future happiness and prosperity.

We want a live correspondent in every township in Eastern Marshall county to send us the news of the locality and solicit subscriptions for this newspaper. We want bright young people and will make it worth their while to represent us.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

Subscribe for The Northern Light. Only $1.00 per year.

FORMATION OF HAIL.

Father Sanna-Solaro has laid before the Academy of Sciences at Paris a new theory respecting this meteor, the formation of which he has initiated. At present, meteorologists consider that hail is formed in the atmosphere by successive incrustations upon a nucleus. He believes that hailstones are produced at once nearly in the state in which they fall; that congelation begins with the exterior; that the liquid in contact with the crust cools, and the bubble of air is converged towards the center. This latter finally bursts the shell, and the congelation of a new layer takes place. This latter is formed in two parts—one deprived of air and transparent, the other containing bubbles of air and opaque. If the hailstones reach the ground before perfect congelation, their centers will contain bubbles of air, water and icicles; but if the congelation be suddenly completed, the nucleus will resemble snow. The father has frozen different quantities of water in caoutchouc envelopes quite transparent, and states that he has obtained artificially all the above-mentioned phenomena, and that between the natural and artificial hailstones the only difference is, that the number of layers, for equal volumes, is greater in the latter. The details given in the memoir, which is printed in the "Compes Rendus," will interest meteorologists, whatever opinion they may form respecting the father's conclusions.

HEARTY ANGEVINS.

The Angevins are substantial eaters and hard drinkers. The wine of the country is stronger than further south, and, as they argue, "bien traitre." They are also fond of "aperitifs" at odd hours, and like their liquors with their coffee. The Count de Millefleurs recently found fault with one of his friends for only having two small glasses of brandy after each meal—"Every one here drinks four"—and then talked of one of his neighbors who said that a bottle of wine felt inside him very much like a mouse in a cathedral. They have, however, been perhaps unjustly maligned in the saying "Angevin, sac a vin," but they certainly do drink more than most Frenchmen, who, particularly in the south, are remarkably abstemious.—Saturday Review.

AMBITIOUS YOUNG WOMAN.

Miss Paula Laddy, who was the only woman graduate of the New Jersey Law school, is the daughter of the president of the New Jersey State Suffrage association, whose son took his doctor's degree in the New York university at the same time that her daughter graduated. Miss Laddy was a probation officer and thought that a knowledge of law would better fit her for her work, so took the course.

SERVICE RENDERED BY BIRDS

Their Function Is to Suppress Insects That Play Havoc With the Farmer's Crops.

Among the creatures that render service to mankind the birds occupy a foremost place. It is their function to suppress the insects that play havoc with the farmer's hard-earned crops.

Fifty-three per cent. of the food of birds in one locality was found to consist of the larvae of the disease-disseminating mosquitoes. Horse flies are the burden not only of horses, but of other valuable stock, and the larvae of this fly are the natural food of several species of birds. The fever tick, so injurious to cattle, is the natural food of the killdeer and the plover. Corn, cotton and other crops are destroyed to a large extent by grasshoppers, and there are at least 23 species of birds that feed upon grasshoppers. Grass lands and grain crops in general suffer greatly from various insect pests, which are destroyed in vast multitudes by birds. The greatly dreaded boll weevil is food for the plover, the killdeer and others of the feathered tribe.

It is a common experience to see birds following the plow and consuming grubs that are destructive to garden and other valuable plants. These friends of the planter should in every state be protected by rigid legislation.

ROASTED ALIVE.

Agnes Kone, a farmer's wife, at Gortschach, in Carniola, Hungary, recently committed suicide in an appalling way. She was the recognized beauty of the district, lived very happily with her husband and four children, and was known as an extremely devoted Roman Catholic. The other day, on returning from church, where she had received the communion, she sent her children and the servant to her husband, who was engaged in field work. Then she kindled a big fire in the oven, lighted six candles and put them on this improvised altar, undressed, and crept into the red-hot oven, where the husband and children found her charred body. From a note she left it was found that she had roasted [illegible] frenzied desire to die like the martyrs at the stake.

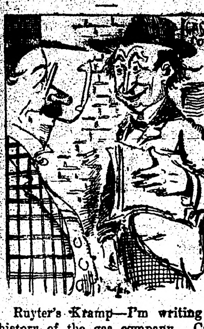
FEARED LIVING BURIAL.

A weird incident occurred lately in the cemetery of Pausa, a village in Saxony. The clergyman of the parish was preaching a funeral sermon at the grave of a seven-year-old girl when he astonished the mourners by asserting that he had dreamt that the girl was not really dead. The clergyman called upon the pall-bearers to open the coffin, and although they at first declined finally yielded. The clergyman approached the corpse, but after waiting in vain for the body to show signs of life, allowed the coffin to be lowered into the grave.

CARDINALATE REDUCED.

The Catholic college of cardinals has now the smallest membership recorded in centuries, and the smallest proportion of Italians ever known. The traditional membership is 70 and by the recent death of Cardinal Cavicchioni it is reduced to 49. It is three and a half years since any cardinals have been created, and it is likely to be a year before a consistory is called, whereat alone new cardinals are proclaimed.

GOOD TITLE



Ruyter's Kramp—I'm writing a history of the gas company. Can you suggest a suitable title?

Henry Wise—Yes; "The Charge of the Light Brigade."

LET'S GET TOGETHER!

The Commercial Club of Holt invites the Public generally to come and take part in the Big Market Day

SATURDAY, OCTOBER 14

Numerous Bargains will be offered by our merchants in their respective lines. Special Premiums will be awarded for the family coming the greatest distance and for the largest family in attendance. Other prizes for other items.

GOVERNOR A. O. EBERHART, STATE AUDITOR S. G. IVERSON, JULIUS A. SCHMAHL, SEC. of STATE, and HON. HALVOR STEENERSON, Member of Congress, will be here and on the program. Come and meet them.

There will be races in the afternoon and a dance at the M. W. A hall in the evening.

Watch for bills giving further details for the day.

Come! The Visit will bring you Pleasure and Profit

Something New In Kitchen Ware

The "1892" Pure Spun Aluminum Ware is rapidly coming into use for cooking purposes. It is taking the place of agate and enamel ware because while its first cost is a trifle more than ordinary ware, it is really much cheaper in the long run, as it is guaranteed for twenty-five years and will last practically a life-time.

The genuine "1892" Ware, made only from pure SPUN (not cast) Aluminum, will not crack, scale, peel, break, scorch or burn.

It looks like silver but weighs only about one-quarter as much, is easily cleaned and handled, and will not rust, corrode or tarnish. Absolutely pure, non-poisonous and wholesome; saves money, time and doctor's bills.

Be sure you get the original and genuine ware stamped with the Maltese Cross. At your dealers.

Bring us the news.

When in town call at this office and let's get acquainted.

Arno Bornstine made a business trip to Greenbush last Friday.

Wanted—Pure bred Brown Leghorn cockerel. Apply at this office.

Herman Rox was from Thief River Falls and visited here between trains on Tuesday.

Miss Olga Reierson went to Thief River Falls on Monday for a visit with relatives and friends.

Elef Sorter returned on Wednesday from Dakota where he has been for several weeks working.

Mrs. Sigurd Rice returned home to Plummer on Monday after a pleasant visit at the Gunder Sorter home.

Miss Elsie Adolph came up from Thief River Falls the first of the week for a visit at the Steinhauer home south of town.

Fresh Cow For Sale—One good milk cow, will be fresh early in November. Want to sell at once. —August Carlson, sec. 11, Holt twp.

Services will be held next Sunday at Olaf Dahl's place, east of Mud Lake, by Rev. M. B. Ordahl at 2 o'clock P. M. All are invited to attend.

M. A. NELSON, M. D.

Physician and Surgeon

Office over Holt Merc. Co's store

HOLT, MINNESOTA.

Miss Esthtr Mickelson left for Thief River Falls on Monday and will attend school there during the winter months.

Hay For Sale—Ten tons timothy and clover and about 40 fons of wild hay, all first-class. August Carlson, section 11, Holt township.

Olaus Rodahl returned to his work at Caledonia, N. D.; Monday after a visit with his family on their homestead in East Valley township.

Enamelled kitchenware at Kolden's. Triple coated, white lined and the best bargains you ever knew, 10 and 69 cents only, while they last.

Anton Engebretson, Melvin Hatleli and Nels Anderson came up from Fertile on Monday to make a visit with Nels Gudvangen at his home in Agder township.

Rev. M. B. Ordahl went to Crookston on Tuesday to attend the special Conference of the Wild Rice district of the Synod church. The Conference will be finished on Saturday.

Miss Anna Carlson came up from Crookston on Tuesday and drove out to the Peter Benson home west of here where she will spend a few days as the guest of Miss Mary Benson.

Ernie Pechie, of Mud Lake township, returned Monday from North Dakota where he has been working during the threshing season. He was accompanied by Barney Grabanski, of Ardoch, N. D., who came along for a short visit.

Tom Moran, who has been looking after section 7, on the Great Northern railway here, returned to Thief River Falls on Tuesday. He is succeeded here by Joseph Perry, of Crookston, who will be foreman on that section in the future.

Fred Nagel and mother came up from Blakely, Minn., Wednesday and are guests at the home of C. Schwartz. Mr. Nagel has recently filed on a fine homestead in section 1, of Agder township, and expects to commence building on it in the near future.

C. J. Hoffman, rural carrier on route 2 from Thief River Falls, has been filling in his spare time recently hauling in grain here from his home in Excel township. He reports a very good crop this year and is not kicking any about the prices.

Triple coated enamelled kitchen ware at only 10 cents per piece is a bargain that you never had before. S. S. Kolden & Co.

Mr. and Mrs. Wm. R. Boyd, of Devils Lake, N. D., are here visititing this week with Mrs. Boyd's parents, Mr. and Mrs. J. J. Offerdahl.

John Engstrom and wife, Gunder Sorter and wife and Mrs. Sigurd Rice spent Sunday picking cranberries in the tamarac swamps north of Mud Lake. They enjoyed themselves immensely and succeeded in finding a good supply of berries.

Erick Blomberg, aged 24 years, died on Friday morning last at his home near Strip. He made his home with his brothers and sister and was very popular among the people generally. His death was caused by consumption which has had him in its grip for over a yeer.

A Ladies Aid Society was organized at Mud Lake last week at a meeting held at Ole B. Johnson's place. There are seven members as a starter and the officers are: Mrs. John Knudson, president; Mrs. A. C. Jahr, vice-president; Mrs. M. B. Ordahl, secretary, and Mrs. Karen Knudson, treasurer.

C. B. Perry and J. H. Willey, both of Pocahontas county, Ia., were here on Monday to look over some land which they may decide to purchase for younger members of their respective families. They were interested callers at the Northern Light office where they were greatly pleased with fine display of farm products.

Bernard Jacobson, who lives a short distance south of here is one of the busy men of this part of the county just at the present as he is hustling to get through with a pretty big job of plowing. Mr. Jacobson is in his eightieth year, but is as lively as he was twenty years ago and can do more work yet than most of the yonuger men.

John Udstrand was in Friday last from his place in section 18 of East Valley, to do some shopping. He reports that he is very busy with his plowing but that the work runs along very nicely owing to his having bought a new 3-horse sulky plow from S. S. Kolden which he says is doing perfect work without being hard on his horses.

Monster Early Rose Potatoes

Come in and look at them.

We refer to some fine Early Rose potatoes which Ole Reierson brought to our office on Wednesday. There are eight potatoes in the bunch, and their combined weight is 15 1-2 lbs; the largest single one weighing two lbs. nine ounces. Last spring Mr. Reierson sent to a Minneapolis seed house for 2 1-2 bushels of pure Early Rose potatoes, which he cut up and used for seed. They yielded him 75 bushels of splendid potatoes. If the rest of them are any where near as nice as those we received, we believe that they cannot be beaten in Marshall county.

Fatal Accident at Vega

Oscar Monberg was accidntall killed over at Vega on Monday of last week while running the threshing engine belonging to Monberg brothers. The rig was being moved and in crossing a bridge the timbers gave way. The rear end of the engine and the front of the separator came together with a crash and went down with the bridge and Oscar Monberg firmly wedged between the engine and the bridge timbers. An ax had to be used to cut the timbers before the unfortunate man could be removed. He was taken to the Warren hospital where an operation was performed removing fragments of broken bone from his brain, but he died within a short time. He was 35 years of age and very highly respected in the community.

Congressman is Coming

Congressman Steenerson will be here to take part in the Market Day program on the 14th inst. In responce to an invitation sent by the secretary of the Commercial Club the Congressman writes that he will be pleased to accept the invitation and will arrive on the morning train Friday and remain until the afternoon train Saturday. Congressman Steenerson may properly be called responsible for the great Mud Lake drainage work, and his visit here should bring every resident of the Mud Lake district in to meet him.

Mr. and Mrs B. L. Backe, Miss Mortenson and P. L. Anderson formed a party and drove to Thief River Falls Monday to attend the theatre.

Dr. I. M. Roadman, of Onamia, Minn., was a visitor here on Wednesday to look over some land in East Valley which he bought this summer.

We want more subscribers and will take potatoes, chickens, or wood at current market prices on subscription. Of course we prefer the money, but if you haven't the cash bring on the produce. Dont be without your home paper anyway.

Our specials in triple coated white lined, enamelled kitchen ware at 10 and 69 cents are really wonderful values. We have quite a lot on hands and, while they last, we will sell them at these prices. You may never get these goods at such low prices again, so call and get what you want while they last. S. S. Kolden & Co.

The moving picture show given at the Woodman hall here last Friday evening by Messrs Clark and Carr, of Middle River, proved to be a delightful surprise for those who attended. The machine seems to be about perfect and the show put up was good enough for any good-sized city. It is to be regretted that the hall is not larger for it is a certainty that it will be filled to overflowing if the boys decide to come again, which we hope they will.

Farms Wanted.

I have prospective buyers for a few good improved farms; also for 960 acres of wild land. All must be in eastern Marshall county.

Chas. W. Latta, Holt, Minn.

THE REASON.

"Somehow, the colors in that marine view don't seem to mix properly."

"That's because the artist painted a water scene with oil colors."

R. L. Olson's big Auction Sale will be on Friday, the 20th. Half a mile southwest of Holt.

MARKET DAY SALE!

This Market Day at Holt, to be held October 14, will be the biggest day in its history. We will also have the Biggest Sale ever held in this community on that day.

We are not mentioning any articles specially, as everything in our store will be offered that day at Greatly Reduced Prices. Remember also, that Everything in our Stock is NEW, the verv Latest, Up-to-date goods, so when you buy here you are not getting goods that have been lying on the shelf for 10 or 15 years.

For Market Day we will Give the Following SPECIAL PREMIUMS:

To the peran buying the most good in our store for cash we will give in merchandise $5

To the person buying the second largest amount for cash we will give, merchandise $3

To the lady bringing us the greatest number of eggs in trade; a lamp valued at . . $2

To the man with the biggest feet who buy goods in our store that day the Gotzian Shoe Co. will give a pair of No. 13 shoes valued at $5.00

To the boy under 15 years receiving the larget number of votes we will give a Boy Scout Sweater (Lindeke-Warner Co.) $1.75

To the girl under 15 receiving the largest number of votes we will give a Silk Scarf valued at $1.75

In the voting contests each customer will be given 100 votes for $1.00 purchase in cash, and 50 votes for each $1.00 worth of eggs and butter taken in trade. Eggs and butter taken in trade will count as Cash Purchases for all other prizes.

The Ladies Aid of the Holt Synod Church will serve dinner, "Rummegrot," at our store on Market Day; Price 25 cents. Don't miss this Dinner.

Holt Mercantile Co.,

"The Big New Store."

Forest Working Plans

By W. K. WILDES, M.F.

COPYRIGHT BY FIELD AND STREAM

ANY disposition on the part of the owners either of forested tracts or areas suitable for reforestation must, in the large majority of instances, be prompted by the expectation of financial gain. A few cases where this does not hold, embrace land owned by the state, water companies in a few instances, clubs and a small number of individuals. To this latter group of owners, the income from their holdings is not as important as the purpose to which a well-forested and properly managed area will be put, whether it be for its utility or aesthetic value. The large majority includes lumbermen, and owners of smaller areas, who have made their investment upon a strictly business basis, and who expect a suitable return from the same. If the forester can show the possibility of such a return, and at the same time provide for the preservation and improvement of the stand, he then advances the practical side of the practice of his art.

He may be dealing either with a large area, involving many conditions as to topography, character of timber, rate of growth, etc., necessitating different methods of cutting to obtain desirable reproduction, a future supply of stock, protection from windfall and fire, or, he may have simply a wood lot problem to solve. In either case, it is the results that owners are looking for, and not an opportunity to invest their time and money for the advancement of forestry for its own sake. It is here that the forester has an opportunity to show that his work and its results are eminently practical, that a desirable return is possible; both immediate from the sale of the product, and remote from the increased and accumulating growth, as well as the improvement of the quality of the timber, together with the growing and the reproductive capacity of the soil.

SEEDING CUT IN A MAPLE STAND

PASTURE LAND PLANTED IN WHITE PINE

A FINE EXAMPLE OF NATURAL REPRODUCTION

NATURAL WHITE PINE REPRODUCTION, EIGHT YEARS OLD

In a planting proposition, the return is necessarily remote. If, however, it can be shown that an area, now producing 1 per cent., for example, is capable of returning 3 per cent. per annum, compound interest, at the final harvest in 40 years, after deducting with interest, the initial cost of stock and planting, together with taxes and fire protection for the full period, is it not good business policy for many owners, whether individual or company, to make such an investment? It will be argued that only owners that are able to hold an area permanently will care to wait 40 years for a return, and that very few individuals would consent to an investment in which the returns are deferred for so long a time. This is true in almost all cases. There are, however, conditions which make such an investment desirable. It is not at all uncommon for plantations to be made, protected, and allowed to mature, in order that the returns may be enjoyed by the next generation of a family, or have them take the place of a life insurance policy.

In practicing forestry, it must be realized at the outset that an investment either of money or marketable material left standing is necessary. The former includes the extra cost of marking the timber to be removed, care in protection of the young growth, fire protection, including piling coniferous tops and patrol, and a slight increase in the cost of logging per thousand feet, as the larger the amount of timber removed from a given area the less is the cost per unit. Unless a clear cutting system is employed, some marketable material must be left on the area cut over both for seeding and in some cases for protecting the seed trees from windfall. This comes under the latter form of investment—namely, merchantable material. In return for this investment of merchantable material, the condition of the forest is improved. Instead of removing all of the valuable species and leaving the area to reproduce the undesirable and less valuable, the reproduction of desirable species is provided for, and the future value of the area increased.

For the successful operation of a working plan and the possibility of carrying it out for the full period specified, it is necessary for the forester and owner to meet on common ground. First of all, the forester must get the point of view of the owner, and arrive at a full understanding of his wishes and plans. This means that he cannot always provide for or obtain the results that may be most desirable from a scientific point of view. Many thoroughly desirable silvicultural operations must be ignored, for example, an improvement thinning may be scientifically necessary, but if there is no market for the material, and the owner does not wish to bear the expense, the operation must be delayed until the material reaches a marketable size. The first thing, then, is for the forester to meet the owner's wishes, making such scientific sacrifices as are necessary, and not making the plan as he, himself, would prefer.

He then should make a thorough study of the markets of the region and plan his cuttings accordingly. Different localities vary in their ability to absorb a wide range and class of material. Cord wood may have no value, or it may be worth 25 cents or $1 a cord on the stump, and so on up through the higher class of forest products. Failure to understand these conditions thoroughly, and the demands of a region, may mean the financial failure of a plan. Oftentimes these local conditions preclude the possibility of certain provisions highly desirable from a technical standpoint, but which for practical reasons are impossible. In other words, the practical must be given full consideration along with the technical.

With complete co-operation between forester and owner, and a disposition on the part of both to make the necessary sacrifices, together with an understanding on the part of the former of the really practical side of the problem, there should be less and less cause for the abandonment of the provisions of working plans made for definite periods.

The first working plan in Vermont under the state forest service, was made by the writer while engaged as assistant to the state forester. The area treated is ownd by Dr. William Stanford Stevens of Albans, Vermont, and is located at Enosburg, in the same state. An outline of the work and its provisions follow.

The area involved embraces 900 acres, divided as follows:

Woodland, 360 acres; pasture land, 344 acres; meadow, 196 acres.

The conditions that led the owner to consider the possibilities of forestry were these: The area had been maintained under a more or less diversified system of farm management, and as the owner did not live on or near the property, he wished to be relieved of the care and attention that such an arrangement involved.

To accomplish this purpose it seemed best to bring the three classes of land under a definite and permanent system of management through the provisions and maintenance of a forest working plan.

The provisions follow:

1. To complete the treatment of the whole tract at the end of ten years.
2. All woodland to be treated is divided into ten equal areas, one to be thinned in the fall and winter of each year.
3. All pasture land is divided into ten equal areas, one to be planted in the spring of each year.
4. All meadow land will be maintained as such.
5. For each wooded area, the kind of thinning to employ is stated; also a rough estimate, together with net value, of the amount to come out.
6. For each area to be planted, the species are selected and the number necessary given, together with the total cost of the work.

The woodland is mixed, hardwoods consisting of sugar maple, yellow birch, beech, and a small percentage of ash, basswood, poplar, ironwood, cherry and elm, with young hemlock and spruce reproduction well established on a few sections. Sugar maple reproduction is especially good, and with ash and basswood is particularly desirable.

In treating this area either reproduction or improvement thinnings were prescribed, removing all undesirable and over-mature species and such mature species as seemed best for the requirements of the area. Thus only desirable species were left to reproduce as well as to become more valuable through increased growth.

In carrying out the field work for this plan, the area was first surveyed both by boundaries and types of land. It was necessary to ascertain the area of each, with the exception of meadow land, in order that the total could be divided into ten equal parts for annual treatment. Upon each wooded section the total stand of material was estimated, both in board feet and cords, the system of management and the character of thinning necessary was prescribed, and the material to come out the first year marked. Where a reproduction cutting was recommended, provisions for keeping out grazing were made.

Upon each section of pasture land the necessary planting and species were determined, together with the fencing required to prevent grazing and killing young planted material.

In the office, a map was prepared showing each class of land together with the specified area to be thinned or planted each year. For example, 1910-1911-1912, etc., denote the year in which the area is to be cut, which I, 1b, 1c; II, III, etc., denote the area and order of planting; I to be planted in 1910, II in 1911, etc.

In the written plan a complete statement of the treatment of each section, both cutting and planting, is given for each year. For example:

1910.

Woodland. 22 acres will be thinned, 1a being clear cut for planting.

Planting. 32.41 A will be planted with white pine, namely 1b, c, d and e. 1a is not to be treated; 1d has been staked out. The other acres have definite boundaries. On this area there is sufficient cord wood available to make its removal profitable.

1911.

Woodland. 20 acres will be thinned. Of this area 7.8 acres in the lot by the sugar-house have been marked for a reproduction cutting. Tract Vb will be clear cut for planting.

Planting. Tract II. 37.36 A will be planted with white pine. All apple trees, brakes and hard hack are to be removed.

OUTLINE FOR CUTTING.

Years.	Board. Feet.	Sale Price $3.50 per M.	Cords.	Sale Price $ .30 per M.	Total.
1910....	30,000	$105.00	130	$39.00	$144.00
1911....	22,000	77.00	240	72.00	149.00

OUTLINE FOR PLANTING.

Year.	Block.	Area, Acres.	Species.	Number.
1910.....	1 b	10.56	White pine	12,000
	1 c	2.38	White pine	2,400
	1 d	17.24	White pine	17,240
	1 e	2.24	White pine	2,688
		32.42		34,328
1911.....	II	37.36	White pine	37,260

(The acreage of woodland to be treated is cut down from the total 360 by the fact that about 150 acres was being cut over under a contract made previous to the adoption of this plan. It accounts for only 22 and 20 acres coming under management for the years given above, which is, of course, not one-tenth of the total area of woodland.)

It is estimated that the total receipts from the cutting, including the tract being cut under contract above mentioned, will pay the complete cost of planting and seedlings.

The plan just outlined means that at the end of the ten-year period the owner will have his woodland under a good system of forest management, and greatly improved over its present condition, together with 344 acres planted to Norway spruce and white pine, the cost of which being met as before stated by the returns from the area itself. The returns from thinnings which will be made on each section in the period from 1935 to 1945, making each section thinned 25 years old, will give a considerable return. At this time about 400 trees per acre will be removed. From 1950 to 1960 the area will be clear cut by sections and replanted. The total yield from this cutting should be at least 30,000 board feet per acre. The plan also provides for proper fire protection, which is absolutely necessary for the successful maturing of a plantation. It also states the conditions which any contractor must meet who makes the cuttings during the next ten years. These conditions follow:

1. All trees to come out are blazed and stamped with the letter "V."
2. The contractor must take all marked and leave all unmarked trees.
3. Care in felling must be taken in order that young growth and reproduction will not be injured.
4. All sound logs 6 inches at the small end and over are to go into lumber.
5. Sound down timber and tops of felled trees are to be cut into cord wood.
6. Care must be taken in skidding logs not to injure standing trees and reproduction.
7. The contractor will be liable to a penalty of twice the value of any tree that is cut not bearing the official stamp.
8. All work is subject to inspection.

The state forester also agrees to mark the trees to cut each year.

While the owner himself will not enjoy this return, the plan offers an example of the instance cited previously by which an individual is willing to make a long-time investment in order to make it possible for the next generation in his family to enjoy the results.

A REMARKABLE CURE FOR DYSPEPSIA

Munyon's Stomach Treatment Performing Miracles.

MUNYON TELLS YOU HOW TO GET WELL FREE OF CHARGE

"A few days ago I received a letter from a young man, who states he is 28 years of age, and has occupied several important positions, but owing to indigestion and inability to sleep he has been unable to concentrate his mind upon his work and has consequently been discharged on the ground of neglect of duty. He goes on to say that he is a young man of steady habits, but for years he has suffered from dyspepsia, which has so affected his nerves that he is unable to sleep, and that it is not neglect upon his part, nor lack of interest in the business, but simply physical weakness. He asks my advice in this matter.

"For the benefit of a large number of those similarly situated I propose to answer this letter publicly, hoping that it may be the means of helping many who may be affected in this way.

"In the first place, the stomach must be made well before the nerves can be made strong. The nerves must be made strong before one can sleep well. No one is capable of doing his best who is in any way troubled with insomnia or any form of nervousness. The greatest generals have been men of iron nerve and indomitable will. They have had perfect digestion, being able to eat well, and digest all they ate.

"It is said that Napoleon lost the battle of Waterloo because of a fit of indigestion. Grant's enormous reserve power was due to a well stomach. Abraham Lincoln said that 'he did not know that he had a stomach.' Grover Cleveland, it is said, could work 18 hours a day, eat a hearty meal at 2 or 3 o'clock in the morning, go to bed and sleep soundly until 9 o'clock and get up refreshed, ready for a new day's work.

"Pres. Taft is another type of healthy manhood. Who thinks for one moment that he would be the President of the United States today had he been a dyspeptic or affected with some nervous ailment? I claim that two-thirds of all the failures in professional and business life are due to weak and deranged stomachs.

"No business house would care to employ a dyspeptic representative to sell goods for them on the road. One-half the men who stand behind counters today, earning from $12 to $15 a week, will never get beyond these figures, for the reason that they are physically weak. They lack the nerve power and commanding strength that come from a good, sound stomach.

"No one cares to hear a dyspeptic preacher. No matter how pious he may be, he is bound to reflect his bilious and jaundiced condition. He will unconsciously inoculate his hearers with his melancholy feelings.

"No one would think of entrusting an important legal case in the hands of a dyspeptic lawyer, any more than he would care to entrust his own life, or that of a dear one, in the hands of a physician who is nervous, irritable or a dyspeptic. Men must have good digestion, strong nerves and vital manhood in order to render a clean, clear-cut decision either in medicine, law or business.

"I believe that more than half of the divorces can be traced to ill health. I want every dyspeptic to try my stomach treatment, for it corrects nearly all forms of indigestion and nervousness. It makes old stomachs almost as good as new. Its marvelous power for digesting food and getting the best out of it makes for good rich, red blood. This, in turn, strengthens the nerves, builds up the general system, and will surely prolong life and make it a pleasure to live and do the things allotted to us."

Professor Munyon makes no charge for consultation or medical advice; not a penny to pay. Address Prof. J. M. Munyon, Munyon's Laboratories, Fifty-third and Jefferson streets, Philadelphia, Pa.

Learned From Nature.

An enthusiastic friend was dilating to the woman landscape gardener on the obvious advantages she must derive from actually superintending the workmen who executed her designs.

"Being right out with nature that way you must learn so many interesting things," said the friend.

"I do," said the gardener, "I can tell the different kinds of whisky, the different kinds of tobacco and the different kinds of profanity a rod away."

But many a college graduate avoids the disgrace of dying rich.

Keeping Busy.

We are told that at New York's coming municipal budget exhibit bells will be rung and lights flashed to show a birth every four minutes, a death every seven minutes and a marriage every eleven minutes.

Just what sort of demonstration is made every time a cafe bottle pops, or a bellboy is tipped, we are not told.

It's human nature, but bad medicine, to buck about the walk up hill after we've enjoyed a good long slide down!

Cement Talk No. 8

The appearance of any place can be greatly improved by using *concrete* wherever possible. If you have a nice home, whether in the city or in the country, you can add greatly to its attractiveness by building not only the sidewalks, but the steps, curbs, fence-posts, cisterns, foundations, driveways, cellars and so on, of *concrete*. Build of *concrete* and use UNIVERSAL Portland Cement. *Concrete* is cheap, easy to use, clean, fire, rat and rot proof. *Concrete* is the simplest building material and the most durable. You need only UNIVERSAL cement, sand, gravel or crushed stone. But remember to use UNIVERSAL—it is the best *cement*. It is always of uniform color and great strength. Ask your dealer for it.

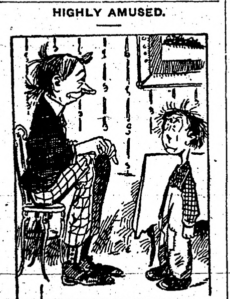
HIGHLY AMUSED.



Hiram Greene—What did your sister say when you told her I was going to make a speech in the town hall tonight?

Willie—She didn't say nothin'; she just laughed until she had hysterics.

Lesson in Good Manners.

When the "Boy Scouts" movement was at its height, three of the youngsters journeyed from Baltimore to Washington to be introduced to the president. When Mr. Taft shook hands with them, one of the little fellows stuck out his left hand.

"Why do you give me your left hand?" asked the president.

"That's the way us Boy Scouts shake hands," said the boy, with pride.

[illegible] commented Mr. Taft, dryly, "the sooner us Boy Scouts learn better the nicer us Boy Scouts will be."—The Twice-a-Month Popular Magazine.

Failed to Scare Tim.

A plan was formed to scare a certain Tim Casey, living in a village near Belfast, on his returning from market by night past the churchyard. As he went by, the usual turnip, white sheet, and lanthorn of the conventional ghost were submitted to his gaze, with the customary weird howls. Tim, however, simply looked fixedly at the apparition for a moment and remarked: "Arrah, now, and is it a general resurrection, or are ye just taking a walk by yerself?"

Not a Bit.

"In getting married Mr. Sothern and Miss Marlowe showed very little consideration for the public."

"Why so?"

"There's no fun in watching a man and his wife play 'Romeo and Juliet.'"

SOUND SLEEP
Can Easily Be Secured.

"Up to 2 years ago," a woman writes, "I was in the habit of using both tea and coffee regularly.

"I found that my health was beginning to fail, strange nervous attacks would come suddenly upon me, making me tremble so excessively that I could not do my work while they lasted; my sleep left me and I passed long nights in restless discomfort. I was filled with a nervous dread as to the future.

"A friend suggested that possibly tea and coffee were to blame, and I decided to give them up, and in casting about for a hot table beverage, which I felt was an absolute necessity, I was led by good fortune to try Postum.

"For more than a year I have used it three times a day and expect, so much good has it done me, to continue its use during the rest of my life.

"Soon after beginning the use of Postum, I found, to my surprise, that, instead of tossing on a sleepless bed through the long, dreary night, I dropped into a sound, dreamless sleep the moment my head touched the pillow.

"Then I suddenly realized that all my nervousness had left me, and my appetite, which had fallen off before, had all at once been restored so that I ate my food with a keen relish.

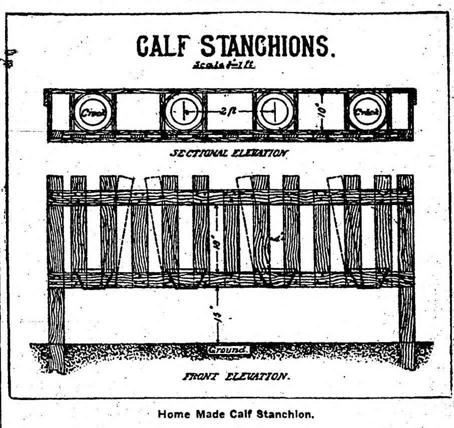
"All the nervous dread has gone. I walk a mile and a half each way to my work every day and enjoy it. I find an interest in everything that goes on about me that makes life a pleasure. All this I owe to leaving off tea and coffee and the use of Postum, for I have taken no medicine." Name given by Postum Co., Battle Creek, Mich.

"There's a reason," and it is explained in the little book, "The Road to Wellville," in pkgs.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

DEVELOPMENT OF CALVES BY HAND FEEDING IS PROFITABLE

One of Most Desirable Conveniences in Connection With This Work is Handy Stanchion Shown in Illustration Herewith—Built Into the Fence Surrounding the Pasture.



Home Made Calf Stanchion.

There is money in calves raised by hand. If one is equipped for it or will equip himself, it is believed to be more profitable in every way to raise calves by hand than to let them run with the dams. This has been demonstrated over and over, but because of the slightly additional amount of work necessary it is not practiced so often as would really be profitable, says the Kansas Farmer. There are many cases, of course, where emergencies demand that the calf be raised by hand. There are more cases where this could be done profitably if it were undertaken in the right way.

One of the conveniences which is desirable in the development of calves by hand feeding is the stanchion shown in the accompanying cut. It does not require long to train the calves so that they will go of their own accord to their proper places and the stanchion is so easily and so cheaply built that it does not pay to do without it.

As shown in the cut, it is intended to be built into and as a part of the fence surrounding the calf pasture. The materials necessary are some 2 by 4s for the frame work, and some barrel staves for the upright pieces which enclose the calves' heads. These barrel staves are placed in such a manner that one of them which fits about the calf's neck is movable at the upper end. The lower end is held in place by a 20-penny nail driven through the center of the stave so that it may act as a hinge and allow the upper end to move freely for the insertion and removal of the calf's head.

On the outside of the stanchion, which is a part of the calf's pasture fence, is placed a rack as shown in the lower part of the engraving, which is intended to hold ordinary milk crocks for feeding the calves. In these crocks can be placed the skimmilk for the calves and with it any grain ration that may be desirable to give them. The particular stanchion from which this picture was taken was owned by a man who had great faith in Kaffir corn as a grain ration for his calves. His custom was to place the feed of Kaffir corn in the crock with the milk, and let the calves do the rest. These crocks are easily emptied and easily cleaned, while the calves are not using them they can be left in place for the sunshine to purify and cleanse.

The estimated cost of this calf stanchion where all materials must be purchased, is about $2.50. This provides for a stanchion large enough to accommodate six calves, though the cut shows provision for only four. Of course, the stanchion can be made as long or as short as may be desired and on most farms the material necessary is already at hand. In such cases the cost would be nothing more than the labor of construction. The drawing is so clearly made that perhaps no further details are necessary about the method of building, and any man who is handy with tools can construct this stanchion in a very short time and have it in operation.

The results of experimental work in calf feeding at the Kansas experiment station have been published in the form of bulletins, and may be had by addressing that institution.

Feed for Milk.

To get the milk it is necessary to stuff the cows. Find out what is best for them, then stuff them with feed.

TRUE FRIEND OF GARDENER

Toad Consumes Angle Worms, Snails, Sowbugs, Spiders, Ants and Various Caterpillars.

(By H. A. GOSSARD.)

The toad is a very valuable friend to the gardener. Toads live for several years and by preference remain on the same feeding grounds from year to year. About 98 per cent. of the toads' food consists of animal matter.

Among the forms regularly eaten are angle worms, snails, sowbugs, thousand-legged worms, spiders, ants, grasshoppers, crickets, cutworms, beetles and various caterpillars. From 60 to 80 per cent. of injurious insects and a small per cent. of beneficial insects go in with its customary ration.

The Garden Toad.

The stomach is filled and emptied about four times in each 24 hours. Upon the basis of stomach examinations, it has been estimated that during the 90 day period extending over May, June and July, a grown toad will consume 2,160 cutworms, 1,800 thousand-legged worms, 2,160 sowbugs, 3,240 ants, 360 weevils, and 360 ground beetles, the last being beneficial insects. The total sum therefore, for the 90 days is 360 beneficial insects and 9,720 injurious ones destroyed.

English and French gardeners appreciate the value of toads and as high as $25 per hundred is said to be often paid for them.

Owing to the dislike of the creatures for new and unfamiliar surroundings, it is advisable in many cases to provide a breeding pool for them in order that the young may establish themselves where they are wanted. A shallow pool of cement, having a small but constant water supply is sufficient. Stagnant water is better than running water from the standpoint of the toad raiser.

The young toads will leave the water by midsummer or before mosquitoes become abundant, and the pool should then be drained to prevent mosquito breeding. A small indoor acquarium protected from mosquitoes by screens, may prove more satisfactory than an outdoor pool. Supply with fresh water plants and clams, and feed the toads with bits of dog biscuit or chopped fresh meat as needed. Do not feed more of any food than the toads and tadpoles will consume, or the water will become contaminated. The outdoor pool can be screened against mosquitoes, if desired, provided the toads are fed. For garden shelters, make shallow holes in the ground and cover with flat stones or boards. The toads will retire into these in the daytime and come forth at dusk for their nightly forays.

Toads are especially valuable to greenhouse men, keeping down slugs, snails, sow bugs, plant lice and such destructive insects.

Government Hog Tonic.

The United States department of agriculture recommends the following mixture as an excellent hog tonic:

"Wood charcoal one pound, sulphur sodium bicarbonate two pounds, sodium hyposulphate two pounds, sodium sulphate one pound, antimony sulphide one pound." These substances are thoroughly powdered and mixed. A dose is a large tablespoonful for each 200 pounds of hog flesh. It is most conveniently given in a thin slop.

Mule Fifty-Two Years Old.

The oldest mule in Tennessee is owned by Robert Mitchell, near Camden. The mule is 52 years old and still does a little work. He helped to pull the first steam flouring mill into the country 40 years ago.

Stops a Cough Quickly --Even Whooping Cough

A Whole Pint of the Quickest, Surest Cough Remedy for 50c—Money Refunded If It Fails.

If you have an obstinate, deep-seated cough, which refuses to be cured, get a 50-cent bottle of Pinex, mix it with home-made sugar syrup and start taking it. Inside of 24 hours your cough will be gone, or very nearly so. Even whooping-cough is quickly conquered in this way.

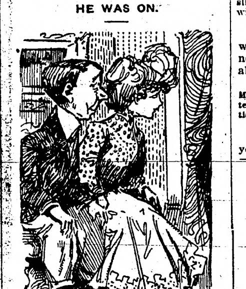
A 50-cent bottle of Pinex, when mixed with home-made sugar syrup, gives you a pint—a family supply—of the finest cough remedy that money could buy, at a clear saving of $2. Very easy to prepare—full directions in package.

Pinex soothes and heals the inflamed membranes with remarkable rapidity. It stimulates the appetite, is slightly laxative, and has a pleasant taste—children take it willingly. Splendid for croup, asthma, bronchitis, throat tickle, chest pains, etc., and a thoroughly successful remedy for incipient lung troubles.

Pinex is a special and highly concentrated compound of Norway White Pine extract, rich in guaiacol and other healing pine elements. It has often been imitated, though never successfully, for nothing else will produce the same results. Simply mix with sugar syrup or strained honey, in a pint bottle, and it is ready for use.

Anyone who tries Pinex will quickly understand why it is used in more homes in the U. S. and Canada than any other cough remedy. The genuine is guaranteed to give absolute satisfaction or money refunded. Certificate of guarantee is wrapped in each package. Your druggist has Pinex or will get it for you. If not, send to The Pinex Co., 238 Main St., Ft. Wayne, Ind.

HE WAS ON.



Grace (as clock strikes 12)—Gracious! Twelve o'clock. How the hours have flown.

Tom—Yes; and your father has helped 'em some, too. I've heard him tinkering with the clock in the library for the last ten minutes.

TOO MUCH FOR SMALL BRAIN

Big Word Meant an Effort, but This Little Girl Made Brave Attempt.

This incident occurred just after a Jewish holiday. It was in a third grade school in Cleveland in a district of Russian and Hungarian Jews.

The teacher was explaining the meaning of the word judicious. She asked the children to give her stories about the word.

After several had given illustrations about the judicious use of money, the teacher said:

"Now give me a story about something judicious, without money in it."

A little girl finally volunteered. She said:

"On our holiday we had roast goose and a whole lot of other Jew dishes."

WEAK, ILL AND MISERABLE.

How many people suffer from backache, headache and dizziness without realizing the cause? These symptoms of kidney trouble are too serious to neglect.

James C. Hardin, Weatherford, Texas, says: "My feet and limbs became numb and I had terrible pains through the small of my back. Kidney secretions caused untold annoyance by their frequency in passage and I began to think there was no hope for me. Doan's Kidney Pills cured me and I have not had the slightest trouble since."

"When Your Back is Lame, Remember the Name—DOAN'S."

For sale by druggists and general storekeepers everywhere. Price 50c. Foster-Milburn Co., Buffalo, N. Y.

A Truth Specialist.

"Biggins says he is for the plain truth."

"Yes," replied the frank philosopher; "but so many people think they are standing up for the truth when they are merely standing out for a difference of opinion."

Too Late.

"Hubby, I found a lock of hair among your old papers. I never gave it to you."

"You needn't worry. I don't remember who did."

Such Is Fate.

"Why do you rock that boat?" asked the wise man.

"Because, in case of accident," replied the fool, "I'm always saved."

There is a certain amount of lye in soap, but that is no reason why it should be injected into the advertisements.

Lawn Economics.

"I note," says the sage, "that you allow a sprinkler to spray water upon your lawn almost continuously."

"Yes," said the native. "We do that to make the grass grow."

"But the other day I saw a man pushing a clicker contrivance over the lawn, and—"

"Oh, yes; that was a lawn mower."

"And what is its purpose?"

"Why, it cuts the grass."

"Then why do you put water on it to make it grow if you simply cut it down as fast as it comes up?"—Judge.

DR. J. H. RINDLAUB (Specialist),
Eye, Ear, Nose and Throat
Fargo, N. D.

Nipped in the Bud.

"Until now I have never had to ask for a small loan."

"And until now I have never been obliged to refuse you."

Cole's Carbolisalve quickly relieves and cures burning, itching and torturing skin diseases. It instantly stops the pain of burns. Cures without scars. 25c and 50c by druggists. For free sample write to J. W. Cole & Co., Black River Falls, Wis.

Carelessly Gathered.

"What flowers of speech our new minister uses."

"Yes, cut flowers; they have little or no connection with the stem of his discourses."

Inflammatory Rheumatism may make you a cripple for life. Don't wait for inflammation to set in. When the first slight pains appear, drive the poison out with Hamlins Wizard Oil.

As long as there are people in the world who try to get something for nothing, a lot of other people will be able to live without work.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

Some neighbors don't like it unless you talk about them.

Don't Persecute Your Bowels

Cut out cathartics and purgatives. They are brutal, harsh, unnecessary. Try CARTER'S LITTLE LIVER PILLS

Purely vegetable. Act gently on the liver, eliminate bile, and soothe the delicate membrane of the bowel. Cure Constipation, Biliousness, Sick Headache and Indigestion, as millions know.

CARTER'S LITTLE LIVER PILLS.

SMALL PILL, SMALL DOSE, SMALL PRICE.

NOVELIST'S WIFE AS AN AVIATOR

© by Underwood & Underwood, N.Y.
MRS. HEWLETT MOUNTING HER MACHINE

ONE of the first of the English women to essay the delights and brave the dangers of the aeroplane was Mrs. Maurice Hewlett, wife of the well known novelist. She liked flying so much that she became an expert and finally established an aviation school at Brooklands, England. Many pupils are being initiated into the art of aviation by her, among them some women. The picture shows Mrs. Hewlett in the act of mounting her biplane preparatory to a flight.

TRAVELS IN AFRICA

Well-Known English Authoress Tells of Trip.

Miss Mary Gaunt Rode 700 Miles in Hammock Through Tropical Country Where White Woman Never Had Been Before.

London.—After traveling 1,600 miles—700 of them was in a hammock—through tropical Africa, a large portion of her journey being through country where no white woman has ever been before, Miss Mary Gaunt, the well known authoress, has returned to London to write a book of her experiences.

The other day she narrated some of her experiences. She is a pleasant looking, resolute lady.

"I have been all along the gold coast," she said, "from the western to the eastern borders. I also visited Togoland (the German territory) and Sunyani, in the northwest province of Ashanti, the back of beyond, where no other white woman has gone.

"Altogether, I have been away eight months. Now I want to go to Timbuctoo, but I must write my book first.

"In Ashanti I created quite a sensation. None of the natives had ever seen a white woman before.

"They turned out with guns and shot them off, and they beat deliciously upon tom-toms. Crowds came to look at me.

"They 'dashed' me (gave me) sheep and chickens and eggs—some of which were hoary with age—and even onions. That meant, of course, that I had to 'dash' them, which cost money.

"In all the time I was in tropical Africa I never felt the heat so much as I have done since I came home.

"Ninety-four degrees in the shade was the hottest my thermometer registered, but it was very humid, and everything rusts and rots, including one's clothes.

"On May 18 I lost my medicine chest, my boots, knives and forks, and nearly all I possessed.

"This happened on a 350-ton bar steamer in the mouth of the Volta river. The surf was so bad that it smashed the bulwarks, the boats, the cranes, the galley, and the water rose in the engine room flush with the fires. We thought we were going down. The waves were mountainous.

"I was the only passenger, and a woman, too, so I did not say I was frightened. I said to the captain:

"'It is magnificent, isn't it?'

"'Magnificent!' he said. 'Good gracious; we can't stand any more of it. We are going down!'

"All the blacks, crew and all, ran up on deck, crying and wailing. The engineer, a German, stuck to his post. He was groping about amongst scalding steam. He said:

"'I think it finish, but I may as well "go out" this way as another.'

"We came through all right, in the end, but his face was scalded. He saved us all.

"I traveled 700 miles in a hammock all over the gold coast, carried by men, four at a time.

"At Angomeda my carriers were afraid to go any further because of the danger from the Krobo Hill. The Krobos used to come down and catch men and sacrifice them to their blood fetish.

"At Angomeda I heard a leopard crying and I wanted to get on. We went on and found a bright, moonlit spot, where I thought we would camp, but they said: 'Oh, no; bad place,' and raced on.

"Close at hand was a gloomy eminence, which they said was the Krobo Hill. They clapped their hands and tried to make noises like a very large company.

"A black clerk riding by on a bicycle had disappeared there. The Krobos come down with pronged forks, with which they seize their victims by the neck and carry them up the hill to torture them.

"From there I went to Labolabo, scaled the steep Eveto mountains and got into the German colony, where the roads are very good. The English roads are not."

Umbrella for a Squirrel

Don't Like to Get Wet and Continuous Rains Force Little Animals to Make Use of Wits.

Tarrytown, N. Y.—Automobilists who drove down the Gorybrooke road reported that as they passed William Rockefeller's place they saw two gray squirrels crossing the road with umbrellas over their heads to protect them from the rain.

The story was laughed at when first told, but Irving Revere drove into town, bringing along a dead gray squirrel. Revere said the squirrel had been hit by a car and near by was a cabbage leaf. He said it explained why so many gardens had been ravaged of their large cabbage the last two weeks.

When the squirrels found a leaf large enough to cover their body they would bite a small hole in it, put their tail through and travel to and fro, protected in their cabbage-leaf cravenettes. Squirrels don't like to get wet, but it rained so long they were forced to use their wits to keep dry, with the above successful results.

Hungary's Maize Crop.

Budapest.—Hungary's maize crop for 1911, according to the estimate of county Adalbert Serenyi, Hungarian minister of agriculture, will be 30 per cent below that of 1910.

Is Wooed by Wireless

Indianapolis Business Man, in Love With French Girl, Carries on Courtship by Telegraph and Wins the Lass.

New York.—The wireless as an aid to bashful swains who cannot muster courage to tell their love in their sweethearts' presence stepped in to accomplish a marriage solemnized in New York the other day.

A French girl, Miss Marguerite Castaign, a daughter of Colonel Jean Castaign, was the heroine of the Jules Vernlike romance that the wedding disclosed. James Guy Haugh, an Indianapolis manufacturer, was the hero. The various scenes are laid in France and America and on three liners that crossed the Atlantic at various times this summer. And neither the cable, which runs far beneath the surface of the ocean, nor the ether above the water was without its share in conveying the messages of love which finally brought the two together.

Haugh met Mlle. Castaign on shipboard last June. He was attracted to the charming young woman, and she in her turn appeared to regard the American with favor. Arrived in France Haugh managed to make the acquaintance of Colonel Castaign, the young woman's father. He visited the Castaigns several times, and his acquaintance with the daughter grew.

The time came for his return to America, but he could not summon sufficient courage to ask the fateful question so soon after he had first met her. They parted. The time when he might return to France was indefinite.

Mr. Haugh, after a restless period, decided he could wait no longer. He approached the wireless operator of the vessel, and a few moments later a message for Miss Castaign was flashing into the ether from the masthead of the retreating steamship. It said, in the language of dots and dashes of the telegraph code:

"I love you. Will you marry me?"

After more restless days the liner reached New York. There was a cablegram waiting for Mr. Haugh.

"I certainly will," it said.

The cables between America and France hummed with other rapid-fire correspondence between the two. Mr. Haugh was unable to return to France to get his fiancee, and so she agreed to come to him. The other morning he met the French Line steamer La Bretagne, and Miss Castaign landed and that afternoon she became Mrs. Haugh.

Dumb Cured by Lightning.

New Orleans, La.—After being speechless two years, as a result of a long illness, Miss Jessie Fishel instantly recovered the other day when frightened by a vivid flash of lightning and a loud peal of thunder. Seventeen specialists in several cities had tried to restore her voice. Her father declares the recovery is the result of prayers offered constantly by the family. A big family celebration has been planned.

Fog Horns Roar Out Tunes

One Is to Be Set Up on the California Coast and Can Be Heard for Distance of 12 Miles.

San Francisco.—The time when a ship will be welcomed twelve miles out to sea by national airs, popular tunes and, perhaps, eventually phonographic records bellowed from gigantic fog horns, seems not far distant.

Pleased with the tuneful tooting of electric automobile horns, Lieut.-Com. William A. Moffatt, lighthouse inspector of the sixteenth district, made inquiries as to the possibility of making a similar horn for lighthouse service to replace the dismal blare of the fog horns now in use. He learned that one could be made which would be heard at the Farrallone islands, 23 miles out at sea. As a sample, however, he decided to order one with a 12-mile range. It will be installed immediately on Blunt's point, Angel island.

Cure for Hay Fever.

St. Louis.—Warren D. Feurst, a financier, has cured his hay fever by spending half an hour each day for two weeks in the beer cooler of a St. Louis Brewery. When the great annual sneeze came he didn't have time to go to a mountain resort, so he decided on the cold-storage treatment. There was such a rush that the brewery has put up a sign: "This is no sanitarium."

CHIP OFF OLD BLOCK

Young Gates Very Much Like His Father.

Has Already Shown the "Plunging Spirit" on a Small Scale—Some of His Escapades in the Field of Chance.

New York.—Like his late father, but necessarily on a smaller scale, Charles G. Gates has been known for several years as a spender. Now, with upward of $30,000,000 in his control, will he prove to be a spender to an extent proportionate to the reputation he has gained as an embryo, or as "the son of John W. Gates?"

Several transactions in which young Gates has figured and which may be regarded as significant are recalled here. While they perhaps no more than verge on the sensational, they disclose, it is pointed out, a character that in time may develop true "bet-you-a-million" proclivities.

It is recalled that in 1901 Charles Gates decided he wanted a seat on the New York stock exchange, and to get it wrote a check for $52,000, the record price paid for a seat up to that time.

On one occasion John W. Gates went to Texas on a shooting trip and left his son in charge of his Wall street brokerage office. One day the latter went out before the books closed on Colorado Fuel & Iron, borrowed about 10,000 shares and had it transferred into his own name. After the books closed he returned the certificates, but gave proxies on them to Mr. Harriman.

By a strange coincidence, George J. Gould owned all of this stock. He had planted it about Wall street to see what would happen to it. When Mr. Gould saw the clever move made by young Gates—for the Colorado Fuel war had just begun, and such moves counted—he let Harriman go ahead counting the stock until the next day, when young Gates was overwhelmed by having served on him legal papers by the numerous brokers from whom he had borrowed the stock, ordering him to send the proxies on it to them and telling him that if he attempted to vote it at the Denver meeting they would bring suit for damages. Gates had run head on into the law and had to back out.

Charles G. Gates.

When John W. Gates was in his prime he was a familiar figure and a heavy plunger at the race tracks. So was his son. The latter's best record of winnings was made at Los Angeles, when he took $28,000 from the Santa Anita bookmakers. Returning to the city on the last day of the meeting, young Gates much elated, paid $500 for a dog worth $50. He then gave it to the cashier of the Alexandria hotel. Next he procured a $50 puppy, but, meeting a young woman who liked the animal, pup No. 2 vanished in oblivion. Then the young plunger found a handsome bulldog and parted with $8,500, but kept the animal.

"Charlie" Gates has also taken occasional flings at roulette and faro and a fortune usually changed hands one way or the other. One night, after a banquet on Broadway, he fell in with Arnold Rothstein and William Shea, both notorious gamblers, and spent the night at their place of business. In the morning Rothstein accompanied the young plunger to his bank, where Rothstein cashed a check for $40,000 which Gates had written at daylight.

If the father was possessed of a whole-souled sense of humor, so is the son, and it has been amply evidenced several times. Again big sums were always involved, at least in the stories that found their way to the public print.

The following is a sample:

"Turn me a trick in the market, will you? I need the money badly."

This request came over the telephone to young Gates one morning. Mr. Gates immediately bought 200 shares of Louisville & Nashville. In less than an hour the stock had been sold at two points profit.

"I've got $400 for you," shouted Gates over the telephone. "How do you want it, cashier's check?"

The clerk, who thought Mr. Gates was joking, replied: "Oh, send it over in pennies."

Two strong porters were dispatched to the sub-treasury, 40,000 new pennies were procured and delivered to the amazed customer in a bushel basket.

For the Hostess

Decapitations.

A noted puzzle writer offered a prize for the best sentence constructed with the 26 letters of the alphabet. This carried off the reward:

Whoever guesses the 26 puzzles will find that the removed letters taken in regular order form a sentence which employs every letter but one, a feat never performed before.

1. Behead a word meaning young girl and leave a word meaning assistance.
2. Behead a word meaning a grate and leave a small serpent.
3. Behead forty and leave fifty.
4. Behead a kitchen utensil and leave a part of speech.
5. Behead a nut and leave a cereal.
6. Behead a fraud and leave warmth.
7. Behead a vegetable and leave a beverage.
8. Behead a synonym of beautiful and leave a necessity of life.
9. Behead anger and leave an arithmetical term.
10. Behead sin and leave a form of low temperature.
11. Behead a kind of wood and leave a physical condition.
12. Behead a term of affection and leave a part of the body.
13. Behead a sign and leave people.
14. Behead a geographical term and leave a numeral.
15. Behead a measure twice and leave practical skill.
16. Behead a musical term and leave a stream of water.
17. Behead a prison and leave a pain.
18. Behead one and leave a small egg.
19. Behead a cereal and leave something wet.
20. Behead something cold and leave present time.
21. Behead to listen and leave a kind of house.
22. Behead to cleanse and leave a tree.
23. Behead a word signifying fault and leave affliction.
24. Behead a word meaning faint and leave a wicked one.
25. Behead a boat and leave a tool.
26. Behead a word the opposite of careless and leave a necessity.

Answers—1, maid; 2, rasp; 3, XL; 4, pan; 5, acorn; 6, cheat; 7, kale; 8, fair; 9, irate; 10, vice; 11, ebony; 12, dear; 13, omen; 14, zone; 15, quart; 16, trill; 17, jail; 18, unit; 19, grain; 20, snow; 21, hark; 22, wash; 23, blame; 24, limp; 25, yawl; 26, neat. The sentence formed by the 26 decapitations is "Mr. X—. Pack five doz. qt. jugs. H. W. Blyn."

Automobile Contest.

Nearly every one is familiar with automobiles, but not every one knows the parts correctly, as a clever young hostess discovered when she propounded this contest, every question to be answered by naming a part of an "auto:"

1. What part of an automobile leads one to believe it is feminine?" (Hood.)
2. "What part of an automobile is eccentric?" (The crank.)
3. "One who courts?" (The sparker.)
4. "A part of a tree, a letter of the alphabet and part of a drama?" (Limousine.)
5. "Belongs to the fern family?" Break (brake.)
6. "An ancient city?" Tyre (tire.)
7. "A container?" (Tank.)
8. "What some people have in their heads?" (Wheels.)
9. "Found in an orchestra?" (Horn.)
10. "Found in congress?" (Seat.)

After this jolly little game, an automobile race was announced. The hostess passed funny masks and goggles to the players telling them that six makers had entered cars in the race (just six were to compete) that they could choose—then she read the list and explained that ten slips bearing each name had been pinned up over the house; each slip to be brought to the judge's stand, the one getting the ten slips in first would win. Such excitement and such fun. Try it.

Guessing Contests.

There is such an incessant demand for contests new and contests old that I have given much attention of late towards originating some new ones, making over old ones so as to give the readers a full department containing nothing but their favorite pastimes and at the same time have them so varied that they would be suitable for many special occasions. If anyone finds something good in this line that they do not remember having seen in our column it would be a kindly act to send it to me, in care of the paper, for use in our department, which I am glad to say many of our friends tell me is invaluable to them when it comes to entertaining. Now that the fall is really upon us, with renewed interest in school and church life, the desire for suitable schemes will be greater than in the summer, which brings a desultory sort of life, free from the strenuous days and nights that are close at hand.

Twelve "Sons."

Guess these words, each ends with "son:"

1. A poisonous weed. 2. Harmony. 3. A motive or cause. 4. Any human being. 5. Venom. 6. Disloyalty. 7. A wild animal. 8. The flesh of a wild animal. 9. A small plum. 10. A clergyman. 11. A criminal offense. 12. A prayer or supplication.

Key—1, Jimson; 2, unison; 3, reason; 4, person; 5, poison; 6, treason; 7, bison; 8, venison; 9, damson; 10, parson; 11, arson; 12, orison.

MADAME MERRI.

IN VOGUE

All fashion indications point to a still larger use of embroideries.

The large collar has evidently come to stay, as well as the side frill.

Colors that predominate at fashionable gatherings abroad are royal blue, coronation red and empire green.

Basket weaves are prominent in the first autumn suits shown, and it is noticeable that revers of these suits are extremely large.

The veiling of black satin, with gorgeous hand needlework mousseline incrusted with filet and venise, makes many striking dresses.

The most charming of children's bonnets are evolved from fine embroidered or spotted muslin over pink pongee with ribbons to match.

Afternoon Costumes of Voile and Lace.

MINNESOTA HISTORICAL SOCIETY.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, OCTOBER 13 1911 NO. 11.

SUPREME COURT

JUSTICE RESUMES WORK WITH 781 ACTIONS AWAITING DECISION,

MINNESOTA RATE CASE UP

Committee of Governors Will Appear in Behalf of the State—Important Anti-Trust Cases to Be Heard.

Washington, D. C. — When the Supreme Court convened Monday after its summer vacation it was confronted by an exceptionally heavy docket, consisting of 781 actions, as compared with 606 a year ago. Transportation rates will be the principal questions that the court will have to decide, and although the cases are by no means so important as the Standard Oil and tobacco trust suits, the decisions are eagerly awaited by the railroad interests throughout the country.

Perhaps the most important of these suits is the Minnesota rate case, in which Judge Sanborn of the United States circuit court held that the state had no right to regulate rates within its borders. This decision was based on the theory that interstate commerce might be affected by such action. During the recent conference of governors at Spring Lake, N. J., the attention of the entire country was called to the matter by the speech of Governor Aldrich of Nebraska, who attacked Judge Sanborn's decision and said that the federal courts were trespassing on the rights of the states. A committee headed by Governor Harmon of Ohio was appointed to appear in the supreme court on behalf of the state.

Important Anti-Trust Cases.

Next come several anti-trust cases whose hearing has been held up pending the tobacco and Standard Oil decisions. These actions all involve the interpretation of the Sherman law, [illegible] of the trust decisions of last spring. The clerk of the court has announced that this litigation has been advanced on the court docket. Among these cases are included the "hard coal case," the "cotton corner case," the "St. Louis bridge case" and the "turpentine case."

The "hard coal case" constitutes an attack by the government on the principal anthracite coal carrying railroads and coal mine owning companies in Pennsylvania. It is alleged that since 1895 these companies and railroads have been parties to a conspiracy and combination to end competition among themselves in the transportation and sale of anthracite coal, and to prevent the sale of an independent output in competition to their own.

In the St. Louis bridge case the government contends that the agreements whereby the Terminal Railroad association of St. Louis acquired the ownership, control and operation of the Eades' bridge and the merchants' bridge across the Mississippi violate the Sherman anti-trust law. The United States circuit court for eastern Missouri dismissed the bill.

Cotton Corner Cases.

Nothing like the cotton corner case has ever before come before the Supreme Court. The government will ask the Supreme Court to overrule the action of the United States circuit court for southern New York in striking out an indictment against James A. Patten, Eugene G. Scales, Frank B. Hayne and William P. Brown. Three counts charged that these men conspired to monopolize the interstate trade and commerce in available cotton by acquiring enough of that commodity on the New York cotton exchange to give the alleged conspirators power to fix arbitrary and excessive prices.

The decision of the interstate commerce commission will claim the attention of the court in the so-called "grain elevator cases." There is a long series of these cases and it is expected the highest tribunal in the country will decide the question as to whether the interstate commerce commission possesses the power to prohibit railroads from paying to operators of elevators compensation for "elevating grain in transit."

The orders of the interstate commerce commission principally effect Mississippi river cities, and the boards of trade of these cities have joined with the railroads terminating there to test the validity of the commission's action. The United States circuit court for western Missouri decided that the commission is without the power it sought to exercise, and the matter comes before the Supreme Court on an appeal from this decision.

Austin Death List 55.

Austin, Penn. — The list of dead in the Bayliss dam disaster, to date, is 58.

ANOTHER R. R. MERGER

M. & ST. L. ROAD TO ABSORB IOWA LINE.

Decision of Directors, If Carried Through, Will Give Mileage of 1,585.

Minneapolis, Minn. — The Iowa Minneapolis, Oct. 6. — The Iowa Central railway will lose its identity and disappear from the railroad map and the financial records, according to a plan adopted by the directors' meeting in New York by which, if acceptable to Iowa Central bondholders, the Minneapolis & St. Louis road will absorb it. The Iowa Central has been controlled by the Minneapolis & St. Louis since 1900. Newman Erb, who recently entered the Minneapolis & St. Louis directorate, perfected the plan.

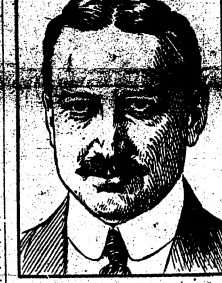
The Minneapolis & St. Louis road now operates 1,027.02 miles of road in Minnesota, Iowa and South Dakota, and the total length of the Iowa Central is 558.43 miles, and the Minneapolis & St. Louis road, when the Iowa Central has ceased to exist will be 1,585.45 miles in length. The lines are not parallel at any place, but one is a continuation of the other.

If the plan goes through it will be the second time that a local railroad has disappeared from the map, as to existent name, the Soo road having made the Wisconsin Central over into the Soo line's Chicago division after it leased that property.

ALLEN AND COLLINS SUED.

Customs Officers Demand Forfeiture of $185,000.

New York, N. Y.—The federal government brought forfeiture suits against Nathan Allen, of Kenosha, Wis., and John R. Collins, of Memphis, Tenn., to recover $185,000, the value of smuggled jewels and wearing apparel. From Allen a forfeiture of $150,000 is claimed, and from Collins, $35,000. Both men recently pleaded guilty to indictments for smuggling.



Nathan Allen.

DR. HARRY WEBSTER ARRAIGNED.

Pleads Not Guilty to Charge of Murdering His Wife.

Oregon, Ill., Oct. 6.—Dr. Harry E. Webster, accused of the murder of his wife, Bessie Kent Webster, was arraigned before Judge O. E. Heard. Webster pleaded not guilty, and a motion by the defense to quash the indictment against the prisoner was denied.

The state demanded an immediate trial. Counsel for the defense were granted a further hearing on this point, however, and efforts will be made to secure a continuance.

The indictment charging murder was returned by the Ogle county grand jury late in the afternoon. As soon as the indictment had been received Webster was taken from his cell in the county jail to the court room of Judge Heard. Webster's arraignment occupied but a few minutes.

Dr. Harry E. Webster.

BLACK RIVER FALLS RUINED BY WATERS

RISING WATERS, CAUSED BY INCESSANT RAINS, RESULT IN THE BREAKING OF WEST DYKE OF DELLS DAM.

PEOPLE FLEE TO SAFETY

Wausau, Chippewa Fals, Eau Claire, Prescott, Spring Valley and Other Towns are Damaged by the High Streams.

La Crosse, Wis. — More than half of the business section of Black River Falls is in ruins, the homes of scores of farmers have been swept away with probably loss of life and the main dam at Hatfield, Wis., momentarily is threatened with destruction which would release a flood that would carry death and destruction before it, as a result of the breaking of the west dyke of the upper Dells dam, following incessant rains which filled the immense reservoirs of the La Crosse Water company to overflowing.

The situation at Black River Falls, the prosperous little city of 2,000 people, is worse by far than was feared when the deluge burst upon the unfortunate city.

Half of the business section has been utterly destroyed, together with a considerable part of the residence district, and it is admitted by the townspeople who have taken refuge on the high lands, unable to make an effort for the protection of their stores and homes, that the city will be utterly wiped off the map. Whether or not lives have [illegible] have been scattered.

Business Houses Destroyed.

Between 25 and 30 business houses, comprising all the stores on both sides of two streets in Black River Falls, have been destroyed, together with an equal number of residences. The waters are still rising rapidly and the destruction of the stores on the other two business streets is predicted.

The water, flowing with resistless current and in tremendous volume, undermined one big building after another and as it collapsed and crumbled to pieces the debris was largely carried away. The Tremont hotel, a substantial three-story structure, was the first to go, and many others followed.

No precautions could be taken to stop the wrecking of the town, the residents finding it a difficult problem to secure safety or themselves, their families and their more valuable possessions. None of the stocks in the stores were saved and little of the heavier furniture in the houses; the people, although they knew of the overflowing of the Hatfield dam, showing little fear of its effects until the waters burst upon them.

City is in Darkness.

The city is in darkness the electric light plant being one of the first agencies to be put out of commission, adding to the excitement and confusion of the hour.

The disaster was caused by the sudden rise of the Black river behind the two dams o the La Crosse Water Power company, following rains which lasted almost a week. The dams withstood the pressure, but in each case the river washed around the side, taking out a big section of the river bank and coming down upon the country below in almost as great volume as though the dam had been swept away.

The $5,000,000 property of the water power company is not believed to be greatly damaged, the breaks on the side relieving the pressure, and the main dam, which is a concrete structure 100 feet thick at the base and 50 feet at the top, will probably stand all the force which may be directed against it.

Besides the damage at Black River Falls, a great tract of surrounding country was overrun. Effort was made to send warning to farmers, but the telephone wires were the first to go down and the fate of many settlers, who knew nothing of the flood until it struck their immediate vicinity, is the cause of apprehension.

Below Black River Falls are a number of vilages, including Roaring Creek, Irving, North Bend, Melrose, Holmen, Lytles, Midway and Onalaska, and the high waters are due to strike them. Forces of men have been sent out to strengthen the bridges in the three counties along the river.

Cut off by telephone, the news from Black River Falls was sent to La Crosse by the Wisconsin Telephone company, which stationed a man on the top of a telephone pole who cut in and sent in his report as well as the flooded lines permitted.

In a final desperate effort to save the big dam, which is still intact and holds back millions of gallons of water, workmen dynamited the banks of the canal leading from the Hatfield reservoir to the power house, releasing the water into the bed of the river below and thus relieving slightly the strain on the main dam.

If the main Hatfield dam gives way, the flood which will follow probably will carry death and destruction down the Black River valley. Officials of the company, however, say the dam is one of the strongest in the country and they expect it to withstand the strain. The structure is two feet wider at its base than its total height and is built of reinforced concrete.

Eleven Feet of Water Over Dam.

Eleven feet of water is pouring over its crest and sweeping down on the stricken city of Black River Falls and the intermediate farms and settlements. The village of Hatfield is under water and the cottages of employes constituting a small village near the powerhouse, two miles below, were abandoned, in fear that the dynamiting of the canal would be insufficient to ward off the destructive flood which threatens to engulf the powerhouse and settlement.

The water power company has had 300 men fighting to prevent the disaster for nearly a week. Farmers had been warned in advance to expect the break at any moment and many of them had fled with their families to safety before the dyke gave way.

During the night, when the real danger was apparent, a general alarm was sent out. Residents of the valley were warned to flee for their lives. In an effort to save those who could not be reached by telephone, Caretaker True of the Dells Dam, mounted a horse and rode at breakneck speed during the remainder of the night, warning farmers to escape. Wagons were loaded with household goods and started for high ground, but as the country is flat for many miles, it is not known whether all escaped.

Span of Bridge Torn Out.

The flood traveled from Hatfield to Black River Falls in one hour. Farm houses, fences, barns and other debris filled the waters and the strain of this [illegible] against the wagon bridge at that city by the rising torrent, tore out one span of this structure. Residents of Black River Falls were warned just after the break occurred and the contents of the business blocks were rushed to higher ground.

Upper Lake Is Emptied.

The Hatfield water power consists of two great lakes or reservoirs, each covering several miles. The first, or upper reservoir, has been retained by the Dells Dam, a concrete structure embedded in solid rock on one side and with a core wall running to the west. It was this wall which gave way, emptying the great lake into the lower reservoir.

The lower and larger dam at Hatfield is built the same way and the water, rising swiftly, washed out the several feet of earth covering the west core wall here, and tore down the canal and surrounding country. Eleven feet of water poured over the crest of the main dam. These breaks brought about the present flood, but the main body of water is still retained in the lower lake by the big dam at Hatfield.

The present flood is the worst in the history of Black River. Torrential rains above the reservoir sent the water up repeatedly and the efforts of 300 laborers who worked to prevent the disaster, were of no avail. The workmen have been called off, as nothing more can be done, and practically all depends upon the strength of the big dam, and the elements.

The flood reached Melrose carrying away roads and bridges, but the people had ben forewarned and escaped to safety.

FUND FOR "ENTERTAINMENT."

Stephenson's Money Was Used Strictly for this Purpose.

Milwukee, Wis. — After examining 725 items of amounts paid to individuals, who collectively for campaign expenses received $107,793, the senatorial committee, which is investigating charges of bribery in connection with the election of United States Senator Isaac Stephenson, heard testimony that the money was used for "entertainment," and not for any corrupt purpose.

No itemized accounts of the expenses were returned, but Rodney Sackett, one of the campaign managers, testified he had been informed that the money had been used largely for buying cigars and beer. It was the custom in Wisconsin during campaigns, Sackett testified, to send jugs of whisky and kegs of beer to localities where favorable political sentiment was to be worked up.

All this was given by Sackett as explaining the extent of Senator Stephenson's expenditure for the nomination for senator at the primaries in 1908.

Interesting Items Gathered in the Gopher State

McINTIRE ON METHODISM.

Bishop Talks at Semi-Centennial Anniversary.

Faribault. — Monday, October 2, was a great day for the Methodists here. Special interest centered on Bishop McIntyre's sermon at the theater in the forenoon and the ordination of elders and deacons in the afternoon. The semi-centennial sermon in the afternoon was delivered by Rev. W. C. Rice, Fergus Falls.

The following have entered the conference and were received on trial: Arthur B. Godge, A. C. Reinke, Earl Ferrel, E. H. Hickman, Fred Smith, John W. Atkins, Benton B. Wood and Walter Pickering. Several transfers were made to other conferences. Rev. W. C. Sage goes to the North Dakota conference and E. A. Palmer to the southern California conference.

Rev. Alfred Cessey Austin of Austin, was invited to preach the semi-centennial sermon at the next annual conference. Windom was chosen for the place of holding the conference in 1912. The Lay association elected officers as follows:

President, G. Gutterson, St. Paul; vice presidents, W. Bannon, St. Paul; G. E. Maxwell, Winona; J. W. Hilliard, Pipestone, and A. C. Tibbits, Blue Earth; secretary, Frank J. Clements, St. Paul; treasurer, Edward Hoerger, Faribault.

Resolutions were adopted urging that the present method of districts and district superintendents be retained. Another resolution recommended to the general conference that the lay members be admitted to the annual conference.

The anniversary of the Freeman's Aid Society was held and was addressed by Rev. P. J. Maveety, D. D., of Cincinnati.

PROGRESSIVES PLAN FOR FEAST.

Clapp and Anderson to Talk at Rochester Event, October 10.

Rochester. — All the plans for the progressive Republican League feast that will be held in Rochester on Tuesday night, October 10, are progressing rapidly, and the opening of the campaign of the progressive cause in the First district, the home of ex-Congressman James A. Tawney and Congressman Sydney Anderson may attract more than district-wide attention, for it is quite probable that Senator Moses E. Clapp will make his first address for the progressives in Minnesota at the Rochester banquet.

George Loftus, W. I. Nolan and former City Attorney James Peterson of Minneapolis are among the speakers who have announced they will be on hand, and there seems little question but what Senator Clapp will also be on hand to espouse the cause of the LaFollette faction. Congressman Anderson will also be one of the speakers.

GUARD OFFICERS' ELECTION.

Duluth Meeting Ends—Minneapolis to Get Next Session.

Duluth.—The annual meeting of the officers of the Minnesota national guard ended with the election of officers. Colonel E. D. Luce of Minneapolis was elected president, Captain George Leach, Minneapolis, vice-president, Captain K. A. Franklin, Duluth, secretary; Major H. Hart, St. Paul, treasurer. The next meeting will be held at Minneapolis.

In an address before the meeting Congressman Miller advocated the fortification of important posts of the country and declared himself in favor of the fortification of the Panama canal.

Captain Albert Pfaender of New Ulm told of the close relations existing between the militia of the state and the Legislature.

MUST BUILD STOCK YARDS.

Great Northern Ordered to Give Relief to Brook Park Farmers.

The Great Northern railway must build a stock yards at its station in Brook Park, Pine County, according to an order issued by the state railroad and warehouse commission. The commission finds there are approximately 225 farmers within a radius of five miles of the town, and that shipments of stock from there are being diverted because of the lack of loading facilities.

There are only 160 residents in Brook Park, but they petitioned the commission to require the Great Northern to stop the Gopher Limited there. This petition was denied. The commission also refused to require the road to move its depot.

LOOK OVER FACTORIES.

Four Women Inspectors, for First Time in State's History, Work in Small Towns.

The inspection of factories in the small towns and country districts, which is being done this year, for the first time in Minnesota's history, by four inspectors of the woman's department of the state labor bureau, will be completed about the middle of January, 1912, according to Mrs. Perry Starkweather, in charge of the department.

It will be the most complete inspection of conditions, especially in factories where women and children are employed, that has been made. The inspection was begun early last month.

One inspector, Miss N. R. Dunnigan, is now engaged on the factories located in the outlying districts of the Twin City. Miss Agnes L. Peterson, another inspector, is working in the north-central portion of the state, and is now at Little Falls, while another, Miss Jane Poirier, is covering the towns above Duluth in the extreme northern part, around Hibbing. Miss Louise Klapp, the fourth inspector, is working in the southern part of the state.

MONEY FOR SCHOOLS.

State Treasury Distribution to the Counties.

St. Paul. — State Auditor Iverson drew the biggest warrant ever drawn by a Minnesota official in drawing one for $1,197,398 to pay the October apportionment of the current school fund.

A statement issued by C. G. Schulz, state superintendent, shows that schools containing 398,182 pupils are entitled to share in the apportionment at the rate of $3 a pupil. This is the first of the semi-annual apportionments for the fiscal year ending July 31, 1912, and is based on the enrollment of the last school year. The next distribution will be on the first Monday in March, and it is estimated the rate then will be about $2 to each pupil. Superintendent Schulz will also award this month special state aid to public schools. The amount to be distributed is as follows:

High schools	$467,000
Graded schools	150,000
Semi-graded schools	150,000
Rural graded schools	645,000
Total	$1,412,000

FARMER KILLED BY AUTO.

Family of Olmsted County Man Escape When Machine Turns Turtle.

Rochester.—Frank Hughes, one of the prosperous farmers of this county, residing five miles southwest of the village of Eyota, was instantly killed when his automobile, which he was driving, ran into a post and turned turtle, the machine crushing him. Mr. Hughes, with his wife, his daughter and baby, were driving to a neighbor's for a call and were about four miles west of Eyota village, near the Oscar curred.

The extremely muddy condition of the roads caused the car to skid, running square into a post with such violence that it threw the machine completely over. Mrs. Hughes, who was carrying her baby in her arms, saved its life by throwing the child out of the machine, and she also escaped injury.

The elder daughter received a fractured arm. Mr. Hughes was one of the well-known farmers of the country. He was about 40 years old.

CARLETON HEAD AT MOORHEAD.

President Cowling Says $1,000,000 Fund for College Will Be Raised.

Moorhead:—President D. J. Cowling of Carleton college, Northfield, was a guest of honor in this city last week. He occupied the pulpit in the First Congregational church and spoke before a society of business men known as the Men's Seminar.

Taking as his subject "The Place of the Small College," and treating of Carleton college in particular, President Cowling addressed members of the Men's Seminar. With finue skill the speaker told of the differences in his experiences secured at Yale university and at Carleton, emphasizing the more intimate relation held in the smaller school between not only the students, but the students and instructors.

President Cowling also told of the progress made of securing the $1,000,000 endowment fund for the college, and said, "We now feel that the securing of the fund for the school at Northfield is a practical certainty."

Washington's Americanized Foreign Colony

IT needs no intimate knowledge of statecraft to let one know that foreign governments, when other things are equal among candidates, are careful to select as their ministers or ambassadors to the United States men who know something about conditions in this great democracy, either through previous subordinate service here in the diplomatic corps, or, as someone has put it, through the medium of marriage, for an astonishingly great number of the foreigners accredited to Uncle Sam's capital are the happy husbands of American wives.

In one or two cases in which the wives of the diplomats are not of American birth, they are of American education, and this has been true in many instances of the helpmeets of the men who have come from the Orient to represent their newly awakened countries in a land where liberty has lived for something over a century.

Take it all in all the foreign colony in Washington is interesting, not only in its work, but in its personnel, official and family. Baron Uchida, the Japanese ambassador, was chosen for his post in part at least because once upon a time he had served in a junior capacity as an attache of his government's legation in the American capital. Moreover, his wife, the Baroness Uchida, received her entire education in the United States. She is a graduate of Bryn Mawr, and it is rather the usual thing for her to leave Washington and society and diplomatic demands behind her to spend a few days each month under the hospitable roof of her alma mater.

There are seven members of the Japanese embassy in Washington, but only one besides the ambassador has with him his wife. Madame Keishiro Matsui, the wife of the counselor of the embassy, resides with her husband at the capital. There are said to be some "new women" in Japan and it may be that when the Baroness Uchida and Madame Matsui return to their native country they may look upon the new movement among their sisters as one not wholly to be condemned, even in an oriental land where woman's subjection to their lord and master, man, is supposed to be complete. These two Japanese women have taken an extraordinary interest in the woman's suffrage movement and moreover they are keenly alive to everything which pertains to the higher education of women. The Pennsylvania education of Madame Uchida gave her something more than what the world is accustomed to call book learning.

Only recently the minister from Belgium to the United States, the Count de Buisseret, was transferred to his country's legation at St. Petersburg. The count and countess, his wife, lived in the American capital for a long time and here it was that their daughter was born, an event which was a cause for great rejoicing, for previous to the arrival of the little girl, the Buisserets had been blessed only with boys, of whom there were five to help pack the trunks the other day for the journey to the capital of the czar's empire.

The Countess de Buisseret is an American. She is the daughter of General Story of California, whose family for a great many years resided in Washington. Count de Buisseret has been succeeded as Belgian minister by Mr. E. Havenith, who comes to Washington from Persia. Mr. Havenith is also married to an American woman who, prior to her wedding, was Miss Helen Ffoulke, daughter of the late Charles Ffoulke of Washington. Mr. Havenith at one time was a junior attache of the legation in Washington and here he met, wooed and married Miss Ffoulke.

It seems like a string of coincidences, but the fact that three Belgian ministers in succession have had American wives is much more than mere coincidence. The predecessor of the Count de Buisseret was the Baron Moncheur, whose wife also is an American, the daughter of General Powell Clayton, former United States minister to Mexico. Baron Moncheur has been twice married, his first wife, like his second, being an American woman.

There are many reasons advanced for the selection of diplomats with American wives for the American service, but the underlying reason undoubtedly is that with an American wife a diplomat more quickly gets in touch with American methods, manners and habit of thought and thereby at once becomes of greater service to his government.

Mr. Jules Jusserand, the French ambassador to the United States, probably is more familiar with the American spirit than any other man now representing a foreign government in Washington, unless it be James Bryce, the British ambassador, of whom it is only necessary to say that he wrote "The American Commonwealth," in order to give one an understanding of how closely this subject of King George has studied American political and economic conditions.

France is a republic and there are no better Republicans than Jules Jusserand. He has a keen sense of humor. It was not long ago that American generosity and patriotism moved some citizens to present to France a statute of George Washington. This statute, erected in a city of France, confronts a statute of the "Grand Monarch" Louis XIV. Now Louis, as the world knows, was a great believer in the divine right of kings, while George Washington was the American who did a good deal toward shattering faith in the God-given right of monarchs to rule as they would.

Mr. Jusserand's observations on the probable thoughts of Louis XIV. as he gazes day after day into the countenance of George Washington, are well worth publication.

The French ambassador's wife would have been an American were it not for the fact that her American parents chose France as their long abiding place and there in the capital city Madame Jusserand was born. To all intends and purposes she is an American. Her father was C. T. Richards of Boston.

If the idea still persists in some places that the sending of ambassadors who have American wives to Washington is merely accidental, let it be said that the present minister from Spain, Senor de Riano, has an American wife, and his predecessor, the Duc d'Arcos, also led an American woman to the altar. Senora de Riano before her marriage was Miss Alice Ward. She lived with her grandmother, Mrs. John Ward, on Connecticut avenue in this city. Senor Riano at the time of his marriage was, if he will forgive the expression, an underling in his country's legation. He left here with his wife to accept a higher post abroad and finally he was made the Spanish minister to France. Now he is back in the native city of his wife as the head of an embassy in which once he was a subordinate.

The American spirit seems to take hold of foreigners as soon as they reach this country. The ambassadors, ministers and attaches who have young children, almost invariably send them to the public schools, to the dismay of the preceptors and preceptresses of the private schools which are attended by the children of many rich Americans, who for some reason seem to prefer the private institutions of learning to those which are equipped and managed by the public.

The minister from Costa Rica is Senor Don Joaquin Bernardo Calvo. He has a big family which, with the minister himself, represents a small country, thriving however it is said, even though its geographical limits are not widely extended. The Calvo family is one after Theodore Roosevelt's heart. There are twelve children in it. From father and mother down to the youngest child, a little girl four years old, every member of this Costa Rican family plays some kind of a musical instrument. They have a family orchestra with the father leading at the almost daily performance. The violin, the violoncello, the harp, guitar, the flute, the flageolet, the drum, the piano, and the mandolin, all working together manage to get into a harmony like unto that which marks the Calvo relations.

Every one of the Calvo progeny either has had or is getting an American public school education, one of the boys by special permission of the United States government, having been given an opportunity to perfect himself in military science at West Point.

Mr. Chang Yin Tang is the Chinese minister at Washington. Mr. Chang brought with him to Washington his wife, Madame Chang, and three daughters. His son, Mr. Henry Chang, was sent to this country years in advance of the coming of his parents in order to perfect himself in American ways and to acquire an American education. He is at present studying at the George Washington university. Not long ago there was a wedding at the Chinese legation, the groom being Mr. Henry K. Chang and the bride Miss Isabel Tong. Miss Tong, now Mrs. Chang, is the daughter of Ton Shoa Yi, who was sent as a special ambassador by China to this country two years ago to thank the United States for the remission of the Boxer indemnity.

When Minister Chang came to Washington, he brought with him in addition to his family, two daughters of his friend, Mr. Tong. Young Mr. Chang promptly fell in love with Miss Tong and as has been said they recently were wedded at the legation and the wedding is declared by those who were bidden to see it to have been one of the most picturesque and sumptuous ceremonies ever performed in America.

Stenographic Work Is a Good Developer

"The demand for strictly first-class stenographers," said a man acquainted with the business, "is greater than the supply. In this profession, as in every other, while there is apt to be an oversupply of those less well equipped, there is always room at the top. But a man should not be satisfied even there.

"There are stenographers who look on stenography as an end, who are content if they can get on in that; where as it should be looked on as a means to an end. The stenographer can't know too much, no study or reading comes amiss to him; if he were possessed of all knowledge he would some day find it all useful to him in his profession; but he doesn't want to stop at that.

"If he has the knowledge and if he also has tact and good sense and downright ability as well as a really expert knowledge of stenography he will some day find himself in the employ of a man of affairs and getting not only good pay but getting besides a knowledge of business that is sure to be vastly more profitable to him.

"A stenographer in the employ of such a man soon comes to have more real knowledge of the business than the bookkeeper or the cashier or the manager. He knows it from the inside and from the top and if he proves to be a man of discretion and sound judgment as well as ability he is more and more trusted; and as his ability comes to be more and more clearly shown he finds himself in due time a partner or a manager, promoted to a higher post because at such a post his ability can be employed to still greater advantage.

"It is a fine thing to be a really expert stenographer, but the man with the brains and ability for that should have an ideal, an ambition for higher worth still, as in fact many such stenographers do have, an ambition that sooner or later they realize. Some of the biggest men in business began life as stenographers."

SALARIES A SHAME

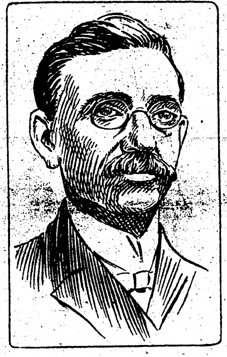
Striking Pastor Utters Criticism of Clergy's Income.

Advocates State Board of Control Over Establishment of Congregations —Pictures Preachers Often Near Starvation.

Lebanon, Ind.—"The manner in which the pastors of many of the churches in rural communities and small towns have to eke out miserable existences on the pitiable salaries given them, is a disgrace to Christianity, a reproach to American civilization and a reflection upon present-day church government," declares Rev. E. T. Greenleaf, who recently resigned the pastorate of the Lebanon circuit of three rural Methodist Protestant churches, because, in view of the present high cost of living, the salary was not sufficient to provide an adequate living for his family, and who, because of the publication of the reasons for his resignation, was left by the conference without an appointment for the ensuing year.

"The business world today does not know the conditions surrounding the financial affairs of the ministry," continued Rev. Mr. Greenleaf. "The church itself covers up the matter because if the truth became known the whole religious institution would be shamed. The ministers themselves suppress the facts because of their fear that the pulpits of churches would be closed to them in the future or because of a belief that the money-mad world would charge them with being mercenary if they should demand more pay. It is time the facts became known.

"Salaries of ministers in rural communities and small towns do not grow appreciably larger as the years go by. On the other hand, the preachers' old-time perquisites are passing away. Railroads have withdrawn, or are withdrawing, transportation concessions. The local merchants are gradually abolishing the old-time complimentary methods of selling goods to ministers. All of the other avenues of outside help are becoming more and more clogged, until they will soon be closed entirely. The calls upon the minister's purse are not lessening in number or insistence. He is considered legitimate and easy prey by many persons, members of his own flock included. While all this is true, the cost of living is steadily mounting higher and the salary that several years ago might have been ample to provide a living is no longer sufficient.



Rev. E. T. Greenleaf.

"No matter how small his salary, whether it is barely sufficient to keep him and his family from starvation, or not, the minister must wear good clothing and dress his family well, because the pride of the congregation demands it. What a shame it is that this Christian pride does not extend to the point that the parishioners are willing to pay their pastor salary sufficient to enable him to dress as he should without sacrificing his own or his family's physical well being in so doing.

"Ministers belong to the noblest profession on earth. They deserve better treatment than they are receiving. They are not beggars. In the very nature of their profession they cannot be and probably to that fact is due the disposition of churches to pay them the least salary possible. Few churches are paying what they can afford. The tendency is all the other way."

The Rev. Mr. Greenleaf is forty-six years old. His family is his wife, five daughters and one son. He came here from Indianapolis, where he was employed in the city engineer's office as a mechanical and civil engineer draftsman. He thought that by extra work as a draftsman he might earn sufficient funds in addition to his salary to support his family here in comfort. However, the work of ministering to three country churches took too much of his time and the opportunities for doing outside work were few.

Cow Caused Fatal Railroad Wreck.

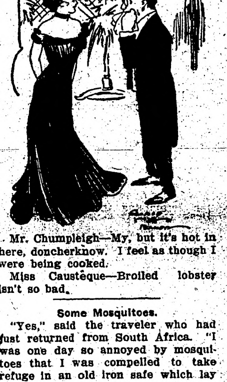
Sterlington, La.—Engineer Westbrook was killed, his fireman probably fatally injured and four passengers seriously hurt when a north-bound Iron Mountain passenger train struck a cow and was derailed.

SPLENDID CANADIAN CROPS

Wheat, Oats and Barley Universally Good Throughout Manitoba, Saskatchewan and Alberta.

The reports that come to hand from the wheat fields of the western Canadian provinces show remarkably good yields in all parts. Yields are recorded of wheat going 35 and 40 bushels in many places, and oats from 60 to 100 bushels per acre. Barley and flax are splendid. The thousands of Americans throughout the United States who have friends in Manitoba, Saskatchewan or Alberta will be pleased to learn of the great success that has followed their efforts. Many of these have not confined themselves to the growing of grain, but have also gone into the cattle industry. On the luxurious grasses that are so abundant there, in almost all districts, make this industry safe and profitable. The land sales reported by the railway companies and by the different land companies show the great increase that will likely take place during the next year in farming operations. What has been said time and time again may now be well repeated, that there is no place on the American continent where the same opportunities are afforded the man looking for a home, for the young man starting out in life, the man with a growing up family, who desires wider scope for his ambition. The Canadian government agents located at different points in the states will be glad to advise the reader of the conditions, and relate to him instances of the great success that has followed farming in Western Canada.

HOW NASTY.



Mr. Chumpleigh—My, but it's hot in here, doncherknow. I feel as though I were being cooked.

Miss Caustèque—Broiled lobster isn't so bad.

Some Mosquitoes.

"Yes," said the traveler who had just returned from South Africa. "I was one day so annoyed by mosquitoes that I was compelled to take refuge in an old iron safe which lay discarded on the veldt.

"My first emotions of joy at my happy deliverance were hardly over when the mosquitoes, scenting me, began to drive their stingers through the safe. Fortunately, I had a hammer in my pocket, and as fast as their stingers came through the iron I clinched them, until at length such a host of them was fastened down in this way that, when they started to fly away, they carried me and that safe miles.

"Then, one by one, they died with the exertion, and I was able to come out with safety. Yes, wonderful things happen in foreign parts."—Ideas.

A FINE NIGHT-CAP
The Best Thing in the World to Go to Bed and Sleep On.

"My wife and I find that 4 teaspoonfuls of Grape-Nuts and a cup of hot milk, or some cream, with it, makes the finest night-cap in the world," says an Alleghany, Pa., man.

"We go to sleep as soon as we strike the bed, and slumber like babies till rising time in the morning.

"It is about 3 years now since we began to use Grape-Nuts food, and we always have it for breakfast and before retiring and sometimes for lunch. I was so sick from what the doctors called acute indigestion and brain fag before I began to use Grape-Nuts that I could neither eat, sleep nor work with any comfort.

"I was afflicted at the same time with the most intense pains, accompanied by a racking headache and backache, every time I tried to eat anything. Notwithstanding an unusual pressure from my professional duties, I was compelled for a time to give up my work altogether.

"Then I put myself on a diet of Grape-Nuts and cream alone, with an occasional cup of Postum as a runner-up, and sometimes a little dry toast. I assure you that in less than a week I felt like a new man; I had gained six pounds in weight, could sleep well and think well.

"The good work went on, and I was soon ready to return to business, and have been hard at it, and enjoying it ever since.

"Command me at any time any one enquires as to the merits of Grape-Nuts. You will find me always ready to testify." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

SERIAL STORY

No Man's Land

A ROMANCE

By Louis Joseph Vance

Illustrations by Ray Walters

(Copyright, 1910, by Louis Joseph Vance.)

CHAPTER I.

A gentleman who, leaving his offices on lower Broadway a trifle after four, presently ensconced himself in a corner seat of a Subway express and opened before him a damp afternoon paper (with an eye for the market reports) was surprised, when the train crashed heavily into the Fourteenth Street station, to find himself afoot and making for the door: this although his intention had been to alight at Grand Central. Thus it may be, that trickster in us all, which we are accustomed vaguely to denominate the subconscious mind, directs our actions to an end predestined.

Surprised, he hesitated; and for that was rewarded by having his heels trodden by the passenger behind. This decided him, absurdly enough, and he went on and out, solacing himself with a muttered something, hardly definite, about a stroll benefiting him. So, transferring to a local train, he alighted at Twenty-third Street, climbed the stairs and proceeded briskly west, buffeted by a rowdy wind.

Striking diagonally across Madison Square Park, past the drearily jetting fountain and between arrays of empty benches scarcely beggarly (since that class had deserted them for warmer lounging places) he turned northward on Fifth Avenue, threading the early evening throngs with a spring of impatience in his stride to distance casual competition; and received upon a mind still impressionable, for all that it had ample food for meditation and nursed a private grievance, a variety of pleasurable suggestions.

Dusk, the early violet dusk of late November, brooded over the city, blurring its harsh contours, subduing its too blatant youth, lending an illusion resembling the dim enchantment of antiquity.

Near Twenty-ninth Street he checked sharply and stood briefly debating something suggested by sight of a shop window well known to him:

"It might save time: one may as well be sure—"

Turning, he descended a pair of stone steps and crossed a flagged area to a door set at one side of a window dressed with a confusion of odd, enticing things: a display that tempted the eye with the colors of the rainbow fainting under weight of years and dust. A bell tinkled overhead as he opened and shut the door, letting himself into a deep and narrow room crowded with a heterogeneous assemblage of objects that glimmered with weird splendor in a semi-gloom made visible by half a dozen electric bulbs generously spaced. In the rear, beyond a partitioning screen, shone a warmer light.

For the moment he saw no one. Advancing a few paces he halted, waiting.

From behind the screen, at the back of the shop, the proprietor appeared, soft stepping, smiling to greet a good customer of discerning taste. The latter went to meet him with a pleasant air of liking.

"Good evening, Mr. Miller—"

"Good evening, Mr. Coast. Something I can show you this evening?"

"The telephone, if you please." Coast laughed a little and was answered cheerfully.

"Certainly. This way."

He was conducted behind the screen, where, beneath a strong light, an assistant at a jeweler's bench sat laboriously occupied with some task of delicate artifice. He looked up as Coast entered, with a greeting cordially returned. Coast went directly to the telephone, a wall instrument, unhooked the receiver and detailed a number to Central. The proprietor disappeared into an adjoining room. An instant later Coast spoke again.

"That you, Soames? . . . This is Mr. Coast. Is Miss Katherine at home? . . . Then will you find out, please. Ask her if she has time to see me for a few moments before dinner. . . . Very well."

There was a lengthening pause, during which the antique dealer silently returned, his genial eye alternating between Coast and a crystal decanter he had fetched.

"Yes, Central, waiting." Coast put his hand over the transmitter and wagged a reproving head. "Going to try to poison me, Miller?"

"Just a drop of old brandy, Mr. Coast—very old, from my home in France."

Coast nodded, recalled to the telephone. "Hello, Soames. . . . Very well. Tell her I called, please. . . . No! no message, thank you. Goodby."

As he hung up the receiver, a warning tintinnabulation sounded at the front door. Miller, busy with glasses, looked to his assistant. "See who that is, Charley," he said. The assistant slipped from his seat, switched on more light in the front of the shop, and vanished round the screen.

As he did so, Coast heard the rumble of a man's voice, followed by a woman's ringing laugh, a thought too loud.

Miller was offering him a glass. He bowed, took it and held it to his lips for a moment without tasting, inhaling the mellow bouquet of the liquor.

"That is good," he said, and sipped critically.

"The very best, Mr. Coast. There's little like it out of France."

"I'm glad I thought of imposing on your good nature."

"Why, so am I. My friends are always welcome. . . . Your health, Mr. Coast."

"And yours, Mr. Miller."

They drank ceremoniously. Coast put down an empty glass. "That," he declared from the bottom of a congratulated heart, "was delicious."

"Another drop?"

"No. Absolutely not. It would inspire me to try to buy out the shop." He offered his hand. "Good night, and thank you."

"Good night, Mr. Coast."

On his way out, Coast had an indifferent glance for the customers at a show case near the window. The woman stood with her back turned, chattering volubly to the assistant in indifferent French: a small, slight figure with arms uplifted, holding a chain of gold and imperial jade to the light. Beside her the man loomed solidly, his heavy proportions exaggerated by a fur-lined coat, his attentive pose owning a trace of proprietary interest. As Coast drew near he looked up and faced about, stripping off a glove.

"Why, h'ar'ye, Coast!"

Tone and manner proclaimed the encounter of old friends. Perforce Coast took his hand, pausing, then dropped it, with a grave "Good evening, Blackstock." His distaste for the man affected him intensely, but he tried to conceal it beneath a forced banality: "Early Christmas shopping, eh?"

"Not exactly." Blackstock slurred explanations. "I've just been trying to get you on the telephone."

Coast's eyebrows underlined his surprise. "Yes?"

"Yes. Thought you might care for a hand at bridge tonight; just a few of us at my rooms: Van Tuyl, Truax, Dundas, yourself and me. We'll cut in and out. What d'ye say?"

Coast's acceptance followed an instant's consideration. Had the invitation been extended him at any time before noon of that same day, his refusal would have been prompt if qualified by an invented engagement. Now, however, after what the day had rumored of the man, he was inclined to grasp an opportunity to study him, to see as much of him as possible—little as he cared to see anything of him.

"What o'clock?"

"Oh, between nine and ten—any time. You know where I hang out? We'll count on you." Blackstock beamed, his eyes shining behind thick lenses: to snare Garrett Coast was a signal conquest. An additional trace of affable effusiveness oiled his always slightly overpowering manner. Then doubt moderated it, and he had an irresolute eye for his companion.

She had turned away from the case, with an assured attitude imperative of an introduction. Coast bowed to Blackstock's constrained words of presentation.

"Miss Fancher — my friend, Mr. Coast."

She nodded, giving him a small hand whose pressure was a thought too frank. "I've heard about you," she said, nodding emphatically. "Glad to know you."

"And I've enjoyed your dancing many times, from the far side of the footlights," he told her pleasantly.

"Nice of you to say that. I'm with The Rathskeller Girl now, you know. Have you seen it?"

"I'm promising myself the pleasure."

"Well, when you come, just let me know."

"I shant forget," Coast assured her vaguely. "But now I must run along. Miss Fancher — Blackstock — good night."

He escaped to open air with a sensation of relief and perturbation oddly commingled. Instead of soothing, the brandy warmed his grievance until it turned writhing in his bosom and stung him like an adder. So that was the man! . . . He pressed forward more rapidly, but now in an introspective mood, oblivious of all that so recently had gratified him.

At Fortieth Street he pulled up on the southern corner, over across from the dull grey colonnade of the new Public Library, awaiting a break in the stream of traffic.

A policeman presently made a way for him, holding back the press of vehicles to permit a string of their counterparts to break through. Coast stepped down from the curb and in another minute would have been across, but stopped in mid-stride to hear himself named in a voice unforgettable, to him inexpressibly sweet.

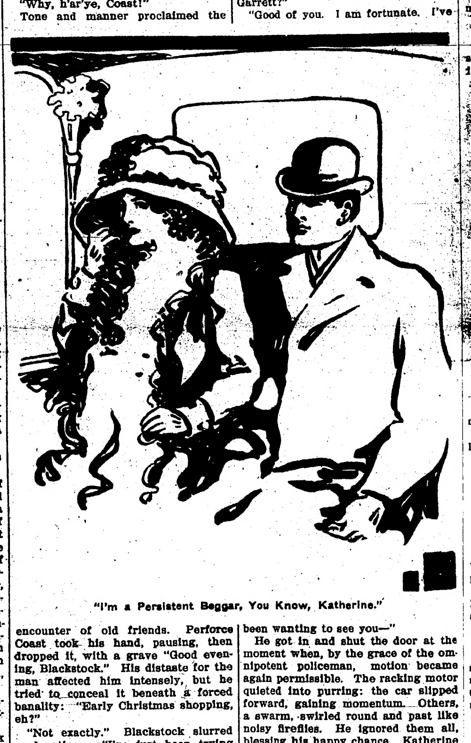
Startled, he halted beneath the noses of a pair of handsome horses champing in taut-reined restraint, and glanced at random right and left. Then as again he was called—"Garrett! Garrett Coast!"—out of the corner of an eye he detected the uplifted salutant two fingers of the driver of a town-car at halt in the outer line of northbound traffic. In the window of the car a white glove fluttered, moth-like.

Beside the door, with a hand on the latch, he spoke through the lowered window.

"May I beg a lift, Katherine?"

"Indeed you may. Didn't I call you, Garrett?"

"Good of you. I am fortunate. I've been wanting to see you—"



"I'm a Persistent Beggar, You Know, Katherine."

He got in and shut the door at the moment when, by the grace of the omnipotent policeman, motion became again permissible. The racking motor quieted into purring: the car slipped forward, gaining momentum. Others, a swarm, swirled round and past like noisy fireflies. He ignored them all, blessing his happy chance. Katherine Thaxter in her corner had a smile for him, dimly to be detected through the gloom wherein her face glimmered like some wan flower of the night, beautiful, fragrant, mysterious.

"Where were you going, Garrett?"

"Oh . . ." He emerged from reverie with a little start at the sound of her voice. "No place in particular. I believe I had some hazy notion of the club when you hailed me. And you? Home, of course."

"Yes. I've been shopping."

"Tired?"

"Not very. . . . Curious I should have been thinking of you just when the car stopped."

"I don't agree: it was telepathy."

"Oh, that's overworked, Garrett. Can't a commonplace coincidence be explained any other way nowadays?"

"Perhaps: but not this time. I've been thinking about you all day. Some impulse—I don't know what—moved me to walk uptown from Twenty-third Street and delays insignificant in themselves brought me to that corner just in time. That isn't coincidence: it's—" He sought the word.

"What do you think?"

"Predestination—another name for luck."

"You're ingenious."

"Grateful, rather."

She laughed, a gentle laugh that faded in a sigh, and after a moment of anticipative silence, almost apprehensive, felt obliged to ask: "What were you thinking about me, Garrett?"

"Much the usual thing, I'm afraid—"

"Oh, Garrett!" Her voice was rueful though she laughed. "Again?"

"I'm a persistent beggar, you know, Katherine. . . . But otherwise, also, I happened to hear your name mentioned today . . . gossip . . an idle rumor . . ."

(TO BE CONTINUED.)

GATHERED SMILES

Couldn't Fool Him.

Serving in the capacity of collector for a certain bank is a colored man who spends his evenings playing in a band.

One of the clerks in the bank, knowing of the clerk's musical attainments, said to him: "Joe, I went to a vaudeville show last night and one of the fellows there played 'Traumereo' great!"

Joe looked at him suspiciously for a moment and then said "You tell that stuff to Bonny. You don't get me to bite, 'cause Ah knows they ain't no such instrument."

The Right Chord.

"I hope you will believe me when I tell you that you are the only girl I ever loved."

"No. That I refuse to believe."

"Then you will believe me when I tell you that you are the prettiest girl I ever loved?"

"Yes. Yes, I am sure you are in earnest now."

His Calling.

"What are you doing now, Wigglethorpe?"

"Settlement work."

"Settlement work? You don't look the part."

"That's what I'm doing, just the same; I'm collecting bills for old Spotcash."

Consistent.

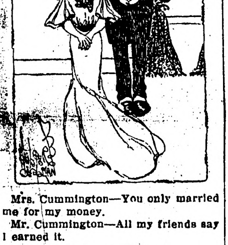
"I don't believe you love me any more," sighed Mrs. Tripper.

"I don't," replied Mr. Tripper.

"What?"

"I loved you just as much as I possibly could, my dear, on our wedding day, and I have loved you just as much as I possibly could ever since."

A HOT ONE.



Mrs. Cummington—You only married me for my money.

Mr. Cummington—All my friends say I earned it.

Seasonable Topics.

Good-by, electric fan
That cooled our pate.
Soon with the baseball fan
You'll hibernate.

Without Guile.

"Yes, sir," said an Emporia citizen, "I have perfect faith in the weather predictions of Irl R. Hicks."

"In that case," remarked the polite stranger, "let me sell you an orange grove in Alaska."

Unmarried.

The Chicago woman was on the witness stand. "Are you married or unmarried?" thundered the counsel for the defense. "Unmarried, four times," replied the witness, unblushingly.

Another Outrage.

"Oh, pa, come quick!"

"What's the matter?"

"There's an aviator comin' down in our corn field without paying the slightest attention to the scarecrow."

A Test.

The Cop—Which of these houses do you live in?

Mr. Jaggs—Take me all 'long the street, lemme try every door, and the only one I can't open ish mine.—Puck.

The Way.

"How is it that Jabbs has so much money? He isn't working now, is he?"

"Not exactly, but his wife gives bride parties."

The Kind of Diet.

"Fish is a great brain food."

"Then lots of people must like weakfish."

Scattering.

A couple of colored variety actors were in earnest conversation when a third dusty trouper happened to overhear a remark which he thought referred to him.

"Heah, you," he exclaimed, "who you 'ludin' to?"

"Dat's all right," said one of the others, "we wasn't shootin' at you."

"Puhaps, puhaps," replied the offended one, "but membuh dis: If you mus' keep on shootin' bettah use no mo' ob dem splash bullets!"

Then He Took Them Down.

"You buy new shoes at least once a week, don't you, Mr. Snoogle?" said the typewriter girl.

"What makes you think so, Miss Wynot?" asked the head of the firm.

"Why, almost every time you put your feet on my desk I notice you have a new pair on."

PUT HIS FOOT IN IT.

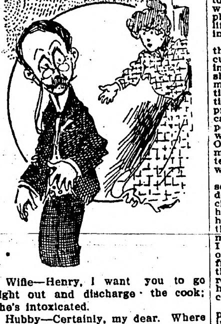
A young surgeon, who was very retiring and awkward, was asked to dinner by a lady who was at least fifty and tried to pass herself off as twenty, and apparently imagined that being rude and tomboyish assisted to sustain the youthful illusion.

At dinner she asked him to carve a fowl, and, never having carved a fowl before, and being painfully shy, he made a mess of it. Instead of trying to cover his confusion his hostess called attention to it pointedly by looking down the table and saying loudly:

"Well, Mr. P., you may be a very clever surgeon, but if I wanted a leg off I should not come to you to do it."

"No," he replied, politely; "but then, you see, you are not a chicken."

IT COOLED HIS COURAGE.



Wifie—Henry, I want you to go right out and discharge the cook; she's intoxicated.

Hubby—Certainly, my dear. Where is she?

Wifie—She is in the kitchen waiting for you.

Hubby—Waiting for me? Then I guess there's no hurry.

Needless Alarm.

"Am forwarding a barrel of spruce gum as a gift," wired a Bennington (Vt.) man to a friend in Boston.

"Gee, whiz!" ejaculated the Boston man, "that's more spruce gum than my family could consume in several lifetimes."

So he went to the druggist and arranged to have him take 100 pounds or so at a fair price. Congratulating himself on being so much in pocket, the Boston man awaited the arrival of the barrel. It came. It was three inches high.

It Soon Happens.

A thing of beauty is a joy
And we uplift
A song of praise without alloy—
Till fashions shift.

One Room to a Floor.

"Why did you purchase that abandoned lighthouse?"

"I want to fit up a little hotel."

"You can't accommodate many guests."

"No; but I want to be able to say that I once kept a summer hotel in which every guest could have an outside room."

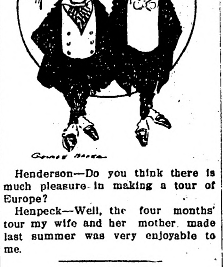
A Favorite Spot.

Noah sighted Mount Ararat.

"At last," he cried, "the mountain resort with an ocean view!"

Herewith he felt the voyage was not in vain.—Puck.

GOT RID OF THEM.



Henderson—Do you think there is much pleasure in making a tour of Europe?

Henpeck—Well, the four months' tour my wife and her mother made last summer was very enjoyable to me.

Who Knows?

Hobble skirt—harem skirt—
Fol-de-rol-lo!
What's fashion's coming spurt?
No skirt at all?

An Instance.

"The great things are not always the ones most noticed."

"I agree with you. Take a wretched little mite of a cinder. It is of all things one most in the public eye."

"Two of a Kind."

He—how is this? I come back unexpectedly from my trip and find you flirting with another man. You have deceived me.

She—Not any more than you. You told me you would be away eight days, and here you are back again the next day. Have you not also deceived me?—Fliegende Blaetter.

MUNYON PREACHES HOPE PHILOSOPHY

New Association Gaining Many Members.

FAITH'S CURATIVE POWER

NOTED HEALTH EXPERT GIVES REASON FOR BIG SUCCESS IN MEDICINE

Tremendous success has attended the organization of the new Munyon "Hope Cult." Professor Munyon claims that he has secured more converts than he even anticipated, and says that his "Hope Cult" is growing in leaps and bounds. It is said that the total membership of the association throughout the United States is now well over the half million mark.

In a statement for publication Prof. Munyon said:

"I want to talk to every sick, ailing and despondent person in this city. I want to preach my new creed to them. I want to tell them about my new philosophy of health, which is the fruit of a lifetime of study and experience in dealing with sick folk.

"I want to expound the Great Truth that I have learned that there is more curative power in an ounce of Hope than in pounds of Dope. That sick people should not take medicine except as a medium through which the great curative power of Hope may be made effective. Medicines are necessary in the present state of the world's progress because they give a patient physical support and strength and renewed vigor with which to brace up the will power. One knows, from the action of the proper medicines, that he or she is feeling better by this inspired hope and faith, which complete the cure.

"I think that probably a million persons at least in the United States have declared themselves cured by my medicines, and I know that these people have had the best remedies medical science had to offer. I have always contended that if there is any virtue in medicine my followers should have the best, but I verily believe that more than one-half of those who have been lifted to health from the bondage of chronic illness, through taking my medicines, have been really cured by the knowledge that they had the utmost in medical lore at their command, and the Hope this inspired.

"I am not in any sense a practicing physician. I employ at my laboratories in Philadelphia a large staff of expert physicians and chemists, and I have many other physicians in various cities of the United States detailed to give free advice to the sick and afflicted. My headquarters are at Munyon's Laboratories, 53d and Jefferson Sts., Phila., Pa., and I have there a staff of duly registered physicians and consulting experts, and to all who desire it I offer the best of medical advice absolutely free of charge."

Write today, addressing Prof. J. M. Munyon personally and your letter will have a special care.

An Exacting Situation.

"Doctor," said the nervous man, "is there any way of teaching a person to talk in his sleep?"

"I never heard of any," replied the physician. "How could such an accomplishment be of benefit?"

"It's either that or insomnia for me. My wife is one of the best suffragette speakers before the public. She always rehearses her orations at home, and I've got to say 'hear! hear!' or 'that's the stuff!' at least once every ten minutes."—Washington Star.

As frost, raised to its utmost intensity, produces the sensation of fire, so a good quality, over-wrought and pushed to excess, turns into its own contrary.—Wm. Matthews.

The talent of success is nothing more than doing what you can do well, and doing well whatever you do, without a thought of fame.—Longfellow.

As dawn precedes the sun, so should acquaintance precede love.—Du Bose.

DOCTORS FAILED TO HELP HER

Cured by Lydia E. Pinkham's Vegetable Compound

Pound, Wis.—"I am glad to announce that I have been cured of dyspepsia and female troubles by your medicine. I had been troubled with both for fourteen years and consulted different doctors, but failed to get any relief. After using Lydia E. Pinkham's Vegetable Compound and Blood Purifier I can say I am a well woman. I can't find words to express my thanks for the good your medicine has done me. You may publish this if you wish."—Mrs. HERMAN SIETH, Pound, Wis.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration.

For thirty years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for female ills, and suffering women owe it to themselves to at least give this medicine a trial. Proof is abundant that it has cured thousands of others, and why should it not cure you?

If you want special advice write Mrs. Pinkham, Lynn, Mass., for it. It is free and always helpful.

Be a booster—not a knocker.

It is stated that there is a considerable falling off in the passenger receipts of the railroads since they increased the rates to 3 cents per mile. Hope that's true.

"From now on no loyal Italian will dare to take a Turkish bath," remarks the Bemidji Pioneer. We never heard of one who did.

There is nothing cheap about politics in Wisconsin. The figures show that about $108,000 was spent to secure a seat in the U. S. Senate, a job with a salary of $7,500 a year for a 6-year term.

The Grygla Eagle says that the County attorney ought to do some investigating out there, as "booze" seems to be "leaking out of some joint." Go to it, Mr. County Attorney, but dont overlook Holt while you are investigating.

It is a good idea sometimes for the people of a town, particularly its business men, to get together and stick together. In any movement that will actually benefit the community this rule can be observed with good results, but anyone who will suggest a combination to do things in a manner to discredit or injure his town is entitled to a swift kick.

In spite of money, influential friends, and local political pull it took the jury over at Bemidji just ninety minutes to bring in a verdict of guilty against Dr. Dumas, the alleded "king of the yegg-man" who was charged with being a party to the attempted burglary and burning of the postoffice and store at Puposky. The verdict seems to be right in line with public opinion.

Long Prairie Leader:—One of the reasons doubtless why the railroads decided to sell mileage books at two cents per mile was because they did not want the determined opposition to the rate raise from the well-to-do classes. They thought they could stick the farmer and while there would be a howl, it would not avail anything. They dreaded and feared the opposition that would come from the business interests of the cities and towns if the straight 3-cent rate was adhered to. So they made the change whereby all these "influential" people get the 2-cent rate. Hence we have the situation in Minnesota of the well-to-do traveling everywhere and at all times at 2 cents per mile while the poorer people, riding on the same coach and oft times in the same seat, and riding from the same town to the same town, paying 3 cents per mile. The situation is one of rank injustice.

THE FIRST NUMBER

Victor L. Berger, the first Socialist in Congress, Will Speak at T. R. Falls.

The people of the northwest will have an opportunity next Monday, to hear a speech by one of the most remarkable men now in the public eye, when Victor L. Berger of Milwaukee will appear at the large auditorium in Thief River Falls as the first number of the list of five attractions comprising the Lyceum course for the season of 1911-1912. Mr Berger holds an unique position before the American public. He is the first Socialist member of that great legislative body—the U. S. congress. He is commonly referred to as the "Father of Milwaukee." Social democracy in that city is what it is, whether good or ill, chiefly because of Mr. Berger. He is its pioneer, its propogandist, its sponsor. Its history is mainly his biography as a citizan of Milwaukee. He rocked it in its cradle, reared it and now exults to see his bantling in control of that great city. During his first term as a member of Congress, Mr. Berger achieved renown as being the author of the now famous "Old Age Pension Bill," and it is in that connection that he is best known to the American public. As a lyceum speaker Mr. Berger has few equals, and his topics, "Why Milwaukee Became Socialist," "The Socialistic View of the Trust Question," and "The French Revolution from a Socialist Point of View," are ranked as masterpieces.

This sterling attraction has been secured for Monday evening, October 16, at the Auditorium, Thief River Falls, at a great expense by the local committee. Season tickets for the course of five numbers, now on sale and can be secured by notifiying H. O. Kjomme or Oscar Sponheim Thief River Falls. The citizens of Thief River Falls extend a hearty cordial invitation to the citizens of the Northwest to attend any or all of the course entertainments.

WORK OF THE ANCIENT HUNS

Stone-Walled Ring That Is Being Excavated at Otsenhausen in the Black Forest.

A Hun ring, reminding one of the Roman castra found in various parts of Great Britain, is being examined afresh at Otsenhausen in the Black Forest district. It dates from pre-Roman times, indeed is believed to be one of the earliest works of the kind.

It lies in the hills 612 meters above the sea, and the wall inclosing it is over 1,300 meters long. The wall is so built as to be completely hidden by trees, and as it is 30 meters broad at the top and ten feet high, the inclosure is practically hidden from view. The stones composing the wall are of small size and loosely arranged, so that the difficulty of surmounting it is increased and the chance of a night surprise diminished.

At present there are several openings in the wall, but it is believed that originally there was only one. The site of the latter has been excavated and the remains of Roman vessels unearthed. The inclosure was supplied with water from a well at one end and must have afforded a refug for a large number of men and cattle.

NO TIME TO PRAY FOR RAIN

Wise Old Negro Slave Knew It Would Not Come Till the Wind Shifted.

During slavery times my father owned a splendid negro man who, however, was rather liberal in his religious views, and was classed by his more emotional fellows as a "plumb infidel." There had been a continued drought, and pious believers, black and white, were to pray for rain. On Sunday morning my father found Henry surreptitiously hoeing a bit of late corn of his cabin, instead of going to church.

"I'm surprised, Henry," said my father. "Why are you not at the meeting to pray for rain with the others?"

Henry shifted from one foot to the other and looked at his master quizzically.

"Now, Marse George," he said, apologetically, "you know, an' I know, 'tain't gwine to rain, nohow till de win' shifts."—Exchange.

SUNDAY SCHOOL STILL LIVES

Are things going to the bad when General Secretary Marion Lawrence is able to report to the International Sunday School convention in San Francisco a Sunday school attendance in this country only a few thousands short of 15,000,000? Since the last convention, three years ago the increase in enrollment has been 1,431,006—itself not a bad sign. In the numerous new organizations being planned for the church, the Sunday school remains the best as well as the oldest, rightly styled the strong right arm of the church. "Long may it wave!"—Leslie's.

SHAKESPEARE NOT IN IT.

Richard Le Gallienne, the well-known author, was condemning at a dinner at Sherry's in New York, the conceit of a certain playwright.

"He is indeed conceited," said a young woman novelist. "In congratulating him on the success of his last comedy, I told him he was the greatest living playwright, and—do you know—he didn't seem at all pleased!"

"No, of course not," said Mr. Le Gallienne, "you should have told him he was the greatest playwright that ever lived."

DISILLUSIONED.

The young man sat beside the beautiful maiden on the sofa.

"Miss Nora," he began hesitatingly, "may I ask you not to call me 'Mr. Durand?'"

A rosy blush crept to the girl's cheeks, and she cast her glorious eyes down at the carpet.

"Well," she stammered, "our acquaintance is so short. Why should I not call you that?"

"Because, Miss Nora," answered the young man, "the fact is, my name in not Durand, my name is Dupont."

THE FIRST EXCUSE.

"It's all your fault, Eve," muttered Adam, when he heard that Abel had been killed. "This comes of the way you've been raising Cain."

SHOOTING RAPIDS IN JAPAN

Exciting Sport for Tourists Made Safe by Marvelous Skill of Native Boatmen.

The rapids on the Hodzu river near Kyoto must fill even the most blase of tourists with excitement. A train from Kyoto climbs slowly and painfully upward until finally it deposits its passengers at a quaint little siding.

From here, says the Wide World, one goes to the river bank and embarks in a rude, flat-bottomed boat, which is pushed out by four men into the middle of a broad river, reed-edged and sleepy.

For a few minutes one glides dreamily along; then, rounding a curve, one suddenly hears the roar of water and the boat tears down a rapid, just missing the banks on each side. The high banks race past, death appears imminent, and then, with one mad swirl, it is all over and the boat is on the quiet unruffled stream once more.

This happens again and again for nearly an hour. At first one's whole mind is filled with the conviction that an accident must happen, but gradually comes a delicious feeling of safety as one notes the marvelous skill these men show in piloting the boat through the seething rapids and one is able to appreciate the beauty of the scene.

TRUTH IS MOTHER OF VIRTUE

In Ancient Mythology She Was Pledge of Honesty and Bulwark of Honor.

In the ancient mythology, Truth was a goddess and the mother of Virtue. She wore garments as white as snow; her looks were serene, pleasant, courteous, cheerful, and yet modest; she was the pledge of all honesty, the bulwark of honor and the light and joy of human society.

Such was truth, which in these days is much abused. We are so apt to think if we have truth on our side we have a right to be proud, arbitrary and even insolent; but when we act that way we may be sure that the truth is not our ally. Truth is not rude and unkind. It does not bawl and bellow and shake its fist under our nose. Truth is friendly, and when it isn't it is a lie.

There is another thought one gets from the mythological faith, and that is this, that Virtue is the daughter of Truth. So if a man's life is presided over by truth, it is necessarily a virtuous and honorable life, and if it isn't that kind of a life he may know that it is born of error and wrong. When we see a man attacking another or another's cause with prejudice, hate and angry words, we turn about and go up street in sorrow, for that man who has never learned that there can be no truth not born of virtue.—Ohio State Journal.

TRIFLES AMUSED JOHNSON.

From Boswell's Life of Johnson "In one of Doctor Johnson's manuscript diaries there is the following entry, which marks his curious minute attention: 'July 26, 1768: I shaved my nail by accident in whetting the knife, about an eighth of an inch from the bottom and about a fourth from the top. This I measure that I may know the growth of nails.' And 'August 15, 1783, I cut from the vine 41 leaves which weighed five ounces and a half and eight scruples. I lay them upon my bookcase, to see what weight they will lose by drying.'"

Be a booster—not a knocker.

Miss Mary Dovre left on Friday for Jevne to teach a term of school.

S. S. Kolden made a business trip by team to Thief River Falls on Tuesday.

Miss Matilda Furr left Friday last for East Grand Forks and will teach a term of school in a district north of that city.

Triple coated enamelled kitchen ware at only 10 cents per piece is a bargain that you never had before. S. S. Kolden & Co.

Twins, boy and girl, were born to Mr. and Mrs. Anton Peterson at their home north of town on Saturday. All doing well.

Mrs. Ole Reierson with her son and daughter, Rudolph and Esther, went to Thief River Falls Monday afternoon for an overnight visit.

M. Scheffel and son were here for a few days looking over lands in the Mud Lake district. They returned to their home near Lyle, Minn., on Monday.

Dr. H. B. Newell, veterinary surgeon, of Thief River Falls, who is a graduate of Chicage veterinary college, will be in Holt on Saturday, Oct. 14th.

A 12-pound baby girl arrived safely at the home of John A. Sorum on Tuesday. Mother and child are doing well and some hopes are entertained for John.

R. L. Olson's big Auction Sale will he held nezt Friday. Half a mile south west of Holt.

J. O. Quisberg, who formerly conducted a real estate office in Holt, has purchased an interest in a general store at Belgrade, in Stearns county, and is now actively engaged in that line of business.

O. P. Wiig, of Perley, exchanged greetings with his son Wm. T. Wiig, Great Northern agent here, on Saturday. Mr. Wiig had been to Roseau county on some real estate business and was on his way home.

Rev. M. B. Ordahl will conduct services in the Holt church next Sunday at 11 o'clock, and the Conferments will meet at 2 o'clock. The Young Peoples Society will meet at Edwin Erickson's the same evening at 7 o'clock.

TAKEN UP—On Friday, Oct. 6, at my place 3 miles west and 1 1-4 miles north of Holt, 1 red heifer calf and 1 red steer calf, white striped. Owner can have same by calling, proving property and paying expenses.
JOHN SWANSON.

The music for the big dance at the M. W. A. hall tomorrow night will be furnished by Morck & Kemptons's orchestra from Thief River Falls. This organization furnishes music of the highest class and will be well worth hearing whether you dance or not.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

Market Day Program will be Very Attractive

Holt's Big Market Day tomorrow promises to be the biggest and best day in the history of the town and its surrounding territory. The exact details of the program could not be arranged until after the arrival of Governor Eberhart this afternoon, as the committee desires to accomodate the time of the addresses to the hour that will best suit the governor's convenience.

Congressman Steenerson arrives this morning and will remain until Saturdry afternoon.

After the departure of the governor and party in the afternoon a program of races and sports will be pulled off on the main street, and the day's doings will close with a big dance at the M, W. A. Hall, for which the music will be furnished by Morck & Kempton's orchestra, of Thief River Falls.

The immense special, low-price sale by the Holt Mercantile Co., is one of the star attractions of the day.

S. S. Kolden & Co., are out with the splendid offer of a ten per cent reduction for cash on everything in their stock of hardware and furniture.

The splendid liberality and public spiritedness of these two firms are entitled to the public recognition and support.

We hope that every reader of this paper will be in the crowd, and bring their neighbors with them. The younger people especially should come to see and hear their Governor and Congressman. Two such prominent public men are seldom to be met at a gathering of this kind and it will be worth traveling many miles to hear them tomorrow.

Come, everydody within reaching distance. You will not be disappointed in the offerings of the day.

We would call special attention to the fact that the Woodman hall will be used for agricultural exhibits and the farmers are urged to bring in good samples of their products so that outside visitors may know the great productiveness of this territory.

Enamelled kitchenware at Kolden's. Triple coated, white lined and the best bargains you ever knew, 10 and 60 cents only, while they last.

R. L. Olson's big Auction Sale will be on Friday, the 20th. Half a mile southwest of Holt.

We want more subscribers and will take potatoes, chickens, or wood at current market prices on subscription. Of course we prefer the money, but if you haven't the cash bring on the produce. Dont be without your home paper anyway.

Our specials in triple coated, white lined, enamelled kitchen ware at 10 and 60 cents are really wonderful values. We have quite a lot on hands and, while they last, we will sell them at these prices. You may never get these goods at such low prices again, so call and get what you want while they last. S. S. Kolden & Co.

Holt Mercantile Co.
"The Big New Store"

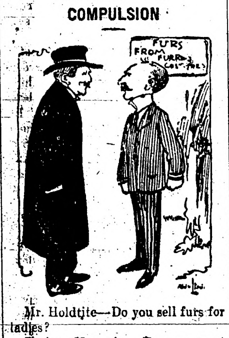
A WHISTLING WELL.

A resident of West Seattle has in his back yard a whistling well which predicts changes of weather instead of gushing water. With the intention of boring for water this man drove a drill 153 feet below the surface.

The well was abandoned at this depth because no water was in sight. Later the owner noticed that the pipe which capped the bore was spouting wind making a peculiar whistling sound. At other times the pipe seems to suck in wind.

By observation it has been found that the expulsion of air precedes a storm of some sort, and the influx of air a change for the better.—Popular Mechanics.

COMPULSION



Mr. Holdtite—Do you sell furs for ladies?

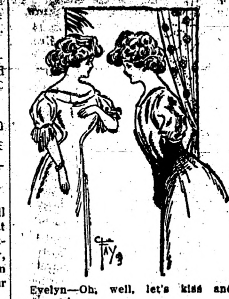
Dealer—Yes, sir. Do you want to buy a set for your wife?

Mr. Holdtite—No, I don't; but it looks as though I'd have to.

ARTISTIC TEMPERAMENT.

Robert W. Chambers, the least Bohemian of novelists, has a horror of all those whose faults are cloaked and condoned with the phrase, "the artistic temperament." "The artistic temperament," said Mr. Chambers, "may be best defined as the habit of borrowing and forgetting to pay."

WILLING TO OBLIGE



Evelyn—Oh, well, let's kiss and make up!

Loraine—All right, dear. I'll do the kissing, but you've had more experience with the other part of the performance.

YOUTH AND AGE.

"Uncle Joe" Cannon, at a wedding breakfast in Danville, indicated in a telling way one of the great differences between youth and age.

"When a man is young," he said, "he is anxious to display his knowledge; but, when he gets old, his desire is to conceal his ignorance."

A FINANCIAL QUERY.

"Are night banks in finance what they are in nature?"

"What do you mean?"

"Are they to collect what's due?"

Commercial Club Meeting

There will be a regular meeting of the Commercial Club of Holt next Tuesday evening at 7:30 o'clock. All members are requested to attend.

AT A CRITICAL PERIOD.

Of Peculiar Interest to Women.

Mrs. Mary I. Remington, Elgleberry St., Gilroy, Cal., says: "I suffered so severely from pain and soreness over the kidneys that it was a task for me to turn in bed. My kidneys acted very frequently, but the secretions were retarded and passages scalded. I was weak and run down. After taking other remedies without benefit, I began using Doan's Kidney Pills and was completely cured. I was going through the critical period of a woman's life at the time and after using Doan's Kidney Pills there was a miraculous change for the better in my health."

"When Your Back is Lame, Remember the Name—DOAN'S."

For sale by druggists and general storekeepers everywhere. Price 50c. Foster-Milburn Co., Buffalo, N. Y.

Try It.

"Mary," said a mother to her quick-tempered little girl, "you must not get mad and say things. You should always give a soft answer."

When her little brother provoked her an hour afterward, Mary clenched her little fist and said, "Mush!"—The Watchward.

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it

Bears the Signature of Chas. H. Fletcher

In Use For Over 30 Years.

Children Cry for Fletcher's Castoria

Just for the Summer.

The old woman who lived in a shoe explained.

"Roomier than the summer hotel rooms," she cried.

Early Standards of Mendacity.

Eve meditated.

"I think that story Adam told me is a lie out of the whole leaf," she announced.

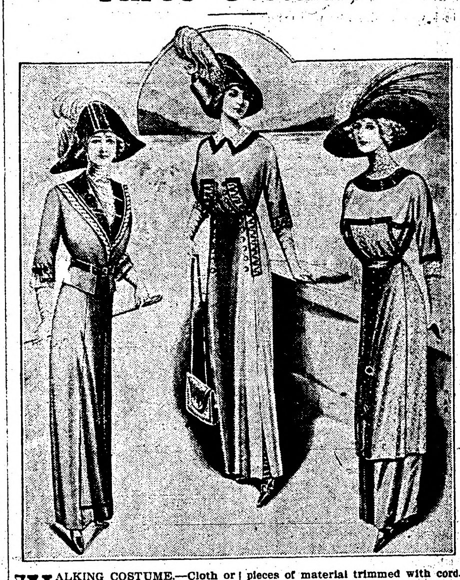
PISO'S
Best for
COUGHS & COLDS

Three Costumes



WALKING COSTUME.—Cloth or serge would make up well in this style; the skirt has a floating panel down front taken to within a few inches of foot. The basque of the Russian coat is added under a belt of black satin, the revers are also of satin edged with black and white striped silk; this with a binding of satin trims the sleeves; a frill of soft lace adds a finish.

Hat of black satin, trimmed with ostrich feathers.

Visiting Dress.—Eau de Nil Venetian cloth is used here, the skirt is slightly high-waisted, and is trimmed part way down each side by cord sewn on quite straight, with a waving of narrower cord between; a row of buttons is sewn on the inside, little openings are left at the foot, to show pieces of material trimmed with cord. The Magyar bodice is trimmed to match, with the addition of black satin, which forms straps outside cord, and finishes collar and cuffs.

Hat of Tagel to match, trimmed with a feather and bead cabouchon.

Smart Dress.—This becoming dress is made up in vieux rose delaine, patterned in black and white, and in plain vieux rose delaine. The tunic and lower part of bodice are of the fancy delaine, the latter is prettily trimmed with strappings of black satin, which also edge the over-sleeves and yoke, while lace is used for the under-sleeves and yoke; the lower part of skirt and upper of bodice are of the plain delaine.

Hat of black chip, trimmed with an aigrette and a large rosette of vieux rose tulle.

MARKING THE FALL COSTUME

Many New Ideas Are to Be Found Among the Latest Effects Designed.

Practically all the new coats are made full length and cut on straight lines. They are made up in pongee, soft finished taffeta and rubberized silk.

Among the novelty coats for fall are those made of taffeta or silk serge and lined with heavy cloth, the cloth being used for the trimming.

Silks, and especially silk velvets, are in the highest favor, and three silk frocks are seen now where before two were shirtwaists and suit skirts.

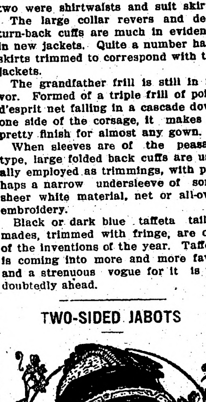
The large collar revers and deep turn-back cuffs are much in evidence in new jackets. Quite a number have skirts trimmed to correspond with the jackets.

The grandfather frill is still in favor. Formed of a triple frill of point d'esprit net falling in a cascade down one side of the corsage, it makes a pretty finish for almost any gown.

When sleeves are of the peasant type, large folded back cuffs are usually employed as trimmings, with perhaps a narrow undersleeve of some sheer white material, net or all-over embroidery.

Black or dark blue taffeta tailormades, trimmed with fringe, are one of the inventions of the year. Taffeta is coming into more and more favor and a strenuous vogue for it is undoubtedly ahead.

TWO-SIDED JABOTS



The modest little jabot which used to fill in the V of the coat opening now looks prim and old-fashioned, indeed. New jabots are stupendous affairs, which make the whole coat front white and fluffy with sheer material and lace frills. This jabot has on one side a rever of tucked lawn and lace. At the straight edge of the rever is a jabot frill of plaited lawn and lace, very wide at the top and tapering to nothing at the bottom. The frill turns back over the left side of the coat front, the rever lying flat across the right side.

ADORNMENT FOR THE BABY

Much Consideration Has Been Given to Designs for the Small Household Monarch.

Sunray shirring is coming in again, and very quaint it looks on the little white bonnets for infants and their sisters of two or three years. The backs of the bonnets are stiffened and round and the side portions also are shirred.

One dainty little bonnet of this style is bordered with a band of white fur, and a second has a narrower band of mink and tiny dabs of the mink over the ears.

Pink apple blossoms apepar on one model, and a cluster of round, pink, unopened buds on another. A wreath is also a very pretty decoration, one being just an applique of alternating leaves and petals, the leaves being of moss-green velvet and the petals of pink silk. White chiffon makes some of these bonnets and white bengaline others. One combines the two materials, the chiffon being shirred in bands and used to trim the more severe outlines of the bengaline.

For a very new baby a long dress has a three-inch ruffle at the foot, applied with cording. A bow of pale blue ribbon, with streamers that reach almost to the hem of the long skirt, is caught at the left side near the shoulder.

For a little tot in short dresses there is a dainty coat of accordion-plaited white chiffon, with a forward turning hem, and a little cape made of white bengaline, embroidered.

Children's Garments.

The best-selling styles in children's garments are those that are copied from women's wear, says the Drygoods Economist. It is surprising how becoming these little coats are. For example, the shawl collar and side fastening, so popular with the grown-ups, are also meeting with great success in children's coats. The same is true of the hood effects, pointed collars, new shape sailors and Incroyable revers. Even the cut-up seams are being employed by the designers with considerable success.

Little Silk Boleros.

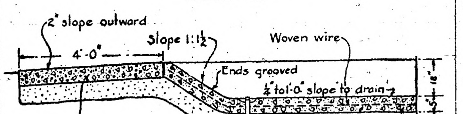
The dressmakers have experimented with boleros for two seasons and they seem to have landed them into fashion at last. They are worn in bright colors with white muslin gowns or old-fashioned frocks of floral organdie. They are finished around the edge with a plaited ruching of ribbon or a ruffle of lace. The severe ones have only a thick cable cord covered with silk or satin.

To Clean Silver Mesh Bag.

Any woman who owns a German or sterling silver mesh bag or purse, and who has learned how one soils light dresses and gloves, will be glad to know that she can clean it in a few minutes herself at home. Just take plenty of soda (common baking soda), this is what the jewelers use, and a little water and brush; rinse well and dry and think of the economy—It looks as good as new.

HOG RAISER SHOULD CONSIDER WALLOW AS REAL NECESSITY

Concrete Affair Proves Practical Scheme for Killing Vermin and Does Away With Expense of Dipping Tank—Crude Oil on Water Keeps Animal's Skin in Good Condition.



Partial Sectional View of a Concrete Hog Wallow. The Wallow Is Simply a Big Concrete Bowl With a Floor 4 Feet Wide Around the Edge.

The hog has been imposed upon more or less by the expression "as dirty as a pig," for, if given an opportunity, no other animal about the farm is more cleanly within his abode than is the porker. Being unable to perspire, the hog naturally suffers from warm weather more than other animals, and because of the lack of a cleaner place in which to cool his body he takes to the mud.

The concrete hog wallow is an improvement which every hog raiser should consider an absolute necessity. The hogs find great satisfaction in the concrete wallow, lying down in the water, excepting in quite cold weather. The wallow proves a very practical scheme for killing vermin when a quantity of crude oil or other disinfectant is put in and the intake and outlet stopped. This does away with the expense of a dipping tank and the trouble of dipping. Many farmers keep a small amount of oil in the wallow at all times, which keeps the skin of the animals in good condition. The crude oil remains on the surface of the water, and therefore does not escape into the outlet.

The wallow should be located near the water supply, whether this consists of a tank or spring. If the water is received from a tank, the wallow may be emptied and refilled at intervals, the intake and outlet ordinarily being kept closed. If the supply is not limited the water may be allowed to flow through the pool continuously. Where necessary, provision should be made for draining the outlet into the nearest line of tile.

The sectional view shown in figure 16 gives a good idea of the general shape and construction of the wallow. It will be found convenient to make the pool rectangular, with the rounded corners, giving it a depth of not over 18 inches. For the ordinary piggery the pool should be 15 to 20 feet long and 100 feet wide. A concrete floor 4 feet wide should be laid around it to prevent the hogs from burrowing or carrying in mud.

COW MUST BE KEPT CONTENTED

Dairy Animal Must be Catered to if Best Results Are to Be Secured—Three Essentials.

Among the factors that the countryman who feeds animals, whether for growth or for product, finds of basic importance, are the following:

Individual preference on the part of the animal must be catered to if the best returns are secured. The animals must be satisfied, and their likes and dislikes are almost as pronounced as in the human family. Early stockmen, and particularly those handling large numbers of animals, ignored this factor; but, under modern high pressure conditions, it is profitable practice to take the question of individuality into consideration. In the successful dairy each cow must be fed according to her individual needs and humor, because only a contented, satisfied animal gives the maximum milk flow.

The second fundamental is palatability. Experiments have conclusively proved that feed the animal likes will do it the most good. There must be variety to the ration to keep up the appetite and to stimulate digestive processes. This is where corn ensilage has its great merit. As a salad with a pungent odor and characteristic sharp flavor, it is especially an appetizer and keeps the digestive processes in vigorous working order.

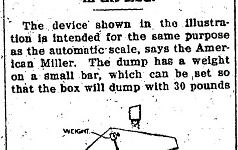
In the third place, the feed must be ample in every particular. A deficit in one of the essentials for growth or production, whether protein, carbohydrates, fats or ash, is a weak link in the chain which may make the entire feeding system ineffective.

Nothing is doing more to improve the methods of feeding than the increasing cost of feedstuffs. The stockman must get larger returns from the feeds he uses, and this will compel him to study the science of animal feeding and put his practice upon the right basis.—Saturday Evening Post.

WHEAT DUMP WORKS ITSELF

Device Has Weight on Small Bar, Which Can be Set so Box Will Dump With 30 pounds in the End.

The device shown in the illustration is intended for the same purpose as the automatic scale, says the American Miller. The dump has a weight on a small bar, which can be set so that the box will dump with 30 pounds in either end. This will make 60 pounds when both ends are dumped. As the register works on every dump, it registers 60 pounds or one bushel of wheat.



Dump in Action.

New Cockerels.

If your young chicks do not show the quality you expected, make up your mind to spend from $10 to $25 on new cockerels next winter.

BALANCED FEED FOR LIVE STOCK

Few Farmers Understand Feeding and Medicinal Value of Either Blood or Linseed Meal.

(By E. C. GLITZKE.)

Few farmers understand the feeding and medicinal value of either blood meal or linseed meal. Perhaps no other food contains the necessary food element in such concentrated form.

In order to be successful in their use one must thoroughly understand their composition, for the one is exactly oposite, both in medicinal and food value, from the other.

Blood meal is a highly concentrated form of protein, that most valuable of food elements—the part from which animals receive their muscles. It is the main element that growing stock should have in order to build up a strong constitution.

Where much corn is fed some blood meal should be added in order to balance up the ration, for corn is very rich in fat.

Such young stock as pigs, calves and colts very often get the scours from overfeeding, but a few doses of blood meal will correct the bowels at once and carry the animal safely through this dangerous disease.

In the case of very young stock that follow their mother it should be given to the dam and the young will get the benefit of it through the milk. In all other cases give it directly to the young stock in such quantities as may be needed to suit the size of the animal and severity of the case.

Linseed meal is exactly opposite in all its properties. It has a tendency to loosen the bowels, therefore it is Linseed meal is very rich in fat—the very valuable in cases of constipation. food element that gives heat and energy to the stock.

Where any food deficient in fat is fed to the stock a quantity of linseed meal should be added to balance up the ration.

Hand-fed calves are usually fed on skimmed milk. Now the fat of the milk has been taken out by the separator and therefore the protein remains in excess of all other elements.

A small quantity of linseed meal fed in the milk will balance up the ration and make it practically as good as the whole milk.

In cases of constipation in very young stock that follow their mother it should be given to the dam, as the young will get the benefit of it through the milk.

Where these two articles are kept on hand the farmer need have no fear of either constipation or scours in his stock, for these two articles act exactly as described and no evil results need be feared from their constant use.

Vitality of Weed Seeds.

Thirty years ago Dr. W. J. Beale, professor of botany at the Michigan agricultural college, buried in a box in the ground 20 varieties of weed seeds to test their vitality. Of these more than five varieties were found to be alive and quick to grow at the end of the thirty-year dormant period.

Proper Feed for Fowls.

The most successful poultry raisers realize the importance of feeding their fowls properly balanced rations, and it is safe to say that no one can attain the highest success with poultry unless the right kind and the right quantity of foods are supplied.

W. N. U., FARGO, NO. 41-1911.

Circumstantial Evidence.

A Scotchman and his wife were visiting in a wild, beautiful part of the country. While driving one day with their host, the two men sitting together in the front seat, while the lady sat behind, they crossed a high bridge which spanned a roaring torrent. An unusually loud splash caught the gentlemen's attention for a moment, but nothing was said. After several miles the gentleman turned to address a remark to his wife, but her seat was empty.

"Aye," he remarked to his host, "that will be yon splash we heard."—Housekeeper.

A Superior Person.

F. H. Elliott, the secretary of the American Automobile association, was talking about a somewhat supercilious and conceited millionaire.

"He's a very superior person," Mr. Elliot said, smiling. "He's the sort of person who would be sure to go to a horse show in a motor car and to an automobile show in a monoplane."

Not Knocking Slattery.

Mrs. Coogan—An' the little thing is the divil's own image of his father.

Mrs. Slattery—Yis, but I don't moind that so long as he kapes hilthy.—Puck.

His Blasted Life.

"You refused me ten years ago."

"I remember," said the heiress. "You said it would wreck your life."

"It did. I have had to work for a living ever since."

A peck of trouble looks like a bushel to the man who is up against it.

Saves Worry Time and Trouble

Post Toasties

Can be served instantly with cream or milk.

The KITCHEN CABINET

THROUGH tatter'd clothes small vices do appear;
Robes and furr'd gowns hide all?
—Shakespeare.

'Tis not enough to help the feeble up,
But to support him after.

CARE OF FLOORS.

The highly-polished floors which are such an addition to the appearance of the home are also an addition to the work, for the surfaces show every grain of dust and lint. A broom covered with a soft flannel bag which has been sprinkled with a little oil, can be used several times without washing. If the floor is waxed water must be kept from it, as it turns it white.

If one likes a stained floor, permanganate of potash, a tablespoonful to a quart of water, is a good one. Dissolve it in boiling water and apply to the well-cleaned floor with a brush. It dries immediately and then any good oil or varnish may be used.

If one likes a clean, scrubbed floor, and there is but one pair of hands to do the work, try this plan of one housekeeper who has much to do, but likes to have an immaculate floor:

She scours a spot about three or four feet square with sapolio and a good brush, washing and rubbing perfectly dry with a dry, absorbent cloth. It takes fifteen or twenty minutes and she is not tired. The next day she does a little more, and with a small kitchen (as all should be these days) she keeps a good looking floor without too much work. A rug is spread over the freshly-scrubbed portion.

If the linoleum is worn off and looks bad on the floor, turn it over and give it a good coat of paint of flat color. It will outlast a new oilcloth. The upper surface will not take the paint as the under one will.

Oil for Dusting Floors.—Fill a bottle with one part linseed oil, one part turpentine and one part kerosene. Use this on the cloth or broom bag to dust the oiled or varnished floors. A weekly application with a floor mop to the linoleum will keep it looking like new.

If hot grease is spilled on a floor, put cold water on it immediately. The fat will harden and can much of it be scraped off before it soaks in.

A heavy rug to stand on when ironing or washing dishes will save tiring the feet.

OH, THIS is prime, chestnutting time
Has come at last, and so,
While fields are white with gleaming rime,
Into the fields I go,
A basket on my arm to bear
The treasures that I gain.
Oh, who would harbor thoughts of care
And who deem life in vain,
While merrily the crickets call,
And cheerily the chestnuts fall.

THE OCTOBER NUT.

The chestnut, though not grown in all parts of the United States, is found in almost every ordinary market. Chestnuts are palatable in almost any form and may be served in soup, as an entree or confection.

The shells are removed by cutting a half-inch gash in the side of the shell; then put them into a pan with a bit of butter, a half teaspoonful to each cup of nuts. Shake over the fire until the butter is melted, then put into the oven for five minutes. With a sharp knife remove the shells and the inner brown skin will come off at the same time.

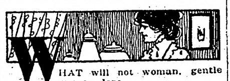
Chestnut Soup.—Cook two cups of shelled and blanched chestnuts in boiling water until tender; press through a sieve and add two cups of scalded milk. Cook two tablespoonfuls of onion in four tablespoonfuls of butter for five minutes, add two tablespoonfuls of flour and when well blended add the chestnut mixture, salt and cayenne to taste. Cook five minutes and add a cup of cream; reheat and serve.

Chestnuts en Casserole.—Remove the shells from three cups of chestnuts, put into the casserole and pour over three cups of highly-seasoned chicken stock. Cover and cook slowly three hours, then add two tablespoonfuls of butter and one of flour cooked together before adding. Serve at the table from the casserole.

Chestnut Roulettes.—Take a cup of chestnut puree prepared as for soup, add a few drops of onion juice, two well-beaten eggs, two tablespoonfuls of butter, the same of thick cream, salt and paprika. Shape in balls the size of the French chestnuts; roll in crumbs and egg and fry in deep fat.

Old Roman Lighthouse.

La Coruna, the Spanish harbor, boasts, it is said, of the oldest lighthouse in the world, it having been built by the Romans in the time of Trajan, between 98 and 117 A. D. About 111 years ago the structure was overhauled and partly rebuilt, though the lower part of the pile was found to be in perfect condition, a tribute to the building ability of the Roman masons. When the weather is favorable the light can be seen a distance of 22 miles at sea.



WHAT will not woman, gentle woman dare,
When strong affection stirs her spirit up?
—Southey.

SOUP ACCESSORIES.

It is a bit hard at times to know what to serve with different soups.

For a rich cream soup dry salted crackers are most appropriate.

Croutons are prepared by cutting bread in very small cubes and frying them in deep fat, or butter the slices first and brown the cubes in the oven. These are served with broths and clear soups that have flavor more than nourishment.

Pulled bread is another accessory which is served with almost any kind of soup. Newly baked bread is taken from the oven and the crusts removed. The center is then pulled apart and baked again in the oven until a light brown.

Rice Balls.—Press a cup of cooked rice through a sieve, add two tablespoonfuls of flour, season well with salt, cayenne and nutmeg, a teaspoonful of lemon rind and one of chopped beaten egg. Roll in balls and cook in boiling salted water. Serve hot with soup.

A few tablespoonfuls of whipped cream added just at serving time to a cream soup and sprinkle with chopped chives or parsley adds both to the flavor and appearance.

Fritter Beans.—Melt a teaspoonful each of butter and lard, four tablespoonfuls of milk, and when boiling add salt, cayenne and the butter which has been cooked with a teaspoon of flour. Cook two minutes, then add four tablespoonfuls of cheese and two well-beaten eggs. Cool and drop from teaspoon into hot fat; drain and serve hot.

Cheese Sticks.—Cut bread sticks in halves lengthwise, spread thinly with butter, sprinkle with grated cheese, season with salt and cayenne and bake a delicate brown.

Noodles.—Beat an egg slightly, add a half teaspoon of salt and flour enough for a very stiff dough. Knead and roll as thin as paper. Cover with a towel and set aside for twenty minutes. Then cut in any desired shape, dry, and when needed cook twenty minutes in boiling salted water. Drain and add to the soup.

AH! You flavor everything.
You are the vanilla of society.

Men really know not what good water's worth.
—Don Juan.

SOME CASSEROLE DISHES.

A casserole need not be an expensive one with the silver rack to hold it, though such a one is a pleasure to possess.

Any stone-covered dish large enough to hold a fowl or meat and vegetables for a family meal will answer the purpose. Many use an ordinary bean pot for the cooking, though that cannot be placed on the table, as the nicer dishes may.

Vegetable Hash.—Cut fine a cup of carrot, a cup of turnip, the same amount of potato and a pound of chopped round steak. Add suet or butter, a piece the size of an egg, and two cups of boiling water. Bake in the bean pot, casserole or covered stone dish for two hours. Season when the vegetables have begun to cook.

Baked Chicken.—Take an old fowl, cut it up as for fricassee and roll each piece in seasoned flour. Poud over it a quart of good rich milk, cover and cook slowly for five hours; add more milk if it gets low and remove the cover long enough at the last to brown the chicken.

Baked Onions With Cheese.—Peel but do not cut the onions; parboil them, removing the water. Then put into the casserole with boiling water and butter. Cook until nearly tender, sprinkle with grated cheese and seasonings and finish cooking. Serve from the dish.

Potatoes and Sausage.—Parboil small-sized potatoes for five minutes; place in the casserole, cover with boiling water, and put on top of the link sausages and bake for two hours.

Spanish Dish.—This is a dish to use up left-over meat, but is so good that it never suggests a left-over. Put into the casserole a few slices of raw potatoes, the size of dish will depend upon the family. Then put in a layer of chopped cold meat; a cupful will be sufficient for three or four potatoes. Pour over a cup of tomatoes, a sprinkling of chopped onion and the gravy, if any, from the meat. Cover and cook an hour and just before serving sprinkle over the top a tablespoonful or two of cooked green peas for a garnish.

Nellie Maxwell.

Use the Plural.

"Mother, in sending out my birthday invitations, shall I say 'Your presence is requested?'"

"Of course not, my dear, you should say: 'Your presents are requested.'"

HERE IS SIMPLE LUNCH

DAINTY AND AMPLY SUFFICIENT FOR THE PURPOSE.

Also Has the Valuable Qualification of Being Easy to Serve When Chance Visitors Arrive at a Busy Time.

Although this lunch is dainty enough to tempt the most capricious appetite, yet it is sufficiently satisfying to serve as the only meal between breakfast and dinner. Hard boil as many eggs as are necessary, allowing two eggs for each plate required. When cool enough to handle remove the shells and carefully cut each egg in half lengthwise. Crumble all the yolks in a bowl, add salt, pepper, paprika, mustard to taste, and finely chopped cold ham or veal in the proportion of about a teaspoonful for each egg. Mix well. Then moisten with lemon juice and olive oil in proportion to suit the taste, adding enough liquid to make a very soft, smooth paste. Replace this mixture in the empty whites and arrange four halves around a lettuce leaf on a plate. In the center place a generous tablespoonful of cut up radishes and celery, being careful in cutting these that each piece of raddish shows some of the bright red outside. Around the outside of plate, between the halves of egg, put more radishes, cut in larger pieces than those used in the center. Then put the plates in the ice box until the sandwiches are prepared. Make these of thinly sliced white bread spread with butter and cheese. While any kind of cheese will make tasty sandwiches, if American cheese is used it is better to grate it and then sprinkle it over the buttered bread than merely to slice it. When the sandwiches are ready to serve remove the plates of salad from the ice box and over the center of each pour some mayonnaise dressing. Coffee or a light beer, depending upon one's preferences and convictions, is the drink to be served. And the salad is so satisfying that few will feel the need of a sweeter course to follow.

If one has the mayonnaise dressing ready, this lunch can be prepared very quickly by systematizing the work to be done. If one has no mayonnaise the salad will be just as delicious if the celery and radishes are marinated in French dressing while the eggs and sandwiches are being prepared. The French dressing then should be passed around at the table.

Veal Steak.

Select a good, meaty piece of veal from the leg in one piece, about two inches thick. Fry about eight or ten slices of bacon in a deep steel or iron frying pan; do not fry too crisp, and when done remove them and pour off the fat, leaving just enough on pan to fry the veal. Brown the veal well, on both sides. When well browned lay on top the bacon slices and pour on enough boiling water to barely cover all; salt to taste and add to water sliced three medium sized onions. Cover tightly (use a cover with an iron on top) and let simmer slowly for about two hours, according to thickness of meat. About ten minutes before it is done rub to a smooth paste in water a heaping tablespoonful of flour to thicken gravy. A little left over meat gravy or soup stock adds richness to gravy.

Preserving Time.

Spiced grapes are nice for children's school lunches by and by.

Plums preserved not too richly make a tart and excellent winter fruit.

Before grapes get too ripe is the best time to make jelly.

Peaches which are too green make a very poor canned product.

Yellow tomatoes, with lemon stewed down rich and thick, are liked in many families.

The queen of fruits for some purposes, the quince, will soon be in market.

To Set Color.

Keep your material in the same creases as when bought, open only enough to lie easily in the tub to cover the goods, and leave sufficient length of time to be thoroughly shrunk. Then lay a broom across the tub and carefully hank the material on it, still folded. Thus it will drain in the tub and so dry. On removal the goods will be as pressed and smooth as when bought.

Delicious Spice Pie.

The yolks of three eggs, one and one-half cups of sugar, one cup of good cream, two tablespoons of flour, two-thirds of a cup of butter, one teaspoon of spice, cloves, cinnamon, and nutmeg. Mix flour and sugar together, then cream with butter; add yolks of eggs, beating thoroughly; next add cream and spices. Use the whites for the frosting on top.

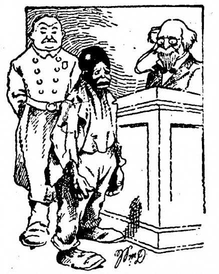
Pickled Lambs' Tongues.

Wash well and trim neatly twelve lambs' tongues. Boil in salt water until tender. Skin and pack in glass jars while tongues are hot. Put in a very few whole allspice and cloves, cover with hot vinegar and seal at once.

Home Fried Potatoes.

Cut raw potatoes in medium thick slices. Put a tablespoonful of lard into a frying pan, and when hot turn in the potatoes, season to taste, cover and fry brown.

AWFUL SURPRISE.



Magistrate—This officer says you approached your wife, spoke to her and she fainted.

Rastus—Dat's right, Jedge.

Magistrate—What did you say to her?

Rastus—Jes' tole her dat I loved her, sah.

RASH ALL OVER BABY'S BODY

Itched So He Could Not Sleep

"On July 27, 1909, we left Boston for a trip to England and Ireland, taking baby with us. After being in Ireland a few days a nasty rash came out all over his body. We took him to a doctor who gave us medicine for him. The trouble started in the form of a rash and was all over baby's body, head and face, at different times. It irritated, and he would scratch it with all his might. The consequence was it developed into sores, and we were afraid it would leave nasty scars on his face.

"When we reached England we took baby to another doctor, who said his condition was due to change of food and climate, and gave more medicine. The rash got no better, and it used to itch and burn at night so bad that the child could not sleep. He was completely covered with it at different times. It was at this time that my mother advised us to try Cuticura Soap and Ointment. After using Cuticura Soap and Cuticura Ointment for about nine months the places disappeared. There are not any scars, or other kind of disfigurement, and baby is completely cured by the Cuticura Soap and Ointment. We have no further trouble with baby's skin. Nothing stopped the itching, and allowed baby to sleep but Cuticura Soap and Cuticura Ointment." (Signed) Mrs. Margaret Gunn, 29 Burrell St., Roxbury, Mass., March 12, 1911.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to Cuticura," Dept. 14 K, Boston.

The Proof.

Mrs. J. G. Phelps-Stokes, in an address in Pittsburgh, was urging her women hearers to learn to be good cooks.

"If," she said quaintly, "you would convince your husband that you are a better actress than Duse and a better dancer than Pavlowa, prove to him that you are a better cook than Escoffier."

Why is it that so many people suffer with Lame Back? Hamlins Wizard Oil will cure it and for Aches, Sprains, Bruises, Cuts, Burns, etc., there is nothing better.

Let me fail in trying to do something rather than sit still and do nothing.—Cyrus Hamlin.

GUARANTEED TO BE PURE.
PE-RU-NA FOR COUGHS AND COLDS

44 Bu. to the Acre

is a heavy yield, but that's what John Kennedy of Edmonton, Alberta, Western Canada, got from 40 acres of Spring Wheat in 1910. Reports from other districts in that province showed other excellent results—such as 4,000 bushels of wheat from 120 acres, or 33 1-3 bu. per acre. 25, 30 and 40 bushel yields were numerous. As high as 132 bushels of oats to the acre were threshed from Alberta fields in 1910.

160 ACRE FARMS IN WESTERN CANADA FREE

The Silver Cup at the recent Spokane Fair was awarded to the Alberta Government for its exhibit of grains, grasses and vegetables. Reports of excellent yields for 1910 come also from Saskatchewan and Manitoba in Western Canada.

Free homesteads of 160 acres, and adjoining pre-emptions of 160 acres (at $3 per acre) are to be had in the choicest districts.

Schools convenient, climate excellent, soil the very best, railways close at hand, building lumber cheap, fuel easy to get and reasonable in price, water easily procured, mixed farming a success.

Write as to best place for settlement, settlers' low railway rates, descriptive illustrated "Last Best West" (sent free on application) and other information, to Sup't of Immigration, Ottawa, Can., or to the Canadian Government Agent. (30)

Constipation Vanishes Forever

Prompt Relief—Permanent Cure
CARTER'S LITTLE LIVER PILLS never fail. Purely vegetable — act surely but gently on the liver. Stop after dinner distress—cure indigestion, improve the complexion, brighten the eyes.
SMALL PILL, SMALL DOSE, SMALL PRICE.
Genuine must bear Signature
Brent Good

PARKER'S HAIR BALSAM
Cleanses and beautifies the hair. Promotes a luxuriant growth. Never Fails to Restore Gray Hair to its Youthful Color. Cures scalp diseases & hair falling. 50c, and $1.00 at Druggists

ALLEN'S ULCERINE SALVE
For the treatment of Chronic Ulcers, Bone Ulcers, Scrofulous Ulcers, Varicose Ulcers, Indolent Ulcers, Mercurial Ulcers, White Swelling, Milk Leg, Fever Sores, all old sores. Very successful. By mail 50 cents. J. P. ALLEN MEDICINE CO., Dept. A4, St. Paul, Minn.

PATENTS Watson E. Coleman, Washington, D.C. Books free. Highest references. Best results.

If afflicted with sore eyes, use Thompson's Eye Water

A Reader Cures His Constipation—Try It Free

Simple Way for Any Family to Retain the Good Health of All Its Members.

The editors of "Health Hints" and "Questions and Answers" have one question that is put to them more often than any other, and which, strangely enough, they find the most difficult to answer. That is "How can I cure my constipation?"

Dr. Caldwell, an eminent specialist in diseases of the stomach, liver and bowels has looked the whole field over, has practised the specialty for forty years and is convinced that the ingredients contained in what is called Dr. Caldwell's Syrup Pepsin, has the best claim to attention from constipated people.

Its success in the cure of stubborn constipation has done much to displace the use of salts, waters, strong cathartics and such things. Syrup Pepsin, by training the stomach and bowel muscles to again do their work naturally, and with its tonic ingredients strengthening the nerves, brings about a lasting cure. Among its strongest supporters are Mr. John Graveline of 98 Milwaukee Ave., Detroit, Mich., Mr. J. A. Vernon of Oklahoma City and thousands of others. It can be obtained of any druggist at fifty cents and one dollar a bottle, or if you want to try it first a free sample bottle can be obtained by writing the doctor.

For the free sample address Dr. W. B. Caldwell, 201 Caldwell building, Monticello, Ill.

W. L. DOUGLAS
$2.50, $3.00, $3.50 & $4.00 SHOES

Men and Women wear W. L. Douglas shoes because they are the best shoes produced in this country for the price. Insist upon having them. Take no other make.

THE STANDARD OF QUALITY FOR OVER 30 YEARS

The assurance that goes with an established reputation is your assurance in buying W. L. Douglas shoes.

If I could take you into my large factories at Brockton, Mass., and show you how carefully W. L. Douglas shoes are made, you would then understand why they are warranted to hold their shape, fit better and wear longer than any other make for the price

CAUTION The genuine have W. L. Douglas name and price stamped on bottom

If you cannot obtain W. L. Douglas shoes in your town, write for catalog. Shoes sent direct from factory to wearer, all charges prepaid. W. L. DOUGLAS, 145 Spark St., Brockton, Mass.

ONE PAIR of my BOYS' $2, $2.50 or $3.00 SHOES will positively outwear TWO PAIRS of ordinary boys' shoes

SPOHN'S DISTEMPER CURE

For DISTEMPER Pink Eye, Epizootic Shipping Fever & Catarrhal Fever

Sure cure and positive preventive, no matter how horses at any stage are infected or "exposed." Liquid, given on the tongue; acts on the Blood and Glands; expels the poisonous germs from the body. Cures Distemper in Dogs and Sheep and Cholera in Poultry. Largest selling live stock remedy. Cures La Grippe among human beings and is a fine Kidney remedy. 50c and $1 a bottle; $5 and $10 a dozen. Cut this out. Keep it. Show to your druggist, who will get it for you. Free Booklet, "Distemper, Causes and Cures." Special Agents wanted.

ADVENTURES of the WORLD'S GREAT DETECTIVES

By George Barton

The Mystery of the Hanoverian Coins.

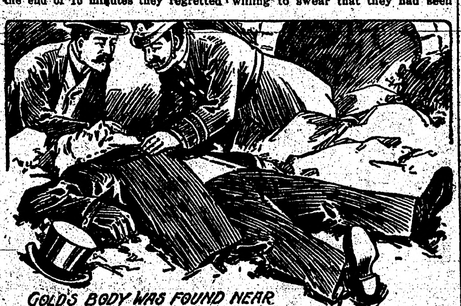
An Episode in the career of James Frazer one time Chief of Police of London.

COPYRIGHT 1911 BY W. G. CHAPMAN.

SOME time in 1881, John Gold, a retired merchant residing at Preston Park, Brighton, England, who had been traveling abroad, was mysteriously effaced from the earth. He was on his way home and had taken a first-class carriage on the afternoon express train. But when the train reached its destination he was not in it. And no stops had been made at way stations! The railway guards said that he was last seen somewhere between the Merstham and Balcombe tunnels.

When the railway carriage arrived at Preston Park a man, who gave the name of Lamon, alighted and claimed that he had been the victim of a murderous assault. He said that there were two other persons in the carriage with him, one of whom was disguised as a countryman. They had talked together on indifferent subjects, but when the train entered the Merstham tunnel some one had fired a pistol. Lamon said that before he knew what was going on some one struck him on the head and he fell senseless on the floor. He averred that he remained in this condition until just before the train reached Preston, when he recovered consciousness only to find himself alone in the carriage.

His appearance bore out his story. He seemed dazed. He had lost his collar and tie, and from the appearance of his clothing these articles had been torn forcibly from his person. The ticket taker at Preston Park said that Lamon was very emphatic in his denunciation of the railway company. The agent also noticed that the end of a watch chain was hanging from the boot of the injured man.



GOLD'S BODY WAS FOUND NEAR THE BALCOMBE TUNNEL.

The police offerd to accompany the man to his home where they might get his deposition. He said he resided at Croyden, and that it was not necessary for them to go with him. They insisted, however, and he went to a girl's boarding school at that place, managed by his relatives. He asked permission to go into the house to change his clothes. The police granted this request and while waiting for him strolled about the grounds. At the end of 15 minutes they regretted their generosity and went inside to seek their man. But he had gone. His relatives—who were very distant ones—had no knowledge of his movements. He told them he had to see a doctor at once and then had quickly, if somewhat discourteously, disappeared through a rear entrance of the school building.

The officers returned to Brighton very much chagrined. Here fresh and very startling information awaited them. It was announced that Mr. John Gold had been murdered. His body had been found on the ground near the line of the railway within the Balcombe tunnel. The physicians who examined the corpse said that death had been caused by a fracture of the skull. The theory was that he had been first shot by some one in the car, and that after a struggle had been thrown from the train, thus receiving the wound which caused his death.

James Frazer, the chief of police of London, gave the case his careful attention. He realized from experience that there were no problems more difficult to solve than these mysteries of railway carriages. But he was also aware that the merest trifle sometimes points the way to the guilty man. The finger of suspicion in this case pointed very strongly to Lamon, but up to the time Frazer was called in it was merely conjecture. His flight was against him, but innocent men have been known to act foolishly under trying circumstances.

Chief Frazer recalled that the guilty man in the famous Briggs murder had been captured from the fact that his photograph had been published in one of the London newspapers. Indeed, this case resembled the Gold murder in many of its leading aspects. Mr. Briggs was thrown from a railway carriage and killed. A hat that was left by the murderer contained a lining on which was printed the name of a well known English hatter. This clue led to the discovery and arrest of the culprit, although it involved a pursuit across the Atlantic ocean.

The chief felt that some similar clue might be found in the present instance. Accordingly he addressed himself to the work of a minute examination of the railway carriage. The first discovery exceeded his fondest expectations. Two Hanoverian coins were picked up from the floor of the vehicle. That was a good starting point. A detective was next sent to the neighborhood where Lamon resided. Every shop-keeper in that section was subjected to a severe cross-examination. Most of them knew the man, but said that he had not made any recent purchases. A young clerk in a grocery store, however, said that he had talked with Lamon only two days before.

"What did he want?" asked the detective.

"He came here and bought a quantity of tinned goods," was the reply.

"How did he pay for them?"

"In gold."

"How do you remember this?"

"Because it is so unusual, sir. After he had finished selecting his goods, he handed me two Hanoverian coins, saying with a laugh that he didn't suppose we would object to that sort of money. We didn't. We took them for gold and he was given 13s. 6d. in change."

The toils were now closing in around Lamon. When Mr. Gold was discovered dead it was found that his watch had disappeared, together with about $200 in money which he had collected in London that morning as dividends on some stock he owned. Several persons were found who were willing to swear that they had seen the watch in Lamon's possession. The man was very bold, for he left a perfect trail of gold along the shops where he had spent the money. But when the police came to the grocery store, it was as though they had reached the end of a blind alley. No further trace of the fellow or his money could be obtained.

It has been said that there is no place in the world where a man can lose his identity more thoroughly than in the city of London. Lamon had disappeared as completely as though he had been swallowed up by the earth. Not only the city police, but also the detectives from Scotland Yard, were given orders to look out for Lamon. Day after day went by and they had only their labor for their pains. A photograph of Lamon was now published in one of the daily newspapers with the announcement that he was wanted by the police. With this was given a brief account of the murder of Gold.

At this time there lived in a Stepney lodging an engraver of the name of Park. He was quiet and retiring in his manner and seemed to have no desire to mix with the other lodgers. He was greatly esteemed by his landlady, not only because he was regular in his habits, but also (more important) because he was regular in payment for his lodgings. He kept his blinds down constantly, saying quite frankly that he wished to escape observation and also that rest and quiet were necessary for his work.

On the morning the newspaper picture of Lamon was published the Stepney landlady passed it over to her lodger and asked him if he did not think it was a remarkable case. He looked at the picture intently and also read the summarized account before he replied:

"No; I don't think there's anything wonderful about it."

"Goodness gracious, Mr. Park," she protested, with the volubility of her class. "I think it's the most romantic thing I ever heard of in all my born days."

The engraver merely smiled.

"You needn't laugh," she cried; "just imagine a murderer being at large in the streets of London!"

"There are many of them," he commented dryly.

"Yes, but we may be passing this Lamon on the street for all we know."

"Quite likely."

"And you don't think it's wonderful!"

He shook his head.

"Only a clever criminal getting the best of the stupid police."

"They say murder will out," remarked the landlady sagely.

"Don't you believe it," retorted the engraver. "That's one of those copy book maxims that sounds well, but it won't bear the test."

"But this fellow—this Lamon—will be caught sooner or later?"

"Why?"

"Well, everybody will be on the lookout for him after this publication."

The lodger threw his napkin aside with a gesture of dissent.

"He'll be safer now than ever," he said; "he'll be on his guard."

"You talk as if you knew him."

"I do," he confided to her, "and from my knowledge of the man he will not let the police get him."

That afternoon the landlady met a friend who was a policeman, and repeated the conversation she had had with her lodger at the breakfast table. The policeman in turn reported it to his official superior, and before twenty-four hours had elapsed Mr. Park, engraver, was being shadowed by one of Mr. James Frazer's plain clothes men. But he stood the test well. He came and went silently but there was nothing in his daily life that did not seem to stand the severest scrutiny.

The secretive lodger had a work bench in his room, supplied with tools, and at times he could be seen at work with a green shade pulled down over his eyes. Once or twice the man who was shadowing him lost the trail, but as the shadowed one promptly reappeared no great significance was attached to these temporary lapses.

One day Chief Frazer learned that a stranger had been seen in the vicinity of Preston Park, Brighton, making inquiries concerning the Gold murder. The unknown person asked all sorts of questions and was particularly anxious to know the whereabouts of the ladies who kept the girls' boarding school near Croyden. This, it will be recalled, was the place where Lamon had gone directly after leaving the train, and whence, on the plea of changing his clothes, he had made his escape. It so happened that the school was closed for the short holiday. The pupils were at their homes and the ladies in charge were spending a few days in London.

There was great consternation the following day when it was learned that someone had entered the school. The thief had broken open a side window, and after ransacking a number of rooms had escaped by the rear door. Drawers had been pulled out of their places and the contents thrown about the floor. But the amazing feature of it all was the fact that nothing had been stolen. At least, that was the assertion of the ladies, and they were in a position to know what they were talking about. They were maiden ladies and very precise and systematic in their habits. They had a little book which contained a list of every article in the house. This included not only the furniture but also every ornament, every book and every particular article of wearing apparel. They made a careful survey of the establishment and found everything intact. Thus, but for the fright and the inconvenience of having their property disarranged, no damage had been done.

The police were at their wits' ends. The murder was bad enough, but this useless housebreaking—to their official minds—seemed worse. It was suggestive of the supernatural. It got on their nerves. But Chief Frazer, in his London office, was thinking and preparing to act. The day after the second scare at Croyden he sent for a trusted officer and gave him minute instructions.

That morning a plain clothes man called at the Stepney lodgings and asked for Mr. Park.

"I'm sorry," said the loquacious lady, "but he's gone to town."

"Then I'll wait."

The landlady was delighted—and more talkative than usual. She gave the visitor many details concerning the daily life of Mr. Park. She was especially impressive concerning the workshop of her lodger and even consented to let the visitor take a peep into the sanctum sanctorum.

"Oh," he murmured with a satisfaction that could not be concealed, "it's just as I thought."

This emboldened the landlady.

"Might I ask why you wanted to see Mr. Park?"

"Certainly," retorted the obliging caller, "I want him to tell me what he knows about the murder of Mr. Gold."

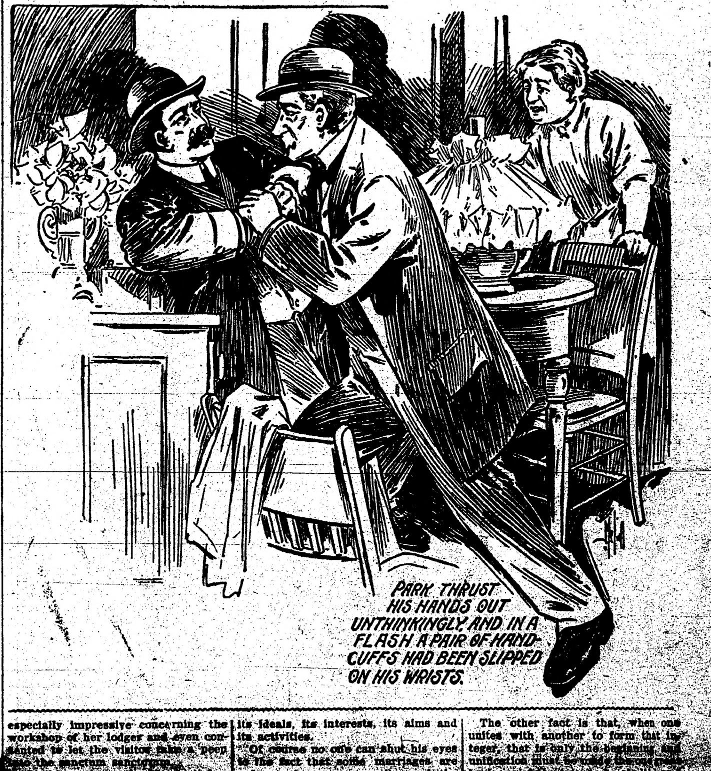
At this point in the conversation Mr. Park came into the house.

"My friend," said the officer, without any ceremony, "I want you to help me to arrest the murderer of John Gold."

The lodger smiled, showing a set of shining teeth.

"My dear sir," he replied, "your request is preposterous!"

"Not so much as you think," laughed the officer. "Let me see the backs of your hands." Mr. Park thrust his hands out unthinkingly, and the next moment a pair of handcuffs had been slipped on his unresisting wrists.



PARK THRUST HIS HANDS OUT UNTHINKINGLY, AND IN A FLASH A PAIR OF HAND-CUFFS HAD BEEN SLIPPED ON HIS WRISTS.

Mr. Lamon, alias Mr. Park, alias many other names, had come to the end of his string. Some contend that it was caused by his second foolish visit to the Croyden house whence he went to secure some of the booty he had concealed on his first call. Others—and they are in the majority—lay it to his imprudence in leaving the two Hanoverian coins on the floor of the railway carriage.

MAN AND WIFE ARE ONE

No Other Such Unity Between Two Persons—Home Impossible to Either One Alone.

(Copyrighted by J. S. Kirtley.)

Ideally speaking, a man and his wife are one; actually, they may be no more one than they always were. Marriage was designed to make them one, is capable of doing so and will actually accomplish the stupendous task, unless, at least one of them is so abnormal as to be incapable of going into the unifying process or is unwilling to pay the price of such a desirable consummation. In that case unity is impossible and marriage itself is the most hideous of human abnormalities.

Whatever the exceptions to that law of the wedded life, whatever the serious violations of it, we all know that its profound purpose is to take two and make them one. The poets have sung of that unity; we all dream of it, in our higher aspirations; the Book of books declares it true; the Man of men affirmed it with almost tragic earnestness; the whole world considers them one, for its laws unite them in legal unity and, publicly and privately, they are embraced in the same judgment. What is perhaps equally interesting to us is the fact that every informed person knows many instances that prove the claim true.

There is no other such unity between two persons; it is the one sublime instance of the unification of life, its ideals, its interests, its aims and its activities.

"Of course no one can shut his eyes to the fact that some marriages are only a union, never a unity; and the number of them is all too large. Whether such is due to the abnormal character of one or both of the parties to the marriage or to the unwillingness of one or both to promote that unity, such marriage, to adopt the words of Talleyrand, is worse than a crime, it is a blunder.

It seems a pity that those who are foredoomed to make a wreck of marriage for either of the reasons given, cannot be restrained from the tragic step. But once the step is taken there is no release of the worthy one from any of the responsibilities of the vows voluntarily taken, and there is nothing to do but to cultivate all the virtues they both need and supply to the delinquent what is lacking. A great power will come from such a discipline and from such altruism. In time the effect of the example may be felt, as a new nucleating point is found for common interests and activities and a unifying process started at last. That is a kind of triumph no one is ambitious for, but, as the alternative of utter disintegration, it will be a heroic achievement.

We get a clearer idea of the nature of this unity from the incompleteness of either the man or woman alone—"useless each without the other." Each is a fraction vexed with the pain incompleteness till they combine to form an integer, each restless and homeless till they unite in making a home. That something which we call home is impossible to either one alone. Each knows that the other is necessary to complete the life. To be sure there are great souls who seem providentially called on to render service to mankind, which can only be done by sacrificing home and those fellowships that are to be found in the married life. In that list we place the incomparable Paul and many noble women like Florence Nightingale and Mary Lyons and Jane Addams and Clara Barton. Perhaps we may write Michaelangelo and Beethoven in that list.

And we all acknowledge love as the adequate "melting pot" in which the reconstruction can take place. Given, then, the incompleteness of men and women without each other and love as the universal solvent and unifier and the unity to which they are invited is not only a necessity but a never-failing fascination.

But there are two other facts that should give the aspirant for such life a salutary pause. One is that not every one of the fractions that seem available to him or her is capable of uniting with him or her in the formation of an integer. Both may be such large fractions that they will together foot up more than one, or so small they will only be another fraction; or one will be so small a fraction as to furnish too little to the sum total to win any notice at all; or one may belong so irretrievably to the class of irregular or defective or vulgar fractions as to vitiate the whole result.

The other fact is that, when one unites with another to form that integer, that is only the beginning and unification must be made the one great business of the two, to be studied and planned for and carried forward with the wisdom and skill and determination required in the greatest enterprise ever undertaken by two human beings. Railroading and bookkeeping and shoemaking are sinecures beside this. Mutual assimilation is difficult enough, even though that is what nature has arranged for and assists in, but when special differences in temperament and training and tastes have to be reckoned with, the process is still more complex. Besides, there are so many things that make for disintegration it keeps two people watching all the time—so many outside interests, social and recreational and professional, that there are apt to be two struggling fractions in the home instead of a growing and triumphant integer.

One and one never equal one unless they both intend to have it so. Each must take over the other's interests and liabilities, foibles and faults, strength and weakness, virtues and vices; each to appropriate and approve the virtues of the other, as if they were his own, each to bear with and overcome the faults of the other as if he were dealing with his own faults. That excludes fault finding.

Two are required to perfect that mutual life. One may put in his whole time in integrating work, but if the other is engaged in the disintegrating business, it will be a failure. Before marriage there may have been external attractions, like music or a dash of the heroic or an interest in the money involved, and the mask be laid off afterward, revealing the demon or the skeleton. It only makes for the innocent one a greater task; but his only hope is in the awakening of the derelict.

Nor can there be unity when either one is the "One" and the other nothing. The accord of two, even though it take time to produce it, is required rather than the complete dominance of one. There are spheres in which each one is to be completely in charge; there is a sphere in which everything is mutual. Both wills and hearts must be preserved entire. One a tyrant and the other a slave—that is not unity.

A deliberate choice of all the things they can have and think about and do in common, confidence in and confidences with each other are necessary. It will promote that unity to assume it always, whether it has yet reached its ideal stage or not; before the world, for the sake of all concerned; before the children, for the sake of all the members of the family. The radical expression of disharmony in their presence is a sign of hopeless disintegration. Love, out of which the unity first began to grow, will accumulate all strength and sweetness. At first they loved each other for what was to come; now they love for their common toils and sufferings and treasures.

MINNESOTA HISTORICAL SOCIETY.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, OCTOBER 20 1911 NO. 12.

MASSACRE MANY

CHINESE CITY PRESENTS SCENE OF DESOLATION FOLLOWING NIGHT OF TERROR.

PRISONERS ARE RELEASED

Incendiary Fires Burn in Native Sections—Fate of Ruling Dynasty in the Balance—Revolution Throughout Empire

Hankow, China. — Following a night of teror with death stalking through the streets and lurking in every shadow, this city presents a scene of desolation. All night long incendiary fires burned throughout the native quarters with no effort made to stay the leaping flames which licked up everything with which they came in contact. The wanton massacre of Manchu families left scores of dead and to add to the horrors all the prisons were opened and inmates liberated. Many of these are desperate criminals.

It is reported that rebels are proceeding northward to meet the imperial troops and that a thousand troops in the province of Honan, adjoining the disaffected province of Hu Peh, also are prepared to resist the imperials.

The revolutionary army is strongly entrenched in Wu Chang and Han Yang with guns mounted in commanding positions. With the capture of the Han Yang arsenal, the leaders declare confidently that they are in a position to cope with any opposition, being now provided with ample ammunition.

Parties of governmental troops arriving here from time to time are met promptly by revolutionists, who endeavor to persuade them to join the movement. If they refuse they are allowed to withdraw beyond the limits of the city.

The American consul general, Roger S. Greene, crossed the Yangtse river to Wu Chang, accompanied by the [illegible] Helena, the Associated Press correspondent and two Chinese interpreters. The party went unarmed and entered the gates of the city after they had been opened for a squad of rebel artillery to pass out.

The party interviewed Colonel Li, the rebel commander, who treated them with every courtesy and assured them of their safety while in the city. The consul general gathered up forty-four foreigners who had not yet left the city, including Americans, Englishmen and Italians, and took them back to Hankow. The missionaries were accompanied by 300 of their Chinese proteges. The party was unmolested on its way through Wu Chang, being escorted all the way by a squad of rebel troops.

Government Troops Start.

Pekin.—Eight train loads of troops started from Poa-Tig-Fa, province in Chi-Li, for the affected district. The revolutionist have informed the consuls at Hankow that they will respect all treaties and loans and indemnities contracted by the Chiense government.

A well informed revolutionary sympathizer told The Associated Press that the rebels probably would leave the capture of Pekin and Shanghai to the last because of the danger of the foreign complications.

It is reported that the rebels allowed the weekly express to leave Hankow, crowded with refugees. It is believed the rebels found more than $1,000,000 in Mexican money when they raided the treasury at Hankow and also obtained half a million dollars in the same coin from the Hankow merchants.

Dr. Sen in United States.

New York.—News of the presence in this country of Dr. San Yat Sen, hailed as the president of the Chinese republic, to be born if the present revolution is successful, was announced in New York by the publishers of the Chinese Reform News. It was already known, however, in New York's Chinese quarter that the brains of the uprising was still in the United States and Chinatown was inclined to smile at the cable reports saying that Dr. Sen was in China. He has been lecturing in the United States for months and, according to Chinese here, has sent more than $200,000 to China to further the cause of the revolution.

Dr. Sen long has been identified with the revolutionary movement and was one of the leaders of a plot to seize Canton in 1895 and from that city carry on the revolutionary movement. The plot was discovered and 15 of the instigators slain. Dr. Sen fled to Hong Kong, where he became a British subject.

Chicago.—Dr. Sun Yat Sen, leader of the revolutionaries in China and in line for the presidency there if the uprising be successful, is in Chicago.

CARRY WAR TO DESERT

TURKISH TROOPS ARE TO BE ATTACKED IMMEDIATELY.

Constantinople Government Demoralized and Change in Rulers Is Talked.

Tripoli, Tripoli. — General Caneva, commander-in-chief of the Italian expedition, has decided to act quickly and the troops under him will march immediately against the positions occupied by the Turks. A reconnoisance of the desert disclosed the central body of Turkish troops not far from the city.

Nineteen more Italian transports escorted by warships and carrying the second division of the troops arrived and the men were landed hastily, making a total of 22,000 Italian soldiers on the coast of Tripoli.

It is reported that the Arabs have accepted the Italian occupation joyfully, but some of the warships remain in the harbor in readiness for emergencies. Troops were landed also at Beghazi, Derna, Todruk and Bomba. General Caneva has addressed a proclamation to the inhabitants, assuring them they have not been enslaved by Italy, but have been liberated from the yoke under which they have been laboring for years. They will be ruled by their own chiefs under the patronage of the king of Italy. Religious and civil laws will be respected and taxes will be reduced or abolished.

The proclamation concludes by announcing that Italy desires that Tripoli shall remain the land of Islam under the protection of Italy.

No Armistice Arranged.

Rome.—That an armistice has been arranged between Italy and Turkey, as reported from Berlin, strenuously is denied by the Italian government.

A dispatch from Tripoli to the Giornale d'Italia says that the Turkish government, being unable to communicate directly with Munhir Pasha, commander of the former Turkish garrison at Tripoli, has telegraphed to the Turkish consuls at Tunis and Mattao to instruct him to [illegible] as long as possible.

London.—The Daily Telegraph's Constantinople correspondent, in reviewing the situation, says that Turkey lacks a government, practical leaders, or a policy, and that she is floundering hopelessly.

"The problem of reconciling Islamism and constitutionalism," says the correspondent, "has proved insoluble, and the young Turkish regime is sick unto death. It is not impossible that present events may lead to the deposition of the sultan, the military section of the committee of union and progress being in favor of placing the heir-apparent, Prince Yussof, on the throne. Yussof is credited with an iron will and great political sagacity."

Chicago.—Many Jews of Chicago are alarmed at stories printed that the cession of Palestine will be demanded by INtaly in settlement of claims raised by the disturbances in Tripoli, and, furthermore, that the Holy Land will then be turned over to the pope as a temporal domain. Such a change, it is feared, would not only destroy the Jewish movement of colonization in Asia Minor, but also forbid residence or travel in the land of the Jews to anyone except Christians.

ORDER COMBINE DISSOLVED.

Electric Trust Must Separate Its Constituents.

Toledo, Ohio. — Declaring that their desire was to comply with all of the provisions of the statutes and that they did not think their acts had been unlawful, the General Electric company, the Westinghouse Electric company, and thirty-four other electrical companies, engaged in the manufacture and sale of incandescent lamps and lamp machinery, threw themselves upon the mercy of Judge Killits in the federal courts when they withdrew their answers to the government suit charging a monopoly in restraint of trade.

The government's suit was filed six months ago in Cleveland. It charged that all the defendant companies, through contracts, agreements and conspiracies were restraining trade and asked the dissolution of the combine. Judge Killits ruled that the concealment of the interest of the General Electric in the National Electric company was unlawful, in that it had been pretending to be a separate and competing company. The court ordered that the National company and all its subsidiaries be dissolved and that the General Electric be enjoined from conducting business except in its own name. Judge Killits' ruling was a complete breaking up of the trust, providing that:

All factories, plants and selling departments shall be made known to the public as the property and business of the General Electric company.

DRY FARM MEET

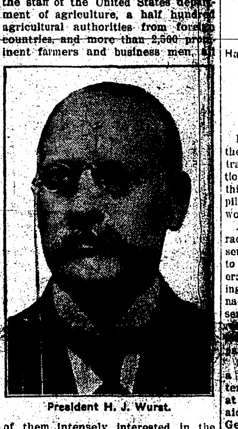
SIXTH INTERNATIONAL CONGRESS IS OPENED IN COLORADO SPRINGS.

EMINENT MEN PRESENT

Large Exposition of Machinery and Products—New Organization of Women Begins Its Sessions Tomorrow.

Colorado, Springs, Colo.—When Dr. J. H. Worst, head of the North Dakota Agricultural college, called to order national Dry-Farming Congress, of which he is president, he faced a gathering of distinguished men, eminent agricultural authorities and practical farmers, so large as to assure the biggest meeting the congress ever has held.

There are in attendance seven governors of states, ten presidents of agricultural colleges, fifty professors of similar institutions, fifty members of the staff of the United States department of agriculture, a half hundred agricultural authorities from foreign countries, and more than 2,500 prominent farmers and business men, all of them intensely interested in the great problem of reclaiming the so-called arid districts of the world. These delegates actually own and operate farms to the extent of nearly six millions of acres, and the problems they have met to consider are vital to sixty-three per cent of the American continent and to more than fifty per cent of the entire earth's surface.



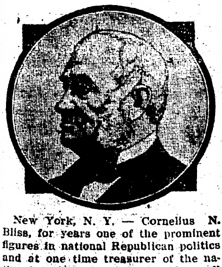
President H. J. Wurst.

The congress is a unique organization. Its avowed objects are the co-operative, scientific study of agriculture and the development of better farming methods in the sub-humid or so-called "dry" districts of the world. It has no country to colonize. It has no lands to sell. Its work is utterly impersonal, and, as such, it has been officially indorsed by the agricultural authorities of many countries.

The sessions of the International Congress of Farm Women begin tomorrow and promise to be as interesting as those of the men. The plan originated in the mind of Mrs. John T. Burns of Colorado Springs, whose husband is secretary-treasurer of the Dry Farming Congress and who has worked with him in directing the destinies of the men's organization for the last five years. Mrs. Burns saw that much is being done for the men folk on the farm; nothing for the women, whose needs are infinite because of the confinement of their lives.

The women's program includes frank discussions of proper equipment for the farm home, laws of physical life in relation to the family, the cash value of rest, labor saving devices, the economic value of the farm woman, the country church and the country school; together with demonstrations in cooking, home hygiene, emergency nursing, and the care of infants and young children.

CORNELIUS N. BLISS IS DEAD.



New York, N. Y. — Cornelius N. Bliss, for years one of the prominent figures in national Republican politics and at one time treasurer of the national committee, and otherwise well known as a merchant and a member of the drygoods firm of Bliss, Fabyan & Co., died at his home here of heart disease.

BERLIN II WINS THE RACE

GERICKE LANDS IN WILDERNESS UNINJURED, BUT FAR FROM HAUNTS OF MAN.

Has to Travel Long Before Being Able to Find a Telegraph Station. Escapade Is Similar to Two Others Which Befell Him.

Kansas City, Mo. — In winning the James Gordon Bennett trophy by traveling 408 miles in the international balloons race which started from this city, Lieutenant Hans Gericke, pilot of the Berlin II, was lost to the world for the third time.

After all the other entries in the race had been located, a telegram was sent by the Aero club of Kansas City to Fred C. Ainsworth, adjutant general of the United States army, asking that all life saving stations, signal corps and others in government service in the Great Lakes region be [illegible] to look for the German balloon [illegible] assistance to the occupants when found.

Shortly after this telegram was sent a message was received from Lieutenant Gericke telling of his landing at Ladysmith, Wis. Gericke and his aide, F. O. Dunker, who came from Germany with the pilot, landed in a wilderness uninjured.

Lieutenant Gericke was also considered lost last year in the international race which started from St. Louis. In the German balloon Dusseldorf II, he was in the air 42 hours, traveling 1,100 miles and landing in the wilderness of Canada, from which he and his aide emerged four days later after a thrilling adventure and narrow escapes from starvation.

Gericke's second escapade of this kind occurred last summer when he went up from Berlin in the German elimination race and drifted out over the North sea. He was sighted in England, but was again lost from view and finally landed in France.

The nearest rival of the German balloon in this year's race was the Buckeye, piloted by Lieutenant Frank Lahm of the United States army. It landed near La Crosse, Wis., 370 miles from Kansas City. Lahm and his aide, J. C. Wade, Jr., landed in a swamp, suffering greatly from the cold. After having passed over Chicago and drifted out over Lake Michigan, they met a southward current which changed their course completely. They tried to rise above this, but succeeded only in finding a current which carried them westward. They were both exhausted with their nine-hour vigil and it was decided that they land.

Hunnewell, who went up as aide to Arthur T. Atherholt, pilot of the Pennsylvania, says that when they decided to come down their valve failed to work and they resorted to the rip cord at a height of 3,000 feet. The balloon fell like a rocket and hit the ground with terrific force.

In winning this year's race, Germany has taken the Bennett cup from America, who would have held it permanently if this country's representatives had been victorious. America had won the championship for two successive years and a victory this year would have ended this international series with a clean sweep for American balloonists. The next race will be held in Germany.

$5,000,000 LOSS BY FLOODS.

Part of Denver & Rio Grande Railway Swept Away.

Denver, Colorado.—With telephone and telegraph service crippled and more than 300 miles of railroad out of commission, only meager reports are being received from the flood-swept district of southwestern Colorado and northeastern New Mexico, comprising an area approximating 100 by 75 miles. There are rumors of heavy loss of life, but the verified death list so far is comparatively small.

"JIM" IS FOUND

JAMES P. DYGERT IS ARRESTED AT ARCTANDER, MINN., AFTER MONTH'S HUNT.

HUSBAND IDENTIFIES HIM

Neighbors and St. Paul Pawnbroker Says He Is Much Wanted "Jim." Accused Brought to Jail in Minneapolis.

Minneapolis.—James P. Dygart, arrested in Arctander, Minn., by Sheriff Bonde of Kandiyohi county, was identified as the missing "Jim" sought by the police to explain the mysterious double murder of Mrs. Amelia Bolton and Frank Edward Rhodes on the Bolton farm near Wyoming, Anoka county, Sept. 12.

S. E. Carlisle, neighbor of the Boltons, living near Wyoming, John Reloux, storekeeper at Wyoming, and Morris Effan, proprietor of a pawn shop in St. Paul where "Jim" pawned the Bolton mandolin the night of the murder, and Walter E. Bolton, husband of the murdered woman, identified him in the city jail.

His father, Andrew Dygart, he says, lives in Spencer, Wis. Dygart says he was reared there. He was born in what was then Holland, Wis., now changed to Escaton. He knew various people known in Spencer by Sheriff Casey and newspaper men, and could not be shaken in his story of the place he claims as his home.

The peculiar scar on the left side of his neck heralded over the country the day after the discovery of the bodies on the Bolton farm led to "Jim's" arrest.

The murder of Mrs. Bolton and her cousin, Frank Rhodes, was discovered Thursday, Sept. 14. Neighbors heard cattle lowing in the yard and went to see what the trouble was, as the cows acted as if they had not been fed for some time. The house was locked and neighbors broke in a door. At the bottom of the cellar stairs lay the body of Mrs. Bolton, a bullet wound in her back. Blood was on the kitchen floor. An hour later, Fisher Carlisle, son of S. E. Carlisle, discovered the body of Rhodes in a "dead" furrow in a potato patch across the road from the farm house. "Jim" was missing. He was seen last at the Bolton home, Tuesday noon, by two boys who had gone there to take a dog Mr. Bolton had sent to Wyoming. "Jim" told them Mrs. Bolton and her cousin had gone to Minneapolis that day. That was at noon. Two hours later he was seen going into Wyoming with the mandolin in his hand.

Mrs. Bolton and her cousin were killed with a high power rifle, the property of the husband of the dead woman. Four shots were fired into Rhodes and two bullets had penetrated Mrs. Bolton's body. An empty cartridge shell was found in the yard and one loaded shell in the rifle. Nothing that would give the surname of "Jim" could be found in the house. Mrs. Bolton had been assaulted after death, the coroner's investigation showed.

Dygart confessed that he killed Mrs. Amelia Bolton and cousin Rhodes, because the woman would not consent to elope with him. The confession, written in long-hand by E. Ryan, a stenographer, was signed by Dygart in the presence of Sheriff Casey of Anoka county, S. E. Carlisle, a neighbor of the Boltons, and Capt. Smith of the Minneapolis detective bureau.

Dygart shot Mrs. Bolton first as she was standing near the range in her kitchen, according to his confession. He stood ten feet away in a small entryway to back door. Dygart said he then pulled her body down the cellar stairs, and went back and hid in the barn to await the return of Rhodes, who had gone to the fields.

As Rhodes walked into the yard, Dygart, in the door of the barn, shot him in the leg. Rhodes ran into the house and went into the garret, locking the door. Dygart said he hid in the barn for half an hour, when Rhodes came out and started across the road. Dygart, in the door of the barn, shot him twice. Rhodes dropped in his tracks in the potato patch.

He also confessed to the killing of John Hefstedt, a farmer at Poplar, Douglas county, Wis., this summer. The motive in this case was the same, that Mrs. Hefstedt had rejected improper proposals he had made her.

UNIFORM SHIPPING LAW SOUGHT.

Traffic Men to Boost Bill of Lading Reform at Convention.

Minneapolis. — Representatives of the Minneapolis Traffic Association will go to Chicago to attend the annual meeting of the National Industrial Traffic League, November 16, and lend their efforts to secure national uniform bill of lading laws and uniform classification of freight rates.

These questions are of vital importance to the Western shippers.

RATES ARE TOO LOW.

Insurance Commissioner Preus Makes Recommendations.

A recommendation that legislation be enacted compelling the fraternal insurance orders to raise their rates to what are called adequate rates based upon mortality tables is contained in the annual report of Insurance Commissioner Preus.

Charge Vastly Inadequate Rates.

"A very great amount of fraternal insurance is carried in the state of Minnesota, there being $327,938,835 in force, according to this report," he says. "The only standard of solvency necessary for a fraternal order to exhibit to this department is its ability to pay current death claims. A great many societies are charging vastly inadequate rates, and members of such societies must look forward to the time when rates will be very much increased."

Summary of Minnesota Business.

The report gives detailed statements of each company doing business in the state, showing their financial condition and the amount of business they have done.

Summarizing the Minnesota business, the report says:

"The amount of insurance in force in Minnesota in legal reserve companies on December 31, 1910, exclusive of industrial business, was $240,918,006, as compared with $208,221,242 on December 31, 1909. This was a net increase of $32,696,764 during the past year. The amount of insurance written by these companies in Minnesota in 1910 was $36,049,983, as compared with $29,095,473 in 1909, showing an increase.

"In addition to the total shown above, two industrial companies wrote insurance amounting to $6,493,313 in 1910, and had in force at the end of the last year in Minnesota insurance amounting to $16,825,506.

"Total premiums received in Minnesota by these companies in 1910 were $8,167,929; losses incurred, $2,405,328.

Premium Receipts $7,503,360.

"The total premium receipts in the state in 1909 were $7,503,360, and the losses were $1,907,168.

"The premium [illegible] increased [illegible] last year as compared with 1909, and the losses increased $498,159.

"In addition to the payments for losses, there were total payments to policyholders in Minnesota of several million dollars on account of dividends, surrender values, etc. For the past thirty-nine years the total premiums in Minnesota were $107,930,513, and the losses were $33,582,341. At the close of 1910 there were 117,996 ordinary legal reserve life policies in force in Minnesota, and 133,527 industrial policies."

DUMAS IS CONVICTED.

Bass Lake Mayor Found Guilty of Arson.

Bemidji. — Dr. D. F. Dumas, the mayor of Cass Lake, was found guilty of arson in the third degree. Dr. Dumas was charged specifically with having attempted, with Mike Davis and Martin Behan, to burn the post-office building at Puposky early in the morning of June 17.

Dr. Dumas returned with his wife to Cass Lake in their automobile after the verdict was read. He took the verdict without any show of emotion and refused to comment on it.

Attorney Freeman P. Lane of Minneapolis, of counsel for the defense, announced when the verdict was read that steps would be taken to have the case appealed to the supreme court. Dr. Dumas was allowed his liberty on his original bond. Sentence was deferred pending the outcome of the appeal.

Probably never before in Bemidji, and possibly not in the state, was there so much dramatic excoriation as marked the closing arguments of both Assistant Attorney General Alexander L. Janes of St. Paul, for the state, and Attorney Lane for Dr. Dumas. This was the first criminal case of unusual importance in which Mr. Janes has made an argument to the jury since he became a member of the attorney general's staff, and the courtroom was visibly impressed with the manner in which he reviewed the evidence and the eloquence which punctuated his remarks.

Attorney Lane, for the defense, charged that the Dumas case had cost Beltrami county $20,000. He characterized the case against Dr. Dumas as a put-up job, and was unsparing in his denouncement of Assistant Fire Marshal Sam Fullerton.

RIVER PEARL BRINGS $2,000

Clam Fisher Near Stillwater Enriched By Find.

Red Wing.—A pear-shaped pearl of brilliant luster, found a distance above Stillwater by a clam fisher, was purchased by C. A. Windau, the Red Wing buyer. The gem weigher 49 grains and brought $2,000. Mr. Windau says it is the most beautiful pearl he has ever seen and he believes that he can easily double his money on the investment.

ADVENTURES of the WORLD'S GREAT DETECTIVES

By George Barton

The Story of The Mutilated Bank Check—

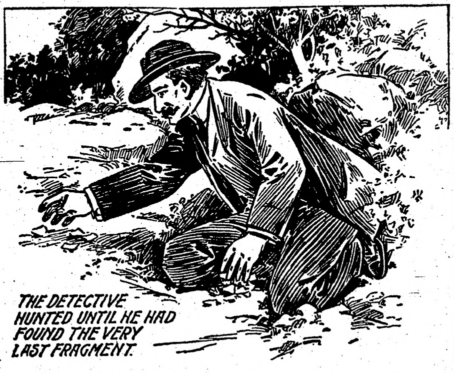
An Episode in the Life of Thomas Furlong one time Chief of the Secret Service of the Allegheny Valley Railroad.

COPYRIGHT 1911 BY W. G. CHAPMAN

LATE in the year 1877 the city of Pittsburg and, indeed, the entire country, was startled by the announcement that the safe of the Union Express company had been opened and robbed of diamonds, jewelry and money, valued roughly in the neighborhood of one hundred thousand dollars.

The Pennsylvania railroad train from the east reached Pittsburg at the usual hour; the safe used by the express company was delivered to the agent in the customary manner and he gave a receipt for the same. It was locked and gave no evidence of having been tampered with. After being loaded on a wagon, guarded by a watchman and detective, armed to the teeth, it was finally placed in the office of the company on one of the main streets of the Pennsylvania city. The only unusual thing about the whole business was the fact that the messenger had strangely disappeared. It was thought that he had stopped on the way to the office and would report in due time. However, when he did not appear at 11 o'clock, Superintendent Bingham became suspicious. He sent for two mechanics, forced the safe open and found it absolutely empty. The officials were almost dumb with amazement. Nothing like this had ever occurred in the history of the company. Safes had been burglarized and trains had been held up at lonely places, but never before had a safe been delivered locked and uninjured at the office of the company, only to be found empty.

The news of the robbery was flashed to all the offices of the company in the United States. The local police were notified and the special officers of the corporation were also instructed to investigate. Before the close of the day it was learned that the messenger who had arrived at the station with the safe was a new man. He climbed into the delivery wagon with the safe and proceeded as far as the city hall. At that point he said that he had an errand to go and would follow the other men in a few minutes. He jumped off the wagon and disappeared in the crowd.



THE DETECTIVE HUNTED UNTIL HE HAD FOUND THE VERY LAST FRAGMENT.

Naturally, the first move in obtaining this information was to locate the regular messenger who should have been in charge of the safe. It was found that Mr. J. J. Bingham, a brother of the Pittsburg superintendent, was the man who had occupied that position for quite a while. He was an entirely trustworthy man. He was personally known to many of the officers of the express company, and his integrity had never been questioned. But where was he? Had he been murdered or was he kidnaped? That was the question that agitated the officials and alarmed the friends and relatives of the missing messenger.

In the midst of this fog of perplexity and doubt, Bingham suddenly cleared the atmosphere by appearing in person. No one was more amazed than he over the news of the robbery. When asked why he had left his charge, he exhibited the following telegram. It said:

"Look out for new messenger, named J. C. Brooks. Meet him at Templeton en route. Turn over cash and valuables to him and take receipts for same. Then report to the superintendent at Parkersburg, who will give you further orders.

(Signed) "GEORGE BINGHAM,
"Superintendent."

Needless to say, this telegram was a forgery, but Messenger Bingham accepted it as a genuine order. He obeyed the instructions it contained literally. He first wired to his brother, acknowledging receipt of the telegram, but Superintendent Bingham, for reasons that will be explained later on, never received this message. The bogus official appeared at the time and place stated and received the keys to the safe containing the diamonds, jewelry and money. What happened after that, of course, was unknown to the real messenger. He could throw no further light on the subject, and for many days after that nothing new was learned. The most rigid investigation failed to produce even the slightest clue to the robber or robbers.

At this stage of the case it was determined to seek the expert assistance of Mr. Thomas Furlong, at that time the chief of the Missouri Pacific railway secret service. Chief Furlong had distinguished himself in the west by the facility and thoroughness with which he had cleared up several railway robbery mysteries. He was a clear-headed, persistent, courageous man, who combined cleverness and common sense in his every-day work. On reaching Pittsburg, he examined all of the evidence in hand and interviewed all of those who were supposed to know anything about the mysterious disappearance of the contents of the safe.

Mr. Furlong determined to take up the scent at Templeton, Penn. He started for that place, accompanied by John Cupples, who ably seconded him in the investigation. Furlong found that Templeton had once been a very busy place. It had teemed with workshops and blast furnaces, but one of these periods of business depression which we call "hard times" had struck Templeton, and now most of the shops were closed and all of the blast furnaces were shut down. Hence the place presented the appearance of a deserted village. Furlong and his assistant were the only passengers that alighted from the train that day. The detective entered into conversation with the station agent and even passed the time of day with the railroader's wife, but neither of them could give him any information concerning the pilfered safe. Furlong, however, was not the man to be easily discouraged. He made up his mind not to leave Templeton until he had received some clue, no matter how trifling. In an interval of the conversation he began to chat with the station master's child, asking the boy how he was able to amuse himself in such a dull place.

"Oh," said the youngster, "people come here sometimes. I am glad you came today."

"I'm glad, too," said the detective, gently. "I suppose it has been a long while since any other stranger stopped at this place."

Oh, no," retorted the child, "there was a man here a few days ago."

Furlong was interested at once.

"You don't mean it?"

"I do," was the quick retort; "I think I know when a stranger comes here."

"What did he look like?"

"He looked as if he didn't have much money," was the childish answer.

"Did he do anything strange?"

"Yes. He sat on a log there near the railroad tracks tearing up a piece of paper. He tore it into very little bits."

"Oh," said the detective, a strange hope surging up in his heart, "I don't think a grown man would do that."

"You don't? Then I'll show you," and leading the way, the little one pointed out a log where the stranger had seated himself.

The little bits of paper were there. The detective did not hesitate to get down on his hands and knees and pick up the very last fragment. That evening, with his assistant, he took the train for Pittsburg. He went to his hotel at once, and the two men spent the whole night in putting the pieces of paper together. No enthusiast, working on a jig-saw puzzle, ever put more heart in his work than Furlong did in trying to make something out of those disconnected fragments. It was almost daylight when something finally came out of nothing. He gave a shout of joy. His work was completed and the finished product proved to be a blank check on a bank in Carlisle, Penn.

That was a starting point. It meant that the stranger had either lived or was known in Carlisle. In the meantime, Furlong made a second discovery. It was a small telegraph instrument that had been picked up near the tracks at Templeton. He hurried to Carlisle at once, and as soon as he alighted from the train, engaged in conversation with the telegraph operator at the station. He told the man he was looking for a person who was interested in telegraphy, and then he gave him a description of the stranger the little boy had seen sitting on the log at Templeton.

"Why," said the operator, "you must mean Will McCalla."

"That sounds like the name," ventured Furlong. "Does he live here?"

"Yes, he used to live over in that house yonder with his brother George. He has gone down to Texas, though, where he is doing well now as a telegraph operator and express agent."

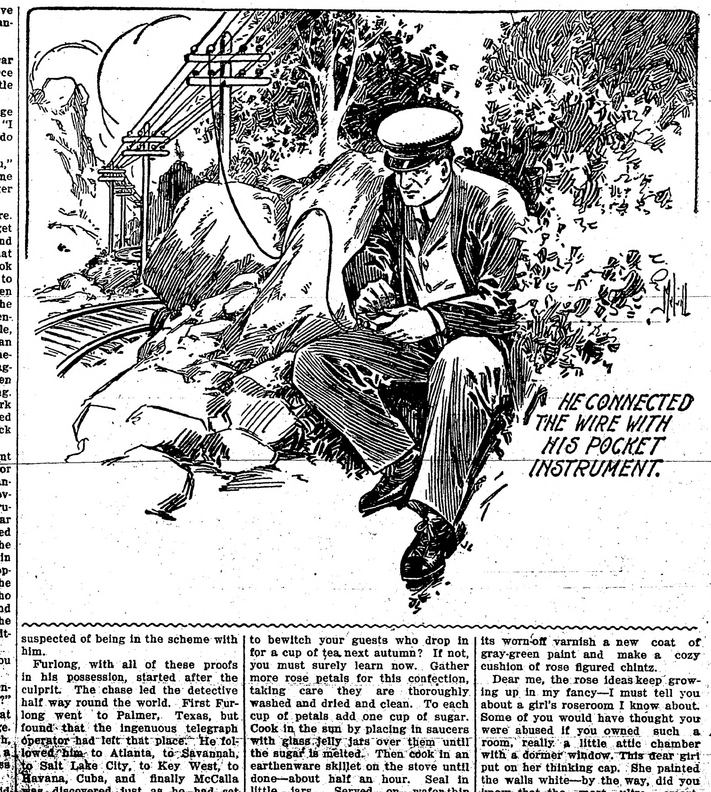
"I'm mighty glad to hear that," said Furlong, "because I've got a telegraph instrument I'd like to give him as a gift."

"Well, that's quite a coincidence. I know he would like to have it right well. Not long ago he asked me to give him the address of a good manufacturer where he could get an instrument at a reasonable price, and I gave him the name of a good house in Pittsburg."

This proved to be the same address that was on the instrument Furlong had picked up at Templeton. In a week from that time the detective had completed his case. It proved to be one of the most audacious crimes that had ever been perpetrated within his knowledge. It started at a lonely place on the Allegheny railroad somewhere between Kittaning and Cowanshannock. Enormous rocks towered on both sides of the railroad at this point, and it was no uncommon thing for these monster boulders to fall from the mountain side and completely block railroad traffic. For this reason watchmen were constantly stationed along that part of the route in order to give warning of danger to approaching trains. McCalla had gone there and, addressing one of these watchmen, said that he was an inspector sent by the telegraph company to examine the wires. He exhibited a badge as evidence of his authority. In this manner he was enabled to work in peace and safety. He climbed a telegraph pole and deliberately cutting the wire he wanted, dropped the end of it to the ground and then connected it with his pocket instrument.

He now had control of the line and proceeded to go about his work in a business-like manner. First, he wired to Brady's Point and asked the name of the messenger who was to arrive with the safe and valuables on what was known as the "up train." To this he "signed" the name of Superintendent George Bingham of Pittsburg. The reply soon came stating that John Bingham, the brother of the superintendent, would be the messenger in charge. McCalla then sent a second telegram instructing Messenger Bingham to hand over the keys to the safe to the new messenger, who would report to him at Templeton and whose name was J. C. Brooks. As already mentioned, Bingham was to turn over the cash and valuables to Brooks and take a receipt for them. Messenger Bingham acknowledged the instructions to his brother, but the clever McCalla intercepted the message and it never reached its destination.

At the appointed time the rogue, in the guise of Brooks, the new messenger, met Bingham, secured the keys, and then, at his leisure, rifled the safe of its contents. It is believed that he must have had accomplices. At any rate his brother was suspected of being in the scheme with him.



HE CONNECTED THE WIRE WITH HIS POCKET INSTRUMENT.

Furlong, with all of these proofs in his possession, started after the culprit. The chase led the detective half way round the world. First Furlong went to Palmer, Texas, but found that the ingenuous telegraph operator had left that place. He followed him to Atlanta, to Savannah, to Salt Lake City, to Key West, to Havana, Cuba, and finally McCalla was discovered just as he had set sail for Rio Janeiro. For aught anyone knows to the contrary, he may be today a Braxilian nobltman or the proprietor of a great coffee plantation. The fact that Furlong was recalled to Pittsburg by the great railroad riots of 1877 alone saved McCalla from arrest and conviction. His brother George was arrested, but died before his trial.

PRETTY POLLY PAPERS

Girls, girls, girls! I wonder how many there are in the world, and aren't they, every one, almost alike?—not alike as two peas, for that would be dreadful, but liking the same good things of life, the pretty, dainty fancies, the delicious goodies, the solemn moments sandwiched in between the jolly times, the capacity for looking out on the big, great world as yet unknown—yes, girls, we are all alike; yet sometimes a girl is cleverer than others and has a good idea and passes it along. As it happens, I know ever so many girls, and we have had such nice, comfortable chats, and I couldn't begin to tell you the things they tell me about. "Couldn't begin to tell you," I say? Oh, but that is just what I want to do. In these papers of ours I want to pour in all the ingredients I can think of to make "Girldom Happiness," and we'll put it in a big jar of Life and leave the cover open once a week—just exactly like one of the potpourri jars in our grandmother's old-fashioned houses. Girldom happiness"—doesn't that sound spicy and sweet and like a whiff of old-time gardens!

Potpourri jars make me think of roses, and surely that thought is appropriate in June.

Sachets—to be sure, bless your heart. Go out early in the morning and gather the rose petals from the garden and spread them out on papers in some spot in the house where the wind won't steal your treasure. To make them even more fragrant sprinkle them over with a few drops of alcohol and some rose sachet powder and let them dry again. Spread the dried rose leaves between layers of pretty rose-colored lawn, or some flowered material, running a few rose-colored silk threads across in quilting style to divide the petals. Lay these in your bureau drawers—and how "whiffy" of the garden your possessions will be, when winter comes without any posies! Another idea is to make fat little bags of rose petals and hang them by ribbons in your closet with your dresses. Still another fancy is to make some spiced rose leaf bags in simple cheese cloth. Put them away in a tin box, and when a horrid headache happens along sprinkle one with alcohol and use it for a wee comfort bag on the acheing spot.

Do you know how to make rose jam to bewitch your guests who drop in for a cup of tea next autumn? If not, you must surely learn now. Gather more rose petals for this confection, taking care they are thoroughly washed and dried and clean. To each cup of petals add one cup of sugar. Cook in the sun by placing in saucers with glass jelly jars over them until the sugar is melted. Then cook in an earthenware skillet on the stove until done—about half an hour. Seal in little jars. Served, on wafer-thin slices of angel cake—oh, but it's good!

Some of you are going to be married this month; I'm sure of it. Here are some more "rose ideas" for brides and those who love them. First—now the rich girls needn't listen at all, but my dear girls who have to look at the pennies through a magnifying glass to see if they can't make them do big things—can grasp this idea. You're not going to be foolish enough to waste a little fortune on a satin wedding dress when you could use the money for so much nicer things? I was sure you weren't; then here's an idea. A soft, pretty white dress—the fabric doesn't matter so much, and if it must have a lining it can be made of one of the imitation silk materials, trimming the dress itself with a few lace insertions just where they will be prettiest, these to be edged with white roses.

You never saw such a dress? So much the better. Set the roses close together as an edging to the skirt, have them edge the bottom of the princess waist, and even the veil could be touched to daintiness with their floral burden. What could be more bride-like, what could be more bewitching? But the roses? Make them yourselves, of course. Take apart a white rose bought at a millinery store and use it for a pattern, making just as many as you like from stiff white lawn; buy the wee yellow centers which come for making paper or silk roses, and can't you just see how fat the trousseau purse will remain?

Are you going to give the bride you know a rose shower? If you are, cover the table with rose-colored silkolene, and on top one of mosquito netting—yes, really. For a center piece have a big bowl of "really truly" roses and wind smilax in and out of the mosquito netting, or any other dainty delicate vine will do. How can you wind it in and out? Please let me go up head for this idea—take long strips of tissue paper, twist it spirally around a spray of smilax until it is like a long thread, then run it in and out of the meshes and, when where you want it, snip the paper and pull it out and the little leaves won't be broken off and will stay put.

Serve the goodies in "rose cases" and have pink and white ice cream and cakes, each with a pink paper rose "growing" from its top. And the gifts for the dear little bride? That's the best idea of all. Have a rose-covered table and on it a number of flower pots painted green. In each can be some mysterious package wrapped in brown paper, and rising from its top can blossom a tall paper rose tree. Won't any June bride love her rose garden?

Have you any old wicker chairs about your house that are too battered and worn for anything? Spirit one of them off to your room. Give its worn-off varnish a new coat of gray-green paint and make a cozy cushion of rose figured chintz.

Dear me, the rose ideas keep growing up in my fancy—I must tell you about a girl's roseroom I know about. Some of you would have thought you were abused if you owned such a room, really a little attic chamber with a dormer window. This dear girl put on her thinking cap. She painted the walls white—by the way, did you know that the most ultra, smart, smarty, smartest people nowadays are having white walls in their beautiful houses?—then she took all the rose pictures she could find, some from seed catalogues, and some cheap rose prints she bought, and she cut out the roses and their leaves and put them on her wall, anywhere they looked best, within a foot and a half of the low ceiling. Then with a little brush she outlined each rose with a thin green line. After all was dry a thin coat of varnish went over the roses, and below them all ran a white picture molding. There was an ugly wooden bed in storage to be had for the asking. This she painted white and she used a bed spread of the softest gray-green silkolene caught here and there with rose sachets. You can make them; anyone can. Just a wee sachet bag hid in the heart of a silk or cloth rose. Now wasn't that a pretty idea to use them to "tuft" with?

Make some individual strawberry short cake for luncheon, and see if your family don't suggest that you "do it aden," as one sweet baby I used to know always clamored if she liked anything over much. Make some flaky tea biscuit, split and butter them while hot, have some crushed and sweetened berries to put between the layers, and on top put a spoonful of whipped cream and one whole perfect berry. Such little, little goodnesses!

One more dainty to have at your next piazza party: Big macaroons, hollowed out a wee bit, and whipped cream piled high and a "rose" stuck in the top of each. Make this rose with about six candied rose leaves, and for the center a round gold candy. Good enough for a caterer? Surely, but a clever girl can do anything!

There are still lots of roses, but I've got to be blown away with some of my petals, for "time's up."

Yours till next week,
PRETTY POLLY.

Happiness Precious.

Ex-Governor Pennypacker, in an address that was both kind and witty, said in Philadelphia of the divorce evil:

"There would be less divorce if there were more forgiveness. We forgive our enemies—would it be so dreadful to forgive our husbands and our wives?

"I have been reading a play by a Frenchman—Hervieu's 'Connaistoi.' I wish we turned out such plays in this country—and in the last act of this play an old soldier says a profoundly beautiful thing about those husbands and wives who forgive.

"'Happiness,' he says, 'is so precious to some of us that, when it is broken, we stoop and gather up the pieces.'"

Few men can distinguish between biliousness and true love.

SERIAL STORY

No Man's Land

A ROMANCE

By Louis Joseph Vance

Illustrations by Ray Walters

(Copyright, 1910, by Louis Joseph Vance.)

SYNOPSIS.

Garrett Coast, a young man of New York City, meets Douglas Blackstock, who invites him to a card party. He accepts, although he dislikes Blackstock, the reason being that both are in love with Katherine Thaxter.

CHAPTER I.—(Continued.)

He felt her eyes upon him, seriously sweet and questioning, and frowned slightly, wishing he had held his tongue, though aware that he could not have, caring the way he did.

"Why not tell me? I'm waiting, Garrett."

"Well. . . ." It was difficult: an impertinence; incredible, besides. But now that he had committed himself, he stiffened a resolve and plunged. "It was said that your engagement to this man Blackstock would be announced before long."

That out bluntly, he caught a long breath and, divided between fear and faith, sat watching her.

The seconds of her silence spun for him an hour of anguish.

"Katherine . . ."

She turned. "Yes?"

"Have you nothing to say?" he asked involuntarily, and at once regretted it.

"What do you wish me to say?" Her tone was dull, as if she spoke mechanically, with a mind detached.

"Either affirm or deny. You owe me that, at least."

"Do I?" She seemed surprised. "But what," she pursued, rousing, "does 'this man Blackstock'—"

"You know I don't like him, Katherine. I can't."

"But I can and do, Garrett."

There was simplicity in that, almost confessional. His fears assailed him more imperiously.

"Then it's true? Don't tell me that!"

"What does Mr. Blackstock say?"

"I haven't interviewed him, of course. I seemed too absurd—"

"Why?"

The only report he had at command was pitifully inadequate: "Because I love you."

"Is that any reason why Mr. Blackstock should not?"

"There are reasons why you shouldn't let your name be coupled with his."

"And they are—?"

She put it crisply. His heart sank, foreseeing defeat. He veered at a tangent, evasive. "You haven't answered me. Is there any truth in this rumor?"

"Not yet."

"You mean it may be true—later?"

"It's possible." she affirmed quietly. "Mr. Blackstock has asked me to marry him; he hasn't as yet had my answer."

"Katherine! . . . You can't really—care for him?"

"I'm trying to be sure, Garrett, before I tell him so—or you."

"But—but you mustn't! . . . The thing's impossible. . . . You—"

"You'll tell me why?"

Her composure was sobering. He got himself more in hand: she was not to be moved by storming, he knew. Reason, logic, an appeal to her intelligence: she would require these of him. Yet when put to it he could not bring himself to tell what he knew of the man by hearsay, if very credibly. Personal defects, lack of breeding, and the like were all unstable objections. . . . In the end the best he could do, since some sort of an answer was essential, was to frame a halting, inconclusive: "He's not the sort. . . ."

She misinterpreted his confusion. "I know what you're thinking: that he's not a spoke in our particular social wheel; an outsider. Must I condemn him for that? Are there no right men, Garrett, but yourself and others of our 'set?' I know he has his lacks; I fancy you'd call him crude, if you were candid with me. But men of his genius, his upbringing . . . Not that I concede any crudity in him; it's hardly that: he merely lacks—something—difficult to name it; not cultivation, not sensibility, but, I'd say, friends."

"He has many. . . ."

So she cared enough to fight for him! There was bitterness, surpassing the bitterness of aloes, in that discovery.

"I mean the right kind, yourself, for instance; friends to bring him out. He's quick, adaptable, of a good family—if not a wealthy one."

Coast fell back upon the one mentionable objection of which he had certain knowledge. "He's got a villainous temper."

"Friends would teach him to control it. And there are excuses for that: his sight—his eyes are in a bad way. He injured them seriously somehow, in his work—something about the spark, I believe."

"Those wireless experiments of his?"

"Yes. He's going to do great things, Garrett."

"Late in the field."

"He leads it today; they all look to him. His inventions, discoveries, improvements, will make wireless as every-day a thing as the telephone. . . . I don't mean he couldn't win without friends: he's strong enough . . ."

"Men have little use for him, Katherine."

"Women have."

Coast strangled temptation. . . . "He has magnetism."

"That and strength, ambition, enthusiasm. He's worth being a friend to. I want you to know him better, to like him, Garrett."

After a little he managed to say: "I'll try, if you wish."

"I do wish. Please, Garrett."

"Then I'm to understand you seriously contemplate marrying him?"

Her "Yes!" was absolute.

"Don't you see"—he hated himself for this—he's after your money, Katherine?"

"Garrett, that is unworthy of you."

He said nothing, doggedly taking what comfort he might from the knowledge that he was right.

Gradually he comprehended that in the course of their conversation the car had left Fifth Avenue at the Plaza and was crossing Central Park at the Seventy-second Street entrance.

"We're near the gate," he said abruptly. "If you'll drop me there, please—"

"Certainly. Tell Patrick."

Coast groped for the speaking tube and communicated with the driver. When he sat back he was conscious of the woman's softening regard.

"You're not angry, Katherine?"

"No, Garrett; but I'm very, very sorry."

"If I've seemed presumptuous—"

"To me, Garrett? Can you remember the time when we were not—friends?"

"No. . . . I want you to understand that it wasn't altogether because I want you myself—need you, because I love you—as you know—have loved you for years. . . . It was jealousy of your happiness. I said nothing that I didn't believe."

"I know. But you were—are mistaken. You'll come to understand."

"I don't want you to make a mistake. Wait, Katherine, wait a little before deciding. I'm sure of your heart: it won't misguide you."

"I believe not. I know my heart and mind."

"You know mine," he said gently, and no more.

That stabbed her; she winced, wondering why. But the personality of Douglas Blackstock stood forth so largely, limned in such vivid coloring, in the foreground of her consciousness, that there was left little room, even for old friends such as Garrett Coast.

Afoot, Coast lingered at the door, keen eyes searching hers almost plaintively.

"I'll drop in for tea tomorrow, if you ask me, Katherine."

"Have you ever needed an invitation, Garrett?"

"Then I'll come."

He nodded to the driver and the car swept away.

Long after it had shot out of sight, he stood staring. Then discovering himself bareheaded, hat and stick in hand, an object of amused regard, with a curt laugh of confusion and awakened self-consciousness, he turned back through the park.

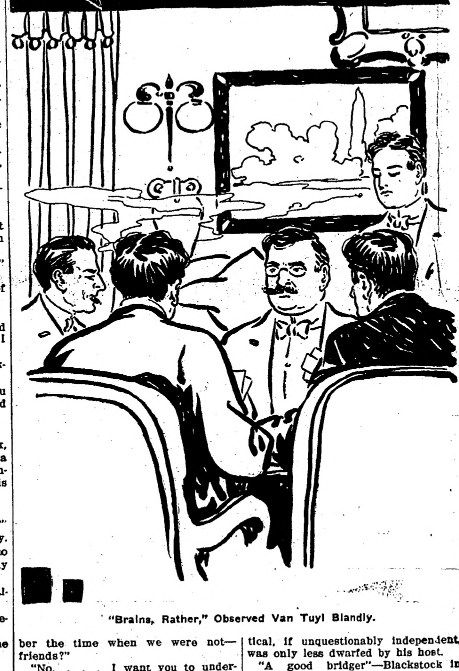
CHAPTER II.

Resigning with little reluctance his place at the card table to Dundas, whose turn it was to cut in, Coast lighted a cigarette and wandered round the dining-room of Blackstock's apartment, idly inspecting the half-dozen hunting-prints that adorned the green burlap walls.

Unspeakably bored, he went to the buffet, where he poured a very little Scotch into a tall glass, drowning it with icy charged water. He had refused to drink up to that moment, and was thirsty, but as he sat sipping and watching the players, Van Tuyl's unnatural pallor, moist hair and fixed smile affected him with a faint disgust, and he put the glass aside, not half-emptied. His brows knitted in his concern for the man, who had been drinking heavily and would pursue that madness until satiated or sodden: no influence that Coast knew of would restrain him; he was as unmanageable as a wild horse, and as spirited.

Slender, graceful, high lord of Devil-may-Care, Van Tuyl sober was inimitable, more loved than feared in spite of, perhaps because of, the wit he wielded like a whip-lash. Excesses fanned that brilliancy to a burning frenzy; at such times he knew no friends, and those who knew him avoided him; his wits, submerged, frothed with a satiric humor that etched as indelibly as an acid when he did not lay on with a bludgeon of vituperation. . . . A dangerous foil to Blackstock, Coast thought, comparing them, wondering that they were so much together. Contrasting them he thought: fire and tow, rapier and broadsword!

Blackstock was the broadsword of that comparison, heavy and cumbersome if capable. Without an effort he dominated the others, Van Tuyl always excepted; the sheer weight of Blackstock's personality forced them into the background. Little Dundas, with his deferential smile, delicately pink face and permanently rounded shoulders, seemed the veriest shadow of a man: Blackstock's shadow he had apparently constituted himself. Truax, round of face and blandly practical, if unquestionably independent, was only less dwarfed by his host.



"Brains, Rather," Observed Van Tuyl Blandly.

"A good bridger"—Blackstock in the current slang: giving himself wholly to the game, playing to win, "wolfing the tricks," Van Tuyl told him.

The comment brought a darkish smile to the man's face.

"What d'you want me to do with 'em?" he growled semi-humorously, flipping a card from his hand and as swiftly making his play from dummy. "Make you a present of 'em? . . . Play to that, now; come through with that ten-spot." He chuckled as he gathered in the trick and led the final card from dummy. "That'll teach you to double my original make, I guess. . . . Game and rubber, Dunny: six without, doubled, and a little slam. Got that down?"

"Yes," replied Dundas, grinning feebly as he jotted down the score.

"Tough luck, partner," Truax observed to Van Tuyl. "You couldn't help doubling on your hand, of course, and equally of course I had to be chicane in hearts."

"Brains, rather," observed Van Tuyl blandly, shuffling.

(TO BE CONTINUED.)

Different.

"Why, a year ago you told me this place was easily worth $15,000. Now you estimate its value at less than $10,000."

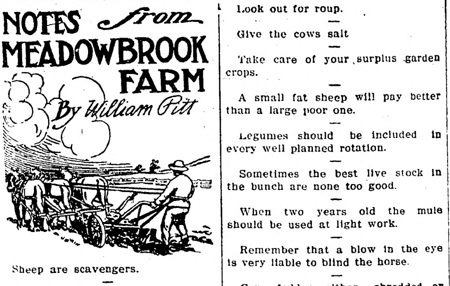
"You must remember that I was trying to sell it to you then. Now you want me to sell it for you."

Foreign Health Resorts.

According to the latest statistics about $40,045,000 is expended each year by visitors from foreign countries who take the "cure" at the natural mineral spring resorts in western Bohemia, along the Erzgebirge (Ore mountains).

NOTES from MEADOWBROOK FARM

By William Pitt



Sheep are scavengers.

Don't crowd your chickens

Wheat responds readily to good culture.

Do not be in too much of a hurry to wean the pigs.

The separator should be thoroughly washed after it is used.

Sheep require less pasture than any other animal on the farm.

More horses are spoiled by poor drivers than any other way.

The cream should be delivered not less than three times a week.

You should have a cooker in order to get the best results with fall pigs.

Give the dairy cows plenty of salt and let them consume all the water they need.

The hen is admitted to be one of the greatest financial factors in the country today.

Stock carrots are a valuable root crop and will yield ten to fifteen tons on rich, loamy soil.

Changes in the richness of milk cannot alter the proportion of skim milk to cream delivered.

The world's herd of swine numbers 100,000,000, two-fifths of which belong to the United States.

The check-rein is a check, not so much on the head of the horse, as upon its general efficiency.

Where skimming is done by means of a centrifugal separator the richness of the cream may also vary.

Corn may be fed to advantage in the bundle when spread on a clean, dry feeding yard or in racks.

A fertile, clean and fine surface soil and the strawberry make a strong combination as a mortgage lifter.

Pigs and sheep in the orchard will, by eating up fallen fruit, reduce the spread of insect and fungus diseases.

Corn should be grown in rotation with other crops to control insect pests and soil diseases peculiar to the crop.

After the grain is cut and stacked, sheep are turned on the stubble to eat the weeds which otherwise would go to seed.

The length of time required to blanch celery sufficiently for marketing will depend largely upon the variety being grown.

The dairy farmer must bring his product above suspicion and any other course has in it neither profit, dignity nor good citizenship.

Do not attempt to pull onions from the soil with an iron tooth rake which will so injure the bulbs that they will become soft and decay.

The bane of most poultry yards today, and this applies not only to those on the farms but also to many exclusive poultry plants, is makeshift equipment.

The colt in the pasture should have its feet cared for as closely as the matured animal in order that he may grow to maturity with feet in a healthy condition.

The best breeding calls for animals capable of reproducing all of those qualities of an ever improving nature which go to make perfect in the type we are aiming at.

Small pigs take to green feed about as early in life as to any feed and such green stuff as clover, alfalfa, pea vines or good pasture are the very best side dishes that a pig can be given.

A composition made of carbolic acid, half ounce; glycerine, eight ounces, is recommended as being good for treating wounds made on horses or cattle by barbed wire fences.

Cucumber seeds may be a little difficult to save, but it will pay you to go out into the patch and gather the long, smooth specimens and place them where they will be out of the reach of the chickens.

Stop feeding corn to pregnant and nursing sows and to young pigs, and there will be little if any trouble from paralysis, which is from overfeeding fattening and heating foods and giving too little bone building material.

Look out for roup.

Give the cows salt

Take care of your surplus garden crops.

A small fat sheep will pay better than a large poor one.

Legumes should be included in every well planned rotation.

Sometimes the best live stock in the bunch are none too good.

When two years old the mule should be used at light work.

Remember that a blow in the eye is very liable to blind the horse.

Corn fodder, either shredded or whole, is a splendid feed for horses.

The corn shredder is quite as valuable as the corn binder for the stockmen.

Storing cauliflowers is not feasible, for growers at least, except in cold weather.

Second-crop alfalfa is fine for the pigs, but if pastured too closely it will soon run out.

The time of watering celery, with any kind of a sprinkling device, is an important matter.

New corn should be fed carefully, as fed in large quantities, it is apt to scour the birds.

Government whitewash will preserve the wood of old buildings more cheaply than paint.

According to conservative reports the Onion Set crop is much shorter this year than last year.

The foal will soon learn to drink from a pail, if allowed to suck the attendant's fingers at first.

If farm manure is used judiciously it will effect a permanent improvement in the yield of wheat.

Onions should be stored in a dry, cool, building where the air will circulate freely amongst them.

If the foreign demand is as great this year for apples as last the better grades will bring as much.

Cutting corn at so much per shock is nearly a thing of the past, since the advent of the corn binder.

The cost of harvesting an acre of corn will vary with the locality and amount of help that must be hired.

The farmer who so manages that he has something to sell the year around is never a complaining farmer.

Cleanliness should be the motto of every feeder. Sheep, above all other animals, detest filth and unsanitary yards.

If there isn't a good bull in your neighborhood, why not unite with a few good neighbors for the purchase of one?

Sheep quarters should be dry, clean and well kept. Also supplied with straw and litter and changed frequently.

Do you know of anything on the farm that will run into money faster than hogs when around 6 or 7 cents per pound?

Save the timothy fields for a seed crop next year and increase them in size and number while present prices are maintained.

If your ewe aborts, take her at once from the lambing shed, burn litter, bedding, etc., and thoroughly disinfect the premises.

The best stock is the stock that is never permitted to stop growing. Feed the calves so that their development will be natural from birth to maturity.

A capon is a castrated male bird. After being caponized the bird becomes more quiet, is more readily fattened, and the plumage becomes heavy and glossy.

Whenever any farm animal shows a disposition to eat wood, earth and other unnatural things, a change in feed is necessary. In most cases too much corn is being fed.

When to pick the peaches is an important question. You must not wait until the fruit is soft and you must not pick the peaches until they are nearly ripe or well colored.

It is important that the ewes be got in good thrifty condition before breeding time, for on this condition lareely depends the successful production of the coming crop of lambs.

Well rotted stable manure with four or five shovelsful of bone meal to a barrow load, will prove an excellent fertilizer for all general purposes for lawns, flower beds, roses, shrubs, etc.

Alfalfa seed is expensive at best, and doubly or trebly so if it will not grow or carries with it trash and seeds which stock a field, a farm or a neighborhood with weed pests that interfere with alfalfa, displace expected profit with positive loss and incite profanity.

Relieves Backache Instantly

Sloan's Liniment is a great remedy for backache. It penetrates and relieves the pain instantly—no rubbing necessary—just lay it on lightly.

Here's Proof.

"I had my back hurt in the Boer War and in San Francisco two years ago I was hit by a street car in the same place. I tried all kinds of dope without success. Two weeks ago I saw your liniment in a drug store and got a bottle to try. The first application caused instant relief, and now except for a little stiffness, I am almost well."
FLETCHER NORMAN,
Whittier, Calif.

SLOAN'S LINIMENT

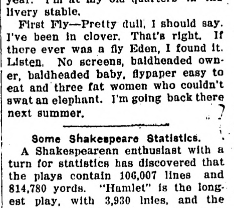
is the best remedy for rheumatism, neuralgia, sore throat and sprains.

Miss E. Rim of Brooklyn, N.Y., writes: "Sloan's Liniment is the best for rheumatism. I have used six bottles of it and it is grand."

Sold by all Dealers.
Price, 25c., 50c., and $1.00.

Sloan's Book on Horses, Cattle, Hogs and Poultry sent free. Address
Dr. Earl S. Sloan
Boston, Mass.

IN THE LIVE BOX.



Willie Rock—Say, Johnnie, I don't want to play in your yard.

A Fly Paradise.

First Housefly—Howdy, old pal? What sort of a season have you had?

Second Fly—Much the same as usual. Didn't take any outing this year. I'm at my old quarters in the livery stable.

First Fly—Pretty dull, I should say. I've been in clover. That's right. If there ever was a fly Eden, I found it. Listen. No screens, baldheaded owner, baldheaded baby, flypaper easy to eat and three fat women who couldn't swat an elephant. I'm going back there next summer.

Some Shakespeare Statistics.

A Shakespearean enthusiast with a turn for statistics has discovered that the plays contain 106,007 lines and 814,780 yords. "Hamlet" is the longest play, with 3,930 lnies, and the "Comedy of Errors" the shortest, with 1,777 lines. Altogether the plays contain 1,227 characters, of which 157 are females. The longest part is that of Hamlet. The part with the longest word in it is that of Costard in "Love's Labor Lost," who tells Moth that he is "not so long by the head as honorificabilitudinitatibus."

FROM TEXAS

Some Coffee Facts From the Lone Star State.

From a beautiful farm down in Texas, where gushing springs unite to form babbling brooks that wind their sparkling way through flowery meads, comes a note of gratitude for delivery from the coffee habit.

"When my baby boy came to me five years ago, I began to drink Postum, having a feeling that it would be better for him and me than the old kind of drug-laden coffee. I was not disappointed in it, for it enabled me, a small, delicate woman, to nurse a bouncing, healthy baby 14 months.

"I have since continued the use of Postum for I have grown fond of it, and have discovered to my joy that it has entirely relieved me of a bilious habit which used to prostrate me two or three times a year, causing much discomfort to my family and suffering to myself.

"My brother-in-law was cured of chronic constipation by leaving off coffee and using Postum. He has become even more fond of it than he was of the old coffee.

"In fact, the entire family, from the latest arrival (a 2-year-old who always calls for his 'potie' first thing in the morning), up to the head of the house, think there is no drink so good or so wholesome as Postum." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason"

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

The Northern Light

CHAS. W. LATTA

Editor and Publisher.

Published every Friday at Holt, Marshall County, Minnesota.

Subscription Price: $1.00 per year, strictly in advance.

Entered as second-class matter Sept. 22, 1911, at the post office at Holt, Minnesota, under the act of March 3, 1879.

Be a booster—not a knocker.

The Chicago Record-Herald calls attention to the fact that the man who can "take a drink or leave it alone," usually takes it.

Turkey is getting it in the neck and the section bosses have to take off their hats to the Italian crew every morning to keep peace in the family.—Warroad Pioneer.

F. H. Peterson, of Moorhead, ex-state senator, is credited with the intention of being a candidate for the congressional nomination next year in opposition to Hon. Halvor Steenerson. Mr. Peterson is a very nice man, but he had better confine his efforts to some easier task.

It seems odd how a business man in a town like this will kick over the traces if a farmer sends away for a bill of goods, yet the same business man will send his printing work out of town without even giving the local printer a chance to figure on it. Holt has one of these critters.

The progressive Republicans of the country had a meeting in Chicago this week and the press dispatches say that their strength is surprising. We miss our guess if the progressive strength does not surprise the old stand-pat bunch out of their boots next year, in Minnesota, at least.

The Roseau Region says that at the next Republican state convention northern Minnesota will ask for representation on the state ticket, and urges a united effort to the end that such recognition may be secured. It is pretty well understood that Bro. Mattson is willing to run for Secretary of State and we may look for the formal announcement of his candidacy shortly.

The Duluth Herald urges an extra session of the legislature for the purpose of enacting laws to increase taxes on railroad property, and the Bemidji Pioneer puts forth a plea for such a session on the ground that the governor had pledged himself to call an extra session to pass an equitable reapportionment measure. In either of these things there is sufficient grounds for an extra session, but not enough weight to induce the present governor to issue a call for one. It is easy for little Adolph, having heard his marter's voice, to find excuses for not heeding the wishes of the common people. Devise some plan to get Jim Hill to ask for an extra session and it will be called in some hurry.

School Report.

Report of School District No. 58 for the month ending Oct. 13, 1911.

Number of pupils enrolled, 40.

Total attendance in days by all pupils, 444.

Those perfect in attendance were: Martin Davidson and Hilda Erickson.

MARGARET RANKIN, Teacher.

Additional Local Items

Wanted—Pure bred Brown Leghorn cockerel. Apply at this office.

Tom Severson made a short business trip to Thief River Falls Tuesday and returned next morning.

Rev. M. B. Ordahl will conduct services at Thief Lake next Sunday at 2 o'clock in the afternoon. All welcome.

Don't fail to attend the big Auction Sale at the Gusa farm six miles north of Holt, in section 3, Town of Holt, October 26th, 1911.

The Mud Lake Ladies Aid had a very pleasant and successful meeting Wednesday afternoon at the home of Mrs. Johnnie Knudson.

Chas. Skoglund returned home to Minneapolis last Saturday after two weeks spent visiting here with his brother-in-law John Engstrom.

Enamelled kitchenware at Kolden's. Triple coated, white lined and the best bargains you ever knew, 10 and 69 cents only, while they last.

Miss Alice Hanson, of Enderlin, N. D., has been the guest of her aunt, Mrs. Frank Coppay, for the past couple of weeks and intends to leave for her home tomorrow.

We want more subscribers and will take potatoes, chickens, or wood at current market prices on subscription. Of course we prefer the money, but if you haven't the cash bring on the produce. Dont be without your home paper anyway.

TAKEN UP—On Friday, Oct. 6, at my place 3 miles west and 1 1-4 miles north of Holt, 1 red heifer calf and 1 red steer calf, white striped. Owner can have same by calling, proving property and paying expenses.

JOHN SWANSON.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

Farms Wanted.

I have prospective buyers for a few good improved farms; also for 960 acres of wild land. All must be in eastern Marshall county.

CHAS. W. LATTA, H clt, inn.

CRUELTY TO ENGLISH WORDS.

Fearful and wonderful are the uses to which some of our English words are put, uses for which they were never meant. The most conspicuous at the moment is the word skating. In a Parisian's mouth a skating is a rink, and he talks of one skating, two skatings and even a third with unblushing ineptness. Then there is the word smoking. This in Paris has nothing to do with either tobacco or opium. It merely means a man's dinner jacket. There is a pastry cook who makes buns on what he believes to be an English model, and he will sell you one buns, pronounced nasally, like burrs, for four sous.

THE DULUTH HERALD
BEATS THE CENSUS THREE TO ONE

During the past ten years the population of Duluth increased 48 per cent., St. Paul 32 per cent., and Minneapolis 49 per cent. In the Same Period the Circulation of The Duluth Herald

INCREASED 150 PER CENT.

This marvelous expansion—so much greater than that of the surrounding territory—is due solely to the merits of The Herald. The Herald has never used any kind of premium, contest, or price reduction to gain subscribers but prints each day the very best NEWSPAPER in the Northwest. Its editorial page is thoroughly independent and its news columns cover every feature of the world's daily history.

Send for sample copy and get The Herald habit.

THREE MONTHS FOR $1.00—Mailed Daily.

BOYS FIND QUEER DUTIES

London Messengers Called Upon to Perform All Sorts of Peculiar Tasks.

Awards of special medals for remarkable tasks successfully performed by district messenger boys were made in London a few days ago and revealed the fact that messenger boys do not always have such an easy, slowgoing time as some may have imagined. The New York World says prizes were presented to about 200 boys, many of whom had fulfilled very difficult missions.

Messenger Alfred Beale, for instance, won a prize because he was sent from London to Paris to deliver a large box, then to Rome with a dress suit for a high official of the Italian court, and then to Belgium, where he had to meet the grand duke of Mecklenburg at Liege station with a luncheon basket.

Another boy, Messenger Robbins, brought an elephant and its Indian keeper from Buxton to the Palladium and back, and rode on the animal's back on the return journey. A third boy was sent for in hot haste to a house in Bond street, where he found a terrified lady standing on a table. She refused to descend until the lad had captured the mouse which had frightened her.

HAVE LEARNED HOW TO SPELL

Reason Why One Man Thinks That the Intelligence of Juries Has Increased.

Having made the statement that juries are more intelligent than they used to be, the man who has often served as a juror backed it up with bits of his own experience.

"My chief reason for saying so is that juries nowadays do not have such a tussle with the word guilty as formerly," he said. "Several years ago I talked confidentially with a number of men who assured me that as soon as they learned they had been impaneled they looked up the spelling of 'guilty' and practiced writing it so that in case the jury lightning actually struck them and the accused should be convicted they would know how to write their opinion. Others of my associates were not so conscientious. If they believed a man guilty they said so, irrespective of dictionary rulings. Less than five years ago I served on a jury that pronounced a man guilty in four different orthographic forms besides the right one: Gilte, gillite, gille and gilty. So far as my observation goes most juries nowadays know how to spell guilty without especial coaching."

DOOM OF THE FAMILY?

Some delver in the mathematics of divorces has figured it out that, at the present rate of increase, 1990 will see one-half of all marriages in this country dissolved by legal proceedings.

A Missouri University professor makes this prophecy: "The family as a permanent union between man and wife will end in this country within a measureable length of time. Monogamy as an institution is doomed in the United States."

Conditions certainly are not promising. In 1905 our country had 68,000 divorces, against 40,000 in the rest of the world.

All the time, the world is growing better. Improvement is sure to come in principles, means and methods of perpetuating the institution of the home. We who give consideration to present unpromising conditions will not be here in 1990. But those who shall be on the scene of the world's action and progress will see such improvements in conditions of marriage as to reduce divorce to practical extinction.

SAYINGS OF FAMOUS MEN.

Richard III.—Then bring me a motorcycle!

Nick Altrock—Curses on my fatal gift of beauty!

King Midas—They'll blame me now for the overproduction of gold.

Schuyler Colfax—Well, I should smile!

Robert Louis Stevenson—Doc, I seldom smoke more than sixty a day.

Robinson Crusoe—This is Friday, is it? Well, bring me some fish.

A NEW KIND.

"Both those adjoining households have a sort of transposition envy of each other."

"How so?"

"Well, you see, one has a baby grand and the other a grand baby."

DIVER'S NERVES PROVE TRUE

Seeker After Pearls Saved From a Horrible Death by His Coolness and Courage.

A successful diver must possess great courage and nerves of steel. Such a man connected with a large wrecking company was visiting some years ago the pearl fisheries in the Gulf of California, where sharks abounded. On one of his trips in quest of the pearl oyster he had a narrow escape from a fearful death.

He had been instructed never to stir from the bottom until he had looked up and around. Fortunately he heeded the advice. Having filled his bag, he glanced quickly about and caught sight of a huge shovel nosed shark watching him.

In an emergency men think fast. Near the diver was a large rock. He moved quickly to the other side of it, hoping to dodge the ferocious monster, but the maneuver did not work. The shark watched every movement, changing his position by a slight motion of his powerful tail.

Time was precious, and the diver conceived the idea of blinding the shark by stirring up the mud. Under cover of that he might escape. He worked for dear life and had the water thick with mud in less than half a minute.

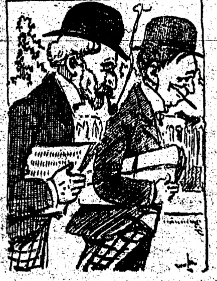
Slipping around the rock again, he rose to the surface, having barely strength enough to reach the side of the boat, and was hauled on board just as the voracious man eater made a rush for him.

TREE APPEARS TO BLUSH

Seeming Wonder of the Florida Swamps Really Has a Most Simple Explanation.

Among the many wonders of the vast Florida swamps there is nothing more surprising than the blushing tree. It actually blushes when the rain falls upon it. The mysterious and beautiful glow of color which it assumes in a rainstorm baffles description. As the rain drenches a tree, gradually, yet unmistakably, the green hue gives way to pink. In a few minutes the green fades from sight. Only in a few half-hidden spots, beneath broad branches and on the trunk, is there a tinge of green to be seen. The tree is as pink as the cheeks of the healthy girl. After an hour or more, when the shower is over, the tree assumes its familiar green once more. As it is changing back the spectator suddenly realizes the secret of the phenomenon. Certain tiny insects and not the tree itself change color. These peculiar parasites are possessed of the power of chameleons. In the bright warm sunshine they are greener than the tree on which they live, but when the chilly rain falls upon them they contract their tiny backs and become a pretty pink in tint. Millions of these change the color of the tree and make it appear to be blushing.

IN THE SUBURBAN TOWN.



First Commuter—Do you treat your cook like one of the family?

Second Commuter—Nix. We wouldn't dare to take such a liberty.

SOMETHING TO SHOW.

"Do you mean to tell me," demanded Mr. Sillicus angrily, "that you actually ordered $10 worth of groceries of a total stranger, at prices less than any wholesale dealer can buy them; and paid for them in advance?"

"Yes, that's what I said," replied his better half.

"And you hadn't sense enough to see that it was a bare-faced swindle!" roared Sillicus. "Well, your money is gone now, and you have nothing to show for it."

"Why, yes I have, John," said his wife. "I have this man's receipt for the money."—Lippincott's.

LIGHTEN YOUR KITCHEN CARES
1892 PURE SPUN ALUMINUM WARE
SAVES MONEY HEALTH, TIME AND TEMPER
It says "Good Morning" to a million happy housewives who have found kitchen satisfaction in the only ware that will not break, scale or rust, nor scorch the most dainty food.

Bring us the news.

When in town call at this office and let's get acquainted.

Men with Teams Wanted by Folden & Ormisten, 2 miles east of Steiner.

Miss Louise Rux transacted some business at Thief River Falls on Monday.

Harry Werner came from Germantow to attend market day and visit with the home folks.

Miss Edna Risberg was up from Thief River Falls to spend market day and Sunday at her home here.

Johnny Johnson was over from Langdon, N. D., to attend Market Day and the dance Saturdry evening.

M. V. Evenson was up yesterday from Thief River Falls showing some lands near here to a prospective purchaser.

Oak Leaf Camp, of the Royal Neighbors, will give a big dance at Middle River tomorrow evening, the 21st. Don't miss it.

Triple coated enamelled kitchen ware at only 10 cents per piece is a bargain that you never had before. S. S. Kolden & Co.

Don't fail to attend the big Auction Sale at the Gusa farm six miles north of Holt, in section 3, Town of Holt, October 26th, 1911.

L. S. Kolden brought his two little grand-daughters along and came up from Nielsville to spend Friday and Saturday last with the folks here.

Martin Widsten, editor of the Warroad Pioneer, was an interested visitor here last Saturday and was the guest of Nels Engebretsen, who is a relative.

Andrew Bjerk got his threshing done last week and reports the following excellent results; Speltz, 50 bushels per acre; oats, 54; wheat, 21, and flax 14 bushels.

The Royal Neighbors Camp, of Middle River, will give a dance at the hall there Saturday evening, October 21st. There will be first class music and a real good time. Don't fail to attend.

M. A. NELSON, M. D.
PHYSICIAN AND SURGEON
Office over Holt Merc. Co's store
HOLT, MINNESOTA.

Be a booster—not a knocker.

Attend the big Royal Neighbors' dance at Middld River tomorrow evening.

Mrs Herman Simonson and daughter Mable visited here between trains last Saturday.

Martin Strom went down to Thief River Falls on Wednesday afternoon for a short visit.

Ernest Bessler went home to Thief River Falls Tuesday after some time spent threshing in this vicinity.

Miss Esther Mickelson returned to Thief River Falls Monday after a couple of days spent at her home.

Miss Inga Melting left yesterday for her home at Halstad after several weeks spent here with Mrs. J. C. Davidson.

Miss Selma Wegge arrived home on Tuesday from Crookston and Dakota points where she has been visiting with friends for some time.

The Holt Ladies Aid will have their next regular meeting at the home of Mrs. H. Fosholm on Wednesday afternoon, November 1st.

Enamelled kitchenware at Kolden's. Triple coated, white lined and the best bargains you ever knew, 10 and 69 cents only, while they last.

Don't fail to attend the big Auction Sale at the Gusa farm six miles north of Holt, in section 3, Town of Holt, Thursday, October 26, 1911.

The Holt Young Peoples Society will have a big necktie and apron party in the Holt Mercantile Co's basement on Saturday afternoon, the 28th inst. All the ladies are invited to attend and bring neckties and aprons along with them.

T. O. Skibeli arrived here from Pequot, Crow Wing county, the first of the week with a good car of stock, machinery and household goods. His family arrived Wednesday and they have moved onto a fine farm 4 miles northeast of here which Mr. Skibeli purchased some time ago.

Messrs Carlson, of the Holt Mercantile Co., were busy the first part of the week loading a car of potatoes for shipment. We understand they paid a better price than could be obtained from the buyers in Thief River Falls. This shows how these progressive business men of Holt get business and prosper.

Crookston College has placed all its graduates in positions. The demand for office help has been greater than we could supply. School is in session all year. You can begin at any time of year. Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

Farms Wanted.

I have prospective buyers for a few good improved farms; also for 960 acres of wild land. All must be in eastern Marshall county.

CHAS. W. LATTA, Holt, Minn.

RUBBERS!

We have just received a new line of Rubbers and Overshoes called the

Hickory Brand

Which has been proved to be the Best Line in the Market. Come in and see for yourselves.

Do not forget that this is ALL NEW STOCK and not a year or two old.

HOLT MERCANTILE Co.
"The Big New Store"

Market Day Is Over

Governor Failed to Appear but Better Men Filled The Program.

Holt's big Market Day is over and done. There was a good crowd in attendance, weather considered, and all were well pleased with the program renhered. Gov. Eberhart failed to attend, but he was hardly missed, as State Auditor Iverson, Immigration Commissioner Welsh and others filled the program instead and pleased the crowd immensely.

The main address of the day was delivered by Hon. Halvor Steenerson. He spoke of the immense drainage projects now being carried on in the Mud Lake territory, a matter on which he is well posted as he is the one man whose work in congress paved the way for it. He also spoke of the present faulty system of distribution of farm products, pointing out that the farmers at present are receiving a low price for their products as compared with the prices to the consumers in the cities. Mr. Steenerson was given the closest attention and hearty applause.

State Auditor Iverson and Immigration Commissioner Welsh gave a couple of the heart to heart talks that have made such prime favosites with the people, and they were followed by General Manager Gemmel, of the M. & I. railroad, assistant Secretary of State Larson and George A. Ralph, state drainage engineer.

After the program of speeches a number of foot races, etc., kept the young people amused while the older ones did some shopping.

NOTES OF THE DAY.

Dr. M. A. Nelson officiated as master of ceremonies with honor to himself and credit to the town.

There were rare samples of potatoes. The biggest one was brought in by C. E. Smith and weighed 2 lbs 12 ounces.

A 5-pound radish brought in by Mrs. Frank Coppay attracted a lot of attention and comment. It is now on exhibition at this office.

The exhibits of farm products were remarkably fine. Immigration Commissioner Welsh stated that some of them were about the best he had ever seen anywhere.

The Minneapolis Journal and the St. Paul Pioneer Press had staff correspondents on the ground and this community has been given some valuable publicity by those influential newspapers.

H. Fosholm was awarded the special prize for the largest family in attendance. We are not definitely informed as to the winner of the prize for the family coming the greatest distance by team.

For Sale

One complete threshing outfit consisting of one 25 horse power Nichols & Sheppard traction engine with 33-inch drivers, 72 inches high, and one Reeves separator, 33 by 56, with new Garden City feeder. Everything is in good condition and the machine is now in operation near Middle River, Minn., and can be inspected by prospective buyers. This outfit will be sold at the Gusa Estate Auction to be held four miles south of Middle River, on section 3, Town of Holt, on Thursday, October 26, 1911.

Our specials in triple coated, white lined, enamelled kitchen ware at 10 and 69 cents are really wonderful values. We have quite a lot on hands and, while they last, we will sell them at these prices. You may never get these goods at such low prices again, so call and get what you want while they last. S. S. Kolden & Co.

IMPORTANCE RECOGNIZED.

"Do you think that man fully appreciates the importance of the office to which we have elected him?" said one constituent.

"I guess he does," replied the other. "The first thing he did was to say it ought to command a larger salary."

Subscribe for The Northern Light. Only $1.00 per year.

PRECOCIOUS KIDS ARE THESE

New York Youngsters Who Have Keen Sense of Artistic Value, and Also Humor.

The six-year-old daughter of William M. Chase, the painter, has not yet taken pencil and brush in hand, but she has been raised in an atmosphere of the best in art and has developed an unusually critical sense. This was from a midday party given by one of her classmates in the kindergarten.

"Did you have a pleasant time, dear?" inquired Mrs. Chase, as she removed her small daughter's wraps.

"Yes, mamma," was the young person's reply, "the lunch was beautiful and the girls looked so pretty in their party frocks, but the pictures in the house are terrible."

"Why, my dear!" ejaculated her astonished mother, "what was the matter with them?"

"So light and trashy," was the young art student's reply, as she carried her rubbers to the closet.

But it took the seven-year-old daughter of a New York physician to "put one across" with father, as the boys would say. Her mother had been seriously ill for some weeks and her father decided that his only child was becoming lax in the matter of table manners and especially in the selection of proper food combination.

"I notice, my dear," he remarked cautiously, "that you are not eating potatoes."

Now potatoes are this particular girlie's especial abomination. She never quivered an eyelash, but responded gravely:

"No, father, dear, I have given up potatoes since Lent!"

WOULD GIVE AID TO FALLEN

Chicago Judge Comes Forward With a Really Practical Idea of Needed Philanthropy.

A Chicago judge suggests a new duty for the courts. He says:

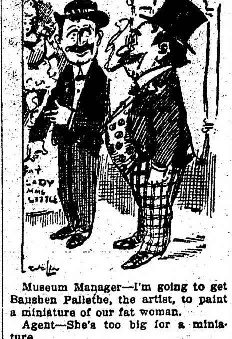
"It is all right for people who do not come in contact with these classes to say that there is plenty of work for the man that wants it, but when a man is down and out and has no place to go he needs some one to take an interest in him and get him braced up again."

And then the court suggests that some provision be made whereby it may assist the unfortunate man; give him some assistance, although the man may be down and out and hasn't a cent to pay a fee. For this duty there should be, it suggests, an attache of the court to represent it and the certain influence it may carry in finding the man work. The unfortunate man himself, under such influence and care, might spruce up, do his work well and make something of himself.

AMERICAN HUMOR.

The American humorist of yore, with his stock material of servant girl and stove, mother-in-law and messenger boy, mule and goat, originated a new school of broad exaggeration, that, with its bold drawing of the long bow, was genuine, distinctive and irresistible. It has been perpetual and still thrives—at its best, perhaps—in the daily press. The world has been its oyster, for elsewhere one finds no such store of fun. It is the kindred and sympathetic note of exaggeration in Dickens which makes him the greatest humorist England has produced. It is the leaven of Charles Lever, of Kipling; without it the pages of Dumas and Daudet were a deadly bore.—Philadelphia Press.

FOR SUCH A SMALL SPACE.



Museum Manager—I'm going to get Baushen Pallethe, the artist, to paint a miniature of our fat woman.

Agent—She's too big for a miniature.

D. B. Bakke, Pres. S. S. Kolden, Vice-pres.
HOLT STATE BANK
Incorporated June 1st, 1910.
Our List of Customers is Steadily Incrasing.
Why pay out $1.50 in fees for a few Money Orders when a check answers the same purpose without a cent of cost to you? We urge everyone to systematize their business and to pay all bills by check. You not only hold a record of your earnings and expenditures during a season, but also hold a separate receipt for each and every check bearing endorsement. Also, by conducting your business on an economical basis, your balance steadily increases. A surplus entered to your credit in your pass book is a most worthy friend to have and far-reaching in its effects within the community, as it places money in circulation among your fellow neighbors.
Your entire banking business earnestly solicited.

EVER TAKE A MUSIC BATH?

They Are as Good for the Soul, Holmes Says, as Water for the Body.

One must be educated, no doubt, to understand the more complex and difficult kinds of musical composition. Go to the concerts where you know that the music is good, and that you ought to like it whether you do or not. Take a music bath once or twice a week for a few seasons, and you will find that it is to the soul what the water bath is to the body. I wouldn't trouble myself about the affectations of people who go to this or that series of concerts chiefly because it is fashionable. Some of these people whom we think so silly will perhaps find, sooner or later, that they have a dormant faculty which is at last waking up, and that they who came because others came, and began by staring at the audience, are listening with a newly found delight. Everyone of us has a harp under the bodice or waistcoat, and if it can only once get properly strung and tuned it will respond to all outside harmonies.—Oliver Wendell Holmes.

The Universal Franchise.

A small number of men sympathizers took part in the suffragist parade in New York city, among them several members of the faculty of Teachers' college. One of these professors had the honor of leading the male contingent and of carrying a banner.

"Did you notice," he asked a friend afterward, "what the inscription was on that banner they gave me to carry?"

"No," replied his friend, "you carried it as if you were afraid some one would decipher it."

"It read," chuckled the professor, "'The men vote—why not we?'"—Success Magazine.

Peculiar Industry.

An important industry and one peculiar to Spain is the manufacture of jute and hemp sandals.

Whenever you have a pain think of Hamlins Wizard Oil. For Headache, Toothache, Earache, Stomach ache, and many other painful ailments there is nothing better.

The Best.

"What do you think would be a good motto for the motorists?"

"Wrecks to the reckless!"

Dr. Pierce's Pellets, small, sugar-coated, easy to take as candy, regulate and invigorate stomach, liver and bowels. Do not gripe.

It pays to be honest—at least it pays your employer.

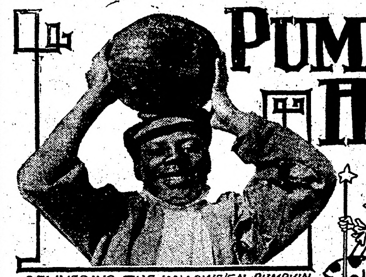
PUMPKINS FOR HALLOWE'EN



DELIVERING THE HALLOWE'EN PUMPKIN

MAKING A JACK-O-LANTERN

LOADING PUMPKINS FOR MARKET

PROBABLY very few of the younger generation who, as did their fathers and mothers before them, derive so much enjoyment from the mischievious and mirthful Hallowe'en season ever stop to consider in their frolicking how much they are dependent upon the prosaic pumpkin, the principal ammunition for the fun-making. Nature's golden globe, so symbolic of all the glories of autumn, is not only the ammunition, but it is likewise the emblem of the mysterious holiday at the end of October. Furthermore, the pumpkin, as it lies in the field or reposes in the market stalls, is so suggestive of a hundred pranks that it might almost be denominated the inspiration of much of the Hallowe'en revels.

MAKING READY FOR HALLOWE'EN

It's all very well to talk about the advantages of the modern quiet and decorous Hallowe'en in contrast to the rather more boisterous ones that were formerly the rule—and are yet in in some localities—but whatever the form of celebration it would assuredly lose all its zest for juvenile America without the grinning jack-o'-lanterns made possible by ye plump pumpkins. Moreover, without the vivid-hued orbs the Hallowe'en hostess would be at a loss for decorative effects at dinner and party. And finally, without the wealth of the pumpkin's mellow interior we should one and all be deprived of that supreme delicacy—the pumpkin pie—which is our bounden right on Hallowe'en even if some crabbed old doctor does deny it to us all the rest of the year.

No one, probably, has the imagination to predict how we could get along without the pumpkin at this prankish time, because not within the memory of the oldest inhabitant have we been without these harbingers of the waning year. We can imagine Christmas without a tree illuminated by the tiny electric lamps or conceive a St. Valentine's day without those convenient and economical post card valentines, because it was not so many years ago that we knew not these holiday adjuncts. But Hallowe'en without pumpkins! Why, it is too preposterous to give credence even for a moment. As well try to imagine a Christmas without mistletoe or mince pie; a Memorial day without flags; or a Fourth of July without fireworks.

Yet for all that it is the pumpkin and its contents that gives "go" to the Hallowe'en celebration; this glory of the autumn corn field has never been accorded much formal notice by an unresponsive world. To be sure, some homely poet putting into verse the look of things in the period known as the afternoon of the year, does make some passing reference to the "frost on the pumpkin," or something of that sort, but what kind of recognition is that for a vegetable the very sight of which is enough to make one's mouth water. It ought to have a monument or be the subject of commendation by congress, says the enthusiast on Hallowe'en. Instead of such commendation (whisper the fact in shame) the United States government, which gets out countless books on all sorts of fruits and flowers and vegetables and bugs, has never devoted so much as a pamphlet to the rotund delicacy—hasn't, indeed, deigned to notice his majesty of Hallowe'en except to give a few hints to housewives who may desire to can pumpkins, as though that were a fit fate for so useful a holiday adjunct.

But for all that there is so little lore relative to the history and antecedants of the pumpkin—and perhaps this is, after all, in keeping with Hallowe'en stealth—it is known that the pumpkin is a distinctively American delicacy. The aborigines of North America planted it among their corn long before the first white man set foot on the continent (if tradition is to be believed), and we have followed much the same custom to this day. Of course, pumpkins are raised in other environment than in corn field, but no other surroundings seem so appropriate for the heralds of the fall festivals.

THE ULTIMATE FATE OF THE "INSIDES" OF A HALLOWE'EN PUMPKIN

Every true friend of the pumpkin is forced to admit that the name it bears is a plebian one for so royal a fruit. Its name has not only proven a disadvantage in some respects, but has resulted in the pumpkin being confused with certain other products of the farm. As every person who goes in quest of a pumpkin for Hallowe'en plots can well attest, there is only one form of pumpkin that is worthy the name and occasion—that shapely orb of joy, round as a ball and with its glossy surface tinted a more vivid orange than the orange fruit itself. And yet there are people who confuse the only and original simon-pure pumpkin with its numerous cousins, none of which have its traditions or claims to distinction. Just because the pumpkin belongs to the same family as the summer and crookneck squashes and the common, inedible gourds is no reason why anybody should confuse them as one and the same thing. Why, even the squashes that approach most nearly to the pumpkin in color lack its symmetry of form.

The uses of the pumpkin are certainly as varied as of any fruit or vegetable, but whatever its mission it comes into its own along about Hallowe'en. For one thing, that is the height of the harvest season for the pumpkin, and the people who are canning the delicacy or stocking the cellar are busy now, as are likewise those housewives who are utilizing the fleshy layer, that is found just beneath the rind of the pumpkin, for "stuffing" for the most famous of pies—the kind, you know, that the little boy objected to because they "mussed up his ears." And, finally, there is to be taken into account the demand for pumpkins for Hallowe'en itself, and it is no slight demand, either, for it amounts to a consumption of thousands upon thousands of pumpkins every October, even without counting those which are utilized in making pies for Thanksgiving feasts.

The pre-eminent Hallowe'en use of the pumpkins is, of course, for jack-o'-lanterns. You will agree that it would not be not merely superfluous, but little short of an insult, to insert any description of these nocturnal terrors for the timid. Pity the boy who has not in the halcyon days of his youth openly or surreptiously carved the grinning teeth, staring eyes, strong nose and expansive ears that vested the placid pumpkin with a sudden ferocity worthy of the most desperate cause. Perhaps it were not well in all cases either to inquire too closely as to just how the pumpkin was acquired. But whatever be the means whereby it was apportioned to its present purpose, it is a safe guess that its selection represents much care and thought and time spent in canvassing the possibilities and qualifications of candidates. For be it known the sphere of vegetable gold that is to be toted around with a candle inside to frighten maiden ladies and youngsters in the first or second reader and the hapless passer by, must come close to certain rigid standards of form and outline. And then, too, it is not advisable to have the "pumpkin head" too big, although that is a temptation, but when he is prone to pick a 40-pound pumpkin, the far-sighted sculptor will recall that a 20-pounder may be much more handy in the event that it is necessary to beat any hasty retreats on the eventful night.

The up-to-date Hallowe'en hostess depends more upon the pumpkin than she does upon ice creams, the popcorn, the fudge or any of the other necessities of the frolics at the end of Indian summer. A substitute might be found for any of the eatibles, but there is no substitute for the pumpkin as a Hallowe'en decoration. Most of the pumpkins that thus go to add to the jollity of the occasion are the bona-fide products of the farm, but of late years make-believe pumpkins have made their appearance at many an entertainment. It is that they fill a special niche in the scheme of things rather than that they have been required by any shortage of the real pumpkin crop. The situation may be explained by an example. Your ingenious hostess employes the real pumpkins—halved or with an opening at the top, or slashed with the outlines of a Jack's visage, as shades for the candles that are deemed to give sufficient illumination for such a spooky occasion, but she has miniature pumpkins fashioned from colored cardboard as place cards at the supper table, and the favors for the guests are candy boxes in the form of pumpkins filled with pumpkin-colored candy.

It might be supposed that a jack-o'-lantern is a jack-o'-lantern, and that there is very little difference between the reincarnated pumpkins, but any student of this class of sculpture can assure you that there are wide differences that distinguish the different "schools." The boys whose sole thought is of the impression to be made by the flaming countenance looking out from the pumpkin bestow all their thought upon the facial features that are to be thrown into relief by the candlelight from inside of the pumpkin, whereas the hostess whose pumpkin sentrics are posted in well-lighted rooms is wont to embellish a plain countenance with black or white eyebrows and mustaches and other supposedly life-like touches.

Surely the Age of Paper

Its Use Becoming Universal—Hard to Set a Limit on the Possibilities.

A report from Lynn, Mass., announces that the police of that city are to be provided with clubs made of paper instead of hickory. The new clubs will be harder, tougher and more durable than the old. In a new direction, then, paper is to take the place of wood.

Some twenty years ago James G. Blaine struck the fancy of the country by saying in an address at a college commencement that the nature of our civilization is fairly illustrated by the fact that the wheels of the car that brought him to Washington and the napkin given him at the commencement luncheon were made of the same material as that upon which he had written his speech. The wheels, the napkin and the stationery were all of paper. But since the time of Blaine the use of paper has been carried far beyond the limits that excited his admiration. Who could then have foreseen that the policeman's club would be made of it?

It is as hard to set the limits to the possibilities of paper as to those of rubber. We have paper wheels and rubber tires. Already there is talk of paving streets with rubber surfaces and perhaps the foundation may be of papier-mache. We are soon to be required to carry paper drinking cups along with handkerchiefs as a part of the necessary equipment of dress. By and by the whole dress may be paper. Fortunately, we can pay for all these things with paper money.

Dangerous.

Mrs. Newbride—Boo, hoo! Henry threw a cake at me. One that I made myself, too!

Mother—The monster! He might have killed you.

A Poor Recommendation.

"Well," her friend said, "he seems to be able to make an honest living."

"Yes," she replied, "but, heavens, who wants to marry a man of that kind nowadays?"

Stops a Deep-Seated Cough in a Hurry

A Family Supply of Unequaled Cough Remedy for 50c—Money Refunded If It Fails.

Cough medicines, as a rule, contain a large proportion of plain syrup—a good ingredient, but one that anyone can make. A pint of granulated sugar, with 1-2 pint of warm water, stirred for 2 minutes, gives you as good syrup as money can buy.

A 50-cent bottle of Pinex, mixed in a pint bottle with home-made sugar syrup, gives you a full pint of really better cough syrup than you could buy ready-mixed for $2.50. There's a clear saving of $2.00. Full directions in package.

And money couldn't buy a quicker, better remedy. Takes hold at once, gives almost instant relief, and usually stops the most obstinate, deep-seated cough in 24 hours. It stimulates the appetite, is slightly laxative and has a pleasant taste—children take it willingly. Splendid for hoarseness, asthma, chest pains, and other throat troubles, and unequaled for prompt results in whooping cough.

Pinex is a special and highly concentrated compound of imported Norway White Pine extract, and is rich in guaiacol and other natural healing pine elements. Simply mix it as directed with sugar syrup or strained honey, and it is ready for use. Used in more homes in the U. S. and Canada than any other cough remedy.

Pinex has often been imitated, but never successfully, for nothing else will produce the same results. The genuine is guaranteed to give absolute satisfaction or money refunded. Certificate of guarantee is wrapped in each package. Your druggist has Pinex or will get it for you. If not, send to The Pinex Co., 238 Main St., Fort Wayne, Ind.

The Angler's Bait.

A well-known angler at Peterborough having obtained a wasps' nest containing a large number of grubs, placed the nest in the kitchen oven to kill the grubs so that he could use them for bait.

The next morning he went to get the grubs, but on opening the oven door a swarm of wasps flew out. The oven was not hot enough to kill the grubs, but was sufficiently warm to hatch them.—London Daily Mail.

It may be O. K. for a woman to seek to duck the issue by saying that she's "too intense," but that's a piffling excuse for a man!

About the only proof a woman needs that she is in love with a man is to feel perfectly sure that she isn't.

CHANGE IN WOMAN'S LIFE

Made Safe by Lydia E. Pinkham's Vegetable Compound.

Graniteville, Vt.—"I was passing through the Change of Life and suffered from nervousness and other annoying symptoms, and I can truly say that Lydia E. Pinkham's Vegetable Compound has proved worth mountains of gold to me, as it restored my health and strength. I never forget to tell my friends what Lydia E. Pinkham's Vegetable Compound has done for me during this trying period. Complete restoration to health means so much to me that for the sake of other suffering women I am willing to make my trouble public so you may publish this letter."—Mrs. Chas. Barclay, R.F.D., Graniteville, Vt.

No other medicine for woman's ills has received such wide-spread and unqualified endorsement. No other medicine we know of has such a record of cures as has Lydia E. Pinkham's Vegetable Compound.

For more than 30 years it has been curing woman's ills such as inflammation, ulceration, fibroid tumors, irregularities, periodic pains and nervous prostration, and it is unequalled for carrying women safely through the period of change of life.

Mrs. Pinkham, at Lynn, Mass., invites all sick women to write her for advice. Her advice is free, and always helpful.

The Farmer's Son's Great Opportunity

Why wait for the old farm to become your inheritance? Begin now to prepare for your future prosperity and independence. A great opportunity awaits you in Manitoba, Saskatchewan or Alberta, where you can secure a Free Homestead or buy land at reasonable prices.

160 ACRE FARMS IN WESTERN CANADA FREE

Now's the Time—not a year from now, when land will be higher. The profits secured from the abundant crops of Wheat, Oats and Barley, as well as cattle raising, are causing a steady advance in price. Government returns show that the number of settlers in Western Canada from the U. S. was 50 per cent larger in 1910 than the previous year.

Many farmers have paid for their land out of the proceeds of one crop.

Free Homesteads of 160 acres and pre-emptions of 160 acres at $3.00 an acre. Fine climate, good schools, excellent railway facilities, low freight rates; wood, water and lumber easily obtained.

For pamphlet "Last Best West," particulars as to suitable location and low settlers' rate, apply to Sup't of Immigration, Ottawa, Can., or to Canadian Gov't Agent.

Terrible Suffering

Eczema All Over Baby's Body.

"When my baby was four months old his face broke out with eczema and at sixteen months of age his face, hands and arms were in a dreadful state. The eczema spread all over his body. We had to put a mask or cloth over his face and tie up his hands. Finally we gave him Hood's Sarsaparilla and in a few months he was entirely cured. Today he is a healthy boy." Mrs. Inez Lewis, Baring, Maine.

Hood's Sarsaparilla cures blood diseases and builds up the system.

Get it today in usual liquid form or chocolated tablets called Sarsatabs.

Your Liver Is Clogged Up

That's Why You're Tired—Out of Sorts—Have No Appetite.

DEMAND FOR HEAVY DRAFT HORSES STILL CONTINUES BIG

No Mechanical Contrivance or Motor Vehicle Has Yet Been Discovered to Replace This Magnificent Animal—Most Valuable Asset the Farmer Has Who Breeds Him Properly.

One of Clydesdale Geldings That Bring High Prices for Six-Horse Team.

(By CAPTAIN A. H. WADDELL.)

Never in the history of this country, or any other, for that matter, has the heavy draught horse been in such demand or so valuable as he is today. Indeed, he is the most valuable asset the farmer has who breeds him right.

No mechanical contrivance or motor vehicle has been discovered that will fill the place of this magnificent, animate creature of flesh and blood, or will any contrivance of any kind be perfected for many a long day, that will accomplish what he can, and do the work as well and so thoroughly, as well as, as cheaply as he can.

Motor trucks have failed not only to cope with the heavy loads imposed upon the brewers dray, for instance, and the hauling of cumberous and heavy machinery, but have been unable to handle them in the narrow and congested thoroughfares of the great cities, where backing and twisting and turning is absolutely necessary. Besides the great service and imperative use of these mighty animals in the large towns and cities of the country where their demand and value is increasing day by day, they are a power that cannot possibly be done without in the agriculture districts where the farm produce requires great hauling power; and in those sections of the country which have as yet not yielded to the plow, they are a pre requisite that cannot be done without.

The farmer who purchases one or more of the biggest, best, and most suitable individuals of the western grade mares, and breeds them to one or other of the great imported stallions of the Clydesdale, Shire, Suffolk, Percheron or Belgian breeds, will, in three years from the time of foaling have a youngster that is worth from $300 to $400, or if more mares have been bred, pairs that are worth from $600 to $800, and which he would have no difficulty, whatever, in selling.

Being able to work his mares up to within a short time of their foaling, he is making good and certain money at both ends, for the young stock cost him comparatively little to keep, and if he has been careful in his selection and wise in his breeding, there is no telling what he might not produce in valuable heavy draught horses. Look for instance at the geldings that go to make the great six-horse teams of the country, the horses that constitute the teams of the great packers. These animals fetch great prices. The heavier, the stronger, the better boned, and more active they are, the better they are for such work, and the more money will they fetch in the market.

Borers Injure Trees.

While the trees are not always killed when infested by the borers, their vitality is lowered, so that they become liable to some other attack, and futhermore they do not produce the amount of fruit which might otherwise be expected.

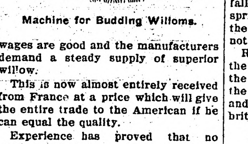
MUCH PROFIT IN BASKET WILLOW

American Grown Rods are of Good Quality When Proper Care Is Taken in Their Culture.

(By WILLIAM F. HUBBARD.)

Willow growing gives an uncommonly high margin of profit. A large demand for willow is now supplied by import, and as American grown rods are of good quality when proper care is taken of their culture, there is no reason why the further development of the industry should not be possible, if more American farmers can be convinced of its practicability.

Of late years willow furniture has sprung into fashion, and today no minor industry is more prosperous than that devoted to its supply. The wages are good and the manufacturers demand a steady supply of superior willow.



Machine for Budding Willows.

This is now almost entirely received from France at a price which will give the entire trade to the American if he can equal the quality.

Experience has proved that no stock is equal to a willow when durable baskets are demanded. The high-class basket has made a place for itself in the market even under present circumstances, and the entire decline in the trade has been in the low priced basket, which competes with the foreign willow product or the American made wooden basket.

To put a low priced basket on the market with raw willow at its present price the wages must be cut lower than the normal standard in America.

For this reason the trade is almost entirely in the hands of immigrant basket makers, who know no other trade and who are seldom or never reinforced by native workmen.

The remedy lies in a reduction in the cost of the raw material. The cheaper the willow (when good in quality) the better the wages which can be paid to produce a low priced basket, and a low priced basket of good quality will find an almost unlimited market. On this point the entire trade agrees.

Great care should be taken in the selection of the willow bed. Rich, permanently moist sandy loam gives best returns, though ordinary moist, sandy land often yields profitable crops of willow.

Poor soils produce paying crops where there is a market for short rods. Avoid land on which water is stagnant during the summer. If by drainage the water level on land can be lowered at least six feet below the surface, the situation may be considered appropriate.

Do not plant willows in localities where early frosts occur. The tender shoots are easily injured by the cold.

Plow 10 or 12 inches deep in the fall, prior to planting the following spring. This turns the top layer of the soil so deep that weed seeds cannot spring up.

Returns depend very largely upon the method of culture, but more upon the variety of willow planted, because the shoots of even the best varieties and in the most suitable soil grow brittle after the stools become old.

Rabbit Now of Value.

Rabbits which have been a great pest in Australia have now become of commercial value. During the past five years, 45,400,000 frozen rabbits were exported, mainly to England with 98,000,000 rabbit skins. The United States last year bought skins to the value of $48,000.

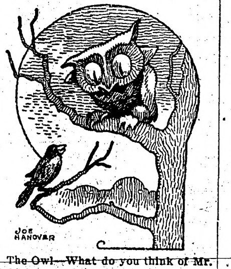
ARE YOUR KIDNEYS WEAK?

There are two ways to tell if you have weak kidneys. The first is through pains in the back. The second by examining the kidney secretions. If you suspect your kidneys, begin using Doan's Kidney Pills at once.

E. R. Wilson, Emmettsburg, Iowa, says: "I was completely laid up with kidney complaint and inflammatory rheumatism. My limbs and feet were terribly swollen and so inflamed I could not walk for days. After doctors had failed to help me, I began using Doan's Kidney Pills. Three boxes cured me so completely that I have not had the slightest trouble since."

"When Your Back Is Lame, Remember the Name—DOAN'S." 50c a box at all stores. Foster-Milburn Co., Buffalo, N. Y.

CURSORY, AS IT WERE.



The Owl—What do you think of Mr. Robin's new home?

The Sparrow—It looks very nice, but I've only taken a bird's-eye view of it.

PIMPLES ON FACE 3 YEARS

"I was troubled with acne for three long years. My face was the only part affected, but it caused great disfigurement, also suffering and loss of sleep. At first there appeared red, hard pimples which later contained white matter. I suffered a great deal caused by the itching. I was in a state of perplexity when walking the streets or anywhere before the public.

"I used pills and other remedies but they failed completely. I thought of giving up when nothing would help, but something told me to try the Cuticura Soap and Ointment. I sent for a Cuticura Booklet which I read carefully. Then I bought some Cuticura Soap and Ointment and by following the directions I was relieved in a few days. I used Cuticura Soap for washing my face, and applied the Cuticura Ointment morning and evening. This treatment brought marvelous results so I continued with it for a few weeks and was cured completely. I can truthfully say that the Cuticura Remedies are not only all, but more than they claim to be." (Signed) G. Baumel, 1015 W. 20th Place, Chicago, Ill., May 28, 1911. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 28 K, Boston.

For Cramps.

A piece of old-fashioned candlewick worn around the leg in the garter place, next to the skin, will prevent or cure, cramp in the calf of the leg or in the foot. I have proved this by personal experience; I believe this would prove effectual in preventing swimmers' cramp; those liable to cramp while in the water would be wise to try it. Cottonbatting, wrapped round the body from the arm-pits downward, saved the life of a man suffering agony from painters' cramp; it gives almost instant relief.—National Magazine.

Fast Color Eyelets Used Exclusively.

No Man is Stronger Than His Stomach

A strong man is strong all over. No man can be strong who is suffering from weak stomach with its consequent indigestion, or from some other disease of the stomach and its associated organs, which impairs digestion and nutrition. For when the stomach is weak or diseased there is a loss of the nutrition contained in food, which is the source of all physical strength. When a man "doesn't feel just right," when he doesn't sleep well, has an uncomfortable feeling in the stomach after eating, is languid, nervous, irritable and despondent, he is losing the nutrition needed to make strength.

Such a man should use Dr. Pierce's Golden Medical Discovery. It cures diseases of the stomach and other organs of digestion and nutrition. It enriches the blood, invigorates the liver, strengthens the kidneys, nourishes the nerves, and so GIVES HEALTH AND STRENGTH TO THE WHOLE BODY.

You can't afford to accept a *secret* nostrum as a substitute for this non-alcoholic medicine OF KNOWN COMPOSITION, not even though the urgent dealer may thereby make a little bigger profit. Ingredients printed on wrapper.

CHILDREN LAY KEEL PLATE OF BIG BATTLESHIP

RIVETING ON THE HORSESHOE

AT the Brooklyn navy yard recently there took place a ceremony unique in the annals of naval construction. This was the riveting of a horseshoe onto the first keel plate of the New York, that is to be the latest, largest and most powerful of the ships of the Dreadnaught class in the navy of this country. After the emblem of good luck was thus fastened in place, the keel plate, nominally with the assistance of the children, was lowered to its assigned position on the frame of the ship and riveted there. The sturdy little chaps who participated in the ceremony were all the children of naval officers or attaches of the yard. The picture shows one of them taking his turn with the hammer and driving a rivet through its appointed hole in the horseshoe and the white keel plate beneath.

"BUYS" A BIG HOTEL

Man Pays Out $48,680 for Chicago Auditorium.

George J. Lawton, Tax Sale Bidder, Plans Test Case to Get Possession—Value of Hostelry Is Placed at $4,000,000.

Chicago.—Who owns the Auditorium hotel? George J. Lawton. Who owns the Auditorium theater? George J. Lawton. Who owns the Auditorium office building? George J. Lawton.

Who is George J. Lawton?

Mr. Lawton, briefly, is a gentleman who stays awake when other persons go to sleep. Owing to his careful cultivation for many years of this faculty, Mr. Lawton at a sheriff's sale the other day bought in the Auditorium hotel, office building and theater, valued at about $4,000,000, for $48,680. This was $2,680 more than the tidy little taxes of $46,000, which the owners of the property had forgotten to pay.

Under the usual translation of the Illinois law they can get back the property by paying Mr. Lawton a bonus of $2,500, but Mr. Lawton says quite frankly and emphatically that he is not anxious for the bonus. He would rather have the building.

"I am going to make a test case and see if I can get possession of this property," said Mr. Lawton. "I can get a deed, and as soon as I get that I'm going to try to get a title. If I can get that, I will begin legal proceedings to oust the present owners It will take two years to fight it out, but I think it's worth trying."

The figures of assessors figure the value of the property as follows:

Value of land	$2,254,295
Value of improvements	1,600,000
Total value	$3,854,295

When the owners of the property failed to pay the taxes on May 1 the penalty of one per cent. a month was added to the amount. Six weeks elapsed and County Treasurer O'Connell advertised the property for sale.

About the middle of July he obtained a judgment in the county court against owners of the property because they still neglected to pay the taxes and the penalty. The other morning the property was placed on sale at public auction. Thomas Gaham, one of Mr. O'Connell's assistants, received the bids. Mr. Lawton, who is a professional "bidder-in," made the highest offer. He handed over a check for $48,680, and came into the possession of a frontage of 186 feet on Michigan avenue, 360 on Congress street and 160 on Wabash avenue.

The original owners of the land, Mr. Lawton says, were the Studebakers of South Bend, Ind.; Ambrose Cramer of Lake Forest and the Peck estate of Chicago.

A ninety-nine year lease was secured by the company which built the hotel, theater and office building.

Failure of the owners of the building to pay the taxes, Mr. Lawton says, means that they forfeit their lease and therefore he has obtained possession of all the property by paying the taxes.

Hen Vindicates Her Owner.

Athol, Mass.—Townspeople challenge the statement of Albert Ellsworth, a prominent citizen, that Mary Hooker, his prize buff Orpington, laid two eggs every day. Ellsworth appeared at the Athol fair and placed the hen on some straw at the foot of the judges. She laid two eggs, one of them double-yolked, chirped a triumphant cackle and disdainfully strode away.

Hundreds of visitors to the fair applauded the Orpington vindication of her owner.

LIGHTER HATS, MORE BRAINS

Smaller Headgear Increases Woman's Mentality, Declares Dr. George W. Galvin of Boston.

Boston.—That the undeniable improvement in the mentality of the up-to-date woman is due to the decrease in weight of her stylish headgear is the conclusion that Dr. George W. Galvin, founder of the Emergency hospital, has reached after scientific investigation.

"Many women wonder how it is that they find themselves able to do work which a few years ago they wouldn't have dreamed of attempting," said Dr. Galvin.

"Many are doing much more than the mere routine of housework. And should they desire to know the reason of this they need but think on the decrease in the size, and consequently in the weight, of their hats and they have the answer to their question.

"I consider it a significant fact that most college girls wear no hats at all and only caps when the weather demands a covering for the head."

Many Germans Divorced.

Berlin.—Divorces in Germany are heavily on the increase. The latest official statistics for the year 1909, just published, show that the average of 120,000 divorces a year for the five years preceding rose in 1909 to 141,730. Marriages also continue to increase, however, the total for 1909 having been over 400,000, or at the rate of 80 persons to every 1,000 of the population.

Dog Swallows Hatpin.

St. Louis.—Mrs. Pauline Nesslein has a dog with prize-winning digestive organs. Her Boston terrier Fudge survived carrying a ten-inch hatpin in his interior for ten days. A veterinary then removed the offending fastener from the dog's anatomy. Fudge is 20 inches long.

"WANDERLUST" LATE IN LIFE

Man Wedded Forty-Seven Years Develops Roving Disposition and Seeks Divorce From Wife.

Kansas City, Mo.—A roving disposition which did not develop until 47 years after he was married, but which then caused David C. Rinehart to make three long, profitless journeys from home, the last with the announcement that he never would return, was the reason given the other day by Mrs. Ida Rinehart for bringing divorce proceedings in the Wyandotte county district court.

The Rineharts were married Christmas day, 1863. They own several houses in Kansas City, Kan., besides the one in which they lived, 1936 North Fifth street. Mrs. Rinehart alleges that the "wanderlust" first seized her husband in April, 1910, when he went to Canada without saying good-by or telling where he was going. Three times, she says, he returned and said he would "settle down" again, but each time he broke the resolution. Last Fourth of July, she states, he called her on the telephone to go to the Union station. There, she declared, he bade her good-by and said he was going into the far northwest and never would return. She has not heard from him since. He is a carpenter and seldom had been from home until a year ago.

Find Rat With Plague.

Seattle, Wash.—Of 75,000 rats killed by the Seattle health department in the last fifteen months, only one was infected with bubonic plague. This rat was captured recently down town.

TO TEST EARS OF CHILDREN

Pennsylvania Health Officers Will Examine All Pupils Who Seek to Enter Public Schools.

Harrisburg, Pa.—State Health Commissioner Dixon is preparing to make the medical inspection of school children authorized by the new school code. The inspections will be made in 785 school districts, which means that 250,000 children will receive the direct benefits of this important work. The inspectors will also make a thorough investigation of the sanitary conditions existing at the schools.

The medical inspector will be instructed to note the age and sex of the pupil, the condition of sight, hearing, respiration, skin, teeth, cervical glands, contagious diseases, pulmonary tuberculosis and deformities. Each eye will be tested separately, using Snellen's chart at 20 feet. The presence of blepharitis, conjunctivitis, iritis or trachoma or any affection of the cornea will be observed.

Each ear will likewise be tested separately for accuracy of hearing by whispering also at 20 feet, the distance at which the whisper is heard being used as the numerator and the distance at which it should be heard given as the denominator of the fraction. Defective teeth and nasal breathing will be noted.

If indications of present or recent contagious disease are found, note will be made of the fact and the exclusion of the child and its brothers and sisters at once ordered. Under no circumstances will the medical inspector advise as to the selection of a physician or communicate with the family of a pupil personally with regard to the results of the examination, all reports to the family being made directly from the department.

Upon receiving the reports at the central bureau in Harrisburg the chief medical inspector and his assistants will go over them very carefully and letters will be written to the parents of children in whom physical defects have been found, calling attention to these defects and suggesting that the child be taken to the family physician for a more detailed examination and treatment.

New Eyelids by Grafting.

Kansas City, Mo.—The eyelids of Rev. Joseph Hohe, pastor of a Catholic church near Bucyrus, Kas., which were burned off when a lamp exploded in his hands, have been replaced by new ones constructed of pieces of skin cut from the priest's arms and grafted on the stumps of the lids. Over the new lids he has almost complete muscular control. The operation was performed in a local hospital.

Geese Find Gold.

Santa Barbara, Cal.—Thirty gold nuggets, some as large as peas, were taken from the craws of six geese raised by Mrs. Israel Altschul. When neighbors heard of the find a small gold rush was started. They began working pans in the vicinity. In washing out the sand near the house they found several small nuggets. The gold probably was washed down from the mountains years ago.

QUEER CHINESE BUG

Tenodera Sinensis Has Appeared in This Country.

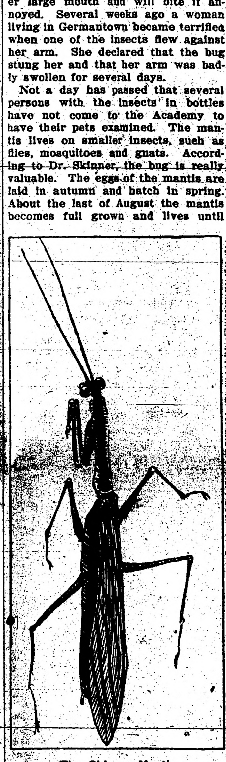
Curiosity From the Orient Said to Have Been Imported by Greenhouse Owners to Destroy Insects.

Philadelphia, Pa.—The Tenodera Sinensis or Chinese Mantis is in our midst nowadays and the insect experts at the Academy of Natural Sciences on Logan Square have been kept busy recently answering questions as to what the queer-looking insects are and where they come from.

Philadelphia is about the only American city that is the home of the Chinese Mantis. About 10 years ago a number of the insects were brought to this city from China on some plants that had been imported by the Meehan Nurseries, in Germantown. Gradually the mantis spread through Germantown, and are now rather abundant north of Market street. That they will in time spread throughout the city and suburbs, and, perhaps, in time throughout the country, seems probable.

The mantis, according to Dr. Henry Skinner, of the Academy of Natural Sciences, has no sting, but has a rather large mouth and will bite if annoyed. Several weeks ago a woman living in Germantown became terrified when one of the insects flew against her arm. She declared that the bug stung her and that her arm was badly swollen for several days.

Not a day has passed that several persons with the insects in bottles have not come to the Academy to have their pets examined. The mantis lives on smaller insects, such as flies, mosquitoes and gnats. According to Dr. Skinner, the bug is really valuable. The eggs of the mantis are laid in autumn and hatch in spring. About the last of August the mantis becomes full grown and lives until



The Chinese Mantis.

cold weather. In size the bugs range from two to six inches long. They are very peculiar in appearance and are sometimes called Praying Mantis, Soothsayers and the Prophet Bugs.

It is said the Chinese tell their fortunes from the actions of the insects. The name Praying Mantis comes from the fact that the insects hold their two front legs, which are very short, in a praying position, and often work them rapidly back and forth. The most peculiar parts of the bug are its eyes and long neck. The eyes are like miniature shoe buttons on the outside of the insect's head, and in proportion to its size are very large. The neck shoots out from the body and forms about one-third the length of the bug, ranging from one to two inches. The mantis can fly, has green wings, a brown glossy back and long feelers protruding from its head. All together it is not a friendly looking beast. Recently, it is said, the owners of greenhouses in this country have imported the insects to use in destroying insects in their greenhouses.

AGED LOVERS PART AT ALTAR

Kansas Couple Quarrel Over Property Within an Hour of Time for Wedding.

Lawrence, Kan.—Instead of wedding bells for James W. Faxon, sixty-nine, and Mrs. L. J. Speary, sixty-five years old, there is to be a suit for breach of promise. An hour before they were to be married the preacher was notified he was not wanted.

The couple fell out over a pre-nuptial contract. Each is well-to-do and their comfortable homes are on opposite sides of the street. Mrs. Speary went east when the wedding was declared off and her attorney has just filed suit for her and has asked an injunction restraining Faxon from disposing of his property. Mrs. Speary estimates the damages to her heart at $10,000.

THE KITCHEN CABINET

THE thing that the world is asking:
How far must he bend to break?
How much he can give don't matter,
But only how much can be take?

COOKERY A FINE ART.

Cookery should be a fine art, but, alas, in many kitchens it is thought of as drudgery, and put out of the way as soon as possible. The development and progress of cookery has gone hand in hand with civilization. The more enlightened and intelligent a people, the more attention they pay to cookery. It is an art as old as history and its evolution is as interesting a study as the evolution theory is to the scientist.

Did you ever think that more people are spending all or part of their time cooking than in any other occupation?

The importance of food selection and preparation is the most important single factor on which rests the health, happiness and prosperity of mankind.

Cookery like all other arts, has its laws of proportion, or right values, its laws of harmony and contrast.

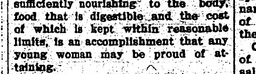
Cookery appeals to the sense of taste as music appeals to the hearing and as "Suns and skies and clouds of June" appeal to the sight.

An educated sense of taste is as highly gratifying as the indulgence of any of the senses and as necessary for good digestion and physical as well as mental well being.

The simple and fundamental study of cookery should be the aim of every young woman. She should know when she has given her family a well-balanced meal, how to feed the sick, the aged as well as the infants. She should know that climate, age, sex and health should enter into the arrangements for the menus.

To serve a meal that is attractive to the eye, satisfying to the taste and sufficiently nourishing to the body, food that is digestible and the cost of which is kept within reasonable limits, is an accomplishment that any young woman may be proud of attaining.

Such accomplishment comes only by hard work, study and application, but it is worth the price many times over.



AN IDLE soul dreamed half the day
Upon his Alpine heights away;
All the broad views of earth, too him,
Were menials of a loitering whim.

A little window comfort brought
To one by toil and trial taught;
And in the sunlight shining through
He saw the good that he could do.
—F. W. Hutt.

OCTOBER BREAKFASTS.

The spicy mornings of the autumn makes one feel like eating a hearty breakfast. We will have the luscious grape for some time yet and pears and apples are in their prime.

In many homes cereals, that is, the cooked ones, are never served at all, because of the difficulty of getting them cooked properly. The inscription on the box generally reads, "Cook twenty minutes." This should be multiplied by eight to have a digestible and well-cooked food.

For those who possess a fireless cooker, the problem is solved, for the cereal may boil twenty minutes, then put it into the cooker and leave over night. Reheat, and it is ready for the most delicate stomach.

For those who have no cooker, either home-made or manufactured, it is the custom to set the cereal cooking in a double boiler and allow it to cook all during the dinner hour. Then cover closely and set away to be reheated in the morning. Well-cooked cereal with good rich milk makes a sufficient meal for the growing child and will have sufficient staying power to keep the little ones from getting hungry before noon.

A bit of bacon is always appetizing for a cool morning breakfast, and with an egg and a piece of well-toasted bread or a muffin or two, grown-ups will be able to worry along until dinner time at noon.

Cocoa is a good drink for children occasionally, but too much is bad for the digestion. A glass of warm milk is easier digested than cold and on a cool morning it is very satisfactory.

An occasional morning of griddle cakes is appreciated and waffles once in a while go well these cool days, but it is yet a little early to eat much of such food.

Neighborly Inference.

Stranger (to Mrs. Rooney)—What beautiful children you have, ma'am.

Mrs. Hogan (from the floor above)—Phat's thot slob sellin', Mrs. Rooney?—Puck.

Marksmanship.

"That was a wild pitch," said one fan.

"Mebbe it was," replied the other, "but it was a good shot. It hit the umpire."

A MORNING glory at my window satisfies me more than all the metaphysics of books.
—Walt Whitman.

Wisdom is ofttimes nearer when we stoop than when we soar.
—Wordsworth.

SMALL CAKES.

These little cakes are always seasonable to serve with a cup of tea or cocoa or an ice. The housewife who has a supply of these cakes is prepared to serve a light repast on short notice.

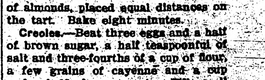
Lady Fingers.—Beat the yolks of six eggs until thick, add three-fourths of a cup of powdered sugar and continue beating. Add the grated rind of a lemon and the whites of the eggs stiffly beaten. Cut and fold in a cup of flour sifted with a half teaspoon of salt. Drop on a buttered sheet, using a tablespoon and spreading two lightly together to form a finger.

Cream puffs or eclairs are not difficult to make and the fillings may be varied, giving a variety of cakes.

Cream Puffs.—Melt a half cup of butter in a cup of boiling water. Let it boil, then add a cup of flour, all at once. Stir and cook until it leaves the sides of the pan. Take from the fire, cool and add three eggs, one at a time, beating hard after adding each egg. Drop by spoonfuls on a buttered sheet and bake thirty to forty minutes. Test them by lifting from the pan. If they seem light they are done. When cool split at the side and remove the soft doughy mixture before filling. Sweetened whipped cream is used for filling or a chocolate sauce and the top is then brushed with chocolate.

Sand Tarts.—Cream a half cup of sugar and egg, two cups of flour, two teaspoonfuls of baking powder, a fourth of a teaspoonful of salt. Roll and cut with a doughnut cutter, sprinkle with sugar mixed with cinnamon and decorate with three halves of almonds, placed equal distances on the tart. Bake eight minutes.

Creoles.—Beat three eggs and a half of brown sugar, a half teaspoonful of salt and three-fourths of a cup of flour, a few grains of cayenne and a cup and a half of pecan nuts. Fill small fluted patty pans half full and decorate with a pecan. Bake twelve to fifteen minutes.



A MODERATE excess of food is probably harmless, if not actually beneficial. It is not safe to sail too near the wind in matters of diet.
—Hutchinson.

FOR THE FRUIT CELLAR.

Corn Relish.—Before the sweet corn is gone do not fail to prepare corn relish. Cut the corn from two dozen ears, chop fine one head of cabbage, four large onions, four green peppers and add a quart of vinegar. Boil all together. Mix three cups of sugar, three-fourths of a cup of flour, half a cup of salt, a fourth of a cup of mustard and a teaspoon of tumeric. When well mixed add to the vinegar and vegetables and boil half an hour; add two teaspoonfuls of celery seed and put away for winter use in sealed glass jars.

Quinces come late in the season. Grate and cook with equal parts of sugar for a delicious concoction called quince honey. It may be served any time as a garnish for plain ice cream or for dainty pudding garnish.

Pears are so much more delicious canned in the following manner than in the way so many put them up for winter: Pare and prepare them in quarters or eighths. Put them with half their weight in sugar in a stone crock and let stand over night. In the morning cook slowly on the back of the stove until perfectly done, then can as usual. Lemon may be added if desired, but the fruit is much better flavored than when canned quickly.

The thrifty housewife has been packing her eggs for winter use while they are cheap. Either water glass or lime water makes a good preparation to keep them.

Make a list of all fruit vegetables, preserves and relishes that are in the store room and cellar. Then a glance will tell you what to choose without losing the time to look over several dozen jars.

Have everything labeled, for no memory is good for several months, and it saves many disappointments in opening the wrong jar.

If one can make their sausage at home, keep it in corn husks and smoke it. You will find a delicious flavor never before experienced. Some do not care for the smoking, but dip it after being wrapped in the husks and well tied, into hot fat, which will seal it, and it may then be packed in layers in a box. Keep cool, and it will keep for several years.

Nellie Maxwell.

Truth or Repose.

God offers to every man his choice between truth and repose.—Ralph Waldo Emerson.

MINNESOTA
HISTORICAL
SOCIETY.

THE NORTHERN LIGHT

VOL. I. HOLT, MARSHALL COUNTY, MINNESOTA, FRIDAY, OCTOBER 27 1911 NO. 13.

PASTOR ACCUSED

CLARENCE RICHESON OF CAMBRIDGE, MASS., CHARGED WITH DEATH OF AVIS LINNELL.

CYANIDE OF POTASSIUM

Music Student Dies as Result of Poison—Clergyman Taken From Home of Fashionable Heiress He is About to Wed.

Boston, Mass. — Arrested in the home of Miss Violet Edmands, the heiress he was to have wed in less than a fortnight, Rev. Clarence Vigil Thompson Richeson, pastor of the fashionable Immanuel Baptist church of Cambridge, was formally charged with the murder of Avis Linnell, who believed she was to have been the minister's bride. Miss Linnell, instead, was buried and the wedding gown, which a score of her friends had helped her fashion in anticipation of her wedding, became her funeral shroud. Richeson was arraigned at a preliminary hearing and pleaded not guilty. The case was continued to Oct. 31, the day on which he was to have married Miss Edmunds.

Trusting implicitly in the love she bore the clergyman, Miss Linnell, in her rooms in the local Y. W. C. A., swallowed what she had been told was a harmless headache potion. In five minutes she died, killed by cyanide of potassium, the dealiest drug known.

The warrant for the formal arrest of the preacher was issued by Judge Duff of the criminal court, after William Hahan, a druggist of Newton, Mass., had positively identified Richeson as the man to whom he sold a quantity of cyanide of potassium last week.

Two Possible Motives for Crime.

The police ascribe two possible motives for the crime, either one of which would make the case one almost unparalleled in American criminal annals. The one is that, fearing that Miss Linnell might interfere with his approaching marriage to Miss Edmunds, the heiress, Richeson set about to kill the girl; the other is that he purchased the drug for Miss Linnell in order that she might end her own life when she learned the man she loved was to become the husband of another.

Gossip connected Rev. M. Richeson's name with what was at first believed to have been the suicide of the girl. He answered nothing, but sought refuge in the palatial Brookline home of Moses Grant Edmands, whose daughter, worth $250,000, and the heiress to her father's great fortune, was to have become Richeson's bride in two weeks. The wedding was to have been solemnized on Oct. 31, in the First Baptist church at Newton Center. More than seven hundred invitations to friends of the popular clergyman and his rich bride-to-be had been mailed. They have been recalled.

Pretty little Miss Linnell, a student at the Boston Conservatory of Music, believed she was to marry Rev. Mr. Richeson. One the day of her death she had read in the Boston papers the announcement of Rev. Mr. Richeson's engagement to Miss Violet Edmands, daughter of Moses Grant Edmands, a resident of fashionable Brookline, a Boston suburb. A few hours later she was found dead, a victim of cyanide poisoning, in the bathroom of the Y. W. C. A. At first the police believed she had killed herself; later developments, they maintain, indicate that she took the drug in the belief that it was a medicine.

Police Judge Murray has issued a warrant charging Richeson with first degree murder.

COLLEGE PRESIDENTS ELECT.

William Lowe Bryan, Indiana University, Head of Association.

Minneapolis, Minn. — The sixteenth annual meeting of the National Association of State Universities, which has been in session at the Hotel Radisson, ended with the election of officers as follows: President, William Lowe Bryan, Indiana university; vice president, Thomas Kane, Washington university; secretary-treasurer, Guy Potter Benton, Vermont university; executive committee, the officers, and Dr. George E. McLean, Idaho university, and President Venable, Ohio university. The standing committees will be appointed by the president.

The following papers were read: "Federal Aid to Education," President Edmund J. James, University of Illinois; "Entrance Requirements for State Universities," President Robert J. Alley, University of Maine; "Economy in University Administration," President William L. Bryan, Indiana university. A discussion was led by Raymond M. Hughes, acting president of Miami university.

Cotton Price Jumps.

New Orleans, Louis. — Bad weather put cotton futures $1 a bale up.

REBELS SINK 3 GUNBOATS

OVER 10,000 TROOPS HAVE JOINED THE REVOLUTIONISTS.

Men Sent From Manila to Reinforce Guard at the American Legation.

San Francisco, Cal. — News of the first engagement between the Chinese revolutionists and the imperial forces was received here, a cablegram to the Chinese Free Press, giving an account of the disabling of three government gunboats by the revolutionists near Hankow.

The boats destroyed were the Chor Kung, the Chor Keung and the Chor Choy. Two other boats of the flotilla, one of which carried Sui Ching, viceroy of the Hu Teh province, escaped.

It is reported at the local headquarters of the revolutionary government that the 1,800 men under Gen. Ching Piao revolted and joined the revolutionists. From Hang Weng it was reported that troops numbering 10,000 came over to join Li Yuen Hung, commander of the revolutionary army.

A proclamation announcing that the new republic of Chung Hwai would assume all debts contracted by the Manchu dynasty, that all treaties would remain effective and that foreign concessions would be respected and all foreigners protected during the period of hostilities, was made public here. The proclamation was signed by Liheun Cheng, commander of the citizens' army of central China.

Pekin.—The American consul at Hankow, Roger S. Greene, has sent a message to Pekin requesting he be kept informed as to the progress of the army southward, and the approach of the troops which are being mobilized at Chumation in Hunan province.

The reinforcement of the American legation guard by a hundred men who are proceeding from Manila, is indicative of the seriousness of the situation. It is believed, however, that the legation quarter will not be subjected to more than inconveniences. An indication is given in the dispatch from Pao Ting Fu of twenty-four army trains in the last three days. Twelve trains will be dispatched from Pekin, and the Sixth division, now quartered at Pao Ting Fu, will depart as soon as conditions are quiet. The railway between Pekin and Tientsin is closed to all but troop trains.

MANY WIN 33D DEGREE.

Washington, D. C. — Many northwestern members of the Scottish Rite branch of Masonry have been honored by the supreme council of the southern jurisdiction, now in session here, by election to the thirty-third degree. The list, as announced, includes the following:

Minnesota—C. A. Erdmann, F. R. Salisbury, Minneapolis; W. J. Patton, Duluth; Henry M. Tusler, St. Paul; James Riddler, G. P. Tawney, Winona.

North Dakota—D. Hall, C. R. Stone, Fargo; C. A. Pale, Grand Forks.

South Dakota—S. A. Brown, Sioux Falls; J. L. Browne, Aberdeen; R. H. McCaughey, Mellette; L. C. Mead, Yankton; S. W. Russell, Deadwood.

Iowa—G. W. Allen, W. W. Cook, Clinton; A. L. Bartholomew, Preston; F. A. Brown, F. W. Craig, W. F. Harsh, Des Moines; C. C. Clark, Burlington; Martin Evans, C. Huston, Cedar Rapids; A. L. Fribourg, F. T. Houx, R. H. Munger, Sioux City.

Montana—W. E. Bennett, Livingston; A. Gray, Butte.

Washington, D. C.—The cornerstone of what Sovereign Grand Commander Richardson of the Scottish Rite Masons of the southern jurisdiction declared would be the "most magnificent building in the world devoted alone to the use of Masonry," was put in place with elaborate ceremony. It is to be the national home of the supreme council of the southern jurisdiction Scottish Rite Masons and the first stone was laid with the trowel and square used by George Washington in beginning the United States capitol. Prominent members of the order from all parts of the United States attended the ceremonies.

The building, which is to cost more than $1,000,000, will be completed in about a year and a half.

DRY FARMING CONGRESS ENDED.

Farm Women Elect Minneapolitan on Executive Committee.

Colorado Springs, Colorado. — The sixth annual convention of the International Dry Farming congress and the first of the international congress of farm women came to a close. Fourteen hundred delegates registered for both congresses during the week. The congress of farm women elected Mrs. Leslie Stavert, Winnipeg, Canada, president; Miss Irma Matthews, Oklahoma City, first vice president; Mrs. Clark W. Kelley, Devils Lake, N. D., second vice president; Mrs. John D. Widtsee, Logan, Utah, third vice president; Mrs. John T. Burns, Colorado Springs, secretary-treasurer.

The executive committee includes: Miss Jennie Buell, Ann Arbor, Mich.; Mrs. Stevens, Nebraska; Miss Bull, Minneapolis; Mrs. J. F. Sheppard, Fargo, N. D., and Miss Cora Mines, Winnipeg, Canada.

AVIATOR KILLED

EUGENE ELY SOON SUCCUMBS FOLLOWING 50-FOOT FALL AT MACON, GEORGIA.

DARING DIP WAS FATAL

Seemed to Lose Grip on the Lever.—Accident Witnessed by 8,000 Persons.—Home Was in Davenport.

Macon, Ga. — Eugene Ely, aviator, whose parents live at Davenport, Iowa, was killed at the state fair grounds when his machine failed to rise from a sensational dip and plunged with him fifty feet to the ground. He fell in the presence of nearly 8,000 persons to the middle of the inclosure of the race track, after almost clearing the machine by a desperate leap when he realized his peril. His body was broken in a score of places and he died a few minutes later. As he was completing the circuit he made a dip, seemingly to startle the thousands beneath him.

The machine shot down with tremendous velocity and the crowd applauded, thinking the aviator would rise, as he had done many times before. But Ely seemed to lose his grip on the lever, for the machine continued its downward plunge to the earth and he attempted to rise from his seat. In fact he released the lever altogether and half jumped, barely clearing the aeroplane as it crashed to the ground. The machine was demolished and Ely struck with terrific force.

Ely left his wife in New York two weeks ago to come to Macon to give a series of flights for the Georgia state fair in his Curtis biplane. He had been giving spectacular flights here for eight days, going up on one occasion in a rainstorm.

Before making his ascent Ely told his attendants that he feared something would happen and asked them to notify his wife immediately if it did. Ely's body was shipped to his former home at Davenport, for interment.

Ely was the first man to alight on the deck of a warship with an aeroplane. During an aviation meet in San Mateo county, Cal., Ely flew from the aviation camp to San Francisco, about twenty miles, and alighted on the deck of the cruiser Pennsylvania, anchored in San Francisco bay.

After holding a reception on board the warship, Ely flew from the ship back to the aviation camp.

Previous to this time, Ely had made a flight from the deck of a warship anchored in Chesapeake bay. Although he struck the water as he left the ship he managed to reach shore.

Ely was the only son of a prominent Iowa attorney. He first attracted attention as an aviator about two years ago in Portland, Ore.

DEITZ TRIAL IN NOVEMBER.

Wife and Children of the "Defender" Will Be Prosecuted.

Hayward, Wisconsin. — S. J. Williams, district attorney of Sawyer county, who tried the case against John Deitz here last spring, has returned from a conference with the attorneys for Mrs. John Deitz and Leslie, Clarence and Elmyra, regarding the criminal cases pending against them. Williams says that inasmuch as the Deitz family is using every opportunity and means to give the officers and people of Sawyer county a bad name, and are saying the officials of this county dare not prosecute them he thinks it only just that they be held for trial.

At the last meeting of the county board it was left with the district attorney to do as he thought best. V. W. James, of Eau Claire, who assisted in the first Deitz cases, will assist in the prosecution of the rest of the family. The cases will come up for trial at the November term.

CANADA SHOWS 1,710,554 GAIN.

New Census Gives Parliament an Increase of Eleven Members.

Ottawa, Ont.—The population of Canada, according to the census taken on June 1, was 7,081,868, an increase in ten years of 1,710,554. The figures are about a million below the estimate made before the census was taken.

Montreal leads Canadian cities with a population of 466,197, an increase in ten years of 198,467. Toronto is second with 376,240. Winnipeg has 133,430; Vancouver, 100,333; Ottawa, 86,340; Hamilton, 81,879; London, 46,177, and Halifax, 46,081.

Representation in the next parliament will be based on the census. The readjustment of constituencies will give an incrase of eleven, or a total of 232 members.

TRAINS COLLIDE; 7 DEAD

MISSOURI PACIFIC PASSENGER TRAIN HITS FREIGHT.

Misunderstood Train Orders Caused An Accident in Which 28 Were Injured.

Omaha, Nebraska.—Seven persons were killed and twenty-eight injured, four of them seriously, in a collision between Missouri Pacific Passenger Train No. 105, northbound, en route for this city, and a fast freight train at Fort Crook, ten miles south of this city. The accident resulted from a misunderstanding of orders on the part of the freight crew.

A passenger train, due to leave this city for the south about the time of the accident, was converted into a relief train and sent to the scene of the accident.

Governor Gilchrist, of Florida, who was a passenger on the northbound train, was uninjured.

Passenger Train No. 105 out of Kansas City in charge of Conductor F. R. Travers was running late. Conductor L. P. Gross of the freight passed South Omaha at 8:30. He had "signed off," but evidently did not check the train register as to the whereabouts of No. 105.

At the point of collision the track makes a sharp curve, shutting off the view of the Fort Crook station, where Engineer E. C. Crawford of the freight first caught sight of No. 105, which was coming at high speed. Engineer Crawford had no orders in regard to No. 105, but he whistled and slackened speed. When the passenger did answer he concluded that it was a train on the adjoining Burlington tracks which are within a short distance of each other. Both crews realized the danger and reversed their engines. The momentum of the passenger, however, was so great that it was piled high upon the freight engine, which almost had stopped. The crews of both engines jumped and were not injured seriously.

The impact derailed both engines and telescoped the mail cars upon the passenger coach, in which about forty people were riding.

Shrieks and groans mingled with the sound of escaping steam and the crackling of the cars brought the passengers in the Pullman rushing to the front of the train, to find the coach a mass of wreckage at the forward end and the dead and dying lying in every position from the top of the car down.

The dead and injured were all residents of Nebraska and Kansas.

EARLY CANAL OPENING LIKELY.

Report Recommends Congressional Legislation Governing Tolls.

Washington, D. C. — Foreshadowing the early completion and opening of the Panama canal, the Isthmian canal commission, in its annual report, recommended congressional legislation governing canal tolls, organization for the operation of the canal and for government of the canal zone, utilization of canal revenue to pay operating expenses and to repay the capital invested, and other action.

The commission wished to give at least eighteen months' notice of the rates, to permit the world's maritime interests to readjust their routes and to build new ships and organize new transportation companies. It was also deemed desirable to put the canal to use as early as possible, not only to secure financial returns on the enormous capital invested but to make possible the passage of the world's fleets without confusion or delay.

The report showed that the engineers' board has already found that all the concrete in the great Gatun locks will be laid by June 1, 1912, and five months later the locks on the Pacific side will be finished except the gates, which will be ready June 1, 1913. Meantime, by April 1 next, the giant spillway at Gatun would be at the fifty-foot elevation and the entire dam there would be completed by the following winter. The excavation through the Culebra cut, the greatest earth-digging enterprise the world has ever seen, will be completed July 1, 1913, if the slides are not in excess on the estimates.

THREE-CENT FARE WINS.

Detroit Completes Negotiations With Trolley Company.

Detroit, Mich. — The city of Detroit won a twenty-year fight for 3-cent streetcar fares. An agreement was signed by the officers of the Detroit Street railway and Mayor Thompson and Corporation Counsel P. J. M. Hally, on behalf of the city, providing for eight tickets for a quarter between the hours of 5 a. m. and 8 p. m. and six tickets for a quarter at other hours, universal transfers to prevail at all hours.

By the agreemnt the company will build at least ten miles of extensions each year and will pave between the tracks. The city reserves the right to purchase within six months.

TO VOTE 3 TIMES

PLENTY OF POLITICS IN NORTH DAKOTA IN THE NEXT YEAR.

THREE ELECTIONS IN A YEAR

And There Are Plenty of Candidates In the Field For All the Officers. —National Convention Delegates First.

Bismarck.—North Dakotans, always ready to engage in a political battle, will probably get their fill the coming year with three statewide elections confronting them. The first is known as the March primary for the election of national committeemen for the parties and also for the selection of delegates to the national convention. The delegates will go to the conventions with instructions as to presidential candidates and will have their expenses up to $200 paid by the state upon the presentation of the properly certified vouchers.

For national committeemen there are plenty of candidates on the democratic side. Frank Willson, formerly oil inspector, is an active candidate, as is also Colonel Hildreth of Fargo, but the man who appears to have the lead at the present time is Colonel Benjamin G. Whitehead of Williston.

Among the republicans there has been little talk of anyone aside from Senator Frank Talcott of Buffalo for the place of national committeeman. He was for some time considered as a candidate for governor, but it is understood he has given up any ambition of that sort.

Candidates Discussed.

With the withdrawal of Lieutenant Governor U. L. Burdick from the gubernatorial nomination contest as an insurgent republican, more possibilities are opened for speculation. It was supposed the race had narrowed down to a fight between Burdick for the insurgents and Hanna for the stalwarts. Burdick was undoubtedly one of the strongest men the insurgents could offer as a candidate, and with him out of the race it looks like a sure thing for the congressman from Fargo.

The insurgents will offer a candidate, but just whom is not clear. Attorney General Miller had ambition in that direction, but was supposed to have retired when it was announced Burdick would be a candidate. He may again enter the race, or Buchanan, a candidate for the nomination two years ago, may run again.

The democrats are in a sea of uncertainty as to their candidate. Senator Wesley McDonald, a banker, is looked upon with favor by many, but probably will be thought too young for the position. McDowell will be heard from in a few years, however. Warden Hellstrom of the state penitentiary is also a possibility.

Norton Criticized.

P. D. Norton, secretary of state, has not turned over to the counties the money received from the sale of automobile tags and is being taken to task for the omission by some of the papers. The new law requires that all motor vehicles in the state shall pay a license of $3 a year and that on the first of each month the money shall be prorated among the counties for use as a special road fund. There have been approximately 7,000 tags issued and none of the money has been turned over to the counties.

The secretary explains by stating that he has not had sufficient help in the office to keep up with the application for tags and that on Nov. 1 an accounting will be made. He also states that all of the money collected has been deposited in a Bismarck bank.

Those who want the secretary to act say the law is plain in the matter of getting extra help, in that it provides that enough of the money collected shall be retained by the office to secure and pay necessary help. They say there is no good reason why this money should not have been paid to the counties and they promise that a further explanation will be demanded.

HELGESEN DEFINES POSITION.

Will Stand for Present Office, Not for Governor or Senator.

Valley City.—H. N. Tucker, chairman of the executive committee of the State Progressive Republican league, has been assured by Congressman Helgesen that he will be a candidate for congressman from the first district and will not consider any other office. He denies that he may become a candidate for either governor or senator.

Mr. Tucker is also in receipt of a letter from Lieutenant Governor Burdick in which the latter states frankly that he will be a candidate for either governor or lieutenant governor or will drop from the lists entirely, just as the progressives of the state may desire

"ON TO STANTON."

Mercer County People Rejoice at Railroad Prospects.

Mandan.—"On to Stanton" is the order that has been given by the Northern Pacific railroad to construction crews engaged in the north extension of the railroad. As a result the demands and prayers of the Stanton and Mercer county residents will be realized.

With the first concession coming in the form of construction work as far as Sanger, and with a second concession in the continuance of the line to Hensler, the railroad company finally determined to complete the entire line this fall with Stanton as the terminal.

Stanton was the original objective point of the railroad and had it not been for the activity of the Stanton Commercial club, and of the farmers throughout the district affected, it is more than probable that there would have been no construction work this fall.

Bridge construction crews have reached this city and have fourteen large bridges to erect between Mandan and Stanton before the line is entirely complete.

Already a portion of the line is in use and a large amount of merchandise has been shipped over it, and with rapid work being done from now on it is more than probable that the entire line to Stanton will be in operation by November 15 or 20, although the permanent bridges and trestles will not have been contructed by that time.

PUBLIC SCHOOL GARDENS.

Fessenden Civic League and Soo Road Working Together.

Fessenden.—The fall rains and the fact that a killing frost came very late are to a great extent responsible for the long life of the Fessenden public school garden which until this week was radiant with bloom and verdure. This garden has been pronounced by railway officials and visitors from all parts of the country to be the best of its kind in the state. The Fessenden Civic league took hold of the matter last spring and secured the permission of the Soo Line to put in a garden on a plot of ground 200 by 60 feet, adjoining the right of way east of the station, and the work was carried out with such success as to make the result a matter of surprise, even to the most enthusiastic promoters of the enterprise.

The league is so well satisfied with the showing made that it has decided to work on a much bigger scale next year, and with this end in view two additional pieces of land adjoining the Soo Line right of way, comprising some 35,000 square feet, have been secured.

Plans have been prepared, the plowing and grading of the lots have been completed and the landscape gardener has commenced work, so that everything may be ready for spring, and next season will see established at the gateway to the city a public garden that bids fair to be without a peer in the northwest.

TROLLEY LINE TO DILWORTH.

Company Must Build by Jan. 1 or Forfeit Franchise Extension.

Fargo.—The first move toward the building of an interurban electric line out of this city was made when the city council extended the franchise of the Fargo & Moorhead Street Railway company for a period of twenty-five years. The extension of the franchise becomes null and void after Jan. 1, provided the new line is not built to Dilworth, a distance of four miles, by that date. Similar action will undoubtedly be taken by the city council of Moorhead at its next meeting.

The building of the line has become imperative from the fact that the present means of conveyance to Dilworth, the railway shop train, will be done away with on Jan. 1. Should the street railway not extend, it is estimated that 1,000 persons who now reside in Fargo or Moorhead will be compelled to live in Dilworth.

Former Congressman Comstock predicts that the building of the line to Dilworth will be the beginning of a network of lines that within the life of the present generation will link all Red River valley points.

221 JOIN FARGO'S CLUB.

Booster Campaign For New Members a Great Success.

Fargo.—Two hundred and twenty-one new members were added to the Fargo Commercial club in four days, making a total of 408 members. Fargo now has by far the largest Commercial club in North Dakota.

The addition of so many new members was secured through the publicity and booster campaign organized by the members of the club, and is an outcome of the recent booster banquet. At this banquet the selection of Charles P. Stine, for twelve years secretary of the St. Paul Commercial club, as the new head of the local organization, was made.

Infanticide

by Edwin Morris

COPYRIGHT BY PEARSON PUB. CO.

EVERY ten seconds, somewhere in the world, a baby dies. A blinking red light made this statement to those who attended the convention of the American Association for the Study and Prevention of Infant Mortality at Baltimore, last November. In one corner of the room was an electric light, encased in a red bulb. Six times a minute—7,640 times a day—the light went out; and, every time the light faded from the bulb, somewhere in the world, the light faded from a mother's eyes. So fast do our children die.

Sometimes they die faster. They died faster last summer. If babies kept diaries, last summer would go down in the annals of the survivors as the "black summer of 1910." In the single city of New York, 873 died in a single week. Every little poor street had its little white hearse. Worse still, durin gthe course of the summer, 8,000 children died that ought to have lived; that is to say, they died from preventable causes.

Children die from two kinds of causes; those that are preventable and those that are not. This is news. Your grandmother and, possibly, your mother believed that every child that died could not have been saved. Everybody thought so. Preventable causes of deaths were not recognized. It was taken as a matter of course that women should bear twice as many children as were required to maintain the population, because half of them were bound to die.

We still let half of the children die, but we know better. We know they need not die. We know they were born to live. We know that they do not have a chance to live. We have even exploded the old supposition that the children of the physically weak must of necessity be physically weak. We now know that the children of the physically weak are born almost as strong as the child of the strongest.

Every intelligent physician knows this statement to be true. However, let some eminent physician stand for it. Caleb W. Saleeby, one of the most eminent physicians in England, is such an an authority. Read what he says on the subject in "Parenthood and Race Culture":

"Most of the babies born in the slums are splendid little specimens of humanity—so far as physique is concerned—bearing no marks of degeneration to correspond with the deterioration of their parents. In a word, hereditory works . . . so that each generation gets a fresh start."

In another part of the same book, Dr. Saleeby estimated that the number of children who are born so weak that they have little chance for life does not exceed ten per cent.; and he attributed the weakness of these to the effects of alcohol and certain impolite diseases upon one or both of their parents.

Having now some fundamental facts that meet with general acceptance among the enlightened, we may proceed to seek an answer to the question, "Why are children permitted to die from preventable causes and what are those preventable causes?"

We need not go far. Millions of children that are born strong enough to live under favorable circumstances are killed by their mothers. The rest that die from preventable causes are killed by the community—by you and by me, if we help to keep things as they are, and by everybody else who helps to keep things as they are.

We will first consider the mothers who kill their children. Every mother kills or tends to kill her children who does not take the trouble to inform herself concerning the proper methods of child-rearing. It is not that such mothers are lazy. It is not that they are indifferent to their children's welfare. They are simply ignorant. Some of them are steeped in ignorance. Some of them are half-steeped. But they are all ignorant. They don't know that flies, by carrying the germs of diseases, kill more children than all the elephants, tigers, lions, automobiles and street cars in the world. Therefore, flies are considered mere inconveniences. They are regarded as unornamental in the soup, but as not detrimental to the health. They swarm in the kitchen, the pantry and the dining room, painstakingly depositing their filth upon every particle of food that the family, including the children, eat. Some of this filth is not deadly; some of it is. But no such ignorant mother ever connects in her mind the going of her baby with the coming of the flies.

Nor does any such ignorant mother have any conception of the care with which she should feed, not only her baby, but her half-grown children. If she doesn't nurse her baby she doesn't realize that any milk she is likely to find for sale is more likely to be poison than food. Nor, does she realize that such milk will be precisely as poisonous for her baby after it has been weaned. Such mothers usually buy their milk from the nearest grocery store. The number of bacteria in milk, when it exceeds 500,000 to the cubic centimeter, makes the milk unfit for use. Yet, some analyses of New York store milk, the other day, showed bacteria as high as 38,000,000. What wonder that every summer is a "black summer" for the babies of New York's poor?

In many other ways, the ignorant mother kills her children with the food she gives them. Many a baby six months old is nibbling crackers, bananas and pickles, while putting in the rest of its time at an "all-day sucker" or a stick of candy. Mothers who want their children to live should know that the premature giving of any kind of solid food to a baby is exceedingly dangerous; that after a child is weaned it should be given solid food only in accordance with the instructions of an intelligent physician; that meat and fruit (except orange juice) are like so much poison, even if they do not produce death as quickly as strychnine would; and that all during childhood, the food should be simple, with cereals, milk and vegetables as a basis and a little meat not oftener than once a week.

But, as a child-killer, the community exceeds in destructiveness even the ignorant mother. By this is meant that the community maintains conditions that sometimes prevent even intelligent persons from taking proper care of their children. The community maintains conditions that create poverty and slums. The community even maintains conditions that foster ignorance. What chance has the poor mother anywhere in this country to inform herself with regard to the rearing of children? What chance has the poor mother in New York? She has no money with which to pay a physician for consultation. Is she went to a physician paid by the city, she would hardly know what to do with her children while she was away. She might leave them at a day nursery. It is true; but did you ever think how many more day nurseries and how many more city physicians we should have to have if every mother who needs to know how to rear her children were to adopt this plan? We should have to have thousands and tens of thousands more of each. And, if the community were intelligent enough to demand such conveniences, it would be intelligent enough not to need most of them. Therefore, we who know enough not to need them are responsible for the slaughter of the children of those who won't. And, is not that a pleasant thought?

How can intelligence prevail against the neglect of communities to keep their water supplies pure? Almost every city claims to have pure water. Almost every city is a liar. So long as we have typhoid fever, we shall know that we have not pure water. The water supply of nearly every city is bad part of the year. One city drinks the sewage of another. The contamination could be prevented, of course, but it isn't. Detroit, for instance, will have another outbreak of typhoid fever next fall. Scores, if not hundreds will die, and, the following autumn, there will be another outbreak Careful parents, of course, can give their children only boiled water to drink at home, but they cannot be sure what their children drink at school. They can only hope for the best and be thankful if they get it.

The most deadly disease that threatens children this summer is infantile paralysis. In June, reports came from the south that the disease had broken out in several widely separated places. Dr. Simon Flexner, director of the Rockefeller Institute for Medical Research, says it does not follow that the disease will again be epidemic in the east and the middle west, but he cautions physicians and parents to be on the look-out.

Infantile paralysis is caused by a living organism so small that it readily passes through a germ-filter of the finest porcelain. It is believed that this germ enters and finds lodgment in the nose, and that children whose noses are not clean are most likely to become infected.

From experiments made upon monkeys at Rockefeller Institute, it is known that the average period of incubation is a little less than ten days; that is to say, definite symptoms of the disease appear ten days after the germ enters the system, though illness has sometimes followed in four days.

The first symptoms of the disease appear to vary somewhat with the individual. Also, no individual has all of the symptoms. Restlessness and irritability sometimes mark the approach. At other times there is apathy. Also there may be a low fever for a few days.

Dr. William Palmer Lucas of the Harvard Medical School, who is one of the leading investigators of the disease, offers this general advice:

"Headache, general or frontal, is not infrequently met with in children old enough to locate the pain, and this is often accompanied with rigidity of the neck. If with any of these nervous manifestations, there should be trouble in the upper air passages, such as bronchitis or sore throat, suspicion should be aroused."

But even if the dwisease, early in its progress, be correctly diagnosed, the best physician cannot stop it. Like scarlet fever, measles and all other germ diseases, this ailment must run its course. A physician can only put the patient in a condition to weather the storm as well as possible.

But while little can be done after the disease has developed, careful parents can do much to prevent their children from taking the malady. The children's noses can be kept clean. Dr. Flexner regards this as most important. Also, certain disinfectants, if used as a mouth and nose wash, during the summer danger period, are effective. A one per cent. solution of hydrogen peroxide will kill the germ of infantile paralysis. So will plain menthol. Each of these statements is made upon the authority of Dr. Flexner.

Yet the germ that causes infatnile paralysis is more virulent than the germ of rabies. Dr. Flexner discovered that the paralysis germ could not even be weakend by drying it for weeks over caustic potash, nor by keeping it frozen for weeks. But hydrogen peroxide and menthol kill it.

Dr. Flexner is now and has been for some time conducting experiments to learn whether flies carry the germs and spread the disease. He has already definitely learned that flies do carry the germs, but he has not demonstrated that the germs, when carried, get into the system and produce the disease.

Infantile paralysis came to this country from Scandinavia. Prior to 1907 it had seldom occurred here. Since then it has been epidemic from the Atlantic to the Pacific. New York and Boston, where so many immigrants gather, have suffered most. Minnesota, to which so many Scandinavians remove, comes next. The disease flourishes during hot, dry summers. It is sort of a sister disease of cerebrospinal meningitis and, years ago, was probably often mistaken for that disease. A conspicuous point of difference is that the former malady comes in late winter or early spring, while infantile paralysis comes in summer. Infantile paralysis is most likely to attack children less than four years old, though adults are not immune. But one attack most likely makes the subject immune for life. Dr. Flexner's experiments upon monkeys indicate as much.

But, harking back to the causes of preventable deaths of children, this much more may be said: Mothers are too prone to buy medicine from doctors and not enough given to buying information from them. Mothers who do not know how to care for their children should not wait until a child is sick and then call the doctor to dose the child. They should call the doctor when the child is well, and pay him his regulation fee for sitting down half an hour and instructing them with regard to the care of the child. Most mothers need information more than their children need medicine. Doctors, when called, often give harmless medicine, when none is needed, simply because the public feels that it must have something for its money. The public is not wise enough to know that it can spend its money in no better way than to buy certain information that tends toward the maintenance of health. Diarrhea, for instance, which kills more babies, perhaps, than any other single cause, is solely a disturbance of the digestive tract due to wrong feeding. Milk containing thirty-seven million bacteria to the cubic centimeter—or even a million—will cause it. Cow's milk not properly modified is certain to upset the stomachs of infants. A half-hour with a good physician will enable a mother to get information that may prevent her child from sickening and dying.

In the meantime, the responsibility for the avoidable deaths of children must largely rest with the few who, knowing how to take care of their own, do not, for one reason or another, take effective measures to pass on this knowledge to others. A few men control every government—national, state and municipal. These men, if they wanted to, could compel government to disseminate the vast amount of information concerning the prevention of infant mortality. France moved when her birth-rate became so low that she had to move. When children become scarce, governments are sometimes as careful of their health as they are at other times of the health of hogs.

OUR NOBILITY.

An Arizona man who was in Chicago recently for the purpose of buying several thousand dollars' worth of things that he needed in his business was entertained at one of the country clubs.

"Now," said his host before they went into dinner, "I wish you would do the club the honor of registering. We like to have the signatures of all prominent men who come here."

The Arizona gentleman looked at the register for the purpose of discovering what other prominent citizens had written their names there. and up near the top of the page he noticed the name of Benjamin Hooper II. A little below that was the name of Addison Bosworth III. Evidently Mr. Bosworth had been followed by a humorist, for under his name was written John Smith XIV.

"Well," said the Arizonian, "these chaps ain't got nothin' on me, I guess."

So he wrote:

"Hank Wattles I."

An Average.

A western representative in congress was talking one day of his record while in that body. "I'm not ashamed of it," said he. "I think I've done very well, on the whole. When I reflect upon it, I am reminded of an epitaph that I saw once in an old burying-ground in a country town of my state.

"This epitaph devoted a verse of four lines to the virtues of the good man who lay beneath the stone, and concluded with this line in prose:

"'He averaged well for this vicinity.'"—Lippincott's.

His Only Fear.

"What ye taking fer your cold, Hiram?"

"Rock and rye."

"Don't your wife object to the use of likker?"

"Not for medicinal purposes."

"Well, is it going to cure your cold?"

"Yes; I'm afeerd it's going to cure it too darn quick."

Not the Same Thing.

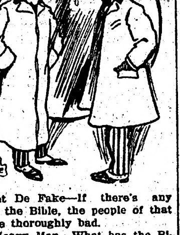
"Now, Harold," said the teacher, "if there were eleven sheep in a field and six jumped the fence, how many would there be left?"

"None," replied Harold.

"Why, there would," said she.

"No, ma'am, there wouldn't," persisted he. "You know arithmetic, but you don't know sheep."—Everybody's Magazine.

PROOF.



Hamlet De Fake—If there's any truth in the Bible, the people of that town are thoroughly bad.

The Heavy Man—What has the Bible to do with it?

Hamlet De Fake—It says, "By their fruits ye shall know them," and I merely judge by the hen fruit they presented to me on my last appearance there.

Beach Gossip.

What are the wild waves saying?
Maybe that I can't afford
The thirty a week I am paying
For board.

Early Award.

"Do you think there is anything creditable in that man Skinnum's past?"

"Well," replied the discreet man, "I understand that somewhere among his effects he has a mug with the sentence 'For a Good Boy' printed on it in gilt letters. But, of course, I have no way of knowing how he came by it."

A Coward.

"That scientist is a coward"

"How so?"

"He made the statement that woman's foot was growing larger, and when I challenged him to name the woman he refused."

Same Here.

Griggs—Does the New England climate agree with you?

Briggs—No, it doesn't even agree with the weather predictions.

As Far as He Knew.

"I say, Millyuns, is your wife a blonde?"

"She was when she left home for the summer, and I haven't seen anything to the contrary in the society papers."

Sign of It.

"What makes you think he recently married."

"He just got off a trite remark that women are peculiar."—Detroit Free Press

LITTLE SURPRISES.

"Aunt Rachel, you are to come and make us a long visit. Inclosed find railway and sleeping car tickets."

"Clugston, I'm going abroad, but you can keep on sending the Blizzard to my house. Here's two years' subscription in advance."

"Mr. Hickey, we won your case with ease, and the retainer you gave us amply pays for our work."

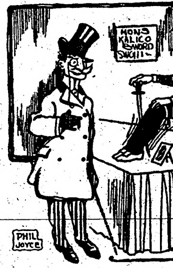
"You don't need to apologize for stepping on my skirt, sir; I ought to have known enough to hold it up while going down a stairway."

"Lower berth in outside stateroom amidships? Yes, sir; you can have your choice of half a dozen."

"This is your scarfpin, isn't it, mister? I found it while I was dustin' off the car seats."

"Wot are ye skeered of, stranger? I don't want yer watch; I only asked ye wot time it wuz 'cause I wanted to know."

MUSEUM MUSES.



The Sword Swallower—Why do you let that "Tattooing Artist" help you count up the house every night?

The Manager—Oh! he's good at figures.

Thrust and Parry.

"I don't like the way you delivered your lines in the last act," said the playwright.

"Perhaps you will show me how to delineate character?" replied the star, sarcastically.

"No. I merely wish you to pronounce a few of your vowels in such a way that the audience will know what you are talking about."

All She Could Say.

"I'll love you when the stars [illegible]"
Said he.
Whereat the flustered damsel said:
"Gee!"

There Was a Reason.

The army in Flanders had begun to swear dreadfully.

"We've got to do it to keep warm," the soldiers explained. "The war department doesn't give us enough blank-its!"

Well Informed.

"Are your neighbors gossipy?" asked Billings.

"Some of them must be," answered Gittings, "judging by the amount of information about them that my wife reports to me."

Their Chance.

"I wonder when the families of fashionable women ever get a chance to see them?"

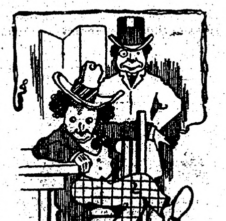
"Why, don't they occasionally have 'at homes.'"

Ominous.

"Bridget, I feel so ill I wish you would not go out today. Couldn't you get what you are going for just as well tomorrow?"

"Faith, an' I can—tomorrow or anny day. I was goin' out to get mesilf a new job."—Harper's Bazar.

STRANDED.



Knight Stands—Did your play have a long run?

Stormington Barnes—No; but the company had a long walk.

Annoying.

'Tis very sweet to sing of love,
But what's the use of that,
When one can't see his turtle dove
For so much picture hat?

Aroused.

The young woman in the stern of the boat had whispered softly the word "Yes." "But stay right where you are, Jack," she added hastily; "if you try to kiss me you'll upset the boat."

"How do you know?" hoarsely demanded Jack, a horrible suspicion already taking possession of him.—Ideas.

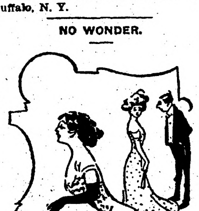
BED-BOUND FOR MONTHS.

Hope Abandoned After Physicians' Consultation.

Mrs. Enos Shearer, Yew and Washington Sts., Centralia, Wash., says: "For years I was weak and run down, could not sleep, my limbs swelled and kidney secretions were troublesome. I was fast in bed four months. Three doctors said there was no cure for me and I was given up to die. Being urged, I used Doan's Kidney Pills. Soon I was better and in a few weeks was about the house, well and strong again."

"When Your Back Is Lame, Remember the Name—DOAN'S." 50c a box at all stores. Foster-Milburn Co., Buffalo, N. Y.

NO WONDER.



He—She is so artificial.

She—Yes, artificiality seems natural to her.

ALMOST CRAZY WITH ECZEMA

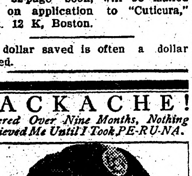
"I, the undersigned, cannot give enough praise to the Cuticura Remedies. I had been doctoring for at least a year for eczema on my foot. I had tried doctor after doctor all to no avail. When a young girl I sprained my ankle three different times, paying little or no attention to it, when five years ago a small spot showed upon my left ankle. I was worried and sent for a doctor. He said it was eczema. He drew a small bone from the ankle about the size of a match and about an inch long. The small hole grew to about the size of an apple, and the eczema spread to the knee. The doctors never could heal the hole in the ankle. The whole foot ran water all the time.

"My husband and my sons were up night and day wheeling me from one room to another in the hope of giving me some relief. I would sit for hours at a time in front of the fireplace hoping for daybreak. The pain was so intense I was almost crazy, in fact, I would lose my reason for hours at a time. One day a friend of mine dropped in to see me. No more had she glanced at my foot than she exclaimed: 'Mrs. Finnegan, why in the world don't you try the Cuticura Remedies!' Being disgusted with the doctors and their medicines, and not being able to sleep at all, I decided to give the Cuticura Soap and Cuticura Ointment a trial. After using them three days that night I slept as sound as a silver dollar for eight long hours. I awoke in the morning with but very little pain, in fact, I thought I was in heaven. After using the Cuticura Remedies for three months I was perfectly restored to health, thanks to the Cuticura Soap and Ointment. I will be sixty-four years of age my next birthday, hale and hearty at present." (Signed) Mrs. Julia Finnegan, 2234 Hebert St., St. Louis, Mo., Mar. 7, 1911. Although Cuticura Soap and Ointment are sold by druggists and dealers everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. 12 K, Boston.

A dollar saved is often a dollar loaned.

BACKACHE!

Suffered Over Nine Months, Nothing Relieved Me Until I Took PE-RU-NA.



MRS. JOSEPH LACELLE.

Mrs. Joseph Lacelle, 124 Glenora Ave., Ottawa, East, Ontario, Canada, writes: "I suffered with *backache and headache* for over nine months and nothing relieved me until I took Peruna. This medicine is by far better than any other medicine for these troubles. A few bottles relieved me of my miserable, half-dead, half-alive condition."

ALLEN'S ULCERINE SALVE

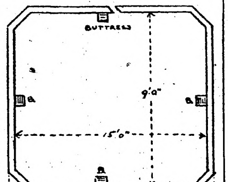
For the treatment of Chronic Ulcers, Bone Ulcers, Scrofulous Ulcers, Varicose Ulcers, Indolent Ulcers, Mercurial Ulcers, White Swelling, Milk Leg, Fever Sores, all old sores. Very successful. By mail 50 cents. J. P. ALLEN MEDICINE CO., Dept. A4, St. Paul, Minn.

If afflicted with sore eyes, use Thompson's Eye Water

CONSTRUCTION OF CONCRETE TANK FOR STORING MANURE

Detailed Instructions Given for Making Suitable Receptacle on Farm Where Six Horses are Kept—Most Satisfactory Bottom is Clay—Tank and Section of Wall Shown.

We give a plan of concrete manure tank, and also a section through one of the retaining walls, writes George F. Weston in the Country Gentleman, in response to a query. This is designed to take care of the manure from six horses on a farm. Since nothing is said about any neighboring residence or dairy, we have not considered it advisable for so small a surplus as is likely to accumulate from this number of head to suggest going to the expense of roofing over or screening from flies. The proportions or area are to be modified to meet the special demands of the farm.



Plan of Concrete Manure Tank.

It is expected that the usual custom will be followed of hauling direct to the field, and that the tank is used simply for storage during bad weather or press of other work. Allowing that the manure is removed from the stalls in a wheelbarrow, a three-foot entrance for same is shown, which should be located at the most convenient corner.

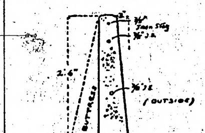
The longest diameter should be in the same direction or parallel with the most convenient road for the teams to travel, and each corner should be protected from the wheels by sinking a conveniently shaped stone in the ground at points of probable contact.

As economy is insisted on, diagonal corners are shown, but the general appearance of the tank will be improved by rounded corners, at an increased labor cost for making the forms. If the horse stalls have drainage for urine, this can profitably be conducted to a small concrete cistern built just inside the wall of tank, entirely below grade, and covered with slotted plank, so as to also drain from manure. The contents can then be pumped over the manure, should it appear to be heating unduly. With this we should advise a shed over tank, on six by six-inch concrete supports, re-enforced with a three-eighths-inch iron rod in each corner, and inserting half-inch bolt and washer in each for tying down rafter plate.

The sides are re-enforced concrete, a cheap foundation for which can be made by breaking field rock in the trenches for the first four-inch layer, grouting same with a cement grouting, then continuing to fill in the layers with roughly-broken rock, and grouting solid. Each layer should be settled lightly. The walls should be made from a fairly rich mixture, say one part cement, two sand, and four of screened gravel.

The most satisfactory bottom for this tank will be a layer of clay, thoroughly puddled, and about four inches thick. The seepage will not be material, and there is quite a saving in first cost. If of concrete, there is danger of the bottom heaving during winter, unless it is kept covered with manure. Anyway, it will be well to try the clay, as the concrete bottom can be added at any time.

The labor of handling the manure on a place where many animals are kept is a much heavier and more costly job than many would believe who have not kept an account, and it should be lightened in every way possible. One method is to use a manure carrier, and unload direct from this into the manure spreader. Where a hillside site can be secured for the storage pit or tank, a "gravity" system of loading may be put in by scraping out a road on the lower side, that will allow the top of the bed of the spreader to be a little below the level of the bottom of tank.



Section of Tank Wall.

BACTERIA ON ROOTS OF CORN

Supply Sufficient Nitrogen to Serve Abundantly Their Purposes When Soil Is Exhausted.

(By WALTER B. LEUTZ.)

How the clover acted as a fertilizer was not known until about fifteen years ago. Since that time our knowledge upon the subject has very considerably increased and every year now something more is learned.

Leguminous and pod-bearing plants unaided have no more ability to help themselves to the nitrogen of the air under any circumstances than have other green plants.

Certainly bacteria existing in the soil penetrates the soft tissues of young roots of legumes and mutiply within these lively tissues so as to form a little mass of gelatinous substance. Responding to the irritation produced the plant builds a nodular structure about the bacterial invaders, not unlike the formation of a gall consequent upon the sting of an insect.

Numerous nodules may be formed on the roots of one plant and they have characteristics peculiar to the species of plant on which they occur.

In some way not well understood these plants with nodules or tubercles are capable of getting sufficient nitrogen from the air to serve abundantly their purposes when the soil has no supplies, and when other plants must die from the want of it.

Either the bacteria are the direct agents in the process or they aid the plant itself to do what, without such aid, it cannot do. May there legumes organisms or some of them be made to form tubercles or other plants for instant maize? Here is a matter of the greatest moment. Undoubtedly they have some times in the past become adapted to leguminous vegetation. There is nothing to prevent corn from gathering tubercles.

We know now that corn can be very decidedly modified in its chemical composition by processes of breeding. Types of grain can be produced in which for instance the nitrogen percentage is greatly increased and so a long way improved as food for man and beast.

If, in addition to this, Indian corn can be made to furnish itself, through accommodating bacteria, with this higher nitrogen content directly from the exhaustless storehouses of the air, the agricultural miracle of the age will have been wrought.

No one can predict whether or not this will ever come to pass, but from what is now known, the endeavor to bring it to come to pass seems at least worth while.

CARING FOR MOLTING HENS

Require Large Amount of Feed Containing Nitrogen, Such as Oil Meal and Protein Feeds.

(By J. BAILEY BRUCE.)

Most people believe that if they can force their hens to molt early they will lay more eggs during the season, but this is not true. Hens that have molted late will lay more eggs during the winter than the early molters.

This has been shown by the most careful experiments, but the facts are not generally known.

Molting hens require a large amount of feed containing nitrogen such as oil meal, meat and other feeds rich in protein. Molting can be forced by cutting down the feed of hens as it has been shown by experiments that scantily fed hens begin molting earlier than those on full feed, but the former do not finish molting much earlier.

Starved hens molt more uniformly than others and this is particularly noticeable in hens two or three years old.

In an experiment conducted by the Cornell experiment station it was found that on a basis of 100 hens the fed flock produced eggs to the value of $29.27 more than by the starved flock.

The total income from all the birds was $278 for the starved flock and $350 for the fed flock, a difference in favor of natural molting for the year of about $95.

A western poultryman of long experience gives his method of controlling molting as follows:

As soon as the hens are through laying he turns them out in alfalfa, feeding them dry bran only, in addition. Under this treatment they get thin. Then he feeds them a mixed ration of grains and meat, giving a light feed in the morning and all they will eat at noon and night. Under this treatment they finish molting quickly, get new feathers and begin laying in September. By October 1 they are all in good laying condition and make a profit through the fall and winter.

Only Peppermint Raiser.

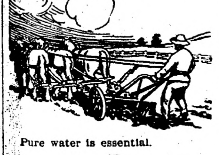
The only successful peppermint raiser in the United States is said to be Miss Mary Clark of Berrien, Mich. She has twenty-eight acres of the herb and runs her own distillery, which produces from three to four hundred pounds of oil every year.

Produce Fine Meat.

With alfalfa pasture, corn is the only thing needed to produce the finest of beef and pork.

NOTES from MEADOWBROOK FARM

By William Pitt



Pure water is essential.

Mules are easily raised.

Weeds and strawberries are incompatibles.

Starter for butter may be propagated from day to day.

Do not be stingy in the use of clean straw for bedding.

The sheep is more at home on the open prairie than among the fences.

Remove the seeds from the pumpkins before feeding them to the cattle.

Where butter has not the natural yellow color, it is well to use coloring matter.

The best time to cut the tails as well as castrate is when the lamb is a week old.

Cull out the hens carefully, and do not keep more than you have room and feed for.

Sheep return to the soil 80 per cent. of fertility of food eaten. Sheep manure is valuable.

A great deal more money is usually spent in wintering farm work horses than is necessary.

Whole grain makes best feed for sheep. Cleanliness, pure water and salt are a necessity.

If the pig is stinted in its food at any stage of its life, it can never become a perfect pork-producer.

As new oats come in, give the cows some of them each morning and evening cut green as a soiling crop.

It pays to maintain a heavy flow of milk, even if expensive feeds must be given the cows at certain seasons.

Stock beets planted on rich soil in drills and well cultivated often yield from twenty to forty tons per acre.

Use clover and alfalfa hay, supplemented with roots or ensilage for succulence, if you want an excellent ration.

Corn that yields well in one locality will often make an entire failure in another locality where conditions are different.

Probably the poultry plant on the average farm is usually the poorest equipped and poorest planned department on it.

Remember when you plow in the orchard that the roots are very near the surface Three inches is plenty deep enough.

Many an animal sold for a high price because of its pedigree, should go to the butcher's pen instead of at the head of a herd.

If ewe's udder is hard or show tendency to garget, use unsalted lard, give it vigorous rubbing and give animal good dose of salts.

The nature and conditions of the soil in which tomatoes are grown has much to do with the size of the crop and health of the plants.

A patch of rye sown now will be found of great help to the ewes in the spring, and especially so if raising lambs for the market.

In feeding oat straw and corn stover in the morning your sheep will take more exercise looking for more food to satisfy its appetite.

Everything about the poultry quarters should be got-at-able, with no filagree, cracks or crannies, and with as little furniture as may be in the poultry houses.

Young colts that are put in the stall and given all the hay they will eat soon become pot-bellied, their hair grows longer and harsher and some of it stands the wrong way.

Usually it is not advisable to pasture new seeding, but often weeds can be destroyed by giving sheep the run of the fields for a few days without material injury to the seeding.

Where there is an abundance of good well-cured alfalfa hay, it is almost impossible to select a concentrate to go with it that would not make an acceptable ration to the cow.

The fall, after all of the garden plants have been killed, is the best time to clean up the trash in the garden and burn it to prevent insects from spending the winter in it and be ready to lay eggs next year.

Look out for draughts.

Plant legumes in rotation.

Roots should be cut or sliced before feeding.

When marketing lambs leave the culls on the farm.

Sheep more than any other stock relish a change of pasture.

There is no danger of the production of hogs being overdone.

As the sheep bites close, they will eat down weeds to the roots.

In order to have good sized sheep grow them rapidly while young.

Clover or alfalfa seem to contain just what the dainty cow needs.

The total value of farm property in the United States is $40,000,000,000.

Alsike clover seed cannot be separated from timothy because of its size.

Cool the new cream to the same temperature as the old cream before mixing.

Always if possible remove the sow from the pigs and not the pigs from the sow.

For draft work the mule is valued higher than the average horse, in nearly every instance.

Farmers who are going to feed live stock through the winter should try to have the best possible.

Rutabagas are very satisfactory root crop for winter, yielding as high as 15 tons to the acre at times.

If necessary to assist the ewe in delivering, use vaseline on your hands before commencing the operation.

Woven wire is used a great deal for re-enforcing concrete and in some cases old barbed wire is also used.

Watch out for ticks on the ewes, it does not pay to raise them and you better watch out for them. It pays.

Farmers will soon be feeding new hay and new grain. Change from the old to the new should be made gradually.

Many farmers make a practice of turning lambs into the corn field in the early fall to gather up all the weeds.

The proper treatment of barb wire cuts on horses will mean fewer blemishes and less serious consequences generally.

In feeding fattened stock and dairy cows, gain and profit come in proportion to the amount of food the animals put to use.

A small quantity of linseed meal fed in the milk will balance up the ration and make it practically as good as the whole milk.

Sheep-farming has been practiced since the earliest times, and is one of the most profitable branches of the live stock industry.

Colts and young horses should have bone and muscle producing feeds in their rations, such as clover or alfalfa, hay, bran and oats.

It is very necessary that an animal used for breeding purposes should have a good pedigree, yet it is not always an indication of its value.

A dairyman who has a good herd of cows will do well to carefully examine the newcomers in the barn and thus avoid introducing some disease.

Alfalfa is a very good feed for horses provided it is fed properly, although it is not considered as valuable for road horses as for working horses.

Experiments have shown that stubble burning not only decreases the amount of humus returned to the soil, but also accelerates the exhaustion of that already present in it

In hogging down corn, fence off only a limited area at a time, as the hogs will eat more of the stalks and other herbage on the ground, and they will not waste as much of the grain.

Many farmers in the corn belt sow rape with the grain to furnish additional feed since this affords an abundance of succulent forage late in the season up to the time of severe frosts.

If a big bunch of young pigs is allowed to sleep together in cramped quarters, in cold weather, they will pile up, and the under pigs will suffer. Easy to separate them into lots of eight or ten each.

Tuberculosis in live stock is the same thing as consumption in human beings. There are many ways of spreading it, but the easiest way and the most common is through the droppings of diseased animals.

A sow pig, farrowing at one year old, will, if she and her offspring produce the average number of animals, round up a herd of 500 at the end of the fourth year—provided there are no slips, no death, no runts.

TOWN IS BEING REBUILT

Flood of Waters Has Not Taken Black River Falls, Wis., From the Map.

More than a million dollars absolutely disappearing in the short time of two hours was the toll collected by the waters at Black River Falls, Wisconsin. Even the residents of the town could not realize what it meant until the lake formed by the Hatfield dam was dry, and the rush of waters had passed on to the Mississippi.

Just out of reach of the flood the business men and residents of the place watched the waters carry away the buildings that represented the homes of business enterprises which it had taken years of effort to build. Among the larger industries seemingly wiped out within a few minutes was the plant of Coles Carbolisalve. This plant, along with others that suffered a like fate, is today being rebuilt, and the business men of Black River Falls promise that a better town shall replace the one destroyed by the raging floods, and that just as rapidly as men and material can put it together. It is catastrophies like the breaking of the Hatfield dam that demonstrate the American spirit.

The Very Worst.

Clement J. Driscoll, at a dinner in New York, told a number of amusing stories about his strenuous life as commissioner of weights and measures last year.

"A friend of mine," said Mr. Driscoll, "noticed one morning that his grocer looked very sad. 'What's the matter, old man?' my friend asked jokingly. 'The weights and measures man hasn't been dropping in on you, I hope?'

"'Yes, he has,' snapped the grocer.

"'But you don't really mean to say,' exclaimed my friend, 'that he caught you giving only fifteen ounces to the pound?'

"'Worse than that!' groaned the grocer. 'I've been giving seventeen.'"

Successful Economy in Baking.

Most housewives assume when they buy a big can of baking powder at a low price that they have been economical. They have to a slight extent—but when they use that cheap "big can" baking powder, and find it so uneven in quality, or so unreliable that the baking fails, there isn't so much economy in it after all, for the wasted materials far outweigh the few cents saved in the price.

SUCCESSFUL economy, is in the reach of every woman that desires it. She has only to order Calumet Baking Powder, and use it according to instructions. Then, she will achieve economy. For not only does Calumet sell at a reasonable price—25c per pound—but it is so carefully made by experienced chemists that failure is impossible. Only the best materials are used and the proportions of the ingredients are so exact and so uniform that EVERY baking comes from the oven, light, sweet, and beautifully raised. Calumet guarantees you against failure, and that is what constitutes real economy in baking.

Why not use Calumet, a baking powder that you can always rely upon? You can get no better at any price, for at the World's Pure Food Exposition, Calumet received the Highest Award.

And No Strong-Arm Squad.

The Greeks were piling into the Wooden Horse outside the walls of Troy.

"We might be called the first car rowdies," they cried facetiously.—Puck.

CHAS. W. LATTA

Editor and Publisher.

Published every Friday at Holt, Marshall County, Minnesota.

Subscription Price: $1.00 per year, strictly in advance.

Entered as second-class matter Sept. 22, 1911, at the post office at Holt, Minnesota, under the act of March 3, 1879.

Be a booster—not a knocker.

The New York Globe has sprung a yarn to the effect that a fund of five miiion dollars will be raised to defeat Taft next year. It is entirely unnecessary.

Rumor has it now that the State Board of Control will render an unanimous opinion exonerating Superindent Whittier of the Red Wing school. If so, what will Adolph and Andy do?

"We of the east must look to the farmers of the west to help us out," said President Taft in a speech at Glencoe, Minn., on Tuesday. They can be depended upon to do their share towards helping him out.

President Taft's press bureau startled the country the other day with the announcement that South Dakota had given him a most enthusiastic reception. That state is simply waiting for a good chance to give Taft a knock-out, and just now is sparring for a good opening.

Mrs. Emmeline Pankhurst, the orginal "militant suffragette" of England, will be in Minneapolis within a couple of weeks or so. Mrs. Pankhurst is more than famous; she is notorious, and if she gets things started in Minnesota like she did in England Ole Sageng will not be needed to introduce measures for women's suffrage in the legislature—the women will do it themselves with clubs.

A Brainard man, who shipped hay from Brainard to Tampa, Fla., brought action before the interstate commerce commission to recover for alleged overcharges on a car. The case was dismissed but the record stands that Northern Minnesota has shipped hay to Florida, and that fact is worth remembering when some smooth agent tries to sell a Minnsota man some swamp in the Florida Everglades.

Nashwauk Herald: Eberhart did not attend the recent meeting of governors in New Jersey, which was called for the purpose of preparing a brief to be filed in the United States supreme court against the Sanborn railroad rate decision. He has, up to the present time at least, ignored the demands of a great many of the most influential daily and weekly newspapers in Minnesota for a special session of the legislature, a majority of the members of which advocate an increase in the railroad gross earnings tax and he can always be found in the ranks of corporate interests that control him. Why not elect a real governor over the destinies of this great state instead of a vacillating figurehead?

A TIPSY HAT.

"Uncle Joe" Cannon, as everybody knows, does not care much for the extraordinary in the matter of clothing, says the New York Evening Post. He never affects the extreme in fashion, but has been known to wear a Fedora hat with a frock coat or evening dress, as the occasion might be. It is not unusual for him to wear his Fedora hat cocked over one eye. Consequently, one may readily imagine the astonishment of Representative Nicholas Longworth, who was accosted by Mr. Cannon at the White House when the former was wearing a Panama hat with the brim pulled down in spots, according to the fashion set by the crown prince of Germany some time ago. Mr. Cannon walked up to Mr. Longworth and, looking him straight in the eye, said:

"Nick, you may me sober, but, by gosh, your hat's drunk."

THE RACE.

"Does a dollar go as far as it used to?"

"Well, a dollar gets by without much trouble. But a million or so of 'em can't go very far without being investigated."

JUST A LITTLE TOO FRESH

Boy Jumped at Conclusions and His Employer Thereby Lost a Customer.

Miss Louise Gunther, who returned recently from Chicago, where she was appearing in vaudeville, turned a bottle of red ink over while writing at her home at One Hundred and Twenty-first street and Amsterdam avenue and the first two fingers on her left hand were discolored. Miss Gunther applied soap and water immediately, and although she scrubbed industriously was unable to remove the ink entirely. She did fade it, though, until her fingers were brown instead of red.

The same afternoon she went to a delicatessen store near her home to get some material for her evening meal. A boy about sixteen years old waited on her. When he had wrapped up her bundles he leaned over the counter and, assuming a confidential air, said:

"I'll tell you how you can get that off your fingers if you want me to."

"I wish you would," said the actress.

"Rub the fingers with gasoline."

"Will that remove it?"

"It took it off of my fingers," said the boy. "Try it and I'll bet you nobody won't know you ever smoked."

"I ever what?" she almost screamed.

"Why, smoked," said the boy.

Miss Gunther hadn't paid for her purchases. "Here," she said, "you just take these back. I'll trade somewhere else. I never smoked in my life."—New York Telegraph.

THE FLAT KITCHEN.

The architects of modern flats are indirectly instrumental in work for good housekeeping. The new kitchens are so dainty, so compact, so ingenious that they inspire any woman to keep them in perfect condition. The "parlor" may be an ordinary room. At best it will not have any more artistic features than paneled walls, a foyer hall or prismatic electric light fixtures. The kitchen is the place on which the architect lavishes his ingenuity. Maybe it is electrically fitted with the most marvelous appliances for cooking, ironing and serving. If not, the porcelain tiles, folding clothes racks, shining nickel or copper taps, glass shelves, porcelain-lined ice boxes and a trim gas range are sufficiently attractive to lure any woman to spend a fair portion of her time "in their midst," using them or keeping them in order. A man may cheerfully afford to pay a little higher rent for one of these delightful kitchens. He is more than likely to make it up in an improved menu. At any rate, it is worth an experiment. Besides, you have to. All the flats are built that way now.

WHAT PUZZLED THE WORKMAN.

Sergeant Atkins had served for many years in foreign climes, and now he was traveling back to the village where he was born. In the carriage of the local train that carried him over the last stage of his journey he related some of the strange adventures which had befallen him. And the workmen present listened in open-mouthed wonder.

"In that battle," said the soldier, "we fought from eight in the morning till eight at night, and never stopped a moment."

"Sounds all right," said the only doubting one, "But—there's just one thing I don't understand."

"Indeed!" said the sunburnt warrior. "And what is it you don't understand?"

"Well, what I want to know is this," answered the horny-handed one, in a tone of subdued triumph. "How did you manage about the dinner hour—eh?"

A DEVOTED CONSTITUENT.

"That member of congress says you have voted for him for the last 15 years."

"That's right," replied Farmer Corntossel.

"You must think a lot of him."

"Well, I dunno. You see, 15 years ago I had a couple o' hoss trades with him, an' since then I've allus felt safer with him spendin' so much of his time in Washington."

BREAKAGES.

"My husband broke the family record for swearing yesterday."

"Why so?"

"Because the cook broke the family china."

RIGHT WAY TO WIND WATCH

Jeweler Tells How Life of Timepiece May Be Very Materially Lengthened.

A man who repairs watches says: "Never get into the habit of holding the stem and winding the watch; always hold the watch and wind the stem. If you will try both ways you will find that you have a bad habit. Moreover, wind the watch as nearly as possible at the same time every day. It is bad for a timepiece to be wound too frequently or to be allowed to run down entirely.

"At night either hang the watch up—small watchstands are made for the purpose, or a tiny yet firm brass hook on the wall will do as well—or, if you lay it down, see that there is some soft article under it. Above all, do not keep it in too hot or too cold place, in spite of all the watchmakers will tell you about the temperature tests to which their wares have been subjected.

"Women should not carry a watch loose in a bag. If neither chatelaine nor chain is possible with the gown you are wearing, pin the watch firmly under your dress. The leather wristband with the watch set into it is bad for the watch—it is only too likely to bump against everything you touch.

"About once a year send your watch to be cleaned and regulated. Handle it carefully otherwise and it will be a reliable and efficient servant for a generation.—Washington Post.

HAD SAME THING IN MIND

Two Souls With but a Single Thought—Certainly a Remarkable Coincidence.

I defy anybody to beat this for coincidence," said the woman. "The fact that everybody's mind runs on ice in the summer time doesn't make it a bit more remarkable. I had to get down town so early that I didn't have time to straighten up the house, and my husband promised to empty the pan of water under the icebox. About 12 o'clock my placid subway meditations were electrified by the remembrance of that pan. Such an awful fear that he had forgotten it and that the water had soaked through to the ceiling below took possession of me that I said, right out loud, and he 40 blocks away:

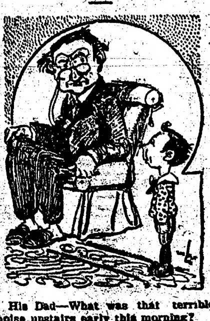
"'Did you empty the pan under the icebox?'

"The man sitting behind me clapped his hand to his forehead with a gesture of despair.

"'No, I'll be blessed if I did,' he said.

"When we realized the significance of the situation the man and I both felt pretty foolish; also we felt doubly anxious about our iceboxes. I postponed all other errands and hurried home. The pan was running over. I would give a good deal to know if the pan under that other icebox had overflowed, too. I'll bet a cooky it had."

EARLIE'S DREAM.



His Dad—What was that terrible noise upstairs early this morning?

Earlie—Well, I dremp' I was a duck, an' when I woke up I had swum off the bed.

TRICK OF THE TRADE.

The Young Doctor—They tell me you are noted for encouraging your patients.

The Successful Old Doctor—Yes. Many of my wealthiest patients think they are sick when there is nothing the matter with them—and I always encourage them.

SAILING ALONG.

Jack—Once more, Molly, will you marry me?

Village Belle—For the thirteenth time this hour, I tell you I will not.

Jack—Well, thirteen knots an hour ain't bad sailin' for a little craft like you.—Tit-Bits.

Good board and furnished room, taken care of in private family, for $3 per week. Send for catalog. Address J. C. Sathre, Crookston, Minn.

The editor put in a strenuous time doing a building stunt on his claim in East Valley the first of the week. The handling of lumber, especially tamarac, is not very helpful in setting type for a newspaper. We have actual proof of this at our finger ends and, if the paper this week does not come up to the expectations of our readers, they can blame it on the lumber question.

Farms Wanted.

I have prospective buyers for a few good improved farms; also for 960 acres of wild land. All must be in eastern Marshall county.

"The Big New Store"

Death of Mrs. Reierson

On Saturday morning last Mrs. Marit Reierson died at the home of her son, Reier Reierson, in this village, at the ripe old age of 85 years, 5 months and 11 days. She has been failing generally for some time, but her fatal illness lasted for only a few days. She was a native of Valders, Norway, but has lived here for over 25 years, during which time she has made her home with her sons, Reier and Ole Reierson. A daughter in Norway also survives her.

The funeral services were held on Tuesday afternoon from the local church and the remains laid to rest in the Holt cemetery.

A PLEA.

We wish to call attention to a form of cruelty which has now been going on for some time.

During the summer months many wives leave town and behind them, without or care, their husbands, who roam over the back yards, make night hideous by their wailings and subsist as best they can on the scraps thrown out by roof gardens.

A husband who has been well fed during the winter months and has been accustomed to a certain amount of luxury is suddenly thrust forth into an unknown world.

So far as we have ascertained there seems to be no law that can reach the miscreants, who are guilty of this unnatural cruelty. The most that can be done is to make a general appeal to everybody.

Whenever you see a starving husband, with the corners worn off wandering about the streets, take him in and give him a square meal. The Lord will reward you.—Life.

A SAD BALL THROWER.

They were both spinsters, both school teachers and both announced loud enough for every one within half a dozen seats from them at recreation park that they were going to Sacramento to teach school.

The pitchers were warming up for the battle with the Angels. A little miss who accompanied the school teachers was acting as licensed guide.

"That's Handsome Harry Suter," she explained, pointing to the Seals' big portside flinger. "He pitched a no-hit, no-run game this year."

"Stupid thing!" remarked one of the teachers. "Couldn't he throw the ball so the other men could strike it?"

Three cheers and a "Votes for Women!"—San Francisco Chronicle

FIRST TYPEWRITER.

Though it is only within comparatively recent years that the typewriter has come to play its all-important part in business life, it is quite an ancient instrument, having been first produced in England nearly 200 years ago. On January 17, 1714, there was granted to a Mr Mills, an engineer in the employ of the New River company, a patent for an invention described by him as "an artificial machine for the impressing or transcribing of letters singly or progressively, one after another, as in writing, whereby all words may be engraved on paper or parchment so neat and exact as not to be distinguished from print."

AMBIGUOUS.

"Say, ma, does God see everything we do?"

"Yes, my child."

"Even the little things around the house, ma—in the hall and dining room and all around?"

"Yes, my child, everywhere."

After a moment's sympathetic contemplation in profound silence:

"Gee, I wouldn't like to be pa."—Lippincott's.

TAKEN UP—On Friday, Oct. 6, at my place 3 miles west and 1 1-4 miles north of Holt, 1 red heifer calf and 1 red steer calf, white striped. Owner can have same by calling, proving property and paying expenses. JOHN SWANSON.

Our specials in triple coated, white lined, enamelled kitchen ware at 10 and 69 cents are really wonderful values. We have quite a lot on hands and, while they last, we will sell them at these prices. You may never get these goods at such low prices again, so call and get what you want while they last. S. S. Kolden & Co.

SWATTING FLIES WITH SOAP

Kansas City Physician Devises an Efficient Method of Destroying the Household Pests.

A physician living on the South side has invented a rather novel method of ridding his house of flies. An ordinary drinking glass half filled with soapsuds is placed in a convenient window sill. A slice of bread with a small hole cut in the middle and spread on the under side with molasses, covers the glass. The flies, alighting on the bread, crawl through the hole to get to the molasses. There they are soon overcome by the fumes of the soapy water and fall into it. In a few hours the glass is filled with them. The physician is very enthusiastic over the invention, for, he says, it is much easier than chasing flies all over the house and then killing only a few.

"It is also safer," he added, "than the method I read of in Tuesday evening's Star, telling of a grocer who used a pan of formaldehyde. I do not doubt the success of the plan, but formaldehyde is deadly poison, and it would be a bad thing to keep around the house where there are children. The soapsuds method is convenient and cheap and brings excellent results."—Kansas City Star.

HE TOOK THE RADIUM HOME

Patient "Borrowed" Birmingham's Only Piece of Precious Element, With Serious Results.

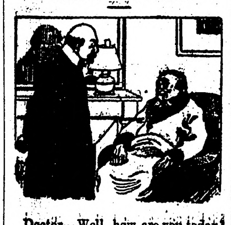
Birmingham's only piece of radium went missing the other day under curious circumstances. It is owned by Messrs. Southall Bros. & Barclay, and as it is the only piece in the Midlands its owners lend it for use in the local hospitals. An eminent skin specitlist was using it to treat a working man, and soon after the patient had gone he was horrified to discover that the box containing the precious speck had disappeared. Instant and excited search failed to reveal its whereabouts. Then the police were informed, and they discovered that the patient, anxious to make a speedy recovery, but understanding little of the money value of the mineral, and less of its danger in unskillful hands, had carried it to his home. There the unfortunate fellow had been acting as his own dermatologist, and his enterprise is likely to be followed by the partial loss of his nose, on which organ he had been experimenting.—London Tit-Bits.

RAISING TURKEYS.

Nearly 800 wild turkeys were raised at the state game farm this season, and these birds will be turned at liberty in certain localities as soon as they are able to care for themselves. The commission will try to educate the public on the idea of giving these birds a chance to multiply. The birds raised in captivity have no fear of men, and as a result are easy prey to hunters.

The game and fish commission also proposes to furnish a pair or more of pheasants to anyone desiring them to raise in captivity, they agreeing to return a like number to the commission from the first hatching. By this means it is hoped to get these birds scattered throughout the state.—Sacramento correspondence San Francisco Chronicle.

PRESENCE OF MIND



Doctor—Well, how are you today?

Patient—No better, doctor.

Doctor—H'm, I think you would better leave off taking those pills I ordered you.

Patient—I haven't taken any of them yet.

Doctor—For goodness sake, then, take them.

RETORT COURTEOUS.

He—Women are such slaves to fashions. Look what tight skirts they get!

She—And men are such slaves to passions. Look how tight they get [illegible]

HOLT STATE BANK

Incorporated June 1st, 1910.

Our List of Customers is Steadily Incrasing.

Why pay out $1.50 in fees for a few Money Orders when a check answers the same purpose without a cent of cost to you? We urge everyone to systematize their business and to pay all bills by check. You not only hold a record of your earnings and expenditures during a season, but also hold a separate receipt for each and every check bearing endorsement. Also, by conducting your business on an economical basis, your balance steadily increases. A surplus entered to your credit in your pass book is a most worthy friend to have and far-reaching in its effects within the community, as it places money in circulation among your fellow neighbors.

Your entire banking business earnestly solicited.

B. L. BACKE, Cashier.

CARTER'S LITTLE LIVER PILLS.

When Friendship Counts.

The doors of the deformed man are always locked, and the key is on the outside. He may have treasures of charm inside, but they will never be revealed unless the person outside cooperates with him in unlocking the door. A friend becomes, to a much greater degree than with the ordinary man, the indispensable means of discovering one's own personality. One only exists, so to speak, with friends. It is easy to see how hopelessly such a sensitiveness incapacitates a man for business, professional or social life, where the hasty and superficial impression is everything, and disaster is the fate of the man who has not all the treasures of his personality in the front window where they can be readily inspected and appraised.—From the September Atlantic.

This Time for a Friend.

"'Tis a wise man," said Robert Edeson, "who knows when to ask questions. The other night I was standing inside the railroad station when an Irish cab driver came up to me and asked me how soon the next train came in. I told him and he said thank you and went away. In about five minutes he came back with the same question. 'I told you not more than five minutes ago,' I said. 'I know it,' he answered cheerfully, 'but it's not me th't wants to know this time. It's a friend of mine outside th't has to watch his horses and can't come in an' ask yez himself!'"—Young's Magazine.

SHIFT

If Your Food Fails to Sustain You, Change.

One sort of diet may make a person despondent, depressed and blue and a change to the kind of food the body demands will change the whole thing.

A young woman from Phila. says:

"For several years I kept in a rundown, miserable sort of condition, was depressed and apprehensive of trouble. I lost flesh in a distressing way and seemed in a perpetual sort of dreamy nightmare. No one serious disease showed, but the 'all-over' sickness was enough.

"Finally, between the doctor and father, I was put on Grape-Nuts and cream, as it was decided I must have a nourishing food that the body could make use of.

"The wonderful change that came over me was not, like Jonah's gourd, the growth of a single night, yet it came with a rapidity that astonished me.

"During the first week I gained in weight, my spirits improved, and the world began to look brighter and more worth while.

"And this has continued steadily, till now, after the use of Grape-Nuts for only a few weeks, I am perfectly well, feel splendidly, take a lively interest in everything, and am a changed person in every way." Name given by Postum Co., Battle Creek, Mich.

Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

SERIAL STORY

No Man's Land

A ROMANCE

By Louis Joseph Vance

Illustrations by Ray Walters

(Copyright, 1910, by Louis Joseph Vance.)

SYNOPSIS.

Garrett Coast, a young man of New York City, meets Douglas Blackstock, who invites him to a card party. He accepts, although he dislikes Blackstock, the reason being that both are in love with Katherine Thaxter. Coast fails to convince her that Blackstock is unworthy of her friendship. At the party Coast meets two named Dundas and Van Tuyl.

CHAPTER II.—(Continued.)

Blackstock interposed hastily "That fourth-best spade of yours certainly did lead him up to slaughter." He reached over and took up the deck at Truax's elbow, spreading the cards with a dextrous sweep of his strong, blunt fingers. "New game. Cut, you fellows."

"The invitation tempts: but there are some skins too thick . . ." Van Tuyl pursued.

Truax pushed back his chair, nodding cheerfully to Coast. But for a heightened tint of color he showed no trace of being aware of Van Tuyl's insolence. "Cut in, Garrett; it's your turn. . . . Unless," he added, "you-all want to quit. It's pretty late. I think I'll drop, for one."

"Drop," said Van Tuyl sweetly, "and be damned."

"What do you mean by that?" Truax, on his feet, turned upon his tormentor with an imperceptible tremor in his voice.

"Prudence is the better part of bridge," Van Tuyl explained carefully. "He's a prudent man who becomes conscious of chilled extremities when ahead of the game."

Crimson with resentment, Truax hesitated, the retort on the tip of his tongue only withheld because of Coast's appealing and sympathetic look. Then with a lift of his plump shoulders he turned away, nodding to his host, Dundas and Coast.

"Good-night," he said brusquely, and so betrayed the effort his self-control cost him. "You-all can send your checks if I am anything ahead."

"We'll try not to forget, thanks." A satiric smile on Van Tuyl's thin lips winged the Parthian dart.

Truax did not reply, but left the room abruptly, Blackstock accompanying him to the door. In his absence Coast cut in as Van Tuyl's partner and took the chair Truax had just vacated.

"Deal?" he inquired.

"Yours," Dundas told him.

"And," Van Tuyl interjected as Coast took up the cards, "let us trust you've more bridge sense than that professional dummy." He nodded to indicate the departing Truax. "I carefully told him, early in the evening, that when I doubled I wanted not his highest heart, but the highest card of his weakest suit. Do you think you can remember that?"

"Yes," said Coast shortly, annoyed by the other's offensive manner.

"I sincerely trust so. I didn't come here to be rooked by everybody, by incompetent partners included."

Coast quietly put down the cards without completing the deal. "Aren't you spraining something in your attempts to be insolent, Van?" he inquired as Blackstock reappeared. "It happens I've been your partner this evening more frequently than anybody else."

"Precisely."

"And you think yourself justified in suggesting that I've played against you?"

Van Tuyl's dark eyes met his steadily in a sardonic stare. "I'm the heaviest loser here," he said. "You've played like a raw amateur every time you've played with me. Interpret that to your liking."

"I shall." Coast got up, white to the lips. "It spells good-night to me."

Blackstock struck in with a heavy note of insincere suavity. "Oh, come now! It's early yet. Van doesn't know what he's saying—"

It was Van Tuyl's turn to rise; he accomplished the action with surprising dignity if with a slight unsteadiness. "Since when did I appoint a bounder like you to read my meaning?" he asked crisply.

Blackstock hesitated, swaying a little as his temper strained at the leash. "I'll take that from you in your present condition, Van Tuyl," he said slowly.

In his nervous anxiety to avert the quarrel, little Dundas blundered and precipitated it. "Oh, say now!" he piped. "We're all good friends. Don't let's us slang one another. Come on, Van Tuyl—let's have a drink and make up."

At the suggestion Van Tuyl's weathervane humor veered. "All right," he assented; "that listens like sense." He turned to the buffet, Dundas with him.

"Good-night, Blackstock." Coast offered his hand. "I'm off now."

"Why . . . good-night." Blackstock's mouth smiled, but his speech was mechanical and his eyes, slightly prominent and magnified by thick lenses, met Coast's with an opaque look singularly suggesting a cast. "I'm sorry our party has to break up so early—"

"Look here!" Van Tuyl swung round with a glass half-full of raw Scotch in his hand. "Aren't you going to join us?"

"Thank you, no," said Coast dryly.

"No," said Blackstock. "And," he added, "if I were you, Van, I'd chop that drink. It won't do you a world of good."

"Oh?" Van Tuyl smiled acidly. "Don't you know I reserve the privilege of acting as my own wet-nurse?"

"I advised you as a friend, but I'm willing to push the trespass and tell you something you evidently don't know, Van Tuyl; drink makes you ugly."

Coast, lingering in anxiety, detected suddenly the gleam of drink-insanity in Van Tuyl's eyes. Alarmed, he moved to place himself between the men, and in the act received full in the face what had been intended for Blackstock—the contents of Van Tuyl's glass.

Half-blinded and choking, he stepped back, groping for his handkerchief. The alcohol burned his eyes like liquid fire, and the fumes of it in his throat and nostrils almost strangled him for a moment, preventing his clear understanding of what was taking place. Dimly he heard Van Tuyl raving in his curiously clear and incisive accents, heard him stigmatize Blackstock card-sharp and blackguard. More vaguely he heard him name Katherine Thaxter—in what connection he did not know. On the heels of that something barked hideously; Dundas screamed like a rat; Van Tuyl said: Oh, God!" thickly.

Dazed with horror, Coast managed to clear his vision.

Blackstock had moved to the other side of the room, where he stood at a small table, the drawer of which he had evidently jerked open the instant before he fired. His feet were well apart and he leaned a little forward, his large head lowered upon its heavy neck. His lips were compressed to the loss of their sensual fullness, his eyes blazed beneath knotted, intent brows. One hand was clenched by his side; the other held an automatice pistol from whose muzzle a faint vapor lifted in the still hot air.

In a corner little Dundas was huddled with a face of parchment, mouth gaping, eyes astare.

Both men were watching Van Tuyl.

Coast saw the tall, graceful figure sway like a pendulum gathering momentum. An expression of strained surprise clouded the man's face. He lurched a step forward and caught himself with a hand on the card-table, and so held steady for an instant while his blank gaze, falling, comprehended the neat black puncture with its widening stain upon the bosom of his shirt.

"God . . ." he said again in a voice of pitiful inquiry.

Then he fell, dragging the table over with him.

On the sound of that, Blackstock moved for the first time. He drew himself up, relaxed, and dropped the weapon upon the table beside him. His glance encountered Coast's, wavered and turned away. He moistened his lips nervously.

Coast, with a little cry, dropped to his knees beside Van Tuyl. Already the man's eyes were glazing, the movements of the hand that tore at his breast were becoming feebly convulsive. While Coast watched he shuddered and died.

"Well?" Blackstock's voice boomed in his ears as the man's hand gripped his shoulder. Coast shook off the grasp and rose.

"You've done for him," he said, wondering at the steadiness of his own voice.

Blackstock shook his head, blinking like a man waking from evil dreams. "Why . . .?" he said huskily.

He turned away as if to lose sight of the figure huddled at his feet.

Dundas in his corner whimpered. Blackstock swung to him with an oath. "Shut up, damn you! D'you want—" He clicked his strong white teeth, jumping as the bell of the house telephone interrupted. Then he went heavily to the instrument in the short hallway that led to the entrance to the apartment. Coast heard him jerk down the receiver.

"Well?" he demanded savagely.

"Yes. An accident."

"One of my guests. Yes, badly. You'd better call up police headquarters and tell them to send an ambulance.

"And don't let anybody up here until they come. Understand?"

He hung up the receiver with a bang and tramped back into the dining-room. "That damn' hallboy! . . . They heard the racket in the flat below and called him up. . . . I have made a pretty mess of things!"

He went to the buffet, carefully avoiding the body, and poured himself a stiff drink, which he swallowed at a gulp.

Blackstock strode restlessly back to the other end of the room and threw himself, a dead weight, into a chair, facing the wall. In the silence that followed Coast could hear his deep and regular respirations, unhurried, unchecked. After a moment, however, he swung round, dug his elbows into his knees and buried his face in his hands.

"Good God!" he said. "Why did I do that?"

Dundas coughed nervously and moved toward the door. Blackstock looked up with the face of a thundercloud.

"Where are you going?"

Dundas stammered an incoherent excuse.

"Well, you stop where you are. Get back to that window-seat—and try to keep your miserable teeth still, can't you? D'you think I'm going to let you desert me now, after all I've done for you, you ungrateful rat?"

Without a protest Dundas sidled fearfully between him and what had been Van Tuyl, and returned to the window-seat. Blackstock's glowering gaze fell upon Coast. A sour grimace twisted his mouth.

"You're not a bad fellow, Coast," he said—"to stick by me. . . ."

Exerting himself, Coast tried to master his aversion and contempt for the man as well as his blind horror of the crime.

"What are you going to do?"

"Do?" Blackstock jumped up and began to pace to and fro. "What the hell can I do but give myself up?"

"You mean that?"

The question was involuntarily on Coast's part, wrung from him by surprise, so difficult he found it to credit the man's sincerity.

"Of course," Blackstock explained, simply; "it's too late now to make a get-away. . . . If it hadn't been for that racket . . . They'd cop me before I could get out of town." He paused, questioning Coast with his intent stare. "You wouldn't let me off, would you? You'd tell the police, of course?"

"Of course."

Blackstock nodded as if he found the reply anything but surprising. "Of course. He was your friend."

"Yours, too. Why did you do it?"

"This damnable temper of mine. He—didn't you hear?—threatened to tell Kate Thaxter. . . ." Blackstock resumed his walk.

"What?"

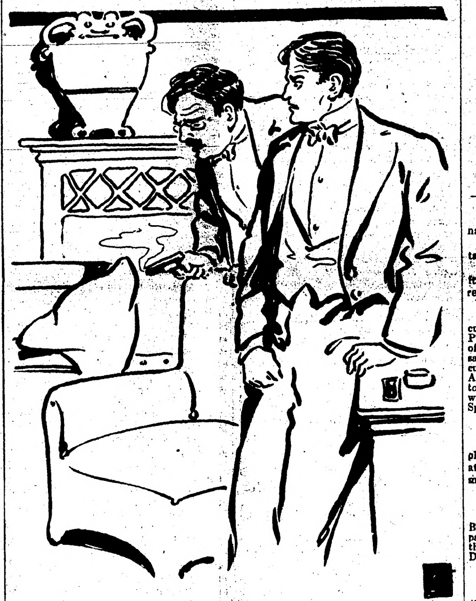
"Never mind—something to prevent our marriage."

"And you killed him for that?"

Blackstock stopped, staring down at the body. "Yes," he said, in a subdued voice.

"If that's your way, you'd have to murder me also, you know, before you could have married Miss Thaxter."

(TO BE CONTINUED.)



Blackstock Moved for the First Time.

Too Late to Change.

"A man can no more change his reputation than he can change his face or his arms," said Senator La Follette at a banquet in Madison.

"There was once a wicked old Madison millionaire who took his pastor aside and said:

"'I am going to devote the remainder of my life to doing good.'

"Dr. Thirdly, outspoken man, retorted:

"'Do you mean John H. Good, the wealthy farmer, or young Sam Good, the Socialist millionaire?'"

And So On.

"What is this domestic science?" inquired the engaged girl.

"It consists of making hash out of the left-over meat, and croquettes out of the left-over hash," explained her more experienced friend.

Hood's Sarsaparilla

So combines the great curative principles of Roots, Barks and Herbs as to raise them to their highest efficiency; hence its unequaled cures.

Fast Color Eyelets Used Exclusively.

WHAT I WENT THROUGH

Before taking Lydia E. Pinkham's Vegetable Compound.

Natick, Mass.—"I cannot express what I went through during the change of life before I tried Lydia E. Pinkham's Vegetable Compound. I was in such a nervous condition I could not keep still. My limbs were cold, I had creepy sensations, and I could not sleep nights. I was finally told by two physicians that I also had a tumor. I read one day of the wonderful cures made by Lydia E. Pinkham's Vegetable Compound and decided to try it, and it has made me a well woman. My neighbors and friends declare it had worked a miracle for me. Lydia E. Pinkham's Vegetable Compound is worth its weight in gold for women during this period of life. If it will help others you may publish my letter."—Mrs. NATHAN B. GREATON, 51 N. Main Street, Natick, Mass.

The Change of Life is the most critical period of a woman's existence. Women everywhere should remember that there is no other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound.

If you would like special advice about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.

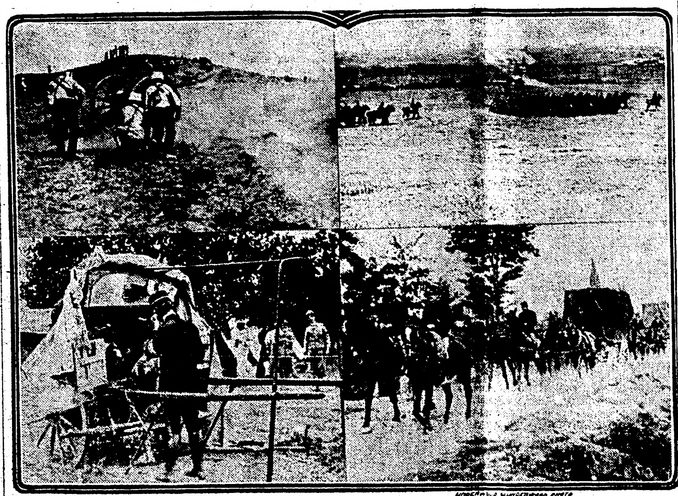
VIEWS OF ITALY'S ARMY IN ACTION



UNDERWOOD & UNDERWOOD PHOTO

WE present herewith a group of photographs showing certain activities of the army which Italy is pitting against the forces of Turkey in Tripoli. The pictures show: (1) Italian quick-firing gun in action; (2) artillery on the march; (3) wireless apparatus in the field; (4) ambulance corps on the way to the front.

LOP-SIDED CONTRACT

Husband Now Sorry He Signed Paper to Get Wife to Return.

Every Privilege Is Given to Woman, Even to Entertaining Former Gentlemen Friends, While He Becomes Slave.

Kansas City, Mo.—S. A. Dickson has repudiated the most unique marriage contract ever entered into in the history of Kansas City. The document was drawn up by his wife and gave her every privilege, even to the adoption of affinities if she cared so to do. The Dicksons quarreled a few weeks after their marriage, eighteen months ago, and, Dickson says, under duress of intense love, he signed what he now admits was a very foolish contract to get his wife to return to him.

Details of the marital troubles of the Dicksons were made public the other day in a deposition filed in the circuit court in a suit for divorce filed by Dickson. Dickson admitted he was compelled on several occasions to go on bended knees to his wife and ask her forgiveness. His reward was not forgiveness. He merely was allowed to bask once more in the light of her beauty, to give her his salary each week and subsist on the crumbs of affection she chose to give him.

Mrs. Dickson lives at No. 1120 Tracy avenue, this city. Eighteen months ago they were married. Three weeks later they separated. The husband in his deposition says the separation was due to the fact that she continued to be a friend of men with whom she went before their marriage. Mrs. Dickson says the reason was that her husband was too exacting and jealous without cause.

Last March, upon the earnest solicitation of the husband, a reconciliation was effected, but not until the wife had exacted a written statement from her husband, pledging her independence and promulgating herself as boss of the home. The woman dictated the statement and Dickson signed it. She made no promises. Here is the pledge Dickson took:

To whom it may concern:

I, S. A. Dickson, do hereby agree to all and everything herein mentioned. I agree to allow my wife, T. C. Dickson, to do just as she feels inclined to do, and to feel just as free to come and go and to visit and to go with whom she feels inclined without giving or showing any jealousy to her for such acts on her part, nor watch or condemn her for so doing.

If she will return and live with me once more I will not interfere with her in any way whatever. I wish her to feel just as free to come and go as the day she was born. I will be good and kind to her and give all my earnings unto her. She is to keep them as she sees fit and best. If we should put any of it in the bank, it will be so placed as to require the signature of both of us to draw it out. If I fail to live up to this agreement, I will allow her to have a legal separation, if she so desires. I further agree to make her the legal heir to all my life insurance, or whatever may accumulate in the way of property through our association.

A few weeks after this the Dicksons resumed marriage relations. Before this, Dickson testified, his wife had permitted him to come and visit her a day each week or two, and on each visit he turned over a part of his salary to her. Dickson donned the apron and went into the kitchen after the reconciliation. While he washed the dishes, he said, his wife would talk over the 'phone to gentlemen friends. The telephone was in the next room and the door would be open between the two rooms.

STOCK OF GAME FISH MOVED

Thousands of Bass and Many Other Prizes Transferred Because of the Building of Aqueduct.

New York.—While the period immediately preceding the 1st of October is made the occasion of a change of residence by a large proportion of the dwellers of Greater New York and brings a rich harvest to the operators of moving vans, it is safe to say that the unique moving job of the season is one that took place recently among a large delegation of the city's finny population.

In connection with the building of the new aqueduct system which is to give the city a larger water supply it became necessary to drain Kensico lake in the Croton watershed. This has long been known to anglers as the home of some of the finest bass in this part of the state. Sooner than lose this valuable collection an appropriation was made to transfer them to another near-by lake and a large force of men has been set to the task of making the transfer with as little injury and inconvenience to the fish as possible.

The fish are taken in big nets, transferred to large cans and carried by motor trucks to their new home, three miles distant. Ten thousand game fish have been moved thus far and the work is still under way.

As a special mark of distinction the largest of the bass, an eight-pounder, was separated from his fellows and placed in the city aquarium.

Effects of Chewing-Gum.

New York.—Mrs. Lena Stevel was chewing gum in her home, 327 East Ninety-eighth street, when suddenly she shrieked, then gasped. Her family gathered about her, but she could not speak, simply pointing to a place where a false tooth was missing, and then to her throat.

An ambulance in charge of Dr Stole raced from the Presbyterian hospital.

"Swallowed your tooth?" asked the doctor.

Mrs. Stevel made a great effort and replied:

"I certainly did, and it's gone down, chewing gum and all."

She was taken to the hospital.

Hope to Find Origin of Life.

Baltimore, Md.—"No man dares to say that the secret of the origin of life will be discovered, yet scientists are working hopefully toward the unraveling of the mystery."

So said Dr. Albrecht Kossel, director of the Physiological institute of Heidelberg university, who has come to the Johns Hopkins university for a series of lectures.

MOTORMAN SEES MANY BUGS

Army of Potato Beetles Halts Street Car Many Minutes at North Rehoboth, Mass.

Providence, R. I.—"What in thunder?" exclaimed a motorman on the Taunton & Pawtucket street railway as his car came to a sliding stop at the foot of a hill in North Rehoboth with the power on and the wheels spinning at top speed. Then he stared with fascinated gaze at a wide yellow streak waving across the road ahead of him and felt of his head.

"Don't turn off the power, Charley; keep the wheels turning so's they can't invade the car," shouted the conductor.

"So's what can't invade the car?" queried the motorman. "You don't have to go batty just because I'm seein' things."

"You're not seeing things, Charley. Them's potato bugs on a migration."

"Sure enough," the motorman acquiesced, gazing at the moving mass. "Gee, just look at the way they dig the grass out by the roots! That's the cause of all the dust, too, isn't it?"

As far as the curious pair and the passengers could see was one moving mass of potato bugs. They kept going by for nearly an hour, it is said, polishing pebbles on their way, scratching bark off trees, and actually running to each other's defense and clinging to the legs of birds when attacked.

Finally, the motorman managed to get his car started over the slippery insect mass by using sand. When he reached the barn he put in a requisition for a large can of paris green.

POSE WHILE ASLEEP

English Society Adopts Fad Started by Austrians.

Latest Craze Is Being Photographed While Asleep—Idea Comes From Austria, Where It Is Already Very Popular.

London.—The latest society craze is being photographed while asleep.

The idea comes from Austria, where it is already very popular, but it has spread to London, and inquiries may show that photographers have begun to follow the fashion or are prepared to do so.

One well-known woman professional photographer recently caused a small sensation by an exquisite picture of a group of sleeping children which she took, and other specialists in portrait work are endeavoring to emulate her, not only in pictures of sleeping children, but in pictures of oblivious grown-ups.

Discussing the subject, Mr. George Henry, the well-known portrait painter, said he could not understand why anyone whose waking expression is pleasant should want to be photographed asleep.

"Still, there are some people whose faces look better in repose," he agreed. "There is no expression to be obtained from the eyes of a sleeping person, of course, but there may be something undesirable banished from the face.

"Many people go through life with a set expression—a 'purposeful mask'—on their faces, but when asleep they forget that set expression and you catch them as they really are.

"The chief difficulty in getting a sleeping photograph is, I imagine that no one—or few people—can go to sleep at will. They may close their eyes and pretend to be asleep, but that does not give them a natural sleeping look."

"I do not say that you will get a true likeness of a person when asleep, but you will certainly get a very interesting one," said a well-known sculptor. "The comparison between a 'waking' and sleeping portrait of the same individual should be very interesting.

"The stress of modern life and conditions generally line and mark people's faces, but sleep blots out much of this facial disfigurement, and that is one great reason why women especially should go in for sleep photography. Children, too—although not, of course, for the same reason—ought to be ready and beautiful subjects."

Takes Mail Order Wife.

Evansville, Ind.—Henry Clay Long, a farmer near Fairfield, a few weeks ago advertised for a wife. More than 500 women answered the advertisement and Long finally has selected Miss Bessie Southard of Centertown, Ky., said to be the belle in that section. She arrived at Fairfield the other day and became Mrs. Long. When Miss Southard departed from Kentucky the whole population followed her to the station and showered her with best wishes.

Modern Pharmacy.

"We have a very fine course in pharmacy," says the president of the college to the father of the student who is entering.

"I'm glad to hear that. My boy expects to become a druggist."

"Well, we give special lectures on soap, stamps, cigars, perfumery, soda water, candy, city directories, telephone books and stationery."—Life.

"Does your automobile go faster than your neighbor's?"

"No," replied Mr. Chuggins. "But my danger signal makes a much more disagreeable noise than his."

COLDS Cured in One Day

As a rule, a few doses of Munyon's Cold Remedy will break up any cold and prevent pneumonia. It relieves the head, throat and lungs almost instantly. Price 25 cents at any druggist's, or sent postpaid.

If you need Medical advice write to Munyon's Doctors. They will carefully diagnose your case and give you advice by mail, absolutely free.

Address Professor Munyon, 53d and Jefferson streets, Philadelphia, Pa.

PERFECTION SMOKELESS OIL HEATER

In every cold weather emergency you need a Perfection Smokeless Oil Heater. Is your bedroom cold when you dress or undress? Do your water pipes freeze in the cellar? Is it chilly when the wind whistles around the exposed corners of your house?

A Perfection Smokeless Oil Heater brings complete comfort. Can be carried anywhere. Always ready for use—glowing heat from the minute it is lighted.

Ask your dealer to show you a Perfection Smokeless Oil Heater; or write for descriptive circular to any agency of

Standard Oil Company
(Incorporated)

Rivalry.

An Unbeliever.

"Sir," said the haughty American to his adhesive tailor, "I object to this boorish dunning. I would have you know that my great-great-grandfather was one of the early settlers."

"And yet," sighed the anxious tradesman, "there are people who believe in heredity."—Argonaut.

Constipation causes and aggravates many serious diseases. It is thoroughly cured by Dr. Pierce's Pleasant Pellets. The favorite family laxative.

The spoke of the wheel which creaketh most, doth not bear the greatest burden in the cart.—Thomas Fuller.

DR. J. H. RINDLAUB (Specialist), Eye, Ear, Nose and Throat Fargo, N. D.

Experience may be the best teacher, but some people prefer a more fashionable school.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

Some of us are apt to take advice that doesn't belong to us.

If your dealer does not keep the kind you want, send us his address and the price in stamps for a full size package.

WHITTEMORE BROS. & CO.,
20-26 Albany St., Cambridge, Mass.
The Oldest and Largest Manufacturers of Shoe Polishes in the World.

If You Have a Sickly Youngster Try This Free

The family with young children that is without sickness in the house now and then is rare, and so it is important that the head of the house should know what to do in the little emergencies that arise. A child with a serious ailment needs a doctor, it is true, but in the majority of instances, as any doctor knows, the child suffers from some intestinal trouble, usually constipation.
